# CONGRESSIONAL RECORD

AND

# APPENDIX,

## FIFTY-NINTH CONGRESS, SECOND SESSION.

Mr. OVERSTREET of Indiana. Mr. Speaker, I am very sorry that I can not answer the gentleman, but the time has expired.

Mr. GRIGGS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GRIGGS. Mr. Speaker, in case this motion is voted down, would it be in order to ask unanimous consent to take the Senate amendments from the Speaker's table and move to concur in certain amendments?

The SPEAKER. It is always in order to ask unanimous consent. To fully answer the gentleman, if this motion is voted down in theory, automatically it goes to the Committee on the Post-Office and Post-Roads.

Mr. GRIGGS. In theory. That is all right.

The SPEAKER. Well, actually it goes there, but unanimous consent could bring it back. The question is on suspending the rules and agreeing to the motion of the gentleman from Indiana.

Mr. GRIGGS. Mr. Speaker, I ask for the yeas and nays to save time.

The question was taken; and the yeas and nays were refused.

The SPEAKER. The question is on agreeing to the motion of the gentleman from New York.

The question was taken; and the Chair announced the ayes appeared to have it.

On a division (demanded by Mr. GRIGGS) there were—ayes 130, noes 46.

So (two-thirds having voted in favor thereof) the rules were suspended and the motion was agreed to.

The SPEAKER. The Chair announces the following conferees.

The Clerk read as follows:

Mr. OVERSTREET of Indiana, Mr. GARDNER of New Jersey, and Mr. MOON of Tennessee.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23821) making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24925) making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes.

SUBSIDY BILL.

Mr. GROSVENOR. Mr. Speaker, I would like to call the attention of the gentleman from New York to my statement. I ask unanimous consent that general debate on this measure may continue until 6 o'clock to-night, and to-morrow to 6 o'clock, a recess until 8 o'clock, and that to-morrow evening, beginning at 8 o'clock, general debate shall begin again and proceed until 11 o'clock to-morrow night, and that thereupon the House shall adjourn and that the rule now in existence shall carry the bill forward under its provisions.

The SPEAKER. The gentleman from Ohio asks unanimous consent that general debate, under the order, shall continue until 6 o'clock this afternoon and until 6 to-morrow, and at 6 o'clock to-morrow the committee, by unanimous consent, shall be considered as recessed until 8 o'clock to-morrow evening, and that general debate shall continue in the committee from 8 o'clock until 11 o'clock to-morrow evening.

Mr. SULZER. Mr. Speaker, I object.

The SPEAKER. The gentleman from New York objects.

Mr. GROSVENOR. Mr. Speaker, the gentlemen on the other side, after making various concessions, had fully agreed upon this, and it seems to me the gentleman from New York ought not to interfere.

Mr. SULZER. Mr. Speaker, I withdraw the objection.

The SPEAKER. Is there objection?

Mr. GOULDEN. I would like to suggest to my colleague from Ohio to make it 5.30 this afternoon. Otherwise I am entirely agreeable to it.

Mr. SHERLEY. Mr. Speaker, reserving the right to object, as I understand the request as stated by the Chair, it would permit an adjournment of the committee at 6 o'clock to-morrow evening until 8 o'clock to-morrow night without regard to a quorum of the committee being present at that time.

The SPEAKER. A quorum of the committee is always necessary, if the point is made.

Mr. SHERLEY. I have no desire to object, but I shall insist upon a quorum being present during the deliberations of the committee.

The SPEAKER. The committee can not proceed if the point of no quorum is made.

The Chair hears no objection. The committee will resume its sitting under the order.

The committee resumed its session, Mr. CURRIER in the chair.

The CHAIRMAN. The gentleman from Illinois [Mr. RAINEY] is recognized.

Mr. KAHN. Will the gentleman yield for one question? I understood the gentleman to say that if an American ship goes to a foreign port, if it is an ocean-going ship, and is repaired in that foreign port, when she returns to this country the owners have to pay duty on the repairs made.

Mr. RAINEY. The gentleman misunderstood me. I did not say that. Every vessel enrolled and licensed, or simply licensed, that makes repairs in a foreign port must pay duty on the repairs as soon as the vessel is brought back to an American port. If a vessel engaged in our coastwise trade, licensed or licensed and enrolled, is blown from her course and is repaired in a foreign port as the result of any kind of accident, as soon as that vessel comes back to an American port the owners must pay the amount of the duty on the repairs that go into her.

Now, the trouble with the development of the merchant marine in this country is that no bill ever receives the attention of this House which attempts to repeal or modify these absurd navigation laws. The only bill that can ever get out of a committee is a bill which provides for the payment of a subsidy—which provides for taking money out of the pockets of the people and paying it over into the coffers of the rich who are able to build ships that cost a million dollars. There are 1,150 firms and individuals in this country, according to the last edition of Lloyd's Register, engaged in the business of building ships, repairing ships, or furnishing supplies for ships. And when I introduced my bill providing for free raw material for ships, one of the simplest ways of encouraging the development of the American merchant marine, I wrote to every one of these 1,150 firms and individuals, and sent them a copy of my bill, which simply provides that vessels may be built and repaired and equipped in American ports out of material admitted duty free, no matter in what trade those vessels are to be used.

I received nearly five hundred replies from firms and the individuals who are directly interested in this industry, and every one of them, except twelve or thirteen, favored this kind of legislation, and those twelve or thirteen companies, every one of them, expected to obtain a subsidy either by this kind of a bill or by some other bill, and they were therefore opposed to it.

Now, no vessel simply licensed, or licensed and enrolled, can touch at a foreign port except the vessels engaged in trade upon the waters of our northern frontiers. And up here on the St. Lawrence River we have an example as to the effect of our navigation laws in this particular. The Thousand Island and St. Lawrence River Steamship Company, an American company, is operating a line of American boats. Every year thousands and thousands of American citizens take the trip down the grand rapids of the St. Lawrence to Montreal, but nearly all of them go on vessels owned by Canadian companies. Under the law vessels licensed and enrolled, or simply licensed, if repaired or equipped or even provisioned in a foreign port must pay duty on the provisions or the repairs or on any new equipment as soon as they get back to American ports.

The CHAIRMAN. The gentleman's time has expired.

Mr. GOULDEN. Mr. Chairman, I yield five minutes more to the gentleman.

The CHAIRMAN. The gentleman is recognized for five minutes more.

Mr. RAINEY. This American line of ours is struggling along there, competing with the Canadian lines. There is no place within the boundaries of the United States where they can repair or equip their vessels. They must do it all on the other side, and before they can even stop on this side of the river they must pay 50 per cent duty on every item of material that goes into any repairs they make. And in this connection I want to send to the clerk's desk——

Mr. LITTLEFIELD. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Illinois [Mr. RAINEY] yield to the gentleman from Maine?

Mr. RAINEY. Yes, sir.

Mr. LITTLEFIELD. I just wanted to inquire under what provision of the law duties were imposed upon repairs made under such circumstances.

Mr. RAINEY. Under section 4318 of the law, and if I had the time I would read it to the gentleman.

Mr. LITTLEFIELD. Section 4318 of the Revised Statutes?

Mr. RAINEY. Yes; Revised Statutes. Now, the operation of this line furnishes a splendid object lesson as to the effect of this portion of our navigation laws. I send to the Clerk's desk to be read in my time a letter written to me by the general manager of the Thousand Islands and St. Lawrence River Steamboat Company.

The CHAIRMAN. The letter will be read in the time of the gentleman from Illinois.

The Clerk read as follows:

THOUSAND ISLAND AND ST. LAWRENCE RIVER STEAMBOAT COMPANIES,
*Kingston, Ontario, January 25, 1906.*

Hon. H. T. RAINEY,
*House of Representatives, Washington, D. C.*

DEAR SIR: Absence from home explains delayed acknowledgment of your communication of the 6th instant in connection with the bill which you have introduced in Congress providing for the importation in bond of materials for constructing, repairing, and equipping ships, and for other purposes.

I can assure you that we are heartily in accord with this bill. The Thousand Island Steamboat Company, which is an American corporation organized under the laws of the State of New York, has been in operation on the river St. Lawrence, in the Thousand Island region, between Cape Vincent, Clayton, and Ogdensburg, for a quarter of a century, and I can assure you that American shipping in this district has been greatly discriminated against in favor of Canadian tonnage by the existing laws of the United States Government in connection with repairing, supplies, equipment, etc., of such steamers when they happen to be in Canadian ports.

When I tell you that there is not an accessible port on the American side, from Cape Vincent to Ogdensburg, where steamers of any size can be docked and repaired and that our American boats are practically forced to come to Kingston every winter to lay up and have their outfitting and repairing done on the Canadian side before being placed in commission in the spring, and obliged to pay 50 per cent duty on labor, material, and equipment furnished on this side, you will realize the disadvantages against which we have been working in endeavoring to compete in the excursion business on the river St. Lawrence with Canadian steamers, which are saved the expenses we are forced into.

I have taken up this matter individually several times at Washington in an endeavor to secure relief, but to no avail. We have been struggling along, nevertheless, doing our best with this burden upon us, and your bill seems like a ray of sunshine from the clouds, and I can assure you it has our strongest indorsement.

The summer traffic on the St. Lawrence River is increasing every year, and we are endeavoring to compete with the Canadian steamers for the business, but we are having a trying time on account of the heavy restrictions imposed by the United States Government on all work done and materials furnished in foreign ports.

When I tell you, as you are undoubtedly aware, that all the summer tourist trade to Montreal, down the grand rapids of the St. Lawrence River from the American side, is performed by Canadian steamers, when it is only just and natural that American boats should be competing for this service, you will realize that Canadian tonnage has been having the advantage and that the stringent regulations of the United States Government have been a great handicap and have had a dampening effect upon the efforts to compete for this service. In fact, we are charged duty upon the docking of American steamers in Canadian ports even when no material repairs are effected. We are refused the privilege of importing American paints and painting our steamers on this side without the payment of duty, both on the material and labor. We are forced to pay duty on all the provisions and supplies for passengers and crews, if taken on an American boat in a Canadian port, as soon as she touches the first American port. We would be very grateful for relief, I can assure you, and it would be a strong incentive to increasing the tonnage of American ships in these waters if such relief could be effected.

I would be glad, if it is possible at this late hour, to have included in the bill freedom from duty on labor, as well as on materials, when work is done on an American bottom in a foreign port, and also that no duty should be exacted on provisions and supplies furnished for the crew and passengers when taken in Canadian waters. I simply offer this as a suggestion, as we are now charged 50 per cent on all labor and a high rate of duty on supplies.

If I can be of any service in any way or can give you any further information that will be effective, I will consider it a favor if you will call upon me.

Yours, truly,
HOWARD S. FOLGER,
*General Manager.*

Mr. RAINEY. Now, I want to say to those gentlemen who at the present moment——

The CHAIRMAN. The time of the gentleman has expired.

Mr. GOULDEN. Mr. Chairman, I yield the gentleman five minutes more.

Mr. RAINEY. I want to call the attention of those gentlemen who I see are now looking this matter up since the reading of this very interesting letter to the fact that under section 4318 vessels that are engaged in business on our northern, northeastern, and northwestern frontier are permitted to touch at foreign ports when they are simply licensed and enrolled.

No other American vessel can do this under license and enrollment. All other licensed or licensed and enrolled vessels must confine their sphere of operations to the coastwise trade. I want to give notice now that when this bill comes up under the five-minute rule I propose to offer as an amendment the bill I have had pending here for so long, and which provides for free raw material for ships, no matter in what trade they are to be used; which provides simply for carrying into effect the provisions which the gentleman from Ohio erroneously stated yesterday are already in our law; that provision which the President of the United States thinks is already there; that provision which Secretary Root thinks is already there. Now, the fact that these gentlemen think it is there simply shows how little is known about some phases of our navigation laws. Now, I have a letter here written by Mr. L. E. Lunt, of Melrose, Mass., a vessel owner, which shows the importance of free raw material for ships. I am going to put it in the RECORD here.

The letter referred to is as follows:

JANUARY 20, 1906.

Hon. H. T. RAINEY, *Washington, D. C.*

DEAR SIR: I am particularly pleased by reading the bill you have introduced for free importation for goods to be used in construction and repairs for American shipping, and I trust very much that this bill will become a law.

Here are some of the principal materials used in the construction of a sailing ship or steamship: Steel plates, angles, and beams; galvanized-wire rigging; cotton duck; manila rope; bar iron; steel rivets.

The above will certainly cover 75 per cent of the material to be used in the construction of a steel vessel; and I would ask if all of the above are not controlled by trusts?

I was—in fact, am to-day—interested with some other parties to build a 3,000-ton American sailing ship, but the present prices of material have deterred us from going ahead, as, with the present existing conditions, we could not expect to build this vessel within 30 to 35 per cent of what they could build the same vessel in England for; and while we may expect to have our vessels cost us more, still this is far too much difference, and we have "hung up" the matter till conditions change.

By the passage of your proposed bill this would allow us, and no doubt many others, to go ahead and build up our American shipping.

Yours, very truly,

L. E. LUNT.

Here is another letter, written by Dr. Oliver W. Cobb, of Easthampton, Mass. It shows what could be done if we had free raw material for ships. I read it for that purpose.

The letter was as follows:

EASTHAMPTON, MASS., *January 9, 1906.*

Hon. H. T. RAINEY.

DEAR SIR: Received yours of the 6th instant. I am heartily in favor of the proposed bill.

Our present law has resulted in a continuance of building of wooden vessels, which are obsolete.

Our wooden coastwise fleet would be put out of business if they had to compete with foreign-built steel vessels. But I believe that, were we able to import the materials, a fleet of steel vessels would be built at Atlantic ports both for foreign and coastwise business. Nor do I believe that any great quantity of material would be bought abroad. The American producer of those materials would meet the price and the increased demand would help to make good the reduced margin of profit.

In 1902 I had a marine architect make for me the plans for a first-class steel sailing vessel to carry 2,500 tons cargo. This ship was planned to be available for any business. We found that the materials would cost $8,000 more if bought here than if bought abroad. Your proposed bill would have made the estimated cost of this ship $67,000 instead of $75,000. We could figure a fair return for our money at that price; at $67,000 she would have been an attractive investment. As we were about to contract for this ship the steel people advanced the price, making it to cost $5,000 more, and some labor movement coming just at that time caused the builders to raise their estimate $10,000 more, making the whole $90,000.

I immediately dropped the whole matter, as at that price she could make no fair return to her owners.

I wish while you are on this matter you would take up the matter of quarantine. Quarantine should be a national regulation, and, as it is enforced for the benefit of the whole people, it would be but just for the public Treasury to bear the expense. Give to American vessels free quarantine and indemnity for time detained and pass your bill, there will be small need for any subsidy except for mail service.

Yours, very respectfully,

O. W. COBB.

Here is a letter from William Matson, of the William Matson Navigation Company, of San Francisco, Cal. I read these letters because they are from practical men, whose opinions are of value.

The letter is as follows:

MATSON NAVIGATION COMPANY,
*San Francisco, Cal., January 30, 1906.*

HON. H. T. RAINEY, *Washington, D. C.*

DEAR SIR: I have duly received your favor of the 6th instant, inclosing a copy of a bill introduced by you to admit into the United States free of duty any material necessary for the construction and equipment of ships.

American steel can be purchased in England cheaper than in the United States, and for that reason I am heartily in favor of such a bill and think that it would do more to stimulate the shipbuilding industry than any form of ship-subsidy bill that has been introduced.

Prices quoted on steel vessels to-day make new construction almost out of the question, and if cost is not an object, the time required for construction, owing to inability to get deliveries of steel, places a serious obstacle in the way.

Only recently I asked for bids on a new steamer of about 8,000 tons dead weight capacity, but in order that the builders might quote on a delivery suitable to my requirements, they found it necessary to figure on English material, which, with duty and freight added, made the price prohibitive.

I notice a bill has been introduced in this Congress to prohibit foreign-built vessels securing the American flag. I think this bill is unjust, considering the present price of material used in ship construction.

I have been fortunate enough to secure American registry during this session of Congress for the Spanish ship, *Gaditano*, on which I spent $126,000 for repairs. This is more than three times the cost of the ship, but notwithstanding this fact, I had considerable trouble in securing the flag.

I think every American shipowner would be willing to build his vessels in the United States if steel plates could be purchased at a reasonable price.

I am sending a copy of this letter to some of our California Representatives.

Yours, truly,

WM. MATSON.

Here is a letter from a company which is planning the construction of its first steel ship. This company has recently investigated the subject, and the letter shows the importance of free raw material for building and equipping ships. I read a letter from the president of the Enterprise Transportation Company, of New York City. The letter is as follows:

ENTERPRISE TRANSPORTATION COMPANY,
*January 18, 1906.*

Hon. H. T. RAINEY,
*House of Representatives, Washington, D. C.*

DEAR SIR: Your letter of the 6th instant, inclosing copy of bill introduced by you in the House on the 4th, could not have reached us naturally feel most keenly the excessive prices charged for construction of its first pair of new steel ships for coastwise service, and we naturally feel most keenly the excessive prices charged for construction material, which are fictitiously high, as American manufacturers do not seem to figure their price on the cost of production, but rather on its cost in England plus the tariff. We do need a reduction of this tariff in order to bring our steel makers to time.

The boats we are planning can be built in England at from 30 per cent to 40 per cent less than we are being charged in this country. While we would hesitate to advocate the removal of laws which bar us from using in our service foreign-built ships, we most heartily indorse your bill, which opens to American shipbuilders foreign-made materials.

Yours, very truly,

DAVID WHITCOMB, *President.*

The letter I have here, and which I propose to print, shows the importance of free raw material for ships on account of the inability of American capital to buy ships. American capital is being compelled to invest in foreign ships sailing under foreign flags. This letter is an interesting one, and presents the subject stronger than I am able to present it. I propose to print it without further comment. The letter is from J. J. Moore, president of J. J. Moore & Co., of San Francisco, Cal. The letter is as follows:

SAN FRANCISCO, CAL., *January 31, 1906.*

Hon. H. T. RAINEY,
*House of Representatives, Washington, D. C.*

DEAR SIR: Your favor of January 6, with copy of your bill, H. R. 10090, duly to hand, and in reply thereto beg to say that we have carefully studied the proposed bill, and whilst it may bring some relief to shipping men and the shipping interests of the United States, it appears to us not to go far enough. The fact that you have introduced this bill in the House of Representatives is evidence that you have gone into the matter of shipbuilding in the United States. We would ask if you can see how our merchant marine can be increased very much within the next ten or fifteen years from the present shipbuilding facilities or from any new concerns likely to be built? It is our opinion that in face of the large amount of Government work being done and to be done little could be accomplished in the way of turning out merchantmen. There is no question of doubt but what the trade of the United States is to-day suffering severely for the want of sufficient American vessels to do our coasting business, and every year will add to this difficulty. Under the circumstances, would it not be a feasible and businesslike proposition for Congress to pass an act permitting American citizens to buy foreign-built ships and receive for them an American registry by paying a reasonable duty, even to the extent of 50 per cent? Surely no honest shipbuilder can object to competition on foreign-built vessels with such a tariff, and we can assure you that it would be a great relief to the shipping industry of the United States. This bill might be made operative for a term of years—say ten years—and if by that time our shipbuilding facilities had increased to an extent that they could fill our requirements, it might be allowed to die.

There is another bill which might be passed that would be of advantage to a great many American merchants doing a foreign business—that is, to permit them to buy foreign-built vessels and own them in their own names under a provisional register prohibiting them from the coasting business. Surely such a bill as this could not injure American shipbuilders or shipowners. For instance, we know of many vessels which are in reality owned by American citizens, but are under foreign flags, with the result that they pay taxes in a foreign country and also provision and spend considerable money in foreign ports that would be spent at home if under an American flag.

We must say that we have consulted many shipping men on this subject, and they all agree that either of the bills above referred to would be a great relief to shipping men without any injury to shipbuilding.

We would like to mention a circumstance that occurred to us a few years ago, as follows: A steel schooner was built in Scotland, at a cost of $52,000, with American money. We wished to have a similar vessel built at home under the American flag. We put the plans and specifications before a local firm of shipbuilders, and the lowest price we could obtain was $133,000. Under such circumstances how is it possible for American ships to compete with foreigners and pay interest upon such an enormously increased cost?

Trusting that our suggestion may be of some value to you and placing ourselves at your command should you desire any further correspondence from us, we are, dear sir,

Yours, faithfully,

J. J. MOORE & CO.,
J. J. MOORE, *President.*

I want to print here a letter from the Thames Towboat Company, of New London, Conn., to the same effect. The letter is as follows:

THE THAMES TOWBOAT COMPANY,
*New London, Conn., January 9, 1906.*

Hon. H. T. RAINEY, M. C.,
*House of Representatives, Washington, D. C.*

DEAR SIR: We have your letter of the 6th instant inclosing copy of bill you have just introduced, providing for free materials for constructing, repairing, and equipping ships.

We beg to express ourselves as very much in favor of this bill, and we trust you may be able to have it passed.

We presume this would include steel-wire hawsers for equipping ships, and in this connection would say that we recently had occasion to purchase a steel towing hawser for one of our tugs, the *Paul Jones*, and we purchased same from England, as we found that we could buy the hawser there for less money, including the duty, freight, etc. This shows one instance of the high prices that obtain in this country on account of the steel trust.

I would say further with regard to the bill, you will notice, as per our cards inclosed herewith, that we are engaged in coastwise transportation, and not in the foreign trade; also, that most of the work at our yard is the building and repairing of wooden vessels, with some occasional work on steel vessels.

I should judge the passage of this bill would not directly benefit this company, but at the same time, as stated above, we are very much in favor of it, and in fact we have come to the opinion that excessive duties on all material coming to this country should be abolished, and let the burden fall where it will.

I think the whole country would be benefited by the bill you have presented.

Very respectfully,

THE THAMES TOWBOAT COMPANY,
B. H. COODAL, *Treasurer.*

In this connection I also received a letter from S. O. Neff, of the S. O. Neff Transportation Company, of Milwaukee, Wis. It shows the difficulties the American companies encounter in an attempt to pay tribute to the American Steel Company and other American protected companies and at the same time continue the building of ships in American yards.

The letter is as follows:

S. O. NEFF TRANSPORTATION COMPANY,
*Milwaukee, Wis., January 12, 1906.*

Hon. H. T. RAINEY,
*Washington, D. C.*

DEAR SIR: Yours of January 6, 1906, at hand; contents noted. In reply will say I favor your bill. I was South a few years ago, looking over the coast for future business with our Lake steamers, and was disgusted with the conditions of things there. Mr. Hubbard, of Mobile, told me parties there wanted a couple of fruiters. Got up plans and specifications; took in the American shipyards; best offer was $125,000 each. The foreign yards built the two for that price. Will say they are manned by foreign crews and can beat the life out of us Americans in the fruit trade out of the Gulf ports.

There is a nice trade there with those little fruiters, and all should fly the American flag. I dare say they are owned mostly by American capital.

Yes; push your bill along, although I don't want to go on record as being against our American industries.

Yours, truly,

S. O. NEFF.

To the same effect is the following letter from Richard Chilcott, a ship and freight broker of Seattle, Wash.

The letter is as follows:

SEATTLE, WASH., *January 17, 1906.*

Hon. H. T. RAINEY,
*House of Representatives, Washington, D. C.*

DEAR SIR: I have before me your circular letter of January 6, together with House bill No. 10090, providing for the importation, duty free, of all material used in the construction of iron and steel vessels. This is a subject on which I have taken the liveliest interest. During the last session I wrote the Hon. J. S. WILLIAMS, suggesting that such a clause be inserted in the merchant-marine bill then under consideration by Congress.

By a reference to the reports of the investigations of the Merchant-Marine Commission it will be shown that a shipbuilder in Great Britain and elsewhere in Europe can buy American-manufactured steel plates for ship construction laid down at their doors for 33 per cent less than the American shipbuilder can buy from the same people the same class of material, or, in other words, the British builder can buy from the American Steel Corporation material at $27 per ton, while at the same time the American builder must pay $40 per ton.

Another phase of the situation is this: A British shipbuilder has a plant that has cost him, say, $1,000,000, and the amount of his total capitalization is the same. With such a plant he has the capacity to perform $5,000,000 worth of work annually, and when doing that amount of work can afford to do it on a margin of 2 per cent, which gives him a profit of 10 per cent on his capitalization. The American concern with the same plant is capitalized at $5,000,000, on which is outstanding, say, two and one-half millions in bonds, bearing 5 per cent interest, and probably the same amount of preferred stock guaranteeing 7 per cent, making a total fixed charge of $300,000, which must be met before the common stock reaps any benefit.

Allowing the Amcrican the same amount of work as the British, 6 per cent margin would have to be figured to cover these fixed charges and 10 per cent additional to give the same proportion of profit as the latter enjoyed. These are the sole reasons why we can not compete with foreign shipbuilders.

While this may be considered superfluous, it is submitted to show the reasoning of shipping people, and I will conclude with the assertion that if we are given material at the same price as the foreign shipbuilder secures it from the American manufacturer, and if American shipbuilders were doing business on a basis of the actual cash value of their plants, a vessel of any description could be built in the United States as cheaply as in any other part of the world.

The admission of material free will be a long step in the right direction.

If I can give you any further information on this subject, I shall be only too pleased to do so.

Respectfully,

RICHARD CHILCOTT.

I have here a letter from A. T. Stubbs, an old ship captain who had been up against our navigation laws. The difficulties he has encountered would be amusing if they did not so strongly show the gross deficiencies of our navigation laws. It is surprising when such absurd situations can be brought about under our laws that for so long a time we have been without free raw material for ships. This letter also shows some of the absurdities of the present protective tariff system.

The letter is as follows:

BUCKSPORT, ME., *January 12, 1906.*

Mr. RAINEY.

DEAR SIR: I have yours of 6th instant, inclosing draft of a bill relating to duties on materials entering into repairs, building, and equip-

ment of American vessels in foreign trade and ports and some other matters, all of which I fully indorse and believe in. I have had some experience of how those laws work sometimes, some of which I beg to relate. Once a few years ago we fell in at sea with a derelict hull burned to the water's edge. We boarded this hulk, or rather went alongside and fished out some copper bolts which had burned out of her topsides. On arriving at a home port—Boston—we were required to *pay duties* on this old metal. There was no way of knowing or identifying this hulk as to name, rig, or *nationality*. Again, I once hove up on my anchor from the bottom of the river at Mobile a derelict anchor, lost to all intents and purposes on American soil. After my vessel was nearly loaded I was informed by the custom-house officials that they had some claim, or thought they had, to the anchor *on account of duties*, taking it for granted it must be of foreign make.

They refused to clear my vessel (bound to Cuba), and I had to appeal to Washington, who ordered them to take a deposit for duties and clear my vessel. This I did, leaving with them $45. This affair cost us a month's time and $500, about, and I have never seen my $45 since. Yes, Mr. RAINEY; the English have the best and simplest navigation laws, and we fare better in some of their ports than many of our own. The idea that we can not make repairs in a foreign port, use wire rigging and anchor, or even to remetal if necessary without paying duty or being shut out from coasting on account of it! Yes, Mr. RAINEY; we make chains and anchors, wire rigging, and also metal sheathing cheap enough here, and such laws are needless and ought to be repealed.

I fully indorse your bill as a short cut to do so.

Yours, truly, A. F. STUBBS.

The following letter from George H. Storck, managing director of the Siberian Trading Company (Limited), with offices at 123 Fifth avenue, New York City, shows how American capital is now seeking investment in ships sailing under foreign flags.

The letter was as follows:

THE SIBERIAN TRADING COMPANY (LIMITED),
*New York, January 25, 1906.*

Hon. H. T. RAINEY,
*House of Representatives, Washington, D. C.*

DEAR SIR: In answer to your letter of January 6, would say that I am in favor of any bill that will help American shipbuilding, and I certainly think that your bill, if put through, will be a step in the right direction.

On account of the present exorbitant cost of ships in America I am obliged to do all my shipping under the British flag. Of course that prevents me from doing a coastwise business. But I would rather keep out of it than to have high-cost ship and personnel, for if the coast trade falls off, could not use such a ship in any other part of the world and make it pay.

Yours, truly, GEO. H. STORCK.

I propose to print here two letters which speak for themselves—a letter from the George Lawley & Son Corporation, engaged in the manufacture of steam and sailing yachts at South Boston, Mass., and a letter from the president of the Craig Shipbuilding Company.

The letters were as follows:

SOUTH BOSTON, MASS., *January 9, 1906.*

H. T. RAINEY, M. C.,
*House of Representatives, Washington, D. C.*

DEAR SIR: We beg to acknowledge receipt of yours of the 6th in relation to your bill for "Free materials for shipbuilding." The matter is of considerable importance to us. We know that in the past we have been, at many times, handicapped in bidding for work through quotations which our customers have received from England. We feel sure that the price of materials enters largely into the difference of cost.

Also in the matter of "time required for building vessels," we know that we are almost always handicapped through the inability of the mills to furnish us with material promptly, and feel sure that if we had a chance to import, without too much loss, that we could get the goods more promptly and give better satisfaction to our customers.

We have in the past been obliged to import steel material in order to meet our customers' views in regard to time of delivery.

Also in regard to lead. All of our yachts are equipped with lead keels. Is it your intention to have free lead when used for vessel construction embodied in your bill?

We feel sure, therefore, that if your bill goes through that many yachts now built for American citizens in England will be built in this country.

We believe that all people in our line of business will be interested in having your bill go through.

Very truly, yours,

GEORGE LAWLEY & SON CORPORATION,
By THOMAS HIBBARD, *Treas.*

CRAIG SHIPBUILDING COMPANY,
*Toledo, Ohio, January 8, 1906.*

Hon. H. T. RAINEY,
*House of Representatives, Washington, D. C.*

DEAR SIR: Yours received, and we hasten to reply. We are protectionists first, last, and all the time, and we define protection as that assistance to an industry which we believe our people, our climate, our soil, and the habits of our people are such that we can reasonably expect in time, with the known energy of our people, will be able to compete and ultimately excel and undersell in the markets. Now, we say that shipbuilding, ship owning, and sailing and operating are in the line of habits of the people. The writer well remembers when in the immediate neighborhood of New York thirty ships were being built at one time, and when three foreign frigates were being built in New York at the same time. The reason we lost our prestige has been well known, namely, the civil war and the change from wooden boats to metal, and at that time having large forests and no iron manufactories. The writer well remembers when steel rails were about $140 per ton, and when the tariff of, I think, $17 per ton was put on them it stimulated capital to go into the iron-manufacturing business, and with such success that by the natural competition between ourselves we have reduced the price so that steel rails have been bought as low as $14 per ton at the mill; and look how the industry has increased. In 1866 something less that a million tons of ore were brought from Lake Superior, and then the freight was $8 per ton, and the vessel only made a fair return on the investment. Now, this year just closed we brought down 33,000,000 tons, and at a cost of only $0.75 per ton, and owners of floating property received as profitable returns as when freights were $8. Now, this was accomplished by our own natural competition. This man, seeing his neighbor making money in that business with the tools he had, increased the productiveness of his tools and reduced the cost.

In 1866 most ore came down in schooners carrying about 500 tons and making seven, or at the most eight, trips per season; now steamers carry from 6,000 to 12,000 tons and make from sixteen to thirty trips, depending on whether they are loaded on returning trips or not. Now, where will your bill help builders and owners? It will help them because the metal industry of the United States is on such a firm foundation that a tariff is not needed at all, for they are now holding up all industries by means of the tariff. It is a fact easily proven that metal to-day is produced in the United States at less actual cost than any country in the world, and they, the metal manufacturers, hold up the users of metal to the amount of the tariff and more.

The writer was abroad a year ago and proof was given him to make one believe that the steel corporation actually contracted and delivered to Harlan & Wolf, at Belfast, 4,000 tons of plate at $24 per ton, delivered. That was $20 at the mill, $22 at tidewater, and $24 at Belfast, Ireland, when we were paying at the same time and same specifications $32 at mill or $34 delivered. Now, I say to you, if your bill would pass, it would make the price the same here as it is in Glasgow, freight and insurance added, and we would use home material except in a few cases, for the delay attending delivery from Glasgow would be such that, at the same figures, the home market would get the business.

We would not advocate this did we think it would curtail one ton of production in the United States, but we think it would take enough of the excess profit of making steel and give to the vessel owners, thereby inducing capital to invest in the merchant marine, and with the present subvention bill enable us to again compete for the commerce of the world, with the belief that the natural competition between ourselves would be such that in ten or twelve years would enable us to build ships for England, as we did in 1856 and prior to that time.

The writer has been connected with the merchant-marine industry since 1856 and hopes to live long enough to again see the Stars and Stripes in every port of the world of any significance.

Would be glad to try to answer any interrogatives that would assist you in an argument in favor of this bill.

Respectfully, yours,

THE CRAIG SHIPBUILDING COMPANY.
JOHN CRAIG, *President.*

The CHAIRMAN. The time of the gentleman has expired.

Mr. LITTLEFIELD. I ask that the gentleman's time may be extended one minute, so that I may ask him a question.

Mr. GOULDEN. I yield twenty minutes to the gentleman from Minnesota [Mr. STEENERSON]. [After a pause.] If the gentleman will withhold for a minute, I want to yield for a minute to the gentleman from Maine, who desires to ask the gentleman from Illinois a question.

Mr. LITTLEFIELD. What I want to ask the gentleman from Illinois is this: Whether or not the law of which he speaks is not confined to the northern, northeastern, and northwestern frontier of the United States? In other words, the Canadian boundary?

Mr. RAINEY. I have confined it to that.

Mr. LITTLEFIELD. I did not so understand the gentleman.

Mr. RAINEY. I said these are the only ships that can touch at a foreign port under license and enrollment. All vessels connected with the coastwise trade are under license and enrollment; every one of them must pay a duty upon repairs they make in a foreign port as soon as they come to the home port.

Mr. LITTLEFIELD. Where did the gentleman get authority for the last statement? I have the statute in my hand, and the whole thing is confined to the northern, northeastern, and northwestern frontier of the United States.

Mr. RAINEY. Revised Statutes, section 3114.

Mr. LITTLEFIELD. Yes.

Mr. RAINEY (reading):

The equipment, or any part thereof, including boats, purchased for, or the expenses of repairs made in a foreign country upon a vessel enrolled and licensed under the laws of the United States to engage in the foreign and coasting trade on the northern, northeastern, and northwestern frontiers of the United States, or a vessel intended to be employed in such trade, shall, on the first arrival of such vessel in any port of the United States, be liable to entry and the payment of an ad valorem duty of 50 per cent on the cost thereof in such foreign country; and if the owner or master of such vessel shall willfully and knowingly neglect or fail to report, make entry, and pay duties as herein required, such vessel, with her tackle, apparel, and furniture, shall be seized and forfeited.

And section 4330 is another section, which says:

No license, or enrollment and license, nor renewal of either, shall hereafter be issued to any vessel until the collector to whom application is made for the same is satisfied, from the oath of the owner or master, that all equipments and repairs made in a foreign port within the year immediately preceding such application have been duly accounted for and the duties accruing thereon duly paid, etc.

Mr. LITTLEFIELD. That is merely section 3114.

Mr. RAINEY. No; it is 4330.

I think I can, perhaps, assist the gentleman from Maine by printing here a letter from the Commissioner of Navigation, written to me about a year ago, which very clearly states the law and makes an excellent brief on the subject. The gentleman will find by looking the matter up that the law is as I have stated. There is no question about the law; it is clear.

The following was the letter referred to:

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF NAVIGATION,
*Washington, January 24, 1906.*

Hon. HENRY T. RAINEY,
*House of Representatives.*

SIR: Replying to your letter of the 23d instant in regard to the scope of Section 4330, Revised Statutes, I trust the following will make clear the matter which is, on the surface, somewhat involved:

First. Revised Statutes 4330 applies only to licensed vessels, or licensed and enrolled vessels.

Second. Revised Statutes 4337 provides that an enrolled or licensed vessel can not go to a foreign port without incurring the penalty of forfeiture. She must first take out a register for foreign trade. Enrolled or licensed vessels, therefore, can not undergo repairs in a foreign port.

Third. There is one exception to the above: Section 4318 provides that vessels navigating waters on the northern, northeastern, or northwestern frontiers, otherwise than by sea (i. e., Great Lakes), can go to foreign ports on the frontiers under enrollment and license. Consequently they fall within section 4330 and have to pay duty on repairs made abroad. (Besides the Great Lakes there are a few rivers on the northern frontiers, as you are aware.) This is the extent of the application of Revised Statutes 4330; it is not applicable to all American vessels.

Fourth. You will find an enrolled vessel defined in Revised Statutes 4311. It can engage in the coasting trade or fisheries. It also carries a license specifying its trade.

Fifth. Licensed vessels are vessels under 20 tons in the coasting trade (Rev. Stat. 4331). Registered vessels are in the foreign trade (Rev. Stat. 4131) and may engage in the coasting trade (Rev. Stat. 4361). They seldom engage in the coasting trade under register for several reasons, chief among which is that if steam vessels they become subject to state pilotage charges, from which they are exempt if under enrollment or license.

Respectfully, E. T. CHAMBERLAIN, *Commissioner.*

There is only one way in which we can compete with England upon the high seas. If we want to make the progress she has made in the last fifty years we must adopt the methods which make that kind of progress possible; we must thrust these subsidy baggers from our doors and strike off the chains which bind this great industry. We must have free ships and free raw material. Give American capital and American manhood an opportunity and this great industry will soon attain its proper proportions. Give American laborers a chance and the time is not far distant when our merchant marine will be second to the merchant marine of no other country in the world.

The CHAIRMAN. The time of the gentleman has expired, and the Chair was lenient in extending the time.

Mr. STEENERSON. Mr. Chairman, I regret very much that I feel under the necessity of opposing this bill, for it has the indorsement of the President, the Secretary of State, and many others high in the councils of the Republican party and in the Administration. Yet I take it that when the people intrusted the power of originating revenue measures and appropriation bills—of levying taxes—to the House of Representatives, and gave them the control of the purse strings, so to speak, they expected their representatives to act upon their own responsibility and consult their own judgment in the exercise of this great power. The power of taxation is the highest attribute of sovereignty, and those intrusted with it can not shift the responsibility for its exercise upon others. However much I may admire the President and his great Secretary of State, whose great names are so often invoked in favor of this bill, I can not abdicate my judgment and conscience and vote for a measure I believe to be wrong simply because they favor it. My constituents have a right to my judgment, and I am in duty bound to act upon it.

This bill contemplates the imposition of an annual burden of three and three-quarter millions of dollars for at least ten years to come upon the people of the United States for the benefit of a private enterprise. It is in the form of a mail subsidy, but it has never been considered by the Committee on the Post-Office and Post-Roads, to which the subject of foreign mails and foreign-mail transportation is under the rules committed. The bill is tacked onto the Senate bill which was an entirely different measure, a cargo subsidy bill. Now, the arguments advanced in favor of this measure are various. The first argument advanced by the gentleman from Ohio [Mr. GROSVENOR], chairman of the Committee on the Merchant Marine and Fisheries, if I recollect aright, was that this was in its nature similar to the subsidy for many years granted to the railroads carrying special mail trains to the Southwest. As I have opposed that subsidy for four years, and have had the satisfaction of seeing it disappear from the present post-office bill, that argument did not appeal to me very strongly. If it is similar to that mail subsidy, that alone would be sufficient reason for me to vote against it. I don't see how I could consistently do anything else. That argument can not move me.

There are other arguments advanced, principally of a sentimental character. We are appealed to to vote for this subsidy on account of our patriotic feelings and pride in having vessels engaged in the foreign trade, in order that they may fly the American flag in every foreign port upon every sea. We are further appealed to for another sentimental reason. We are appealed to on account of our fear of war, for we are told that in case of war it is necessary to have auxiliary ships as cruisers, transports, and so forth, the assumption being that we have not such ships now.

The chairman of the Committee on the Merchant Marine and Fisheries is quoted as saying of the opponents of this measure: "You would make a waste place of our last shipyard and drive our last shipowners and seamen and shipyard mechanics to choose between the poorhouse and foreign lands." The fact is that all our shipyards are busy. They built 1,221 vessels of 418,745 tons burden during 1906, as compared with 1,102 vessels of 333,316 tons burden in 1905. (See Report of Commissioner of Navigation, 1906, p. 10.) It is repeatedly asserted that we have no ships and no seafaring men; that our merchant marine has been "driven from the seas." I have heard this repeated over and over again. It is a very plausible and taking argument. It is, however, fallacious and unsound.

The gentleman from Illinois [Mr. RAINEY] has already anticipated what I had intended to say on this point. It is this: It is not a fair statement to say that the United States of America have practically no merchant marine; that he have not sufficient men to aid in manning our naval ships in case of war; that we have no ships that are suitable for transports.

I was curious to know what the facts were, and on the 22d of January I wrote a letter to the Commissioner of Navigation of the Department of Commerce and Labor, and by referring to the reports of that Bureau I find that it is not true, as stated, that we have no ships. In fact, we are second in merchant-marine tonnage in the world. I asked the Commissioner to give me the information, and in his letter, which I insert in the RECORD, he says that the total number of vessels of the United States engaged in the coasting trade or domestic commerce, including those under enrollment or license for the fisheries, on June 30, 1906, was 23,568, of 5,735,483 tons. And the Commissioner of Navigation further reports the American vessels registered in the foreign trade, including the whale fisheries, to number 1,441, of 939,486 gross tonnage, making in the foreign, domestic, and coastwise trade 6,674,969 gross tons. The merchant marine of the different countries of the world is given in said report as follows: Great Britain, 10,554,520 tons; United States, 6,674,969; Germany, 2,352,575; Norway, 1,454,425; France, 1,349,327; Italy, 1,032,614.

Now, I call attention to the fact that from this report there is no distinction made either as to Germany, Great Britain or Italy, Norway or France as to their ships engaged in the domestic trade and the foreign trade. The registers and the statistics include all their vessels above 100 tons. I may be mistaken about that, but that is my understanding. Now, the unfairness of eliminating the domestic and coastwise tonnage is apparent. This is a great country, of continental proportions.

Take, for instance, the vessels engaged in trade between the United States and the Hawaiian Islands, distant from ports on the Pacific coast nearly 2,000 to 3,000 miles, and if you include Atlantic ports, a distance nearly equal to halfway round the world. Still those vessels are engaged in coastwise traffic and are not counted. When you count the tonnage of the vessels engaged in domestic commerce, that should be added to the 939,846 tons engaged in foreign commerce. The point is that when they appeal to our fear of war, claiming that we have no sailors and no men from whom to recruit the Navy, they overlook the fact that we stand second in the world, as far as the proportions of our merchant marine are concerned, counting the ships engaged in the coastwise trade as well as in the foreign trade.

Mr. HUMPHREY of Washington. Will the gentleman yield for a question?

Mr. STEENERSON. After I get through, then I will. I believe, therefore, that this subsidy will not accomplish what you think it will. It will simply mean extra pay to a few lines. I understand that the total number of vessels you expect to get under this subsidy of three and three-quarter millions of dollars a year will be only 27 in all.

That is about 2 per cent of the vessels already engaged in the foreign trade, for we have now 1,441 engaged in the foreign trade according to the report of the Commissioner of Navigation. Whether you have 1,441 or 1,468, it seems to me that you will be, so far as supplying the sailors in aid of the Navy, as well off with one number as with the other. You will not increase the available supply of seamen so very much, only about 2 per cent. The total number of men engaged in the industry was, according to the report of the Commissioner of Navigation,

177,200. That is the total number of men required to man all the merchant vessels and yachts of the United States, including masters. The number of those employed on vessels who are engaged in foreign trade and coast trade has not been separately computed, but it is estimated to be 28,000 of one and 150,000 of the other. When you have such a large number as that already engaged in the seafaring occupations, it seems to me that we are not in any imminent danger for lack of supply of men in the Navy.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. STEENERSON. Not now, but after I get through. I think the fears of gentlemen in that direction are unfounded.

There is another argument, and that is to the effect that in case of war it would be very desirable to have the bulk, if not all, of our foreign commerce carried in our own ships. Now, that sounds very nice, it sounds plausible, but I have heard arguments advanced against it. I do not know whether they are weighty or not, and I leave that to the House. It has been argued by men who have studied naval warfare—and I think it is admitted that future wars will be naval warfare—that in case of war we would not be better off with all of our foreign commerce carried in our own vessels. That is to say, you would have so much more property exposed to the enemy, and you would be more vulnerable than if that commerce were carried in other ships. That is one reason—I do not advance it as my own—but it is enough to show that there are two sides to that question, as you can see.

The man who advocates the great enlargement of the Navy says the Navy is necessary in order to protect commerce. On the other hand, the man who wants a subsidy for ships engaged in foreign trade says you must have a large merchant marine in order to support the Navy. So you travel in a circle. The naval advocate wants a bigger Navy because he is protecting the merchant marine, and the merchant-marine advocate wants subsidies and a larger merchant marine so as to support the Navy. If you support both advocates, you will never end and you will give away all your money. Their demands will be insatiable.

Now, I would like to rehabilitate the merchant marine of the United States engaged on foreign trade. I would like to see our ships go to every port and sail upon every sea, but I believe—and I have given this bill some consideration—that it is utterly inadequate. I believe that it will fail to accomplish what is sought to be accomplished. It will simply be a few millions given away to no purpose. It is a waste of funds. I am afraid it is worse. I am afraid it will drive out all the vessels we now have unsubsidized. We have on our statute books a law—one of the sections of the Dingley law—providing for discriminating duties, but on account of its effect upon so many treaties it has never been enforced, and it is clear to me that if you could enforce provisions of that kind you might get a monopoly of the foreign carrying trade upon the sea, as you have a monopoly in the domestic carrying trade upon the sea.

The only reason that is advanced for the decline of the merchant marine in foreign trade is that foreigners work for less wages. That is true. The committee have compiled statistics in their report to show that the ships sailing from European ports under European flags pay about half the wages that American ships pay; they further show that the ships sailing under the Japanese flag pay a little more than one-third of what the American ships pay. Of course, if that is the case you can not compete; that is impossible. So the proposition comes back to this, Will the people of the United States pay one-half or two-thirds of the wages that the men now receive on American ships? Will you tax yourselves for one-half of the operating expenses of vessels engaged in the foreign trade? Unless you do, the foreign ships will carry the bulk of your commerce. That is inevitable. But if you want to undertake such a task you must be prepared to pay a hundred millions annually instead of two or three. Well, now, it might be advisable to do that if it was absolutely necessary, as it has been claimed here by some people, in order to have an adequate naval reserve or something of that kind. With the best intentions, with the strongest desire to support the Administration in every measure it has advocated, I am unable to satisfy my conscience to vote for this measure. As it looks to me, it is simply taking three and three-quarter millions out of the public Treasury for the benefit of private firms. Taking that much every year, an amount equal to the interest on nearly $200,000,000 at the rate the Government pays. If we should adopt the same policy as was cited by the gentleman from New York [Mr. LITTAUER] in regard to the Cunard Line, in the case of the British Government, where they loan the company money at 2 per cent, we could loan nearly two hundred millions to a private company, and we could borrow it at that same rate, without a cent in subsidy. I regret, as I have said, that I am unable to appreciate the arguments in favor of this bill. I do not believe it will aid our commerce to any material extent. I do not believe that it will supply ships for naval reserves or auxiliary cruisers or transports. I do not believe that it will supply any naval reserve of men that we could not supply by extending the Naval Militia that is already in existence, and which we can recruit from the 177,000 men already engaged upon the seas.

Mr. HUMPHREY of Washington. I would like to ask the gentleman whether he would be in favor of manning our naval vessels with foreign sailors; and if not, I would like to ask him this question: Where is he going to get American sailors, especially upon the Pacific Ocean, when only about 10 per cent of them are American citizens? Where are you going to get your American sailors and men to man your vessels over there?

Mr. STEENERSON. I think a very much larger percentage than 10 per cent are American citizens.

Mr. HUMPHREY of Washington. I have the statement of the president of the sailors' union.

Mr. STEENERSON. The gentleman refers to vessels engaged on the Pacific coast in the foreign trade.

Mr. HUMPHREY of Washington. No; I refer to vessels on the Pacific coast engaged in the coastwise trade.

Mr. STEENERSON. But a very small part of the vessels of the United States are on the Pacific coast engaged in the coastwise trade. A large part are not on the Pacific coast at all. We have over 100,000 outside of the Pacific coast who are engaged in the coastwise trade, and they are not 90 per cent of them foreigners. The gentleman is mistaken.

Mr. HUMPHREY of Washington. I did not say they were. Does the gentleman think the sailors that are on the Great Lakes could be called to command naval vessels, and does the gentleman advocate taking the coastwise vessels, or does the gentleman think that the coastwise vessels are fit for the foreign trade or to act as transports?

Mr. STEENERSON. I will answer that by saying that I am not an expert on seamanship. I have never crossed the ocean, but I have sailed across Lake Superior and once down to Panama, the other day. I was more seasick on Lake Superior than going to Panama, and I say that it takes just as good a sailor to sail the Lakes as it does the ocean, in my opinion. Yet I admit I am not an expert. [Laughter.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. GOULDEN. I yield five minutes more to the gentleman.

Mr. STEENERSON. If you have a vessel engaged in the coastwise traffic from San Francisco to Honolulu, I believe that the seamanship developed on such an extensive trip would be equal to the seamanship developed in a trip across the Atlantic Ocean. I can not see the difference. Or, if you give us a vessel engaged in the coastwise trade between New York and New Orleans, you go along the Atlantic coast, where the storms are as severe as anywhere, and I believe you will develop seamanship there, and I believe that out of these 177,000 men employed on our domestic ships, which amount, as I stated a moment ago, to 23,565 in number, with a total tonnage of 5,735,483—I believe that you will find men as good seamen as you find on the ships sailing across seas to foreign ports. I can see no reason why you should not. Now, when you classify all of these vessels as not to be counted in our merchant marine, you overlook the fact that we are a continental country. Take Italy, for instance. The trips that her vessels make to foreign ports are not as long as trips from New York around Cape Horn or over to San Francisco. Still that is a coastwise ship, or a ship that goes from New York to Panama, which is a coastwise ship. So I say it is not fair to count these out and say that we are absolutely a nonentity when it comes to the merchant marine.

The gentleman from Illinois was right when he said we stood second among the nations of the world on the question of tonnage and number of men employed upon the seas. I therefore see no force in this argument appealing to our fears that we must do this or have no sailors to supply our Navy. I see very little in it so far as concerns the claimed advantage it would be in case of war to have our foreign commerce carried by our own ships. It seems to me that is a point of weakness. Still I am not very positive about that, and I would like to have some of the gentlemen who follow me discuss that. Now, being a novice in this matter, I will not detain the committee any longer. [Applause.]

I insert in the RECORD the letter referred to from the Secretary of Commerce and Labor, and also a newspaper clipping, giving the views of the former on this subsidy measure.

DEPARTMENT OF COMMERCE AND LABOR,
OFFICE OF THE SECRETARY,
*Washington, January 28, 1907.*

Hon. HALVOR STEENERSON, *House of Representatives.*

SIR: Replying to your letter of the 27th instant—

1. Total number and gross tonnage of vessels of the United States engaged in the coasting trade or domestic commerce, including those under enrollment or license for the fisheries on June 30, 1906, was 23,565, of 5,735,483 gross tons. (See Report of Commissioner of Navigation, 1906, p. 10, copy of which is sent you under another cover.)

2. The number and gross tonnage of American vessels registered for foreign trade, including the whale fisheries, is 1,441, of 939,486 gross tons. (Ibid.)

3. The total number of men required to man all the documented merchant vessels and yachts of the United States, including masters, is 177,200. (Ibid.) The number of those who were employed on vessels engaged in the foreign trade and on vessels in the coasting trade has not been separately computed. I am advised by the Commissioner of Navigation that, based on the tonnage and the types of vessels employed in the foreign trade, he computes that about 28,000 men are employed on such vessels and the remainder, say, 150,000, in vessels in the coasting trade, the fisheries, and yachts.

4. The number of vessels, gross tonnage, and men employed on steamers under foreign flags in which a controlling interest is owned by American citizens can not be separately stated, because it is not a matter of official record. Such vessels are usually steamers owned by corporations, and the only way to ascertain the precise facts would be through an examination of the lists of shareholders of all such corporations. These shareholders change from time to time, of course. The report of the Commissioner of Navigation for 1902 contains information on this point at page 67 et seq. and at page 412. A copy of this report has also been sent you.

Very truly, yours, OSCAR S. STRAUS, *Secretary.*

FIGHTING SHIP SUBSIDY—NATIONAL GRANGE MASTER IS AT ODDS WITH GROSVENOR—FAILED TO PRINT ANSWER—FORMER GOVERNOR BACHELDER, OF NEW HAMPSHIRE, REPRESENTING 900,000 FARMERS, DECLARES AGAINST PLAN TO SUBSIDIZE MERCHANT MARINE—CHAIRMAN OF COMMITTEE SHOULD HAVE HAD LETTER PRINTED.

The National Grange, composed of 900,000 farmers throughout the United States, is disappointed because Chairman GROSVENOR, of the House Committee on Merchant Marine and Fisheries, did not print, with other data, its reply to a letter from him in opposition to ship-subsidy legislation. The correspondence may be read on the floor of the House.

Former Governor Bachelder, of New Hampshire, who is master of the National Grange, sent a letter to President Roosevelt, in which he said:

"I regret the duty which devolves upon me to advise you, on behalf of the great national organization of farmers which I have the honor to represent, that the farmers of the nation are for the first time unitedly and steadfastly opposed to the legislative recommendations you have made to Congress in your recent message favoring ship subsidies. We protest most urgently against any future payments of the public funds to any private firm or corporation for any purpose whatsoever without safeguarding such payments by a public accounting of the business of the firm or corporation to which such payment is made.

GENERAL GROSVENOR REPLIED.

The President turned this letter over to General GROSVENOR, who replied in a letter in which he said that the bill encouraged American farmers, and that a great majority of the members of the National Grange approved it.

"You would make a waste place of our last shipyard and drive our last shipowners and seamen and shipyard mechanics to choose between the poorhouse and foreign lands," said he.

This correspondence was published in a public document compiled by the General. The former governor replied at length, but, according to the legislative committee of the grange, General GROSVENOR declined to print the reply. As a result the members of the grange are sending floods of letters to their respective Representatives in the House, urging them not to vote for the ship-subsidy bill.

Governor Bachelder, in his reply, impresses upon General GROSVENOR that in his opposition to the subsidy bill he is backed by 900,000 farmers, who have in their conventions decided against the proposition by overwhelming majorities. Continuing, he says:

"I wish to take exception to your assumption that the proposal to pay out of the United States Treasury subsidies to steamship companies, over and above a fair price for carrying mails, has anything in common with the protection of American farmers or American workingmen against foreign competition.

PURPOSE OF PROTECTION.

"So far as I know, not even the most extreme protectionist has ever claimed that it would be right, even if it were possible to protect the products of American farmers or labor by giving a subsidy to the portion of those products sold in foreign markets. Protection is intended for the home market only, and it is an application of the protective policy hitherto undreamed of that our Government should put its hands into the Treasury to aid our industries in competing in neutral markets.

"I must also take exception to your assumption that I wish to make a waste place of our shipyards and drive our shipowners and seamen into the poorhouse. I favor nothing of the kind. So far as our domestic and coastwise trade is concerned, our shipowners and sailors have an absolute monopoly of the business, and it is only in connection with international trade that the advocates of ship subsidies claim that our shipbuilding industries are languishing.

"You are generous enough to assume that in opposing subsidy legislation I am doing so through a misapprehension of the facts.

PLENTY OF TRAMP STEAMERS.

"You will pardon me if I suggest that this is a matter to which I have given sufficient attention to be in a position to know that there is not the slightest foundation for your statement that foreign steamship companies are ousting our farmers from the markets in Brazil and elsewhere. You refer to evidence to this effect submitted to your committee. I have heard of this evidence, but could never find that it was more than mere rumor or groundless allegation, which had no foundation in fact.

"Your statement that because foreign nations had ships and we have none Australian farmers are enabled to drive us out of the flour market of the Orient is a fair sample of the argument used in support of subsidies. If you will consult any of the large flour milling concerns in Minneapolis, or other parts of this country, they will tell you that there are always more tramp steamers seeking freights for any part of the world than are needed.

"I can not agree with you that the practically unanimous attitude of the farmers against subsidies is due to ignorance of the facts.

FARMERS KNOW SITUATION.

"The farmers have been reading about this subject and discussing it at their local, State, and national grange meetings for the past ten or twelve years, and they are fuly convinced that it is contrary to their best interests. They do not see how it would benefit them for the foreign consumer of their wheat or meat products to have his freight carried at possibly slightly lower rates.

"Any benefit which might result from increased competition in the ocean carrying trade would inevitably redound to the foreign consumers, and not to the American farmer.

"I would call your attention to the fact that there are many hundreds of business and commercial organizations in this country, and, so far as I can learn, comparatively few are in favor of the subsidy bill.

"I regret as much as you do the fact that our shipping industry, in so far as the foreign trade is concerned, has fallen off so largely since 1861. I am sincerely desirous of seeing this industry restored to its former great proportion of the world's carrying trade, but I can not see how the taxpayers of the country can justly be called upon to pay money out of their pockets toward this particular industry, any more than they should to pay subsidies to a local express or freight service in the farming sections of the country, to enable carriers to make larger profits than they do now."

Mr. GOULDEN. Mr. Chairman, I now yield to the gentleman from New York [Mr. SULZER].

Mr. SULZER. Mr. Chairman, it is not my intention at this time to speak on the question before the House. I expect to address the House on the pending bill some time to-morrow. At the present time, Mr. Chairman, I ask unanimous consent to have printed in the RECORD a copy of the bill introduced by me on the first day of this session of Congress, namely, December 5, 1906, known as a "tonnage tax bill," which, in my judgment, and in the opinion of the people of the country who have given this subject the most consideration, is the true solution of the American merchant marine problem.

The CHAIRMAN. The gentleman from New York asks unanimous consent to have printed in the RECORD as part of his remarks the bill of which he has made mention. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

Mr. SULZER. Now, Mr. Chairman, I desire to give notice that when the bill under consideration is reached to be voted upon, I shall offer my bill as a substitute for the pending bill, and my bill reads as follows:

A bill (H. R. 21196) to regulate commerce with foreign nations, to make preference for the use of American freighting vessels, to extend the postal service by American steamships, and to promote American trade by sea.

*Be it enacted, etc.,* That the law relating to vessels, to the duties laid upon tonnage, and to the ocean mail service in force when this act shall be approved, be, and the same is hereby, supplemented and amended as follows:

PART 1.—TONNAGE DUTIES.

SECTION 1. That no vessel coming direct from her own country, its colony, or possession with merchandise or passengers in excess of one-fourth of her capacity for the same, to be landed in the United States, shall be charged with an additional or extra tonnage duty, except in cases where the country whence she sailed direct charges an additional or extra tonnage duty to vessels of the United States; and in all such cases, if there be any, the extra duty per ton of the vessel's country so charged shall be added to the extra duty per ton of the United States, and the sum so found shall be the full charge per ton for additional or extra duty to be collected; or unless the country whence such vessel so laden or coming direct shall hold out to its vessels by law the payment of bounty, subsidy, or subvention of some sort in consideration of making voyages like the one in question, in which case three-fourths of the amount of the gratuity as aforesaid shall be charged and collected as countervailing duty in addition to the regular and extra duty otherwise chargeable and to be collected. And every vessel not of the United States that shall arrive in ballast or with merchandise or passengers in a proportion less than one-fourth of her capacity for the same from the country, its colony, or possession, direct as aforesaid, shall pay a duty of 50 cents per ton on the gross admeasurement in addition to the regular duty imposed by law. And if the country whence a vessel may come direct in ballast or with freight or passengers less than one-fourth her capacity, as aforesaid, holds out to its vessels by law the payment of bounty, subsidy, or subvention of some sort in consideration of making voyages like the one in question, then the countervailing duty shall be one-half of the amount of the gratuity payable as aforesaid, to be added to the regular and extra duty and collected, as aforesaid. Surveyors of tonnage shall ascertain and certify to the collector the proportion of carrying capacity occupied by passengers, by freight, and by ballast, respectively, and no vessel so laden shall be discharged except upon acceptance of the report of the surveyor by the master or agent of the vessel.

SEC. 2. That a discriminating tonnage duty, based upon the gross admeasurement in all cases, in addition to the regular duty imposed on vessel tonnage by law, shall be levied and collected from all vessels, not of the United States, that shall arrive with merchandise, passengers, or mails to be landed in the United States from countries, colonies, or possessions where the said cargo, in whole or in part, was laden, to which said vessels do not belong, as follows:

CLAUSE 1. On all vessels not exceeding 4,000 tons gross, the additional duty shall be $1.25 per ton until the 1st day January, 1909, after which date it shall be $1.50 per ton until the 1st day of January, 1911, after which date it shall be $1.75 per ton.

CLAUSE 2. On all vessels between the sizes of 4,000 and 8,000 tons the additional duty shall be $1.50 per ton until the 1st day of January, 1909, after which date it shall be $1.75 per ton until the 1st day of January, 1911, after which date it shall be $2 per ton.

CLAUSE 3. On all vessels between the sizes of 8,000 and 12,000 tons

the additional duty shall be $1.75 until the 1st day of January, 1909, after which date it shall be $2 per ton until the 1st day of January, 1911, after which date it shall be $2.50 per ton.

CLAUSE 4. On all vessels between the sizes of 12,000 and 16,000 tons the additional duty shall be $2.25 per ton until the 1st day of January, 1909, after which date it shall be $2.75 per ton until the 1st day of January, 1911, after which date it shall be $3.25 per ton.

CLAUSE 5. On all vessels exceeding the size of 16,000 tons the additional duty shall be $3.50 per ton until the 1st day of January, 1909, after which date it shall be $4 per ton until the 1st day of January, 1911, after which it shall be $5 per ton. Any vessel violating this section or refusing to pay duties as aforesaid shall not be permitted by the collector to load cargo in a port of the United States.

SEC. 3. That a discriminating tonnage duty, based on the gross admeasurements in all cases, in addition to the regular duty imposed on vessel tonnage by law, shall be levied and collected from all vessels not of the United States, that shall arrive in ballast without merchandise, passengers, or mails to be landed in the United States from countries, colonies, or possessions to which said vessels do not belong, as follows:

CLAUSE 1. On all vessels not exceeding 4,000 tons gross the additional duty shall be 75 cents per ton until the 1st day of January, 1909, after which date it shall be $1 per ton until the 1st day of January, 1911, after which date it shall be $1.25 per ton.

CLAUSE 2. On all vessels between the sizes of 4,000 and 8,000 tons the additional duty shall be $1 per ton until the 1st day of January, 1909, after which date it shall be $1.25 per ton until the 1st day of January, 1911, after which date it shall be $1.50 per ton.

CLAUSE 3. On all vessels between the sizes of 8,000 and 12,000 tons the additional duty shall be $1.25 per ton until the 1st day of January, 1909, after which date it shall be $1.50 per ton until the 1st day of January, 1911, after which date it shall be $1.75 per ton.

CLAUSE 4. On all vessels between the sizes of 12,000 and 16,000 tons the additional duty shall be $1.50 per ton until the 1st day of January, 1909, after which date it shall be $1.75 per ton until the 1st day of January, 1911, after which date it shall be $2 per ton.

CLAUSE 5. On all vessels exceeding the size of 16,000 tons the additional duty shall be $2.50 per ton until the 1st day of January, 1909, after which date it shall be $3 per ton until the 1st day of January, 1911, after which date it shall be $4 per ton. Any vessel violating this section or refusing to pay duties as aforesaid shall not be permitted by the collector to load cargo in a port of the United States.

SEC. 4. That a discriminating tonnage duty, based on the gross admeasurement in all cases, in addition to the regular duty imposed on vessel tonnage by law, shall be levied and collected from all vessels not of the United States but of a country that holds out to its vessels by law the payment of bounty, subsidy, or subvention of some sort, in consideration of making voyages like the one in question, that shall arrive in ballast without merchandise, passengers, or mails to be landed in the United States from countries, colonies, or possessions to which said vessels do not belong, as follows:

CLAUSE 1. On all vessels not exceeding 4,000 tons gross the additional duty shall be $1 per ton until the 1st day of January, 1909, after which date it shall be $1.25 per ton until the 1st day of January, 1911, after which date it shall be $1.50 per ton.

CLAUSE 2. On all vessels between the sizes of 4,000 and 8,000 tons the additional duty shall be $1.25 per ton until the 1st day of January, 1909, after which date it shall be $1.50 per ton until the 1st day of January, 1911, after which date it shall be $1.75 per ton.

CLAUSE 3. On all vessels between the sizes of 8,000 and 12,000 tons the additional duty shall be $1.50 per ton until the 1st day of January, 1909, after which date it shall be $1.75 per ton until the 1st day of January, 1911, after which date it shall be $2 per ton.

CLAUSE 4. On all vessels between the sizes of 12,000 and 16,000 tons the additional duty shall be $1.75 per ton until the 1st day of January, 1909, after which date it shall be $2 per ton until the 1st day of January, 1911, after which date it shall be $2.25 per ton.

CLAUSE 5. On all vessels exceeding the size of 16,000 tons the additional duty shall be $2.75 per ton until the 1st day of January, 1909, after which date it shall be $3.50 per ton until the 1st day of January, 1911, after which date it shall be $5 per ton. Any vessel violating this section or refusing to pay duties as aforesaid shall not be permitted by the collector to load cargo in a port of the United States.

SEC. 5. That a discriminating tonnage duty, based on the gross admeasurement, in all cases, in addition to the regular duty imposed on vessel tonnage by law, shall be levied and collected from every vessel not of the United States that shall arrive from a country not its own, whether with or without cargo, passengers, or mails, but under engagement to load cargo, passengers, or mails for another country than its own, or that shall effect such engagement after arrival at a time and while there shall be one or more vessels of American registry in port listed at the custom-house as ready and offering to engage for the same or a similar voyage, as follows:

CLAUSE 1. On all vessels not exceeding 4,000 tons gross the additional duty shall be $2 per ton until the 1st day of January, 1909, after which date it shall be $2.25 per ton until the 1st day of January, 1911, after which date it shall be $2.50 per ton.

CLAUSE 2. On all vessels between the sizes of 4,000 and 8,000 tons the additional duty shall be $2.75 per ton until the 1st day of January, 1909, after which date it shall be $3 per ton until the 1st day of January, 1911, after which date it shall be $3.25 per ton.

CLAUSE 3. On all vessels between the sizes of 8,000 and 12,000 tons the additional duty shall be $3 per ton until the 1st day of January, 1909, after which date it shall be $3.50 per ton until the 1st day of January, 1911, after which date it shall be $4 per ton.

CLAUSE 4. On all vessels between the sizes of 12,000 and 16,000 tons the additional duty shall be $3.25 per ton until the 1st day of January, 1909, after which date it shall be $3.75 per ton until the 1st day of January 1911, after which date it shall be $4.25 per ton.

CLAUSE 5. On all vessels exceeding the size of 16,000 tons the additional duty shall be $3.50 per ton until the 1st day of January, 1909, after which date it shall be $4 per ton until the 1st day of January, 1911, after which date it shall be $5 per ton.

CLAUSE 6. But if, in addition to coming as aforesaid, under engagement or making it after arrival, as above, a foreign vessel shall have held out to her by law the payment of bounty, subsidy, or subvention of some sort in consideration of making voyages like the one in question, then, and in such case, a duty of 25 per cent over and above the rate per ton stated in clauses 1, 2, 3, 4, and 5 of this section shall be levied and collected: *Provided, however*, That if there be no vessels of American register listed at the custom-house at the time of arrival, or of engagement afterwards, as ready and offering to engage for the same or a similar voyage, then tonnage duty shall be payable under section 2 or 3 or 4, according to the circumstances described. Any vessel violating this section or refusing to pay duties as aforesaid shall not be permitted by the collector to load cargo in a port of the United States.

SEC. 6. That all vessels, not of the United States, running under bounty, subsidy, or subvention of some sort, arriving at the Gulf ports of the United States from the Atlantic ports, or vice versa; or arriving at the Pacific ports of the United States from the Atlantic or Gulf ports, or vice versa; or arriving at any port of the insular possessions of the United States, or vice versa, in ballast and without freight or passengers, seeking cargo, shall pay additional tonnage duties for the privilege thus enjoyed, as follows: On arrival from Atlantic to Gulf ports, or vice versa, 30 cents per ton; on arrival from Atlantic or Gulf ports to Pacific ports, or vice versa, $1 per ton; on arrival from any port of the mainland to any port of the insular possessions of the United States, or vice versa, $2 per ton, gross measurement in all cases. No vessel, not of the United States, shall discharge or take in cargo without a permit from the collector. Any vessel violating this section or refusing to pay duties as aforesaid shall not be permitted by the collector to load cargo in a port of the United States.

SEC. 7. That a duty of 50 cents per ton on the gross admeasurement, in addition to the regular duty imposed on vessel tonnage by law, shall be levied and collected from every vessel that shall enter a port of the United States from a port of her own country, either with or without cargo, passengers, or mails, if she has not come direct, but has called or stopped on the way at a port of a country not her own and there, either in or off the port, has received merchandise, passengers, or mails, and the same shall be landed in the United States, unless said vessel has been built in the United States or is owned by citizens of the United States to the extent of 40 per cent, to be proved to the satisfaction of the collector and the district attorney of any United States court.

SEC. 8. That a tonnage duty to be termed light tax, of 3 cents per ton on the gross admeasurement of every merchant vessel, not of the United States, that shall enter a port of the United States, shall be levied and collected, in addition to the duties required by preceding sections, before clearance for sea, except in case such vessel shall clear in ballast, or may have made port in distress, or was built in the United States.

SEC. 9. That a tonnage duty, to be termed race tax, of 4 cents per ton on the gross admeasurement of every merchant vessel not of the United States that shall enter a port of the United States and there discharge merchandise, passengers, or mails, shall be levied and collected, in addition to the duties required by preceding sections, of said vessel shall be manned to an extent exceeding 10 per cent of the crew by persons belonging to a different race of men from the owners of said vessel.

SEC. 10. That the regular tonnage tax referred to in preceding sections shall be paid by all vessels in the foreign trade, whether American or foreign, shall be hereafter collected on every entry and computed on the gross admeasurement. The present rates shall be increased from 6 cents to 10 cents and from 3 cents to 5 cents per ton, respectively. American steamers carrying mails shall pay tonnage tax but once a year.

PART 2.—EXPORT PREMIUMS.

SEC. 11. That all collections of tonnage duties and charges of every sort against vessels of every kind, whether regular or additional duties, light, race, and immigrant tax, entrance and clearance fees, and permits provided by this and former acts to be levied, collected, and paid at the custom-house, and all fines, penalties, and forfeitures paid into the courts from violations of the navigation and revenue laws of the United States, this act included, shall, after the passage of this act, be set apart in the Treasury as a special fund from which to pay, first, for the support of marine hospitals for American seamen employed in the foreign trade, and second, for the payment of premiums to exporters of merchandise for giving preference in the employment of vessels to those of the United States not in fact owned by themselves. No part of this fund shall ever be covered into the General Treasury, but be carried over.

SEC. 12. That on and after fifteen months from the passage of this act there shall be paid, out of the special export fund in the Treasury provided for by section 11 of this act, to the bona fide owners and exporters of merchandise the growth, production, and manufacture of the United States, to foreign countries not adjoining the United States, in vessels of the United States registered pursuant to law and not owned in fact by themselves, as follows: A premium of one-fourth of 1 per cent on the cash valuation of each shipment direct to a port not less than 65 miles from the tidal or national boundary of the mainland of the United States; and a premium of one-half of 1 per cent on the cash valuation of each shipment direct to a port not less than 400 miles from the port of departure in the United States; and a premium of three-fourths of 1 per cent on the cash valuation of each shipment direct to a port not less than 1,000 miles from the port of departure in the United States; and a premium of 1 per cent on the cash valuation of each shipment direct to a port not less than 2,000 miles from the port of departure in the United States; and a premium of 1¼ per cent on the cash valuation of each shipment direct to a port not less than 3,000 miles from the port of departure in the United States; and a premium of 1½ per cent on the cash valuation of each shipment direct to a port not less than 4,000 miles from the port of departure in the United States; and a premium of 1¾ per cent on the cash valuation of each shipment direct to a port not less than 5,000 miles from the port of departure in the United States; and a premium of 2 per cent on the cash valuation of each shipment direct to a port not less than 6,000 miles and upward from the port of departure in the United States. These premiums to an exporter shall be payable to his order upon report of the clearance of the vessel, with a statement of the collector of the port fixing the value of the shipment, which must be sworn to by an appraiser for the United States, within ten days, according to such regulations as the Secretary of the Treasury shall prescribe, distances between ports to be determined by the Hydrographic Office of the Navy Department and stated in sea miles.

PART 3.—MAIL CARRIAGE.

SEC. 13. That the postal act approved March 3, 1891, be, and it is hereby, amended to provide and to read as follows:

CLAUSE 1. That the Postmaster-General shall as often as once in each year advertise for informal proposals for the carriage of mails by sea in American vessels between such ports of our own and other countries as to exporters may seem advantageous. The advertisements shall be inserted four times weekly in a paper printed in Boston, New York, Philadelphia, Baltimore, New Orleans, Galveston, Norfolk, Charleston, Savannah, Mobile, San Francisco, Portland, and Seattle, describing the

service as that of mail and naval vessels adapted to promote the postal, commercial, and naval interests of the United States and to subserve those of their owners as well. Proposers will state the size and speed of vessels, number of trips yearly, remuneration required, time when service could be begun, and such other particulars as may seem useful for the Government to consider.

CLAUSE 2. That within one month after receipt of informal proposals the Secretary of the Navy and the Postmaster-General shall together consider their contents, the wants of the Navy and the needs of the postal service, and fix upon a schedule of requirements that will satisfy both interests. The Secretary of the Navy will control the plans for the vessels, and the Postmaster-General will decide upon the postal programme, and the two together shall advertise formally to let contracts for the running of the vessels required. Such advertisements shall be inserted in the same papers that called for informal proposals four times weekly, describing the route, the character of the vessels, the size and speed, the number of trips yearly, the times of sailing, and the time when the service shall begin. These requirements shall not be such that bidders can not be found. The Navy Department shall pay the cost of formal advertising. The letting of such contracts shall be the same as prescribed by law for the letting of inland mail contracts, so far as shall be applicable to vessels. Every contact must have the approval of the President, and none shall exceed the limit of thirty years; but the President may require improved service every ten years.

CLAUSE 3. That the vessels employed under any contract made under this act shall constitute a line, which shall have a sailing day or days, as often as three times a week, but no line shall monopolize the carriage of mails to any foreign port. Another line may have a contract to run to the same port on different days of the same week, and from the same port.

CLAUSE 4. That the owners of lines contracting for mail carriage may be persons or corporations, but if the latter, the contract must be with the individuals of the board of directors, who must be citizens of the United States and at all times prepared to swear that not more than 40 per cent of the capital stock of the corporation is held by aliens, and that a citizen manages the line, under penalty of forfeiture of the contract, which, in such case, the President of the United States is hereby authorized to declare. No line shall combine or consolidate with another, under the same penalty.

CLAUSE 5. That the vessels employed under this act shall be commanded by citizens, and at least two officers and two engineers of each vessel shall also be citizens of the United States, to wit: During the first year, one-eighth thereof; during the next two years, one-fifth; during the fourth and fifth years, one-fourth; during the sixth and seventh years, three-tenths; during the remainder of contract time, one-third thereof. But no mail carrier shall be delayed in sailing to obtain a crew in above proportion. It may be stipulated that mails may be brought from abroad, the foreign country paying for the service; also that passengers and baggage and freight may be carried both ways. After July 1, 1909, the mails shall be sent foreign by vessels of the United States and no others, without express consent of Congress; and in cases of need, when private enterprise fails to undertake or carry on the mail service at reasonable or lawful rates of remuneration, the Secretary of the Navy shall have authority, and it shall be his duty, to furnish suitable vessels of the Navy in which to send mails foreign or bring them home, until the further order of Congress.

CLAUSE 6. That all vessels in the postal service and hereafter built for it shall be prepared to receive arms for immediate use as cruisers, scouts, or transports in time of war; and in future their plans and specifications shall be agreed upon by and between the owners and the Secretary of the Navy, the strength and stability to be sufficient to carry armament required in naval service, and the materials of hull and machinery to be such as will command the highest classification given by American inspection of vessels. And all such vessels hereafter built shall be constructed under the inspection of a naval officer detailed by the Secretary of the Navy, to whom he will report in writing the progress made monthly, whether or not the contract is being well performed, and when the trial trip may be made; and no vessel not approved by the Secretary as fulfilling the contract, as to hull and machinery, shall be accepted for the service.

CLAUSE 7. That the compensation to be agreed upon and paid for such service as may be contracted for under this act shall be reasonable and as low as responsible bidders will perform the same, having regard to the encouragement to vessels provided by this act, to the commercial circumstances in each case, and to the rate of compensation for similar service paid by other countries. Where a bid may be deemed too high the programme may be modified or the route readvertised, payment for services to be made at the end of each round voyage. If the contract shall fail to be fulfilled for six months the President may declare it forfeited, and thereupon the route shall be readvertised and let to another bidder, but on no account shall the service be abandoned to other countries. Readvertising shall be done in a paper printed in Washington, D. C.

CLAUSE 8. That upon each mail vessel the United States shall have transported, free of charge, one messenger, whose duty shall be to receive, sort, take in charge, and deliver the mails to and from the United States, and who shall be provided with suitable room for himself and for the mails.

CLAUSE 9. That officers of the Navy may volunteer for service on mail vessels, and when accepted by the contractors may be assigned to such duty by the Secretary of the Navy whenever, in his opinion, such assignment can be made without harm to the service; and while in said employment they shall receive furlough pay from the Government and such other compensation from the contractors as may be agreed upon: *Provided*, That they shall be required to perform only such duties as pertain to the service.

CLAUSE 10. That said vessels shall carry as cadets one American boy under 21 years of age for each 2,000 tons gross register, who shall be taught the duties of the service as seamen, rank as petty officers, and receive reasonable remuneration.

CLAUSE 11. That said vessels may be taken and used by the Government as cruisers, scouts, or transports at any time, on payment to the owners of their fair, actual value at the time of the taking, either for service by the voyage, by the month, or year, or may be purchased outright, and if there shall be a disagreement as to the value, then the same shall be settled by two appraisers, one appointed by each party, they selecting the third, who shall act in case the two disagree.

CLAUSE 12. That all vessels not of the United States coming with passengers from a country to which said vessels do not belong, shall pay to the collector of the port an immigrant tax of $20 for each and every passenger brought from such country who shall be landed with his or her effects.

PART 4.—GENERAL PROVISIONS.

SEC. 14. That marine underwriters or insurance companies belonging abroad, in person or through agencies in the ports of the United States, may issue policies, in conformity with State regulations, on shipments of goods, wares, and merchandise to be exported, but any discrimination made by them or their agents in the clauses of policies, in the premium rates, or effected through inspection of hulls or otherwise, which shall tend to favor the employment of foreign vessels, or tend to disfavor the engagement of vessels of the United States, shall be deemed a misdemeanor, punishable by a fine as a penalty in a district court of the United States. Said fine for the first offense shall not exceed $5,000 nor be less than $3,000; for a second offense said fine shall be not less than $10,000; and for the third offense and each one afterwards said fine shall be not less than $15,000 nor more than $25,000, and suits shall be prosecuted by the attorney of the court aforesaid for each and every violation of this section that may be brought to his notice. In any such suit it shall be no defense that the orders or directions of any person, or the rules and regulations of any association of underwriters, shipowners, merchants, marine surveyors, or their agents, not citizens of the United States, or that the inspection or classification of any vessel by any person, society, or authority whatsoever, can be claimed to justify the discrimination that may have been the subject of complaint. A refusal to insure goods, wares, and merchandise under this act, to be carried by American vessels, shall forfeit the privilege of doing business in American ports, or make the parties fineable as above, to be decided by the court.

SEC. 15. That in a time of peace it shall not be lawful for any officer of the Government to receive tenders of service to be performed by vessels not of the United States, and in all contracts for the performance of public work it must be provided that transportation shall be performed by vessels of the United States. And the transportation of passengers, mails, goods, wares, and merchandise between the United States, its Territories, and possessions, and the ports and places of the Panama Canal Zone is hereby declared to be reserved for vessels of the United States under the coastwise laws.

SEC. 16. That in a time of war it shall not be lawful for vessels not of the United States to import or land anywhere in the United States, its Territories, or possessions, any goods, wares, or merchandise the growth, production, or manufacture of a country not at peace with the United States. And all goods, wares, and merchandise imported by a vessel, not of the United States, admitted to storage in bonded warehouse is hereby limited to a period of ten days, within which time the lawful duties and charges must be paid, whether entered for consumption or reexportation. In cases where minimum or reciprocity duties are imposed by law on goods, wares, and merchandise imported, there shall be levied, collected, and paid full rates of duty, notwithstanding any convention, if the same shall have been brought in by a vessel not of the United States, or not of the reciprocating country from which such goods, wares, or merchandise were exported; or if the same, not being the growth, production, or manufacture of a country contiguous to the United States, shall have been brought across the line from such country.

SEC. 17. That on and after the passage of this act it shall be lawful for the space of thirty months, but no longer, for any bona fide citizen, citizens, or domestic corporation engaged in or intending immediately to engage in the carriage of merchandise, mails, or passengers in the foreign trade of the United States, to import and enter at the custom-house, for his or their own use, and that of no other person or persons in said trade, and not to be held for sale or sold to others, and not to be employed in the domestic trade more than two months in the year, any vessel or vessels suitable therefor, of size not less than 2,000 tons gross, and of age not more than five years, and have the same duly registered as a vessel of the United States, but upon the following conditions, nevertheless, to wit, that all vessels imported in the first six months of the term of thirty months, as aforesaid, shall pay a duty of $4 per gross ton; those imported in the second six months shall pay a duty of $5 per gross ton; those imported in the third six months shall pay a duty of $6 per gross ton; those imported in the fourth six months shall pay a duty of $7 per gross ton; those imported in the fifth six months shall pay a duty of $8 per gross ton measurement. The Treasury Department may allow credit on duties for imported tonnage to the extent of six and twelve months' time on secured notes of owners with interest at 2 per cent per annum. And it shall be unlawful upon penalty, as for a misdemeanor, punishable by fine of not exceeding $1,000 in a district court of the United States, for the master, owner, or agent of any foreign-built freighting vessel or yacht not duly registered, enrolled, or licensed to fly the flag of the Union from or abaft of the aftermost mast, spar, or pole, except as a sign of distress.

SEC. 18. That the making or offering to make exclusive contracts for the carriage of exports of goods, wares, or merchandise to foreign countries, conditioned partly on the future shipment of same by no other vessel or line of vessels, and the payment of rebates of freightage in consideration thereof, is hereby declared a misdemeanor, punishable by fine in a district court of the United States of not less than $1,000 nor more than $3,000 on each conviction of the owner, agent, or master of any such offending line or vessel, and the vessel or vessels of such owner, agent, or master so convicted shall not thereafter be permitted to load cargo in the United States if under foreign registry. Where it may become suspected by, or known to, the collector of any port that such contracts are in force and that rebates of freightage are offered, promised, or paid in an endeavor to engross the carriage of export goods, wares, or merchandise, he shall forthwith place the facts before the district attorney, who shall bring suit to break up the practice. And for the prevention of frauds under this act in indirect voyaging, foreign vessels not built in the country of registry shall undergo a probation of three years before being adjudged by the collector as belonging in good faith to the country of registration, unless built in the United States.

SEC. 19. That after the passage of this act it shall not be lawful for any officer of the Government to issue a register, enrollment, or license for any vessel built abroad, except such as have been captured in war and condemned as prize; such as have been forfeited for a violation of the laws and bought at public sale, or may have belonged to a country that has come under the Government of the United States or been admitted by an act of Congress.

SEC. 20. That the regular duties of tonnage, computed on the gross admeasurement, and the usual passenger tax shall be paid alike by American and foreign vessels on each and every arrival, in foreign trade, when entry of vessel is made. Immigrant tax shall be paid when permit is given for the landing of passengers from vessels, not of the United States, brought from countries to which said vessels do not belong. All additional tonnage duties and the light and race tax shall be paid before lading permit is issued, but if loading be de-

layed, then, at latest, at the end of two months from date of entrance. American vessels carrying crews of which one-eighth the number are citizens, or owe allegiance to the United States, shall have rebate of tonnage tax to the extent of 20 per cent; if one-fourth of the crew be citizens, the rebate shall be 30 per cent; if three-eighths of the crew be citizens, the rebate shall be 40 per cent; if one-half of the crew be citizens, the rebate shall be 50 per cent; if five-eighths of the crew be citizens, the rebate shall be 75 per cent; and if three-fourths of the crew be citizens the rebate shall be 100 per cent. The United States shipping commissioner shall ascertain and certify to the collector the proportion of citizens in each crew where rebate of tax may be demanded. Regular apprentices as seamen or engineers, if citizens, shall count as men in computing rebate of tax. In trade to and from tropical countries, where it may not be practicable to find any but natives of such regions to man American vessels, permits may be issued, on applications, under oath, of the owner or agent, by the Secretary of Commerce and Labor for one year, or while necessary, to carry a crew such as it may be practicable to engage in any given place. In all cases where vessels may be fined for infractions of law in accordance with the statutes, it shall be unlawful for the Secretary of any Department to remit any portion thereof without an order of court duly recorded; and it shall also be unlawful for the Commissioner of Navigation to order refunds of tonnage taxes that have been paid to a collector without a trial and judgment of the case.

SEC. 21. That sections 11, 13, 14, 15, 17, 18, 19, and 21 of this act shall take effect upon its passage, and sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 16, and 20 in one year and thirty days thereafter, and all acts or provisions of law in conflict herewith are hereby repealed; also any and all articles or clauses in existing maritime reciprocity conventions or treaties, whose time fixed has expired, that are in contravention herewith, are hereby annulled and abrogated, in conformity with the stipulations and equities of said agreements and the rights of the United States; and the formal notice of the Congress of the United States is hereby given all countries concerned that in one year from the approval of this act by the President all conventions or treaty stipulations for the suspension of commerce regulations under the aforesaid agreements so far as they are terminable, are receded from on the part of the United States, and all enactments therefor are by this act repealed. An agreement, as above, not yet terminable, may be observed until its term expires, but not longer.

Mr. GOULDEN. I yield fifteen minutes to the gentleman from Tennessee [Mr. GAINES].

Mr. GAINES of Tennessee. Mr. Chairman, I have no prepared speech. I did not determine to speak on this subject until a few minutes ago. It is not my purpose to discuss in detail this bill. I shall leave that to others who have carefully studied the subject and the pending bill, who have opposed reporting it, and who will stand in opposition to its passage. It is my purpose to speak in a general way against the policy of subsidizing steamships, just as I have opposed "fast mail subsidies" throughout my career in Congress, or subsidies to carry commerce, or to carry anything else. Subsidies chloroform individuality; that is, they Oslerize the old and young, invisibly, possibly, at first, but which sooner or later emasculate the virility of our people. I believe in every man lifting himself up by his own boot straps, and you know, gentlemen, that you love and respect the man who does so and call him in song, in story, in Congress and out, a "self-made man."

I know of no better way, Mr. Chairman, of accentuating in a very able and very patriotic manner what I have said, elaborating the idea I have suggested, than to turn back to the RECORD of February 28, 1879, and regale the committee by reading the ponderous argument of the present Speaker of the House of Representatives, JOSEPH G. CANNON, in opposition to the then pending postal-subsidy bill. That distinguished gentleman, it seems, is in favor of this subsidy, of course, or he would not let it come on the floor of the House, since he is master of the House and all it does. He has kept it out of the House for ten years, but he seems to have lately become so solicitous about it that after one of the opponents, perhaps, of the measure, who was a member of the committee, had died, making it possible to not report this bill, the distinguished Speaker appointed the gentleman from New York [Mr. LITTAUER], who was in favor, and notably in favor, of reporting this measure. In a few days or hours after his appointment it was delivered—born full-fledged and brought into this House, stands before us to-day, and can be called JOSEPH G. CANNON'S baby.

Now, let us turn back and open the book. It will be a great day, I hope not a sad one, for anyone of those present when "The Book" is opened and the deeds done in the body, and some of them done in the House of Representatives, perhaps, will be made known, close about the great white throne.

On this subject—subsidies for South American countries—our present Speaker, Mr. CANNON, February 28, 1879, said:

Mr. Speaker, this is a business proposition. I want to look at it in that light for the time I have to address the House. If it will pay the people of the United States to grant this subsidy, then I am in favor of granting it. If it will not pay the whole people, or a majority of them, I am not for granting it.

It was the same kind of subsidy they are trying to pass here to-day.

Mr. GROSVENOR. Not at all, and has no relation to it.

Mr. GAINES of Tennessee. Does not this subsidize steamers going to South American countries?

Mr. GROSVENOR. No, sir.

Mr. GAINES of Tennessee. Does it not go to ships going to Brazil?

Mr. GROSVENOR. That was a cargo subsidy.

Mr. GAINES of Tennessee. This does not affect ships going to South America?

Mr. GROSVENOR. That was a general cargo subsidy——

Mr. GAINES of Tennessee. I am talking about this bill. I have not read the bill with particularity, but does not this pending bill subsidize ships that ply between this country and South America?

Mr. GROSVENOR. The gentleman confuses——

Mr. GAINES of Tennessee. I have heard it stated on this floor by the gentleman from New York [Mr. LITTAUER] that this bill was to subsidize ships going to Brazil and to Colon and to Panama and to various other places south of the United States. That is the way I understand the bill and that is the way all Members around me understand it.

Now, this bill that the distinguished Speaker was talking about, in 1879, was on that very subject. Speaker CANNON then said:

I ask the gentleman from Georgia to change his proposition so as to allow four hours discussion on *the Brazilian subsidy amendment* and two hours on the amendment in relation to the classification of mail.

Now, I turn to this great speech of Mr. CANNON'S, and proceed to read it. On page 2131 of the RECORD, February 28, 1879, he says:

Now, sir, it is not a new thing. Commencing in the year 1847, down to the present time act after act has been passed for a similar purpose. Why, sir, I hold in my hand the official statements of the Secretary of the Navy and Postmaster-General, which show payment of subsidies to the amount, in round numbers, of $14,500,000 to steamship lines during the period from the year 1848 to the year 1858. I hold in my hand a statement that shows subsidies to the amount of $7,000,000, in round numbers, since that time, making over $21,000,000 that have been paid out of the Treasury for the purpose of establishing steamship lines.

I had the curiosity to go back and read the debates, and found that there was the self-same arguments then made, and I may say a duplication of the same tunes all around, as those by the gentlemen from Maine and Ohio made here to-day.

I had the curiosity to go back and read the debate, just as he did, because I knew what the position of Mr. CANNON was at that time and can not account for his opposite position to-day.

Some of the identical arguments were made then as are being made here to-day, I may say, gentlemen. The report of 1879 discussed the South American markets and our lack of intercourse by postal service, and all that sort of thing. Here is that report and the debates. I dare say that the report filed by the gentleman reporting the pending bill is almost literally the report filed at that time in favor of the bill that Speaker CANNON denounced.

He said:

Now, what are the facts? Seven million dollars would buy all the steamships engaged in commerce that sail under the American flag on every ocean in the world; and more than that, the subsidizing of these steamship lines, from the Collins Line in 1852 up to the present time, has bankrupted every prominent man that has favored it.

If subsidies bankrupt, how can bankrupts be relied on to help our postal system? Will you tell me, Mr. Chairman, how a bankrupt man can carry this postal service any more swiftly than steamships are carrying it now that are not bankrupt?

I quote the Speaker again:

The political ghosts of departed politicians that have squandered the money of the people for this kind of unwarrantable expenditures from the Treasury rise up and warn Representatives to avoid the errors heretofore committed by our predecessors. Now, why would it not be profitable to grant this subsidy of $3,000,000? I have it here in a nutshell. I am sorry that the gentleman from Maine [Mr. FRYE] is not in his seat.

Last year our imports of merchandise were of the value of $468,000,000. Of this $171,000,000 was admitted free, and $297,000,000 was dutiable, yielding a revenue to the Treasury of $130,000,000.

"*Unwarrantable*" *expenditure* from the Treasury, and yet the distinguished Speaker, above anybody else in this House, has caused this measure to be here to-day. Why, in 1879 he denounced such a policy as unwarrantable. He further said:

The customs revenue collected on that $297,000,000 of imports was $130,000,000, or 43 per cent, to be added to the price of the goods produced abroad. Manufacturers producing like products in this country are thus enabled to obtain 43 per cent more for their goods than do those who produce them abroad. I am not here at this time to discuss the policy of this. We are supreme in our own borders. But when you propose to sell your manufactured articles in Brazil, that 43 per cent can not be overcome, because you are called upon to compete with cheap labor and the products of cheap labor abroad. That is the secret of the failure of these $21,000,000 of subsidies during the last twenty years. What costs a dollar to produce in Liverpool or France is worth $1.43 in the United States made by American artisans. Yet gentlemen talk about taking that $1.43 worth of stuff and shipping it to Brazil and competing there with products that cost but a dollar. Now, you can not do it unless you grant a subsidy equal to 43 cents on the dollar, so that your products in this country may compete with the products abroad.

We paid Garrison $1,500,000 on a contract for ten years, which expired two years ago. Do you know what it did? Our imports from Brazil increased double and over, while our exports only increased some five or six millions during that ten years. That is all. We paid the Pacific Mail Company $5,000,000 to carry the mails from San Francisco to China for ten years. The official data show that our exports to China increased—total for that ten years over the previous ten years, $6,000,000, while our imports nearly doubled, running from $108,000,000, which were brought over for the ten years before the subsidy, to $183,000,000 for the ten years the subsidy was paid. Our exports increased $6,000,000, and for that we paid $5,000,000 of subsidy to the Pacific Mail.

In passing I make this comment, that the gentleman said in 1879 that adding 43 per cent on imported goods by a tariff added to the price of the goods in this country, which increased price the people pay. That is the substance of what he said on that point.

He also said we gave them five millions and got back six millions.

Wise application of public funds!

He continues:

And these subsidy seekers came into this House, or rather into Washington, in 1872, and absolutely took the money which we paid them out of the Treasury and with it corrupted the officials about this House, your doorkeepers and your postmaster, to procure another subsidy.

"Took the money," the now Speaker then said, "that we paid for subsidy and corrupted the officials about the House of Representatives."

He continues:

The soldiers of fortune swarm about the corridors of Washington; the lobby is on hand. If you will read that report touching the Pacific Mail subsidy and examine it, and then look into your galleries, you will see familiar faces around you now. They meet you all about the Capitol and pull your coat tails in order that they may talk to you in favor of this subsidy. [Laughter.]

Last year the proposition was to give $1,500,000 to John Roach for these lines; we refused it. This year the proposition is to give him $3,000,000, and if we vote it down now, then I suppose the proposition will be to give him $6,000,000 next time.

A MEMBER. Then let us take it now.

Mr. CANNON of Illinois. Well, if it is to go in that way, that would be one argument in favor of this proposition. How much time have I left, Mr. Speaker?

The SPEAKER *pro tempore*. The gentleman has eight minutes remaining.

Mr. CANNON of Illinois. I want to reserve three millions of my fifteen for the gentleman from New York [Mr. Townsend]. [Great laughter.] Three minutes, I mean. But that is a matter of small controversy, as the millions are flying all about in the atmosphere here.

He became so enthusiastic in fighting this vampire, Mr. Chairman, that he transformed fifteen minutes very quickly into three million minutes. I again quote him:

The gentleman from Maine [Mr. FRYE] has said that this is not a subsidy for John Roach, and I am not going to abuse John Roach. John Roach is not to be abused for coming down here and asking us to give him $3,000,000 and to tax all the rest of the shipping of the United States and everybody else so as to do it. He would take it, of course, if he could get it, as I expect almost everybody else would take it, but he will not get it by my vote.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GOULDEN. How much more time does the gentleman want?

Mr. GAINES of Tennessee. Not much more time. I have three-quarters of a column to read.

Mr. GOULDEN. I will yield.

Mr. GAINES of Tennessee. I continue to quote the Speaker:

But my friend from Maine [Mr. FRYE] says this is not for Roach. He says there are six steamers owned by the Pacific Mail Steamship Company that can compete with him. Only six; and yet you are just fresh from the payment of $5,000,000 of subsidy to that company; you only stopped two years ago. And it is said that you can take those six steamships of the Pacific Mail from that line to China, for which you paid so much subsidy, and run them in competition with John Roach for this contract. That is t. t.—too thin, in the ordinary vulgar phrase. [Laughter.]

The gentleman also says that there are four ships upon the great Philadelphia and Liverpool line—four American steamships. I do not want to take them from that line, because there is our commerce—I mean the great bulk of our commerce between the United States and Europe, and this is the only American steamship line in that trade, and the only one that has never asked a subsidy. Let it alone; it is doing business like others, namely, upon the merits alone.

Of the only unsubsidized ship, I believe—a ship running on its own merits—he said: "*Let it alone.*" That is what I said at the beginning of my speech, in substance; quit chloroforming individuality by taking the tax money of the people to assist a company to run its boats in competition, say, with Messrs. Webb & Gaines, who are running theirs by their own money, strength, ingenuity, and American enterprise.

I read from the Speaker again:

Gentlemen, do you know how our commerce is made up? Let me call your attention to our exports, and where they go. Of cotton we exported last year $180,000,000; of breadstuffs, $180,000,000; of oils, $51,000,000; provisions, $125,000,000; tobacco, $28,000,000; agricultural implements, $2,500,000; making $614,000,000 out of a total of $680,000,000.

Where did they go? I will tell you. In 1877 two-thirds of it all went to Great Britain and her dependencies, and in return we bought only $162,000,000 of Great Briain and her dependencies, making a balance of trade of $240,000,000 with Great Britain and her dependencies alone in our favor.

Sir, we can sell these articles as cheaply as any other nation can sell them. They will find their own markets under the laws of trade, which are as broad as the earth and as eternal as the hills. Now, what is this proposition? Oh, it is to give John Roach $3,000,000 as a practical gratuity, and to charge that over as a tax on the cotton and provisions and tobacco and wheat and grain and breadstuffs and oil that we produce. What for? To enable somebody to sell something that he has made, which it costs $1.43 to make here, while it costs only a dollar to make it in Europe, and both manufacturers have to go to the same market, namely, Brazil. Why, gentlemen, if you had a business agent who proposed to do your private business in that way you would put him in a lunatic asylum, or swear that he was a thief or an idiot and discharge him. [Laughter.]

Now, Mr. Chairman, that is pretty flat language; but, gentlemen, up to the present Congress the Speaker of this House has stood "pat" against ship subsidies, if the public press is to be believed. But it seems that in this matter he does not "stand pat." It seems that in this time that language is not applicable; but he was talking about the same kind of a subsidy, to the same country that this bill provides that these ships shall go, when he used that language. And now I read from page 16 of the pending bill, which has been handed to me by the gentleman from North Carolina [Mr. WEBB]:

First. From a port or ports of the Atlantic coast of the United States to Brazil, on steamships of the United States of not less than 16 knots speed, for a monthly service at a maximum compensation not exceeding $300,000 a year, or for a fortnightly service at a maximum compensation not exceeding $600,000 a year.

Second. From a port of ports of the Atlantic coast of the United States to Argentina, etc.

So I was right when I said this pending bill applies to ships going to South America.

This bill of 1879, denounced by the Speaker, was for a similar subsidy. He then said this:

Now, this proposition has been upon the House Calendar since May last. The committee of which I am a member has reported it, I making a minority report against it.

That minority report is found in House Document No. 886, part 2, Forty-fifth Congress, second session. I have it now before me for anybody to read that chooses to do so.

So the gentleman then went so far as to file a strong minority report that contained strong language and a strong line of argument; and then he was the only Member who filed a minority report; he alone signed it.

"Has the measure ever been called up in this House?" the Speaker said.

This bill has never been called up in this House until yesterday, nor until the Speaker had appointed a leading Republican of ability and force, who comes to-day and opens the debate upon this subject in a strong speech in favor of ship subsidies.

"Has there ever been an assault, however feeble, made upon the Calendar to reach it?" said the Speaker in 1879.

There have been many assaults to report this bill, if we are to believe the statements that we see in the newspapers, but they never succeeded until the Speaker tried his hand on it. They never got it up in this House until the distinguished Speaker took a hand in it and made the "assault."

He led the fight; I shall not repeat the very strong language that the distinguished Speaker used in 1879 in denouncing the men who favored that measure. I would not apply it here to those who advocate this measure, because I feel there are Members on the other side of this House who conscientiously favor subsidies and who favor this subsidy. But I am trying to show you what a strong man, the great Speaker of the House, the great economist, the great thinker and worker, thought in 1879 about a similar measure, and about the advocates of that measure and the kind of men who lobbied for it. He found no words too severe, none so insulting and offensive in the English language that he did not employ within the limit of parliamentary language in denouncing them.

Barnaclelike, said the Speaker:

Now, this proposition has been upon the House Calendar since May last. The committee of which I am a member reported it, I making a minority report against it. Has the measure ever been called up in this House? Has there ever been an assault, however feeble, made upon the Calendar to reach it? Can the measure stand upon its own merits? Can it stand discussion and amendment under the five-minute rule? Not at all. It has slept from May last till the present time. Barnaclelike, it last session fastened with the grip of death upon the post-route bill, and refused to let the post-route bill pass unless it passed. Now it fastens itself upon this appropriation bill appropriating $36,000,000 for the postal service of the country, and with both hands about the neck of this measure it says——

The CHAIRMAN. The gentleman has consumed ten minutes.

Mr. GAINES of Tennessee. I hope the gentleman will give me three minutes more to finish this paragraph.

Mr. GOULDEN. I give the gentleman five minutes more.

Mr. GAINES of Tennessee. He said it fastens itself upon the bill, and then said:

"The mails of the country shall be stopped unless you permit my unholy and stinking carcass to be dragged through with the balance of the appropriations." I am for cutting it loose from this general appropriation bill at all hazards and letting it stand or fall upon its own merits; and whenever that is done it will die; and its death will cause rejoicing throughout the country, and not grief.

[Applause.]

Ah, gentlemen, what have we done in this session of Congress about economizing? We are to-day fighting here on a postal bill to economize on the cost of carrying our mail at home, and it is in conference now on that very question. We are trying to raise the salaries of the little rural-route carriers; they ought to have it raised, I think; but what else are we doing? What else are we doing with our rural routes throughout the country? We are discontinuing them, making them semi-weekly and triweekly, any sort of weekly, instead of a daily mail service. What is the Postal Department of this Government for? It is to transmit "intelligence." It is to transmit papers and letters, etc., Mr. Chairman, and not for profit. It is a government-ownership proposition; nothing is "wrung" from the people in that business but the little stamp or actual cost of carrying the mail; and, Mr. Chairman, the fight to-day is for economizing with the railroads in carrying our mail. "Cut down their compensation," is the cry; cut our rural routes down, while on the same day we are asked to vote twenty-five or thirty millions of dollars of the American people's money to pay rich steamship companies of the United States to carry mail down to the people, the savages, crocodiles, and boa constrictors of South America.

Charity begins at home, Mr. Chairman. Ah, they say, Mr. Chairman, that it will build up our commerce. Let us also build up our "intelligence" at home. Commerce will take care of itself.

We ought to cut the tariff walls down to a revenue basis, as we did in the low-tariff era from 1846 to 1860, when we built up our merchant marine, when America was the mistress of the seas, when the Stars and Stripes floated over the billowy bosom of every ocean and every sea and in the harbor of every civilized country in the world. [Applause on the Democratic side.]

You can not expect a foreign vessel to come to our wharves empty and take away our commerce. The Democracy has always stood for a peaceful commerce. Democrats to-day stand for it. Our peerless leader, William J. Bryan, thank God, still stands for it and always will. [Applause on the Democratic side.] A peaceful commerce is one that swaps, and swaps as nearly even as each party can, to make a living. Mr. Chairman, raise public morals, lower our tariff walls, and we will need no subsidies to carry our mails—or our females. [Applause on the Democratic side.]

Mr. Chairman, under the leave granted I append the following:

SHIP SUBSIDIES AND HIGH TARIFF.

John Roach, protectionist shipbuilder, to a special committee of the House, in 1869, said:

"America has lost her commerce, and what has she obtained in exchange for it? Simply the right of a few men to charge $9 per ton in gold on the importation of pig iron. Pig iron is the basis of all other metals connected with the making and repairing of ships. There has been a revolution in shipbuilding, and iron is the material from which they are now built. The high cost of iron produced by the tariff upon it is one of the principal difficulties our commerce has to contend with. I did not come here to ask a bounty. I came here to tell you that while all other articles of American produce are protected to a great extent, there is no protection for American ships. If Congress will take off all the duties from American iron, reducing it to the price of foreign iron, then we are prepared to compete with foreign shipbuilders. The labor question is mistaken; we are prepared to meet that difficulty and to ask no further legislation on the subject."

Mr. Morrill, protectionist Republican, asked Mr. C. H. Cramp as to the rate of duty imposed on shipbuilding material, and Mr. Cramp replied:

"About 40 per cent; and if our shipbuilders could be relieved from that, they could compete successfully with foreign shipbuilders. The difference in the cost of labor would be overcome by the superiority of American mechanics. Wooden ships will no longer be built, since iron ships are superior in every respect."

Senator Chandler, of Michigan, in 1872, said:

"It is desirable to own iron ships, very desirable, and I hope to see the day when we shall have our old supremacy in shipping, but it never will be done in the world by subsidies. It is not the subsidized lines of Great Britain that pay the largest returns. * * * You will never restore your flag to the ocean by subsidies, I care not how great you may make them; you may increase your subsidies to $10,000,000 a year, and you will not restore your flag."

Senator Morrill, of Vermont, in 1872, said:

"Is it practicable to recall our shipping? I think it is, and by the simplest process. Not a dollar of subsidies. Give us cheap materials and we will do it. Give us the ground on which we stand, so that we shall have our materials just as cheap as they can be afforded elsewhere, and then all these shipyards and all that skilled labor will be at work at once; and you will find that we shall restore the balance of the shipping interests on the ocean that now stands against us."

Senator Sherman, May 4, 1872, said:

"Since we can not build these vessels within 20 or 30 per cent of the cost in England, why not admit them free? Why not admit them duty free, raise the American flag upon them, put American officers upon their decks, and have American lines instead of British lines? Why, sir, if that bill should pass authorizing foreign ships when owned by American citizens to be used for the present for three years under the American flag one-half of the lines between New York and England would be American lines in sixty days."

UNITED STATES PREDOMINANT IN IRON AND STEEL MAKING.

President McKinley submitted January 29, 1901, to Congress an official "Review of the world's commerce," which at page 22 states:

"The most striking fact in our export development is the remarkable growth of the foreign demand for our iron and steel, our exports amounting to nearly $130,000,000 in 1900 against $32,000,000 in 1895. In an article in the New York Evening Post of January 12, 1901, Mr. Andrew Carnegie says the United States has not only supplied its own wants 'but is competing to supply the wants of the world, not only in steel, but in the thousand and one articles of which steel is the chief component part,' and expresses the opinion that the increasing demand from the world at large 'can be met only by the United States.'

"'The influence of our steel-making capacity,' adds Mr. Carnegie, 'must be marvelous, for the nation which makes the cheapest steel has the other nations at its feet as far as manufacturing is concerned in most of its branches. The cheapest steel means the cheapest ships, the cheapest machinery, the cheapest thousand and one articles of which steel is the base.'" (Review of the World's Commerce, 1900.)

CHEAPNESS OF AMERICAN GOODS.

"It is the relative cheapness of American steel that has given it preeminence, and it is the same with other products that are winning their way abroad. Economy of production is the master key that unlocks for us markets that seemed a little while ago to be inexorably closed. This economy of production implies not merely low prices to the foreign consumer, but a greater degree of excellence, a superior adaption to his wants. As he has been pointed out in the Reviews, as well as elsewhere, the American workingman, though receiving higher wages, produces, with labor-saving machinery, at a lower unit of cost, and his greater application and ingenuity enable him to avail himself effectively of the most recent inventions and appliances for improving the quality of his special line of work. The American factory system is highly organized and more efficient than any other, and if our export trade were as well developed, there would be little to fear." (Review of the World's Commerce, 1900.)

With the "cheapest steel and iron" in the world, the ship trust still cries for "subsidy." With thousands of men, widows, and orphans begging Congress, as they have for years, for the payment of their claims against the Government, many of which are just, a deaf ear is turned to them, but not to the shipbuilders—backed by millions.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. TIRRELL having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had passed without amendment bills of the following titles:

H. R. 21910. An act granting a pension to Emil S. Weisse;

H. R. 24220. An act granting an increase of pension to William P. Robbe;

H. R. 22763. An act granting an increase of pension to Charles H. Slocum;

H. R. 22785. An act granting an increase of pension to Morton A. Pratt;

H. R. 22788. An act granting an increase of pension to Isaac B. Gilmore;

H. R. 22798. An act granting an increase of pension to George W. Robinson;

H. R. 22801. An act granting an increase of pension to Robert McMillen;

H. R. 22823. An act granting an increase of pension to John Tipton;

H. R. 22859. An act granting an increase of pension to Samuel Boyd;

H. R. 22863. An act granting an increase of pension to Oscar A. Fuller;

H. R. 22894. An act granting an increase of pension to Louisa Berry;

H. R. 22947. An act granting an increase of pension to Benjamin F. Sibert;

H. R. 22949. An act granting an increase of pension to George W. Wells;

H. R. 22950. An act granting an increase of pension to Hezekiah Poffenberger;

H. R. 22964. An act granting an increase of pension to Eudocia Arnett;

H. R. 22986. An act granting an increase of pension to George W. Beeny;

H. R. 22987. An act granting an increase of pension to John D. Lane;

H. R. 22988. An act granting an increase of pension to Benjamin F. Horton;

H. R. 23150. An act granting an increase of pension to Samuel H. W. Riter;

H. R. 23414. An act granting an increase of pension to Joseph Riddle;

H. R. 23426. An act granting an increase of pension to John S. Bergen;

H. R. 23440. An act granting a pension to Carrie May Allen;

H. R. 23443. An act granting an increase of pension to Louisa R. Matthews;

H. R. 23467. An act granting an increase of pension to Michael Flanagan;
H. R. 23609. An act granting an increase of pension to Samuel P. Wallis;
H. R. 23626. An act granting an increase of pension to Richard C. Taylor;
H. R. 23627. An act granting an increase of pension to William B. Walton;
H. R. 23628. An act granting an increase of pension to Clara E. Daniels;
H. R. 23660. An act granting an increase of pension to Harriet U. Burgess;
H. R. 23673. An act granting an increase of pension to John T. Grayson;
H. R. 23675. An act granting an increase of pension to Watson F. Bisbee;
H. R. 23677. An act granting an increase of pension to John D. Dryden;
H. R. 23682. An act granting an increase of pension to Joseph R. Bartlett;
H. R. 23685. An act granting an increase of pension to Robert Brake;
H. R. 23698. An act granting an increase of pension to William H. Wyman;
H. R. 23709. An act granting an increase of pension to James M. Dick;
H. R. 23729. An act granting an increase of pension to John Vandegrift;
H. R. 23732. An act granting an increase of pension to Rosanna Kaogan;
H. R. 23733. An act granting an increase of pension to Gifford M. Bridge;
H. R. 23744. An act granting an increase of pension to John O. Cravens;
H. R. 23748. An act granting an increase of pension to Emily J. Vanbeber;
H. R. 23751. An act granting an increase of pension to Charles D. Moody;
H. R. 23763. An act granting an increase of pension to James Riley;
H. R. 23791. An act granting an increase of pension to Calvin B. Fowlkes;
H. R. 23797. An act granting an increase of pension to James D. Tomson;
H. R. 23802. An act granting an increase of pension to Thomas J. Brown;
H. R. 23806. An act granting an increase of pension to William F. Barker;
H. R. 23834. An act granting an increase of pension to Samuel Langmaid;
H. R. 23849. An act granting an increase of pension to Charles A. Mathews;
H. R. 23031. An act granting an increase of pension to John H. Terry;
H. R. 23034. An act granting an increase of pension to Thomas A. Snoddy;
H. R. 23148. An act granting an increase of pension to Robert Liddell;
H. R. 23175. An act granting an increase of pension to Henry A. Fuller;
H. R. 23280. An act granting an increase of pension to Bartholomew Burke;
H. R. 23282. An act granting an increase of pension to John W. Tumey;
H. R. 23311. An act granting an increase of pension to Jeremiah Burke;
H. R. 23312. An act granting an increase of pension to William Lewis;
H. R. 23313. An act granting an increase of pension to Benjamin D. Reed;
H. R. 23323. An act granting an increase of pension to Robert Foote;
H. R. 23332. An act granting an increase of pension to Uriah Blair;
H. R. 23360. An act granting an increase of pension to Robert Hastie;
H. R. 23407. An act granting an increase of pension to Hurd L. Miller;
H. R. 23411. An act granting an increase of pension to George H. Martin;
H. R. 22170. An act granting an increase of pension to Benjamin James;
H. R. 22328. An act granting an increase of pension to Susan Baker;
H. R. 17814. An act granting an increase of pension to Simon E. Chamberlin;
H. R. 22696. An act granting a pension to Charles F. Ellingwood;
H. R. 22329. An act granting an increase of pension to Margaret L. James;
H. R. 22330. An act granting an increase of pension to Mary C. Jones;
H. R. 22392. An act granting an increase of pension to Eugene W. Rolfe;
H. R. 22395. An act granting an increase of pension to Edward Miller;
H. R. 22426. An act granting an increase of pension to Louisa E. Robertson;
H. R. 22441. An act granting an increase of pension to Jacob Mose;
H. R. 22468. An act granting an increase of pension to William Kelso;
H. R. 22503. An act granting an increase of pension to William A. Clarke;
H. R. 22529. An act granting an increase of pension to William Truett;
H. R. 22540. An act granting an increase of pension to Richard Turnbull;
H. R. 22547. An act granting an increase of pension to John Hickcox, jr.;
H. R. 22548. An act granting an increase of pension to Franklin H. Davis;
H. R. 22562. An act granting an increase of pension to George J. Abbey;
H. R. 22592. An act granting an increase of pension to Andrew J. Frayer;
H. R. 22613. An act granting an increase of pension to Isaac G. McKibban;
H. R. 22617. An act granting an increase of pension to Margaret O'Reilly;
H. R. 22629. An act granting an increase of pension to Josiah N. Pratt;
H. R. 22630. An act granting an increase of pension to George Wiley;
H. R. 22650. An act granting an increase of pension to Thomas T. Baldwin;
H. R. 22701. An act granting an increase of pension to James R. Fairbrother;
H. R. 22703. An act granting an increase of pension to Benjamin F. Richards;
H. R. 22707. An act granting an increase of pension to Sebastian Gerhardt;
H. R. 22727. An act granting an increase of pension to John Miller;
H. R. 21788. An act granting an increase of pension to Satina A. Waymer;
H. R. 21818. An act granting an increase of pension to William Hardesty;
H. R. 21827. An act granting an increase of pension to Francis Murray;
H. R. 21899. An act granting an increase of pension to Catharine Koch;
H. R. 21911. An act granting an increase of pension to George Newton;
H. R. 21914. An act granting an increase of pension to Ferdinand Pahl;
H. R. 21974. An act granting an increase of pension to John W. Lowell;
H. R. 21983. An act granting an increase of pension to James E. Pusey;
H. R. 19239. An act granting a pension to Salome Jane Marland;
H. R. 22041. An act granting a pension to John P. Walker;
H. R. 22055. An act granting an increase of pension to Maria Lorch;
H. R. 22063. An act granting an increase of pension to Horace F. Packard;
H. R. 22086. An act granting a pension to Amelia Schmidtke;
H. R. 22093. An act granting an increase of pension to Lars Isaacson;
H. R. 22165. An act granting an increase of pension to John Hand;
H. R. 22175. An act granting an increase of pension to Charles Prendeville;
H. R. 22169. An act granting an increase of pension to Cynthia M. Bryson;
H. R. 22199. An act granting an increase of pension to William Templin;

H. R. 22216. An act granting an increase of pension to Griffin A. Coffin;
H. R. 22251. An act granting an increase of pension to Samuel Manly;
H. R. 22260. An act granting an increase of pension to James E. Bissell;
H. R. 22294. An act granting an increase of pension to Perry Lamphere;
H. R. 22302. An act granting an increase of pension to Burrell H. Gillam;

H. R. 19932. An act for the relief of John Lavine; and
H. R. 14322. An act granting a pension to Abbie L. Hanford.

MESSAGES FROM THE PRESIDENT OF THE UNITED STATES.

Sundry messages, in writing, from the President of the United States were communicated to the House of Representatives by Mr. LATTA, one of his secretaries, who also informed the House of Representatives that the President had approved and signed bills of the following titles:

On February 19:
H. R. 21204. An act to amend section 4446 of the Revised Statutes, relating to licensed masters, mates, engineers, and pilots.

On February 20:
H. R. 529. An act granting an increase of pension to Francis L. Arnold;
H. R. 1019. An act granting an increase of pension to Daniel B. Bayless;
H. R. 1233. An act granting an increase of pension to Lucretia Davis;
H. R. 1373. An act granting an increase of pension to Florence Bacon;
H. R. 2049. An act granting an increase of pension to Henry Arey;
H. R. 2246. An act granting an increase of pension to Henry Damm;
H. R. 2777. An act granting an increase of pension to Albert F. Durgin;
H. R. 2781. An act granting an increase of pension to Martin V. B. Wyman;
H. R. 2878. An act granting an increase of pension to John M. Cheevers;
H. R. 3204. An act granting an increase of pension to Charles H. Anthony;
H. R. 3352. An act granting an increase of pension to George R. Roraback;
H. R. 3720. An act granting an increase of pension to Joseph McNulty;
H. R. 3977. An act granting an increase of pension to John Vorous;
H. R. 5709. An act granting an increase of pension to Mary H. Patterson;
H. R. 5854. An act granting an increase of pension to Jonas Gurnee;
H. R. 5856. An act granting an increase of pension to Martin Offinger;
H. R. 6161. An act granting an increase of pension to Horatio Ernest;
H. R. 6491. An act granting an increase of pension to Albert Riley;
H. R. 6575. An act granting an increase of pension to Rawleigh M. Monin;
H. R. 6589. An act granting an increase of pension to Manoah W. Dunkin;
H. R. 6880. An act granting an increase of pension to Marine D. Tackett;
H. R. 6887. An act granting an increase of pension to James E. Taylor;
H. R. 6943. An act granting an increase of pension to Linas Van Steenburg;
H. R. 7415. An act granting an increase of pension to George W. Brawner;
H. R. 7416. An act granting an increase of pension to Joseph R. Boger;
H. R. 7538. An act granting an increase of pension to Thompson H. Hudson;
H. R. 7918. An act granting an increase of pension to John M. Buxton;
H. R. 8164. An act granting an increase of pension to Jackson Mays;
H. R. 8586. An act granting an increase of pension to Milton J. Timmons;
H. R. 8673. An act granting an increase of pension to Marcena C. S. Gray;
H. R. 8718. An act granting an increase of pension to William T. Rowe;
H. R. 9073. An act granting an increase of pension to Melissa McCracken;
H. R. 9450. An act granting an increase of pension to Alexander Brown;
H. R. 9576. An act granting an increase of pension to Henry Wagner;
H. R. 9655. An act granting an increase of pension to William Crooks;
H. R. 10188. An act granting an increase of pension to James L. Conn;
H. R. 10598. An act granting an increase of pension to Robert W. Mills;
H. R. 10874. An act granting an increase of pension to Frederick Pfahl;
H. R. 11098. An act granting an increase of pension to Joseph A. Robinson;
H. R. 20990. An act to create a new division of the southern judicial district of Iowa and to provide for terms of court at Ottumwa, Iowa, and for a clerk for said court, and for other purposes; and
H. R. 21383. An act providing that terms of the circuit court of the United States for the western district and of the district court of the United States for the northern division of the western district of the State of Washington be held at Bellingham.

On February 22:
H. R. 24538. An act making appropriations for the diplomatic and consular service for the fiscal year ending June 30, 1908.

On February 25:
H. R. 3507. An act to correct the military record of George H. Keating;
H. R. 18924. An act for the relief of George M. Esterly;
H. R. 11153. An act to correct the military record of Robert B. Tubbs;
H. R. 3356. An act to correct the military record of Timothy Lyons;
H. R. 15197. An act to correct the military record of Arthur W. White;
H. R. 14361. An act granting an honorable discharge to David Harrington;
H. R. 17875. An act waiving the age limit for admission to the Pay Corps of the United States Navy in the case of W. W. Peirce;
H. R. 9841. An act to correct the military record of James H. Davis;
H. R. 21579. An act granting an increase of pension to Sarah R. Harrington;
H. R. 9298. An act for the relief of the heirs at law of David C. Haynes, deceased;
S. 8288. An act authorizing and empowering the Secretary of War to locate a right of way for and granting the same and a right to operate and maintain a line of railroad through the Fort Wright Military Reservation, in the State of Washington, to the Portland and Seattle Railway Company, its successors and assigns;
H. R. 11273. An act to incorporate the National German-American Alliance;
H. R. 23384. An act to amend an act entitled "An act to amend an act entitled 'An act to establish a code of law for the District of Columbia,' regulating proceedings for condemnation of land for streets;"
H. R. 25013. An act granting to the regents of the University of Oklahoma section No. 36, in township No. 9 north, of range No. 3 west, of the Indian meridian, in Cleveland County, Okla.;
H. R. 23324. An act authorizing the sale of certain lands to the city of Buffalo, Wyo.;
H. R. 25366. An act to authorize the New Orleans and Great Northern Railroad Company to construct a bridge across Pearl River, in the State of Mississippi;
H. R. 24821. An act to authorize the Georgia Southwestern and Gulf Railroad Company to construct a bridge across the Chattahoochee River between the States of Alabama and Georgia;
H. R. 21194. An act to authorize J. F. Andrews, J. W. Jourdan, their heirs, representatives, associates, and assigns, to construct dams and power stations on Bear River, on the southeast quarter of section 31, township 5, range 11, in Tishomingo County, Miss.;
H. R. 24760. An act authorizing the construction of a dam across the Pend d'Oreille River, in the State of Washington, by the Pend d'Oreille Development Company, for the development of water power, electrical power, and for other purposes;
H. R. 25234. An act permitting the building of a dam across Rock River at Lyndon, Ill.;
H. R. 25046. An act to authorize the construction of a bridge across the Mississippi River at Louisiana, Mo.;
H. R. 25550. An act confirming entries and applications under section 2306 of the Revised Statutes of the United States for lands embraced in what was formerly the Columbia Indian Reservation, in the State of Washington;
H. R. 20984. An act to provide for a land district in Valley

County, in the State of Montana, to be known as the Glasgow land district;

H. R. 9976. An act to provide for the appointment of an additional district judge in and for the southern district of the State of Ohio;

H. R. 24887. An act providing for a United States judge for the northern judicial district of Alabama; and

H. R. 21684. An act to amend section 2 of an act entitled "An act regulating the retent on contracts with the District of Columbia," approved March 31, 1906.

SUBSIDY BILL.

The committee resumed its session.

Mr. GOULDEN. I desire the other side to use some of their time.

The CHAIRMAN. The gentleman from Nebraska [Mr. POLLARD] is recognized for thirty minutes.

Mr. POLLARD. Mr. Chairman, one of the first laws enacted by the First Congress, which convened in 1789, was a high protective tariff measure. This law not only extended the benefits of the protective tariff to the manufacturing interests, but it also gave ample protection to the merchant marine. It provided a discriminating duty of 10 per cent against all our imports carried in foreign bottoms. Under this law the tonnage of our foreign commerce carried in American ships increased from 23 per cent of the total in 1789 to 90 per cent in 1830. Under this policy of discriminating duties in favor of goods carried in American ships the per cent of our foreign trade carried in American bottoms remained at or about 90 per cent of the total. This condition continued until about 1830.

In 1828 Congress enacted a law authorizing the President of the United States to negotiate reciprocity treaties with foreign countries in which the President was given authority to remove our discriminating duties from the imports of all those countries that would grant us similar advantages. Under this policy the percentage of our foreign commerce carried in American ships gradually declined, ranging from 80 to 85 per cent of the total until 1845. Our total tonnage, however, engaged in foreign commerce gradually increased. During this period practically all of the commerce of the world was carried in sailing vessels. This was the period preceding the introduction of steam power. During this period also there was virtually no discrimination against the foreign commerce of the various nations of the world. We were practically all upon an equal footing. While the wages paid to American labor were higher than those paid to foreign labor during this period, yet the skill of our workmen was so much superior that our merchant seamen were able to lead the world in the construction of sailing vessels for commerce upon the high seas. In a free, equal competition the American seaman held his own. We were recognized throughout the world as mistress of the seas. This continued down until 1840. Great Britain had striven by various ways to make an inroad into American commerce, but she had failed on every hand. This year she tried a new plan. In 1840 she imposed her first mail subsidy. In fact, the first mail subsidy ever granted by any country in the history of the world was granted by Great Britain in 1840.

Realizing that she could not compete with American shipyards in the construction of sailing vessels, she proposed to increase her tonnage by providing a heavy mail subsidy for steamships. That year she provided a mail subvention of $425,000 annually to the Cunard Steamship Company for three vessels to engage in the American trade. A little later this subvention was increased to $850,000 a year. This innovation introduced an entirely new factor into the commerce upon the high seas. These new steam vessels were larger, gave better accommodation, and made better time than the American sailing vessels. As a result England's tonnage gradually increased at the expense of American tonnage in the trans-Atlantic trade. The American Congress, not to be outdone by the British, followed her example in 1845 by authorizing the Postmaster-General to enter into a contract with the Oceanic Steamship Company from New York to Havre and Bremen. This steamship company was to receive $200,000 per year for carrying the mails of the United States. In compliance with this contract, two large steamships were built, which were larger, more commodious, and faster than even the Cunard Line. It will be observed that this subvention was less than one-half of the British subvention for the same service.

In 1847 a contract was made with the famous Collins Steamship Company for the construction of four large steam vessels for the trans-Atlantic trade.

Mr. SULZER. The Collins Line busted up, didn't it?

Mr. POLLARD. The Collins Line "busted up" when the Democratic Congress repealed the law under which the subsidy was granted, and not before.

Mr. SULZER. Then, in the gentleman's opinion, the only way we could get foreign ships to fly our flag is by paying for the ships?

Mr. POLLARD. I will meet that when I come to it. Mr. Chairman, these vessels were to receive an annual subvention of $385,000. In 1852 this subvention was increased to $858,000 a year. In this same year (1852) Congress authorized a mail subvention of $276,000 (being increased to $290,000 in 1855) for a line of steamships between New York and Colon. While the mail subsidy provided for the American line was a little less than that provided for the British service, yet American tonnage at once responded to this encouragement, and it seemed that we were not only to hold our own in ocean-going commerce, but that we were once more about to attain first rank. In 1845 our total foreign tonnage was 904,476 tons. In 1858, only thirteen years later, our foreign tonnage had increased to 2,300,000 in round numbers, an increase of over 100 per cent; and in 1860 that had grown to 2,379,000 tons. These subsidies were in force from 1845 until 1857 or 1858. That year a Democratic Congress repealed the mail-subsidy act, not because it had not been fruitful, not because it had not been a success, not because it had not built up foreign commerce and increased the amount of tonnage carried in American bottoms, but it was due to the strife and bitterness that grew out of the agitation of the slavery question just prior to the breaking out of the civil war.

The shipyards were all located in Northern States along the Atlantic seaboard. The South, determined as she was to strike the North where she could deliver the hardest blow, struck at the subsidy act, expecting thereby to cripple the merchant marine. They knew the merchant vessels would be invaluable in case of war. That was the reason the subsidy act was repealed and not because it had not proved fruitful. As a result of this reversal in the policy of the Government the Collins Line soon went into bankruptcy and the ships were taken off the ocean. This legislation of a Democratic Congress in 1857 resulted in dealing a death blow to the American merchant marine. During the war a great many of our ocean-going vessels were destroyed. From that time forward American tonnage gradually declined. Great Britain not only continued her policy of giving mail subventions for her trade with the United States, but she provided a heavy mail subsidy for her steamship lines to South America, China, Australia, and all other countries of the world. In a very short time she occupied the proud position once held by the United States and in turn became the mistress of the seas, which position she has held from that day to this. For some time after 1840 France, Germany, Italy, Russia, and other European powers continued the policy of reciprocity, but were unable to compete with the heavily subsidized steamship lines of Great Britain. Seeking a means for increasing their commerce, they adopted the policy now advocated by the Democratic party, known as the "free-ship policy." This simply resulted in the death of their shipyards of their own country, thereby giving Great Britain a monopoly of the shipbuilding trade of the world. During this period Great Britain had, by the policy of granting mail subventions, practically monopolized the foreign carrying trade of the world. The other European countries continued their "free-ship" policy until about 1870, when one after another, with their ships almost entirely driven from the seas, turned to the policy of giving mail subventions to steamships built in their own shipyards. From that day to the present their tonnage has gradually increased.

During the period following the war the United States, with its mountains full of iron and its manufacturers capable of producing as fine ships as any other country in the world, was unable to hold her own upon the high seas. To-day only about 12 per cent of our foreign commerce is carried in American bottoms, 88 per cent being carried under foreign flags. Our country never was in a more prosperous condition than it is to-day. We have developed our natural resources in every line of trade. The products of our farms, of our factories, of our mines, and of our forests were never as great as they are at the present time. The products of the American farms for the calendar year 1906 were worth $7,000,000,000, the products of our factories $18,000,000,000, of our mines $1,500,000,000, and the products of our forests and fisheries were worth $1,000,000,000. The total value of all our factories, of all our mines, of all our forests and fisheries, and of all our farms reached the phenomenal figure of $27,000,000,000 for the calendar year 1906. Since the advent of the Republican régime, in 1897, our imports have increased from $769,000,000 to $1,226,000,000 for the fiscal year 1906. Our exports during the

same period have increased from $1,050,000,000 to $1,743,000,000. [Applause.] We have paid our foreign debt, and we have now become a creditor nation instead of a borrowing nation. American capital is not only ample for the development of our own industries, but it is seeking investment in foreign lands. [Applause.] With all this prosperity and this magnificent development of our internal commerce, it seems that American capital is not tempted to enter into the building of a merchant marine. Why is this the case? It is certainly not on account of the tariff, unless it is due to the fact that the tariff has introduced a high standard of living and a higher standard of wages for American labor. All the raw materials imported that go into the construction of ships for the foreign trade come in free of duty. The American capitalist who desires to construct ships to engage in foreign commerce has access to the markets of the world without any tariff barrier for his raw materials. The only restriction imposed is that the ships must be built in American shipyards before they can fly the American flag. We have as skilled workmen as any country in the world. We have surplus capital that is seeking investment in foreign countries. But why is it that American capital does not seek investment in the construction of vessels for the foreign trade? In my opinion it is due to three causes: In the first place, American workmen engaged in the construction of these ships receive from 50 to 100 per cent more than do the workmen who build the foreign ships. In the second place, the men who man these ships receive from 25 to 150 per cent higher wages than do the men who man the ships of our competitors. In the third place, every country except the United States that is engaged in foreign commerce gives a very liberal support in the way of bounties, tonnage duties, or mail subventions to its steamship lines. The following is a comparison of the wages paid the men who construct these ships in the American and in foreign shipyards:

*Wages per week.*

| | British. | American. |
|---|---|---|
| Pattern makers | $9.00 | $18.00 |
| Machinists | 8.50 | 15.00 |
| Riveters | 7.50 | 12.00 |
| Calkers and chippers | 7.80 | 15.00 |
| Fitters-up | 7.80 | 15.00 |
| Ship carpenters | 9.60 | 18.00 |
| Joiners | 9.00 | 16.50 |
| Painters | 9.60 | 18.00 |
| Furnace men | 6.00 | 10.80 |
| Plumbers | 9.60 | 19.50 |
| Drillers | 6.40 | 11.00 |
| Sheet-iron workers | 8.50 | 15.00 |
| Coppersmiths | 8.60 | 18.00 |
| Molders, iron | 9.00 | 14.50 |
| Molders, brass | 9.00 | 15.00 |
| Laborers | 4.20 | 8.00 to 10.00 |

The following is a comparative statement showing the difference in wages paid the men who man American ships and those paid on ships of foreign countries engaged in foreign commerce—*St. Louis*, American, 11,629 tons; *Oceanic*, British, 17,274 tons; *Kaiser Wilhelm der Grosse*, German, 14,349 tons:

| | American. | | British. | | German. | |
|---|---|---|---|---|---|---|
| | No. | Total wages. | No. | Total wages. | No. | Total wages. |
| Deck officers | 6 | $430.00 | 7 | $359.64 | 6 | $221.34 |
| Deck force | 45 | 1,129.58 | 44 | 967.14 | 53 | 659.99 |
| Engineers | 29 | 1,595.00 | 25 | 1,455.57 | 34 | 1,069.53 |
| Firemen | 136 | 4,860.75 | 153 | 3,676.59 | 179 | 2,879.80 |
| Purser, etc | 4 | 242.50 | 5 | 230.85 | 5 | 138.04 |
| Culinary | 27 | 680.09 | 21 | 493.29 | 25 | 486.95 |
| Stewards | 125 | 2,179.04 | 162 | 2,530.36 | 191 | 2,156.27 |
| Miscellaneous | 8 | 189.13 | 10 | 177.88 | 7 | 106.63 |
| Total | 380 | 11,306.09 | 427 | 9,891.32 | 500 | 7,715.55 |

The comparison would be more exact if the vessels were precisely alike, with the same crews. The crew of 427 men on the British *Oceanic* is paid at the rate of $9,900 per month, in round numbers. A crew of the same number, performing the same duties, if paid at the corresponding rates of wages on the American steamship *St. Louis*, would receive as nearly as may be $12,500 a month. A crew of the same number, performing the same duties, if paid at the corresponding rate of wages on the German *Kaiser Wilhelm der Grosse*, would receive as nearly as may be $6,800 a month.

When the American ship undertakes to compete with the foreign vessel it is not only under a heavy handicap due to the difference in cost of construction and of manning the ship, but it also has to compete with lines heavily subsidized by foreign governments. It is not a question of competition between the American steamship company and the foreign steamship company, but one of competition between the American company and the foreign governments themselves. I find that Great Britain paid last year in mail subventions for her various steamship lines $6,000,000. Not only that, but a short time ago the British Government loaned the Cunard Steamship Company $13,000,000 on easy terms for the construction of a line of ships to engage in the trade with the United States. In addition to this, she proposes to pay the Cunard company, when these vessels enter upon this service, $1,100,000 a year as a subsidy, thereby making it possible for the company to pay back the money loaned by the Government for the construction of these vessels in twelve years out of the annual subsidy received from the British Government. Great Britain has paid since 1840 $250,000,000 in subsidies.

France pays an annual mail subsidy of $5,000,000 and navigation bounties of $3,500,000 in addition.

In Germany the Government railroads haul the raw material for the construction of her ships for nothing or a mere nominal charge. These railroads also grant very low rates, which are themselves discriminatory, upon goods and passengers for export via German steamships. In addition to this she pays an annual mail subvention of $2,143,000.

Italy pays $3,000,000 a year in subsidies and bounties. The total mail subventions and bounties paid by foreign countries engaged in foreign commerce is over $25,000,000 a year. If these foreign ships carried freight at cost, the subsidies alone would give them a handsome profit in the business. It is not surprising, in view of this condition of affairs, that American capital is not seeking investment in our merchant marine. We sometimes hear the assertion made that our capital has been so universally invested in our internal improvements, realizing large profits, that its attention has not been attracted to the merchant marine. In my opinion, this is not true. When the United States discontinued the policy of offering mail subventions in 1857 we had a number of splendid steamships engaged in foreign trade. We had the finest equipped and the fastest vessels afloat. These vessels were all in the service.

Mr. RAINEY. Will the gentleman yield?

Mr. POLLARD. Not at present. I want to ask gentlemen on the other side—I want to ask gentlemen who are opposed to this bill—if it was possible for them to have continued in that service in competition with the foreign subsidized vessels why were they withdrawn from the high seas? The mere fact that they did not remain in this service and the further fact that our steamship companies engaged in the foreign trade did not build new and more modern vessels to replace the old ships that became unseaworthy is in itself evidence, to my mind, that they could no longer compete against the highly subsidized ships of foreign countries.

Mr. RAINEY. Will the gentleman permit me to answer his question?

The CHAIRMAN. Does the gentleman yield?

Mr. POLLARD. The gentleman may answer the question in his own time; not in mine.

The CHAIRMAN. The gentleman declines to yield.

Mr. POLLARD. Mr. Chairman, in 1883 the enterprising merchants of New York engaged in the Brazilian trade organized a steamship company and built a number of strictly modern vessels for the South American trade. These ships were kept in the service for almost ten years, when they were finally driven from the high seas. The history of the American merchant marine of itself proves that it is utterly impossible for American ships, built in American shipyards and manned by American seamen, to compete in foreign commerce unless they receive assistance from their home Government to offset the handicap they now have to meet. The only solution of this question that I can see is for the United States to return to its policy of granting liberal mail subventions similar to those we paid prior to the civil war. It is a shameful fact that to-day the United States pays an annual tribute of $200,000,000 to foreign steamship lines for delivering our own goods to foreign markets. As a practical business proposition it seems to me there is no investment more inviting for the United States to make than to spend four or five million dollars a year in the way of mail subventions in order to restore American ships upon the high seas, and instead of paying this $200,000,000 to foreigners, pay it to our own people. In this way we would make it possible for Americans to deliver our surplus products to market.

With the marvelous development of our internal resources and the increased production upon our farms and in our fac-

tories it is necessary for us to seek wider markets for our surplus products. The greatest undeveloped market in the world to-day lies in the republics of South America and in the oriental countries. The republics of South America are making great strides in the development of their natural resources.

The total value of the international trade of South America for the year 1895 was $737,603,000. Her total international trade ten years later, in 1905, was $1,175,904,000. The development of the great natural resources of the South American republics is in its infancy, yet these figures disclose that a marvelous development has taken place within the last few years. Her total trade with foreign countries has increased 59 per cent. Of all her imports which increased from $311,306,000 in 1895 to $474,113,000 in 1905 the United States furnished in the latter year but 13.5 per cent—an insignificant amount. During this period the exports from the United States to the chief commercial country of South America—Brazil—declined $5,000,000. Our exports to Brazil for the fiscal year 1905 were 27 per cent less than in 1895. Our exports to Brazil are chiefly agricultural products. This trade is made up chiefly of wheat flour and other breadstuffs. Since 1895 our exports of breadstuffs to Brazil have actually decreased 24 per cent. During this same period the exports of food products to Brazil from Great Britain, Italy, and Argentina have made an increase. The republics of South America are our neighbors. We are associated with them under the very closest political ties. Under the principle known as the Monroe doctrine the United States virtually guarantees a protectorate over these republics. This is especially true as far as the extension of any European influence is concerned. While our political ties are very close, our commercial relations are extremely remote. Their trade properly belongs to us. While there is every natural inducement to draw these countries closer to the United States than to any foreign country, yet the facts are, so far as our commercial relations are concerned, that we occupy third or fourth rank. What is the reason for this deplorable condition of affairs? It is simply due to the fact that we have no regularly established steamship lines running to the ports of South America. It is a disgraceful fact that there is not a single steamship flying the American flag that visits any South American port south of the Orinoco River. The United States is entirely dependent upon foreign countries to carry our commerce to South America, and they give us abominable service. While there are a number of ships of slow speed that make these trips, but few have regular times of departure, and it seems impossible to tell when a vessel will start or just what South American port they propose to visit. A great many times vessels come from South America to our Atlantic coast ports and return to South America by way of Europe. They bring a cargo from South America to the United States, then take on a cargo here for Europe, again unload, and take on a new cargo of European goods for South America. In this connection I desire to quote what Secretary Root says concerning the mail service:

> In the year ending June 30, 1905, there entered the port of Rio de Janeiro steamers and sailing vessels flying the flag of Austria-Hungary, 120; of Norway, 142; of Italy, 165; of Argentina, 264; of France, 349; of Germany, 657; of Breat Britain, 1,785; of the United States, no steamers and 7 sailing vessels, 2 of which were in distress.
>
> An English firm runs a small steamer monthly between New York and Rio de Janeiro; the Panama Railroad Company runs steamers between New York and the Isthmus of Panama; the Brazilians are starting for themselves a line between Rio and New York; there are two or three foreign concerns running slow cargo boats, and there are some foreign tramp steamers. That is the sum total of American communications with South America beyond the Caribbean Sea. Not one American steamship runs to any South American port beyond the Caribbean. During the past summer I entered the ports of Para, Pernambuco, Bahia, Rio de Janeiro, Santos, Montevideo, Buenos Ayres, Bahia Blanca, Punta Arenas, Lota, Valparaiso, Coquimbo, Tocopilla, Callao, and Cartagena, all of the great ports and a large proportion of the secondary ports of the southern continent. I saw only one ship, besides the one that carried me, flying the American flag. The mails between South America and Europe are swift, regular, and certain; between South America and the United States they are slow, irregular, and uncertain. Six weeks is not an uncommon time for a letter to take between Buenos Ayres or Valparaiso and New York. The merchant who wishes to order American goods can not know when his order will be received or when it will be filled. The freight charges between the South American cities and American cities are generally and substantially higher than between the same cities and Europe. At many points the delivery of freight is uncertain and its condition on arrival doubtful. The passenger accommodations are such as to make a journey to the United States a trial to be endured and a journey to Europe a pleasure to be enjoyed. The best way to travel between the United States and both the southwest coast and the east coast of South America is to go by way of Europe, crossing the Atlantic twice. It is impossible that trade should prosper or that intercourse increase or mutual knowledge grow to any great degree under such circumstances. The communication is worse now than it was twenty-five years ago. So long as it is left in the hands of our foreign competitors in business we can not reasonably look for any improvement. It is only reasonable to expect that European steamship lines shall be so managed as to promote European trade in South America rather than to promote the trade of the United States in South America.

I also wish to insert here what Postmaster-General Cortelyou said in his annual report for 1905:

> I refer to Brazil and the countries south of it. Complaints of serious delay to mails to these countries have become frequent and emphatic, leading to the suggestion on the part of certain officials of the Government that for the present, and until more satisfactory direct communication can be established, important mails should be dispatched to South America by way of European ports and on European steamers, which would not only involve the United States in the payment of double transit rates to a foreign country for the dispatch of its mails to countries of our own hemisphere, but might seriously embarrass the Government in the exchange of important official and diplomatic correspondence.
>
> The fact that the Government claims exclusive control of the transmission of letter mail throughout our own territory would seem to imply that it should secure and maintain the exclusive jurisidiction, when necessary, of its mails on the high seas. The unprecedented expansion of trade and foreign commerce justifies prompt consideration of an adequate foreign mail service.

In view of these conditions is it to be wondered that the United States only furnishes 13.5 per cent of the imports of South America? On the other hand, Great Britain, France, Germany, Italy, and Spain have regular steamship lines, heavily subsidized, plying direct between South America and their respective countries. The ships that carry American goods to South America are manned by men who are interested not in the United States, but in their own country. They seek on every hand to discriminate against American goods for the purpose of increasing the sale of products of their own country. These steamship lines have commercial men or traveling men who visit the ports of South America to sell goods—not American goods, but goods from their home lands. It is of the utmost importance to American trade that we establish direct mail lines to the South American republics. These countries afford a natural market for our products. Their climatic conditions are such that very few of their products can be produced in the United States, and they in turn can not produce our products. We are in the market to buy the very things they have to sell, and they are in the market to buy our surplus products. In the past the United States has held a very small per cent of the trade of these countries.

While we have made satisfactory advancement in our trade relations with the countries of the Far East, yet the prestige gained is sure to be lost unless the Federal Government will come to the aid of the ships flying our own flag that are forced to compete not only with steam lines of foreign countries, but with the governments themselves. If we are to have our share which properly belongs to us of the South American trade, it is absolutely essential that the United States shall provide a mail subvention in order to induce American steamship lines to enter this trade. The bill now pending before the House seeks to accomplish this result. Under the terms of this bill a direct mail subvention is provided for a fortnightly service from Atlantic coast points to Brazil and to Argentina. It provides for a weekly service between the Gulf ports and the Isthmus of Panama. In the South American trade on the Pacific Ocean it provides for a fortnightly service between American ports and the Isthmus of Panama, Peru, and Chile. It also provides a mail subvention for a line of steamers engaged in the trade with Japan, China, and the Philippines, via Hawaii, furnishing a fortnightly service. It also provides for a mail subvention for a line of steamers north of Cape Mendocino direct to China, Japan, and the Philippines. It further provides an increase in the mail subvention now paid to the line running from San Francisco to Australia via Hawaii.

It seems to me that the one question for us to decide at this time is whether the proposed legislation will bring results. The present bill entails a maximum expenditure of $2,500,000 in the way of mail subventions. When these ships are constructed and enter the service, will our trade with these countries increase as is contemplated by the advocates of this legislation? In answer to this question I wish to call your attention to the experience of other countries and the experience of our own lines that are now drawing subventions under the act of 1891.

Under this act of 1891 there are four mail lines operating upon the high seas. This plan is not an innovation; it is simply an enlargement and extension of the act of 1891, under which we are now paying a little less than $1,500,000 annually in mail subventions. Great Britain began the payment of mail subventions in 1840. Since that time her foreign tonnage has increased from 3,000,000 to 17,000,000 tons in 1905. She is now paying annually $6,000,000 in mail subventions to her various lines engaged in foreign trade. In 1881 France began the granting of mail subventions for the enlargement of her merchant marine. At that time her foreign tonnage was 914,000 tons. In 1904 it had increased to 1,760,000 tons. She is now paying in annual mail subventions and navigation bounties $8,500,000.

In 1885 Germany began the payment of mail subventions, and her foreign tonnage has increased from 1,043,000 to 3,393,000 tons in 1904. She is paying annually in the way of mail subventions $2,143,000 in addition to the discriminating rates on the state railroads in favor of her goods for export in German ships.

Italy began the payment of mail subventions during the early nineties. Under this policy her tonnage has increased from 860,000 tons, in 1893, to 1,259,000 in 1904. She pays in annual mail subventions and navigation bounties the sum of $3,000,000.

In 1894 Japan began the granting of mail subventions. At the time of the breaking out of her war with China her foreign tonnage only amounted to 200,000 tons. Since that time it has increased to 830,000 in 1904. She is now spending in the way of mail subventions and direct bounties $3,000,000 a year.

I wish now to call your attention to the increase in our own trade as a result of the mail subventions provided for in the act of 1891. Under this law the Postmaster-General was authorized to enter into a contract with a steamship company for a weekly service to Cuba and Mexico. Engaged in this trade there are now seventeen vessels, with a speed ranging from 13 to 18 knots. I have not been able to get any figures prior to 1895, but from The present bill entails a maximum expenditure of $3,750,000 creased from 1,000,000 to 17,000,000 tons in 1905. She is now not more than received value for value given? Under this same law the Postmaster-General entered into a contract for a weekly service in Venezuela. Engaged in this trade there are four steamers, two of 14 and two of 12 knots speed. This company receives an annual mail subvention from the Government of $100,000. This is the only line provided for in the act of 1891 that has not produced satisfactory results. The fact, however, that our trade has not increased as it should with Venezuela has been due to the almost continuous state of revolution in which the Venezuelan Government has been involved for the last fifteen years. Her internecine strife has been such that it has discouraged merchants, not only of our own country, but of all foreign countries as well, from enlarging their trade with the Republic of Venezuela.

Under this same law of 1891 the Postmaster-General entered into a contract with the American Mail Steamship Company for a weekly service to Jamaica or the British West Indies. This company now receives an annual mail subvention from the Government of $120,000. Our imports from the British West Indies have increased from $9,777,000 in 1895 to $10,437,000 in 1905. Our exports have increased from $7,000,000 in 1895 to $10,000,000 in 1905. This shows an increase of 30 per cent in our exports to that country.

Under this same law the Postmaster-General entered into a contract with the Oceanic Steamship Company for a service of seventeen trips a year between the Pacific coast ports and Australia. Engaged in this service there are six vessels; three of 16 and three of 14 knots speed. Our imports from Australia have increased from $4,620,000 in 1895 to $11,892,000 in 1905. Our exports to Australia have increased from $9,014,000 to $28,000,000 in 1905. Our imports from Australia have increased 157 per cent, while our exports to that country have increased a little over 200 per cent. If we are to judge the future by the past, we certainly are safe in saying that the proposed legislation will accomplish the object sought. These figures demonstrate that the experience of foreign countries in the payment of mail subsidies and our experience under the law of 1891 has been rewarded with success. This is not an experiment. It is not an innovation. It is not proposed that a mail contract shall be let for the creation of a service to any country that does not have a very large foreign trade. With all of these countries for which a line is provided there is a great demand for American goods and there is also a large demand in the United States for the goods from these countries. The only thing necessary is to provide a means for carrying on this trade. As far as the objection to granting a mail subvention to a steamship company is concerned, I can see no difference between paying a steamship line for carrying the mails of the United States between our ports and those of South America and the Orient, and paying the railroad companies for transporting the mails between points within the United States. This bill does not provide a subsidy on the tonnage carried in these vessels. It simply seeks to provide compensation for a fast mail service to these countries. A very laudable undertaking and one that, to my mind, is of the utmost importance in the development of our foreign trade. One of the first requisites of commerce with any country is a regular, fast mail service. To carry out the provisions of the pending bill will necessitate the construction of not less than thirty-two new 16-knot ships. Vessels of this type cost over $1,000,000 each. [Applause on Republican side.] It will require the construction of twenty ships for the South American trade alone. There is not a single ship of American register in the American merchant marine that is eligible to enter this South American service. This bill does not propose to aid an industry already in existence. It provides for the creation of an entirely new industry. In my opinion, if the levying of a protective tariff was ever justifiable for the building up of a new industry, this legislation is justifiable. [Applause.] I believe that this legislation is founded Of the twenty-three ships necessary for the trade to the Far East there are ten ships available. For this service thirteen new ships must be built. This bill does not propose to aid an industry already in existence, except to a very limited extent. As far as the South American trade and 60 per cent of the eastern trade is concerned, it provides for the creation of an entirely new industry. In my opinion, if the levying of a protective tariff was ever justifiable for the building up of a new industry, this legislation is justifiable. [Applause.] I believe that this legislation is founded upon sound Republican doctrine. As a Republican I believe firmly in the wisdom of the protective tariff.

I believe that this legislation is in harmony with the traditions of my party. I believe that it is based upon a sound governmental policy; one that will inure to the benefit not only of the men engaged in ocean commerce but also to the producing classes throughout the United States. This same policy of protection that has built up our internal industries; this same policy of protection that has returned to labor the 3,000,000 workmen that were tramping about our country seeking employment in 1893; this same policy of protection that has increased the production of all our mines, and of all our factories, and of all our farms until their total value has reached the phenomenal figure of $27,000,000,000 a year; this same policy of protection that has made the domestic commerce of the United States greater by $7,000,000,000 than the entire international commerce of the world; this same policy of protection that has placed the United States in the first rank among the commercial nations of the world will, when applied to the merchant marine, also, I believe, in time make the United States again mistress of the seas. [Prolonged applause.] If the American farmer receives any benefit from the protective tariff when applied to our internal industries, then I believe this bill will be beneficial to him. When a protective tariff creates a new industry, when it starts in motion the spindles of a new factory, when it kindles the fires for the first time in a new furnace it furnishes labor for American workmen. It draws workmen from the class that is producing food and converts them into consumers of food products. This policy of protection, while it has not brought direct benefit perhaps with few exceptions to the American farmer, yet it has certainly brought to them an indirect benefit by creating a demand for their products. The farms of the United States were never so productive as they are to-day. The total output of the American farms last year was greater than in any preceding year in our history. Not only did they have the greatest yield in our history, but the farmers received a higher price, taking everything into consideration, than ever before. [Applause.] This was simply because there was a great home demand for these products as well as all others. There were more people eating bread and choice cuts of meat than ever before.

Just as the protective tariff has benefited the American farmer in the past so will the pending bill benefit him by increasing the number of men who are consumers of the food products of the American farms. This bill will not only stimulate work in the shipyards, thereby increasing the demand for our food products at home, but it will in addition to this bring a direct benefit to the American farmer in providing for him an increased foreign market for his surplus food products. It is a notorious fact that almost 50 per cent of the trade to-day that we have with the South American republics and the countries of the Orient consist of food products. This bill simply seeks to extend these markets; to extend the demand for our surplus products. To my mind the farmers of the West have a greater interest, or should have, in this measure than in any other bill that has been considered in either session of this Congress. When we look about us and see the great increase in production of American farms; when we realize that the area in which corn can be raised is being extended into the Southern States; when we realize that the semi-arid regions are being reclaimed to agriculture; when we realize that in the last ten years the production of the farms of the United States has increased 100 per cent; when we realize that in the next twenty-five years the farms that to-day are engaged in the production of wheat and corn and other cereals by the new methods that have been introduced in agriculture will increase their output from 20 to 50 per cent, we must appreciate the fact that it is of the utmost importance to the

American farmer that an increased and wider market be provided for his surplus products. [Applause.] Unless this is done the result attained from more intensified farming, from the reclamation of the semiarid regions, and the extention of agriculture in the South, will simply result in overproduction. The question of seeking wider and greater markets is one of the greatest problems for our statesmen to solve to-day. There is no question that comes nearer to the hearts of the farmer than this. There is no question in which they are more vitally interested than this. I believe that this bill is a start in the right direction. It will not only stimulate trade at home by increasing the home demand for food products, but it also looks to the extension of foreign markets for our surplus food and other products. I believe that if the agriculturalists thoroughly understood this question; understood its magnitude; understood the direct bearing it has upon their interests, they would be petitioning Congress in a body for the enactment of this legislation. As the representative of a purely agricultural district; as the representative of a constituency that has no interest aside from agriculture, I give this legislation my hearty and earnest support. I am in favor of this bill because I believe that it means the extension of our foreign markets; I am in favor of this bill because I believe that it will result in a direct benefit to the great agricultural interests of the West. [Applause on Republican side.]

A few days ago we passed here a bill carrying an appropriation of over $83,000,000 for the improvement of our internal waterways. This bill received almost the unanimous vote of the House. The improvement of our rivers and the harbors of our Great Lakes and of the seacoast ports for our domestic commerce has become a fixed national policy. All parties favor it. Can anyone point out the difference between appropriating money for carrying our mails to distant ports across the sea and for the development of our over-sea commerce and appropriating money for the improvement of our rivers and harbors for the development of our internal commerce? Our navigation laws absolutely prohibit foreign ships from participating in our internal or coastwise trade. The protection we afford them is in effect a complete embargo against foreign competition. We compel the railroads to construct their own lines of travel; yet we dredge our rivers and harbors and, in fact, furnish free of cost the highways of travel for our domestic ship commerce and by statutory law explicitly prohibit foreign competition in this trade. We dredge the harbors of the Great Lakes and the Ohio River, so that Mr. Hill, Mr. Harriman, and the steel trust of Pennsylvania can transport their iron ore and their other products by water. We give them assistance of far greater value than the help provided in this bill for ships engaged in foreign commerce. I have heard no one berate against river and harbor improvements because these trust magnates were to receive some benefit. If it is right to appropriate money to aid commerce on our internal waterways, why is it not right to aid commerce for over-sea traffic? In principle there is no difference between the two.

Mr. RAINEY. Does the gentleman think there is any analogy between dredging out the channel of a river, so that a man can operate a boat on it, and paying $600,000 to a man who owns a boat?

Mr. POLLARD. I will answer the gentleman. I want to say this: That the American Congress, by legislation, not only furnishes free of cost the highways of travel for our internal commerce, but we enact navigation laws that absolutely prohibit any foreign ship coming in and competing in this service. [Applause.] We provide an absolute embargo against foreign ships entering into this service to any extent; yet we go ahead and spend millions of dollars for dredging the rivers, for improving the harbors on the seacoast and the Great Lakes, in order that these trust magnates and others may transport their products more expeditiously.

Mr. RAINEY. Does the gentleman say that the law prohibits a citizen of England living in this country from owning a steamboat on the Mississippi River, and will the gentleman call attention to the law that prohibits that?

Mr. POLLARD. Not at all; what I say is that our navigation laws prohibit absolutely any ships of foreign build competing in this domestic commerce. We furnish an absolute embargo, and the gentleman knows that is true.

Mr. MINOR. Or a foreigner owning them.

Mr. GROSVENOR. Will the gentleman yield to me?

Mr. POLLARD. Yes, sir.

Mr. GROSVENOR. Is it not a fact that the Democratic party, through its national conventions and public utterances of its public men, did persistently from the early years of the Government down to a very recent period deny the power of the Federal Government to improve the rivers and harbors by an appropriation by Congress? And did not a Democratic President veto a river and harbor bill on the ground of its unconstitutionality and because it was a subsidy?

Mr. CLARK of Missouri. Let me ask the gentleman from Ohio [Mr. GROSVENOR] a question. Did not a Republican President veto one, too?

The CHAIRMAN. The gentleman's time has expired.

Mr. GROSVENOR. Mr. Chairman, I yield as much time to the gentleman from Nebraska as he desires, until half past 5 o'clock.

The CHAIRMAN. How much time does the gentleman desire?

Mr. GROSVENOR. If the Chair will allow me, there will be no other speech after the conclusion of the gentleman from Nebraska, and therefore he can go on until half past 5 if he wishes to do so.

Mr. SULZER. I trust the gentleman from Ohio [Mr. GROSVENOR] will answer the question of the gentleman from Missouri [Mr. CLARK].

The CHAIRMAN. The gentleman from Ohio [Mr. GROSVENOR] is not entitled to the floor.

Mr. SULZER. Well, I will give him a minute to answer.

Mr. GROSVENOR. What position does the gentleman from New York occupy? Is he a middleman or "mid" something else?

Mr. SULZER. No; I am not a middleman, nor a subsidy-man either?

Mr. POLLARD. If the men here who are opposing the passage of this bill are sincere, if they are opposing this bill simply because Mr. Hill, Mr. Harriman, or some of the other great trust magnates are to become beneficiaries, they must forever in the future withhold their support from the appropriation of any money for the improvement of our internal waterways within the United States. Now, then, Mr. Chairman, what benefit has the western farmer received from the hundreds of millions of dollars that have been expended in the improvement of the harbors of the Great Lakes or the seacoast ports? His benefit has been a negligible quantity to date. This legislation will give him a direct benefit by furnishing an extended and wider market for his farm crops. If this legislation accomplishes anything, if it creates these new ocean lines, if it causes the construction of these twenty-odd new ships for this increased service, it is bound to bring to the farmer a direct benefit. If it does not create these new lines and result in the establishment of this over-sea service, it will cost the Government nothing. The money will not be paid out unless the ships are built and the service rendered. Why should we spend millions for the development of commerce on our internal waterways and stop at the coast line? In my opinion we must have an outlet for our surplus products, not only of the farms, but of the factories as well. It is for a wider market, for the extension of our foreign market for our surplus that I plead to-day. [Applause.]

I am also in favor of this bill because it is simply carrying out a policy to which my party has been pledged for the past twenty years. The Republican national platform of 1884 contained these words:

> We call upon Congress to remove the burdens under which the American shipping has been depressed, so that it may again be true that we have a commerce that leaves no sea unexplored.

Every Republican national platform from that day to this has contained similar expressions, the only difference being that in each succeeding platform the party has been more explicit and more pronounced in favor of the rehabilitation of our merchant marine. The Republican national platform of 1904, upon which every Republican Member of the present Congress was elected, declared:

> While every other industry has prospered under the fostering aid of Republican legislation, American shipping engaged in foreign trade in competition with the low cost of construction, low wages, and heavy subsidies of foreign governments, has not for many years received from the Government of the United States adequate encouragement of any kind. We therefore favor legislation which will encourage and build up the American merchant marine, and we cordially approve the legislation of the last Congress which created the Merchant Marine Commission to investigate and report upon this subject.

It has been said that this plank in the platform does not commit the party to a mail subsidy. That is true. And yet the only act that has been passed by the Republican party, the only act that has been supported by a Republican President in the last twenty-five years has been a mail subsidy. The act of 1891 was a mail subsidy pure and simple. This act is simply an amendment of that act, a continuation and an extension of the principle laid down in the act of 1891. It is not sufficient for us to say that we might, perhaps, favor discriminating duties, return to the old policy that was followed at the beginning of our country, under which we built up our magnificent merchant

marine. We must not lose sight of the fact that if we should do that we would meet two or three serious objections. I might say in passing when I began my study of this question I thought the solution of the problem was to impose discriminating duties. I thought that would restore our commerce on the high seas and would furnish the proper remedy. The more I studied the question the further I got away from that idea. In the first place, we have something like forty-seven special treaties that we have negotiated with foreign countries.

The moment we passed a law here imposing discriminating duties on goods carried in foreign bottoms we would abrogate every one of those forty-seven treaties. By that act we would disturb, to the greatest possible degree, our international trade. We would involve ourselves in controversy with countries that are to-day our friends, countries with which we have the most friendly commercial relations. The abrogation of these treaties without notice would surely endanger and jeopardize these amicable conditions. That is a serious proposition, to my mind. And another objection is that 47 per cent of our imports to-day come in duty free. Would you impose a discriminating duty on those goods that come in duty free? That would not do; and if you expect to raise sufficient revenue to build up our merchant marine by maintaining discriminating duties upon those goods that are dutiable it would not furnish sufficient support to be of any value. Not only that, but the countries to which these lines are to run now have between 80 and 90 per cent of their exports that come to this country duty free. So you can see at once that in undertaking to build up our merchant marine by discriminating duties you at once meet insurmountable obstacles.

The platform adopted by the Republicans of my district when I first ran for Congress in the summer of 1905 and again last fall indorsed the Republican national platform of 1904. When the Republicans of my district adopted that platform and indorsed the national platform of 1904 I believe that they meant to adopt the plank relating to the merchant marine. If they had no such intentions, they certainly would have made an exception to this plank. I believe that a party platform means something. When my party platform pledges certain legislation, I believe that it is the solemn duty of the men elected upon that platform to redeem those promises. [Applause.] After having been elected upon a platform, we have no right after election to repudiate any of the pronouncements of the platform upon which we made our campaign. I can not understand now, after the election, how Members of this Congress can go back to their constituents and say we voted to repudiate one of the planks of our platform. I do not understand by what philosophy you can now, a year after the election, elect on your own motion to make an exception to this plank any more than any other. I feel that I am just as much bound to vote to carry out the plank in the platform relating to the merchant marine as any other plank in that platform. I propose to do so, at any rate, until the people of my district in convention assembled make known to me that they are opposed to any of the provisions of the platform upon which I was elected. [Applause.]

Benjamin Harrison, in his first message to Congress, December 3, 1889, made the following recommendation:

> I recommend that such appropriation be made for ocean mail service in American steamships, between our ports and those of Central America, China, Japan, and the important islands in both of the great oceans, as will be liberally remunerative for the service rendered and as will encourage the establishment and in some fair degree equalize the chances of American steamship lines in the competition which they must meet.

As a result of the recommendations of President Harrison and in compliance with the Republican national platforms of 1884 and 1888, Congress passed a mail subvention law, which was approved March 3, 1891. Under this law the Postmaster-General entered into contracts with steamship companies for carrying the foreign mail, which entailed the expenditure of one million four hundred and forty thousand and some odd dollars per year. Commenting on this act in his last annual message, December 6, 1892, President Harrison said:

> I have felt, and have before expressed the feeling, that this condition of things was both intolerable and disgraceful. A wholesome change of policy and one having in it much promise, as it seems to me, was begun by the law of March 3, 1891. Under this law contracts have been made by the Postmaster-General for eleven mail routes. The expenditure involved by these contracts for the next fiscal year approximates $954,123.33. As one of the results already reached, sixteen American steamships of an aggregate tonnage of 57,400 tons, costing $7,400,000, have been built or contracted to be built in American shipyards. * * * No subject, I think, more nearly touches the pride, the power, and the prosperity of our country than this of the development of our merchant marine upon the sea. If we could enter into conference with our competitors and all would agree to withhold government aid, we could perhaps take our chances with the rest, but our great competitors have established and maintained their lines by government subsidies until they now have practically excluded us from participation. In my opinion, no choice is left to us but to pursue, moderately at least, the same lines.

In his first inaugural address, March 4, 1897, President McKinley said:

> Commendable progress has been made of late years in the upbuilding of the American Navy, but we must supplement these efforts by providing as a proper consort for it a merchant marine amply sufficient for our own carrying trade to foreign countries. The question is one that appeals both to our business interests and the patriotic aspirations of a great people.

In each of his four annual messages to Congress President McKinley repeated his recommendations for the encouragement of the merchant marine. In the last message President McKinley ever delivered to his countrymen, on that memorable occasion at Buffalo, September 5, 1901, he made his last appeal in behalf of the merchant marine in these words:

> One of the needs of the times is direct commercial lines from our vast fields of production to the fields of consumption that we have but barely touched. Next in advantage to having the thing to sell is to have the convenience to carry it to the buyer. We must encourage our merchant marine. We must have more ships. They must be under the American flag, built and manned and owned by Americans. These will not only be profitable in a commercial sense; they will be messengers of peace and amity wherever they go.

In his first message to Congress, December 3, 1901, President Roosevelt took up the theme of his illustrious predecessor and launched forth in these words:

> Ships work for their own countries just as railroads work for their terminal points. Shipping lines, if established to the principal countries with which we have dealings, would be of political as well as commercial benefit. From every standpoint it is unwise for the United States to continue to rely upon ships of competing nations for the distribution of our goods. It should be made advantageous to carry American goods in American-built ships.

In his six annual messages to Congress President Roosevelt has repeated this recommendation. He is so deeply interested in this matter that he felt called upon to send a special message to Congress urging the passage of the pending bill January 23 last. In this message he used this language:

> Our shipping in South American ports is almost a negligible quantity; for instance, in the year ending June 30, 1905, there entered the port of Rio de Janeiro over 3,000 steamers and sailing vessels from Europe, but from the United States no steamers and only seven sailing vessels, two of which were in distress. One prime reason for this state of things is the fact that those who now do business on the sea do business in a world not of natural competition, but of subsidized competition. State aid to steamship lines is as much a part of the commercial system of to-day as state employment of consuls to promote business. Our commercial competitors in Europe pay in the aggregate some twenty-five millions a year to their steamship lines—Great Britain paying nearly seven million. Japan pays between three and four millions. By the proposed legislation the United States will still pay relatively less than any one of our competitors pays. Three years ago the Trans-Mississippi Congress formally set forth as axiomatic the statement that every ship is a missionary of trade, that steamships work for their own countries just as railroad lines work for their terminal points, and that it is as absurd for the United States to depend upon foreign ships to distribute its products as it would be for a department store to depend upon wagons of a competing house to deliver its goods. This statement is the literal truth.
>
> Moreover, it must be remembered that American ships do not have to contend merely against the subsidization of their foreign competitors. The higher wages and the greater cost of maintenance of American officers and crews make it almost impossible for our people who do business upon the ocean to compete on equal terms with foreign ships unless they are protected somewhat as their fellow-countrymen who do business on land are protected. We can not as a country afford to have the wages and the manner of life of our seamen cut down; and the only alternative, if we are to have seamen at all, is to offset the expense by giving some advantage to the ship itself.

Thus it will be seen that every Republican national platform adopted within the last twenty-two years has pledged our party to legislation that would restore America's lost prestige in the foreign carrying trade of the world.

President Harrison, President McKinley, and President Roosevelt have all urged the passage of such legislation not once, but a number of times; in fact we find that appeal in not only their inaugural addresses, but in every one of their annual messages to Congress. Our party is committed to this policy. All of our great statesmen have been its faithful advocates. When it comes to matters of this kind, and I find that my party in her national platforms has been promising the people relief along this line, and I find that all of our great statesmen of the day; all of the men who shape the policy of the country; all of the men who have taken a conspicuous place in our national affairs for the last quarter of a century have been exponents of this policy, I feel that I am in good company when I raise my voice in behalf of such a measure. [Applause.]

It is claimed by some that it is a trust measure; that the appropriations under this act will find their way into the coffers of Mr. Hill, of Mr. Harriman, and of Mr. Gould, or some other of the great trust magnates of the country. I do not believe that Presidents Harrison and McKinley, great statesmen as they were, faithful and loyal to the people's trust, would urge the enactment of legislation that would carry benefit to the swollen fortunes of the United States at the expense of the general public. One of the strongest advocates of this legislation is the present Chief Executive. Certainly no one can charge President Roosevelt with desiring to enrich and fortify the great

trusts that he has been trying to make amenable to the law. The present Chief Executive has done more toward destroying monopoly and eliminating the abuses of corporate wealth than all the other men in the country combined. I can not for a moment believe that to-day he is ready to turn his back upon his past record and advocate a policy that will result in destroying all of the beneficient legislation, administration, and example that he has given the people since he became President. The charge that this legislation is for the benefit of the trusts is untrue. If it were true, President Roosevelt would not be for this bill. If I thought that this charge were true, I should oppose this bill if I stood all alone. On the contrary, I believe that this legislation will be beneficial to the whole country. I shall cast my vote for this bill with a clear conscience, believing as I do that it is a fulfillment of my party's pledge to the people, and in entire harmony with the policy of protection in which I believe with my whole heart. [Prolonged applause.]

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. MANN having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had disagreed to the amendment of the House of Representatives to the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. PENROSE, Mr. FLINT, and Mr. DANIEL as the conferees on the part of the Senate.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 24640) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes, disagreed to by the House of Representatives, had agreed to the conferenec asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. MCCUMBER, Mr. SCOTT, and Mr. TALIAFERRO as the conferees on the part of the Senate.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 25483) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1908, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House of Representatives on the disagreeing votes of the two Houses thereon, and had appointed Mr. PENROSE, Mr. PROCTOR, and Mr. CLAY as the conferees on the part of the Senate.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 24134. An act providing for the granting and patenting to the State of Colorado desert lands formerly in the Southern Ute Indian Reservation in Colorado; and

H. R. 4586. An act for the relief of Mrs. R. E. Miller.

SUBSIDY BILL.

The committee resumed its session.

Mr. LEGARE. Mr. Chairman and gentlemen of the House, it must be very evident to the average mind that the framers of this bill have fallen far short of the intent and purpose of the original promoters of ship subsidy. It has been urged from time to time by the early advocates of subsidy that American ships should be subsidized because it was necessary, first, to build up the national defense by furnishing a large number of vessels for use and a naval reserve from which to draw in time of war, and, second, to build up our foreign commerce. This bill does neither, and yet it is before us for discussion under the caption "to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce." A bill was passed by the Senate with this title and sent to us for consideration. Of this bill nothing remains but the caption to which I have referred.

The bill reported by the House committee and now under discussion has never been offered in this House, it has never been carefully considered and discussed by the Committee on Merchant Marine and Fisheries, and no arguments for or against it have ever been made before the committee. It comes before us shorn of such features as would tend to make it desirable to the original champions of ship subsidy, gorged with such features as tend to make it all the more abhorrent to those of us who are opposed to subsidies of any nature. It will be my endeavor, therefore, to show that it will not "promote the national defense;" that it will not "create a naval reserve;" that it will not "establish American ocean mail lines to foreign markets;" that it will not "promote commerce;" that it will be a foolish and wasteful expenditure of moneys of the Government, and that the whole thing is wrong in principle and an abuse of the power and authority vested in us not by the Constitution, but by the American people, who have intrusted us with the shaping of the conduct and future of our country.

Once place this law upon our statutes, and it will sink its fangs deep into the arteries of our Treasury and remain a fixture, annually sapping and sucking the lifeblood of our Government.

Already we are expending hundreds of thousands of dollars uselessly and carelessly in this manner. We are now paying the New York and Cuba Mail Line $204,000 for carrying the mail, under the act of 1891, from New York to Cuba and Mexican ports. Mr. Smith, an officer of that line, admitted in his testimony before the Merchant Marine Commission that if the mail had been hay and charged for at the price charged for carrying hay the company would have received $500 for the year's service. In other words, we are paying $204,000 for that which if carried at commodity rates would have earned but $500. We are here as representatives of the greatest, the most intelligent, and the most independent nation on the face of the earth. The American people are always ready and willing to pay a just and proper remuneration for a service rendered. They believe the "laborer is worthy of his hire." They are willing to pay the highest price for that service which is honestly and truly rendered, but they are unalterably opposed to paying even the lowest price for that which they do not receive. And they are unquestionably opposed to giving the shipowner a gratuity for running his business. The vast majority of the people of this country abhor the very idea of helping great corporations to further unearned dividends.

To-day millions of bushels of wheat are rotting in the West for want of transportation, while people are crying aloud for flour in other sections of the country. In the South thousands of packages of field produce yearly decay because of a lack of railroad transportation. Thousands of people are shivering with cold all over this land because the railroads fail to carry the coal. The railroads say we lack a sufficient number of cars to meet the demand, and that there is a car famine in the land. Would anyone dare say on the floor of this House that we should subsidize these railroads and so swell their annual incomes as to force them or help them to buy new cars? And why not? They carry our commodities of commerce; they carry our mail; they carry our people, and they are possibly the greatest of all factors necessary and essential to the welfare and maintenance of our prosperity. Then why not help them? Why not pour the funds of the Government into the coffers of the railroads, just as it is here proposed to do with the ocean carrier? Why? Simply because the people are more in touch with the railroads and the railroad situation generally. They better understand and appreciate the conditions, and the Members of this House would not dare to enact such law. But they have placed an ear to the ground and have begun to protest against this legislation. They have always been and are to-day too deeply interested in the upbuilding and development of their domestic and foreign trade to care very much about the vessel or the flag that carried it on the high seas. And if foreigners can carry our goods at rates less than American shipowners, the American people are content to let them do so. They never have been and they never will be willing to be taxed in order to put the flag on ships that may and may not carry their goods as cheaply as they are now carried.

That great producer of American idea and thought, the Review of Reviews, in its issue for February, 1907, says:

> However desirable on many accounts it would be to see the American flag flying in all parts of the earth, the time is not yet opportune or ripe for the extensive establishment of an American merchant marine. Our capital and labor are still engaged in the highly profitable task of developing the resources of North America. Our foreign trade is important, but it is only incidental to the vast volume of our domestic trade. It is not to our loss, but rather to our great benefit, that the maritime dwellers of Europe, with relatively poor business on land, are compelled to make their living by doing ocean freighting at low prices. Until we have capital enough available for our most necessary and lucrative railroad improvements, our money and our energy will not be diverted to ocean transportation merely for the sentimental pleasure of seeing our flag fly.

And the Review of Reviews is correct.

Our people are reaching out for trade, and they are justly proud of the showing they have been able to make. They have gone to every quarter of the habitable globe for trade, and they have found it, while a few American shipowners sit idly by and cry for help.

One of the grandest achievements in American history has been the development of our enormous foreign and domestic trade, and it is a most pitiable thing to contemplate how little the American shipowner has contributed to that end.

The foreign trade of America has been built up with the assistance of our foreign friends, foreign buyers, and foreign shipowners. Our people have produced the goods and have found markets for them, while foreign shipowners have come to their

rescue, carrying the trade to all parts of the world. Our shipowners have failed to interest themselves in this great question of foreign trade. They have permitted the prize to slip through their fingers, and to-day, when American enterprise, and vim, and push, and brain, and energy have created a trade of $3,000,000,000 per annum, a trade which pays foreigners from $150,000,000 to $200,000,000 each year, they suddenly rise up and cry, "Where is the American marine?" And we answer "Where?" These gentlemen must answer this question for themselves. But the answer of the American people is: "Look at our foreign trade, built up by grit and enterprise, and without your assistance or the assistance of subsidy of any kind."

The Department of Commerce and Labor shows that for the year ending December 31, 1906, the foreign trade was as follows:

| | |
|---|---|
| Sold during the year | $1,798,247,943 |
| Bought during the year | 1,320,609,250 |
| Total | 3,118,857,193 |

And we have paid to foreigners for carrying this not exceeding $200,000,000.

These marvelous results have been worked out by American enterprise and the increased profits resulting from the cheap carriage given us by foreign vessel owners.

If foreign capital is willing to contribute its full share to the greatness of America's trade, then why should we as Americans object to their doing so. And more especially why should we pay subsidies to corporations that have contributed nothing to the trade itself, but are now before a prosperous people asking, yea, demanding contribution and alms under false pretenses. Our foreign trade has not been built up by guaranteed profits through bounties or subsidies. It has not grown to its present proud position of strength by reason of any governmental guaranty of losses. Our exporters and importers have launched out into the world at large, battling righteously and heroically for trade. Wherever conditions seemed favorable they wended their way, winning at times and losing at others; on and ever on, winning or losing, never stopping, never asking for Government aid or recoup of losses or bounty or subsidy. They have won their fight and are entitled to the unlimited praise and admiration of the entire world. It is urged that subsidies have proved beneficial when tried. It seems to me that actual demonstration and result have shown just to the contrary. Germany has outstripped all countries in the advancement of her shipping interest. She has made wonderful strides in the development of her ships and shipping, and yet it can be easily shown that this unequaled pace is certainly not the result of subsidy and assistance.

The Hamburg-American Packet Company, possibly the greatest line in the world, has forged its way to the foremost position among the navigation companies of the world without subsidy. To the contrary, it receives but little for carrying the mail. Most of its vessels are not of the speed class used for this purpose. Next in magnitude and importance is the North German Lloyd. On its most important and most profitable north Atlantic lines this company is paid by weight for the mail carried, and receives absolutely nothing that can be construed as bounty. On the other hand, one of the most unsuccessful navigation companies of Germany, practically the only company that did not pay a dividend in 1906, is the German East African Line, and this company is paid $320,000 a year by the German Government as a subsidy in order to keep up a connection between its east African colony and Hamburg. The German Australian Steamship Company, the Hamburg South American Steamship Company, the "Kosmos" Line, and the "Hausa" Line are all flourishing and prospering and paying splendid dividends without the assistance or aid of the Government.

As a matter of fact, Germany, the foremost of nations in the shipping business, has done and is doing less by way of subsidy for her shipping than most of the great nations of the world. And not only is this true, but the most prosperous of her navigation companies are those that receive least assistance. And this experience holds true in other countries.

Germany pays $2,143,000 for carrying the mails; France pays $9,200,000 in construction and steaming bounties and for mail transportation. She pays $5,200,000 for postal subsidy; more than twice as much as Germany, and yet there is no comparison between the shipping of the two countries. The one is as a pigmy beside the other. In fact, there is nothing of magnitude, greatness, or competency in the shipping of the French Republic to excite the admiration or envy of any other nation or people, despite this enormous yearly expenditure for bounty.

Is it possible to compare the shipping of Italy with that of Germany? No. And yet Italy pays by far the greatest amount of subsidy, $2,000,000 being paid to one company alone, in the form of a mileage bounty. Austria pays, proportionately, far more than Germany, and her navigation companies are far less successful; in fact, there is no comparison between the two. And so with other countries. What of this country? Last year we paid nearly $3,000,000. And where is our merchant marine? How many new vessels built? Absolutely nothing to show for it. I say, then, that Germany leads the world, standing forth boldly as monumental evidence of self-help and self-advancement, free from Government aid.

Again, the bill is bad as a mail proposition strictly. Subsidies are paid by England for fast mail service, and this bill proposes to pay for slow services.

The English contracts demand ships making from 18 to 26 knots, while this bill provides they shall make from 14 to 16 knots. England pays for rapid communication by subsidizing the owners to the excess of cost for making rapid communication over the cost for slower mercantile demands. Cargo ships only need a rapidity of from 12 to 16 knots. If the Government needs a greater swiftness for mails, let the Government make up the difference in contract work.

This bill pays far higher rates for slow delivery than England pays for the most rapid delivery.

In the report of the Commissioner of Navigation for 1903, page 267, will be found England's rates for rapid delivery. A comparison of the rates with those proposed by the bill will show readily that though the contention of the advocates of subsidy is correct, even in that event the bill is wrong and we would be paying too much.

I quote the following table of equivalents made by a parliamentary committee, adopting the principle of an annual payment for ten years, based upon estimates of the first cost of ships having a speed of from 20 to 26 knots an hour:

| Average ocean speed. | First cost of building. | Engine power. | Annual subsidy. | |
|---|---|---|---|---|
| | | *I. H. P.* | | |
| 20 knots | £350,000 | 19,000 | £9,000 | $45,000 |
| 21 knots | 400,000 | 22,000 | 19,500 | 97,500 |
| 22 knots | 470,000 | 25,500 | 40,500 | 202,500 |
| 23 knots | 575,000 | 30,000 | 67,500 | 337,500 |
| 24 knots | 850,000 | 40,000 | 110,500 | 552,000 |
| 25 knots | 1,000,000 | 52,000 | 149,000 | 745,000 |
| 26 knots | 1,250,000 | 68,000 | 204,000 | 1,023,000 |

Thus it will be seen that progress from 20 to 24 knots involves doubling the initial cost and the engine power. Each additional knot is only obtained at a rapidly progressing increase of cost. And because the Government demands this additional knotage for its own purpose and rapid communication by mail, it is but right that the shipowner should be paid an equalizing differential to make up for the Government demands over ordinary mercantile demands. But what can be said of this bill that proposes to subsidize on a scale even greater than these figures for vessels having a speed in no case exceeding 16 knots? The claim that England subsidizes her fast mails, and that if we hope to keep up with the procession we must also subsidize, crumbles and falls before this bill. It does not furnish us rapid communication, nor are we demanding of shipowners such a difference in the initial cost of their vessels for governmental purposes as to make an equalizing differential necessary. It simply subsidizes cargo ships. If it be claimed that the initial cost of American vessels is 25 per cent more than the initial cost of English vessels, a thing not proved as to 14 and 16 knot ships, these subsidies may be increased 25 per cent and then not make half the amount this bill proposes to give. If $45,000 is a good equalizer for a 20-knot English-built ship, allowing 25 per cent difference for American-built ships, $56,250 ought to meet every demand for an American subsidy. To be generous, however, and for sake of argument, we will make the subsidy for 20-knot American-built ships $75,000. For two of them, enough to do the business required by each of the services of the bill, the subsidy would be $150,000. Each of the subsidies of this bill runs from $300,000 to $800,000. The very mention of these figures is enough to show their preposterous nature when based upon 20-knot ships. How absolutely wild, then, do they become when based on ships having a speed from 14 to 16 knots.

England contracts for less than these table rates. In the matter of the two new Cunarders, 26-knot ships, the table would demand £204,000 subsidy for each ship. The post-office department of England secured both ships for £150,000, or $750,000, per annum.

Under the law of 1891 we now have a contract with the International Mercantile Marine Company to carry the mails from New York to Southampton, the compensation being in 1906

$762,638, and the fastest ships make but 20 knots. Under the British table of equivalents the subsidy should be for four vessels, 20 knots, £9,000, or $45,000, each, or $180,000. Thus we give the slow ships $582,000 a year just to "see the flag fly."

Granting that American ships cost 25 per cent more than English ships, then the table of equivalents would be about £11,500 for a 20-knot ship, or $57,500, or $230,000 for the Southampton service, as against $762,638 actually paid. I refer you to the Report of Superintendent of Foreign Mails, 1906, page 6.

The excess of contract or subsidy service paid in 1906 over what we should have paid at full sea and inland postal rates was $393,559 in a total of about $1,500,000 contracts, or about 40 per cent more.

Mail service from New York to La Guaira cost $17,742 more than faster ships would have carried it for.

Excess from New York to Tuxpan, Mexico, was $104,934; excess from New York to Habana was $69,736; excess from Boston, Philadelphia, or New York to Jamaica was $103,909; excess from San Francisco to Australia, $167,447; excess from San Francisco to Tahiti was $41,152. These figures can be found in the Report of Superintendent of Foreign Mails, 1906, page 22.

Again, the mail can be carried at less than full rates of sea and inland postage. Steamers of foreign register are allowed 44 cents per pound for letters and 4½ cents per pound for other matter. (See Report Superintendent of Foreign Mails, 1906, p. 6.)

Calculating at 44 cents for letters and 4½ cents for other matter on the matter carried on the contract routes set out on page 22 of the Report of the Superintendent of Foreign Mails for 1906, we obtain the following:

| | |
|---|---|
| Route 36, New York to La Guaira: | |
| 16,051 pounds of mail, at 44 cents | $7,063 |
| 248,637 pounds of other matter, at 4½ cents | 11,188 |
| Total | 18,251 |
| Paid subsidy | 63,315 |
| Excess | 45,064 |

Or two and one-half times what the carriage could have been obtained for easily.

| | |
|---|---|
| Route 37, New York to Maracaibo: | |
| 2,835 pounds of mail matter, at 44 cents | $1,247 |
| 59,561 pounds of other matter, at 4½ cents | 2,680 |
| Total | 3,297 |
| For which we paid | 45,840 |

Now, then, to pay out $41,913 to carry $3,927 worth of mail after twelve years of service certainly shows that mail subsidies do not build up a foreign trade. These contracts began in 1892.

ROUTE 37, NEW YORK TO SOUTHAMPTON.

On this route there is never any trouble about picking up a fast foreign vessel at any time. And yet the superintendent of foreign mails must wait for the regular sailing days of the contract lines. Letters are held at from one to three days on this score, to the detriment of the business of the country. Let me illustrate:

| | |
|---|---|
| 449,194 pounds of mail, at 44 cents | $197,645 |
| 2,397,901 pounds of other matter, at 4½ cents | 107,906 |
| Total | 305,551 |

Now, then, we paid for this service in 1906, $762,638, or an excess of $457,089.

Foreign and faster ships would have taken the mails to England for $305,551. Under our contract we had to pay $762,638. Is this good business policy? Is it good sense?

It is easy to make the other calculations for routes Nos. 69, 70, 74, 75, and 76, which when made will show that while our mails can be carried for $600,000 per annum we pay under subsidy contracts about $1,500,000, without increasing trade or building a merchant marine.

Great Britain paid for her fast mail service with all the world—and it was fast mail and it went everywhere—£676,170, or $3,380,850.

We paid in 1906 about $3,000,000 for slow service to a part of the world, and this bill proposes to add $3,500,000 more, making a total of about $6,500,000 for a service on ships running from 14 to 20 knots, and still not get to near all of the world, as England does. (See Report of Commissioner of Navigation for 1906, p. 206.)

Again, the initial cost of the two new Cunarders, 26-knot ships, will be about $13,000,000. Good 14-knot mail ships can be bought for $600,000. In other words, the cost of the two fast subsidized English steamers would buy about twenty-two brand new steamers of the kind we propose to subsidize at rates higher than England pays the marvelously rapid communication vessels. We have been paying $1,500,000 for more than ten years—about fourteen years. In ten years we have paid out $15,000,000, or more than enough to have bought and equipped two better ships than the new Cunarders. This sum—$15,000,000—was enough to buy twenty-five slower—14-knot—ships. Why not authorize the Post-Office Department to buy twenty-five 14-knot ships, or twenty 16-knot ships, or ten 20-knot ships, and run our ocean mail service as we run our Navy? A word more and I am done.

We are told that this bill will create a naval reserve. I say to you that if the bill becomes a law and its provisions are enforced it will tend to create one of the most drastic forms of slavery the world has ever known. It will be to place enlisted men at the mercy of the ordinary sea captain and subject them to all the brutality and hardships of such a life for a term of years. It is hard enough for the poor devil who follows the sea to stand it under existing customs. But his burdens are made lighter and his labors less burdensome because he is still a free man and ships from port to port. But one can readily imagine the horrors of a four years' enlistment in such a life as this. Instead of creating a naval reserve it will tend to injure and mar the naval service, for men will hesitate to enlist in the service immediately this bill becomes a law, and so soon as the nature of this service becomes known they will shun the very thought of it.

All in all the bill is bad. It is drastic and wrong. Wrong in fact and wrong in principle. It is contrary to every principle of our republican form of government, a blow at Anglo-Saxon liberty, a wasteful expenditure of Government funds, and against the will and wishes of the American people, and it should be killed.

Mr. GOULDEN. I yield five minutes to the gentleman from Illinois [Mr. RAINEY] to allow him to answer the question that the gentleman from Nebraska [Mr. POLLARD] declined to allow him to answer in his time.

Mr. RAINEY. Mr. Chairman, the gentleman from Nebraska [Mr. POLLARD] propounded this question, looking over in this direction, and said, in substance, "Can anyone explain why our merchant marine commenced to fade away from the seas about the year 1860, when prior to that time it had been such an important factor in commerce upon the high seas?"

The question is not a difficult one to answer. Prior to that time we had free raw material for ships, because prior to that time ships were built out of wood, and our forests were full of material free to anybody who wanted to take it. Early in the last century they commenced to roll iron in England, and as soon as they did that persons and firms engaged in that business in this country insisted upon a tariff against the rolled iron of England in order that they might continue hammering out iron until their establishments fell into decay.

They got a tariff that was exclusive, and they continued to hammer out iron until, in 1855, the first iron Cunarder plunged across the Atlantic Ocean, and it became apparent at once that the ship of the future would be an iron ship. But our factories, protected by a protective tariff, had been hammering iron. They were not prepared to roll iron, and so, with our mountains full of iron ore, we were unprepared to build iron ships. For sixty years England had been rolling iron, and she commenced to build iron ships, and our supremacy upon the high seas commenced to fade away at once. It was on account of the fact that we had no free raw materials for ships. It was on account of the pernicious effect of the protective tariff. We are building to-day more wooden ships than any other nation in the world. We are building to-day more wooden ships than we ever built, but wooden ships are obsolete on all the seas of the world except in our coastwise trade, and these benevolent navigation laws, supplementing the high protective system of this country, exclude from competition with our own vessels the iron vessels owned by citizens of other nations. So, as a result of the fact that we were not prepared to roll iron in 1860 and that our navigation laws keep the iron ships of England from competing in our coastwise trade, we have in our coastwise trade a fleet of worthless vessels, wooden vessels nearly all of them, adding nothing to the commercial importance of this country and doing us no good in time of war.

Mr. GROSVENOR. Mr. Chairman, there being no further desire for debate at this time, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. CURRIER, chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 529, the ship subsidy bill, and had come to no resolution thereon.

PRIVATE BILLS.

Mr. DALZELL. Mr. Speaker, I renew the request that I made this morning for unanimous consent that the order that I send to the Clerk's desk be adopted.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent that the following order, which the Clerk will report, may be considered as agreed to. The Clerk will report the order.

The Clerk read as follows:

Order No. 11.

*Ordered*, That hereafter during this session a motion to consider in the House, as in Committee of the Whole House, bills on the Private Calendar of the classes hereinafter described shall have the same privilege as is given by the rules on Fridays to motions to go into Committee of the Whole House to consider bills on the Private Calendar:

All bills not objected to after five minutes' explanation thereof reported from committees other than the Committees on Pensions, Invalid Pensions, Claims, and War Claims, excepting bills proposing to confer jurisdiction on the Court of Claims.

The SPEAKER. Is there objection?

Mr. SULLIVAN. Mr. Speaker, reserving the right to object, the wording of the rule is somewhat complicated, and will the gentleman from Pennsylvania kindly explain it?

Mr. DALZELL. The gentleman from Massachusetts will recollect that at the last session of Congress we disposed of a large number of bills on the Private Calendar under an order similar to this.

Mr. SULLIVAN. Private claim bills?

Mr. DALZELL. No; bills on the Private Calendar other than the bills that come from the Committee on War Claims, the Committee on Claims, the Committee on Invalid Pensions, and the Committee on Pensions. Those are excluded, and there are also excluded bills proposing to confer jurisdiction on the Court of Claims. All other claims on the Calendar coming from other committees are subject to consideration under this rule unless after an explanation of five minutes there is objection.

Mr. SULLIVAN. Upon explanation being requested and objection made, the objection will be decisive?

Mr. DALZELL. Yes.

Mr. SULLIVAN. I have no objection.

Mr. BONYNGE. Mr. Speaker, I want to ask the gentleman a question. As I understood the reading of the order, bills coming from the four committees the gentleman has mentioned are excluded, except bills that transfer those claims to the Court of Claims?

Mr. DALZELL. No; those are excepted also.

The SPEAKER. The Chair hears no objection, and the order will be considered as agreed to.

GRANT OF CERTAIN LANDS TO DURANGO, COLO.

Mr. BROOKS of Colorado. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8435) granting to the city of Durango, in the State of Colorado, certain lands therein described for water reservoirs.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the following-described tract of land situate in suspended townships 38 north, range 6 west, and 38 north, range 7 west, New Mexico principal meridian, in La Plata County, Colo., within the San Juan Forest Reserve, to wit: Beginning at the corner No. 1, at the junction of Missouri Gulch with the Florida River, running thence north 20° and 7′ east 4,900 feet to station No. 2; thence north 77° and 2′ east 1,060 feet to station No. 3; thence north 8° and 24′ east 2,400 feet to station No. 4; thence north 7° and 28′ west 4,600 feet to station No. 5; thence north 10° and 23′ east 5,400 feet to station No. 6; whence corner No. 1, reservoir No. 3, or Lake Lily, bears south 50° and 7′ east 1,200 feet; from said corner No. 1, Lake Lily, the monument on Mount Valois bears south 23° and 10′ east 4,792.6 feet; United States location monument Tempest bears south 31′ east 2,896 feet; thence from station No. 6, aforesaid, north 87° and 31′ east 1,550 feet to station No. 7; thence south 38° and 37′ east 3,300 feet to station No. 8; thence south 84° and 30′ east 2,700 feet to station No. 9; thence south 33′ east 4,000 feet to station No. 10; thence south 30° and 24′ east 2,500 feet to station No. 11; thence south 77° and 26′ east 3,200 feet to station No. 12; thence south 43° and 51′ east 1,750 feet to station No. 13; thence south 5° and 58′ west 2,250 feet to station No. 14; thence south 44° and 17′ west 2,000 feet to station No. 15; thence south 77° and 31′ west 4,800 feet to station No. 16; thence south 54° and 45′ west 3,300 feet to station No. 17; thence north 87° and 27′ west 6,400 feet, more or less, to station No. 1, the place of beginning; including those four certain reservoirs claimed or occupied by said city of Durango, known as reservoir No. 1 or upper park reservoir; reservoir No. 2 or Santa Maria Lake; reservoir No. 3 or Lake Lily, and reservoir No. 4 or Lakeside Lake, subject to any former grant or conveyance affecting said lands, be, and the same are hereby, granted and conveyed to the city of Durango, county of La Plata, and State of Colorado, to have and to hold said lands to its use and behoof forever for the purposes of water storage and supply of its waterworks and the protection of its water supply, and for such purposes said city shall forever have the right in its discretion to control and use any and all parts of the said premises herein granted and conveyed in the construction of reservoirs, conduits, and flumes, and in the laying of pipes and mains and in making such improvements as may be necessary to store, utilize, protect from pollution, and enjoy the waters contained in any natural or constructed reservoir, basins, or waterways upon said premises: *Provided*, That the city of Durango shall pay for said land the sum of $1.25 per acre: *Provided further*, That the Forest Service of the United States Department of Agriculture shall have full power to patrol the said lands and to protect them from fire and trespass: *Provided further*, That the Forest Service may dispose of the timber upon the said lands, except so much thereof as may be growing within 100 feet from the margin of any natural or constructed reservoir or of the main creeks within the said boundary flowing into such reservoirs under such additional rules for lumbering, to protect said waters from pollution, as shall be prescribed by the Forester and approved by the mayor of the city of Durango: *And provided further*, That if said city shall fence all or any part of said lands it shall provide practicable gates in such fence at points to be designated by the supervisor of the San Juan Forest Reserve.

SEC. 2. That if the said city of Durango shall, at any time hereafter, abandon the lands above described and cease to use the same for said purposes said above-described lands shall revert to the Government of the United States.

The SPEAKER. Is there objection?

Mr. WILLIAMS. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Colorado what committee this comes from?

Mr. BROOKS of Colorado. From the Committee on the Public Lands.

Mr. WILLIAMS. Is it a unanimous report?

Mr. BROOKS of Colorado. It is a unanimous report.

Mr. NEEDHAM. I would like to ask the gentleman a question. Why is it necessary to have this legislation—why can not they get the lands under the act of February 15, 1901?

Mr. BROOKS of Colorado. Because this land is desired to protect the watershed of the municipal reservoir of the city of Durango, and the control of the adjacent land is desired, for which they pay a price of $1.25 an acre.

Mr. NEEDHAM. The city wants the land to protect the water?

Mr. BROOKS of Colorado. Yes; in addition to the maintenance of the reservoir we desire to protect the watershed around it, which has heretofore been the subject of pollution.

Mr. NEEDHAM. What is the value of the land?

Mr. BROOKS of Colorado. The land is rocky and of no considerable value except for this purpose.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. BROOKS of Colorado, a motion to reconsider the vote by which the bill was passed was laid on the table.

CUSTOMS BOARDING BOAT FOR GALVESTON, TEX.

Mr. GREGG. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 7684) to provide and maintain for the port of Galveston, Tex., a customs boarding boat.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That there shall be provided for the port of Galveston, Tex., a motor boarding boat, and that the sum of $35,000, or so much thereof as may be necessary for this purpose, be, and the same is hereby, appropriated out of any money in the Treasury not otherwise appropriated: *Provided*, The Secretary of the Treasury may use said boat at any other customs port in the United States, as the exigencies of the service may require.

The committee amendment was read, as follows:

In line 4 strike out the word "thirty-five" and insert in lieu thereof the word "ten."

The amendment was agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. GREGG, a motion to reconsider the last vote was laid on the table.

BRIDGE ACROSS MISSOURI RIVER AT YANKTON, S. DAK.

Mr. BURKE of South Dakota. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8446) to extend the time for the completion of a bridge across the Missouri River at Yankton, S. Dak., by the Yankton, Norfolk and Southern Railway Company, which I send to the desk and ask to have read.

The Clerk read as follows:

*Be it enacted, etc.*, That section 6 of the act approved March 9, 1904, authorizing the Yankton, Norfolk and Southern Railway Company to construct a combined railroad, wagon, and foot-passenger bridge across the Missouri River at or near the city of Yankton, S. Dak., as amended by the act approved February 5, 1906, be, and is hereby, amended by extending the time for commencing the construction of said bridge to March 9, 1908, and by extending the time for completing said bridge to March 9, 1910.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, read the third time, and passed.

On motion of Mr. BURKE of South Dakota, a motion to reconsider the last vote was laid on the table.

BRIDGE ACROSS CUMBERLAND RIVER.

Mr. JAMES. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 25739) to authorize the Cairo and Tennessee River Railroad Company to construct

bridges across Cumberland River, which I send to the desk and ask to have read, and I ask that the bill as amended be read.

The Clerk read as follows:

*Be it enacted, etc.*, That the Cairo and Tennessee River Railroad Company, a corporation organized under the laws of the States of Tennessee and Kentucky, its successors and assigns, be, and they are hereby, authorized to construct, maintain, and operate a railroad bridge and approaches thereto, across the Cumberland River, between Lineport, Stewart County, Tenn., and the Tennessee Rolling Works, Lyon County, Ky., and also to construct a bridge across said Cumberland River between Celina in Clay County, Tenn., and Bakertown, Cumberland County, in the State of Kentucky, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

SEC. 3. The act of Congress approved March 9, 1906, entitled "An act to authorize the Cairo and Tennessee River Railroad Company to construct a bridge across Cumberland River" is hereby repealed.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken; and the amendment was agreed to.

The SPEAKER. The question now is on the engrossment and third reading of the bill as amended.

The bill was ordered to be engrossed and read a third time, read the third time, and passed.

On motion of Mr. JAMES, a motion to reconsider the last vote was laid on the table.

BRIDGE ACROSS TENNESSEE RIVER.

Mr. JAMES. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 25738) to authorize the Cairo and Tennessee River Railroad Company to construct a bridge across the Tennessee River, which I send to the desk and ask to have read as amended.

The Clerk read as follows:

*Be it enacted, etc.*, That the Cairo and Tennessee River Railroad Company, a corporation organized under the laws of the States of Tennessee and Kentucky, its successors and assigns, be, and they are hereby, authorized to construct, maintain, and operate a railroad bridge and approaches thereto, across the Tennessee River, between Brandon's mill, in Calloway County, and Birmingham, Marshall County, in the State of Kentucky, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, or repeal this act is hereby expressly reserved.

SEC. 3. The act of Congress approved March 9, 1906, entitle "An act to authorize the Cairo and Tennessee Railroad Company to construct a bridge across the Tennessee River," is hereby repealed.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken; and the amendment was agreed to.

The SPEAKER. The question now is on the engrossment and third reading of the bill as amended.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. JAMES, a motion to reconsider the last vote was laid on the table.

RELINQUISHING LANDS TO UNITED STATES BY STATE OF WYOMING.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table and for present consideration of the bill (S. 8534) providing that the State of Wyoming be permitted to relinquish to the United States certain lands heretofore selected and to select other lands from the public domain in lieu thereof; which I send to the desk and ask to have read; and I ask unanimous consent that a similar House bill (H. R. 25768), reported by the Committee on Public Lands of the House, do lie on the table.

The SPEAKER. The gentleman from Wyoming asks unanimous consent to take from the Speaker's table the following Senate bill, consider the same, and that a similar House bill lie on the table. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That upon the delivery to the Secretary of the Interior by the State of Wyoming of its properly executed and duly recorded deed or deeds reconveying to the United States of America, in fee simple, certain lands heretofore selected by and certified to said State under the provisions of an act entitled "An act to provide for the admission of the State of Wyoming into the Union, and for other purposes," approved July 10, 1890, to wit: All of sections 10, 22, 24, and 26, township 20 north, range 84 west; all of sections 30 and 32, township 20 north, range 83 west, and all of sections 6, 8, 18, 20, 28, 30, and 32, township 19 north, range 83 west; University lands, approved list numbered 1, February 18, 1881, Cheyenne district; south half of southeast quarter section 30, township 52 north, range 102 west; east half of southwest quarter; southeast quarter of northwest quarter; south half of northeast quarter; northeast quarter of northeast quarter, section 8, township 51 north, range 103 west; northwest quarter of southwest quarter; southeast quarter of southwest quarter; south half of northwest quarter; lot 3 of section 2, township 51 north, range 103 west; north half of south half of section 12, township 51 north, range 103 west; south half of southeast quarter of section 25, township 52 north, range 103 west; northwest quarter of northeast quarter, section 24, township 51 north, range 104 west; east half of northwest quarter, section 11, township 51 north, range 103 west; State charitable, educational, penal, and reform lands, approved list numbered 14, June 3, 1898, Lander district; southeast quarter section 8, township 51 north, range 103 west; all of sections 9, 3, and 1, township 51 north, range 103 west; east half section 4, township 51 north, range 103 west; northeast quarter; southeast quarter section 2, township 51 north, range 103 west; north half section 12, township 51 north, range 103 west; northeast quarter section 11, township 51 north, range 103 west; southeast quarter section 35, township 52 north, range 103 west; southwest quarter section 30, township 52 north, range 102 west; east half section 13, township 51 north, range 104 west; all of sections 31 and 32, township 52 north, range 102 west; Agricultural College lands, approved list numbered 9, March 9, 1899, Lander district; south half of south half northeast quarter of southeast quarter section 29, township 52 north, range 102 west; southwest quarter; west half of east half section 28, township 52 north, range 102 west; west half of southeast quarter section 24, township 51 north, range 104 west; west half of northeast quarter; northwest quarter section 25, township 51 north, range 104 west; south half of south half of northeast quarter; northeast quarter of northeast quarter section 26, township 51 north, range 104 west; miscellaneous State library lands, approved list numbered 14, June 3, 1898, Lander district. The said State shall be authorized and permitted to select an equal number of acres from the unappropriated public lands of the United States in said State in the same manner, for the same purposes, and subject to the same conditions and limitations under which the lands so reconveyed were selected and held.

SEC. 2. That the lands so reconveyed shall be restored to and become a part of the public domain and be subject to disposal by the Government in the same manner in which other public lands of a like character are disposed of.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, read the third time, and passed.

On motion of Mr. MONDELL, a motion to reconsider the last vote was laid on the table.

By unanimous consent, the similar House bill (H. R. 25768) was ordered to lie on the table.

EXTENDING THE TIME FOR FINAL PROOF IN DESERT-LAND ENTRIES.

Mr. SMITH of California. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 7017) extending the time for making settlement, final proof, and payment on public lands in certain cases, which I send to the desk and ask to have read.

The Clerk read as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That the time for making final proof and payment for all lands located under the desert-land laws of the United States and for making settlement and final proof under the homestead laws of the United States, in township 13 south, ranges 12 and 13 east; sections 6, 7, 17, 18, 19, 20, 29, 30, and 31, township 13 south, range 14 east; township 14 south, ranges 12 and 13 east; township 15 south, range 12 east; sections 5, 6, and 7, township 15 south, range 13 east; township 16 south, range 12 east; township 17 south, ranges 12 and 13 east; sections 5, 6, 7, 8, 9, 14, 15, 16, 17, 18, 19, 20, and 21, township 17 south, range 14 east, San Bernardino base and meridian, in the county of San Diego, Cal., settlement, proof, and payment of which has not been made, be, and the same is hereby, extended for the period of two years from the time settlement, proof, and payment would be required and become due under existing laws.

The SPEAKER. Is there objection?

Mr. WILLIAMS. Mr. Speaker, reserving the right to object, I would like to have some explanation of where this is.

Mr. SMITH of California. This is in regard to the California system of irrigation.

Mr. WILLIAMS. Is that the old Salton Sea matter?

Mr. SMITH of California. It is the result of the overflow of the Colorado River. The head works of the California irrigation system was washed out this winter, and now, under the law, they are required to make certain proof in reference to irrigation, which on account of this overflow they will not be able to——

Mr. WILLIAMS. It is merely an extension of time?

Mr. SMITH of California. Yes.

Mr. WILLIAMS. I have no objection.

The SPEAKER. The Chair hears no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

A similar bill (H. R. 21567) was ordered to lie on the table.

PUBLIC LANDS FOR CEMETERY PURPOSES.

Mr. FRENCH. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 6229) to authorize the sale of public lands for cemetery purposes.

The SPEAKER. This bill has heretofore been read.

Mr. PAYNE. There are some suggested amendments, and I would like to have the amendments read.

The SPEAKER. The Clerk will report the bill and amendments.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized to sell and convey to any municipal corporation,

religious or fraternal association, or private corporation empowered by the laws under which such corporation or association is organized or incorporated to hold real estate for cemetery purposes, not to exceed 40 acres of any unappropriated nonmineral public lands of the United States for cemetery purposes, upon the payment therefor by such corporation or association of the sum of not less than $1.25 per acre.

The committee amendments were read, as follows:

In line 4, after the word "any," strike out the words "municipal corporation;" in line 8 strike out the word "forty" and insert the word "eighty."

Add as a new provision:

"*Provided*, That the title to any land disposed of under the provisions of this act shall revert to the United States if the land or any part thereof be sold or cease to be used for the purposes herein provided."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The amendments were agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. FRENCH, the motion to reconsider the last vote was laid on the table.

CEDING CERTAIN LANDS TO COLORADO STATE AGRICULTURAL COLLEGE.

Mr. BONYNGE. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 15859) ceding certain lands to the Colorado State Agricultural College.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to cause to be issued a patent covering the lands hereinafter described, conveying the fee simple title to same to the Colorado State Agricultural College, located at Fort Collins, in the State of Colorado.

SEC. 2. That the legal description of the lands to be covered by said patent is as follows: The northeast quarter of section 12, township 2 north, range 52, State of Colorado.

SEC. 3. That the lands ceded as hereinbefore provided shall be used by the Colorado State Agricultural College for forestry experimental purposes, and if not so used for a period of five years shall revert to the Government of the United States.

The amendments recommended by the committee were read, as follows:

In line 4, after the word "patent," strike out the words "covering the lands hereinafter described, conveying the fee simple title to same," and insert the words "conveying the northeast quarter of section 12, township 2 north, range 52, State of Colorado."

Also strike out section 2 and renumber section 3.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. BONYNGE, a motion to reconsider the last vote was laid on the table.

RELIEF OF HOMESTEAD AND OTHER ENTRYMEN.

Mr. MARTIN. Mr. Speaker, I ask unanimous consent for the present consideration of the following bill.

The SPEAKER. The Clerk will report the bill.

Mr. MARTIN. The bill was read once before—a day or two ago.

The SPEAKER. The Clerk will report the title.

The Clerk read, as follows:

A bill (H. R. 22588) for the relief of homestead and other entrymen who have been required to pay more than legal fees, commissions, excesses, and purchase money.

Mr. PAYNE. Mr. Speaker, I withdraw the objection if the gentleman will print in the RECORD the letter which he has from the Land Office.

Mr. MARTIN. I have it here.

Mr. WILLIAMS. Mr. Speaker, reserving the right to object, I would like to have the letter read.

Mr. MARTIN. The letter may be read by the Clerk.

Just one moment. I can explain the bill, and then if the gentleman from Mississippi [Mr. WILLIAMS] desires the letter read it can be read. The present law authorizes the Secretary of the Interior to make restitution to settlers who pay money into the Land Office in connection with the entry of land by accident, or mistake, or erroneous allowance of claims, in almost all cases. This amendment would allow return in an additional class of cases which are not now provided for, which are these: Where on an entry of public land the settler pays to the Land Office more than the required price for that particular class of land. When the mistake is discovered the amount may be adjusted and returned by the Secretary under the amendment here provided.

Mr. PAYNE. I understand that the letter from the Office says that these claims probably will not amount to more than $10,000.

Mr. MARTIN. Yes, sir.

Mr. WILLIAMS. The letter from the land office does what?

Mr. MARTIN. The gentleman from New York [Mr. PAYNE], when the bill was up once before, not long since, said that he thought it covered a very large amount of disbursements from the Treasury, and upon his suggestion I had the Commissioner of the General Land Office write a letter here, which I will have put in the RECORD, and which shows how much, in all probability, would be required by way of disbursements to return to the settlers entitled thereto these amounts, and the letter places the total amount not to exceed $10,000.

Mr. WILLIAMS. How do they pay sums erroneously? By erroneous bookkeeping, or what?

Mr. MARTIN. In the State of South Dakota, when the Sioux Reservation was opened to homestead settlement, there were three classes of land entries. Homestead entries that should be commuted within a certain period would pay $1.25 an acre, then another period, 75 cents an acre, and after that 50 cents per acre. Some of the local land officers, not giving strict attention to this matter, required certain settlers to pay $1.25 where 75 cents should have been paid and in others where 50 cents should have been paid. Those cases would be adjusted under this act. Separate bills now have to be brought in to correct these matters, and they cumber the Calendar. The Department recommends the passage of the bill.

Mr. MANN. Mr. Speaker, reserving the right to object, I would like to ask the gentleman if this is the bill in the same form as it was the other day?

Mr. MARTIN. It is.

Mr. MANN. While I have no objection to passing a bill to relieve the cases which the gentleman speaks of, I am not willing to let the bill pass in general form.

Mr. MARTIN. I very much regret that.

Mr. MANN. The letter from the Land Office does not cover at all the cases that the gentleman has reference to.

Mr. MARTIN. I have studied it very carefully, and I think that the criticism that the gentleman from Illinois [Mr. MANN] made to me, that the amount reported would not cover all classes of cases provided for in the bill, is clearly in error. I think if he would look into it he would be satisfied.

Mr. MANN. I have a great respect for the gentleman's opinion, but I still think as I did.

Mr. MARTIN. The Department says in regard to this class of cases that this money, in fair dealing, ought to be returned to the parties, and I am sure it is equitable and just, and the amounts provided are not large in the aggregate. To each individual settler it means something, of course.

The SPEAKER. Is there objection?

Mr. MANN. I object.

Mr. MARTIN. The following are the letters to which I referred:

DEPARTMENT OF THE INTERIOR,
*Washington, February 15, 1907.*

The CHAIRMAN OF THE COMMITTEE ON THE PUBLIC LANDS,
*House of Representatives.*

SIR: On the 23d ultimo I reported to you on H. R. 25588, entitled "A bill for the relief of homestead and other entrymen who have been required to pay more than the legal fee, commissions, expenses, and purchase money."

I now have the honor to inclose a supplemental report in the premises by the Acting Commissioner of the General Land Office, under date of the 13th instant, called forth by the verbal request of Hon. E. W. MARTIN, who introduced the bill.

The report covers an estimate of the amount that it is thought would suffice to meet the provisions of the amendments to the bill heretofore suggested by the Department.

Very respectfully,
THOS. RYAN,
*Acting Secretary.*

---

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
*Washington, D. C., February 13, 1907.*

The SECRETARY OF THE INTERIOR.

SIR: I have been verbally requested by Hon. E. W. MARTIN, Member of Congress, to report the probable amount required to make repayment as proposed by the amendment to section 2, act of June 16, 1880 (21 Stat. L., 287), by H. R. bill No. 22588, wherein it is provided that repayment may be made—

"* * * In all cases where parties have been improperly charged the double minimum price for minimum lands, or where they have been required to pay more than *the lawful* fees, *commissions, excesses, or purchase money.*"

The Committee on the Public Lands submits a favorable report on said bill and sets forth the justice and wisdom of the proposed amendment.

The act of June 16, 1880 (supra), section 2, reads:

"* * * And in all cases where parties have paid double minimum price for land which has afterwards been found not to be within the limits of a railroad grant the excess of *one dollar and twenty-five cents* shall in like manner be repaid to the purchaser thereof or to his heirs or assigns."

There is no provision of law authorizing the return of excesses above the lawful amount of fee, commissions, or *purchase money erroneously* collected by the local officers, except those provided for in the quoted portion of the repayment law.

The act of June 16, 1880, does not provide for the return of excesses

where double minimum fees and commissions have been erroneously collected for land that was at date of entry supposed to be within the limits of a railroad land grant but is afterwards found not to be within such limits. (See case of Thomas Foster, decided February 13, 1897, 24 L. D., 159.)

Under the proposed amendment the excess fee and commissions erroneously collected can be refunded. The amount necessary to pay such claims would be comparatively small, as there would only be about $6 in each case to be returned, and the cases are not numerous.

Section 3, act of June 15, 1880 (21 Stat., 237), provides:

"That the price of lands now subject to entry, which were raised to $2.50 per acre and put on the market prior to January, 1861, by reason of the grant of alternate sections for railroad purposes, is hereby reduced to $1.25 per acre."

It was held in the case of William Edmondston (20 L. D., 216), syllabus—

"There is no authority for the repayment of double minimum excess erroneously charged for lands reduced in price by section 3, act June 15, 1880."

There are quite a number of entries in which the local officers erroneously charged the double minimum price for lands that were reduced by said act of June 15, 1880, and under the proposed amendment repayment can justly be made of the amount erroneously collected.

It would seem that *$10,000* would suffice to meet the *provisions of said amendment*, and is money that has been erroneously covered into the Treasury of the United States which can not be withdrawn by reason of inadequate legislation.

The amount necessary to make repayment in future cases, provided for by said amendment, will be comparatively insignificant, inasmuch as the railroad land grants have practically all been definitely located and the local officers rarely make overcharges.

H. R. bill No. 22588 and accompanying papers are transmitted herewith.

Very respectfully,

G. F. POLLOCK,
*Acting Commissioner.*

NATCHEZ ELECTRIC STREET RAILWAY.

Mr. WILLIAMS. Mr. Speaker, in the absence of my colleague [Mr. MCLAIN] I ask unanimous consent for the present consideration of the bill which I send to the desk.

The Clerk read as follows:

A bill (H. R. 19751) to authorize the Natchez Electric Street Railway and Power Company to construct and operate an electric railway across the national cemetery road at Natchez, Miss.

The SPEAKER. Without objection, the substitute will be read.

There was no objection.

The Clerk read as follows:

Strike out all after the enacting clause and insert the following:

"That permission is hereby given to the Natchez Electric Street Railway and Power Company, a corporation organized under the laws of the State of Mississippi, their associates, successors, heirs, and assigns, to erect, construct, operate, and maintain an electric railway over and along the national cemetery road at Natchez, Miss., from said city of Natchez northward to the northern boundary of the Government right of way for said road: *Provided*, That a minimum width of 30 feet of the roadway over and above that used by the railway tracks be left all along the said road for a driveway, sidewalks, and gutters; that the licensees, their associates, successors, heirs, and assigns shall repair all damage done to the Government roadway by the contruction of their line of railway and shall maintain their railway and so much of said roadway as shall be occupied by said railway, including the space between said railway tracks and a strip 2 feet wide along the outside of said railway tracks on each side thereof, in a proper state of repair thereafter: *And provided further*, That said electric railway shall be constructed, operated, and maintained under a revocable license to be issued by the Secretary of War and according to plans and specifications to be submitted to and approved by the Secretary of War and under such regulations as may be prescribed by him."

The SPEAKER. Is there objection?

Mr. PAYNE. Reserving the right to object, I would like to ask the gentleman from Mississippi if this is a grant of a right of way over a Government road?

Mr. WILLIAMS. It is; and I will explain briefly what the conditions are. There is a United States road that leads from the city of Natchez out to the national cemetery near Natchez, and it is the property of the United States Government. There are a great many visitors that go out there, and this company wants to build an electric line out to the place. The gentleman knows the geography of that country, and that what are called "the bluffs" come very near to the Mississippi, so that they are compelled to pursue this line. This license is revocable. It is a mere easement, at the will of the Secretary of War, and the road is to be constructed in such a way as he shall prescribe. They are to build the road and keep it in good repair between the tracks and for 2 feet outside of the rails.

Mr. PAYNE. The difficulty that occurs to my mind is that the Government has built this road at a large expense, because all military roads cost a great deal, and it is asked to give the road to this railroad company. I do not feel willing to assent to that.

Mr. WILLIAMS. It is not my bill. It is my colleague's bill, but he explained it fully to me, and I see no objection to it of that sort. I will say that several bills precisely like it have become law. One for a road at Vicksburg, to the Vicksburg National Park there, and I know of several others in other parts of the country. The War Department, I will say, reserves the right to treat it as a license, revocable at the will of the War Department.

Mr. PAYNE. Yes; I know.

Mr. WILLIAMS. And it provides that the company shall put the road back in as good condition as it was, and thereafter keep so much of it as is between the tracks and 2 feet outside of the rail in good order.

Mr. PAYNE. There does not seem to be anything in this bill that requires the electric road to be compelled to keep in repair the road the Government has already constructed.

Mr. WILLIAMS. Oh, yes; the express language of the bill, I beg the gentleman's pardon, in so many words says they must restore the road to its original condition.

Mr. MANN. Is there any provision in the bill relating to the fare?

Mr. WILLIAMS. No.

Mr. MANN. Would the gentleman be willing that the rate of fare should be 3 cents? [Laughter.]

Mr. WILLIAMS. I hardly think in a place that is so sparsely inhabited as the road to the national cemetery that that would do. I think you might make it 5 cents.

Mr. MANN. The gentleman will remember that the House has just inserted a provision for a 3-cent rate of fare on an electric road coming in from a country where there is nobody to speak of living.

Mr. WILLIAMS. I do not think my colleague ought to be held responsible for that.

Mr. MANN. It is a proposition that came from the gentleman's side with a great deal of stress. I ask the attention of the gentleman from Kentucky [Mr. JAMES] to this proposition, so that he may offer his amendment now. [Laughter.]

Mr. PAYNE. This road is to be located in Mississippi, and a different law prevails down there, and a different rule from the District of Columbia.

Mr. WILLIAMS. Mississippi is not going to allow them to charge any more than what is fair.

Mr. PAYNE. With the assurance that a number of other bills like this have gone through the House and the right of way is to be restored, I will not object; although I want to remind the gentleman from Mississippi that it is considerably after 6 o'clock now. [Laughter.]

Mr. WILLIAMS. And I want to remind my friend that the Speaker recognized my colleague before 6 o'clock.

The SPEAKER. Without objection, the amendment will be agreed to.

The substitute was agreed to.

The bill as amended was ordered to be engrossed for a third reading; and being engrossed, it was accordingly read the third time, and passed.

The title of the bill was amended so as to read: "A bill to authorize the Natchez Electric Street Railway and Power Company to construct and operate an electric railway along the national cemetery roadway at Natchez, Miss."

LAND ENTRIES IN OKLAHOMA.

The SPEAKER laid before the House the following message from the President of the United States:

*To the House of Representatives:*

I return without approval H. R. 24989, entitled "An act to provide for the commutation for town-site purposes of homestead entries in certain portions of Oklahoma." I call special attention to the letters of the Commissioner of Indian Affairs and the Acting Commissioner of the General Land Office. The bill, if enacted into law, would invite speculation of a very unhealthy kind; it would work hardship and injustice to the Indians, and injustice also to the honest and non-speculative homestead holders, who have purchased their lands at a fair price. The bill is in my judgment indefensible from every standpoint.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 26, 1907.*

Mr. LACEY. I move that that bill be referred to the Committee on the Public Lands. I believe it came from that committee. We had the same matter up in both committees, and I should like to be sure which one had original jurisdiction of it.

The SPEAKER. If there be no objection, the bill will be referred to the Committee on the Public Lands.

There was no objection.

The message and accompanying documents were ordered to be printed.

HEZEKIAH DEZARN.

The SPEAKER also laid before the House the following message from the President of the United States; which, with the accompanying bill, was ordered to be printed and referred to the Committee on Invalid Pensions:

*To the House of Representatives:*

In compliance with the resolution of the House of Representatives (the Senate concurring) of the 21st instant, I return herewith House bill No. 830, entitled "An act granting an increase of pension to Hezekiah Dezarn."

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 26, 1907.*

PATRICK CONLIN.

The SPEAKER also laid before the House the following message from the President of the United States:

*To the House of Representatives:*

I return without approval H. R. 22367, entitled "An act for the relief of Patrick Conlin." This seems to me a highly objectionable measure. It requires the falsification of records that should be kept inviolate, and it confers a favor without any warrant whatever, as far as I can see, upon one civilian camp follower out of the legions of such camp followers who rendered service to the troops during the period of the civil war. The bill would establish a most demoralizing and vicious precedent if enacted into law. I accordingly approve of the memorandum of The Military Secretary, herewith submitted.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 26, 1907.*

Mr. PAYNE. I move to refer that message, with the accompanying bill, to the Committee on Military Affairs.

The motion was agreed to.

The message and accompanying documents were ordered to be printed.

CHANGE OF REFERENCE.

By unanimous consent, at the request of Mr. BARTHOLDT, the Committee on Public Buildings and Grounds was discharged from the further consideration of the bill (S. 5418) relinquishing the title of the United States to certain land in the city of Pensacola, Fla., to James Wilkens;

And also from the further consideration of the bill (S. 360) to relinquish the interest of the United States in and to certain land in the city of Pensacola, Fla., to the Right Rev. Edwin P. Allen, Catholic bishop of the diocese of Mobile, Ala., and his successors, in trust for the Catholic congregation of Pensacola, Fla.; and the same were referred to the Committee on the Public Lands.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 19312. An act to authorize the Mingo-Martin Coal Land Company to construct a bridge across Tug Fork of Big Sandy River at or near mouth of Wolf Creek;

H. R. 19493. An act to reimburse Oscar Fulgham, ex-sheriff of Madison County, Ala., for judgment and costs rendered against him when acting in the service of the United States;

H. R. 23201. An act to amend the act approved March 1, 1905, entitled "An act to amend section 4 of an act entitled 'An act relating to the Metropolitan police of the District of Columbia,' approved February 28, 1901;"

H. R. 23218. An act to authorize the Kentucky and West Virginia Bridge Company to construct a bridge across the Tug Fork of Big Sandy River at or near Williamson, in Mingo County, W. Va., to a point on the east side of said river in Pike County, Ky.;

H. R. 22350. An act to authorize the recorder of deeds of the District of Columbia to recopy old records in his office, and for other purposes;

H. R. 24875. An act authorizing the extension of Forty-fifth street NW.;

H. R. 25482. An act to amend section 878 of the Code of Law for the District of Columbia;

H. R. 22334. An act to amend an act to regulate the sitting of the United States courts within the district of South Carolina;

H. R. 13367. An act to amend section 13 of an act of March 1, 1893, entitled "An act to create the California Débris Commission and regulate hydraulic mining in the State of California;"

H. R. 22338. An act to bridge Bayou Bartholomew in Louisiana;

H. R. 20223. An act granting an increase of pension to William F. Clendening;

H. R. 129. An act for the opening of a connecting parkway along Piney Branch, between Sixteenth street and Rock Creek Park, District of Columbia;

H. R. 1078. An act for the relief of Hamilton D. South, second lieutenant, United States Marine Corps;

H. R. 4233. An act to reimburse the Harpswell Steamboat Company, of Portland, Me., for expenses incurred and for repairing damages sustained by its steamer *Sebascodegan* in collision with the U. S. S. *Woodbury;*

H. R. 4271. An act for the relief of Patrick J. Madden;

H. R. 5195. An act for the relief of the Milburn Wagon Company, of Toledo, Ohio;

H. R. 5622. An act for the relief of M. D. Wright and Robert Neill;

H. R. 7741. An act waiving the age limit for admission to the Pay Corps of the United States Navy in the case of Pay Clerk Walter Delafield Bollard, United States Navy;

H. R. 14464. An act for the relief of Wiley Corbett;

H. R. 3577. An act for the relief of Barclay H. Warburton;

H. R. 18020. An act for the relief of the Snare & Triest Company;

H. R. 18865. An act for the relief of John and David West;

H. R. 7746. An act for the relief of Columbia Hospital and Dr. A. E. Boozer;

H. R. 7960. An act for the relief of John C. Ray, assignee of John Gafford, of Arkansas;

H. R. 8078. An act for the relief of Miss Bernice Farrell;

H. R. 9289. An act for the relief of the Mitsui Bussan Kaisha;

H. R. 9877. An act for the relief of James P. Barney;

H. R. 11676. An act for the relief of persons who sustained property damage caused by fire at the Rock Island Arsenal;

H. R. 12009. An act for the relief of the heirs at law of M. A. Phelps and the heirs at law of John W. Renner;

H. R. 12686. An act for the relief of Edwin T. Hayward, executor of Columbus F. Hayward and the administrator of Charlotte G. Hayward;

H. R. 14381. An act authorizing and directing the Secretary of the Treasury to pay to the Holtzer-Cabot Electric Company the amount due said company from the Post-Office Department;

H. R. 20718. An act granting an increase of pension to Anne B. Whitcomb;

H. R. 21415. An act granting an increase of pension to Casper W. Tyler;

H. R. 21447. An act granting a pension to William W. Sparks;

H. R. 21639. An act granting an increase of pension to Nanny E. Hayes;

H. R. 23367. An act granting an increase of pension to Asa A. Gardner;

H. R. 23860. An act granting an increase of pension to William G. Cummings;

H. R. 17956. An act granting an increase of pension to John Shinolt;

H. R. 17011. An act granting an increase of pension to Mary E. Brown;

H. R. 10430. An act granting an increase of pension to Samuel Ledgerwood;

H. R. 17212. An act to amend an act to incorporate the Supreme Lodge of the Knights of Pythias;

H. R. 17285. An act for the relief of Second Lieut. Gouverneur V. Packer, Twenty-fourth United States Infantry;

H. R. 5971. An act authorizing the extension of T street (formerly W street) NW.;

H. R. 23576. An act to provide for the extension of New Hampshire avenue, in the District of Columbia, and for other purposes;

H. R. 1371. An act to refund to J. Tennant Steeb certain duties erroneously paid by him, without protest, on goods of domestic production shipped from the United States to Hawaii and thereafter returned;

H. J. Res. 246. Joint resolution authorizing the President to extend an invitation to the Twelfth International Congress of Hygiene and Demography to hold its thirteenth congress in the city of Washington;

H. R. 25475. An act to amend an act entitled "An act to regulate the practice of pharmacy and the sale of poisons in the District of Columbia, and for other purposes," approved May 7, 1906;

H. R. 2926. An act for the relief of the heirs of John Smith;

H. R. 25601. An act to repeal the act approved January 22, 1903, granting a pension to Minerva Robinson;

H. R. 12858. An act permitting the county of Taos, in the Territory of New Mexico, to refund its indebtedness at a lower rate of interest;

H. R. 5169. An act for the relief of W. B. Sutter;

H. J. Res. 223. A joint resolution relating to the holders of medals of honor;

H. R. 25242. An act to authorize additional aids to navigation in the Light-House Establishment, and for other purposes; and

H. R. 21574. An act making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 3627. An act granting an honorable discharge to Benjamin Warner—to the Committee on Military Affairs.

S. 695. An act increasing the pensions of nurses in certain cases—to the Committee on Invalid Pensions.

S. 6068. An act to correct the military record of Conrad Heene—to the Committee on Military Affairs.

S. 6249. An act to provide for the establishment of an agricultural bank in the Philippine Islands—to the Committee on Insular Affairs.

ENROLLED BILLS SIGNED.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of following title; when the Speaker signed the same:

H. R. 22580. An act making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1908.

The Speaker announced his signature to enrolled bills of the following titles:

S. 4506. An act to provide for better registration of births in the District of Columbia, and for other purposes;

S. 6093. An act to create the Barnaby road, from its intersection with the Livingston road to the District line, a public highway in the District of Columbia;

S. 8208. An act authorizing the extension of Park place NW.;

S. 2011. An act granting a pension to Lucinda L. McCorkle;

S. 5125. An act granting an increase of pension to Nancy A. E. Hoffman;

S. 5144. An act granting an increase of pension to Morgan H. Weeks;

S. 5171. An act granting an increase of pension to Jennie H. Marshall;

S. 5191. An act granting an increase of pension to Robert H. White;

S. 5261. An act granting an increase of pension to Stephen A. Barker;

S. 5361. An act granting an increase of pension to John H. Peters;

S. 5380. An act granting an increase of pension to Richard Jones;

S. 5383. An act granting an increase of pension to Greenbery B. Patterson;

S. 5400. An act granting an increase of pension to John A. Chase;

S. 5420. An act granting an increase of pension to Thomas W. Gilpatrick;

S. 5423. An act granting an increase of pension to William M. Tinsley;

S. 5456. An act granting an increase of pension to Marcellus Cash;

S. 5457. An act granting an increase of pension to Albert Teets;

S. 5558. An act granting an increase of pension to George Payne;

S. 5578. An act granting an increase of pension to Sheffield L. Sherman;

S. 5621. An act granting an increase of pension to Fredrick Buehrle;

S. 5623. An act granting an increase of pension to Nicholas M. Hawkins;

S. 5681. An act granting an increase of pension to William Grant;

S. 5692. An act granting an increase of pension to Margaret E. Craigo;

S. 5718. An act granting an increase of pension to William D. Hoff;

S. 5724. An act granting an increase of pension to George C. Saul;

S. 5730. An act granting an increase of pension to William O. Spelman;

S. 5752. An act granting an increase of pension to Ruth M. Hoag;

S. 5756. An act granting an increase of pension to Charles A. Bell;

S. 5782. An act granting an increase of pension to Octave L. F. E. Fariola;

S. 5813. An act granting an increase of pension to Marshall T. Kennan;

S. 5884. An act granting an increase of pension to Cyrus Palmer;

S. 5940. An act granting an increase of pension to Henry Bittleston;

S. 7708. An act granting an increase of pension to Sue A. Brockway;

S. 7722. An act granting an increase of pension to Henderson Stanley;

S. 7745. An act granting an increase of pension to Frederick Wood;

S. 7763. An act granting an increase of pension to Jacob S. Hawkins;

S. 7764. An act granting an increase of pension to Davis Gilborne;

S. 7768. An act granting an increase of pension to Alonzo P. Mann;

S. 7772. An act granting a pension to Ellen Dougherty;

S. 7782. An act granting an increase of pension to Henry F. Reuter;

S. 7785. An act granting an increase of pension to Carlo J. Emerson;

S. 7786. An act granting an increase of pension to Chauncey M. Snow;

S. 7803. An act granting an increase of pension to William H. Long;

S. 7818. An act granting an increase of pension to Edward Bird;

S. 7820. An act granting an increase of pension to Benjamin B. Cravens;

S. 7822. An act granting an increase of pension to William N. Bronson;

S. 7825. An act granting an increase of pension to Garret P. Rockwell;

S. 7830. An act granting an increase of pension to Wilbur A. Stiles;

S. 7831. An act granting an increase of pension to William H. Grandaw;

S. 7838. An act granting an increase of pension to Ole Gunderson;

S. 7841. An act granting an increase of pension to Frank De Noyer;

S. 7842. An act granting an increase of pension to Evarts C. Stevens;

S. 7843. An act granting an increase of pension to Isaac Oakman;

S. 7862. An act granting an increase of pension to Elias Laughner;

S. 7870. An act granting an increase of pension to Albert Bennington;

S. 7871. An act granting a pension to Catharine Hayes;

S. 7872. An act granting an increase of pension to Gilbert H. Keck;

S. 7877. An act granting an increase of pension to Thomas D. Marsh;

S. 7878. An act granting an increase of pension to Richard J. Gibbs;

S. 7880. An act granting an increase of pension to Sarah E. Stockton;

S. 7890. An act granting an increase of pension to Henry Zacher, alias Charles Stein;

S. 7895. An act granting an increase of pension to William Wallace;

S. 7903. An act granting an increase of pension to Catherine De Rosset Meares;

S. 7907. An act granting an increase of pension to Wilkison B. Ross;

S. 7918. An act granting an increase of pension to Royal T. Melvin;

S. 7912. An act granting an increase of pension to Eleanor P. Bigler;

S. 7915. An act granting an increase of pension to Mary M. Howell;

S. 7923. An act granting an increase of pension to William H. Brady;

S. 7930. An act granting an increase of pension to Joseph Hare, jr.;

S. 7936. An act granting an increase of pension to Liberty W. Foskett;

S. 7938. An act granting an increase of pension to John W. Messick;

S. 7947. An act granting an increase of pension to Charles G. Sweet;

S. 7948. An act granting an increase of pension to Jane Tate;

S. 7968. An act granting an increase of pension to James Slater;

S. 7983. An act granting an increase of pension to Samuel Dubois;

S. 7993. An act granting an increase of pension to George E. Purdy;

S. 7995. An act granting an increase of pension to Ashley White;

S. 7996. An act granting an increase of pension to Robert B. Lucas;

S. 8005. An act granting an increase of pension to Garrett F. Cowan;

S. 8006. An act granting an increase of pension to Epaminondas P. Thurston;

S. 8015. An act granting an increase of pension to Samuel B. Hunter;
S. 8017. An act granting an increase of pension to Watson L. Corner;
S. 8023. An act granting an increase of pension to Harry N. Medbury;
S. 8024. An act granting a pension to Susan J. Rodgers;
S. 8034. An act granting an increase of pension to Jacob M. F. Roberts;
S. 8038. An act granting an increase of pension to John F. Ackley;
S. 8049. An act granting an increase of pension to Daniel C. Swartz.
S. 8056. An act granting an increase of pension to William H. Fountain;
S. 8064. An act granting an increase of pension to Carloss Trowbridge.
S. 8079. An act granting an increase of pension to Joseph Ickstadt.
S. 8081. An act granting an increase of pension to William H. Cochran.
S. 8084. An act granting an increase of pension to John Hazen.
S. 8089. An act granting an increase of pension to Mary E. Jacobs;
S. 8090. An act granting an increase of pension to Inger A. Steensrud;
S. 8101. An act granting an increase of pension to Jacob B. Getter;
S. 8104. An act granting an increase of pension to Henry Shelley;
S. 8105. An act granting an increase of pension to Anna Arnold;
S. 8107. An act granting an increase of pension to Leonidas Obenshain;
S. 8120. An act granting an increase of pension to Benjamin T. Woods;
S. 8125. An act granting an increase of pension to Mary O. Cherry;
S. 8144. An act granting an increase of pension to Elizabeth A. Bonner;
S. 8147. An act granting an increase of pension to Ann E. Macy;
S. 8153. An act granting an increase of pension to Henry B. Johnson;
S. 8195. An act granting an increase of pension to Asa E. Swasey;
S. 8196. An act granting an increase of pension to Michael J. Geary;
S. 8197. An act granting an increase of pension to Arabella J. Farrell;
S. 8201. An act granting an increase of pension to Clara A. Keeting;
S. 8207. An act granting an increase of pension to Peter Wedeman;
S. 8212. An act granting a pension to Azelia Mittag;
S. 8214. An act granting a pension to Jeremiah Bowman;
S. 8215. An act granting an increase of pension to James W. Lendsay;

PETER CLARK.

By unanimous consent, at the request of Mr. MICHALEK, leave was granted to withdraw from the files of the House, without leaving copies, the papers in the case of Peter Clark, Fifty-ninth Congress, no adverse report having been made thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. COOPER of Wisconsin, indefinitely, on account of illness.

WATER SUPPLY OF THE DISTRICT OF COLUMBIA.

Mr. WILEY of New Jersey. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 9748) to provide for the further purification of the water supply of the District of Columbia.

The bill was read.

Mr. FITZGERALD. Mr. Speaker, I object.

Mr. GROSVENOR. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

Accordingly (at 6 o'clock and 13 minutes p. m.) the House adjourned until Wednesday, February 27, 1907, at 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of the Treasury, transmitting a copy of a letter from the Secretary of War submitting an estimate of appropriation for Rock Island (Ill.) bridge and viaduct—to the Committee on Appropriations, and ordered to be printed.

A letter from the Secretary of the Treasury, transmitting a copy of a letter from the Director of the Mint submitting an estimate of appropriation for contingencies in the office of Director of the Mint—to the Committee on Appropriations, and ordered to be printed.

A letter from the Secretary of the Treasury, transmitting a copy of a letter from the Secretary of the constitutional convention of Oklahoma submitting an estimate of appropriation for expenses of the convention and of an election—to the Committee on Appropriations, and ordered to be printed.

A letter from the Secretary of the Treasury, transmitting a copy of a letter from the Commissioner of Education submitting a report of the results of investigations and labors in the Department of Education—to the Committee on Education, and ordered to be printed.

A letter from the Secretary of the Interior, transmitting a recommendation of legislation relating to the care of the insane in Alaska—to the Committee on the Territories, and ordered to be printed.

A letter from the Secretary of War, transmitting a copy of a letter from the Chief of Engineers recommending legislation for the relief of H. H. Wadsworth, Morton L. Tower, and G. G. McDaniel—to the Committee on Claims, and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills of the following titles were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. BURNETT, from the Committee on the Public Lands, to which was referred the bill of the Senate (S. 6704) to amend an act entitled "An act for the relief of certain homestead settlers in the State of Alabama," approved February 24, 1905, reported the same with amendment, accompanied by a report (No 8091); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DAWES, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 25401) to authorize the Secretary of War to make certain disposition of condemned guns and cannon balls, reported the same without amendment, accompanied by a report (No. 8102); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HAMILTON, from the Committee on the Territories, to which was referred the bill of the House (H. R. 25709) to amend sections 16, 17, and 20 of an act entitled "An act to enable the people of Oklahoma and of the Indian Territory to form a constitution and State government and be admitted into the Union on an equal footing with the original States; and to enable the people of New Mexico and of Arizona to form a constitution and State government and be admitted into the Union on an equal footing with the original States," approved June 16, 1906, and for other purposes, reported the same with amendment, accompanied by a report (No. 8103); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GRONNA, from the Committee on the Public Lands, to which was referred the bill of the Senate (S. 7994) authorizing the State of North Dakota to select other lands in lieu of lands

erroneously entered in sections 16 and 36, within the limits of the abandoned Fort Rice and Fort Abraham Lincoln military reservations, in said State, reported the same without amendment, accompanied by a report (No. 8105); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STEVENS of Minnesota, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 25716) to amend an act entitled "An act permitting the building of a dam across the Mississippi River above the village of Monticello, Wright County, Minn.," approved June 14, 1906, reported the same without amendment, accompanied by a report (No. 8092); which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill of the House (H. R. 25717) to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Clearwater, Wright County, Minn.," approved June 14, 1906, reported the same without amendment, accompanied by a report (No. 8093); which said bill and report were referred to the House Calendar.

Mr. WANGER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 25769) to amend an act entitled "An act to authorize the Fayette Bridge Company to construct a bridge over the Monongahela River, Pennsylvania, from a point in the borough of Brownsville, Fayette County, to a point in the borough of West Brownsville, Washington County," approved April 23, 1906, reported the same without amendment, accompanied by a report (No. 8094); which said bill and report were referred to the House Calendar.

Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 25773) permitting the building of a dam across the Savannah River at McDaniel Shoals, reported the same without amendment, accompanied by a report (No. 8095); which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill of the House (H. R. 25774) permitting the building of a dam across the Savannah River at Turner Shoals, reported the same without amendment, accompanied by a report (No. 8096); which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill of the House (H. R. 25776) permitting the building of a dam across the Savannah River at Middleton Shoals, reported the same without amendment, accompanied by a report (No. 8097); which said bill and report were referred to the House Calendar.

Mr. BARTLETT, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 25795) to authorize the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, to construct a bridge over the Escambia River between the counties of Santa Rosa and Escambia, in the State of Florida, reported the same with amendments, accompanied by a report (No. 8098); which said bill and report were referred to the House Calendar.

Mr. WANGER, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 25743) to authorize Washington and Fayette counties, in the State of Pennsylvania, to construct and maintain a bridge across the Monongahela River, reported the same with amendments, accompanied by a report (No. 8099); which said bill and report were referred to the House Calendar.

## ADVERSE REPORT.

Under clause 2 of Rule XIII, adverse report was delivered to the Clerk, and laid on the table, as follows:

Mr. PARKER, from the Committee on Military Affairs, to which was referred the bill of the Senate (S. 4089) to place David Robertson, sergeant, first class, Hospital Corps, on the retired list of the United States Army, reported the same adversely, accompanied by a report (No. 8104); which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills of the following titles were introduced and severally referred as follows:

By Mr. SLAYDEN: A bill (H. R. 25820) to amend an act granting pensions to certain enlisted men, soldiers, and officers who served in the civil war and the war with Mexico, approved February 6, 1907—to the Committee on Pensions.

By Mr. CALDER: A bill (H. R. 25821) concerning wrecks that may occur on the Atlantic coast—to the Committee on Interstate and Foreign Commerce.

By Mr. ANDREWS: A bill (H. R. 25822) for a site and public building between Las Vegas and East Las Vegas, N. Mex.—to the Committee on Public Buildings and Grounds.

## PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills of the following titles were introduced and severally referred as follows:

By Mr. DICKSON of Illinois: A bill (H. R. 25823) granting an increase of pension to Joseph Loughry—to the Committee on Invalid Pensions.

Also, a bill (H. R. 25824) granting an increase of pension to James D. R. Brown—to the Committee on Invalid Pensions.

Also, a bill (H. R. 25825) granting an increase of pension to William J. Adams—to the Committee on Invalid Pensions.

Also, a bill (H. R. 25826) granting an increase of pension to William W. Halladay—to the Committee on Invalid Pensions.

Also, a bill (H. R. 25827) granting an increase of pension to John Wingirt—to the Committee on Invalid Pensions.

By Mr. KELIHER: A bill (H. R. 25828) granting a pension to Mary C. Lewellyn—to the Committee on Invalid Pensions.

By Mr. LAMAR: A bill (H. R. 25829) granting an increase of pension to Robert Alsobrook—to the Committee on Invalid Pensions.

Also, a bill (H. R. 25830) granting an increase of pension to William S. Davis—to the Committee on Invalid Pensions.

By Mr. McCALL: A bill (H. R. 25831) granting an increase of pension to Mary A. Aitkenhead—to the Committee on Invalid Pensions.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committee was discharged from the consideration of bill of the following title; which was thereupon referred as follows:

A bill (H. R. 25561) for the relief of the heirs of John Schwartzenburg, sr., deceased—Committee on Claims discharged, and referred to Committee on War Claims.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER: Petition of various organizations in the States and the District of Columbia, against the passage of bill H. R. 13655 (the Littlefield bill)—to the Committee on the Judiciary.

By Mr. BROWN: Petition of Phillips Legion, No. 1390, against the bill to amend and codify the statutes relating to the classification of second-class mail matter and rates of postage thereon—to the Committee on the Post-Office and Post-Roads.

By Mr. CLARK of Florida: Petition of Orange State Lodge, No. 22, International Association of Car Workers, of Sanford, Fla., for a general arbitration treaty—to the Committee on Foreign Affairs.

By Mr. DALE: Paper to accompany bill for relief of Dr. James Carroll—to the Committee on Military Affairs.

Also, petition of citizens of Scranton, Pa., engaged in the engineering professions, for a clause in the sundry civil bill appropriating $250,000 for investigating fuels of the United States—to the Committee on Appropriations.

By Mr. DAWSON: Petition of the National Institute of Arts and Letters, for the enactment of a liberal copyright law—to the Committee on the Post-Office and Post-Roads.

By Mr. FITZGERALD: Petition of the Chamber of Commerce of Porto Rico, for an appropriation to improve San Juan Harbor—to the Committee on Rivers and Harbors.

Also, petition of the United Commercial Travelers, for the Sherman mileage-rate bill—to the Committee on Interstate and Foreign Commerce.

Also, petition of the New York Legislative League, for investigation of the condition of woman and child labor in the United States—to the Committee on Labor.

By Mr. GRAHAM: Petition of the A. D. Granger Company, favoring an appropriation to continue the fuel investigation—to the Committee on Appropriations.

Also, petition of the Baltimore and Ohio Railway Company and W. M. Wilkins, favoring the $100,000 appropriation in the sundry civil bill for continuing the structural-material investigation of the Geological Survey at St. Louis—to the Committee on Appropriations.

Also, petition of the Industrial World, of Pittsburg, Pa., against the legislation contemplated in the report of the Joint Postal Commission, presented to Congress in January and re-

ferred to the Committee on the Post-Office and Post-Roads—to the Committee on the Post-Office and Post-Roads.

Also, petition of the practicing structural engineers of Ambridge, Pa., for an appropriation to continue test of structural material—to the Committee on Appropriations.

By Mr. HOWELL of New Jersey: Petition of Pride of Amboy Legion, No. 1705, Order of the National Protective Legion, against the bill to amend and codify the statutes relating to the classification of second-class matter and rates of postage thereon (House Doc. No. 608)—to the Committee on the Post-Office and Post-Roads.

By Mr. HOUSTON: Paper to accompany bill for relief of Joseph H. Blackburn—to the Committee on Invalid Pensions.

By Mr. HULL: Petition of the Iowa State Retail Merchants' Association, favoring legislation for 1-cent postage; also a bill known as the Dixon bill, compelling civil-service employees of United States to pay for the necessaries of life—to the Committee on the Post-Office and Post-Roads.

Also, petition of Des Moines Court, No. 55, Tribe of Ben Hur, against the bill to amend the statutes relating to second-class mail matter and rates of postage thereon, as embodied in the report of the Postal Commission January 28, 1907, and designated as House Document No. 608—to the Committee on the Post-Office and Post-Roads.

By Mr. MADDEN: Petition of citizens of Chicago, Ill., for a sufficient appropriation to test automatic signal devices—to the Committee on Interstate and Foreign Commerce.

By Mr. SHARTEL: Petition of citizens of Missouri, against the proceedings of the authorities of Colorado and Idaho against Pettibone, Moyer, and Heywood—to the Committee on the Judiciary.

By Mr. SOUTHARD: Petition of L. N. Cushman, for legislation to insure a better fractional currency—to the Committee on Banking and Currency.

Also, petition of Legion No. 440, Order of the National Protective Legion, in relation to second-class mail classification, etc.—to the Committee on the Post-Office and Post-Roads.

Also, petition of the Lens and Brush Club, of Toledo, Ohio, for clause in the copyright bill to prevent discrediting of American photography—to the Committee on Patents.

By Mr. SMITH of Kentucky: Paper to accompany bill for relief of John H. Ward—to the Committee on War Claims.

## SENATE.

### WEDNESDAY, *February 27, 1907.*

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. EDWARD E. HALE.

On request of Mr. GALLINGER, and by unanimous consent, the reading of the Journal of yesterday's proceedings was dispensed with, and it was approved.

#### INSANE IN ALASKA.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, requesting that an appropriation of $23,000 be made to enable the Department to provide for the Alaskan insane, etc.; which, with the accompanying paper, was referred to the Committee on Appropriations, and ordered to be printed.

#### MEAT-INSPECTION EMPLOYEES.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of Agriculture, transmitting, pursuant to law, a statement showing the number of persons employed in meat inspection and the salary or per diem paid to each, etc.; which, with the accompanying papers, was referred to the Committee on Agriculture and Forestry, and ordered to be printed.

#### TRADE CONDITIONS IN INDIA.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of Commerce and Labor, transmitting the report of Charles M. Pepper, special agent of the Department of Commerce and Labor, on trade conditions in India, etc.; which, with the accompanying paper, was referred to the Committee on Commerce, and ordered to be printed.

#### RUBBER-PRODUCTION CAPACITY OF THE PHILIPPINES.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, in response to a resolution of the 18th instant, certain information relative to the rubber-production capacity of the several islands of the Philippine Archipelago that belong to the United States, etc.; which, with the accompanying papers, was referred to the Committee on the Philippines, and ordered to be printed.

#### RULES AND REGULATIONS OF THE TREASURY DEPARTMENT.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 1st instant, copies of all rules and regulations governing the Treasury Department and its various branches; which, with the accompanying papers, was ordered to lie on the table.

#### JAMESTOWN TERCENTENNIAL EXPOSITION.

The VICE-PRESIDENT laid before the Senate the following communication; which was read, and ordered to lie on the table:

NORFOLK, VA., *February 25, 1907.*

*To the President and Senate of the United States, Washington:*

The honor of the presence of the President and the Senate of the United States is requested at the formal opening of the Jamestown Tercentennial Exposition, at Norfolk, Va., on April 26, 1907. The acceptance of this invitation and the attendance of the President and the Senate upon the ceremony of the formal opening will be most gratifying to the president and the directors of the exposition and to all through whose agency the Tercentennial has been made worthy of the cause it represents.

H. ST. GEO. TUCKER, *President.*

#### SPECIAL EMPLOYEES OF DEPARTMENT OF JUSTICE.

The VICE-PRESIDENT laid before the Senate a communication from the Attorney-General, transmitting, in response to a resolution of the 8th instant, a list of special agents and other employees of the Department of Justice; which, with the accompanying paper, was referred to the Committee on Appropriations, and ordered to be printed.

#### FINDINGS BY THE COURT OF CLAIMS.

The VICE-PRESIDENT laid before the Senate communications from the assistant clerk of the Court of Claims, transmitting the findings of fact filed by the court in the following causes:

In the cause of D. A. Barbour and Andrew P. Gladden *v.* The United States; and

In the cause of Belle F. Neil, administratrix of James Atkins Fennell, deceased, *v.* The United States.

The foregoing findings were, with the accompanying papers, referred to the Committee on Claims, and ordered to be printed.

#### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the following bills:

S. 5888. An act authorizing the President to appoint James Carroll a surgeon, with the rank of major, in the United States Army;

S. 7017. An act extending the time for making settlement, final proof, and payment on public lands in certain cases;

S. 8400. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Sauk Rapids, Benton County, Minn.," approved February 26, 1904;

S. 8435. An act granting to the city of Durango, in the State of Colorado, certain lands therein described for water reservoirs;

S. 8446. An act to extend the time for the completion of a bridge across the Missouri River at Yankton, S. Dak., by the Yankton, Norfolk and Southern Railway Company; and

S. 8534. An act providing that the State of Wyoming be permitted to relinquish to the United States certain lands heretofore selected and to select other lands from the public domain in lieu thereof.

The message also announced that the House had passed the following bills with amendments; in which it requested the concurrence of the Senate:

S. 6229. An act to authorize the sale of public lands for cemetery purposes; and

S. 7684. An act to provide and maintain for the port of Galveston, Tex., a customs boarding boat.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24987) to authorize the sale and disposition of a portion of the surplus or unallotted lands in the Rosebud Indian Reservation, in the State of South Dakota, and making appropriation and provision to carry the same into effect.

The message also announced that the House insists upon its amendments to the bill (S. 7840) granting an increase of pension to Lewis A. Towne; agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. HOLLIDAY, Mr. CHANEY, and Mr. WEISSE managers at the conference on the part of the House.

The message further announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

H. R. 15859. An act ceding certain lands to Colorado State Agricultural College;

H. R. 19751. An act to authorize the Natchez Electric Street Railway and Power Company to construct and operate an electric railway along the national cemetery roadway at Natchez, Miss.;

H. R. 25738. An act to authorize the Cairo and Tennessee River Railroad Company to construct a bridge across the Tennessee River;

H. R. 25739. An act to authorize the Cairo and Tennessee River Railroad Company to construct bridges across Cumberland River; and

H. R. 25769. An act to amend an act entitled "An act to authorize the Fayette Bridge Company to construct a bridge over the Monongahela River, Pennsylvania, from a point in the borough of Brownsville, Fayette County, to a point in the borough of West Brownsville, Washington County," approved April 23, 1906.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

S. 2011. An act granting a pension to Lucinda L. McCorkle;

S. 4506. An act to provide for the better registration of births in the District of Columbia, and for other purposes;

S. 5125. An act granting an increase of pension to Nancy A. E. Hoffman;

S. 5144. An act granting an increase of pension to Morgan H. Weeks;

S. 5171. An act granting an increase of pension to Jennie H. Marshall;

S. 5191. An act granting an increase of pension to Robert H. White;

S. 5261. An act granting an increase of pension to Stephen A. Barker;

S. 5361. An act granting an increase of pension to John H. Peters;

S. 5380. An act granting an increase of pension to Richard Jones;

S. 5383. An act granting an increase of pension to Greenberry B. Patterson;

S. 5400. An act granting an increase of pension to John A. Chase;

S. 5420. An act granting an increase of pension to Thomas W. Gilpatrick;

S. 5423. An act granting an increase of pension to William M. Tinsley;

S. 5456. An act granting an increase of pension to Marcellus Cash;

S. 5457. An act granting an increase of pension to Albert Teets;

S. 5558. An act granting an increase of pension to George Payne;

S. 5578. An act granting an increase of pension to Sheffield L. Sherman, jr.;

S. 5621. An act granting an increase of pension to Frederick Buehrle;

S. 5623. An act granting an increase of pension to Nicholas M. Hawkins;

S. 5681. An act granting an increase of pension to William Grant;

S. 5692. An act granting an increase of pension to Margaret E. Craigo;

S. 5718. An act granting an increase of pension to William D. Hoff;

S. 5724. An act granting an increase of pension to George C. Saul;

S. 5730. An act granting an increase of pension to William O. Spelman;

S. 5752. An act granting an increase of pension to Ruth M. Hoag;

S. 5756. An act granting an increase of pension to Charles A. Bell;

S. 5782. An act granting an increase of pension to Octave L. F. E. Fariola;

S. 5813. An act granting an increase of pension to Marshall T. Kennan;

S. 5884. An act granting an increase of pension to Cyrus Palmer;

S. 5940. An act granting an increase of pension to Henry Bittleston;

S. 6993. An act to create the Barnaby road, from its intersection with the Livingston road to the District line, a public highway in the District of Columbia;

S. 7272. An act granting an increase of pension to George W. Cook;

S. 7283. An act granting an increase of pension to William T. Cooper;

S. 7305. An act granting an increase of pension to Robert K. Leech;

S. 7329. An act granting an increase of pension to Nathaniel Lewis Turner;

S. 7334. An act granting an increase of pension to Joshua T. Jellison;

S. 7341. An act granting an increase of pension to Menzo S. Bishop;

S. 7344. An act granting an increase of pension to Clara P. Coleman;

S. 7355. An act granting an increase of pension to William McHenry Plotner;

S. 7357. An act granting an increase of pension to Levi S. Bailey;

S. 7373. An act granting an increase of pension to Jeremiah Thomas;

S. 7379. An act granting an increase of pension to Mary E. Dougherty;

S. 7380. An act granting an increase of pension to Andrew J. Harris;

S. 7394. An act granting an increase of pension to Henrietta C. Cooley;

S. 7420. An act granting a pension to Eleanor N. Sherman;

S. 7427. An act granting an increase of pension to George L. Danforth;

S. 7429. An act granting a pension to Caroline A. Gilmore;

S. 7430. An act granting a pension to Mary F. Johnson;

S. 7452. An act granting an increase of pension to Thomas Harrop;

S. 7470. An act granting an increase of pension to William F. Burnett;

S. 7473. An act granting an increase of pension to John M. Gilliland;

S. 7476. An act granting an increase of pension to Oliver S. Boggs;

S. 7477. An act granting an increase of pension to Patrick Cooney;

S. 7478. An act granting an increase of pension to William H. Brown;

S. 7479. An act granting an increase of pension to George L. Corey;

S. 7480. An act granting an increase of pension to John Bowen;

S. 7481. An act granting an increase of pension to Alanson W. Edwards;

S. 7482. An act granting an increase of pension to Wilford Herrick;

S. 7483. An act granting an increase of pension to Marinda D. Beery;

S. 7485. An act granting an increase of pension to Lester M. P. Griswold;

S. 7491. An act granting an increase of pension to Anna V. Blaney;

S. 7493. An act granting an increase of pension to George Arthur Tappan;

S. 7503. An act granting an increase of pension to George W. Baker;

S. 7504. An act granting an increase of pension to David Decker;

S. 7509. An act granting an increase of pension to William T. Bennett;

S. 7531. An act granting an increase of pension to William F. Letts;

S. 7532. An act granting an increase of pension to Joseph Kiichli;

S. 7533. An act granting an increase of pension to Orvil Dodge;

Foss, of Gladstone, Mich.; James L. Carthart, of New York City, N. Y.; Thomas A. Snoddy, of Meridian, Tex.; Franz Frederick, of Hancock, Wis.; Andrew T. Towley, of Hubbard, Iowa; William M. Miller, of Syracuse, N. Y.; Samuel Avery, of Armow, Ark.; Joseph Kaiser, of Janesville, Minn.; John Strand, of Eastward, Ky.; W. H. H. Rose, of Vida, Mo.; Samuel S. Brand, of Jenco Springs, Mo.; P. M. Dennison, of Houston, Ohio; George Gewugh, of Clinton, Me.; Ambrose Burton, of Kentucky; Henry Taylor, of Eastward, Ky.; John Kincaid, of Logtown, La.; R. A. W. Donovon, of St. Louis, Mo.; Edward Smith, of Madison, Ind.; P. M. Nelson, of Rogers, Tex.; E. F. Barney, of De Leon Springs, Fla.; Stephen H. Brady, of Silas; W. Edmunds, of New Orleans, La.; Charles A. Nelson, of Crevi, Miss.; John Hanby, of Hon, Ark.; E. H. Palmer, of East McKeesport, Pa.; Richard S. Davenport, of McDonough, N. Y., and of General William S. Lincoln Command, No. 18, Union Veterans' Union, of Worcester, Mass., praying for the adoption of a certain amendment to the present service pension law providing for the payment of a specified fee to attorneys in pension claims; which were referred to the Committee on Pensions.

Mr. GALLINGER. Mr. President, I present numerous telegrams just received, and I shall read one of them:

Will you please favor me by supporting Congressman MURPHY'S bill limiting hours of service to railroad telegraph operators to nine hours out of each twenty-four.

I apprehend that that is an amendment that was placed on the so-called "sixteen-hour bill" which passed the Senate some time ago. I will present these telegrams, asking that the names of each of the parties who sent them may be inserted in the RECORD, and that they may lie on the table.

The VICE-PRESIDENT. Without objection, it is so ordered.

The telegrams were ordered to lie on the table, as follows:

From A. H. Gilman, of Lakeport, N. H.; from A. Walters, jr., of Penacook, N. H.; from H. M. Clay, of Boscawen, N. H.; from W. H. Meserve, of Penacook, N. H.; from H. W. Wroney, of Lakeport, N. H.; from F. R. Roers, of Franklin, N. H.; from J. M. Guare, of Wing Road, N. H.; from F. H. Gage, of Franklin, N. H.; from R. A. Burgess, of Franklin, N. H.; from H. H. Hughes, of Littleton, N. H.

Mr. GALLINGER presented petitions of Local Union No. 442, International Brotherhood of Blacksmiths and Helpers, of Concord; of Local Union No. 179, American Federation of Labor, of Whitefield, in the State of New Hampshire, and of Local Union No. 125, International Brotherhood of Blacksmiths and Helpers, of Kittery, Me., praying for the enactment of legislation providing for the protection of labor and industries from the competition of convict labor and prison-made goods; which were referred to the Committee on Education and Labor.

Mr. LONG presented a petition of Subordinate Lodge No. 4, International Brotherhood of Blacksmiths and Helpers, of Rosedale, Kans., praying for the enactment of legislation providing for the protection of labor and industries from the competition of convict labor and prison-made goods; which was referred to the Committee on Education and Labor.

He also presented a petition of the board of directors of the Trades League of Philadelphia, Pa., praying for the enactment of legislation providing for a charge of 1 cent per ounce on first-class mail matter weighing more than 1 ounce, with a minimum charge of 2 cents for the first ounce; which was referred to the Committee on Post-Offices and Post-Roads.

He also presented memorials of Subordinate Orders Nos. 22, 29, 156, 190, 346, 90, and 405, of McCune, St. Paul, Narka, Hallowell, and Falun, all of the Anti-Horse Thief Association, and of Camp No. 2996, Modern Woodmen of America, of St. Paul, all in the State of Kansas, remonstrating against the enactment of legislation to amend the laws relating to the classification of second-class mail matter and the rates of postage thereon; which were referred to the Committee on Post-Offices and Post-Roads.

He also presented sundry petitions of citizens of Howard, Kans., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

Mr. HANSBROUGH presented petitions of sundry citizens of Egeland, N. Dak., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of North Dakota, praying for the adoption of certain amendments to the present denatured-alcohol law; which were ordered to lie on the table.

He also presented memorials of sundry citizens of Osnabrock, N. Dak., and of Washington, D. C., remonstrating against the enactment of legislation requiring certain places of business in the District of Columbia to be closed on Sunday; which were referred to the Committee on the District of Columbia.

He also presented petitions of sundry citizens of Auburn and South Berwick, in the State of Maine, praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

He also presented the petition of Charles D. Woods and sundry other citizens of Maine, praying for the adoption of certain amendments to the present denatured-alcohol law; which was ordered to lie on the table.

Mr. ANKENY presented a petition of sundry citizens of the State of Washington, praying for the enactment of a reciprocal demurrage law; which was referred to the Committee on Interstate Commerce.

Mr. PROCTOR presented a petition of sundry citizens of Fairhaven, Vt., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which was referred to the Committee on the Judiciary.

Mr. HOPKINS presented a petition of sundry citizens of Galena, Ill., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Chicago, Huntsville, and Rockford, all in the State of Illinois, praying for the adoption of certain amendments to the present denatured-alcohol law; which was ordered to lie on the table.

He also presented petitions of sundry labor organizations of Springfield, Kingston Mines, Caseyville, Joliet, Carriers Mills, Kewanee, Galesburg, Quincy, Litchfield, Springfield, Mount Vernon, Menard, Peoria, Carlinville, Streator, Chicago, Decatur, Beardstown, Bloomington, and Belleville, all in the State of Illinois, praying for the enactment of legislation to protect labor and industries from the competition of convict labor and manufactures; which were referred to the Committee on Education and Labor.

Mr. LODGE presented petitions of G. B. Burnett & Son, of Amherst; Prof. A. A. Noyes, of the Massachusetts Institute of Technology, of Boston, and of Prof. L. A. Olney, of the Lowell Textile School, of Lowell, all in the State of Massachusetts, praying for the adoption of certain amendments to the present denatured-alcohol law; which were ordered to lie on the table.

He also presented a petition of sundry citizens of Worcester, Mass., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which was referred to the Committee on the Judiciary.

Mr. KNOX presented a petition of Camp La Lom, Army of the Philippines, of Uniontown, Pa., praying for the enactment of legislation extending foreign campaign badges to all who served honorably in the United States Army, Navy, and Marine Corps; which was referred to the Committee on Military Affairs.

He also presented a petition of the Trades League of Philadelphia, Pa., praying for the enactment of legislation providing for a charge of 1 cent per ounce on first-class mail matter weighing more than 1 ounce, with a minimum charge of 2 cents for the first ounce; which was referred to the Committee on Post-Offices and Post-Roads.

He also presented petitions of Lodge No. 33, International Association of Car Workers, of Vilas; Lodge No. 25, Amalgamated Association of Iron, Steel, and Tin Workers, of Danville; Local Union No. 117, Coopers' International Union, of Gibsonton; Local Grinders and Finishers' National Union, of Tidioute; Lodge No. 22, Amalgamated Association of Iron, Steel, and Tin Workers, of Lancaster; Lodge No. 15, Amalgamated Association of Iron, Steel, and Tin Workers, of South Sharon; Branch No. 76, Glass Bottle Blowers' Association, of Sharpsburg; Local Union No. 17, International Association of Marble Workers, of Philadelphia, all in the State of Pennsylvania, praying for the enactment of legislation providing for the protection of labor and industries from the competition of convict labor and prison-made goods; which were referred to the Committee on Education and Labor.

Mr. BEVERIDGE presented petitions of the International Typographical Union; Reed, Willow, and Rattan International Union of America; the Piel Brothers Manufacturing Company; the Capital Rattan Company, all of Indianapolis; of Local Union No. 227, of the United Garment Workers of America, of Richmond, and of Jarvis Lodge, No. 8, of Terre Haute, and the International Brotherhood of Blacksmiths of Hammond, all in the State of Indiana, praying for the enactment of legislation providing for the protection of labor and industries from the competition of convict labor and prison-made goods; which were referred to the Committee on Education and Labor.

Mr. BRANDEGEE presented a petition of the Locomobile Company of America, of Bridgeport, Conn., and a petition of sundry citizens of Middletown, Conn., praying for the adoption of certain amendments to the present denatured-alcohol law; which were ordered to lie on the table.

He also presented a petition of the Epworth League of the Methodist Episcopal Church of New Britain, Conn., praying for the enactment of legislation to prohibit the sale of intoxicating liquors in all Government buildings and grounds; which was referred to the Committee on Public Buildings and Grounds.

He also presented petitions of Local Union No. 180, International Brotherhood of Blacksmiths and Helpers, of New Haven; of Pilgrim Lodge, No. 48, International Association of Car Workers, of New Haven, and of Elm City Lodge, No. 1, Amalgamated Association of Iron, Steel, and Tin Workers of the United States, of New Haven, all in the State of Connecticut, praying for the enactment of legislation providing for the protection of labor and industries from the competition of convict labor and prison-made goods; which were referred to the Committee on Education and Labor.

### REPORTS OF COMMITTEES.

Mr. BERRY, from the Committee on Commerce, to whom was referred the bill (S. 8561) to amend an act entitled "An act to authorize the Fayette Bridge Company to construct a bridge over the Monongahela River, Pennsylvania, from a point in the borough of Brownsville, Fayette County, to a point in the borough of West Brownsville, Washington County," approved April 23, 1906, reported it without amendment, and submitted a report thereon.

Mr. BURROWS, from the Committee on Finance, to whom was referred the bill (H. R. 8) for the relief of the Harbison-Walker Company, of Pittsburg, Pa., reported it without amendment.

Mr. BEVERIDGE, from the Committee on Territories, to whom was referred the bill (H. R. 25032) to amend an act entitled "An act for the protection of game in Alaska, and for other purposes," approved June 7, 1902, reported it without amendment.

Mr. CARTER (for Mr. PENROSE), from the Committee on Post-Offices and Post-Roads, to whom was referred the bill (H. R. 13418) for the relief of W. S. Hammaker, reported it without amendment.

### GRAND CALUMET RIVER BRIDGE, IN ILLINOIS.

Mr. BERRY. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 25671) authorizing the construction of a bridge across the Grand Calumet River in the State of Illinois, to report it favorably without amendment, and I submit a report thereon.

This is an exact copy of a Senate bill which is now on the Calendar, Senate bill 8507. I ask that the House bill be substituted for the Senate bill, and that the Senate bill be indefinitely postponed.

Mr. CULLOM. I ask that the bill just reported be now considered.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The VICE-PRESIDENT. The bill (S. 8507) authorizing the construction of a bridge across the Grand Calumet River, in the State of Illinois, will be indefinitely postponed.

### PROHIBITION OF SHANGHAIING.

Mr. FRYE. I report back favorably from the Committee on Commerce, without amendment, the bill (H. R. 25190) to amend sections 1, 2, and 3 of an act entitled "An act to prohibit shanghaiing in the United States," approved June 28, 1906, and I ask for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to amend sections 1, 2, and 3 of the act so as to read:

Whoever, with intent that any person shall perform service or labor of any kind on board of any vessel engaged in trade and commerce among the several States or with foreign nations, or on board of any vessel of the United States engaged in navigating the high seas or any navigable water of the United States, shall procure or induce, or attempt to procure or induce, another, by force or threats or by representations which he knows or believes to be untrue, or while the person so procured or induced is intoxicated or under the influence of any drug, to go on board of any such vessel, or to sign or in any wise enter into any agreement to go on board of any such vessel to perform service or labor thereon, or whoever shall knowingly detain on board of any such vessel any person so procured or induced to go on board thereof or to enter into any agreement to go on board thereof by any means herein defined, or whoever shall knowingly aid or abet in the doing of any of the things herein made unlawful shall be fined not more than $1,000 or imprisoned not more than one year, or both.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### COOSA RIVER DAM, IN ALABAMA.

Mr. PETTUS. I ask for the present consideration of the bill (S. 8526) permitting the erection of a dam across Coosa River, Alabama, at the place selected for Lock No. 12 on said river.

I will say that this is a very important bill, and it does not carry a dollar of money. It is for the building of a dam across the Coosa River, in the State of Alabama, at the corporation's own expense.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. PETTUS. I desire to ask that the bill which has just been passed may be sent to the other House as speedily as the rules will allow.

The VICE-PRESIDENT. That will be done.

### ESCAMBIA RIVER BRIDGE, IN FLORIDA.

Mr. MALLORY. I am instructed by the Committee on Commerce, to whom was referred the bill (S. 8556) to authorize the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, to construct a bridge over the Escambia River, between the counties of Santa Rosa and Escambia, in the State of Florida, to report it favorably with amendments, and I submit a report thereon. I ask for the present consideration of the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The amendments of the Committee on Commerce were, on page 1, line 9, after the word "War," to insert "in accordance with the provisions of the act entitled 'An act to regulate the construction of bridges over navigable waters,' approved March 23, 1906;" and to strike out sections 2, 3, 4, 5, and 7 of the bill, and to change the numbering of section 6 to section 2; so as to make the bill read:

*Be it enacted, etc.*, That the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, be, and is hereby, authorized to construct, operate, and maintain a bridge over the Escambia River, between the counties of Escambia and Santa Rosa, in the State of Florida, at such point between the mouth of said river and the Alabama State line to be approved by the Secretary of War, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, and repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ROSANNA A. MAY.

Mr. McCUMBER. I am directed by the Committee on Pensions, to whom was referred the bill (S. 8568) granting an increase of pension to Rosanna A. May, to report it favorably with an amendment; and I ask for its present consideration.

Mr. CLAPP. I shall not object to these pension bills, but I shall object to the consideration of any other bills out of their order. It would not take an hour's time to-day to go to the Calendar and clean it up.

Mr. McCUMBER. It will not take a minute now to pass these bills.

The VICE-PRESIDENT. Is there objection to the present consideration of the bill reported by the Senator from North Dakota?

There being no objection, the bill was considered as in Committee of the Whole.

The amendment was, in line 8, before the word "dollars," to strike out "twenty" and insert "sixteen;" so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws, the name of Rosanna A. May, widow of John T. May, late of Company A, Second Battalion District of Columbia Volunteer Infantry, and to pay her a pension at the rate of $16 per month in lieu of that she is now receiving.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

THOMAS H. ADAMS.

Mr. McCUMBER. I am directed by the Committee on Pensions, to whom was referred the bill (H. R. 23612) granting an increase of pension to Thomas H. Adams, to report it favorably without amendment; and I ask that it be put on its passage.

There being no objection, the bill was considered as in Committee of the Whole. It proposes to place on the pension roll the name of Thomas H. Adams, late of Company H, Twenty-seventh Regiment Indiana Volunteer Infantry, and to pay him a pension of $36 per month in lieu of that he is now receiving.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

INDEX TO REPORTS OF NATIONAL PRISON ASSOCIATION.

Mr. PLATT, from the Committee on Printing, reported the following resolution; which was considered by unanimous consent and agreed to:

*Resolved*, That the index to the reports of the National Prison Association for the years 1870, 1873, 1874, and 1883 to 1904 be printed as a document for the use of the Senate, and that 1,000 additional copies be printed for the National Prison Association.

Mr. WHYTE subsequently said: I move to reconsider the vote by which the Senate agreed to the resolution reported to-day by the Senator from New York [Mr. PLATT] providing for the printing of copies of the index to the reports of the National Prison Association for the years 1870, 1873, 1874, and 1883 to 1904.

The motion to reconsider was agreed to.

Mr. WHYTE. I ask leave of the Senate to withdraw the resolution.

The VICE-PRESIDENT. In the absence of objection, the resolution will be withdrawn.

MISSISSIPPI RIVER BRIDGE AT EAST ST. LOUIS.

Mr. STONE. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 25629) to repeal the act of February 27, 1901, granting authority to the East St. Louis and St. Louis Bridge and Construction Company, of the city of East St. Louis, Ill., to build, own, operate, and maintain a bridge across the Mississippi River, to report it without amendment.

I have been instructed by the Committee on Commerce to ask for the immediate consideration of the bill.

Mr. CURTIS. I ask that the bill may go to the Calendar.

The VICE-PRESIDENT. The bill will go to the Calendar.

ORDER OF BUSINESS.

Mr. HALE. Mr. President, let me suggest in the way of order of business that after the conference reports that are necessary to be finished are disposed of and the speech of the Senator from Colorado [Mr. PATTERSON] there never will be any better time than to-day to go to the Calendar for unobjected cases for an hour.

Mr. GALLINGER and others. That is right.

Mr. HALE. I ask unanimous consent that after the conference reports are submitted and the speech of the Senator from Colorado the Senate shall consider unobjected cases on the Calendar for one hour and a half or two hours. That will relieve a great many Senators who have bills on the Calendar that ought to be passed, and to-day is the best time for their consideration. No other appropriation bill will come in to-day.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that at the conclusion of the remarks of the Senator from Colorado and the completion of the consideration of the conference reports the Senate will proceed to the consideration of unobjected bills on the Calendar for an hour and a half.

Mr. CARTER. Let me ask the Senator why it is necessary to fix a limitation of one hour and a half?

Mr. HALE. I am not at all particular about that. The suggestion has been made to me that we will not need as much time as that.

Mr. CARTER. I presume an agreement could be made that the unobjected cases be disposed of, subject, of course, to interference with the order at any time by conference reports or any privileged business of the Senate. If the limitation is taken off, I suggest to the Senator that it will result in disposing of all the unobjected cases, particularly the House bills.

Mr. HALE. I will ask, then, that we shall proceed at the time I have indicated to the consideration of unobjected cases on the Calendar.

Mr. SPOONER. I think it would be just as well to make no order and not tie the hands of the Senate at this stage of the session until after the Senator from Colorado has finished his speech.

Mr. HALE. The Senator did not understand my suggestion. It was that after the conference reports and the speech of the Senator from Colorado are concluded then we carve out an hour or two for the consideration of cases on the Calendar, an arrangement that will meet the convenience of a great many Senators and be very satisfactory to them.

Mr. SPOONER. I quite agree with the Senator, but we can tell better when to locate the hour if we wait.

Mr. HALE. I am afraid if we do not agree to it now and Senators do not make their preparations accordingly we shall find it more difficult to do this at a future time. I do not see what harm there is in the order.

Mr. SPOONER. There are one or two bills, one with reference to Alaska, which I think the Senate ought to consider and dispose of. There are several bills which the Senate ought to take up.

Mr. HALE. Undoubtedly; but many Senators who are interested in the unobjected cases prefer this course, and it seems to me that we ought to give them the first chance.

Mr. SPOONER. I think they ought to have a chance, but I think there ought to be some discrimination as to the relative importance of measures.

Mr. HALE. There is no discrimination where we take up unobjected cases. I think the Senator will find that he will not get bills which are contested through any more speedily by objecting to going on with the Calendar for the consideration of unobjected cases.

Mr. SPOONER. I was not objecting, and if I were objecting I would not be influenced at all by any minatory suggestions. I do not think the Senator ought to indulge in them.

Mr. HALE. I simply——

Mr. SPOONER. I have the same desire the Senator has to expedite the public business. I merely ventured to suggest that we can tell better after the Senator from Colorado finishes his speech whether there are any matters which ought to be immediately considered. I do not object to the Senator's request.

Mr. HALE. Let the request be submitted to the Senate.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that at the conclusion of the remarks of the Senator from Colorado, and after the consideration of conference reports, the Senate shall proceed to the consideration of unobjected cases on the Calendar for an hour and a half.

Mr. HALE. I will not limit the time—that the Senate shall proceed to the consideration of unobjected cases on the Calendar.

The VICE-PRESIDENT. That the Senate shall proceed to the consideration of unobjected cases on the Calendar. Is there objection? The Chair hears none, and it is so ordered.

Mr. SPOONER. The Chair was so rapid in his decision that

I had no opportunity to say what I desired to say. That puts one in a position of objecting to a bill which he really thinks ought to pass by making it absolutely indefinite as to time.

Mr. ALDRICH. Until the further order of the Senate.

Mr. SPOONER. We can not change a unanimous-consent agreement.

Mr. ALDRICH. It is already the order of the Senate.

DENATURED ALCOHOL.

Mr. HANSBROUGH. I am authorized by the Committee on Finance, to whom was referred the bill (H. R. 24816) to amend an act entitled "An act for the withdrawal from bond, tax free, of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials," approved June 7, 1906, to report it favorably with amendments. This is the bill known as the "free-alcohol bill," and I desire to give notice that at the very earliest opportunity I shall move to take up the bill for consideration.

Mr. KEAN. I ask for the reading of the bill.

The VICE-PRESIDENT. Without objection, the Secretary will read the bill.

The Secretary read the bill and the amendments, as follows:

*Be it enacted, etc.,* That notwithstanding anything contained in the act entitled "An act for the withdrawal from bond, tax free, of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials," approved June 7, 1906, domestic alcohol when suitably denatured may be withdrawn from bond without the payment of internal-revenue tax and used in the manufacture of ether and chloroform and other definite chemical substances where said alcohol is changed into some other chemical substance and does not appear in the finished product as alcohol: *Provided, That rum of not less than 150° proof may be withdrawn, for denaturation only, in accordance with the provisions of said act of June 7, 1906, and in accordance with the provisions of this act.*

SEC. 2. That the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may authorize the establishment of central denaturing bonded warehouses, other than those at distilleries, to which alcohol of the required proof may be transferred from distilleries or distillery bonded warehouses without the payment of internal-revenue tax, and in which such alcohol may be stored and denatured. The establishment, operation, and custody of such warehouses shall be under such regulations and upon the execution of such bonds as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

SEC. 3. That alcohol of the required proof may be drawn off, for denaturation only, from receiving cisterns in the cistern room of any distillery for transfer by pipes direct to any denaturing bonded warehouse on the distillery premises or to closed metal storage tanks situated in the distillery bonded warehouse, or from such storage tanks to any denaturing bonded warehouse on the distillery premises, and denatured alcohol may also be transported from the denaturing bonded warehouse, in such manner and by means of such packages, tanks, *or tank cars,* and on the execution of such bonds, and under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe. And further, alcohol to be denatured may be withdrawn without the payment of internal-revenue tax from the distillery bonded warehouse for shipment to central denaturing plants in such packages, tanks, and tank cars, under such regulations and on the execution of such bonds as may be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury.

SEC. 4. That at all distilleries producing alcohol from any substance whatever, for denaturation only, and having a daily spirit-producing capacity of not exceeding 100 proof gallons, the use of cisterns or tanks of such size and construction as may be deemed expedient may be permitted in lieu of distillery bonded warehouses, and the production, storage, the manner and process of denaturing on the distillery premises the alcohol produced, and transportation of such alcohol, and the operation of such distilleries shall be upon the execution of such bonds and under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe, and such distilleries may by such regulations be exempted from such provisions of the existing laws relating to distilleries *except the provisions of section 3284 of the Revised Statutes,* as may be deemed expedient by said officials.

SEC. 5. That the provisions of this act shall take effect on September 1, 1907.

[The amendments of the Committee on Finance appear in italics.]

Mr. CULLOM. Mr. President, I object to the present consideration of the bill.

The VICE-PRESIDENT. The bill will go to the Calendar.

Mr. HANSBROUGH. I hope the Senator from Illinois will not insist on his objection. I ask that the bill be made the unfinished business.

Mr. CULLOM. I object to that.

The VICE-PRESIDENT. Objection is made.

Mr. HANSBROUGH. I move that the Senate proceed to the consideration of the bill.

Mr. KEAN. That motion is not in order under the unanimous-consent agreement.

Mr. FULTON. Before the motion is put, I should like to ask the Senator from North Dakota if the report will be printed before the bill is brought up for final consideration, in order that we may know just what the amendments are and what change is proposed to be made. With that understanding, I will make no objection at the present time.

Mr. HANSBROUGH. There is no written report with the bill. There are two amendments agreed upon by the committee.

Mr. CULLOM. I ask that the bill go to the Calendar.

Mr. HANSBROUGH. I will withdraw the request that it be made the unfinished business, provided——

Mr. CULLOM. I call for the regular order.

Mr. HANSBROUGH. Provided the clerks will see that the bill goes to the Printer at once, so that we may get it back this afternoon as early as possible.

Mr. FULTON. I wish simply to say that the statement I have made does not come from any hostility to the amendments to the bill, because I do not know just what they are. I do know that the present law requires amendment, and we thought we had an effective law at the last session and discovered we did not. I do not want to have Congress make another mistake.

Mr. HANSBROUGH. I think the Senator will find that this is a very decided improvement on the existing law.

Mr. GALLINGER. The regular order, Mr. President.

The VICE-PRESIDENT. The introduction of bills and joint resolutions is in order.

C. B. M'CLENNY.

Mr. TALIAFERRO. Yesterday I introduced a bill (S. 8579) for the relief of C. B. McClenny, which was referred to the Committee on Public Health and National Quarantine. I ask that the committee be discharged from the further consideration of the bill, and that it be referred to the Committee on Claims.

The VICE-PRESIDENT. Without objection, it is so ordered.

BILLS INTRODUCED.

Mr. STONE introduced a bill (S. 8597) for the relief of the county of Phelps, State of Missouri; which was read twice by its title, and, with the accompanying paper, referred to the Committee on Claims.

Mr. CLAPP introduced a bill (S. 8598) for the relief of John H. Davern; which was read twice by its title, and referred to the Committee on Claims.

Mr. McENERY introduced a bill (S. 8599) granting an increase of pension to Matilda Ann Cheney; which was read twice by its title, and referred to the Committee on Pensions.

Mr. FRAZIER introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Claims:

A bill (S. 8600) for the relief of the Grand Lodge Independent Order of Odd Fellows of the State of Tennessee;

A bill (S. 8601) for relief of trustees of Lynn Creek Baptist Church, of Giles County, Tenn.;

A bill (S. 8602) for relief of trustees of Harpeth Academy;

A bill (S. 8603) for relief of the trustees of Porter Female Academy;

A bill (S. 8604) for the relief of the Mount Zion Church, of Williamson County, Tenn.; and

A bill (S. 8605) for the relief of Benjamin F. Harris.

Mr. DANIEL introduced a bill (S. 8606) for the relief of Lucy A. Monroe; which was read twice by its title, and referred to the Committee on Claims.

He also introduced a bill (S. 8607) for the relief of the trustees of Hanover Baptist Church, of King George County, Va.; which was read twice by its title, and, with the accompanying paper, referred to the Committee on Claims.

Mr. McLAURIN introduced a bill (S. 8608) granting an increase of pension to Sylvester Starkey; which was read twice by its title, and referred to the Committee on Pensions.

AMENDMENTS TO DEFICIENCY APPROPRIATION BILL.

Mr. GALLINGER submitted an amendment proposing to extend the time for the completion of the Anacostia, Surrattsville and Brandywine Electric Railroad into the District of Columbia to twelve months from March 3, 1907, intended to be proposed by him to the general deficiency bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. PERKINS submitted an amendment proposing to appropriate $3,000 to pay Pitman Pulsifer for labor in compiling and indexing the Navy appropriation laws covering what is known as the "new Navy," etc., intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. KNOX submitted an amendment proposing to appropriate $3,000 to pay John N. McDowell, of Council City, Alaska, for services rendered in preparing a new set of indices of the records of the recording district of that city, etc., intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

OMNIBUS CLAIMS BILL.

Mr. CLAPP submitted an amendment intended to be proposed by him to the omnibus claims bill; which was referred to the Committee on Claims, and ordered to be printed.

HOUSE BILLS REFERRED.

H. R. 15859. An act ceding certain lands to the Colorado State Agricultural College was read twice by its title, and referred to the Committee on Public Lands.

H. R. 19751. An act to authorize the Natchez Electric Railway and Power Company to construct and operate an electric railway along the national cemetery roadway, at Natchez, Miss., was read twice by its title, and referred to the Committee on Military Affairs.

The following bills were severally read twice by their titles, and referred to the Committee on Commerce:

H. R. 25738. An act to authorize the Cairo and Tennessee River Railroad Company to construct a bridge across the Tennessee River;

H. R. 25739. An act to authorize the Cairo and Tennessee River Railroad Company to construct bridges across the Cumberland River; and

H. R. 25769. An act to amend an act entitled "An act to authorize the Fayette Bridge Company to construct a bridge over the Monongahela River, Pennsylvania, from a point in the borough of Brownsville, Fayette County, to a point in the borough of West Brownsville, Washington County," approved April 23, 1906.

GOVERNMENT OWNERSHIP OF RAILROADS.

Mr. PATTERSON. I call up the bill (S. 8436) to provide for the acquisition, purchase, construction, and condemnation by the United States of America of railroads in the several States and Territories of the United States and the District of Columbia engaged in interstate commerce and in carrying the mails, and to provide for the operation of said roads by the United States, which I introduced on the 12th instant, and which is on the Table Calendar.

The VICE-PRESIDENT. The Chair lays the bill before the Senate.

Mr. PATTERSON. Mr. President, in introducing a bill for the condemnation, purchase, and operation of the railways of the country by the Government I am not moved by anticipation of very early legislation for that purpose. Reforms of such character are of slow growth and tardy fulfillment. But public opinion in favor of the step is crystallizing and the movement in its behalf is growing rapidly. In my humble opinion national ownership of railroads will be an accomplished fact within the lifetime of members of this body who have already passed the meridian of life. My purpose in introducing the bill and discussing it in this great forum is to do my share, small as it may be, in forwarding the movement. I am convinced that for the country to know the ground is for the country to occupy it; and to occupy the ground will bring more widespread, more evenly distributed, and greater general prosperity than will any other reform now contemplated by any considerable number of the American people.

Notwithstanding the remedial railway legislation of the last session of Congress, the power and purposes of the great railroad combinations have not changed. Whatever their aggressions were in 1874 and previously, in the face of the interstate-commerce act and its various amendments, all adopted since that date, the railways have increased in power, aggressiveness, and in utter indifference to public rights, and for reasons I will later on explain the recent act will, in the nature of things, accomplish very little toward undoing the evils. Yet in June, 1874, the late President Garfield, then a Member of the House of Representatives, thus characterized the attitude of the railways to the public:

It is painfully evident—

He said—

from the experience of the last few years that the efforts of the States to regulate their railroads have amounted to little more than a feeble annoyance. In many cases the corporations have treated such efforts as impertinent meddling and have brushed away legislative restrictions as easily as Gulliver broke the cords with which the Lilliputians attempted to bind him.

In these contests the corporations have become conscious of their strength and have entered upon the work of controlling the States. Already they have captured some of the best and strongest of them, and these discrowned sovereigns now follow in chains the triumphant chariot of their conquerors. And this does not imply that merely officers and representatives of States have been subjected to the railways, but that the corporations have grasped the sources and fountains of power and control the choice of both officers and representatives.

The consolidation—

He continues—

of our great commercial companies, the power they wield, and the relations they sustain to the State and to the industry of the people do not fall far short of Fourier's definition of commercial and industrial feudalism. The modern barons, more formidable than their military prototype, own our greatest highways and levy tribute at will on all our vast industries. And as the old feudalism was finally controlled and subordinated only by the combined effort of the king and the people of the free cities and towns, so our modern feudalism can be subordinated to the public good only by the great body of the people acting through their governments by wise and just laws.

Mr. President, I can take little time in view of the scope of the discussion I have in mind to enlarge upon the needs—not for the control of the railroads, but for their possession and operation by the General Government. The evils of private ownership became so great that their rigid regulation was declared for in the last national Democratic platform, and the President who was elected without any pledge by his party in that direction was enabled to bring such a public sentiment to bear upon Congress that the modern barons for a time lost control of their servitors, and the legislation promised by the Democratic party was enacted by a Republican Congress. True, this was not accomplished without long and aggressive opposition under various disguises, but the popular sentiment overcame it all and the regulatory legislation was adopted practically as originally urged. But the modern barons have been merely driven to make a detour in their march for practical mastery of the transportation of the country; and as suits and judgments dissolving mergers and trusts and other unlawful combinations in restraint of trade have been readily evaded by those who were prosecuted and were the losers in the litigation, and the combinations continue to exist and multiply and grow in scope and power, so the railroads, in spite of the recent legislation, will remain the masters of transportation and in one way or another will maintain their relentless grip upon the country's commerce, directing its current, curtailing its activities, and forcing it to yield extortionate tribute. They will continue to hold the sources and fountains of power, controlling in a large degree the choice of both State and national officers and Representatives. When this becomes plain to the people, as it must become glaringly clear before many more years, the sentiment for government ownership of the railroads will grow with accelerated speed, and almost before the railroad corporations realize the fact the people will enforce their right to take possession of these great arteries of trade.

WHAT WILL BE DISCUSSED.

Mr. President, there is time to discuss but few of the problems associated with government ownership, and the discussion of those must necessarily be incomplete, but I hope the time I consume will be sufficient to clearly place the propositions I present before the Senate. I propose to discuss them in the following order:

1. The railway as a function of government;

2. The constitutional power to acquire existing railways by condemnation;

3. Method for their valuation and with that the present market value of the railways;

4. How the money may be procured with which to pay for the roads and the relatively small amounts of actual money that will be needed; and

5. Some of the great economies that government ownership will result in and the benefits to accrue to the public generally and to the mass of workmen who will operate the roads.

Mr. President, the bill I had the honor to introduce was prepared as a fairly complete scheme for the acquisition and the operation of the properties. I will not now go into the details of the proposed measure; but I will add it as an appendix to my remarks, and I ask the consent of the Senate for that purpose.

The VICE-PRESIDENT. Without objection, permission is granted.

THE RAILWAY AS A FUNCTION OF GOVERNMENT.

Mr. PATTERSON. There is no question but that the railroads are public highways and are such in the same sense as the common roads, now probably aggregating 2,000,000 miles in extent. It is just as well settled that the administration of the railroads represents a function of government, succeeding the former "king's highways." Governments have always had the right to take private property when necessary to perform their functions, and the building and maintenance of highways is one of the most necessary and useful of the functions. In the United States, however, the General Government did not choose at first to build the railroads itself, but it did while in the throes of the civil war give substantial aid in land grants and the guaranty of bonds to private corporations which undertook to build and operate great trunk transcontinental lines, with some branches connected with them. The States, through legislation, delegated the construction of railroads to individuals or private joint stock companies. Thus private corporations have been enabled through this delegation of governmental powers, for three-quarters of a century, to compel private owners to sell to them rights of way or to submit to the condemnation of their lands for railway uses until now such companies have graded and equipped and are operating upon these rights of way more than 220,000 miles of road.

But, Mr. President, although these railroads, largely with the financial assistance of the State and the Government, were thus privately constructed, the basic fact of their governmental character has never been lost sight of by either the lawmaking powers or the courts. This is seen in the frequent attempts of both Congress and the legislatures to regulate their rates and preferential practices, and by the multifarious rules laid down by the courts defining their duties as public or common carriers. The United States Supreme Court took this view of the matter, as reference to Olcott *v.* The Supervisors of Fond du Lac County (83 U. S., 678) will show. The court in that case said:

That railroads, though constructed by private corporations and owned by them, *are public highways* has been the doctrine of nearly all the courts ever since such conveniences of passage and transportation have had any existence. Very early the question arose whether a State's right of eminent domain could be exercised by a private corporation created for the purpose of constructing a railroad. Clearly it could not, unless taking land for such a purpose by such an agency is taking land for public use. The right of eminent domain nowhere justifies taking property for private use. Yet it is a doctrine universally accepted that a State legislature may authorize a private corporation to take land for the construction of such a road, making compensation to the owner. * * * And the reason why the use has always been held a public one is that such a road is a highway, whether made by the Government itself or by the agency of corporate bodies. * * * It has never been considered a matter of any importance that the road was built by the agency of a private corporation. No matter who is the agent, the function performed is that of the State.

In Smyth *v.* Ames, decided in 1897 (169 U. S.), Olcott *v.* The Supervisors, etc., is cited and approved, and the court in addition declared:

A railroad *is a public highway*, and none the less so because constructed and maintained through the agency of a corporation deriving its existence and powers from the State. Such a corporation was created for public purposes. It performs a function of the State.

If the railroads are exercising *a function of the Government* this is a fact of fundamental importance, because upon this fact depends the rights of the people with regard to the ownership and operation of the roads. Private proprietors may do much as they please with their private properties. The merchant may sell or not sell; or as he chooses he may sell to one patron at a low and to another at a high price, but public officials as to things public that they administer can of right do no such thing; as to them every citizen is entitled to the same treatment, and this, indeed, is only granting the citizen *equality before the law.* A judge in his court exercises the judicial function of government, and grants all suitors juridical equality. The same right attaches in the citizen with regard to any other function of government. This is his constitutional right as a citizen, and the Interstate Commerce Commission well explained this in one of its earlier reports. The following clear expression of its views was published as early as 1892—views that have met with universal public and judicial approval ever since:

The railroad is justly regarded as a public facility which every person may enjoy at pleasure, a common right to which all are admitted and from which none can be excluded. The essence of this right is *equality*, and its enjoyment can be complete only when it is secured on like conditions by all who desire its benefits. The railroad exists by virtue of authority proceeding from the State, and thus differs in its essential nature from every form of private enterprise. The carrier is invested with extraordinary powers which are delegated by the sovereign, and thereby performs a *governmental function.* The favoritism, partiality, and exactions which the law was designed to prevent resulted in large measure from a general misapprehension of the nature of transportation and its vital relation to commercial and industrial progress. So far from being a private possession, it differs from every species of property and is in no sense a commodity. Its office is peculiar, for it is essentially public. The railroad, therefore, can rightfully do nothing which the State itself might not do if it performed this public service through its own agents instead of delegating it to corporations which it has created. The large shipper is entitled to no advantage over his smaller rival in respect of rates or accommodations, for the compensation exacted in every case should be measured by the same standard. To allow any exceptions to this fundamental rule is to subvert the principle upon which free institutions depend and substitute arbitrary caprice for equality of right.

I have felt constrained to quote so largely on this branch of the subject because there is a disposition in many quarters to minimize the obligations of the General Government and the States to control the railroads of the country; a disposition sometimes proceeding from a sense of self-sufficiency natural to the owners of great blocks of railway securities and frequently, I regret to state, from unconsciously interested feelings. But independently of judicial theory or philosophical argument this principle has received universal sanction ever since the invention of the steam railway in the most positive and practical manner possible. Wherever railways have been introduced governments have been found either regulating them with aggressive positiveness, constructing them in whole or in part with the public moneys and operating them for the common good, or, after their construction by private companies, taking them over through public statutes and paying the owners their value, and this whether the owners were willing for the transfer or not. A table showing the different countries and how many miles of railway are publicly and privately owned in each will demonstrate what I maintain. I have had prepared such a table, and it sets out the number of miles of railway in each country in private ownership and the number in public ownership, with summaries at the close of greater or less significance to the question.

*Miles of railway in the different countries of the world and how owned.*

| Countries. | Private ownership. | Public ownership. |
|---|---|---|
| | *Miles.* | *Miles.* |
| Argentina[a] | 12,000 | ..... |

[a] Government guaranty, subvention, lease—indicating the Government as the initiatory and responsible party.

[b] Lines revert to State under franchises of from thirty to fifty years.

[c] The contracts for the operation of the Italian State railway by private companies, which had been in force since 1885, were terminated by the State on June 30, 1905, and the Government resumed the management of its lines.

[d] The Mexican railways are divided into 5,890 broad gauge and the remainder a gauge of 3 feet and less. The Republic is now acquiring the former in order to promote national commerce and introduce orderly and equitable rates. (See Appendix C 4.)

[e] The only Panama railway, 47 miles in length, is now owned and operated by the United States, the stock of the private owners having been condemned under a recent act of Congress.

[f] In February, 1898, it was decided by a referendum (voting for, 384,382, and against, 176,511) that the railways should be acquired by the Republic.

Analyzing this table, we find that the countries considered are 64; those having publicly owned railroads are 59; those having privately owned railroads are 36. The number having publicly owned railroads exclusively is 29; the number having privately owned railroads exclusively is 5. Of course the table does not include the United States.

Treating Canada, the Australian and African colonies, which are popularly governed, as republics, we have the following distribution of railway ownership in relation to monarchical and republican forms of government: Number of republics having public ownership, 31; number of republics having private own-

ership, 12; number of monarchies having public ownership, 28; number of monarchies having private ownership, 17.

From what has been shown it sufficiently appears that the construction and ownership of railroads is really the business of governments and a function which some fifty-nine out of sixty-four governments have chosen to administer, either in whole or in part, themselves. And in this respect it appears to make no difference whether the form of the government be aristocratic or democratic. A large majority of both kinds of governments—three-fourths of the democracies and about two-thirds of the monarchies—own railroads.

THE CONSTITUTIONAL POWER TO ACQUIRE EXISTING RAILWAYS BY CONDEMNATION.

While with regard to the States it is true, as a general proposition, that this function of government (the construction, condemnation, and operation of railways) appertains to each of them—certainly as to intrastate railways—yet several State constitutions contain prohibitions upon the legislatures appropriating money for railroads or internal improvements. This circumstance would prevent such States from acquiring their railroads until their constitutions would be amended. The situation is different, however, with respect to the General Government. It has been affirmatively decided by the Supreme Court that under the post-road clause and its "plenary power to regulate interstate commerce" Congress has the power to "construct, establish, condemn, and maintain" national railroads from State to State.

In 1888 the case of California *v.* The Central Pacific Railroad Company (127 U. S., 156) was decided. It involved the validity of the old acts of Congress incorporating the Pacific roads. Judge Bradley, speaking for the whole court in that case, said:

The power to construct, or to authorize individuals or corporations to construct, national highways and bridges from State to State is essential to the complete control and regulation of interstate commerce. Without authority in Congress to establish and maintain such highways and bridges it would be without authority to regulate one of the most important adjuncts of commerce. This power in former times was exerted to a very limited extent, the Cumberland or National road being the most notable instance. * * * But since, in consequence of the expansion of the country, the multiplication of its products, and the invention of railroads and locomotion by steam, land transportation has so vastly increased, a sounder consideration of the subject has prevailed and led to the conclusion that Congress has plenary power over the whole subject. Of course, the power of Congress over the Territories and its power to grant franchises exercisable therein are and ever have been undoubted; but the wider power was very freely exercised, and much to the general satisfaction, in the creation of the vast system of railroads connecting the East and the Pacific, traversing States as well as Territories, and employing the agency of States as well as Federal corporations.

In 1892, in the case of Monongahela Navigation Company *v.* United States, the full court again said:

Notice to what the opposite view would lead: A railroad between Columbus, Ohio, and Harrisburg, Pa., is an interstate highway, created under franchises granted by the two States of Ohio and Pennsylvania, franchises not merely to construct, but to take tolls for the carrying of passengers and freight. *In its exercise of its supreme power to regulate commerce Congress may condemn and take that interstate highway, etc.* It may be suggested that the cases are not parallel in that in the present (a river) there is a natural highway, while in that suggested it is wholly artificial. But the power of Congress is not determined by the character of the highway. They are simply the means and instruments of commerce, and the power of Congress to regulate commerce carries with it power over all the means and instrumentalities by which commerce is carried on.

The Supreme Court made it unnecessary this very year to quote from other authorities to sustain the proposition. In the case of Wilson *v.* Shaw, in advance sheets of the opinion which was published on the 15th of the present month, the court cites the cases I have already quoted from, with a large number of others, and affirmatively declares that the principles they announce are the law of the land.

In Wilson *v.* Shaw, Wilson brought suit in the supreme court of the District of Columbia to restrain Shaw, as Secretary of the Treasury, from taking any step to effectuate the payment of the purchase money for the Panama Canal and Railroad as had been authorized by Congress. The case reached the Supreme Court of the United States, and the decision was rendered in the present month, Mr. Justice Brewer delivering the opinion for the full bench. I quote briefly from the opinion:

Again—

Mr. Justice Brewer says—

the plaintiff contends that the Government has no power to engage anywhere in the work of construction a railroad or canal. The decisions of this court are adverse to this contention.

And then the court quotes with approval the previous opinion of the court in California *v.* C. P. R. R. Co. that I have already read. The opinion continues:

These authorities recognize the power of Congress to construct interstate highways. * * * Plaintiff recognizing the force of these decisions seeks to obviate it by saying that the expressions were obiter dicta; but plainly they were not. They announce distinctly the opinions of the court on the questions presented and would have to be overruled if a different doctrine were now announced.

Monongahela Navigation Company *v.* United States, from which I have heretofore quoted, is one of the cases thus specifically and emphatically approved; and from the opinion in the latter case I requote a sentence for its terseness and direct application:

In its exercise of its supreme power to regulate commerce Congress may condemn and take that interstate highway, etc.

This was the court's view of the power of Congress over an interstate railway extending from Ohio into Pennsylvania. And this was not *obiter dicta* is declared by the court in its opinion (Wilson *v.* Shaw) that I have been discussing and that was so recently delivered.

UNITED STATES MAY CONDEMN RAILROAD FRANCHISES.

It is clear then that the power of Congress to order the condemnation of existing roads is full and complete. And the courts have gone further. They have conclusively decided that corporate franchises may be condemned and that proceedings for such an end wold not conflict with the doctrine of the inviolability of contracts. West River Bridge Co. *v.* Town of, etc. (6 Howard, U. S., 507). And what is of equal importance, of course after the right of the Government to condemn, own, and operate the railroads, is the fact that the Government need not wait on the slow process of condemnation proceedings, the determination of values, and the tender of compensation to bring the different roads into its possession and under its control. Congress may authorize an immediate possession of all or so many of the roads as it may conclude is desirable, by providing a remedy against the Government in behalf of the companies for their just compensation for the property and franchises the Government takes over. This was squarely before the Supreme Court in the case of Cherokee Nation *v.* Kansas Railway Company (135 U. S.). In its opinion the court says:

It is further suggested that the act of Congress violates the Constitution in that it does not provide for compensation to be made to the plaintiff before the defendant entered upon these lands for the purpose of constructing its road over them. This objection to the act can not be sustained. The Constitution provides that private property shall not be taken for public use without just compensation. It does not provide or require that compensation shall be actually paid in advance of the occupancy of the land to be taken. But the owner is entitled to reasonable, certain, and adequate provision for obtaining compensation before his occupancy is disturbed.

To provide this reasonable, certain, and adequate provision for securing compensation to the railway companies is the duty of Congress, and it should be provided in any measure that directs the taking over of the roads.

From these and the other cases I have cited it is clear that Congress has the constitutional power to acquire the railways by condemnation of the property and franchises, to maintain and operate them, and, pending the determination of what will be just compensation to be paid the owners, to take them over and subject them to the Government's will and control.

THE CONDEMNATION OF ROADS WHOLLY WITHIN A STATE.

The question whether it is in the power of Congress to condemn roads wholly within one of the States naturally arises. The power of Congress under the interstate-commerce clause of the Constitution "extends to all the instruments by which interstate commerce is carried on." In this sense there is not a single line of railway that does not exist for interstate commerce. Its charter and physical property may be local and wholly within the State, but its object is a participation in interstate commerce. It is accordingly "an instrument" of such commerce. But if any doubt exists as to the power of Congress to condemn roads wholly within a State under the general powers I have pointed out, together with the interstate-commerce clause of the Constitution, there is still the constitutional provision giving Congress the power "to establish post-roads and post-offices."

In the Kohl case I have already cited the Supreme Court held that this post-road and post-office power having been reposed in Congress, Congress could condemn land within the State for post-offices, and that the power of eminent domain appertained to any power or duty of the Government under the Constitution. In that case the Government proceeded to condemn a site for a post-office without resorting to the State courts, but directly through the agency of the Federal courts. In this connection the point to be noticed is this: There is no restriction whatever upon the power of Congress to establish post-roads. The power is granted in the same section with the same words that are used to empower Congress to "establish post-offices." The construction of the part of the clause that relates to post-roads must therefore be identical with the part that relates to post-offices. Congress may, under the express grant of power in the post-office and post-road clause of the Constitution, condemn and operate every intrastate road as a post-road and as an incident of that ownership associate them with interstate roads in moving the commerce and people of the country. Associating the power of Congress under the general one to own

and operate the railroads as public highways, and under the interstate-commerce clause and the post-road clause of the Constitution there is no room to question the right of the Government to condemn, purchase, and operate all railways within the United States, whether they are interstate or wholly intrastate railways.

HOW SHALL COMPENSATION BE MADE AND UPON WHAT BASIS?

I now come to two most interesting phases of the question: Upon what basis shall compensation be made and the method of valuation and the matter of securing the funds for payment for the roads.

As to "just compensation" I conclude that its legal definition includes payment for the market value of "franchises." A considerable moral argument might be made against this definition. However, the bill I introduced accepts the legal standard and adopts the market value criterion as the test of railway compensation. It is quite common in condemnation cases to admit evidence of the prices of surrounding land as evidence of the market value of the land in question. This principle of evidence has received final approval by the courts. But in the case of corporations which have issued bonds and stocks, would evidence of the value or price of the same upon the market be admissible in the fixing of compensation? This question, so relevant in this matter, has been before the courts. In the case of Mifflin Bridge Company *v.* Juniata County (144 Pa. St. Reports) the supreme court of Pennsylvania has decided this very point in the affirmative. This method also permits evidence of annual net profits for a series of years (five is the number suggested in the decisions) as some indication of the value of the corporate property.

Manifestly, the owners of the capital invested in the railroads are to be first considered, and the most approved means should be provided to secure to them the "just compensation" guaranteed by the fundamental law. Despite the extreme opinion often expressed because of overcapitalization and fictitious valuations, the capital invested in railways is among the most useful investments, and its owners are morally entitled to the same treatment accorded by the law to the owners of other property. This means that the stockholders, bondholders, etc., ought to receive the commercial or market value of their holdings. It is fortunate for such a large undertaking that the means for accurately and impartially determining the market value of the railroad properties are at hand and so easy of application that the cost of acquisition can be ascertained in advance, within 5 per cent of what should be paid. I mean by this that the value of any given railway may be found any day by computation based on the selling price of its stocks, bonds, and other debentures.

ACTUAL VALUE OF THE RAILROADS—HOW ASCERTAINED.

Two serious endeavors have been made by the Government to ascertain the actual value of the entire railroad system of the country, one by the Interstate Commerce Commission and the other by the Census Bureau. The former investigation was made at the request of the United States Senate, and its results are given in the report published as Senate Document No. 178, second session of the Fifty-eighth Congress. It was apparently a most painstaking investigation, and resulted in placing the market value of the roads at about $9,000,000,000. This was their ascertained value for the year 1900. The report of the Census Bureau was published in 1905. It was compiled mainly by Prof. H. C. Adams, and this indicated the market value in the year 1904 to be about $11,000,000,000. Let me read them to you:

*Comparative summary of ownership of railway stocks and bonds for the years ending June 30, 1905 to 1900—United States.*

| Item. | Amount outstanding. | Owned by railway corporations. | Not owned by railway corporations. |
|---|---|---|---|
| Stocks: | | | |
| 1905 | $6,554,557,051 | $2,070,052,108 | $4,484,504,943 |
| 1904 | 6,339,899,329 | 1,942,858,359 | 4,397,040,970 |
| 1903 | 6,155,559,032 | 1,798,323,208 | 4,357,235,824 |
| 1902 | 6,024,201,295 | 1,710,145,344 | 4,314,055,951 |
| 1901 | 5,806,566,204 | 1,736,667,211 | 4,069,898,993 |
| 1900 | 5,845,579,593 | 1,470,218,972 | 4,375,360,621 |
| Bonds: | | | |
| 1905 | 6,024,449,023 | 568,100,021 | 5,456,349,002 |
| 1904 | 5,746,898,983 | 558,472,242 | 5,188,426,741 |
| 1903 | 5,426,730,154 | 520,068,745 | 4,906,661,409 |
| 1902 | 5,213,421,911 | 498,373,449 | 4,715,048,462 |
| 1901 | 5,048,811,611 | 468,830,698 | 4,579,980,913 |
| 1900 | 4,900,626,823 | 472,831,377 | 4,427,795,446 |
| Total stocks and bonds: | | | |
| 1905 | 12,579,006,074 | 2,638,152,129 | 9,940,853,945 |
| 1904 | 12,086,798,312 | 2,501,330,601 | 9,585,467,711 |
| 1903 | 11,582,289,186 | 2,318,391,953 | 9,263,897,233 |
| 1902 | 11,237,623,206 | 2,208,518,793 | 9,029,104,413 |
| 1901 | 10,855,377,815 | 2,205,497,909 | 8,649,879,906 |
| 1900 | 10,746,206,416 | 1,943,050,349 | 8,803,156,067 |

Mr. NEWLANDS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Nevada?

Mr. PATTERSON. Certainly.

Mr. NEWLANDS. I wish to ask the Senator from Colorado whether that valuation was a valuation of the physical properties or whether it was simply an estimate of the value of those properties based upon the market value of the stocks and bonds?

Mr. PATTERSON. It was based upon the market value of the stocks and bonds, which I think is a reasonably safe way of estimating, but certainly the most favorable method for determining the real value of the properties and the franchises.

In reading these tables it will be observed that stocks and bonds of the companies are separated into two classes—those owned by the railway corporations and those not owned by the railway corporations. The significance of this division may not be apparent at first. But reflection will show their importance. For the stocks and bonds given as owned by the railway corporations are the railway securities of one railway company that are owned by another railway company, and the value of the securities so held and owned is represented in the value of the stock and bond issues of the holding companies and should be deducted from the aggregate value of the stock and bond issues of both companies. This would be necessary to avoid a duplication of values. This practice of intercorporate ownership of stock issues is sometimes carried to the third and fourth degree, so that if the separate issues are merely added together a quadruplication of values would result. The statistician of the Interstate Commerce Commission, from whose report for 1905 the table I have quoted is taken, has therefore properly deducted from his aggregate the gross amount of securities owned by the railways themselves. The real total of railway value, as nominally represented by the certificates of stocks and bonds outstanding against our railways is, then, the amount set forth under the headline, "Not owned by railway corporations."

THE TOTAL RAILWAY MILEAGE.

From the documents I have mentioned I find the following: That in 1905 the total mileage of railways in the United States was 216,973; that the market value of the railways in the same year was $9,940,853,945. If we add to this total the amount of current liabilities of the railways, which were at that time $1,221,252,027, we have a compensation to be paid so full and fair that the most ardent champions of justice to the corporations can not complain of it. I would supplement this statement with the suggestion that including the same elements of value as in the computation of "just compensation" in the year 1905, the "just compensation" in 1900 would have been $9,163,170,382.

In view of the general misapprehension as to the commercial or marketable value of our railways it will not be amiss to call attention at this point to the Census Bureau table (Bulletin No. 21), which gives the commercial or market value of the roads by States, the number of miles of single track, the average value per mile, the value placed upon the roads for taxation purposes, and ratio of their assessed taxable value.

*Table, by States, etc., of mileage and commercial and taxed value of the railroads.*

| State, Territory, or District. | Commercial value. | Number of miles of single track. | Average value per mile. | Assessed for taxation. | Ratio of assessment to commercial value. |
|---|---|---|---|---|---|
| | | | | | *Per cent.* |
| United States | $11,244,852,000 | 213,932.13 | $52,600 | ..... | ..... |
| Alabama | 150,211,000 | 4,669.35 | 32,200 | $53,926,026 | 35.9 |
| Arkansas | 124,626,000 | 4,126.44 | 30,200 | 34,709,623 | 27.8 |
| California | 350,694,000 | 6,262.54 | 56,000 | 92,378,550 | 26.3 |
| Colorado | 198,261,000 | 4,976.24 | 39,800 | 49,492,135 | 25.0 |
| Connecticut | 105,369,000 | 1,017.72 | 103,500 | 120,493,648 | 114.4 |
| Delaware | 17,285,000 | 335.93 | 51,500 | ..... | ..... |
| Florida | 80,467,000 | 3,555.84 | 22,600 | 21,817,478 | 27.1 |
| Georgia | 156,603,000 | 6,304.72 | 24,800 | 63,105,810 | 40.3 |
| Idaho | 91,877,000 | 1,461.53 | 62,900 | 10,115,378 | 11.0 |
| Illinois | 805,057,000 | 11,622.74 | 69,300 | 425,709,055 | 63.8 |
| Indiana | 375,541,000 | 6,917.85 | 54,300 | 165,863,367 | 44.2 |
| Iowa | 344,847,000 | 9,859.23 | 35,000 | 57,535,160 | 16.7 |
| Kansas | 356,356,000 | 8,811.43 | 40,400 | 60,093,534 | 16.9 |
| Kentucky | 155,772,000 | 3,253.00 | 47,900 | 77,658,040 | 49.9 |
| Louisiana | 123,401,000 | 3,898.74 | 31,600 | 29,044,195 | 28.9 |
| Maine | 80,146,000 | 2,021.58 | 39,600 | ..... | ..... |
| Maryland | 132,342,000 | 1,421.10 | 93,100 | ..... | ..... |
| Massachusetts | 250,052,000 | 2,118.75 | 118,000 | ..... | ..... |
| Michigan | 277,597,000 | 8,660.29 | 32,100 | 196,795,000 | 70.9 |
| Minnesota | 466,734,000 | 7,811.04 | 59,800 | ..... | ..... |
| Mississippi | 107,884,000 | 3,480.25 | 31,000 | 29,847,640 | 27.7 |
| Missouri | 309,768,000 | 7,711.05 | 40,200 | 97,916,869 | 31.6 |
| Montana | 196,209,000 | 3,267.10 | 60,100 | 36,759,827 | 18.7 |

HOW THE RAILROADS CUT DOWN VALUE OF THEIR ROADS WHEN LISTED FOR TAXATION.

But this table is well worth careful study. It not only gives the facts I have before mentioned, but it serves to show the effectiveness of railroad influence over local public officials and the special favors it is able to secure from them, for in many of the States the value fixed upon railroad property for taxation purposes is less than 20 per cent of the market value of the property. In Idaho, for example, it is but 11 per cent; in Nebraska, but 19.5 per cent; in Wyoming, but 7.5 per cent; in Oklahoma, but 15.2 per cent; in Washington, but 14.3 per cent; in North Dakota, but 18 per cent; in Colorado, but 35 per cent; in New York, but 25.6 per cent, and in Iowa, but 16 per cent.

HOW THE PURCHASE OF THE ROADS MAY BE FINANCED.

The question that next arises, and one that has presented the greatest obstacle to many who on principle favor Government ownership, is the feasibility of financing so stupendous an undertaking. Eleven or twelve billions of dollars is no inconsiderable sum for even as great and prosperous a nation as the United States. But much of the difficulties will disappear if, primarily, it shall be kept in the mind that the operation is not one that requires the raising of eleven or twelve billions of new capital, but that it, in the main, but involves a substitution or exchange of securities. It may be safely estimated that eight or nine tenths of the holders of railway securities will really welcome the substitution of bonds issued by the Government and secured not only by the national faith, but, in effect, by a mortgage upon the railroads and a pledge of their net revenues to pay them off, principal and interest. Indeed, pretty nearly a necessity would exist compelling these holders to take the bonds, arising from the very great difficulty that would be found in seeking satisfactory investments for the money the Government would otherwise pay. A mortgage of the railways, backed by the guaranty of the Government to the new bondholders, would furnish an element of security for the bonds that no other form of debentures, public or private, would possess. With the element of prompt payment certain in the highest degree, the exchange of railway securities at the price levied by the appraisers of the railway property for a like amount of these new Government bonds would possess a charm that few of the great holders of railway securities could resist. But quite independently of the suggested exchange, should the money be necessary the security offered by such Government bonds would make them the very best securities in which to invest that could be placed upon the market. Then what rate of interest should such bonds draw to give them the element of preference I have suggested? If a rate of interest can be set that would secure a permanently stationary condition at par, the transaction would be an ideal one; but as such an achievement is impossible as to any form of security, it remains to determine the rate of interest that would secure absolute justice to the railways at the time of their acquisition.

It will be claimed that to increase the public debt the amount necessary to take over the railways would lessen the value of the bonds unless a far higher rate of interest than the present average Government rate was to be paid. But I submit that such can not be the case. In view of the proposition to treat the railways as mortgaged to the new bondholders it is inaccurate to consider the bonds as an incumbrance upon the national credit or as a real addition to the national debt. The pledge to the holders of our outstanding Government bonds are the revenues of the country. The pledge to the holders of the new bonds would be the net revenues derived from the operation by the Government of the railways, plus the surplus Government revenues, should there ever be deficiency in the former. The per capita debt of Great Britain—nearly $4,000,000,000—is $92.64. The per capita debt of France, including obligations for railways it has taken over—nearly $6,000,000,000—is $150. The per capita debt of the United States—$1,000,000,000 of debt—is but $11.91. Should we add to this debt the entire cost to the Government of the railways—$11,000,000,000—it would make the per capita debt of the United States but $128. Yet Great Britain's bonds bear 2½ per cent interest, and France's, 3 per cent. Does it not follow that 3 per cent interest upon the new issue of bonds would sell them readily at par? Indeed they would likely command a slight premium. I deduce, therefore, that these bonds should bear interest at 3 per cent. France, with a per capita debt of $150, borrows money at 3 per cent, and Great Britain, with a per capita debt of $90, borrows it at from 2½ to 2¾ per cent. Why, then, should not a per capita debt of the United States of but $128 float the bonds that represent it and that draw 3 per cent readily at par? And would not 3 per cent bonds, guaranteed, as would be the railway-purchase bonds, prove an irrestible attraction not only to the present holders of railway securities, but to uninvested capital the world over?

Mr. NEWLANDS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Nevada?

Mr. PATTERSON. For a question.

Mr. NEWLANDS. I should like to ask the Senator whether it would not add to the simplicity of the plan which he presents if, instead of immediately taking over the bonds, which aggregate about $6,000,000,000, the Government should take over only the stocks, which would involve an expenditure of only $5,000,000,000, leaving the bond issues to be retired later on as they mature by new bonds at lower rates of interest?

Mr. PATTERSON. That is a mere matter of detail, and would be simply the exercise of a sound judgment as to which plan should be pursued. So far as I am concerned, I am not a stickler for any particular method. I have simply endeavored to demonstrate that the financing of the scheme to take over all of the railroads of the country is entirely feasible, and that it would not embarrass the financial affairs of the Government or the business of the people in the slightest degree in so doing.

GOVERNMENT OWNERSHIP WOULD NOT RESULT IN A POLITICAL MACHINE.

I think I have demonstrated that there would be no difficulty in financing the taking over of the American railways. Let us suppose the American mind is ready to require the step to be taken. To very many the greatest obstacles arise when it has been accomplished, for these profess to believe that railway employees would be organized into an immense political machine, and that either party, once in power, would by its aid manage to remain perpetually in power. I see no such danger. Quite independently of every other consideration, when the American people make up their minds that railway ownership must come they will also have made up their minds that the railways shall be operated for the people and not for any political party, and when the people really make up their minds that certain things shall be such things are brought about and they continue as the people want them. It is absolutely certain that in the organization of the machinery to conduct the vast public work of operating the railroads the people would see that the plan of organization was for their benefit and not to make the railroads an annex to a political party.

In the bill I introduced the scheme of such an organization is outlined. It was so outlined not as the perfection of organization for such a purpose, but to show how readily Congress could provide an organization from which the political element was eliminated, so as to be a mere negligible quantity and to effectuate the ends that would be sought by the people.

PROPOSED ORGANIZATION AND DISTRIBUTION OF POWERS.

Having considered the means essential for acquiring the railways, I now take up the organization that would be proper for their operation under national auspices. Of course, what I suggest is tentative—only the suggestion of a plan that I believe would prove effective, both for the satisfactory operation of the roads and to prevent their prostitution to political ends.

Let it be premised, however, that at the beginning no radical change should take place. The rates, rate making, fiscal, legal,

and operating departments would continue until gradually supplanted by more efficient successors. It might be impracticable and unwise to start a complete system of novelties, however sound in themselves, until the old servitors had been thoroughly initiated into their meaning and practice. Thus the classification, passenger, express, postal, and freight rates then existing might continue until ordered changed by the division having power over these subjects; and, in like manner, official duties, regulations, and hours of labor would remain the same as before, subject to alteration by the division of transportation.

It is provided in the bill that the entire power to determine rates and classification be reposed in the Interstate Commerce Commission. This embraces the fixing of express charges, the charge for carrying the mails, passenger rates, and the freight tariffs and classification for the whole country. This Commission, composed of seven members, is perhaps the best informed combination of men in the world on this subject, and has enjoyed a continuous experience with it for nearly twenty years. While there are now multitudinous and confusing classifications of freight, where it is conceived one would suffice, and a hundred thousand different rate schedules filed each year, when it is believed a simple system might be substituted covering the country, yet it is not expected that the Commission will proceed in a hurry to amend all these. Time and great care will be required so as not to jeopardize important interests, and this prudence the Commission may be relied upon to realize.

The establishment of the zone idea, as adopted in other countries, will in all probability be the ultimate method of dealing with the freight and passenger traffic. And this zone order of things already exists in embryo to some extent in relation to our freight traffic.

This commission would continue to be selected as now, at a salary increased in proportion to the increased importance of its duties. The commission should be given exclusive jurisdiction to determine rates, but with the command imposed that rates shall be equal to all persons and places under similar circumstances and against rebates, preferences, and discriminations.

DIVISION OF TRANSPORTATION.

Then there should be established a division of transportation, to which should be consigned the actual operation of the railways, the formulation of rules for administration, to fix wages, assign duties, and adopt plans for the selection of employees, and for all other regulations defining the relations of servants in the organization.

The country might be divided geographically into ten or more groups of States, and the division of transportation should consist of one director from each of the groups, with a chief director selected at large. All should be citizens who had not less than ten years' experience in practical railway superintendence. The first set of directors would be appointed by the President, by and with the advice and consent of the Senate, and the tenure of office should be as many years as there are groups of States. If ten groups, for ten years; if twelve, then for twelve years. Of the first board the term of one director should expire in one year, and of another in two years, and another in three, and so on throughout the list. This would provide for but one new member of the board each year, so that its personnel could not be assailed with each recurring administration nor revolutionized in any one administration. And the successors should all be appointed from a superior efficiency list to be provided by the directory from among those in the service, the standard of efficiency being supplied by the directory. A merit system with provisions for preserving the record of each employee might be established; promotions to be given to those having the best record. The directory should be equally divided between the two political parties, and the terms should be so arranged as that the expiration of the terms would alternate between the members of the two parties. With some such organization and regulations and with additional proper civil-service rules the administration of the railroads would be altogether eliminated from political influences and the army of employees be left free to vote according to their party affiliations. The plan suggested would not interfere with the functions of Congress. Its duties are not administrative. In fact, so large, so differently composed, and so multifariously employed is Congress that it could not, in the nature of things, be considered in the light of an administrative body. Its functions are legislative, and not administrative.

THE REFORMS THAT WOULD FOLLOW.

Mr. President, unless government ownership of railroads and efficient management is to result in substantial benefits to the country, the change would be useless. I need not say that the advocates of the change maintain that it would vastly improve the moral tone of the nation by eliminating the subterfuge, the frauds, and gross injustice now almost universally associated with the railroad business. It would result in economies so great that freight rates should be largely reduced and passenger rates be substantially cut in two. It would permit the enlargement and extension and, in certain classes of postal matters, the great cheapening of the postal service, while it would eliminate that hobgoblin of a postal deficiency always invoked to balk the efforts of those who stand for advanced postal reform. It would secure a system of postal express with reduced rates, based upon the different distances. It would provide for the safety of the traveling millions of the country, as well as for those who operate the trains, the speedy adoption of every approved safety appliance to cars, engines, tracks, and yards, and the best systems for the prevention of collisions between trains in movement. Grade crossings would be abolished and overhead or tunnel crossings of every public highway adopted in their stead. It would result in a pension system that would keep the wolf of want from the doors of faithful employees when they reached the pension age; it would bring about laws under which those injured by accident in service and the surviving dependents of those who might be killed would be compensated upon a just and scientific basis. The construction of new lines in the past has from necessity been sporadic—the motives for construction being wholly private—which has led to duplication and triplication of lines, affording some points and sections accommodations far beyond their needs while others were left without railroads at all adequate for their wants. This want of system in construction, so fraught with favoritism and injustice, would be replaced with provisions for line construction and extension at once just and adequate. It would insure efficiency in service, an adequate supply of cars and motive power; it would render almost impossible the national blockade of traffic that this present winter tied up so much of the vital business of the country and brought extreme want and suffering, especially to the inhabitants of the Northwest, where the railroads abandoned the people to the frightful cold of the blizzards and left them without sufficient fuel and other necessities of life.

We would have the substitution of stable capital, represented by Government bonds, in the place of private and precarious securites, the issues of which resemble more the marked cards of the gambling table than safe investments of the country's capital.

There would follow the eradication from our public life of railway politics and the reestablishment of that equilibrium of power between the States, the Government, and their peoples which obtained in the early history of the country, restoring to both State and national agencies of government their constitution's supremacy in the regulation of the public relations of our citizens.

Nearly all the above results have attended the public ownership of railways in Belgium, Austria, Germany, and the Australasian colonies, and with the conceded superior efficiency of the American worker are, I believe, certain to follow the introduction of that method of ownership here.

WHY REGULATION OF RAILWAYS MUST PROVE A FAILURE.

Mr. President, I suggested when I commenced my remarks that I would point out why the legislation of last session amendatory of the interstate-commerce act must prove a grave disappointment to the people. On the one hand, while the Committee on Interstate Commerce was taking testimony in the recess before the last session convened, the consensus of railway opinion was that the amendments proposed would result in serious loss of revenues to the companies, a great depreciation in their securities, and, finally, by sympathetic process, affright investors at large, with consequences of general business depression. The markets since the law went into effect have dispersed these expressed fears, and railway securities sell as well now or better than before the passage of the act. On the other hand, the people at large were somehow or other led to expect that with the law upon the statute books the country would possess a complete scheme of relief from the evils they had been enduring, and that the Government would be found at every depot insuring them just rates and the necessary accommodations. This, too, has proved to be a delusion, and it is impossible that it should have proved otherwise. That these expectations are and must continue groundless under prevailing conditions can readily be made apparent. I will epitomize some practical demonstrations of this that have been suggested by a friend from Maryland.

A shipment of freight—

He writes—

consigned from Cumberland, Md., to Tyrone, Pa., must traverse the railways of three different companies, the Western Maryland, the Penn-

sylvania Railroad, the Huntington and Broadtop, in a journey of 100 miles on a noncompetitive route. Let it be premised now that the Government, when called upon by a complaining shipper to "regulate" the rate complained of, can not do it as it pleases, but can fix only that rate which will yield a fair return to each of the three companies after paying the cost of transport, taxes, etc. Now, it being required to know what a just rate is, we must ask and answer the following questions: What is the character of the goods to be shipped with regard to hazard of travel? To what class shall it be consigned? The number of miles in each road? What is the value of each road traversed? What did it cost each road to haul the shipment? What proportion is the latter to the cost of the whole operation of the road? What proportion of the whole rate should be paid to each road? What is a fair return on the capital invested in each road? What was the actual amount invested by each road? What are the proper terminal charges at points of consignment and destination? What sum must be allowed for depreciation of railway property? Perhaps as many other equally pertinent questions can be added, but it is not too much to say that it would take three months' litigation in a contested case to answer the above questions and when answered the verdict would be so far from accurate that either the shipper or the railways would be wronged.

Now, furniture is but the representative of *one* class, and there are eight subclasses. When the above questions have been investigated for that class they would still have to be gone over again for each other class. And when conclusions as to rates between Cumberland and Tyrone had been reached sufficiently obvious to pass the courts, would the problem be solved? On the contrary, the whole United States would remain open for like litigation. There are rates, just or unjust, on every article of commerce between every shipping point reached by the railways to and from and every other railway point. Taking Cumberland for the point of consignment, the Government may be called upon to regulate rates on the different classes over even more connecting railways to every other railway station outside of Maryland. And when this task were accomplished, a task impossible to execute in detail, the work would have just begun. The shipper from each other town and village might demand the enumeration of a list of rates to every other freight station in the Union—as President Stickney said, "four and a half billion rates," a system of tariffs requiring omniscience to formulate and nothing less than omnipotence to enforce.

It is not meant that the above condition is actually before us. What is meant is that the full theory of government regulation of the rates exacted by private railway companies involves such a process by the Interstate Commerce Commission subject to reexamination and approval by two successive appellate courts. The common notion that the Government will or can insure the shipper a reasonable rate must be treated as erroneous. Indeed, it may be safely asserted that no considerable proportion of railway rates are accurately investigable under any methods known to the law, since there is no *general basis* applicable to the diverse rights and interests entitled to "due process of law" under the present conflicting ownerships.

HOW GOVERNMENT OWNERSHIP WOULD SIMPLIFY RATE MAKING.

Mr. President, take the converse of this under government or unified ownership. That impediments to the speedy and permanent settlement of rates would vanish is the corrollary of unified ownership.

To illustrate this I quote from a recent work of Professor Parsons, of Boston. Discussing the rate systems employed in Germany under government ownership, he says:

> The basic tariff is contained in a small pamphlet less than an eighth of an inch thick—in fact, the gist of it all, for both express and freight, is in two or three pages. The essence of the tariff system could be printed on one page of this book, and after a five minutes' explanation you could find for yourself the Prussian rate on any ordinary shipment either by freight or express. Cost of service, distance, the zone principle and tapering rates, the flow of traffic, utilization of car space, market conditions, what the traffic will bear, are all considered in making rates. The same general elements enter into the problem as in the case of private railways, which also have to consider cost, distance, market conditions, what the traffic will bear, etc., but the state railways deal with these elements in the light of the public interest, and come to their conclusions on that basis, while the companies consider the question in the light of their own profit and decide upon that basis.

NEED NOT PREVENT PRIVATE RAILROAD CONSTRUCTION.

It must not be understood that, Mr. President, government ownership of the roads would necessarily put a stop to railroad construction by private capital under public authority. The bill I introduced provides for private initiative and permits corporations to construct new lines that may connect with the Government system upon such terms as may be agreed upon, the directory reserving the right after a stated period to acquire the road at the cost of construction with a fair interest upon the capital invested. I believe that this authority would result in road building where the Government might not be willing to immediately venture. In any event it permits the play of the two systems—public and private—the Government, however, always maintaining over the private lines its right to take them over.

FOUR NATIONAL RECRUITS TO GOVERNMENT OWNERSHIP.

Mr. President, in this, as in every other great reform, there is a constant movement; but the changes are all from private to public ownership of the roads. Since the reform was undertaken there has been no backward movement in any part of the world. National recruits to the ranks of government ownership are constantly arriving. Within the past five years Switzerland, Mexico, Italy, and Japan have joined the public-ownership ranks. These countries found the evils with which we are contending unendurable, though their regulatory control of the railroads was much more stringent than any we have adopted. Yet they would no longer submit to the evils the private-ownership system imposed. They had tried every means to overcome them and to materially mitigate them; but finding their efforts foiled by the companies, they applied the supreme remedy. It required courage and steadfastness in those countries to carry the reform. Have the people of the United States less courage and less steadfastness than those of the countries that so recently threw off the yoke of railroad bondage?

Mr. President, the literature upon this subject is informing the country with its swelling volume. Intuitively now the patrons of railways turn to public ownership as their relief from the burdens that private ownership imposes upon them. Magazines, weekly papers, and the daily press find that their readers want to learn about it, and to satisfy them a considerable space of their publications must be devoted to its discussion. Whoever has his interest aroused may find in any public library works going into the details of every feature of railway service and public ownership—this in addition to the educational features of current periodical literature. Therefore there is no need for me to occupy time in giving greater details. I have contented myself with a presentation of the fundamentals of the question, making them, I hope, clear to the average mind. If I have accomplished this even measurably, I am content with the results accomplished.

Mr. President, until public ownership comes the country must expect and submit to unjust rates and to favoritism and extortions in connection with the country's transportation. Private ownership now amounts to a monopoly in private hands of all the highways of commerce, a monopoly that absorbs an unjust proportion of the country's wealth. Injustice to shippers and communities is inherent in private railway management and the most stringent laws for remedying the evils must necessarily fail in accomplishment of any but minor results. Here and there some relief will be afforded, but the great and growing body of the evil will continue and increase. Overcapitalization, the watering of stocks, and manipulation of the markets which swell the capitalization upon which the people must pay the dividends and interest will remain a manacle upon the limbs of commerce. Government by and for the railroads will flourish throughout the land, and what was said by Wendell Phillips years ago is as true now as it was when it was spoken: "The railroad magnate goes through the country with three hundred millions at his back and every legislature in his path gets down on its knees before him." The power of these railway potentates has not diminished with the passing of the independent railroad and the consolidation of all the lines under half a dozen managements with these managements combining to thwart the Government and mold it to their ambitions. Wherever you go, whether to the national capital or to the capitals of the States, there you find powerful railway lobbies binding those elected to serve the people to the railroads' will. California is held in the grip of the Southern Pacific, Kansas submits to the Santa Fe, most of the New England States bow to the Boston and Maine and the New York, New Haven and Hartford, while New York—the great Empire State—asks the New York Central what may be its pleasure. Now and then, by mighty effort, a State temporarily escapes from the railroad yoke, but after a while the railroads pad the yoke though the law of the yoke may remain untouched. These mighty combinations throw their black shadows over every important political convention; they put their guardians in governor's offices and in every legislature; they pollute the Halls of Congress and the public believe they turn many who were elected to serve the public from their duty to their country with the clenched fist and the seductive bribe. This deadening influence extends from the top to the bottom of our political system. Now and then the people of the States elect a Cummins, a Boies, a Van Zant, or a Folk, and the people of the country sometimes elect a Roosevelt. But as a rule even these popular victories do not permanently loosen the railroad grip. The people sleep, but the railroads never. Created ostensibly to serve the people, they hold the people as their enemies and are forever plotting to circumvent and subdue them.

Mr. President, the Government ownership and management of railways carries with it, in my humble opinion, great and broad commercial and moral reforms. The people's ideal of government and governmental duty and responsibility will be immeasurably heightened with its adoption. A free people always advance in moral stature as their duties multiply and their responsibilities broaden. Devolve upon such people in this intensely material age the obligations through the Government

to manage and control the vast system of railways over which the country's products must be transported, an operation that affects the people in every phase of their worldly activities, and the strength, the courage, and the thought of the people are deepened and broadened, while it inspires them with a better and more patriotic citizenship. But the moral fiber of the people will not alone be strengthened—there will come a material improvement that will add substantially to the worldly possessions of the masses. One of the chief agencies through which the immense fortunes that threaten the country will be eradicated and much more of the proceeds of the toil of the workers will reward their industry and add pleasure to their labors. The Government may then truly develop into one of the people, by the people, and for the people; for the vast power and wealth of the railroad corporations will be withdrawn from the political field and the people will have disposed of one of the greatest and by far the most powerful of the enemies to free government that are unceasingly at work undermining our free popular institutions.

Mr. President, there is no mistaking the trend of the popular mind toward the great reform. The experiences of every other country with government ownership of railroads is a preachment in its behalf; the very highest economic authorities support it; the tides of civilization are moving and bearing it upon its crest. It is the bridge over which strife and oppression and danger to our free institutions will cross from our country into outer darkness and upon which cooperation, harmony, and greater material prosperity will enter. Speaking for myself, Mr. President, I will welcome the day when government ownership of the railroads becomes an accomplished fact, believing, as I do, that it will prove to be one of the chief foundation stones of our governmental superstructure, upon which greater and more widely distributed wealth, a higher civilization, and better American patriotism will safely rest.

## APPENDIX.

*Comparative summary of passenger and freight service for the years ending June 30, 1905 and 1901.*

[Interstate Commerce Commission Report.]

### ECONOMIES CONSEQUENT UPON UNIFIED OWNERSHIP.

[By David J. Lewis, esq., of Cumberland, Md.]

A casual view of the operations of our railways under private auspices brings to light conditions replete with economic waste. In the passenger service the late John K. Cowen, president of the Baltimore and Ohio Railroad Company, when speaking of the advantages to the railways of a pooling bill, instanced the traffic between Cincinnati and Columbus. He stated that between these cities three companies each ran six trains a day each way, or nominally thirty-six trains in all; that if the roads were allowed to pool the thirty-six trains could be reduced to eighteen, and running them at different hours the accommodation to the public would be really doubled. The same waste is observed in the freight traffic, in the circuitous routing of *freight* consequent upon competitive hauling. Professor Ripley, of Harvard, in his book Railway Problems, gives the following as a few of the instances of freight being hauled on the longest instead of over the shortest routes.

Chicago to San Francisco, via New Orleans.
San Francisco to Omaha, via Winnipeg.
One hundred all-rail lines between New York and New Orleans. Shortest route, 1,340 miles; longest, via New Haven, Ind., 2,051 miles.
Chicago to Sioux City, Iowa, via St. Paul.
Chicago to Fort Dodge, Kans., via Des Moines, Iowa.
Chicago to Springfield, Ill., via St. Louis.
Rochester to St. Louis to Minneapolis to California, via New York City.
New York to Salt Lake City, via San Francisco.
Chicago to San Francisco, via Shanghai, China.
Liverpool to New York City, via Montreal and Chicago.
From Illinois to California, via Canada.
From Illinois to New Jersey, via Canada.
From Illinois to Pennsylvania, via Canada.
From Kentucky to Pennsylvania, via Canada.
From Kentucky to New York, via Canada.
From Missouri to Pennsylvania, via Canada.
From Pennsylvania to Missouri, via Canada.
From New York to Kentucky, via Canada.
From New York to Missouri, via Canada.
From New York to Tennessee, via Canada.
From Ohio to Pennsylvania, via Canada.
From Pennsylvania to Ohio, via Canada.
From Ohio to New York, via Canada.
From New York to Ohio, via Canada.

And President Ramsey, of the Wabash, stated before Senate committee that as much as 57 per cent of the traffic between Pittsburg and Philadelphia might be made take a 700-mile roundabout haul.

Besides the above, the necessity for the expenditure of numerous other items would pass away with private ownership, notably the pass system, under which probably 15 per cent of the passenger traffic of 1905 was carried. C. P. Huntington stated before the United States Industrial Commission that the local wastes of New York City alone amounted to a hundred millions in a year; and English railway authorities, such as the secretary of the London and Northwestern Railway, the Lancashire and Yorkshire, and Sir Edwin Chadwick, have estimated the wastes in the country at 24 per cent, although in England there is relatively little competition as compared with the United States.

Professor Newcomb, then editor of the Railway World, in view of these conditions, was led to say:

"The economic advantages of absolute unification are so great that it may be expected that the movement will not cease until unification has been completely accomplished."

Coldly regarding the subject and with no disposition to magnify figures, the following are submitted as economies easily practicable under a single national ownership:

| | |
|---|---|
| Switching charges balance | $4, 201, 050 |
| Car per diem and mileage balance | 18, 835, 325 |
| Hire of equipment balance | 3, 040, 641 |
| Advertising | 5, 959, 380 |
| Outside agencies | 19, 688, 261 |

| Add interest saved on capital | 226, 151, 322 |
| Abolition passes (1905) | 50, 000, 000 |
| Reduction 24 per cent, conducting transportation | 185, 104, 879 |
| Total | 548, 420, 099 |

COMPARATIVE FREIGHT RATES IN GERMANY AND THE UNITED STATES.

[Professor Parsons.]

German rates are much lower than those of England or France, and though our average ton-mile rate is below the German, actual rates for similar services are for the most part lower in Germany than with us. For example, take the statement of Hon. Charles A. Prouty, of the Interstate Commerce Commission, comparing rates from his home town, Newport, Vt., to Boston, with rates for the same distance in Prussia, and also in Iowa, where rates are very low for this country.

*Rates in cents per 100 pounds.*

| | Newport, Vt., to Boston. | Iowa rate for same distance. | German rate. |
|---|---|---|---|
| Potatoes | 19 | 12½ | 9.5 |
| Hay | 17 | 11 | 10.5 |
| Butter | 46 | 26 | 36 |
| Sugar | 19 | 17 | 10.9 |
| Lumber | 10½ | 9½ | 6.4 |
| Fertilizers | 17 | 9½ | 8 |

Commissioner Prouty further says: "Last summer a company in which I was interested had occasion to transport considerable quantities of copper wire from Phillipsdale, R. I., to Bradford, Vt., and of dynamos and transformers from Pittsfield, Mass., to the same destination. We paid in less than carloads from Phillipsdale 32 cents per hundred pounds. The corresponding rates in Prussia are 11.08 and 15 cents."

The local rates in America are frequently several hundred per cent above the German charges for the same distance. For example, the rate on dry goods from Springfield, Mass., to Wastfield, Mass., is $1.70 a ton, or 22.4 cents per ton-mile. The Prussian rates for the same distance would be 48 cents, or 6 cents a ton-mile.

Even in populous districts and along lines of water competition, where local rates should be low, if anywhere, our ordinary rates are several times the corresponding Prussian rates. The following table illustrates the situation, by comparing our local rates on dry goods or other first-class freight in small lots with the German figures:

*L. C. L. rates, in cents, per ton-mile.*

| | Miles. | Ton-mile rate on dry goods. | Prussian ton-mile rate for same distance. |
|---|---|---|---|
| Providence to Fall River | 18.0 | 15.0 | 5.0 |
| New London to Norwich | 15.5 | 18.0 | 5.1 |
| Springfield to Westfield | 8.0 | 22.4 | 6.25 |
| Harrisville to Central Falls, R. I | 24.0 | 15.0 | 4.5 |
| Blackstone to Dedham, Mass | 30.0 | 14.0 | 4.4 |

The Prussian local rates, less than a third of ours, apply without distinction of locality to towns in the interior as well as to towns along the waterways. Our through rates are higher than they were sixty-five years ago. We may well wonder whether the local rates have fallen any whatever in the same sixty-five years.

German railway commissioners recently in this country, after studying our rates, declared that they were in many cases four or five times as high as the German rates on the same goods for the same distances. No existing differences in wages or legitimate traffic conditions are sufficient to explain such differences in rates.

The average passenger rate in Prussia is 0.98 of a cent per mile, against 2.02 cents in the United States. The average merchandise rate in Prussia is 1.36 cents per ton-mile, against 0.78 of a cent in this country. But the American rate does not include express, which pays very high rates, while the German rate does include express. It also includes large amounts of traffic which in this country is handled by fast freight and private car lines, the earnings of which are not included in the reported railroad revenues. The American rate is cut down by including large amounts of freight carried for the companies themselves, for which no charge is made, while the German figure includes only freight actually paid for. The German roads carry an immense amount of mail and packages for the parcels post, for which they get no pay, while American roads receive large sums for carrying the mails, and the packages for the most part go by express with us. The proportion of bulky, heavy, low-rate freight such as coal, iron, ore, timber, etc., is very much larger here (where coal alone constitutes one-third of the total tonnage) than in Europe, where the bulk of such traffic is carried by water. The average haul in Germany is 78 miles, against 244 miles in the United States, over three times the German haul, and this cuts down the average mile rate tremendously, so that on two roads run with equal efficiency and charging the same rates for equal service involving the same amount of labor and capital the road with the long average haul will show a much lower ton-mile rate. Our low ton-mile rate is partly due to carriage on circuitous routes and other unnecessary competitive transportation, representing a waste of industrial force. And, worse yet, our average tells the story of the special rates and secret concessions to favored shippers. Our ton-mile rate does not represent the rates the public has to pay, but it is brought below the actual rate level by the rebates and concessions granted the trusts and combines and other big shippers. The German average represents the rates that all the people pay.

Making allowance for express and mail, company freight and private car line traffic, the German commissioners conclude that a proper figure for our average freight rate would be 1.44 cents per ton-mile, while the figure for the Prussian roads would be 0.95 of a cent.

*Average ton-mile and passenger-mile rates (in cents).*

A CENT A MILE PASSENGER RATE—THE ZONE SYSTEM.

[David J. Lewis.]

The United States is the only country in the world where the railways charge as much to haul a passenger a mile as they do to haul a ton of freight a mile; and here they charge on the average three times as much for the passenger mile as they do for the freight mile. In the freight traffic three elements of competition have been at work on the freight rate: (a) Competition between railways between the same points, (b) competition with waterways, (c) competition between producing centers. Thus, before the formation of the anthracite coal trust, different coal fields producing anthracite competed through their carrying railways in the different markets. And even now the cotton and grain of America must compete with the like products of India and Egypt in London and other European markets, and the American railways must make the low rate for export traffic necessary to keep these markets. But the two last elements (b, c) of competition never have applied to the passenger traffic, and as to competition between parallel railways, that has ceased long ago. The net result has been that although the average freight rate of 1867 and the average passenger rate were the same the freight rate has been reduced more than 50 per cent while the passenger rate has been raised slightly.

The different operation of commercial forces as to these two lines of traffic during the last forty years is seen in a table taken from the work of Professor Weyl, of the University of Pennsylvania:

*Decline of passenger fares.*

| Year. | Revenue from freight per ton-mile. | Revenue per ton-mile in per cent of 1867. | Revenue from passengers per mile. | Revenue per passenger mile in per cent of 1867. |
|---|---|---|---|---|
| | *Cents.* | *Per cent.* | *Cents.* | *Per cent.* |
| 1867 | 1.925 | 100.0 | 1.994 | 100.0 |
| 1872 | 1.846 | 95.9 | 2.521 | 126.4 |
| 1877 | 1.286 | 66.9 | 2.458 | 123.3 |
| 1882 | 1.102 | 57.2 | 2.391 | 119.9 |
| 1887 | .984 | 51.1 | 2.245 | 112.6 |
| 1892 | .898 | 46.7 | 2.126 | 106.6 |
| 1896 | .806 | 41.9 | 2.019 | 101.3 |

If the greater area of the United States is such as to require an average haul of commodities of 244 miles as against 78 miles for Germany, 6 miles for Austria-Hungary, and 45 miles in Belgium, an average of 63 miles, it would seem that we might look for the same ratio of passenger mileage, i. e., we should expect to find that the average American travels about four times the distance of the European. Considering the sparsity of population, the great extent of our country—fifteen times as large as Germany, with eight times the railway mileage, two hundred and fifty times as large as Belgium, with a hundred times the railway mileage, twenty-four times as large as Austria-Hungary, with ten times the railway mileage—we would look for a per capita of travel here multiplied almost to a decimal point.

*Table showing number of passengers, trips, and per capita mileage.*

| | Number of passengers. | Per capita trips. | Per capita mileage. |
|---|---|---|---|
| Great Britain, 1898 | 1,062,911,116 | 25 | 336 |
| Germany, 1905 | 900,000,000 | 16 | 321 |
| United States, 1898 | 501,066,681 | 7 | 183 |

The above figures are exclusive of season tickets in England, which would probably raise the figures substantially. Since 1898 the number of trips in the United States have increased to 9 and the per-capita mileage to 299; but our ratio still lingers behind, while data are not at hand for Great Britain for recent years. There are two main reasons to be assigned for the great disparity between American and British travel: First, the average British passenger rate of about a cent a mile, and, second, the greatly reduced distances between points of business and centers of pleasure. Besides having twice the fare to pay per mile, the average American has from three to four times the length of journey to traverse on account of our sparseness of population and grander scale of distances. Cities of the first class in the United Kingdom are seldom more than 75 miles apart, while here

they are usually from two to four hundred miles. With the same, if not a greater, natural disposition to travel, in a country with one language and feeling, with natural objects of great interest and business necessities far exceeding our English cousins, our mobility is impeded by a financial burden, distance alone considered, from three to four times the exaction in Great Britain.

And from private owners we can hardly expect any substantial amelioration, because no argument can be presented to them on social grounds alone. While it may be shown to them that by reducing the average passenger rate to a cent a mile the traffic can be doubled or even tripled, it can not be shown with certainty that they will reap a greater profit. Their primary motive being a private one, which is natural, they are unwilling to risk an assured profit on a social aim, however certain the advantage to the public.

That a reduction of the passenger rate has the effect of multiplying the traffic is seen in every excursion, but that a permanent reduction will have the like effect seems also to have been shown by the test of experience. In 1889 the experiment was made in Austria-Hungary, with the following result:

| | Passengers. | Passenger receipts. |
|---|---|---|
| August, 1888, to July 31, 1889 | 5,684,845 | $3,800,000 |
| August, 1889, to July, 1890 | 13,456,712 | 4,620,000 |

The growth of traffic was so great that the receipts increased in spite of the reduction in rates, and the net receipts were also enlarged, the expenses of operation by no means increasing in proportion to the volume of traffic.

This great multiplication of travel took place in an empire of the most limited social homogeneity and with languages and feelings so diverse that a session of the Imperial Parliament can hardly be held without necessitating the police.

Roumania had the same experience, according to Professor Weyle, who states that in consequence of a radical reduction of fares the passenger traffic in that State rose from 2,906,862 passengers in 1890 to 4,332,813, an increase of 49 per cent in one year, and adds that the increase was hardly due to improved economic conditions.

A like result followed a parliamentary reduction of rates in England. Weyle, in his work on the Passenger Traffic, states in 1846 a radical decrease of rates was enforced, and by the year 1850 there resulted an increase of traffic amounting to 330 per cent, the rate of the reduction being from 3.43 to 2 cents a mile.

On account of the multiplying effect of a reduction to a cent-a-mile rate on the traffic it is believed that its introduction would not result in any depletion of the gross receipts, and with some allowance for the increased number of cars necessary the national administration of the railways might prudently inaugurate the change. That this is possible is shown by the experience of American railways themselves from the years 1895 to 1906, inclusive. The passenger traffic increased from twelve to twenty-three billion passenger miles traveled, while the increase in the number of locomotives devoted to the passenger service was only 18 per cent, and the increase in the number of passenger cars only 23 per cent.

| For 124 miles | 73.60 | 55.20 | 36.80 |
| For 124 miles, per ride | .1227 | .0920 | .613 |

While the above rates are of value mainly to the daily traveler, a zone system prevails for the occasional journey, the rates being as follows:

Tickets, says Professor Parsons, are sold by zones, and are good for all stations within the same zone. The first zone runs from 1 to 15 miles, the next from 16 to 25 miles, and so on, the steps in making the bigger zones being longer, and beyond 140 miles all stations are included in the same zone. The rates are 10 cents third class on ordinary trains and 12 cents on express trains for each zone. If your journey takes you over two zones, as from a station in zone 1 to a station in zone 3, you pay 20 cents (or 24 cents express). If you cover five zones, you pay 50 cents (or 60 cents express), and you can go any distance for $1.60 (or $1.92 express). For local traffic special rates are made, 4 cents to the next station from where you are in the same zone and 6 cents to the second station.

For short distances the rate is about 1 cent a mile or less; for long distances it runs down to about one-third of a cent a mile. From Budapest to Kronstadt, for example, you go 457 miles for $1.60. If we had the same rate here, you could go from New York to Chicago for $3 instead of $20, and from New York to Philadelphia for 32 cents instead of $2.50. We can not expect so much reduction, of course, because costs are greater here, but that difference does not require six to eight times higher rates.

ADDITIONAL COST OF INCREASED PASSENGER TRAFFIC.

The highest average number of passengers to the American train is shown in the report for 1905, when it was 48. Group I, embracing New England, shows 64, while the Pacific coast, in Group X, shows 65, a concurrence produced apparently by the lower rates of New England and the higher wages, while in Group IV, embracing the Virginias and the Carolinas, where neither high wages nor low rates obtain, the average train load falls to 35. The like disparity appears in the annual number of passengers carried per passenger locomotive, the figures varying from 98,130, in Group I, to 25,536, in Group VII. In New England there are 39 passengers to the million passengers carried; in Group IV, 89, and in Group VII, which includes Montana, Wyoming, parts of Colorado, Nebraska, and South Dakota, the number of cars to the million passengers is 143. The average day coach contains 30 seats, and a sleeper, with its smoker, about the same number. Estimating the average main-line train at five passenger cars, there are thus 150 seats, or three times the average train load of 48 persons. The branch and accommodation trains likely average about three cars, with separate seats for 90 passengers; so that, taking average trains and average train loads, the main-line traffic facilities would seem sufficient to accommodate three times the average travel upon them and the accommodation and branch traffic about double their present load. From these data the advocate of a reduced passenger fare will naturally conclude that the traffic could be doubled without a serious addition of expense to the operating cost. For "rush occasions," like the holidays and summer-vacation travel, additional cars would be necessary; but as a good up-to-date day coach can be had for $6,000, with interest and depreciation at 10 per cent a year, a 50 per cent increase in their number would involve an outlay of only $9,000,000 a year. The locomotive crew, depot and other related services would seem to come under the same principle, and computing that traffic as now costing $300,000,000, about two-thirds of its receipts, a claim that the traffic might be doubled at an added cost of $100,000,000 is as accurate as speculation can be.

No argument as to the desirability of this accomplishment is made. From the standpoint of business necessity, education, relaxation, and pleasure the proposal would seem to be more than justified. Professor Weyle, after declaring that the most expensive element in the passenger traffic is the "empty seats," and that the "policy of decreasing the price of railway travel should undoubtedly be continued where there is Government ownership," also adds that "There seems little doubt that this change is possible, and in thickly populated districts the traffic might increase several fold." In countries where the ownership of railways rests with the community such an extension of traffic is not only feasible, but would act as a most powerful lever in elevating the population. There is, of course, still a certain prejudice against traveling which would rapidly disappear when traveling was made more common. There are other factors working against traveling besides that of high fares, but these would largely be remedied by any increase in the traffic.

AN EIGHT-HOUR DAY.

The multiplication of the productive forces of society during the last century has eliminated the necessity of the long workday, remnants of which largely remain in the railway service. The Government has placed this limitation of eight hours upon its own employees engaged in the physical avocations, such as mail carriers, and the institution gives satisfactory results to employers and the public.

Many of the States embrace this idea in their statutes and constitutions, and its expediency is now universally recognized where elemental conditions permit. Public railways make it a rule to thus promote the well-being of the employee, and it is rare that more than eight hours' labor is permitted, although on privately owned railways the long-day rule is universal. It is not at all uncommon for the employee in the United States to remain at his task twelve hours, even when, as an operator, countless lives may depend upon the freshness of his faculties. Railway engineers frequently make thirty-five and forty days a month, and the engineer whose locomotive collided with the train load of passengers at Terra Cotta had had but eight hours' sleep in the preceding forty hours.

An eight-hour day in the United States, when introduced, would be tantamount to an increase of 20 per cent in the wages of the employee, it being assumed that the average day is now about ten hours. This would cost $160,000,000. As a matter of fact, the change would not require the employment of one-fifth more men because the economies of single organization discussed in the Chapter of Economies would more than correspondingly reduce the total of labor required. This reduction to eight hours should not be made to take effect at once, but only gradually, as the eliminations of useless competitive labors might proceed. Perhaps none will dispute that increased efficiency would result from this reform, since a man is certainly stronger for an eight-hour journey than for a ten or twelve hour one. The resulting benefit to the country at large must be admitted unless the critic is prepared to controvert the superiority of twentieth-century over eighteenth-century civilization.

COMPENSATION FOR ACCIDENTS TO EMPLOYEES.

The following table shows the proportion of passengers killed and injured to the total number carried and the proportion of employees killed and injured to the total number employed in different countries, as given by Professor Parsons, of Boston, for the years 1902 and 1904:

| Country. | Passengers. | | Employees. | |
|---|---|---|---|---|
| | Killed, 1 in— | Injured, 1 in— | Killed, 1 in— | Injured, 1 in— |
| United States | 1,957,441 | 84,424 | 364 | 22 |
| Great Britain | 8,073,000 | 445,000 | 736 | 88 |
| Germany | 11,701,354 | 2,113,471 | 1,199 | 451 |
| Belgium | 33,151,173 | 431,937 | 2,266 | 98 |
| Austria-Hungary | 9,432,303 | 1,328,551 | 1,908 | 363 |
| France | 5,260,000 | 1,052,000 | 954 | 355 |
| Switzerland | 12,237,515 | 849,820 | 1,070 | 42 |
| Denmark | 18,935,151 | 9,467,000 | ..... | ..... |
| Norway | 7,690,000 | 4,350,000 | ..... | ..... |
| Sweden | 6,667,000 | 3,450,000 | ..... | ..... |
| Russia | 1,080,000 | 250,000 | ..... | ..... |
| Spain | 2,000,000 | 308,000 | ..... | ..... |
| Canada | 1,120,000 | 158,000 | ..... | ..... |
| Victoria | 20,000,000 | 208,000 | ..... | ..... |
| Tasmania | ..... | 271,000 | ..... | ..... |
| New South Wales | 5,000,000 | 589,000 | ..... | ..... |
| South Australia | 6,667,000 | 2,500,000 | ..... | ..... |

It is not intended here to discuss the causes of the unparalled accident list on American railroads. A brief treatment of the method of monetary compensation to those who suffer as a result of such accidents is deemed to be in place. The legal remedy is effective enough for this purpose, so far as passengers are concerned, but with regard to employees, no scheme of liability law, based upon the charge of neglect in the employer or his employees, is adequate to meet the requirements of the case. Perhaps not 20 per cent of the accidents which happen are chargeable to anybody's neglect, and, of course, it is immaterial to the victim or his dependents what the assignment of cause may be. As a general fact, the injury to the victim is a necessary contribution to railway management, and should be charged up to the cost of operation like taxes or any other unvarying

and inevitable expenditure of railway capital. It is therefore insurance and not damage law which is deemed appropriate to the subject. So constant is the ratio of accidents to the business done on our railways that one can, by the simplest provision, calculate the cost of insurance in advance. The amount allowed under the workman's compensation act of Great Britain is the equivalent of the victim's wages for three years, if killed, and one-half of said amount for permanent disability. It is suggested that this limit ought to be raised to five years as a standard more in harmony with justice. Applying the five-year basis in the United States, we would have the following table as representing the annual cost of compensation for the killed and disabled on our railways:

*Cost of insurance of killed and injured, 1905.*

| | |
|---|---|
| 5 years average wages, $3,000, each to 3,361 killed | $10,098,000 |
| 5 years one-half average wages, $1,500, each to 22,128 disabled | 32,192,000 |
| Total | 43,290,000 |

PENSIONS FOR SUPERANNUATED.

The United States has shown little progress in this matter. Austria, Belgium, France, Germany, the British colony, Russia, even Egypt, Algeria, and Turkey, have introduced pensions for the assistance of railway employees worn out in the service, while in our country only four railway systems, including the Baltimore and Ohio and Pennsylvania Railroad, have made any such provision.

The census shows that the number of people living above the age of 60 in the United States amounts to 9 per cent of persons living above the age of 15, the age at which railway service begins. To pension those above 60, at one-half of the wages formerly received, would accordingly cost only 4½ per cent of the total sum now paid employees on our railways, the exact sum in 1905 being about $800,000,000. Thus the cost of pensioning railway employees who would serve at least ten years and reach the age of assumed incapacity at 60 would be $36,000,000 a year.

RAILWAY BALANCE SHEET UNDER PUBLIC OWNERSHIP.

Having suggested such material additions to the railway service as an eight-hour day, the abolition of grade crossings, the reduction of the passenger rate to a cent a mile, and the introduction of the pension and insurance features proposed in Senator PATTERSON'S bill, it will be interesting to strike a balance between revenue and expenditures of the railways, judged as a single system. Based upon the year 1905, and assuming that the passenger traffic will double under the influence of a-cent-a-mile rate, the following is a summary of expenditures and income under public ownership for the year 1905:

*Revenue and expenditures under public ownership, based on year 1905.*

| | | |
|---|---|---|
| Gross earnings from operation | | $2,082,482,406 |
| Additional earnings from abolition of passes | | 50,000,000 |
| | | 2,132,482,406 |
| Maintenance of way and structures | $275,046,036 | |
| Maintenance of equipment | 288,441,273 | |
| General expenses | 55,319,805 | |
| Conducting transportation, $771,228,666, less 24 per cent for estimated economies | 586,123,787 | |
| Three per cent interest on cost of purchase at $11,000,000,000 | 330,000,000 | |
| Sinking fund, one-half of 1 per cent on cost of purchase | 55,000,000 | |
| Taxes, 1905, to be continued | 63,474,679 | |
| Cost introducing eight-hour day | 160,000,000 | |
| Appropriation to abolish grade crossings | 30,000,000 | |
| Extra expense conducting passenger traffic | 100,000,000 | |
| Bureau compensation for deaths and disabilities of employees and old-age pensions | 79,290,000 | |
| Total expenditures | | 2,022,695,580 |
| Excess of receipts—surplus | | 109,786,826 |

SWITZERLAND.

From the "Message of the National Council to the Federal Assembly concerning the purchase of the principal lines of Swiss railways" (March 25, 1897), and from conversations with the heads of Government departments, including Doctor Zemp, the minister of railways, and Emile Frey, ex-President of the Republic and head of the International Bureau of Telegraphs and Telephones, and a large number of business and professional men in Geneva, Berne, Basle, and Lucerne, I condense the following statement of the main reasons that led to the nationalization of the railroads:

1. "The railways should be managed for the people, not for the profit of private owners." This point in varying form was emphasized over and over again as the fundamental argument and the basis of the movement.

2. "The rates would be lower."

3. "The service would be better. The Government would be more occupied with the interests of the public than the company's."

4. "Considerable economies will be effected by the consolidation of the roads under public management."

5. "Unity of the system is essential to the best results, and the united system must not be subject to speculative management."

6. "The private operation of railways puts too much power in the hands of the managers."

7. "The nation would be better able to open new lines where they are needed. The companies do not develop the out districts. They have refused to build new railways to villages where they think the business may not pay, although there is great need for the roads."

8. "In their pursuit of dividends the companies have sometimes even neglected proper repairs and precautions for safety, so that bad accidents have resulted."

9. "The Government will be more liberal with employees than the companies, as is shown by its treatment of the employees of the Government post and telegraph. It will adjust differences with employees in a better spirit, and we shall not have strikes of railway employees blocking our traffic."

10. "We do not want our railways owned by speculators, and especially we do not want our railway shares owned by foreign capitalists."

11. "The capital of the railways should be gradually extinguished instead of being piled up, as the companies are doing. Provision has been made in Germany and Belgium for the amortization of the capital about the middle of the twentieth century, and the French railways are to come to the State free of debt about that time. We also must extinguish the capital charges on our railways, so that rates may be reduced as nearly as possible to the cost of operation."

12. "National ownership of the railways will tend also to a closer national unity. This is important, for by reason of differences of race, etc., the union of interests among our States is none too strong."

13. "The success of the German roads affords a strong example of the value of State ownership. We are all convinced," said one of the foremost men in Switzerland, "that State management of railways has been a good thing for Germany." (Professor Parsons in Railways, etc.)

JAPAN.

The first railway in Japan was a Government road, and one-third of the roads are now public. The Government fixes maximum and minimum rates and leaves the companies free between those limits, except that the minister of railways has sufficient control to compel fair rates if the companies try to discriminate. The Japanese railway officers I have talked with said that the Government did not intend to have any such arrangements as those which American railways make with the beef trust and other combines.

The Government pays the private roads for carrying the mail at much lower rates than ordinary freight rates. There is no railroad lobby, and the private roads do not give passes to legislators. There are a few railroad directors in parliament, but they have no special influence. The Government roads give premiums and bonuses to firemen and engineers for economy of fuel and efficiency of service.

There is an advisory council appointed by the Government, consisting of railroad officials, senators, representatives, and eminent persons representing various business interests.

The effect of this, as of similar bodies in Germany, Switzerland, Sweden, South Africa, and other countries, is to bring the railways into closer touch with the people, prevent friction and litigation, and adjust the service to the needs of business and the wishes of the public.

There are important differences, however, between the Japanese advisory system and that adopted by Prussia. There are no district councils, as in Germany and Switzerland, and the national council is wholly appointed from above, instead of being mostly elected from below. The Japanese council, which considers questions of location, construction, financiering, and operation, and makes recommendations, is composed of twenty persons, representing the cabinet department, both houses of the legislature, the railways, and business interests.

The law specifically provides for the inclusion of cabinet officers in the council. It is said that bureaucratic influence has not manifested itself, but there is certainly less of a guaranty against it than under the Prussian system, where the law expressly excludes from the council all immediate state officials.

The law as to private railways (passed in May, 1887) contains many excellent provisions, especially in relation to the granting of charters, inspection and control of rates, accounts and service, and provisions for safety.

The Government reserved the right to purchase railways after twenty-five years of chartered existence on the basis of the average price of shares during the five years preceding the purchase.

Notwithstanding the large control already exerted by the Government over private railways, a congress of representatives of Japanese chambers of commerce, after the recent war with Russia, passed resolutions declaring for a more complete control of the railways as to their business methods. The Government has elaborated a plan for nationalizing the private roads on the basis of twenty times the average annual profits for the three years preceding the war. The cost is estimated at $250,000,000. Stock is to be paid for in 5 per cent bonds redeemable within forty-five years and the net revenues of the railways are to be devoted to paying interest and redeeming the bonds, so as to clear off the capital charges as soon as may be reasonably practicable.

This plan, presented in a bill before the parliament this year (1906), has passed the house of representatives by a vote of 243 to 109.

The Japanese, both in war and peace, have shown the most wonderful receptivity and judgment in adopting the best ideas and institutions of other lands. And the skill, efficiency, public spirit, and power of organization they have shown leave no room for doubt of their success in the management of state railways. (Professor Parsons, in Railways, etc.)

---

[From the Review of Reviews.]

ITALY—STATE CONTROL OF ITALIAN RAILWAYS.

The present Italian ministry announces semiofficially that, owing to inability to agree with the railroad companies on a new arrangement for the private operation of the roads, the state will, on July 1, assume control of all the systems except the south Italy railroads, according to the provisions of the law of 1862. As the present concession has been in effect since 1885, an entire new order of things is proposed, and views as to what is really best to do are various. Editors, authors, and magazine writers are busy informing the public as to present facts and best future policies. Deputy Maggiorini Ferraris, editor of the Nuova Antologia (Rome), in the first number of his review for January, discusses "How people travel in Italy and abroad," and by comparative tables makes a bad showing for Italy. In the number of trips per inhabitant Italy is ahead of only Russia and Roumania. Its average is 1.82, while in England it is 27.40. Comparing the number of trips with their average length, which is greater in Italy than in several other countries, it still results that Austria makes three times the use of railroads that Italy does, France four times, and Switzerland about six times. In length of railroads, Italy, with 15,494 kilometers, ranks after Hungary, exceeding only little Belgium and Switzerland. In proportion of the length of lines to population, Italy is at the bottom of the list, with 47 kilometers per 100,000 inhabitants, while Switzerland has 113.1 kilometers. Comparing passenger rates, Italy proves to have the highest of any country in Europe for all classes and particularly for third class.

In his second January number Signor Ferraris treats at great length "Railroad anarchy in Italy," and shows that the condition of the roads, of their rolling stock, and fixed plant is anything but advantageous for the Government if it should take them over, owing to the vacillating and penurious policies in the past.

The performances of passenger cars and locomotives are considerably over the normal set in the agreements with the operating companies. This argues a constant deficiency of rolling stock. The age limit set for locomotives was forty years and for cars sixty years, seemingly ample,

but the Mediterranean line is actually using seventy-one locomotives that have passed their two score year mark, at a great waste of fuel, naturally. There is continual car shortage, and reception of freight is often stopped at various stations on account of this. Delays in freight shipments are so numerous that complaints arrive by the thousand, and so many claims are made for refund because shipping agreements have not been carried out that thousands of shipments are actually carried free, and more would be if every shipper knew his rights. Many lines are still single track, and the lack of centrally operated switches and block signals causes much congestion. The rails are too light to allow the use of heavy, high-speed locomotives. This has been especially so on the stretch from Pisa to Rome, where otherwise high speed with few stops could be maintained.

In short, the writer finds that the income of the railways is the least in Europe, the trains are the slowest, and the rolling stock is in the worst condition. The arrangements with the operating companies have failed financially, economically, and technically, and have left the nation with a deficit of several hundred million francs. Travel, commerce, and industry all languish through the shortsighted management. The companies fear to make improvements at the expense of their shareholders and for the benefit of the state. The state fears to spend the taxpayers' money for the benefit of the companies. Signor Ferraris considers any postponement of state control a step backward. The south Italy lines should be gathered in with the others as soon as a basis of agreement can be reached, and the maritime postal lines connecting the islands should later be included.

MEXICO FEARED RAILROAD TRUST, SO MEXICAN GOVERNMENT TOOK ROADS ITSELF, MINISTER SAYS—MERGER ONLY A BEGINNING—VIGOROUS ENTRANCE INTO THE RAILWAY FIELD PROMISED—ECONOMIES IN OPERATION HOPED FOR.

Minister of Finance Limantour, in a speech remarkable for its straightforwardness, presented to Congress last night the reasons which prompted the Government to consummate the great railroad merger by which the Republic comes into possession of the two great trunk lines of the country, together with thousands of miles of subsidiary lines. With the control of the National and Central, together with dependent lines, the Mexican Government practically owns all the big operating lines of the country.

The most remarkable statement in the minister's speech was that the Government was forced to go into the railroad business on a larger scale because of fear of what he styled "the great railroad trusts in the United States." He said that if this defensive action had not been taken by Mexico some of the great railway systems of the United States would enter the Republic and swallow the transportation facilities of the country. This he characterized as a peril which was now alarming the people of the great northern Republic.

In his speech there occurred an important forecast, which intimated that the merger was only the beginning of a great plan, and he declared that the Mexican Government had decided vigorously to enter the railroad field. After delivering his speech he presented a bill at the request of President Diaz, the speaker said, asking that the session of Congress which is about to close be prolonged that the whole situation might be carefully considered by the deputies and senators.

During the address Minister Limantour said that the Government was at first forced to go into the railroad business in 1903, when the National was purchased, because of the fact that a merger between that line and the Central was then about to be consummated. At that time the Government declared that its attitude in railroad affairs would henceforth be passive, but the circumstances mentioned, he said, had been forced by the so-called "railroad trust" of the United States. The minister said:

"Gentlemen, you are familiar with the aspect offered by the transportation question in the neighboring nation; the problem there is only a phase of the trust question, which may be characterized as a peril. Those great corporations are being extended every day, and many of them cover considerable areas of territory. The tendency to expansion has been so pronounced in recent years that it may be added that the aim of most of the financial interests controlling the great transportation systems of the United States is to absorb as many other lines as possible.

"The United States Government, alarmed by the tendency and desirous of initiating a reaction against it, has, as you well know, taken action which aims at combating those organizations and checking their continued expansion. Under these circumstances it was natural that we, on our side, should endeavor to prevent the powerful corporations in question, attacked as they are being by all legal means in their own country, as well as harassed by pressure of public opinion, from coming hither and seeking to absorb those Mexican railroads which are not already under the direct control of the Government."

The minister summed up his argument as follows:

"Thus, gentlemen, there are three main arguments for the incorporation of the two great systems of the National and the Central, first, to avoid friction between the different corporations when the two are competing lines, or when one of them fears being antagonized by a concert in which the Government holds controlling interest; secondly, to avoid the absorption of properties not controlled by the Government by one of the great railway systems of the United States, and, third, the prospect of realizing considerable economies through the consolidation of all the great railways under a single management."

The speech throughout its delivery was frequently applauded. There seemed to be an overwhelming sentiment in favor of the idea advanced by Senator Limantour. (Baltimore Sun, Dec. 15, 1906.)

MEXICO AND GOVERNMENT OWNERSHIP.

The Mexican Government has entered the field of public ownership. Associated Press dispatches follow:

CITY OF MEXICO, *December 14.*

The details of the railway merger by which the Mexican Government takes control of the independent lines in the Republic are now known. By the terms of the contract the Government secures absolute control of the Mexican Central, the National, the International, the Interoceanic, and the Hidalgo and Northeastern, all of which will be merged into one great railroad system. The Government also comes into control of the Texas-Mexican, a railroad at Laredo, Tex., which is owned by the National. The mileage of the system will, with extensions which are rapidly nearing completion, aggregate approximately 10,000 miles. The Tehuantepec National and Vera Cruz and Pacific, two others controlled by the Government, will continue to be run as independent companies.

A Mexican company, of which a majority of the stock will be held by the Mexican Government, will be organized with headquarters in Mexico City. The company will issue its securities in exchange for the securities outstanding of the two companies, and the new company will acquire all the physical property and concessions held by the old companies.

It is contemplated to create a board of twenty-one directors, to be divided into a general board which will reside in Mexico, and a local board with headquarters in New York. The board in Mexico will consist of twelve members, and the New York board of nine.

The new company will make a limited issue of prior liens at 4½ per cent and general mortgage bonds at 4 per cent, the principal and interest of the latter being guaranteed by the Mexican Government. In addition to the bond issue, the company will issue first and second preferred and common stock. It is proposed to leave an ample reserve in cash and securities for future improvement, development, and extension of the lines of the company and for the acquisition of additional rolling stock and motive power. The new company will take over the holdings of the National Railroad of Mexico and the Mexican International and Interoceanic railroads, which it will thus control, as they are at present in the control of the National. It is believed that by a reduction of the general charges, the elimination of competition, the economical routing of freight, and by the increased development of the properties the new company will not only be able to meet its fixed charges, but will earn at an early date dividends on its first and second preferred stock. (The Commoner.)

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 15434) to regulate appeals in criminal prosecutions.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23551) making appropriation for the support of the Army for the fiscal year ending June 30, 1908, recedes from its disagreement to amendment No. 20 to the bill, and agrees to the same; further insists upon its disagreement to amendment No. 25, agrees to the conference asked for by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. HULL, Mr. PARKER, and Mr. HAY managers at the conference on the part of the House.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24925) making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes, and insists on its disagreement to the amendment of the Senate No. 1 to the bill.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

H. R. 17814. An act granting an increase of pension to Simon E. Chamberiin;

H. R. 21413. An act granting an increase of pension to Mary S. Platt;

H. R. 21788. An act granting an increase of pension to Satina A. Waymer;

H. R. 21818. An act granting an increase of pension to William Hardesty;

H. R. 21827. An act granting an increase of pension to Francis Murray;

H. R. 21899. An act granting an increase of pension to Catharine Koch;

H. R. 21911. An act granting an increase of pension to George Newton;

H. R. 21914. An act granting an increase of pension to Ferdinand Pahl;

H. R. 21974. An act granting an increase of pension to John W. Lowell;

H. R. 21983. An act granting an increase of pension to James E. Pusey;

H. R. 22055. An act granting an increase of pension to Maria Lorch;

H. R. 22063. An act granting an increase of pension to Horace F. Packard;

H. R. 22093. An act granting an increase of pension to Lars Isaacson;

H. R. 22165. An act granting an increase of pension to John Hand;

H. R. 22169. An act granting an increase of pension to Cynthia M. Bryson;

H. R. 22170. An act granting an increase of pension to Benjamin James;

H. R. 22175. An act granting an increase of pension to Charles Prendeville;

H. R. 22199. An act granting an increase of pension to William Templin;

H. R. 22216. An act granting an increase of pension to Griffin A. Coffin;

H. R. 22251. An act granting an increase of pension to Samuel Manly;

RIVER AND HARBOR APPROPRIATION BILL.

Mr. FRYE. I move that the Senate proceed to the consideration of the report of the committee of conferenee on the river and harbor appropriation bill.

The motion was agreed to; and the Senate proceeded to consider the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The VICE-PRESIDENT. The Secretary will read the report.

The Secretary read the report.

[For report see Senate proceedings of the 26th instant.]

The VICE-PRESIDENT. The question is, Will the Senate agree to the report?

Mr. HOPKINS. Mr. President, before the report is disposed of I should like to ask the honorable chairman of the committee a question or two with reference to amendment No. 59, where $650,000 per annum was to be expended on the Mississippi River between the mouth of the Missouri and the mouth of the Ohio. I will state my understanding is that the engineers reported that $650,000 per annum could be expended advantageously on the river between the points I have indicated, and that section of the river is one of the most important in the whole length of the river. The State of Illinois, as well as the State of Missouri, are both greatly interested in having the improvements made at that point in accordance with the suggestions of the engineers.

This matter was brought up in the Committee on Commerce and was discussed there somewhat, and the Committee on Commerce felt that the public requirements would be best subserved by having the amendment made that was finally reported by that committee and approved by the Senate.

It is not my purpose, Mr. President, to antagonize the chairman of this committee, but it is with great regret that I learn the Senate conferees have yielded to the importunities of the conferees on the part of the House and permitted that amendment to be stricken from the bill.

The recommendation made by the Senate is, it seems to me, one of the most valuable in the entire bill. If we are to take the money from the Treasury and improve these great waterways it seems to me that this is the one point which should be carefully considered and the recommendations of the engineers carried out to the letter.

Mr. FRYE. I noted down the objections which were made to this amendment when it came up before the committee of conference, and if the Senator desires I will read it.

Mr. CULLOM. I should like to hear it read myself.

Mr. FRYE (reading)—

MISSISSIPPI RIVER BETWEEN THE MOUTH OF THE MISSOURI RIVER AND THE MOUTH OF THE OHIO.

"We have been spending on the river within the last twenty-five years more money per annum than is expended by the Government of Germany on the Rhine, on which there is a traffic of between thirty and forty millions of tons. The total traffic on this stretch of the river has dropped off in ten years from 1,260,000 tons to 440,000 tons.

"Second. An extensive plan of improvement was adopted in 1881 which it was thought would cost for completion $16,000,000. This has proved entirely ineffective. In 1903, after twenty-two years, nearly eleven millions had been expended when the estimate was made for the completion of the project of 1881, and the report of the board of engineers was to the effect that it would cost twenty millions to complete the project, four millions more than the original estimate, although eleven millions had been expended.

"Third. For three years past, with the exception of a few days, there has been 8 feet of water, the total amount sought to be obtained by the project; nevertheless the traffic has been rapidly diminishing, and in 1904 the barge company which conducted most of the traffic sold out its barges and went out of business. For that year, 1904, and the three years previous we were providing $650,000 per year.

"Fourth. Freight rates from St. Louis to New Orleans are per ton per mile only about one-third more than in deep water from Duluth to Buffalo, where they have also superior facilities for loading and unloading, such as elevators."

That was about the statement which was made before the conference committee, which seemed to be borne out by the facts of history.

Mr. HOPKINS. I am very much obliged to the chairman of the committee for that information. I will state to him, however, that a large part of it was entirely familiar to the people who are seeking to obtain the appropriation suggested by the engineers and to improve that section of the river.

The loss of the traffic from the river, it is claimed by those who are most familiar with the subject, is due largely to the influence of the railroads, who have purchased the interest of the company or the individuals who owned the barges which were plying up and down there, for the purpose of diverting the trade of the river to the railroads themselves. There are a hundred and one causes, which I can not take the time of the Senate to state, and of which, perhaps, I am not sufficiently informed to fully explain to the Senate, why the traffic has decreased there for a number of years.

It is true, I understand, that we have appropriated quite a number of millions of money and expended the same upon that section of the river, but my understanding is that that money has been well and profitably expended in the interest of commerce. What it needs is that instead of taking the amount here proposed, the pittance of only $250,000 per year, the amount proposed in the bill as it came from the House, we should take the larger amount approved by the Senate and add more money to it, and put that section of the river in a condition where the commerce of the country can float down that mighty river to the sea.

It is true that we are putting forth extra efforts to put the river in a commercial condition between the mouth of the Missouri and its source. Appropriations have been made from year to year prior to this time, putting the river in better condition for commerce; and in this bill appropriations have been made to the amount of $500,000, to be expended between the mouth of the Missouri and Minneapolis and St. Paul for deepening and improving the channel of the river and looking to an ultimate channel of 6 feet at low watermark. That will have a tendency to increase the commerce of that great river. But it will be to little purpose if from the Missouri River to the mouth of the Ohio River we permit the river to remain in the condition practically that it will be in if the amendment agreed to by the Senate is not adopted by the conferees.

I appreciate the fact that the chairman of the Committee on Commerce of the Senate has taken a deep interest in all the great expenditures on our rivers and harbors, and I wish to acquit him of any lack of interest in the Mississippi River. But it seems to me, Mr. President, that he has not felt the great interest of the people of Illinois and the people of Missouri and of the States adjoining upon that river. If he had, he would have held to the amendment that was made by the Senate itself.

The larger part of this bill is composed of appropriations that have been made by the House. The Senate was very moderate in any suggestions that it made; and in my judgment it was exceedingly modest in the appropriations covering this portion of the Mississippi River. The reports show that it requires a very large sum of money to put that portion of the river in good condition. In my judgment, it would have been better to have increased the recommendations of the engineers rather than to have decreased them.

That commerce has fallen away there, instead of being an argument, in my judgment, which should cause Congress to refrain from making a proper appropriation, should redouble the efforts of Congress in putting that section of the river in good commercial condition. There is nothing that will regulate the rates of the railroads from the Atlantic to the Pacific so perfectly and so well as to have that river in such a condition that the great crops which are raised on the farms of the Dakotas, Minnesota, Wisconsin, Iowa, and Illinois can find a highway to the sea over that river, because the moment that is done the competing railroads East and West will put their transportation rates at a figure that will enable the farmers of the States I have named to reach the seaboard from the East and the West as well as the South.

These considerations have moved me to ask the chairman of the Committee on Commerce to recede from that agreement and again place this amendment in conference. It seems to me if he realized the vast importance to the 14,000,000 people who live where they can be benefited by that great waterway he would take the same position I do and would recede from the position of the conferees and insist that the House shall accept the amendment of the Senate.

Mr. BERRY. Mr. President, I had not intended to say anything, and I would not have done so but for one remark made by the Senator from Illinois in which he said he thought the chairman had not taken the interest in this matter its importance demanded. I think everyone here knows that naturally from my location there is no public improvement in which I have felt such an interest and for which I have worked so hard as the improvement of the Mississippi River during the years that I have been on the Committee on Commerce of the Senate, and I want to say here to-day that no man in the Senate, I care not where he lives, has ever been a truer, a better, a more loyal and devoted friend to the Mississippi River than the chairman of the Committee on Commerce, the Senator from Maine. He has been its friend from the time I came to the Senate, and has done probably more to get appropriations for it than any Senator here.

In addition to what the chairman said, I wish to say to the Senator from Illinois that we did everything in conference that it was possible to do. We urged the amendment in every way we knew how to urge it. The House conferees, however, insisted in addition to the reasons given by the chairman—and I want the special attention of the Senator from Illinois to this—that a survey is provided for in the bill for the canal proposed to be built between Chicago and St. Louis, and also for a survey of the Mississippi River between Cairo and the mouth of the Missouri. A commission of very great power and great ability is created by the bill. It is proposed to make the depth of the canal 14 feet. If it should eventually be determined to build the canal, the other scheme on the Mississippi River of which the chairman spoke, which is one by revetment, and which will cost $20,000,000 from the mouth of the Missouri River down to Cairo, would as a matter of course be provided for if there were a 14-foot channel from there to Chicago. But the House conferees insisted that they would not enter upon the expensive scheme of improvement costing $20,000,000 between these points until the other matter was finally determined, or at least until the Commission had reported on both the canal and the river.

They also insisted that the amount in the bill was amply sufficient for dredging, to keep the Mississippi River from the mouth of the Missouri down to Cairo at probably 8 feet of water except in a very low stage, or, in other words, that the amount was sufficient for every purpose except for the scheme of revetment which they would not undertake.

Now, that is the condition. A part of the old appropriation has been left unexpended, I think $200,000.

I will state also it was stated there that the matter was fought out in the House after full investigation, and I think only 17 votes were secured against the House provision. In view of that the House conferees stated that our contention was useless; that they would not agree to it; that they could not go back to the House and defend it after the House had so persistently stated that they would not increase it. Therefore the Senate conferees were compelled, knowing the situation, to yield.

I will state that it would be no benefit whatever to send it back to the conference committee, because I feel sure that under the surrounding circumstances the House conferees will never agree to the amendment of the Senate. The Senator from Illinois can not regret it any more than I do. I would have been glad to have got every dollar given by the Senate and more. We did all we could, and it was simply an impossibility to get them to agree to it. We either had to yield the amendment or lose the bill, and this the conferees on the part of the Senate were not willing to do.

Mr. CULLOM. Mr. President, I do not know that it is worth while for me or anyone else to say anything against this report. These conference reports are generally agreed upon by a sufficient number of members to secure their ratification in almost all cases.

When this bill was first reported to the House my understanding was that it carried some $84,000,000. Subsequently, when it came to the Senate and was considered by the Committee on Commerce of the Senate, the amount was increased to over $92,000,000. It occurred to me that in view of the fact that there was such a tremendous appropriation to be made in the interest of the commerce of the country, which I was gratified to hear was being done, surely the interests of Illinois and our western Mississippi River would be well attended to. I do not know now but that it is, so far as the lower Mississippi is concerned and so far as the upper Mississippi is concerned. I do not know just how much the lower Mississippi carries in this bill. Perhaps the Senator from Arkansas can tell me.

Mr. BERRY. That is all right. The lower Mississippi, from Cairo down to the Gulf, carries an appropriation of $3,000,000 for one year and $2,000,000 for three years more. It is $3,000,000 for the first year and then $2,000,000 each for three years, the appropriation being made for four years—$9,000,000 for the four years.

Mr. CULLOM. So the lower Mississippi gets between one and two million dollars a year for immediate use.

Mr. BERRY. A little over $2,000,000.

Mr. CULLOM. And yet when it comes to Cairo or the mouth of the Ohio River, and from there up to St. Louis and the mouth of the Missouri, we do not get anything like the appropriation apparently that has been given to the lower Mississippi and to the upper Mississippi as well.

I can not quite understand why that should be so. I see in this bill that the House provision was stricken out and a substitute for it put in. I think the substitute put in does not carry as much money as the original provision.

Mr. BERRY. That is a mistake, as the Senate amendment will show.

Mr. CULLOM. I have not looked over it carefully.

Mr. BERRY. The chairman can answer as to that.

Mr. FRYE. The House provision gave $250,000 a year and the Senate amendment proposed $650,000 a year.

Mr. CULLOM. That was decided against by the conference. How much is the actual appropriation made?

Mr. FRYE. Two hundred and fifty thousand dollars.

Mr. BERRY. Just what the House gave.

Mr. CULLOM. We retain the same amount, then. I thought you had reduced it somewhat.

Mr. FRYE. No; it was not reduced.

Mr. CULLOM. But the thing we object to is that there has not been retained in the bill the appropriation of $650,000, or whatever exact sum has been given heretofore, so that the work on that stretch of river can be continued, and that appropriation should not go out at all until we could finally settle upon some general proposition that ought to be adopted.

So far as I am concerned, I am in favor of a general waterway improvement from the Lakes to the Gulf, so that we can have 14 feet of water all the way from Chicago, for instance, I may say, to the Gulf of Mexico.

I anticipated when the appropriation was being made of such a large amount for the general purposes of improvement of the rivers and harbors that we would get that work started, but we not only failed in getting it started, but we have failed also in getting in the amount that we have heretofore had appropriated for the stretch of river between Cairo and St. Louis.

It seems to me, Mr. President, that we have not fared as well as usual, notwithstanding the tremendous appropriation that the Government is making in the interest of commerce throughout the whole country.

I suppose we have got to submit and allow this conference report to be adopted; but I want to give notice now that another year, when the river and harbor bill comes up, unless this general improvement of the waterways is provided for, and unless the stretch of river between Cairo and St. Louis is also provided for, so far as I am concerned, I shall resist the enactment of any river and harbor bill whatever.

Mr. MALLORY. I should like to ask the Secretary to read the amendments that the Senate conferees receded from.

Mr. BERRY. The report is printed in the RECORD.

Mr. MALLORY. I will get it there.

Mr. OVERMAN. I notice, Mr. President, on page 119, line 10, that there is a clerical error. I understand the conference report is to be adopted in the Senate before it goes back to the House for action, and I desire to know whether this clerical error can not be changed and corrected here?

The VICE-PRESIDENT. The Chair has not the print from which the Senator is reading before him.

Mr. OVERMAN. It is on page 119.

Mr. FRYE. Will the Senator from North Carolina yield to me a moment?

Mr. OVERMAN. I will.

Mr. FRYE. There is a mistake in the name of a river in one of the surveys, and the Senator from North Carolina would like to have that mistake corrected. I do not feel certain whether it can be corrected by unanimous consent, but I understand from the chairman of the conferees on the part of the House that it could be corrected there. The Senator from North Carolina desires

to know whether by unanimous consent we can correct that name.

The VICE-PRESIDENT. It would be necessary, in that event, to send the report back to conference.

Mr. FRYE. I think it has been usual, where it has been found that there has been a mistake, for a joint resolution to be passed correcting the mistake.

The VICE-PRESIDENT. It has been the practice heretofore to pass a joint resolution requesting the enrolling clerk of the House, in enrolling the bill, to make the correction, and that would be the proper course in this case.

Mr. FRYE. I think that can be done. It has been done within my knowledge.

The VICE-PRESIDENT. It has been done heretofore.

Mr. OVERMAN. Mr. President, I desire to protest against some of the methods which have been adopted in regard to the report upon items which had been adopted and placed upon the bill as it passed the Senate. I introduced an amendment in the Senate for the appropriation of $200,000 to be expended in the construction of locks and dams upon the upper Cape Fear River. That question has been before Congress for several years. The scheme is feasible, and it has been estimated for by the engineers. The amount estimated for is $1,300,000. The statement concerning it is:

> The act of June 13, 1902, appropriated $50,000 for the purchase of sites for locks and dams. A careful survey, consuming more than eleven months' time, was made for the purpose of locating the sites. This survey has been completed, the sites tentatively located, a number of borings made at each site, the locations approved, and prices obtained on all the lands necessary.

And the money has been appropriated to purchase the sites, as is shown in this report.

I understand the land necessary for one of the locks and dams has been purchased. Now, we have here the printed reports as sent by the engineers; but when the amendment is adopted by the Senate and it goes before the committee of conference we are met with a written supplemental report, or some sort of report. How it got here I do not know. Somebody has sent certain engineers down there since Congress has been in session, as I have been informed. I understand they went there and simply rode down the river. They sent to the House a written report to the effect that probably they might adopt another scheme for this improvement which would be cheaper. I protest against that way of doing business. It is unfair to the Senate, to say the least of it. That report ought to be before the Senate here, and printed, as all other reports upon this subject. If the Secretary of War or the engineer wanted to have the matter investigated, it should have been done before this session of Congress assembled, and the report should have come up here as other reports have come. I have not been able to get a copy of the report, although I have tried time and time again to do so. I repeat they had some sort of a report before the conference committee suggesting that in lieu of the proposition contained in the amendment adopted by the Senate another survey be made. I should like to get some information regarding the matter. I should like to know why these engineers were sent there and by whose authority, and why this matter was not reported on before, and why it comes up here in this way, with a written report that I have not been able to get. It seems to me to have been done for some purpose, in order to prevent this appropriation. It is an outrage upon the Senate. We are entitled to see that report.

I repeat, I want to protest against that method of doing business. I think if the reports had been submitted as they have been made from time to time this amendment which was adopted by the Senate would have been retained in the bill, because I believe the conferees on the part of the Senate would have insisted on its retention, and that it would have been incorporated and the appropriation made. But here comes this report saying that there might be another plan adopted by which some money might be saved to the Government. I want to know why that report has been made just at this particular time. It is evident that some one has been trying to defeat this appropriation by unfair means.

I want to incorporate in my remarks, Mr. President, some information in regard to the Cape Fear River improvement. I send it to the desk and ask to have it incorporated in the RECORD as a part of my remarks.

I wish to say further and to give notice that if this appropriation is defeated by these methods, at the next session of Congress, when the river and harbor bill comes up for consideration and the upper Cape Fear River is not provided for, I shall do all in my power to see that no bill of this kind passes.

The VICE-PRESIDENT. In the absence of objection, permission is granted to the Senator from North Carolina to insert in the RECORD the matter referred to by him.

The matter referred to is as follows:

*Improvement of the Cape Fear River, by E. J. Hale.*

[Published by order of the Chamber of Commerce.]

PREFACE.

In 1886 two English gentlemen (Lord Egerton of Statton and Sir Joseph Lee, afterwards the chairman and vice-chairman of the Manchester Ship Canal Company) asked the writer to make a report upon the Manchester Ship Canal. I inquired where it was. They said, "here," pointing to the forehead. I asked if it was feasible as an engineering problem to bring big ships to Manchester, an interior city. They sent their engineer to explain that. In reply to the same question, he said that anything was possible in engineering, provided the money necessary to pay its cost were forthcoming. The project then was a commercial one.

The commercial part of the problem was very simple when once presented—like Columbus's demonstration of how to make the egg stand on end, or any other of the great problems of man's conquest of nature that turn often upon the least complex of conditions if they are but comprehended. It was this: A circle described about a seaport lies half in the sea, where people do not dwell. A similar circle about an interior town lies wholly on the land. If it be convenient to convert the interior town into a seaport, it is manifest that it starts off with double the population—other things being equal—dependent upon it for transportation, to begin with. But it was found that, though Manchester was less than 40 miles from Liverpool, there were seven and a half millions of people nearer to it than to Liverpool or any other port. As it was certain that these seven and a half millions were bound, sooner or later, under the rule that all forces proceed along the line of least resistance, to seek Manchester as their port, the proposed port of Manchester became practically a city of seven and a half millions. Manchester was an interior mill center, dependent upon outports for ingress and egress from and to the world. Fayetteville had been such a center before 1865. The Manchester Ship Canal, using the waters of the Irwell and upper Mersey, was but 35½ miles long and cost $75,000,000. The distance from Fayetteville to deep water was twice as great, whereas, on the commercial side, the population of Fayetteville was but 5,000, while that of Manchester and contiguous suburbs was over a million. Even under the rule that gave Manchester 7,500,000 of population, Fayetteville could show only 2,000,000 of population. So that Manchester had half the distance to canalize that Fayetteville required and nearly four times the population—eight to one against Fayetteville—but Manchester had to dig nearly the whole distance. Fayetteville had its canal already dug, which needed only to be narrowed by longitudinal dikes or plugged up with cross dikes, as the flow of water might be found to require. Therefore if the Cape Fear could be canalized for the distance of 70 miles for, say, $1,500,000, that would be $20,000 a mile against Manchester's $2,000,000 per mile, and if it could be demonstrated that, say, 2,000,000 of people would be nearer to the port of Fayetteville than to any other port, then an expenditure of $1,500,000 by our Government for the benefit of that 2,000,000 of its citizens would be but 75 cents a head, as against the British expenditure of $75,000,000 for seven and a half millions of British subjects, or $10 per head—plainly a proposition commercially sound.

Attention is especially asked to the fact that the jutting coast line of North Carolina and the situation of Fayetteville on what would be the normal coast line, is the crux of the matter. Our jutting coast line has rendered it impossible for the greater portion of the population of North Carolina to enjoy freight rates on equal terms with the people of other seaboard States, except approach be had through the port of Fayetteville. This peculiarity differentiates this from all other river propositions offered to the Government.

The following pages contain the literature on this subject worth perusing, and the whole is presented to the people of North Carolina—whose interests, as the legislature has repeatedly declared, will be so greatly affected by the restoration of Fayetteville to its former commercial relation to the interior—for their information and consideration.

E. J. HALE,
*Chairman of Citizens' Committee on Improvement of the Cape Fear.*

---

*Presentation of case before the Committee on Rivers and Harbors January 14, 1902, by E. J. Hale, chairman of citizens' committee, of Fayetteville, N. C.*

IMPROVEMENT OF THE CAPE FEAR RIVER.

MR. CHAIRMAN AND GENTLEMEN OF THE COMMITTEE: By your courtesy I have the honor to present to you the grounds upon which the people of North Carolina ask that you retain in the bill which you are to report to the House of Representatives the item providing for an appropriation for the improvement of the Cape Fear River between Wilmington and Fayetteville. I say the "people of North Carolina," because, by a resolution of the last legislature (a copy of which I hand to you, and which I have marked "Exhibit No. 1"), the State has adopted this project as a State affair, a course which it has pursued toward no other scheme of river or harbor improvement within its borders.

On the 1st of June, 1900, a bill was passed by Congress for a survey, with a view to obtaining a navigable channel from Wilmington to Fayetteville of 4, 6, or 8 feet depth at mean low water.

On the 24th of November the Government engineer officer at Wilmington, Captain Lucas, submitted his report of the survey which he had made, recommending a plan for slack-water navigation with a minimum depth of 8 feet of water, the difference in the cost of securing 4, 6, or 8 feet being insignificant. The plan recommended provides for three locks, with a lift of 9 feet each, with a chamber 150 feet long and 28 feet wide, and a movable dam some 170 feet long, the form of lock and dam proposed being similar to those used in the Kanawha River. His report will be found in House Document No. 180 of the second session of the last Congress.

By a misunderstanding on the part of those having charge of the promotion of this improvement, the statistics necessary to prove a "commercial case" for it were not supplied to Captain Lucas in time for his regular report, which is required to be started on its way to the Secretary of War by the 20th of November. His report upon this subject, therefore, did not come to your committee from the Secretary of War until after your bill had practically been drawn; and the item for the carrying out of Captain Lucas's recommendation was for this reason—I trust I am right in saying for this reason only—not included in the bill reported by you. It was added in the Senate, and an appropriation of $250,000 voted to begin the work, which sum was

reduced to $150,000 in the conference committee of the two Houses; and, with the item in this form, the bill was passed by the House.

We now ask that you retain this item in the new bill which you are about to report.

North Carolina was once called "a strip of land between two States." As the State was the third in population at the First Census, and as it has a record of which anyone may be proud, being inferior to that of none of the original thirteen which achieved our independence, I assume that the gibe had reference to our commercial attainments, which have been inferior to those of our neighbors. This inferiority was palpably the result of our want of large seaports, but the reason for this deficiency, which has been the theme of unnumbered discussions, was obscured by the overworking of the railroad idea, under which railroads were held to be "annihilators of space." Recently the conception of the unit of transportation value as "per ton per mile" has revealed the real reason to students of our geography.

If you will be good enough to look at the map which I submit, and which I have marked "Exhibit No. 2," you will observe that the coast line of North Carolina juts out far beyond the general coast line—namely, the line running from New York, where the first great recession takes place at the North, to Savannah, where the last recession culminates at the South. The effect of this peculiarity is to place our seaports at such a great distance from the back country that the ports of our neighbors, Richmond on the north and Charleston on the south, are nearer to much of it than they. The normal seaport is on a line with its rivals. The ideal seaport is on a line (between its rivals) that presents a salient angle to landward and the reentrant angle to seaward. With us, our jutting seacoast causes those angles to be reversed in the case of lines drawn from any of our seaports to Richmond on the one side and Charleston on the other. Now, the traffic influence of any port, under the rule of equal charges per ton per mile, reaches half way to the next port. If, therefore, we should delimit the territory traffically tributary to the ports under consideration by drawing lines at right angles across the halfway points of air lines between them, we would find that these right-angle lines converge until they meet within the territory of our own State, instead of remaining parallel, as they would do in the normal port, or diverging, as in the case of the ideal port. The result of these physical conditions is such that if, instead of the commerce-repelling Hatteras, the eastern beak of North Carolina inclosed the best harbor in the world and a four-track railway connected it with the interior, it would remain as insignificant as Morehead City is to-day, which has a fine harbor and is connected with the interior by a State railway.

Before the railroad era, and when conditions were much nearer to nature than now, the force of the wagon-borne traffic in a wide area proceeded along the line of least resistance and found water at Fayetteville, which is the head of navigation on the Cape Fear and the inland end of the improvement now asked for. By reference to the map it will be seen that Fayetteville lies 50 miles west of a line from Norfolk to Charleston, the nearest existing "basing points for freight rates;" a little to the west of a line from Richmond to Charleston, and on the line from New York to Savannah, the normal coast line. Wagon-borne traffic a century ago from central and western North Carolina, southwestern Virginia, and northeastern South Carolina naturally, therefore, fixed upon this town as its port, for it was nearer to them than any other. By a striking, but entirely logical, coincidence the territory whence this ancient traffic came is almost precisely the same as that which this improvement would delimit under the rule of equal railway charges per ton per mile.

What we are asking, then, is not the establishment of novel conditions, disturbing natural ones, but the restoration of conditions as old as our civilization and as natural as the flow of water.

These conditions have been changed by circumstances which it would consume too much of your time to recount in detail—antagonisms resulting from the different origin of the immediate settlers of the Cape Fear and the Albemarle sections; errors of State policy, as in the attempt to build up a great port near the eastern coast line; the novelty of through railway trains which the necessities of the Confederacy caused to be established on north and south going railways; the partial destruction of the town by war in 1865; and deforestation at the headwaters of the Cape Fear, which curtailed the boating period in summer and rendered the river an easy prey to those competing railways.

While these circumstances have retarded the restoration of normal conditions in Fayetteville, the same fierce competition which has hammered out the unit of railway transportation has caused the establishment there of many thriving industries—cotton mills, silk mills, and the like—and the cheap freight rates which they enjoy have turned the eyes of the State again to this ancient capital. The result is the recognition of the geographical peculiarities which I have referred to, and which are more fully described in the note appended to the map which I have submitted; the realization that, except approach be had through the port of Fayetteville, freight rates on equal terms with those enjoyed by the people of other seaboard States are impossible for North Carolina; and the embodiment of these facts in the unanimous resolution of the general assembly, asking for this appropriation, which I presented to you at the outset.

Now, while it is plain that the reasons recited amply justify the State in her present attitude toward this proposed work, and while it is true that the General Government has, by its action in taking over this river and making it a national highway, "undertaken the serious responsibility of improving and developing it," it does not follow that it is called upon to undertake a scheme of improvement more costly than a reasonable expectation of results would justify. We have therefore made an estimate of these results based upon the method employed in England for "proving" a commercial reason for the granting of a charter by Parliament for works of this kind. This method, which is self-evidently sound, is described on pages 5 and 9 of the United States Government report on the Manchester Ship Canal, a copy of which I submit, marked "Exhibit No. 3." It is assumed that the population which is nearer to a given port than to any other port is bound sooner or later to become traffically tributary to it.

The existing traffic on the Cape Fear River between Wilmington and Fayetteville amounts to 115,000 tons, valued at $1,150,000. The existing railway traffic in and out of Fayetteville is 112,285 tons, valued at $5,812,614. The population in the territory shown on the map between the lines AA, B, and CC, and which is nearer to Fayetteville and the part of the river involved than to any other port, is some 2,000,000. The population concerned in the production of the existing river and railway traffic in and out of Fayetteville is 61,000. The territory, then, which is nearer to Fayetteville than to any other port contains a population thirty times as great as the population at present tributary to Fayetteville.

We therefore have this proposition:

| | Tons. | Value. |
|---|---|---|
| Existing river traffic | 115,000 | $1,150,000 |
| Three-fourths (the divertible portion) of existing railway traffic in and out of Fayetteville—¾×112,295 tons and ¾×$5,812,614 | 84,221 | 4,359,460 |
| In round numbers | 200,000 | 5,500,000 |
| Thirty times these figures would give the tonnage and value of traffic which, other things being equal, would find a cheaper route to and from the great markets by way of the Cape Fear River if improved as suggested—that is, 30×200,000 tons and 30×$5,500,000 | 6,000,000 | 165,000,000 |

If the proposed improvement were a private undertaking requiring tonnage charges for the payment of interest on its cost, it will be seen that a tax of 1 cent a ton on the estimated traffic would pay 5 per cent interest on a million and a quarter of dollars. An elaboration of this calculation and other details will be found in the Report of the Citizens' Committee on Improvement of the Cape Fear and the accompanying "note," which I also submit, marked "Exhibit No. 4."

Some other considerations in favor of this project may be briefly noted:

The proposed appropriation would merely replace the present scheme, which calls for an expenditure of $275,000, about half of which has been expended, and which is worthless, as declared by the Government engineer.

The two millions of people affected by the proposed improvement, and whose traffic has been diverted from the river by railroads and deforestation, developments of civilization, are as much entitled to consideration as if they were herded in a seaport whose harbor had been made relatively shallower by the use of deeper drafted ships, another development of civilization.

Formerly, vessels were adapted to rivers and harbors. Now, harbors are being adapted to vessels, and rivers should be also.

The Manchester Ship Canal cost $75,000,000, or $2,000,000 per mile. The canal for 8 feet of water from Wilmington to Fayetteville, 120 miles, is already dug, and an expenditure of $11,000 a mile (or $1,350,000) will complete it. Seven million five hundred thousand people are affected by the English work, 2,000,000 by the proposed American work—or $10 per capita for the Englishman and 75 cents for the American. Our commercial status in the world should justify at least this small per capita contribution to such a large body of our people, for we are not less wealthy than England.

I do not know, Mr. Chairman and gentlemen, how far you may feel influenced by the sentiment that a great State asks you for this appropriation, nor how far its relation to the nation, under our political system, may attract your attention to its requests, but I think I have made out a "commercial case" for the proposed legislation, and I would ask that you add the other two considerations for good measure.

---

EXHIBIT No. 1.

*Resolution of the general assembly of North Carolina requesting the Senators and Representatives in Congress from that State to exert their united influence to secure the adoption of the plan for improveing the Cape Fear, recommended by Captain Lucas, United States Army, as transmitted to Congress by the Secretary of War.*

Whereas the maintenance of water transportation in competition with rail is of the greatest importance to all of the citizens of the entire Cape Fear section; and

Whereas the Chamber of Commerce of the city of Fayetteville, and the Chamber of Commerce, the Produce Exchange, and the Merchants' Association of the city of Wilmington have secured a survey and a recommendation for an appropriation for the improvement of the Upper Cape Fear River; Therefore,

*Resolved by the senate (the house of representatives concurring)*, First. That our Senators and Representatives in Congress be requested to exert their united influence to secure the passage of an amendment to the river and harbor bill at this session authorizing the adoption of the plan for improving the Cape Fear River, recommended by E. Van C. Lucas, Corps of Engineers, United States Army, Wilmington, N. C., as transmitted to Congress by the honorable Secretary of War.

Second. That a copy of this resolution be forwarded to each of our Senators and Representatives.

In the general assembly read three times, and ratified this the 18th day of January, A. D. 1901.

[Captain Lucas's plan provided for slack-water navigation between Wilmington and Fayetteville so as to secure an 8-foot channel at low water. The bill for this purpose was adopted in the conference committee of the Senate and House, and an appropriation made for beginning the work. It was, however, lost along with the rest of the rivers and harbors bill, on March 4, 1901. In April, 1902, the scheme for canalization, as above, costing $1,350,000, was adopted by Congress, and $50,000 appropriated for buying sites for locks and dams. The reports of the Chief Engineer of the Army, General Mackenzie, for 1904, 1905, and 1906, carried this scheme among his recommendations.]

---

EXHIBIT No. 2.

*Extract from report of Consul Hale to Department of State, June 1, 1888, describing the grounds upon which Parliament passed the act providing for the construction of the Manchester Ship Canal.*

Before an act could be obtained for the construction of the ship canal it was, amongst other things, necessary to prove that the traffic was sufficient to justify the construction of so great a work; and it may be of interest to merchants if I name some of the figures established in spite of the most able opposition, for the scheme was opposed by all of the railway companies and by the enormous influence brought to bear by Liverpool.

In my general report upon the Manchester Ship Canal undertaking I stated that more than 150 industrial towns would be affected by that great enterprise. Exhibit No. 1 is a map upon which the area is indicated within which these industrial towns are comprised, the boundary of which area includes 7,500 square miles. This is equal to one-sixteenth of the entire area of the United Kingdom.

The population inhabiting this area is quite 7,500,000, representing

about one-fifth of the total population of the United Kingdom. The principle upon which the boundary line of this area has been fixed is the illustration of the mean distance between the nearest ocean-steamer ports now existing and the ship canal which is now in course of construction. A glance at this map will show that the most remote point from the canal in any part of the area is quite as near to the ship canal as to any of the ports named on the map which are the existing ocean-steamer ports.

E. J. HALE, *Consul.*

EXHIBIT No. 3.

IMPROVEMENT OF THE CAPE FEAR RIVER.

FAYETTEVILLE, N. C., *December 6, 1900.*

DEAR SIR: Some fifteen months ago the business men of this section began to agitate the subject of improving the Cape Fear River between this city and Wilmington, so as to secure a uniform minimum depth of water throughout the year of 4, 6, or 8 feet. Such control of internal waterways by engineering devices is common in the highly civilized states of Western Europe, and it seemed to us that there was no reason why our great country, with its greater wealth, should lag behind those naturally less favored nations in its treatment of such an important matter.

In North Carolina the Cape Fear River would, of course, first attract the Government's attention, if it should share our views on the general subject, because of the commercial history of the river, and of Fayetteville as the head of navigation thereon, in the period before the railroad era disturbed natural conditions. Even since that era set in, and in the face of changed conditions of transportation which it established, the Government has felt called upon to take over control of the river between Wilmington and Fayetteville and to make Fayetteville a port of entry. Replacing the old Cape Fear Navigation Company, which operated under the State's charter, it has sought, by a system of jetties, to arrest the effect of deforestation upon the river's water supply. The object of the movement which we are now bringing to your attention is to induce the Government to substitute for this crude and insufficient method the modern system of treatment of internal waterways which is employed in Europe and which is now being taken up in some portions of this country.

The proposition to this end at once engaged the attention of Captain Lucas, the enlightened engineer officer of the United States Army stationed at Wilmington. At his suggestion an appropriation for a preliminary survey of the river between Wilmington and Fayetteville was secured just before the adjournment of Congress in June last. The survey was completed in November, and the fact demonstrated that by the construction of two or more locks a uniform minimum depth of water 4, 6, or 8 feet could be secured throughout the year, according to the appropriation which might be made by Congress.

The movement for this appropriation has been chiefly conducted by the Chamber of Commerce of Fayetteville, but it has been heartily taken up and approved by the Chamber of Commerce of Wilmington and by the Produce Exchange and the Merchants' Association of that city. It has also attracted widespread interest beyond the Cape Fear section and, so far as we are informed, is approved throughout the State. The Raleigh News and Observer, for example, said, "The improvement of the Cape Fear becomes a matter of great importance in which the whole State will cooperate with Fayetteville." More recently, Justice Walter Clark, in a paper which he was requested by the Raleigh Chamber of Commerce to write on the subject of the commercial needs of that city, urged the importance of securing "the competition of water rates at our nearest river port," Fayetteville.

On the 15th of November just past, Captain Lucas explained to a meeting of our citizens the necessity for demonstrating that the interests involved were sufficient to justify the Government's action, before he could recommend such an appropriation as would be required. The undersigned were appointed a committee for that purpose, and their report is appended. By this you will see that the "commercial case" is proved many times over and that the pecuniary interest of nearly the whole population of North Carolina, as well as the convenience of most of them, is involved.

Attention is asked to the obvious fact that while the proposed improvement would result in a relocation of the points of freight dispersion entirely in the interests of North Carolina, the effect upon the railways within our borders would be to secure eventually a large accession of business which the restoration of the natural trade route of the State would create and that this would many times repay them for the comparatively small business which they would lose. (See also note herewith inclosed.)

Our object in addressing this communication to you is to ask your earnest cooperation with us in bringing every available influence to bear on Congress in behalf of this great work.

We request a reply, with such suggestions as may occur to you, and have the honor to be, dear sir,

Yours, respectfully,

E. J. Hale, R. L. Williams, A. H. Slocomb, W. L. Holt, W. M. Morgan, H. C. Bash, F. R. Rose, W. S. Cook, J. A. King.

REPORT OF THE COMMITTEE.

FAYETTEVILLE, N. C., *November 21, 1900.*

Capt. E. W. VAN C. LUCAS,
*Corps of Engineers, U. S. Army, Wilmington, N. C.*

SIR: The undersigned, the committee appointed at the citizens' meeting held on the occasion of your visit on Thursday last, have taken up the subjects of inquiry suggested by you, and have pleasure in reporting as follows:

*The present river traffic.*—The tonnage of the traffic by the steamboats between this city and Wilmington, as reported to the United States engineer's office at Wilmington for the year ending December 31, 1899, was, in round numbers, 115,000. We are informed that its value would average $10 per ton, which would give a total value of $1,150,000.

*Existing local railway traffic which would seek the river if improved.*—In reply to printed forms issued to our merchants, traders, and manufacturers, made out where necessary under our supervision, we find that there have been received at and shipped from Fayetteville by rail during the past twelve months 112,295 tons of merchandise of all kinds, valued at $5,812,614. It is estimated that at least three-fourths of this would at once be diverted to the river for transportation if the proposed improvements were made and the speedy and regular dispatch of freight which it would make possible were established.

*Traffic from a distance which would be diverted to the river if Fayetteville were made a "basing point."*—We are informed that as soon as the proposed improvement in navigation and the dispatch of freights is effected Fayetteville would be made what the traffic managers call a basing point for freight rates. The effect of this, we are informed, will be to cause all railways which run within the territory thus tributary to Fayetteville to make rates from Fayetteville. By the term "the territory thus tributary to Fayetteville" we mean all the country which is nearer to Fayetteville than to any other basing point, the railway commission laws requiring the rates therein to be proportionately less than to such other basing points.

We inclose a map which will show the territory thus delimited as tributary to Fayetteville. The basing points nearest to Fayetteville are Richmond and Norfolk, Va., on the north, and Charleston, S. C., on the south. We have drawn lines at right angles across air lines between Fayetteville and the three cities named, respectively, and at points midway between Fayetteville and them. Line A is the dividing line between Richmond and Fayetteville; line B, the dividing line between Norfolk and Fayetteville, and line C, that between Charleston and Fayetteville. It will be seen that while the northeast section of North Carolina falls within the territory allotted to Richmond and Norfolk, a considerable portion of southwest Virginia and a considerable portion of northeast South Carolina, each larger than the first mentioned, falls within the territory of Fayetteville. As the improvements referred to would also cause Wilmington to be made a basing point, the map would be changed thereby to a comparatively small extent, the effect of the change being to add more to the joint territory of Wilmington and Fayetteville.

We also inclose a copy of a United States Government report on the Manchester Ship Canal (see preface), in which is described the manner employed in Great Britain for "proving" a commercial reason for the granting of a charter by Parliament for such an undertaking. We shall, in this case, employ the same method in a general way, because such matters in the older countries have necessarily reached a more exact standard. An important consideration in our favor in relying upon such a method is the fact that the railway commission laws in this country now require connecting lines to transport freight delivered to them whether a tariff of through rates has been established or not, and, as before mentioned, at rates proportioned to the "length of haul."

Without entering upon a consideration of how far westward beyond the borders of North Carolina the traffic influence of the proposed improvement would extend, we ask attention to the significant coincidence that the territory now delimited on our map is almost the same as that which was tributary to Fayetteville in the last of the eighteenth century and in the first part of the present century up to the railroad era. The fact that Canova's statue of Washington was brought from Italy to Wilmington, was thence landed at Fayetteville, and finally hauled overland to Raleigh in the latter period is merely an illustration of the general conditions of transportation at that time. The proposed improvement, therefore, would not establish a novel condition, but would restore the normal relation of the Cape Fear to a vast territory which the overworking of the railroad idea and the effect of deforestation upon the water courses have disturbed. Or we may state the case this way: That it would be the reestablishment of normal conditions by a development of the problem of transportation, which conditions had been disturbed by a cruder stage of the movement.

Within the limitations of our map, as thus restricted, it will be seen that there is a population equal to that of the State of North Carolina (some 1,900,000). The population, which by a liberal estimate might be considered as involved in one way or another in the production of the existing river traffic and the existing railway traffic divertible to the river, in and out of Fayetteville, may be said to include that of Cumberland County, in which Fayetteville lies (30,000), and one-fourth of that of the contiguous counties of Sampson (7,000), Bladen (5,000), Robeson (9,000), Moore (6,000), and Harnett (4,000)—a total of 61,000. The territory, then, on the map this side of the Blue Ridge contains a population thirty times as great as the population at present tributary to Fayetteville.

We therefore have this proposition:

| | Tons. | Value. |
|---|---|---|
| Existing river traffic | 115,000 | $1,150,000 |
| Three-fourths (the divertible portion) of existing railway traffic in and out of Fayetteville—¾×112,295 tons and ¾×$5,812,614 | 84,221 | 4,359,460 |
| In round numbers | 200,000 | 5,500,000 |
| Thirty times these figures would give the tonnage and value of traffic which, other things being equal, would find a cheaper route to and from the great markets by way of the Cape Fear River if improved as suggested—that is, 30×200,000 tons and 30×$5,500,000 | 6,000,000 | 165,000,000 |

In this connection it is worth noting that Mr. Walter L. Holt, one of the chief owners of cotton mills in this county and in Alamance County, a hundred miles distant, finds that he gets his oils, dyes, and machinery and ships his finished products by river from his Fayetteville (Cumberland) mills for an average of but half the freight rate which he is obliged to pay by rail to and from his Alamance mills.

*The railway commission's figures.*—We further inclose a letter from the North Carolina corporation (railway) commission (see envelope marked "Exhibit C"), from which it will be seen that the actual freight traffic movement for the past year over the roads converging at Fayetteville and within the territory indicated on our map amounted to 1,497,979 tons, or one-fourth of the tonnage (6,000,000) which we have estimated by the per capita method for the whole territory east of the mountains. It will be observed also that the commission's letter expresses the hope that "the Government will see the importance of this station (Fayetteville), which, by reason of its situation, should again become the distributing point for the central and western North Carolina territory."

Attention may also be called to the fact that Fayetteville, at the head of navigation 100 miles inland, is the only point on the Atlantic Coast Line between Richmond and Charleston (the present basing points) which is situated on navigable water.

How far the inertia of settled routes of trade may act in restraint of the possibilities indicated above is, of course, a matter of conjecture.

*The commercial case.*—We assume that while the Government undertakes works of the kind now proposed for the public benefit and with-

out expectation of a direct return for the outlay, it is nevertheless influenced by the same considerations which influence private capitalists—that is to say, if the cost of the proposed improvement should be $1,000,000, it would be a sound commercial undertaking, commending itself to the Government from this point of view, if the additional traffic secured by reason of the outlay, or the resultant economies of transportation on existing traffic, should yield 5 per cent on that amount. Five per cent on $1,000,000 is $50,000. It is apparent that the economies of transportation which such an improvement would render possible—twelve months' running of the boats instead of nine months, the cheaper proportionate handling of larger loads, etc.—would leave a margin for tolls for the use of the improved waterway, if the work were done by a private corporation, far in excess of the reasonable rate of 5 per cent on a million dollars. An average of 25 cents a ton on the class of freight (115,000 tons now carried by the river and of 50 cents a ton on the class of freight (84,221 tons) now carried by the railways in and out of Fayetteville, but divertible to the river, would produce a revenue of $70,860, or over 7 per cent on the existing Fayetteville traffic alone. A toll of 10 cents a ton would more than pay for the whole investment of $1,000,000 in two years, if all the traffic of the tributary country were diverted this way. Such speculations as to what might be done if the river were the property of private capitalists instead of that of the Government are useful as indicating how very far within the margin of commercial safety the Government would be acting if it should make such an expenditure.

We desire, in conclusion, to heartily reiterate for ourselves the expression of thanks which the meeting that appointed us unanimously voted to you, sir, for the interest which you have taken in this great work.

We remain, with high esteem,

Yours, obediently, THE COMMITTEE AS ABOVE.

NOTE TO EXHIBIT NO. 3.

If it be asked why Government aid for such a large scheme of improvement should be sought for this particular river, a glance at a map of the Atlantic seaboard States will answer the question. It will be seen that the coast of North Carolina juts out far beyond the general coast line; that Fayetteville, at the head of navigation on the Cape Fear River, and 100 miles inland, lies on an air line between the seaports of New York and Savannah; that it is 50 miles farther west (that is, farther inland) than an air line between Norfolk and Charleston, the nearest existing "basing points for freight rates;" that the Cape Fear is the only river in North Carolina with its 300 miles of seacoast which flows directly into the sea; that it reaches the sea at a point where the abnormal coast line has receded almost to the general line, and that these geographical peculiarities result in placing the head of navigation of this river nearer to a large, populous, and highly developed territory than that of any other river south of the James. In harmony with this fact and before natural conditions were disturbed by the north-and-south-going railways and by deforestation at the headwaters of the river, Fayetteville was the shipping and receiving port for the immense territory comprised in central and western North Carolina and for parts of Virginia and South Carolina; its banking capital in 1827, when the population of this tributary territory was but half a million, was a million and fifty thousand dollars, whereas its present banking capital is but $200,000, with the population increased to two millions; it was in that former period the seat of the only branch of the Bank of the United States in the State, and of the arsenal the largest, with one exception, in the Union, and it has since been distinguished from other river towns by being made a port of entry. Finally, by this last-named act, the Government in effect converted the river from Wilmington to Fayetteville into the harbor of Fayetteville and placed itself under obligations to treat the port of Fayetteville on a plane with other ports having 2,000,000 of people dependent on them for economy in transportation.

*Copy of letter addressed to the Senators and Members of the House of Representatives from North Carolina.*

CITIZENS' COMMITTEE ON IMPROVEMENT OF THE CAPE FEAR,
*Fayetteville, N. C., February 17, 1902.*

Hon ——— ———, *Washington, D. C.*

DEAR SIR: A newspaper correspondent has stated that at the recent hearing of the North Carolina delegation before the Rivers and Harbors Committee the suggestion was made that the granting of the appropriation asked for for the improvement of the Cape Fear River between Wilmington and Fayetteville would render it necessary to grant "at least $175,000,000 elsewhere." We would ask your attention to the fact that the reported suggestion is without weight for the following reasons:

1. The improvement of the sundry rivers scattered over the United States, which might require the expenditure of $175,000,000 if improved in the manner proposed for the Cape Fear, would establish novel conditions—that is, it would create trade routes that never existed in the past, whereas the proposed improvement of the Cape Fear would merely restore natural conditions; that is, reestablish trade routes disturbed by an incomplete development of the problem of transportation.

2. Fayetteville is the only port in the United States lying nearer to 2,000,000 of people than any other port, which is not a "basing point for freight rates," the condition precedent of economical transportation service. Yet it is the only port so situated which has received nothing from the Government calculated to render it capable of becoming such a basing point.

3. Fayetteville is precisely on all fours with Richmond, Va. Both are upriver ports, Richmond being just below the first falls of the James and Fayetteville just below the first falls of the Cape Fear, and both having a large back country dependent upon them for economy of transportation. There are no other ports on the seaboard similarly circumstanced; yet the Government has granted millions since the war (and properly, too) to Richmond in order to improve the James in such a way as to preserve Richmond's relative position as a port, and not a cent to preserve Fayetteville's.

4. The appropriation asked for for the Cape Fear is distinguished from all others in the Union in the respect that it is asked for by the State—a State that contains one-fortieth of the population of all the States and about one-twentieth of the population of all the seaboard States; whereas its total askings ($515,000) amount to less than the hundredth part of the sixty millions proposed for the total rivers and harbors bill.

5. Lastly, the appropriation for the improvement of the Cape Fear was included in the bill which was passed by the House a year ago, and which, nevertheless, included appropriations for none of the rivers upon which the alleged one hundred and seventy-five millions would have to be spent.

Trusting that you will find it convenient to bring the foregoing points to the attention of the proper parties, if need be, we remain, dear sir,

Yours, obediently, E. J. HALE, *Chairman.*

*Resolution of the general assembly of North Carolina, passed February 6, 1905, requesting the Senators and Representatives in Congress from North Carolina to use their united influence to secure proper appropriation for carrying out the scheme to improve the Cape Fear River, as recommended by General Mackenzie, Chief Engineer of the Army.*

Whereas the maintenance of water transportation in competition with rail is of the greatest importance to the entire Cape Fear section; and

Whereas the citizens and commercial associations of Fayetteville and Wilmington secured a survey and recommendation by Capt. E. Van C. Lucas, Corps of Engineers, United States Army, for the improvement of the upper Cape Fear River; and

Whereas the scheme as recommended for the canalization of said river, contemplating an expenditure of $1,350,000, was adopted by Congress in April, 1902, and an appropriation of $50,000 made for purchasing sites for locks and dams; and

Whereas General Mackenzie, Chief Engineer of the Army, has recommended in his report, both last year and this, that this great scheme be carried out as adopted: Therefore,

*Resolved by the senate (the house of representatives concurring)*, First. That our Senators and Representatives in Congress be requested to use their united influence to secure the passage of an amendment to the river and harbor bill at this session making a liberal appropriation for this great scheme for improving the upper Cape Fear River.

Second. That a copy of this resolution be sent to each of our Senators and Representatives in Congress.

Mr. STONE. Mr. President, I desire to enter my protest as positively as I can against the adoption of this conference report. The amendment adopted by the Senate for continuing the improvement of that stretch of the Mississippi River between the mouth of the Missouri and Cairo ought to be insisted upon. The bill as it came from the House provided $250,000 per year for four years for that stretch, and the Senate increased that amount to $650,000 per year. The Senate conferees report that they have agreed to recede from that amendment, and it is against that I enter my protest.

I have heard what the Senator from Arkansas [Mr. BERRY] said about it; that the Senate conferees had insisted as strenuously as they could on retaining the Senate amendment, but that it was impossible to secure the concurrence of the House conferees. Of course I must accept that as the judgment of the Senator from Arkansas, but I must say that if I had been a conferee I would not have brought that report in here, if I could have kept it back, without the concurrence of the House conferees in this amendment. The Senate amendment ought not to have been abandoned. It is a great mistake from the standpoint of the public interest, and it is a gross injustice to the people of the upper Mississippi Valley—aye, of the whole Mississippi Valley—to strike this Senate amendment out, for, in effect, it amounts to a practical abandonment of all work looking to the permanent improvement of that very important section of the river.

There is no more important stretch of this great river than that between the mouth of the Missouri and the mouth of the Ohio. The appropriation made for the improvement of the Mississippi River above the mouth of the Missouri has been largely increased over former years, and wisely so, and there is also an adequate appropriation made for the improvement of the Mississippi below the mouth of the Ohio; but here is a stretch of approximately 200 miles, between the mouths of the Missouri and Ohio, which is practically deserted, so far as permanent improvement goes. This stretch runs down between the States of Illinois and Missouri and by several of the most important commercial points in the great valley of the Mississippi, and yet the disastrous and fatal policy of practically deserting and abandoning it is here proposed.

Mr. President, is it sensible from a business point of view, is it the exercise of wisdom and sound judgment, to expend millions to improve, deepen, and control the channel above the mouth of the Missouri and at the same time neglect the continuing stretch between the Missouri and the Ohio? Of course, I heartily approve the improvement between St. Paul and the Missouri, but are the ends of commerce properly subserved if the stretch below the Missouri is slighted, discriminated against, and neglected? What comes down from the north must pass St. Louis and Cairo if it goes to the Gulf.

Some years ago all work of consequence on the Missouri River was abandoned. The Missouri River Commission was abolished, and appropriations, except in small sums for specific purposes, were discontinued. But once more an effort is being made to put the Missouri on the map again. This year and in this bill $400,000 are appropriated for improving the Missouri

River. The commercial interests of Kansas City, St. Joseph, and Omaha have projects for establishing boat lines on the river. Some $250,000 have been subscribed at Kansas City to provide a line of boats and barges for use on the Missouri between Kansas City and St. Louis, and several boats are already in commission. Omaha is moving in the same direction. What this bill does for the Missouri is not much, but it is better than nothing. I hope it is the beginning of a wiser, better, and more liberal policy toward the Missouri. It is an encouragement, and it is designed to encourage—aye, to invite—the great commercial forces along the Missouri to turn their attention to river transportation; but whatever goes down the Missouri must cross this stretch of the Mississippi between the mouth of the Missouri and the mouth of the Ohio if it is to go to the sea. Here we are proposing to improve the Missouri and the upper Mississippi and to improve the lower Mississippi, and for those three purposes we are to appropriate between eleven and twelve million dollars, and yet for this great connecting link, nearly 200 miles in length, we propose to appropriate only $250,000 a year, not more than enough to provide, maintain, and operate two or three dredge boats, and let all permanent improvement go to the demnition bow-wows. It is simply amazing.

Mr. President, I beg the indulgence of the Senate while I endeavor to make this matter more clearly understood. In 1881 the plan for improving this stretch of the Mississippi was determined upon. It contemplated confining the flow of the river to a single channel having an approximate width below St. Louis of 2,500 feet at bank-full stage, the natural width in places being a mile or more at mean high water. In confining the volume of water to a channel of this width the velocity increases and, if the width be maintained, the river cleans its own channel and deepens its own bed. This result was to be attempted by closing sloughs and secondary channels and by building out new banks where the natural width is excessive, using for this purpose permeable dikes or hurdles of piling that collect and hold the solid matter that is carried in suspension or rolled on the bottom by the river. The banks, both new and old, were to be revetted, or otherwise protected where necessary, to secure permanency and prevent erosion. The object of this improvement was to obtain eventually a minimum depth of 6 feet from the mouth of the Missouri to St. Louis and of 8 feet from St. Louis to the mouth of the Ohio at standard low water.

Mr. President, this scheme is what is known as the "permanent work," and has repeatedly been declared to be practicable from a technical standpoint. I hold in my hand an extract from the report of the Board of Engineers on Rivers and Harbors, commonly called the "reviewing board," made in 1903–4, as to the feasibility or practicability of this scheme. Here is what the Board said:

> The Board has the honor to submit the following statement of its recommendations and conclusions:
> (*a*) A suitable channel in the Mississippi River between St. Louis and Cairo is one 8 feet deep, 200 feet wide where alignment is favorable and of suitably greater width where alignment is unfavorable, adapted to a barge navigation throughout all seasons of the year, except when the river is closed by ice. A suitable channel from the mouth of the Missouri to St. Louis is a steamboat channel 6 feet deep at low stages.
> (*b*) To secure this result by contraction work and shore protection is practicable.

There is the statement made by this board of engineers, as late as two or three years ago, concurred in by all the members of the board, and made after a special and exhaustive examination on the ground. Ten or fifteen years after the scheme was adopted, and after a great part of the work had been constructed at large expense, the Board of Review, the highest engineering authority connected with the work of improving rivers and harbors, unanimously reports that the scheme is practicable and that the work can be successfully completed. Who speaks to the contrary?

Mr. President, in 1896 the original plan of 1881 was somewhat modified so as to provide for incidental dredging, and two dredges were supplied by the provisions of the river and harbor act of that year for use on that stretch of the river. A resolution of the House Committee on Rivers and Harbors, which was transmitted to the Chief of Engineers by the honorable chairman of the Rivers and Harbors Committee of the House on April 25, 1903, directed the board of engineers to investigate, with a view to ascertaining whether by dredging or otherwise a suitable channel could not be maintained at less expense than in accordance with the project of 1881. The board investigated, in pursuance of that resolution, and in November, 1903, recommended that a dredging plant be provided by Congress, so that the work might be extensively prosecuted by dredging and temporary expedients until the permanent work should be completed. The board believed that dredging would provide the results desired at a minimum expense and in the shortest practicable time, if used more extensively in connection with the permanent work. Tentative estimates were submitted, with a specific recommendation that $1,200,000 should be appropriated for the dredging plant in one sum, to insure operation for at least three years. It was estimated that the annual cost of maintaining and operating the dredging plant would be $250,000.

Mr. CULLOM. Where was the dredging to take place?

Mr. STONE. Between St. Louis and Cairo.

Mr. CULLOM. That is what I wanted to know.

Mr. STONE. Two hundred and fifty thousand dollars was the amount it was estimated that the maintenance and operation of a dredging plant would cost, and yet this bill as it came from the House provides only $250,000 all told and for everything for this stretch of the river. How, then, is there to be any permanent work, and how is the permanent work already done to be protected? I understood the Senator from Arkansas to say that $250,000 would be ample to carry on the dredging and protect the permanent works. But the Senator in saying that puts his judgment against that of the engineers.

Mr. BERRY. Will the Senator permit me to interrupt him?

The VICE-PRESIDENT. Does the Senator from Missouri yield to the Senator from Arkansas?

Mr. STONE. Certainly.

Mr. BERRY. I said that the conferees upon the part of the House claimed that $250,000 per year would be amply sufficient to do the dredging and to take care of whatever might be necessary to prevent the destruction of the other works, and they claimed that the engineers had so reported. I was quoting them. The Senate conferees were on the other side of the question and did everything they could to keep the provision in the bill. The Senator from Missouri was there himself and heard the proceedings before the conference committee.

Mr. President, the statement of the chairman of the House committee was that of the appropriation made in 1905 some $200,000 yet remained unexpended. He insisted that the reason why much more was required then for this stretch of the river than now was to purchase the dredges, which have been purchased already and paid for out of the previous appropriation. He then insisted that, unless we continued the revetment scheme, which was abandoned in part, as the Senator from Missouri says, the amount provided in the House bill was amply sufficient to do the dredging, to protect the other work there, and to keep an 8-foot channel, except in certain very low stages of water, at which times it could not be done at all, even with the additional money, except by the revetment scheme. From the beginning his argument was that until the commissioners reported as to whether or not the canal was to be built from Chicago to St. Louis, the Government ought not to enter upon the revetment scheme, which was originally estimated at $18,000,000, for which $11,000,000 have already been expended, and the last estimate for which was that it would take $20,000,000 more. This bill also provides for a commission of three members, I believe, of the Mississippi River Commission, who shall again investigate the scheme.

The House conferees never would consent to an appropriation in the present bill to carry on this revetment work. Mr. BURTON insisted over and over again—and we tried to combat it—that the amount was sufficient to do the dredging, and that even if more were appropriated it could not be used in that stretch of river at the present time because the plan had been changed. That was their idea.

The Senator from Missouri said—and I did not quite like the intimation—that the Senate conferees ought to have either stood out or insisted on this amendment. There are a great many other appropriations in this bill, Mr. President. I think almost every Senator here whose State is deeply interested would have been glad that his amendment, too, should not have been yielded, but the conferees felt that we were not justified in killing this great bill, in which so many parts of the country are interested, simply because they would not give what we thought they ought to give and what we urged them in every way to give, particularly the amendment adopted on the suggestion of the Senator from Missouri, in regard to which he himself came and urged favorable action. We did all that was possible to do, except to say, "For this one item we will kill the entire bill." That we were unwilling to do. That is the reason why we consented to let the amendment go out.

I repeat, that it will do no possible good to send the bill back to conference, because the House conferees will not agree to the amendment proposed by the Senator from Missouri, which was adopted by the Senate.

Mr. STONE. Mr. President, as to killing this bill, with due respect to the Senator, I have not said that. If he understood me——

Mr. BERRY. I did not say that. I said the conferees. I did not make the reference to the Senator from Missouri. I said the Senate conferees could not say, "We will have this amendment or we will make no agreement." We were satisfied that the conferees on the part of the House would never yield the point, and we were unwilling to take that stand on this amendment, especially when it was said that there was ample money appropriated for that stretch of the river under the scheme of dredging, which is the present scheme, the other one having been practically abandoned by the resolution which the Senator read a while ago. I was most anxious to get them to agree to the amendment of the Senator from Missouri; but I was not willing to lose the entire bill because they would not consent to this or any other single amendment.

Mr. STONE. I have not said, Mr. President, that I desired the defeat of this bill. I appreciate as much as anyone the importance of the appropriations made for other sections of the country, those for use along the coast and those for improving the great harbors and ports and rivers of the country. Yet I want to say that I was greatly gratified to hear the distinguished Senator from Illinois [Mr. CULLOM] say a little while ago that the next time we have this question up he intended to make a fight even to the furthest extreme to compel a just recognition of the rights of the people and their great industries and commerce out in the Middle West and along the Mississippi Valley. I am in sympathy with that, Mr. President, and I say now that I shall be glad to follow the leadership of the Senator from Illinois when the time comes to make that fight.

Mr. President, $250,000 is not an adequate sum to maintain and operate this dredging plant and preserve even the permanent work already done. No engineer or board of engineers, collectively or singly, has ever made a statement of that kind. The statement of the engineers is to the contrary. If the Senator from Arkansas believes what he says the House conferees asserted in this behalf, he must rest his faith on their assertion, not on the official opinions of the engineers. It may be that the assertion is based on the opinion of a certain distinguished gentleman who seems to be able in some way to dominate the legislation of Congress—this House as well as the other—in all matters pertaining to the improvement of rivers and harbors. I do not call his name; I do not state where he lives or whether he holds official place; there are parliamentary proprieties I may not violate. But there is such a man somewhere in this broad land, and he seems to hold the whip hand over Congress. His word is law, his edict a command. He delivers his mandate, and there seems to be nothing left but to obey. This august and mighty man has proclaimed it abroad—and it is possible that information from him may have percolated through the conference room—that $250,000 was ample for this work. His opinion may be all-sufficient for some, but it does not convince me that the scientific opinion of trained engineers is unreliable. The engineers have declared that it will require $250,000 per year to maintain and operate the dredging plant; and if that be true, how, with this appropriation, can the work already constructed at a cost of $11,000,000 be protected and preserved?

The Senator from Arkansas [Mr. BERRY] says it is estimated that it will require $20,000,000 more to complete the permanent work, the original estimate being something more than $16,000,000. I have not the reports at hand so that I can refer to them, and I may be in error as to my recollection, but my understanding is that the present estimate of total cost for the work is about $22,000,000 instead of $16,000,000. But the Senator from Arkansas may be right in what he says as to that. He has had a long and distinguished service on the Committee on Commerce; his information concerning these matters is extensive, and he may be correct as to this detail.

As to the $200,000 balance of the last appropriation still on hand, I wish to say that the engineers report that it will be absorbed and expended by July 1 of the present year, so that there will be no balance on hand at the end of the current fiscal year. So, Mr. President, there is nothing in that.

Mr. President, I have shown from the reports of the engineers the character of the plan agreed upon for improving this stretch of the river, and have shown from their reports that their faith in the technical and practical efficiency of the plan is undiminished.

Major Burr, who is a member of the general board, and who accompanied that board three years ago when the work was inspected, did not agree with his colleagues in all their recommendations. He was for several years in charge of the work on this stretch of the river, and therefore had great personal familiarity with it. He dissented from some of the recommendations of the majority of the board and favored the employment of dredges only as a temporary expedient, with chief attention to the permanent work. He declared:

> My experience in charge of this improvement during the low-water seasons of 1899, 1900, and 1901 leads me to believe that the permanent improvement of this river is feasible from a technical standpoint, and that such an improvement will produce a low-water barge channel so superior in location, width, permanence, and certainty to any temporary dredged channel that it is much to be preferred to the latter even at a conceded greater cost.

He further declared that his experience showed that a suitable barge channel can not be maintained at all points by dredging alone. He apprehended that the appropriations would not be sufficient to carry on the dredging work planned and complete the permanent work, or even keep the latter in repair. Therefore he predicted the deterioration of the permanent works and consequent increased dependence upon this temporary expedient—dredging—to maintain a suitable channel. And his prediction has been verified.

Mr. President, the engineers say that if this work should be along the lines of the original plan—that is, by using dikes, dams, and hurdles and by revetting the banks, thus confining the channel—the velocity of the current would be so increased that it would cut its own way, very much as the jetties at New Orleans open the way to the Gulf. This work has been carried on successfully, and all the engineers who have examined it advise that the work be continued, and they say it is necessary that it should be continued if we are to establish an 8-foot channel and maintain it permanently in this stretch of the river.

The river and harbor act of 1905, in accordance with the majority recommendations made in 1903, authorized the Secretary of War to prosecute the dredging contemplated in this report and to purchase or cause to be constructed two dredges; also making available the balance then remaining on hand for use in adding to or repairing the permanent works. The sundry civil act of that year appropriated $650,000 for continuing this improvement. General Mackenzie interpreted that act as contemplating that more attention should be given to dredging and less to permanent improvement, and under that construction there has been no continuation, or practically none, of the permanent work, but for the last two or three years the engineers have devoted themselves almost exclusively to dredging.

Major Casey, who is in charge of the work and has been for some time past, says that the interpretation of this act virtually stopped all construction work for the permanent improvement of the river within the district except for the small unexpended balances from previous appropriations.

Owing to the lack of funds no work was done in the year ending July 1, 1906, on the permanent location of the channel, except at two places, both in St. Louis Harbor.

In each bill passed by Congress in recent years carrying appropriations for rivers and harbors the appropriation for this stretch of the river has amounted to $650,000 per year.

General Mackenzie, Chief of Engineers, concurring with the engineer in charge, recommends that the amount that can be profitably expended for the fiscal year ending June 30, 1908, is $650,000 in addition to the balances unexpended July 1, 1906. He says that the appropriation asked for is the estimated expenditure for one year only, and should be increased by authorization under continuing contracts for other years by at least the same sum annually. (P. 463, vol. 1, Rept. of 1906.)

There has been expended on this stretch for all purposes, principally for the so-called "permanent work," $10,903,082.59.

This is a great work, and ought to be prosecuted with a view to as speedy completion as possible. Major Burr very properly says (p. 2150, Rept. of 1903) that the appropriations should be sufficient in amount to insure the completion of the permanent work within a reasonable time. The Board of Engineers for Rivers and Harbors in 1903 (p. 2147 of Rept. of 1903) declared that the channel, to be efficient commercially, must be maintained for a considerable period of years. The Board's conclusion is, in effect, the same as the expressed opinion of Mr. John Franklin Crowell, at that time an internal-commerce expert in the employ of the Department of Commerce and Labor, whose assistance was procured by the Board of Engineers in its investigation of 1903. Mr. Crowell, in his report, which was not printed, but is still on file with the Board of Engineers, declared:

> Nothing short of a declared policy of continued improvement for a period of not less than ten years on the main lines hitherto followed by the Engineer's Office will suffice to place the waterway in position to serve in domestic commerce and foreign competition to the extent that is commercially advisable.

Major BURR—and, Senators, here is an engineer of high standing who for years was in charge of the work—expresses it as his opinion that this channel can not be successfully maintained

by dredging alone. Such statements as these coming from such high sources, coupled with the fact that no engineer or board has insisted that the channel can be so maintained, have an undoubted effect upon the minds of capitalists who can not be expected to furnish a fleet until confidence is established in the ability and purpose of the Government to maintain a channel. Two hundred and fifty thousand dollars is not sufficient to maintain and operate a dredging plant and preserve works already constructed, much less to continue and extend them, and thus carry out the plan adopted and which seems to be so near to success—for the engineers report that an 8-foot channel has been maintained during the whole of the last year, as well as for the most of the time during the past two years. The Board of Engineers in 1903, in recommending that more attention be paid to dredging, with a view to reducing the ultimate cost of the work, *estimated that $250,000 would be necessary annually for operation, maintenance, and renewal of dredging plant alone*, while large appropriations should be made for permanent work and temporary expedients, aside from dredging.

The pending bill as it passed the House appropriated $250,000 a year for four years, and provided that the money should be expended in operation and maintenance of the dredging plant already constructed and authorized and to make temporary expedients for channel regulation in connection with the dredging, and in maintaining and repairing the permanent work already constructed and in the construction of permanent work.

I repeat what I said a few moments ago, that no estimate has ever been made showing that work of that extent and dimensions could possibly be carried on with an expenditure of $250,000. The Board of Engineers, as has been seen, estimates that amount for dredging alone. To make an appropriation of only that amount looks like the preliminary step to the final and complete abandonment of that stretch of the river. This course would fulfill the prediction of Major Burr, that the policy of relying on dredging alone would grow out of the plan recommended by the majority of the Board of Engineers in 1903, although the entire Board specifically declared that they did not so intend, and committed themselves to the practicability and advisability of continuing the permanent work. Manifestly, with small appropriations which can not furnish adequate available funds for permanent work, deterioration of the work already constructed follows, and it becomes necessary to rely on the dredges to maintain a channel. Ultimately this means the loss of all the money expended for permanent work, for the sum of $250,000 annually is not sufficient for more than the work of the dredges. The Board of Engineers declared that sum to be necessary for that purpose.

The dredged channel is only a temporary channel, which may prove a great failure any year, particularly if recent high-water records should be followed by low water in subsequent seasons.

The contraction work, dikes, dams, revetments, etc., with incidental dredging, mean a permanent channel upon which commerce can rely.

Mr. President, I desire now to say a few words concerning the commercial importance of this improvement. St. Louis is the chief city of the Mississippi Valley, as New Orleans is the chief port on the Gulf. St. Louis ranks among the great manufacturing centers of the country and is the center of an enormous mining and agricultural country; and just across the river from St. Louis is the great city of East St. Louis, which is one of the most important and extensive manufacturing points in all the Central West. These two cities alone, with their outlying suburbs, contain a population of three-quarters of a million. Scores of millions are invested in all kinds of manufacturing enterprises, and tens of thousands are employed in carrying those enterprises on. But all this is so well known that it is hardly worth while to amplify upon it.

The through tonnage between St. Louis and New Orleans, which was 3,941,000 tons in 1896, has grown steadily from year to year until in 1906 it amounted to 9,260,000 tons. What the tonnage is between St. Louis and intermediate points on the Mississippi River I can not state, but it is enormous. This I know: That St. Louis and other Mississippi River towns and cities and those tributary to them, in common with the balance of the country, suffer for lack of adequate transportation facilities. The railways, though numerous and well equipped, are not able to handle the traffic with satisfactory and proper expedition. There are great coal fields in Missouri and Illinois, and south of St. Louis, on the Missouri side of the river and not far distant from the river, are among the most extensive lead mines and smelters in the country, and in the two States named—Illinois and Missouri—alone, to say nothing of the States along the upper Mississippi and Missouri rivers, vast quantities of grain and fruit are produced. There is not a more fertile or productive region in America. The country contiguous to this river is populous. The river flows by the doors of several of the largest manufacturing centers in the Middle West and through the very heart of one of the most productive regions in the world. The importance and necessity of this improvement ought not to be in controversy. The Board of Engineers for Rivers and Harbors, in their report of 1903, said:

> The report submitted by Doctor Crowell confirms the Board in its opinion that a barge channel from St. Louis to Cairo, 8 feet deep at the lowest stages, would, as an actual potential freight route, confer benefits upon a wide section of country far beyond its cost.

Mr. President, it has been contended that the present tonnage on the stretch between the Missouri and Ohio rivers is not sufficiently large to justify the expenditure necessary to complete the improvement, and it has been said that the volume carried and the means of transportation have decreased in recent years. The Report of the Engineer, 1906, shows that in 1905 the tonnage between St. Louis and Cairo was only 417,021 tons, and it has been said with truth that the number of craft plying on this stretch of the river and the tonnage carried decreased in the last few years. That is true, but it is also true that if all the points of shipment and delivery of freight be taken into account, the total tonnage would be greater far than that stated in the report.

The disparity in the tonnage between that carried over the stretch in question and that carried between Cairo and Memphis, between Memphis and Vicksburg, and between Vicksburg and New Orleans is due to the enormous amount of coke and coal carried over the Ohio for lower Mississippi River points. Eliminate that particular tonnage, and it will be found that the tonnage over the lower Mississippi, which includes everything coming out of the Mississippi above Cairo and out of the Ohio and Tennessee rivers and other great tributaries, is not so much greater than the tonnage on the St. Louis-Cairo stretch as it would otherwise seem to be; and this despite the fact that the Ohio and lower Mississippi have been put in fairly good navigable condition, while the stretch from St. Louis to Cairo has not been put in a condition of safe or even reliable navigation. In this connection I call attention to the fact that the statistics reported by the engineers in 1905 show the number of river passengers between St. Louis and Cairo was 61,232; between Cairo and Memphis, 41,696; between Memphis and Vicksburg, 114,179; between Vicksburg and New Orleans, 84,225. It should be remembered that between St. Louis and Cairo and between Cairo and Memphis the river is paralleled by several railroads, and that the railway competition is sharper along those stretches than along the stretches below Memphis. Besides the 61,232 passengers going over the river between St. Louis and Cairo the same statistics show that more than 800,000 excursionists passed in and out of St. Louis on Mississippi River boats during 1905.

Mr. President, it has been said in another place that there is not a boat owned in St. Louis running upon this stretch of the river. Regarding that statement I desire to read a letter from Mr. W. F. Saunders, secretary of the Business Men's League of St. Louis. It is as follows:

> ST. LOUIS, MO., *February 6, 1907.*
>
> Hon. WILLIAM J. STONE,
> *United States Senate, Washington, D. C.*
>
> MY DEAR SENATOR: For your information allow me to tell you that the following boat lines, owned almost entirely by St. Louis capital, operate on the Mississippi River:
>
> St. Louis and Tennessee River Packet Company, eight boats; Eagle Packet Company, five; Chester Line steamers, two; St. Louis and Cape Girardeau Transportation Company, one; Columbia Excursion Company, one; New Union Sand Company, two; Wiggins Ferry Company, ten; Interstate Car and Transfer Company, four; Madison Ferry Company, three; Venice and Carondelet Transportation Company, two; Ivory Transfer Company, two, and many smaller boats and a number of barges.
>
> I think you may need this information as Mr. DAVIDSON, in the House of Representatives Tuesday, made the statement that St. Louis capital owned no boats on the Mississippi.
>
> Very truly, yours,
>
> W. F. SAUNDERS, *Secretary.*

Mr. President, the main argument made against this increased appropriation is that the commerce passing over this stretch of the river is not sufficient to warrant it, and that it has decreased in recent years. I have assurances in the form of numerous letters from among the most prominent business men of St. Louis, some of which I have here, in which they say that if assurance could be given, such as business men could rely upon, that a channel 8 feet in depth would be maintained from St. Louis to Cairo, in ninety days a barge line worth more than $2,000,000 would be put upon the river.

The Senator from Maine [Mr. FRYE] read some statements in answer to a question propounded by the junior Senator from Illinois [Mr. HOPKINS] that a barge line that formerly operated on this stretch of the river has been sold and taken elsewhere. That is true. But I am going to take time at this juncture to

read a letter, which, I think, will throw some light upon that situation. It is also a letter from the secretary of the Business Men's League, which is the leading commercial body of St. Louis. In this letter Mr. Saunders explains the cause of the falling off of river traffic and gives the views of capable and experienced men as to the future of that traffic under improved conditions:

ST. LOUIS, *February 6, 1907.*

Hon. WILLIAM J. STONE,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR STONE: I have consulted with Mr. W. P. Kennett, of the Merchants' Exchange, whom you know, and with Mr. William K. Kavanaugh, in order to answer your question.

Mr. Kennett is an expert river man, understands all the river's conditions, and is a partner of D. R. Francis in business. Mr. Kavanaugh is president of the Wiggins Ferry Company, and has been in the river business for years. They agree on this statement:

In 1897 the river business in St. Louis was at its greatest degree of prosperity. The St. Louis Anchor Line was running packets to New Orleans. The Mississippi Valley Transportation Company, a towboat and barge line, was carrying grain to New Orleans, and the St. Louis Steel Barge Company was also carrying grain to New Orleans. About that time we had a succession of years of low water, and the two barge lines frequently had their boats on the bars. The railroad competition was very keen, and an appropriation for carrying out the plan for permanent improvement of the river, made by the United States engineers in 1881, seemed to be very uncertain. The Anchor Line lost several boats by fire. The river conditions made the insurance companies put their rates up until they were almost prohibitive. Henry Haartsick, the owner of the Mississippi Valley Transportation Company, had made a fortune in this business and wanted to get out, so he sold his line. The St. Louis Steel Barge Company, of which Henry S. Potter was the president, became discouraged and did the same thing. About this time Senator CARTER talked the river and harbor bill to death, and that completed the loss of confidence in the intention of the Government to keep the river navigable. It became impossible to make capital believe that the Government intended to carry out the permanent improvement of the Mississippi River, and the Rivers and Harbors Committee indicated that they would not guarantee to carry out those plans. Everybody in this part of the country became discouraged as to river navigation, and the traffic decreased rapidly. For the last two or three years there has been approximately 8 feet of water between here and Cairo, but it could not be relied upon because everybody knew that it was due to the exceptional conditions in all the rivers, all of them having been much higher during the last three years than usual. If the policy of Congress had been defined to be a permanent improvement of the Mississippi River, the traffic would never have decreased; and if the policy of Congress were defined now as the maintaining of the navigability of the Mississippi between St. Louis and Cairo, we would have a two-million-dollar towboat and barge line in commission between St. Louis and New Orleans within three months.

In considering the demand of that part of the Mississippi River between St. Louis and Cairo for that improvement which we are asking, it must not be considered as a river between St. Louis and Cairo, but as a link in the Mississippi River between St. Paul and New Orleans and between St. Louis and New Orleans. Capt. Henry C. Haartsick, president of the Mississippi Valley Transportation Company, says that plenty of capital is waiting in St. Louis to be invested in a barge-line business, because it has been shown to be profitable, but it will not be invested until the Government insures the channel.

Why should it be?

Henry S. Potter, president of the St. Louis Steel Barge Company, says: "Give us a guaranteed, safe stage of water throughout the year and the export trade of the Mississippi will reach a magnitude to justify the Government's expenditure of money necessary." John Franklin Crowell, internal-commerce expert of the Department of Commerce and Labor, who investigated for the Government the question of the commercial advantage of the river between St. Louis and Cairo, in making his report to the United States engineers, concluded by saying: "If the value of the Mississippi River above Cairo as a transportation line is to be made commercially effective it will be necessary to keep an open channel from St. Louis to Cairo of 8 feet, except when navigation is closed by ice. In order to realize this it is only necessary to carry to completion the project of permanent improvement, which has already eliminated the obstacle to navigation over fully 40 per cent of the course in question from St. Louis southward. Nothing short of a declared policy of continuous improvement for a period of not less than ten years on the main lines hitherto followed by the engineer's office will suffice to place the waterway in position to serve in domestic commerce and foreign competition to the extent that is commercially advisable."

St. Louis is insisting on the appropriation of $650,000, and that because nothing less than that will carry out the plan of permanent improvement made by the engineers in 1881, and nothing less than that will declare the policy of continuous improvement.

In announcing an appropriation of only $250,000 a year for the Mississippi River between St. Louis and Cairo it would seem that an effort has been purposely made to entirely make the Mississippi River unnavigable, because upper Mississippi River improvement will do no good unless the St. Louis-Cairo stretch receives care.

Sincerely, yours,

W. F. SAUNDERS, *Secretary.*

Unless a navigable channel of 8 feet or more is established and maintained between St. Louis and Cairo it is unreasonable to expect that large capital will be invested in boats, barges, etc., for river transportation. Necessarily the improvement work was for years experimental, and capital was timid about investments. This timidity or fear was accentuated by the low water which prevailed for several years following 1897 and the consequent difficulty and loss incident to river navigation. There is plenty of capital in St. Louis ready and willing to invest in river fleets whenever assurance can be given that the necessary channel has been established and that it will be consistently maintained. Major Casey, the engineer in charge, reports that during the last year an 8-foot channel was obtained and maintained between St. Louis and Cairo. The accuracy of that statement has been questioned by some practical river men. I am told that Major Casey has informed the House Rivers and Harbors Committee that no one questions that the 8-foot channel has been maintained for the year as reported except "some cranky pilots." I do not, of course, take sides in that controversy, if, indeed, controversy it can be called; but this I affirm, that when any river pilot, although cranky, makes a statement of this character it is calculated to impair confidence. But far more is confidence impaired by a vacillating course on the part of the Congress. The whole plan of improvement was changed, or greatly modified, in 1905 against the judgment, and I can almost say against the protest, or over the protest, of the engineers who had been more immediately in charge of the work. This did not tend to restore confidence in the efficiency of permanency of the work, and it could hardly be expected that large investments would be made under such circumstances. And now, just as we are told by the engineers that they have been successful in opening and maintaining a navigable channel, and when we might expect capital to begin venturing upon experiments, it is proposed to cut down the appropriation to less than one-half the amount of former years and less than one-half the amount the engineers say is necessary to carry on and maintain the work.

Yet we wonder why the commerce on that stretch of the river goes down, and why the capitalists of St. Louis do not invest in boats and barges for river navigation. There is neither justice nor reason in such a contention. A policy such as we are following creates uncertainty, destroys confidence, and retards the development of that immense commerce that would almost certainly follow if more assuring conditions prevailed.

The Mississippi River Commission, in their report of 1905, speaking generally on this subject, said:

It is evident, however, that the confidence of the capitalist who must provide the means for building river craft and the steamboat man who navigates it can only be secured by the complete and uninterrupted maintenance of an adequate channel for a period of several years, and the assurance that an ample plant will at all times be maintained and operated by the Government to meet all the difficulties that may arise. The success achieved in the past and the consequent faith the Commission has in the efficacy of dredging in the maintenance of a satisfactory navigable channel is too important a matter to be subject to interruption through the possible failure of appropriation bills. One failure of that kind would destroy the confidence established by many years of successful maintenance of the channel.

That is what we are doing now—destroying confidence. Just as faith was reviving and confidence was beginning to assert itself; just when the people out there were preparing to venture upon investments that would supply the needs and means of river transportation, we confront them with this demoralizing proposition. I can not characterize as I would like without offending.

The Senator from Arkansas [Mr. BERRY] said it was objected by the conferees on the part of the House that this work of permanently improving the river according to the plans adopted by the engineers should not be carried on now because a survey has been ordered with a view to deep water from the Lakes to the Gulf. Mr. President, the gentleman who interposes that objection is opposed to the deep-water scheme. He has been obliged to give some attention to the great and ever-augmenting demand of the Central West for this deep waterway, and at last he consents to a survey. The survey is necessary; it is all right; and I think the work will be in very capable hands. But are we to have the deep waterway? And if so, when are we to have it? Mr. President, this deep-water scheme is one of stupendous proportions. It means years in time and untold millions in expenditure. I am for it, of course—very heartily for it. But, Mr. President, under conditions prevailing here, legislative conditions here, that scheme will hardly mature or eventuate in any practical solution for years to come. In the meantime is this great river improvement to wait on this yet uncertain and distant project? If so, why should not the lower Mississippi wait upon it also? Why, sir, I can not believe that this argument is seriously advanced. It is almost like adding insult to injury.

Mr. President, I know that this conference report will be agreed to, but I could not let this great injustice to the States of the West pass by without entering an earnest protest against it. I shall vote against agreeing to the report. My only regret is that I am unable to do anything more effective.

Mr. HOPKINS. Mr. President, it is not my purpose to delay the Senate at any length in coming to a vote on the report of the committee of conference, but I feel that in duty to the people whom I in part represent and to the general public I should emphasize the fact that in the abandonment of the amendment which was adopted by the Senate making the appropriation of $650,000 per year the conference committee abandoned a settled policy which was inaugurated many years

ago by Congress on this very subject. It appears that under representations made by the general engineers permanent works were inaugurated on this section of the Mississippi River, and to-day more than $10,000,000 have been expended for the purpose of establishing a clear waterway of a depth of at least 8 feet at low-water mark.

Is it possible, Mr. President, that because the conferees on the part of the House refuse to adopt this amendment they are going to control the action of Congress and the eleven million of money that has already been expended upon this part of the river is to be abandoned, and we are only to appropriate a little pittance of $250,000 a year simply for dredging purposes?

It appears from what has already been said that the amount of money that is proposed by the conference committee here is not to maintain the works that have already been established on the river between the mouth of the Missouri River and Cairo; it is simply for dredging purposes.

It seems to me that in the interest of economy, to say nothing of the benefits that would come to the great commerce of the Middle West, we should adhere to the amendment that was agreed to by the Senate and use the amount of money that the engineers of the Government say can safely and properly be expended, and that is $650,000.

If it shall be the will of the Senate that this conference report shall be returned and the Senate conferees enter into new negotiations with the conferees on the part of the House, there is one other amendment to which I wish to call the attention of the committee—that is the amendment of $400,000 that was made for the Chicago River. It was with surprise and regret, Mr. President, that I discovered in looking over the proposed amendments here that the Senate conferees had yielded to the House upon that meritorious amendment.

Some eight or ten years or longer ago Congress embarked upon a permanent system of improvement of the Chicago River. A considerable amount of money was appropriated for that purpose, but it was found that owing to several tunnels that were under the river, that had been placed there by the order of the city of Chicago, this improvement could not be properly made, and hence Congress suspended making any appropriations whatever.

In 1889 we had a tonnage in the Chicago harbor of more than 8,000,000 tons annually, but by reason of the neglect of Congress it has gradually decreased until to-day it is but something over 5,000,000 tons. But that is a very large amount, and when you compare it with the harbors of any other section of the country it is still one of the largest. Yet we have only asked for $250,000 for the improvement of the harbor and $400,000 for the river. These two appropriations, in order to meet the needs of commerce on that great inland sea, go together. We should have $400,000 for the improvement of the river and $250,000 for the improvement of the harbor.

When this matter was suggested in the Committee on Commerce of the Senate, and when it was considered in the Senate, there was no division whatever among Senators as to its propriety and necessity, and yet I find that the conferees on the part of the Senate have yielded to the conferees on the part of the House on this question, and instead of permitting us to have $400,000, as proposed by the Senate, we are, under the conference report, to receive only $300,000.

I say to the honored chairman of the conference committee that, if it is possible, I trust he will revise that portion of the report and give us the $400,000 approved by the Senate. The commercial interests of Chicago write me that $400,000 now will be as good as a million dollars a few years hence. Millions of dollars have been expended upon this river by the people of Chicago where only thousands are now asked from the Federal Government. Justice demands that the $100,000 taken from this appropriation by the conferees of the House be restored by the Senate.

Mr. WARNER. Mr. President, I would not at this time detain the Senate for a moment were it not for the fact that I believe a great injustice has been done to a part, and a very important part, of our country. It was unfortunate, at least, that the amendment of the Senate giving $650,000 for the improvement of the Mississippi River from the Missouri to the Ohio was not insisted upon. When this amendment was put on the bill by the Senate the great commercial interests of my State—all the great commercial industries of St. Louis, Kansas City, and St. Joseph—rejoiced and felt that justice at least would be meted out to them; and great, sir, is the disappointment that that amendment has been abandoned by the conferees upon the part of the Senate. Of the nine leading cities of the Union represented by the volume of business in the clearing houses of the country, two of them are located in the State of Missouri, and those two cities are vitally interested in the improvement of the Mississippi River.

We realize, sir—our merchants, our manufacturers, and our great shipping interests realize—that the only sure regulator of freight rates is river transportation. The abandonment of the permanent improvement of the great stretch of the Mississippi River between the Missouri and the Ohio rivers, the outlet of the great granary of Illinois, Kansas, Nebraska, Missouri, and largely the State of Iowa, the granary of the great West, is to be deplored. In my own city, sir, so great is the interest in water transportation that already nearly a quarter of a million dollars is being expended to put a fleet of boats upon the Missouri River, in the hope that from Kansas City on to St. Louis and on to New Orleans there should be uninterrupted navigation, but their hopes are blasted by the surrender of this amendment.

I should hope that the chairman of the Committee on Commerce [Mr. FRYE] would at least consent that one more effort be made in the interest of justice and in the carrying out of every recommendation that has been made by the War Department, rather than surrendering to the dictum of any one man in either House.

Mr. CULLOM. Mr. President, I had some statistics which I desired to offer on this occasion showing the trade and commerce between Chicago, St. Louis, and down the Mississippi River. Those statistics, however, have not come to me in such shape that I can very well insert them in the RECORD. Otherwise I should ask to do so. I only want to say that the report of the amount of tonnage, etc., going down the river from Chicago and St. Louis to the Gulf is very greatly misrepresented, and that that commerce is very much more than has been represented here.

I want to say further that in future, before another river and harbor bill shall be acted upon by the Senate, I shall desire to submit some more lengthy remarks on the subject.

Mr. ALLISON. Mr. President, I do not wish to delay a vote upon the conference report, although I think I should say a few words respecting it.

I sympathize with the views expressed by the Senators whose States border on the Mississippi River, but I am not quite sure that from this debate we shall have an accurate knowledge of the situation if it be true, as stated by the junior Senator from Illinois [Mr. HOPKINS] and the senior Senator from Missouri [Mr. STONE], that the failure to make this additional appropriation of $400,000 is an abandonment of the Mississippi River as a great commercial medium of transportation. I have listened to the debate as well as I could, and I find that there is a contest only concerning what this $250,000 appropriation will do. If it in the slightest degree abandons the general improvement of the Mississippi River or jeopardizes the large expenditure already made between the mouth of the Missouri and Cairo, this conference report ought to be rejected, for I do not regard as so important the appropriation for the improvement of the Mississippi River between Cairo and the mouth of the Missouri River or between the mouth of the Missouri River and St. Paul as I regard it of importance that the river should be improved as a connected waterway along the whole line of navigation from St. Paul to New Orleans or to the mouth of the river.

I should not have said anything upon this subject except that it was stated by one of the Senators—I am not sure whether the chairman of the Committee on Commerce [Mr. FRYE] or the Senator from Arkansas [Mr. BERRY]—that the House conferees oppose this additional appropriation proposed by the Senate until it shall have been ascertained whether the waterway proposed between Chicago and St. Louis should be entered upon. I want to protest against that as being no valid reason for the rejection of this appropriation. I sympathize with the Senator from Illinois as respects the projected waterway from Chicago to the Mississippi River, and when it is presented here in any reasonable form I shall vote for it, if I am here. But the regular and constant improvement of the Mississippi River from St. Paul to the mouth of the river should go on from year to year irrespective of the suggested waterway between the Lakes and the Mississippi.

Mr. BERRY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Arkansas?

Mr. ALLISON. Certainly.

Mr. BERRY. Mr. President, I will say that this bill provides for the expenditure during the next four years of $12,000,000 for the improvement of the Mississippi River from St. Paul to the Gulf. I do not think there is any abandonment or intended abandonment anywhere of such appropriations for the Mississippi River on the part of anyone. The statement was

that last year the revetment scheme, which it is estimated will cost $20,000,000, was suspended for the time being, and provision was made for dredging the river and protecting the work. The statement was made that that part of the scheme was not to go on, but that the $20,000,000 proposition was to await the report of the commission provided in this bill to investigate the entire subject from Chicago down the river to Cairo. That is the only part of the scheme which the chairman of the House committee was not willing to keep up and reestablish the old revetment scheme, which was to cost $20,000,000. He also insisted that for the dredging scheme now in force, which has been adopted within a year or two, that the $250,000 per year in the bill, with the $200,000 now on hand, was amply sufficient. That is his position; but that was not our position, because we tried to get the House conferees to allow every dollar contained in the Senate amendment.

Mr. ALLISON. I listened as well as I could to the debate upon that subject by Senators, and I have a fear that it will go out to the people, who are very much interested in this question, that in some way the Senate conferees have abandoned the idea of making permanent and continuous improvements of the Mississippi River.

Mr. BERRY. The Senate conferees?

Mr. ALLISON. The Senate conferees, by yielding in the matter of this additional appropriation. I understand both the chairman of the committee and the Senator from Arkansas have expressed the opinion that at least it was a doubtful question whether this $250,000 would not continue this improvement between St. Louis and Cairo.

Mr. BERRY. I express no opinion about it, Mr. President. I simply said that the chairman of the committee of the House conferees had insisted on it.

Mr. ALLISON. I asked the Senator the question because I am not opposing an agreement as respects this report; but do I understand the Senator from Arkansas and the chairman of the committee to agree with the Senator from Illinois and the Senator from Missouri that the surrender of this additional appropriation will have the effect of retarding the natural and constant progress of the improvements of the Mississippi River?

Mr. BERRY. I will let the chairman of the committee answer that.

Mr. ALLISON. That is the first question that my constituents will ask me when I reach home—whether or not the Senate of the United States, in a great river and harbor bill, embracing many million dollars, extending over the whole country, have abandoned the improvement of 180 or 200 miles of the greatest river on this continent, if not in the world.

Mr. CULLOM. And right in the middle of it.

Mr. ALLISON. And right in the middle of it, as the Senator suggests. What I want to know is what the differences are. Whether it be true that by adopting this conference report we are to tacitly agree that no adequate appropriation shall be made for the improvement of the Mississippi River between the mouth of the Missouri River and Cairo until it shall appear here that we are to build a canal of 14 feet depth from Chicago to the Mississippi River. If that is the situation here, I think this report ought to be rejected; but I do not understand it to be the situation. Therefore I take a moment to say that I believe, notwithstanding the failure on the part of the Senate to secure the appropriation they originally put into this bill, the improvement of the Mississippi River will go on from St. Paul to the mouth of the river, and although the Senate has in this bill been unable to secure all it wanted to secure, that it has secured very much looking to the permanent improvement of the Mississippi River.

Mr. STONE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Missouri?

Mr. ALLISON. I yield to the Senator.

Mr. STONE. Two hundred and fifty thousand dollars per year for a period of four years has been appropriated or is carried in this bill for this stretch of river. If it requires that amount to maintain and operate the dredging plants, leaving no balance for the maintenance, much less the continuance of the permanent improvements, what will become of the $11,000,000 that have already been expended on that stretch of river?

Mr. ALLISON. Mr. President, that is what I have been trying to ascertain. If that $11,000,000 is to be lost and if this additional appropriation is necessary to save it, then we are in a dilemma as respects it; but, so far as I could gather from the report of the committee and from the remarks of those who defend it and who are familiar with it, they do not state to us that this $250,000 is insufficient to defend and protect whatever we have in this stretch of river at this time.

Mr. CULLOM. Will the Senator allow me to interrupt him?

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Illinois?

Mr. ALLISON. Certainly.

Mr. CULLOM. My understanding is that there is no pretense that any part of the appropriation is to be used for revetment work in that stretch of the river.

Mr. ALLISON. We all know that this conference report is to be agreed to and that we have only taken this opportunity for stating our views, as well as we could, in protest against some of its features. I agree that $12,000,000 is a very large sum, and an adequate sum, perhaps, for the Mississippi River from St. Paul to its mouth; but I also suggest to the Senator from Arkansas and to those Senators who live below the mouth of the Ohio that $9,000,000 of that $12,000,000 is to be expended below the mouth of the Ohio River.

Mr. BERRY. I will say to the Senator very frankly that I feel the greatest interest in that part of the river from Cairo down to the Gulf, and I was especially glad to see that appropriation made, but I am also interested in all of the Mississippi River.

Mr. ALLISON. I will say to the Senator that I have appreciated that interest for a great many years; I have noticed that the Senator has been especially interested in that region south of the mouth of the Ohio. Some of us have been interested in that portion of the Mississippi River north of the mouth of the Ohio, and I am one of those. I was not quite satisfied with the amount allotted, if I may use that term, in this bill to the Mississippi River above the mouth of the Missouri; and, Mr. President, I should be glad before the vote is finally taken that there should be some explanation that will lead our people who reside north of the mouth of the Missouri to believe that when their projects reach the mouth of the river they are not to be stopped because there is not a sufficient appropriation of public money for the river between that point and Cairo.

Mr. FRYE. Mr. President, just one word. There never in our committee of conference was one word said about abandoning the improvement of the Mississippi River at the stretch which has been under discussion to-day. I have no idea that the project will be abandoned; but in 1905 there was a disposition to partially change the project from the old one to a new one by lateral canals in certain stretches which were to be used instead of the river bottom itself. In order to do that, this very bill which has been under discussion provides for a commission of, I think, five engineers, to go over this matter thoroughly and determine whether or not that project can be changed, and whether or not it shall be deserted. It will not be deserted unless it shall be so recommended by the engineers.

Mr. CULLOM. The only danger about this is, that unless the revetments are taken care of during this period of time, the money heretofore expended will be lost.

The VICE-PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

Mr. OVERMAN. Mr. President, to accompany the conference report, I think it proper that the resolution which I send to the desk should be introduced. I ask unanimous consent for its present consideration.

The VICE-PRESIDENT. The Senator from North Carolina submits a concurrent resolution, which will be read.

The concurrent resolution was read, considered by unanimous consent, and agreed to, as follows:

*Resolved by the Senate (the House of Representatives concurring)*, That the Clerk of the House of Representatives be instructed in the enrollment of the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, to strike out the word "Sevan," where it occurs after the word "connecting," on page 105, line 1, and to insert in lieu the word "Swan," to correct what is evidently a clerical error in the preparation or printing of the bill.

### MEMORIAL SERVICES ON THE LATE REPRESENTATIVE RIXEY.

Mr. DANIEL. Mr. President, I take this occasion to give notice that on Saturday afternoon, before a recess or adjournment, I shall ask the Senate to adopt appropriate resolutions and to take becoming action concerning the late Representative JOHN F. RIXEY, who recently died, and whose funeral has been attended by a committee of this body.

### CUSTOMS BOARDING BOAT AT GALVESTON, TEX.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 7684) to provide and maintain for the port of Galveston, Tex., a customs boarding boat, which was, in line 4, to strike out "thirty-five" and insert "ten."

Mr. CULBERSON. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

CONSIDERATION OF BILLS ON THE CALENDAR.

The VICE-PRESIDENT. Under the unanimous-consent agreement, the Calendar is in order.

Mr. KEAN. That is, under Rule VIII?

The VICE-PRESIDENT. The unobjected cases.

Mr. FRYE. What was the unanimous-consent agreement?

The VICE-PRESIDENT. That after the close of the remarks of the Senator from Colorado [Mr. PATTERSON] and the consideration of the conference report on the river and harbor bill the Senate should proceed to the consideration of unobjected cases on the Calendar.

Mr. FRYE and Mr. KEAN. Under Rule VIII.

The VICE-PRESIDENT. Under Rule VIII. The Secretary will state the first bill on the Calendar.

BILLS PASSED OVER.

The bill (S. 2993) to ratify an agreement with the Yankton Sioux Indians of South Dakota, and making appropriation to carry the same into effect, was announced as first in order on the Calendar.

Mr. GAMBLE. I suggest that that bill go over in the absence of the senior Senator from Minnesota [Mr. NELSON].

The VICE-PRESIDENT. The bill will be passed over.

The bill (H. R. 17833) providing for the administration of the operations of the act of Congress approved June 17, 1902, known as the reclamation act, was announced as next in order.

Mr. KEAN. I think the Senator from Idaho wants that bill to go over.

Mr. HEYBURN. Yes.

Mr. KEAN. Let the bill go over.

The VICE-PRESIDENT. The bill will be passed over.

The bill (H. R. 17838) to regulate the employment of child labor in the District of Columbia was announced as next in order.

Mr. KEAN. Let that bill go over; not that I have any objection to the bill, for I shall vote for it.

The VICE-PRESIDENT. The bill will be passed over.

The bill (S. 188) for the relief of the legal representatives of George W. Soule was announced as next in order.

Mr. BURKETT. Let that bill go over.

The VICE-PRESIDENT. The bill will be passed over.

S. KATE FISHER.

The bill (S. 1569) for the relief of W. W. Jackson was announced as next in order.

Mr. CLAPP. Mr. President, if it is permissible, in lieu of that bill I should like to have taken up House bill 8080, which passed the House and was amended by the Senate. I want to withdraw the Senate amendment.

The VICE-PRESIDENT. What is the Calendar number of the House bill?

Mr. CLAPP. It never has been on the Calendar. It went to the House and came back on request.

The VICE-PRESIDENT. The Chair will lay before the Senate the message from the House relative to the bill.

Mr. CLAPP. I ask that that be done.

The VICE-PRESIDENT laid before the Senate the message from the House of Representatives returning to the Senate, in compliance with its request, the bill (H. R. 8080) for the relief of S. Kate Fisher.

Mr. CLAPP. I move to reconsider the vote by which the Senate amendment was adopted.

The VICE-PRESIDENT. The question is on the motion of the Senator from Minnesota, that the votes by which the amendment of the Senate was ordered to be engrossed and the bill to be read a third time and passed be reconsidered.

The motion was agreed to.

Mr. CLAPP. I now move that the Senate amendment be rejected.

Mr. SPOONER. Will the Senator from Minnesota state, in a word, what the bill is about, so that the Senate may understand?

Mr. CLAPP. The bill is for the relief of S. Kate Fisher, who paid $400 into the land office at Duluth, which ought to be reimbursed to her.

Mr. SPOONER. I think it ought to be.

Mr. CLAPP. On the consideration of the bill in the Senate the Senator from South Dakota moved an amendment to the bill, which I knew nothing about, but the House rejected the amendment. I have the permission of the Senator from South Dakota——

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Minnesota yield to the Senator from New Hampshire?

Mr. CLAPP. Yes.

Mr. GALLINGER. I assume that that bill has no relation to the bill on the Calendar, the title of which was just read, which is for the relief of W. W. Jackson.

Mr. CLAPP. No; I asked permission to pass that over and take up the bill I have named in place of it.

Mr. SPOONER. I think the bill ought to pass. I have looked into it.

The VICE-PRESIDENT. Without objection, the vote by which the Senate agreed to the amendment is reconsidered, and, in the absence of objection, the Senate amendment is disagreed to.

The bill was ordered to a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24103) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1908, and for other purposes.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. TAWNEY, Mr. SMITH of Iowa, and Mr. TAYLOR of Alabama managers at the conference on the part of the House.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

S. 3638. An act providing for the retirement of noncommissioned officers, petty officers, and enlisted men of the Army, Navy, and Marine Corps of the United States;

S. 8451. An act ratifying and confirming chapter 58 of the twenty-third legislative assembly of the Territory of Arizona, providing for repair of the Territorial bridge at Florence, Pinal County, Ariz.;

S. 8510. An act to amend an act providing for the public printing and binding and the distribution of public documents;

S. 8533. An act to authorize the Court of Claims to hear, determine, and adjudicate the claims of the Sac and Fox Indians of the Mississippi in Iowa against the Sac and Fox Indians of the Mississippi in Oklahoma and the United States, and for other purposes;

H. R. 23864. An act granting an increase of pension to James A. Miller;

H. R. 28890. An act granting an increase of pension to Jacob B. Haslam;

H. R. 23912. An act granting an increase of pension to James E. Fitzgerald;

H. R. 23961. An act granting an increase of pension to Oscar N. Cowell;

H. R. 23966. An act granting an increase of pension to Hugh Stevenson;

H. R. 23967. An act granting an increase of pension to Henry Hill;

H. R. 23968. An act granting an increase of pension to Alexander McWhorter;

H. R. 23971. An act granting an increase of pension to Mary E. C. Butler;

H. R. 23982. An act granting an increase of pension to Thomas H. Seed;

H. R. 23997. An act granting an increase of pension to Michael M. Field;

H. R. 23999. An act granting an increase of pension to John F. Gough;

H. R. 24000. An act granting an increase of pension to Mary Holle;

H. R. 24002. An act granting an increase of pension to Michael F. Gilrain;

H. R. 24015. An act granting an increase of pension to Aaron C. Sanford;

H. R. 24028. An act granting an increase of pension to George H. Boney;

H. R. 24030. An act granting an increase of pension to Andrew J. Foor;

H. R. 24031. An act granting an increase of pension to John Downey;

H. R. 24034. An act granting an increase of pension to Mary I. Banta;

H. R. 24037. An act granting an increase of pension to Theodore Teeple;
H. R. 24061. An act granting an increase of pension to John C. Nelson;
H. R. 24068. An act granting an increase of pension to John Maginnis;
H. R. 24079. An act granting an increase of pension to David Jones;
H. R. 24100. An act granting an increase of pension to Henry W. Wilson;
H. R. 24101. An act granting an increase of pension to George W. Ashton;
H. R. 24161. An act granting an increase of pension to Hugh O'Neal;
H. R. 24171. An act granting an increase of pension to Finus M. Wyatt;
H. R. 24183. An act granting an increase of pension to Joseph B. Joyce;
H. R. 24189. An act granting an increase of pension to Frederick Hoffner;
H. R. 24194. An act granting an increase of pension to William Davis;
H. R. 24197. An act granting an increase of pension to Mary Ann Foard;
H. R. 24210. An act granting an increase of pension to George H. Maddox;
H. R. 24215. An act granting an increase of pension to George Hoell;
H. R. 24220. An act granting an increase of pension to William P. Robbe;
H. R. 24225. An act granting an increase of pension to William Ivans;
H. R. 24226. An act granting an increase of pension to Francis J. Eachus;
H. R. 24269. An act granting an increase of pension to William L. Stewart;
H. R. 24288. An act granting an increase of pension to John Gooding;
H. R. 24294. An act granting an increase of pension to Daniel R. Lamoreau;
H. R. 24299. An act granting an increase of pension to William B. Doyle;
H. R. 24308. An act granting an increase of pension to Lyman Thompson;
H. R. 24334. An act granting an increase of pension to Emma Case;
H. R. 24338. An act granting an increase of pension to James M. Gardner;
H. R. 24343. An act granting an increase of pension to James M. Haney;
H. R. 24344. An act granting an increase of pension to John H. James;
H. R. 24397. An act granting an increase of pension to David Prunkard;
H. R. 24405. An act granting an increase of pension to Mary H. Bishop;
H. R. 24406. An act granting an increase of pension to Edmund Johnson;
H. R. 24413. An act granting an increase of pension to William Thomas;
H. R. 24493. An act granting an increase of pension to Theodoric Gage;
H. R. 24502. An act granting an increase of pension to A. Judson Conant;
H. R. 24504. An act granting an increase of pension to John H. Leiter;
H. R. 24518. An act granting an increase of pension to Reuben Nye;
H. R. 24530. An act granting an increase of pension to David Miller;
H. R. 24531. An act granting an increase of pension to David E. Jefferson;
H. R. 24532. An act granting an increase of pension to Absalom R. Shacklett;
H. R. 24553. An act granting an increase of pension to Sarah J. Reed;
H. R. 24560. An act granting an increase of pension to Margaret Lesley;
H. R. 24577. An act granting an increase of pension to John L. Flanery;
H. R. 24586. An act granting an increase of pension to Jotham A. Vincent;
H. R. 24599. An act granting an increase of pension to Thomas L. Richardson;
H. R. 24638. An act granting an increase of pension to Bernard Shallow;
H. R. 24681. An act granting an increase of pension to Lewis M. Jarvis;
H. R. 24691. An act granting an increase of pension to Edward Burtch;
H. R. 24698. An act granting an increase of pension to Lydia Hunt;
H. R. 24700. An act granting an increase of pension to Joseph Brooks;
H. R. 24707. An act granting an increase of pension to Peter Campbell;
H. R. 24710. An act granting an increase of pension to Jacob Riner;
H. R. 24726. An act granting an increase of pension to Seldon R. Sanders;
H. R. 24733. An act granting an increase of pension to John H. Morrison;
H. R. 24740. An act granting an increase of pension to William E. Chase;
H. R. 24769. An act granting an increase of pension to John George;
H. R. 24776. An act granting an increase of pension to David T. Taylor;
H. R. 24792. An act granting an increase of pension to William H. Penfield;
H. R. 24801. An act granting an increase of pension to George G. Martin;
H. R. 24807. An act granting an increase of pension to Horace E. Heath; and
H. R. 24829. An act granting an increase of pension to John R. Robbins.

SUNDRY CIVIL APPROPRIATION BILL.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HALE. I move that the Senate insist on its amendments and agree to the conference, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed as the conferees on the part of the Senate Mr. HALE, Mr. ALLISON, and Mr. BERRY.

ESTATE OF W. W. JACKSON, DECEASED.

The bill (S. 1569) for the relief of W. W. Jackson, deceased, was announced as the next business in order on the Calendar.

Mr. CLAPP. Let the bill be passed over.

The VICE-PRESIDENT. The bill will be passed over.

IMPROPER USE OF STREET RAILWAY TRANSFERS.

The bill (S. 826) to amend "An act to establish a code of law for the District of Columbia," approved March 3, 1901, as amended by the acts approved January 31 and June 30, 1902, relating to the improper issue, sale, gift, or use of transfer tickets of street railroads was announced as next in order.

The VICE-PRESIDENT. The bill was read on the 1st instant.

Mr. BACON. What is the bill? I ask that it be read.

Mr. GALLINGER. Let it go over.

The VICE-PRESIDENT. The bill will go over.

ALLEN V. REED.

The bill (H. R. 7676) authorizing the appointment of Allen V. Reed, now a captain on the retired list of the Navy, as a commodore on the retired list of the Navy was considered as in Committee of the Whole. It authorizes the President to appoint Allen V. Reed, now a captain on the retired list of the Navy, to be a rear-admiral on the retired list of the Navy, with the rank and pay of that office, the appointment to date from the 30th day of September, 1898.

The VICE-PRESIDENT. Certain amendments were made in Committee of the Whole when the bill was under consideration.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read: "A bill authorizing the appointment of Allen V. Reed, now a captain on the retired list of the Navy, as a rear-admiral on the retired list of the Navy."

REVISION OF COPYRIGHT LAW.

The bill (S. 8190) to consolidate and revise the acts respecting copyright was announced as next in order.

Mr. BEVERIDGE. I see that there is a minority report.

Mr. MALLORY. I object to the consideration of the bill. Let it go over under Rule IX.

The VICE-PRESIDENT. The bill will go over under Rule IX, at the request of the Senator from Florida.

GROUNDS FOR PUBLIC BUILDINGS IN THE DISTRICT.

The bill (S. 6649) authorizing the purchase of grounds for the accommodation of public buildings for the use of the Government of the United States in the District of Columbia, and for other purposes, was considered as in Committee of the Whole.

Mr. HEYBURN. The bill has heretofore been read.

The VICE-PRESIDENT. The bill has heretofore been read.

The bill provides for the purchase of the following parcels of land in the District of Columbia: All of blocks Nos. 226, 227, 228, 229, 230, 256, 257, 258, 259, 260, 292, 293, 294, 295, 349, 350, 380, 381, 382, 461, 575, 576, Reservation A, Reservation B, Reservation C, Reservation 12, according to the official plat of the city of Washington, not already owned in whole or in part by the Government of the United States of America.

The bill appropriates $10,000,000, or so much thereof as may be necessary, to be used for the payment of the land.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DAVID M'CLELLAND.

The bill (H. R. 7153) for the relief of David McClelland for loss sustained at Chickamauga Park, Ga., January 29, 1904, was considered as in Committee of the Whole. It proposes to pay to David McClelland, late draftsman and assistant to the engineer in the Quartermaster's Department, United States Army, stationed at the new military post, Chickamauga Park, Ga., $171.21 for loss of personal property by fire on the morning of January 29, 1904.

Mr. SPOONER. Is the bill recommended by the Department?

Mr. KEAN. I will say to the Senator it is, for the whole amount.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

GEORGE A. ARMSTRONG.

The bill (S. 7921) for the relief of George A. Armstrong was considered as in Committee of the Whole.

The VICE-PRESIDENT. The bill was read February 19, and an amendment agreed to.

Mr. KEAN. What is the amendment?

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 1, line 7, before the word "dollars," the Senate, as in Committee of the Whole, filled the blank by inserting "five hundred and thirty-two," and after the word "dollars" it inserted "45 cents;" so as to read: "$532.45."

Mr. SPOONER. What is the bill about?

The VICE-PRESIDENT. The Secretary will read the bill.

The bill was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to George A. Armstrong, late captain Company D, Seventh Michigan Cavalry, out of any money in the Treasury not otherwise appropriated, the sum of $532.45, as pay and emoluments from January 28, 1864, to May 30, 1864, inclusive.

Mr. SPOONER. From what committee does the bill come?

The VICE-PRESIDENT. The bill was reported from the Committee on Military Affairs.

Mr. KEAN. By the Senator from West Virginia [Mr. SCOTT].

Mr. SPOONER. Who reported it?

The VICE-PRESIDENT. It was reported by the Senator from West Virginia [Mr. SCOTT].

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, and was read the third time, and passed.

HEIRS OF CHARLES W. DAKIN AND THOMAS J. HENNESSY, DECEASED.

The bill (H. R. 15909) to reward the widow and minor son of Capt. Charles W. Dakin and the widow and minor children of Thomas J. Hennessy, late of the San Francisco fire department, who lost their lives while fighting a fire on board of the United States Army transport *Meade* was considered as in Committee of the Whole.

The VICE-PRESIDENT. The bill has heretofore been read.

Mr. BACON. I presume it is right, but still we do not know anything about the nature of the bill. I do not want to consume time in reading it if there is anyone here to state what it is.

Mr. SPOONER. I looked into the bill when it was last before the Senate, and, briefly stated, it is this: One of the transports of the United States Government caught fire in the harbor of San Francisco. These two men were members of the fire department of San Francisco, and they went, outside entirely of duty, and made a splendid fight to preserve the property of the United States, and lost their lives in that attempt. They left families absolutely destitute. They behaved with great gallantry and self-sacrifice, and this is recommended by the War Department and seems to be an entirely meritorious measure. I think the bill should be passed.

Mr. BACON. I quite agree with the conclusion reached by the Senator from Wisconsin, so far as I am concerned.

Mr. FULTON. As stated by the Senator from Wisconsin, the bill is recommended very earnestly by the War Department, and it is recommended by General Funston, who was in charge at the time.

Mr. SPOONER. I move to amend the bill by striking out, in line 5, on page 2, after the word "appropriated," the words "as a reward for the bravery and heroism shown," and inserting "in recognition of the bravery and services to the United States rendered;" so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, in recognition of the bravery and services to the United States rendered by the late Capt. Charles W. Dakin and Thomas J. Hennessy, both of the San Francisco fire department, in fighting a fire on board of the United States Army transport Meade in the harbor of San Francisco, Cal., on the night of January 31, 1906, to the widow and minor child of the said Capt Charles W. Dakin the sum of $5,000 and to the widow and minor children of the said Thomas J. Hennessy the sum of $5,000.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read: "A bill for the relief of the widow and minor son of Capt. Charles W. Dakin and the widow and minor children of Thomas J. Hennessy, late of the San Francisco fire department, who lost their lives while fighting a fire on board of the United States Army transport *Meade*."

On motion of Mr. GALLINGER, the preamble was stricken out.

HENRY O. BASSETT.

The bill (H. R. 3268) for the relief of Henry O. Bassett, heir of Henry Opeman Bassett, deceased, was considered as in Committee of the Whole. It proposes to pay to Henry O. Bassett, sole surviving heir of Henry Opeman Bassett, deceased, $142.59.

Mr. SPOONER. For what is the claimant to be paid this money?

Mr. GALLINGER. When the bill was read once before I suggested that it looked like a gratuity. I ask that the Secretary read it once more. There does not seem to be any statement as to why this money should be paid.

The Secretary again read the bill.

Mr. SPOONER. It looks like a gratuity.

Mr. GALLINGER. It does; certainly.

Mr. MALLORY. A similar bill has passed the Senate twice.

Mr. GALLINGER. It ought not to pass the Senate in its present form.

Mr. MALLORY. I will say that Henry Opeman Bassett was a mail contractor in Florida, and the records of the Auditor for the Post-Office Department show the Mr. Bassett was contractor on route 6564, Mariana to Bainbridge, from July 1, 1859, at $1,300 per annum; that he was paid in full to December 31, 1860, and that a balance of $142.59 stands to his credit for service for the quarter ending March 31, 1861, the date to which service has been certified. It is recommended by the Department.

Mr. GALLINGER. Unless an amendment can be submitted which will state definitely what the money is to be paid for, I shall object to the consideration of the bill. If the Senator from Florida can prepare an amendment——

Mr. MALLORY. I am not especially interested in the bill. It is a bill which a Member of the House——

Mr. GALLINGER. Let it go over, Mr. President.

The VICE-PRESIDENT. The bill will go over.

Mr. MALLORY subsequently said: I ask the Senate to recur to the bill (H. R. 3268) for the relief of Henry O. Bassett. It was passed over at the request of the Senator from New Hampshire [Mr. GALLINGER].

Mr. GALLINGER. I withdraw the objection.

By unanimous consent, the Senate, as in Committee of the Whole, resumed the consideration of the bill.

Mr. MALLORY. I offer the amendment I send to the desk.

The SECRETARY. It is proposed to add at the end of the bill the following:

The same being a balance due the said Henry Opeman Bassett, and never paid as a mail contractor, for service for the quarter ending March 31, 1861, the date to which service has been certified.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

JOHN A. BINGHAM.

The bill (S. 7143) directing the Postmaster-General to credit John A. Bingham, late postmaster at Vandalia, Ill., in the sum of $500 on account of stamps lost by burglary was considered as in Committee of the Whole.

Mr. FULTON. The bill seems to have been reported from the Committee on Post-Offices and Post-Roads. I do not care to interpose an objection to the pending bill, but I wish to say that these bills do not properly belong to that committee. They are claims against the Government. They should go to the Committee on Claims, where they can receive proper consideration. I do not believe they receive any consideration at all in the Post-Office Committee. Furthermore, part of such bills come to the Committee on Claims. That committee has a certain policy and rule with which it endeavors to comply. Such bills are reported from other committees entirely contrary to those rules. I am going hereafter to object to the consideration of bills of this character reported from that or any other committee than the Committee on Claims.

Mr. CARTER. Let the bill be passed over, Mr. President.

The VICE-PRESIDENT. The bill will be passed over.

Mr. OVERMAN. Have not some bills of the very same nature, when the Committee on Claims has turned them down and refused to report favorably, been referred to other committees and passed by the Senate on reports from such committees?

Mr. FULTON. That is very true.

The VICE-PRESIDENT. The bill will be passed over at the request of the Senator from Montana.

Mr. HALE. Before the bill goes over I hope the Senator from Oregon will insist on the proposition which he has just announced to the Senate. The only safety in these cases is for one committee, the Committee on Claims, to consider claims. There came to the Committee on Naval Affairs in the early part of the session a bill covering several claims, purely relating to the Navy Department, and in a way giving jurisdiction to the Naval Affairs Committee, but the committee unanimously directed that they should be referred to the Committee on Claims, and the bills were all sent to that committee. There is no jurisdiction of the Committee on Claims worth taking into account unless it does consider all of these claims. They ought not to go to the departmental committee; they ought not to go to the Committee on Appropriations, but the jurisdiction and responsibility rest, as they ought to rest, with the Committee on Claims.

Mr. CULLOM. The bill which has just been read is for the relief of a citizen of my State.

Mr. PATTERSON. I call for the regular order.

The VICE-PRESIDENT. The regular order is demanded.

Mr. CULLOM. I simply wish to make a remark in the interest of the disposition of the bill.

The VICE-PRESIDENT. Is there objection? The Chair hears none.

Mr. CULLOM. The probabilities are that the bill will not get through both Houses of Congress at this session in any event, and I am perfectly willing that it shall now be referred to the Committee on Claims.

Mr. GALLINGER. Let that be done.

The VICE-PRESIDENT. The bill will be referred to the Committee on Claims.

Mr. WARREN. I ask for just a moment.

Mr. PATTERSON. I withdraw the demand.

Mr. WARREN. Mr. President, I do not desire to object to this bill, but I do want to say a word before we pass from this subject.

I had quite long service on the Committee on Claims, and I think perhaps my remissness there has been the occasion for these bills going to other committees, because I did not object at the time. With the vast amount of work we had, I felt that if the Government were disposed to pay its debts, it mattered little from what committee the bills were reported. But I submit that experience and observation have shown that in the case of all kinds of claims the bills should go to the Committee on Claims and to that committee alone.

Mr. PATTERSON. I call for the regular order.

The VICE-PRESIDENT. The regular order is demanded. The Secretary will state the next case on the Calendar.

PAYMENT OF OVERTIME CLAIMS OF LETTER CARRIERS.

The bill (S. 1181) to provide for the payment of overtime claims of letter carriers excluded from judgment as barred by limitation was considered as in Committee of the Whole. It proposes to pay to the several parties named in Senate Document No. 216, Fifty-sixth Congress, first session, and Senate Document No. 158, Fifty-sixth Congress, second session, or their legal representatives, the amounts set opposite each of their names, respectively, aggregating $282,943.88, representing services actually performed by them as letter carriers in excess of eight hours per day.

Mr. CULLOM. From what committee does the bill come?

The VICE-PRESIDENT. The Committee on Claims.

Mr. SPOONER. By whom was the bill reported?

The VICE-PRESIDENT. It was reported by the Senator from Utah [Mr. SMOOT].

Mr. SMOOT. The Committee on Claims reported it.

Mr. SPOONER. What reason is there why the claims were not presented within the time fixed by law?

Mr. SMOOT. One reason was that there was an intimation from the Department itself that those claims would be paid in due process. Most of the other claims have been paid, and the only reason these were not paid is because of the statute of limitations running against them.

Mr. FULTON. If the Senator from Wisconsin will allow me——

The VICE-PRESIDENT. Does the Senator from Wisconsin yield to the Senator from Oregon?

Mr. SPOONER. Certainly; I merely want information.

Mr. FULTON. They were told that the Department would look after these people and see that their claims were paid. When they were presented, the auditor held that they had not been presented in time.

Mr. SPOONER. I want to know if the only difference between these claims and those which have been paid is the intervention of the statute of limitations?

Mr. FULTON. That is all.

Mr. SMOOT. Yes; that is all.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

L. BIERTEMPFEL.

The bill (H. R. 12840) for the relief of L. Biertempfel was considered as in Committee of the Whole. It directs the Secretary of the Treasury to reimburse L. Biertempfel, a German subject, for loss sustained by him through the action of Louis Stern, United States commercial agent at Bamberg, Germany, in collecting the sum of $871.08 belonging to Biertempfel and converting it to his own use.

Mr. SPOONER. From what committee does the bill come?

The VICE-PRESIDENT. From the Committee on Claims.

Mr. SPOONER. Let it go over.

Mr. LODGE. One moment, Mr. President. The payment in this case is very strongly recommended by the State Department, as this man was swindled by our consul. That is what it amounts to. The late Secretary Hay advised very strongly that it be paid.

Mr. CULLOM. I join with the Senator from Massachusetts in the hope that the bill will be passed.

Mr. SPOONER. I wish to say a word about it. Even if the bill is recommended by the Department, so far as I know it is an innovation, and I think a very dangerous innovation. Consular agents and consuls are commercial agents of the United States. They are permitted to make collections for citizens, but if it is to be understood that the Government of the United States is to be liable for their embezzlements, they ought to be prohibited by law from doing that business. It is not their business strictly. Citizens of the United States who have claims to collect abroad are perfectly at liberty to employ counsel abroad and to pursue the usual remedies for the collection of claims.

Mr. LODGE. This was not collected abroad. This was money collected in America, to be paid to a German subject.

Mr. SPOONER. Why should we be liable for it?

Mr. LODGE. I do not suppose we are liable. I take it it is a mere act of grace.

Mr. SPOONER. If we are to be liable for it in that case, I want to make the prophecy that this precedent will make us

liable in every such case. Otherwise we will be held to have discriminated in favor of the subjects of one country and against the subjects of another country. And even if it is recommended by the Department of State, I believe it is an absolutely improper policy to the adopted by the Congress of the United States.

I shall not object to this bill, but I want to put on record my conviction that it is a bad thing to do.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

J. H. HENRY.

The bill (H. R. 9109) for the relief of J. H. Henry was considered as in Committee of the Whole. It proposes to pay to J. H. Henry, of San Jose, Cal., $684.15 to reimburse him for losses sustained by him on account of fires started by United States troops during their occupancy of his ranch in San Luis Obispo County, Cal., during the summer of 1904.

Mr. SPOONER. If the bill does not indicate the line which has always been drawn by the Congress between the case where the soldier acts unlawfully and a conflagration or trouble which comes from the lawful action——

Mr. FULTON. If the Senator will allow me, I will explain it to him.

Mr. SPOONER. What are the facts?

Mr. FULTON. The facts are these: This ranch was leased to the Government for maneuvering purposes, and a written lease was entered into by which it was agreed that the Government would pay for any loss that resulted from fire or damages committed by the soldiers. This is for damage resulting from fire, burning, as I recall it, the fence; certainly some of the field. A board was appointed to assess the damages, and this is the amount awarded.

Mr. SPOONER. How much?

Mr. FULTON. I think it is some $600. I do not recall the exact amount. That is my recollection.

The VICE-PRESIDENT. Six hundred and eighty-four dollars.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

J. M. BLOOM.

The bill (S. 7851) for the relief of J. M. Bloom was considered as in Committee of the Whole.

The bill had been reported from the Committee on Post-Offices and Post-Roads with an amendment, in line 6, after the words "*one hundred* and," to strike out "eighty-nine dollars and twelve" and insert "eighteen dollars and eighteen;" and on page 2, line 5, before the word "cents," to strike out "eighty-nine dollars and twelve" and insert "eighteen dollars and eighteen;" so as to make the bill read:

*Be it enacted, etc.*, That the Postmaster-General be, and he is hereby, authorized and directed to cause the account of J. M. Bloom, late postmaster at Clearfield, State of Pennsylvania, to be credited with the sum of $118.18, and that he cause said credit to be certified to the Auditor of the Treasury for the Post-Office Department, being on account of loss of $123 in postal funds by robbery of said post-office on the 10th day of February, 1897, and $66.12 for expenses incurred in the effort to apprehend the burglars, it appearing that said loss was without fault or negligence on the part of said late postmaster; and the sum of $118.18 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to pay said claim.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

E. RUSSELL MEARS.

The bill (S. 4767) authorizing the President to appoint E. Russell Mears captain and paymaster, United States Army, was announced as next in order on the Calendar.

Mr. WARREN. I will ask that the bill may go over, keeping its place on the Calendar.

The VICE-PRESIDENT. The bill will be passed over without prejudice.

WALES ISLAND PACKING COMPANY.

The bill (S. 616) authorizing and directing the Secretary of State to examine and settle the claim of the Wales Island Packing Company was announced as the next in order.

Mr. OVERMAN. Let the bill take its place on the Calendar under Rule IX.

Mr. KEAN. I trust the Senator will not do that. This is a very just claim.

Mr. OVERMAN. I think there will be some contest about the claim.

The VICE-PRESIDENT. The bill will go to the Calendar under Rule IX.

Mr. KEAN. I did not know that there had ever been any controversy about it.

Mr. LODGE. Before the bill is passed over I should like to say a single word in regard to it, in justice to the claimant.

The claim arose out of the decision of the Alaskan Tribunal, of which I was a member. In the settlement of the boundary a disputed island was awarded to Great Britain. It was not known that there was any American establishment anywhere on the ceded piece of territory. If it had been known to the Commissioners, arrangements would have been made that Canada should settle with the American citizens so placed. After the decision was rendered the Commissioners were informed of the existence of this canning company, and it was then too late to open the award.

The result was that these people found themselves on Canadian territory and the right of fishing in the rivers was taken from them, as all the rivers are in the United States territory. Therefore their business was absolutely destroyed and they lost everything they had there, entirely by the failure of the United States Government to notify the Commissioners. There never was a better claim in the world or a case in which greater injustice has been done. I wish to put that statement on record, if the bill is to be objected to.

Mr. OVERMAN. I wish to say that the bill has been before the committee several times, and I do not think we ought to pay $81,000 for some old buildings there.

The VICE-PRESIDENT. The bill will go to the Calendar under Rule IX, at the request of the Senator from North Carolina.

BATTLE MONUMENT AT CHALMETTE, LA.

The bill (S. 8292) providing for the completion by the Secretary of War of a monument to the memory of the American soldiers who fell in the battle of New Orleans at Chalmette, La., and making the necessary appropriation therefor, was announced as next in order.

Mr. GALLINGER. That matter went in, as I remember, as a provision of the Army appropriation bill. I would ask if it has been retained?

Mr. WARREN. I desire to say that in conference all those amendments were lost.

Mr. GALLINGER. I am very sorry for that.

Mr. WARREN. I am very sorry, too, but we were unable to retain them. They were the last items we permitted to go out.

Mr. GALLINGER. I have no objection to the consideration of the bill.

The bill was considered as in Committee of the Whole. It proposes to appropriate $25,000 for the completion of a monument to the memory of the soldiers who fell in the battle of New Orleans in the war of 1812, said monument to be completed under the direction and approval of the Secretary of War.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RAMIE-FIBER SILK AND FLAX.

The bill (S. 4633) authorizing Government assistance in the development and encouragement of ramie-fiber silk and flax preparation and manufacture and their production and profitable home market in the United States, under the supervision of the Secretary of Commerce and Labor, was announced as next in order.

Mr. CULLOM. I hope that bill will go over under Rule IX.

The VICE-PRESIDENT. The bill will be passed over and placed on the Calendar under Rule IX, at the request of the Senator from Illinois.

ALASKA-YUKON-PACIFIC EXPOSITION.

The bill (S. 7382) to encourage the holding of an Alaska-Yukon-Pacific exposition at the city of Seattle, State of Washington, in the year 1909 was announced as next in order.

Mr. HALE. Let the bill go to the Calendar under Rule IX.

The VICE-PRESIDENT. The bill will go to the Calendar under Rule IX, at the request of the Senator from Maine.

Mr. PILES. Mr. President, I object to that disposition of the bill.

Mr. HALE. It goes to Rule IX on a single objection.

Mr. PILES. If the Senator will allow it to go over without prejudice, I shall not call it up except when he is present in the Senate or after I have given him notice that I shall move to proceed to its consideration.

Mr. HALE. The Senator does not lose his right to move to take it up. A single objection carries it to Rule IX, and the

Senator can at any time move that the bill be taken up. Of course, he can never get it up by unanimous consent.

Mr. PILES. Then I move that the Senate proceed to the consideration of the bill.

Mr. HALE. The Senator can not make the motion now, as the Senate is considering unobjected cases.

The VICE-PRESIDENT. The bill will go to the Calendar under Rule IX, at the request of the Senator from Maine.

CALAVERAS BIG TREE NATIONAL FOREST.

The bill (S. 8117) to create the Calaveras Bigtree National Forest, and for other purposes, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUBLIC BUILDINGS.

Mr. SCOTT. I ask unanimous consent to submit a report from the Committee on Public Buildings and Grounds.

I report back without amendment the bill (H. R. 25758) amending an act entitled "An act to increase the limit of cost of certain public buildings, to authorize the purchase of sites for public buildings, to authorize the erection and completion of public buildings, and for other purposes," and I submit a report thereon. The purpose of the bill is to correct errors that were made in the public buildings act of the first session of the present Congress. It is very important to pass the bill, owing to the fact that there has been a ruling of the Treasury Department that where a public building act provided for only a post-office no room can be occupied by the internal-revenue collector or for any other purpose except as a post-office.

Mr. KEAN. The bill has passed the House?

Mr. SCOTT. The bill has passed the House. It does not carry an appropriation, and it is very essential that it should be passed to-day or at the very earliest date before we adjourn. I ask unanimous consent for the consideration of the bill.

The VICE-PRESIDENT. Is there objection to the consideration of the bill reported by the Senator from West Virginia?

Mr. HALE. The Senate is proceeding under an order made by unanimous consent to consider unobjected bills on the Calendar.

The VICE-PRESIDENT. Objection is made, and the next bill on the Calendar will be announced.

MENOMINEE INDIAN LANDS, WISCONSIN.

The bill (S. 8431) to authorize the cutting and sale of timber on land reserved for the use of the Menominee tribe of Indians, in the State of Wisconsin, was considered as in Committee of the Whole.

The bill was reported from the Committee on Indian Affairs with an amendment, in section 1, page 2, line 2, after the word "same," to strike out the words "by the said Indians in accordance with the provisions of law" and to insert "under such rules and regulations as may be prescribed by him; so as to make the section read:

That the dead and down timber upon the Menominee Reservation, in the State of Wisconsin, shall be each year estimated and logged and that no more standing and growing timber shall be cut than is sufficient, when added to the dead and down timber, to make 20,000,000 feet in the aggregate, and only such standing and growing timber shall be cut as shall be marked for cutting under the direction of the Forestry Service. The Secretary of the Interior may permit the manufacture into lumber by the said tribe of so much of said annual cut of logs as he may deem advisable, and the sale of the same, under such rules and regulations as may be prescribed by him.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. LA FOLLETTE subsequently said: I move to reconsider the votes by which the bill (S. 8431) to authorize the cutting and sale of timber on land reserved for the use of the Menominee tribe of Indians, in the State of Wisconsin, was ordered to be engrossed for a third reading, read the third time, and passed.

The motion to reconsider was agreed to.

Mr. LA FOLLETTE. I move to add at the end of the bill the proviso I send to the desk.

The VICE-PRESIDENT. The Senator from Wisconsin proposes an amendment, which will be stated.

The SECRETARY. It is proposed to add at the end of the bill the following proviso:

*Provided*, That if in the opinion of the Secretary of the Interior the Indians can not log the dead and down timber now upon said reservation in time to save the same and protect the standing forest, he is hereby authorized to employ white laborers to assist said Indians to log the dead and down timber now upon said reservation.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

HUNGARIAN REFORMED FEDERATION OF AMERICA.

The bill (H. R. 24046) to incorporate the Hungarian Reformed Federation of America was announced as next in order on the Calendar.

Mr. HEYBURN. Let the bill go to the Calendar under Rule IX.

The VICE-PRESIDENT. The bill will go to the Calendar under Rule IX.

Mr. HEMENWAY. I hope the Senator from Idaho will not object to the consideration of the bill. Another bill just like it was passed a few days ago. Let me submit a parliamentary inquiry. Does an objection put a bill to the Calendar under Rule IX?

The VICE-PRESIDENT. An objection, with such a request, carries a bill to the Calendar under Rule IX.

Mr. HEMENWAY. Does the request of one Senator take a bill there?

The VICE-PRESIDENT. It does, under the uniform practice.

Mr. SPOONER. Unless it is passed over without prejudice, it goes to the Calendar under Rule IX.

The VICE-PRESIDENT. Unless it is passed over without prejudice.

Mr. HEYBURN subsequently said: Mr. President, I asked that the bill (H. R. 24046) to incorporate the Hungarian Reformed Federation of America go over. I did that under a misapprehension, and I now desire to withdraw the request.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment.

Mr. SPOONER. I rise to inquire if there is a provision contained in that bill reserving the right to alter, amend, or repeal?

Mr. HEYBURN. There is.

The VICE-PRESIDENT. The bill contains such a provision.

Mr. SPOONER. Very well.

The bill was ordered to a third reading, read the third time, and passed.

COUNCIL CITY AND SOLOMON RIVER RAILROAD.

The bill (H. R. 23720) to aid the Council City and Solomon River Railroad Company was considered as in Committee of the Whole. It extends the time of the Council City and Solomon River Railroad Company to comply with the provisions of sections 4 and 5 of chapter 299 of the laws of the United States, entitled "An act extending the homestead laws and providing for the right of way for railroads in the district of Alaska, and for other purposes," approved May 14, 1898, in acquiring and completing its railroad now under construction in Alaska.

Mr. BERRY. Is that the bill that was here at the last session?

Mr. KEAN. It is not.

Mr. BERRY. I refer to the measure the Senator from New Hampshire [Mr. GALLINGER] was pressing.

Mr. KEAN. It is not. I opposed the bill the Senator from New Hampshire was pressing. I reported this bill.

Mr. BERRY. Very well.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ROSEBUD INDIAN RESERVATION.

The bill (S. 6618) to authorize the sale of a portion of the Rosebud Indian Reservation in South Dakota, and for other purposes, was announced as next in order.

Mr. GAMBLE. A similar bill has passed both Houses, and I move the indefinite postponement of this bill.

The motion was agreed to.

THE PANAMA CANAL.

The bill (S. 8488) to amend an act entitled "An act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific oceans," approved June 28, 1902, was announced as next in order.

Mr. GALLINGER. Let the bill go over.

The VICE-PRESIDENT. The bill will go over without prejudice.

Mr. MILLARD. I hope there will be no objection to the consideration of the bill.

The VICE-PRESIDENT. Objection is made to the consideration of the bill, and it goes over.

Mr. MILLARD. Mr. President, I should like to make a statement. This bill has the very earnest approval of the Secretary of War; it has the approval of the entire Committee on Interoceanic Canals; and it is important that it should be considered and passed.

Mr. GALLINGER. I will say to the Senator that I asked it should go over under a misapprehension. I withdraw the suggestion.

Mr. MILLARD. I ask that the bill be read.

The VICE-PRESIDENT. The suggestion being withdrawn, the bill will be read.

The Secretary proceeded to read the bill.

Mr. TELLER. Mr. President, I think it is inevitable that the bill will bring up considerable debate, and therefore I ask that it may go to the Calendar under Rule IX.

The VICE-PRESIDENT. The bill will go to the Calendar under Rule IX, at the request of the Senator from Colorado.

### OMAHA INDIAN CLAIMS.

The bill (S. 6190) authorizing the Omaha tribe of Indians to submit claims to the Court of Claims was considered as in Committee of the Whole.

The bill was reported from the Committee on Claims with amendments, on page 1, line 7, after the word "for," to insert "determination of;" in the same line, after the word "amount," to insert "if any;" in line 8, before the word "said," to strike out "or claimed to be due;" in the same line, after the word "tribe," to strike out "of" and insert "from;" on page 2, line 2, after the word "all," to insert "legal or equitable;" in the same line, after the word "claims," to insert "if any;" in line 4, after the word "thereon," to strike out "and to enter judgment in favor of the attorneys of said Indians for attorneys' fees under their contract with said tribe;" in line 7, before the word "if," to insert "The Court of Claims shall advance said cause upon the docket;" in line 10, after the word "limitations," to insert "and the final judgment and satisfaction thereof in said cause shall be deemed a final settlement of all claims of said Omaha Indians against the United States;" in line 14, after the word "petition," to insert "subject, however, to amendment;" in line 15, after the word "the," to strike out "Secretary of the Interior furnishes the data provided for herein" and insert "passage of said act;" in line 21, after the word "by," to strike out the word "an" and insert "the;" in line 22, after the word "Indians," to insert "under the contract filed in the Indian Office on the 4th day of March, 1898, and reported upon to the Secretary of the Interior on the 1st day of May, 1901;" on page 3, line 4, after the word "evidence," to insert "if competent under the rules of said Court of Claims;" in line 6, after the word "the," to insert "attorney or attorneys of the;" in line 7, after the word "Indians," to strike out "on or before January 1, 1907, copies of all treaties and a complete record of all transactions of every character between the United States and the said Omaha tribe of Indians and all acts of the United States or its officials relating to the Omaha Indians or their affairs or interests" and insert "copies of such treaties, papers, correspondence, and records as may be called for by said attorneys of the Omaha tribe of Indians: *Provided further*, That upon the final determination of such suit the Court of Claims shall have jurisdiction to decree the fees to be paid the attorney or attorneys employed by the Omaha tribe of Indians, and the same shall be paid out of any sum or sums found due said Omaha tribe of Indians."

So as to make the bill read:

*Be it enacted, etc.*, That all claims of whatsoever nature which the Omaha tribe of Indians may have or claim to have against the United States shall be submitted to the Court of Claims, with the right of appeal to the Supreme Court of the United States by either party, for determination of the amount, if any, due said Omaha tribe from the United States under any treaties or laws of Congress or the unexecuted stipulations of any treaties, or for the misappropriation of any of the funds of said Omaha tribe, or for the failure of the United States to pay to said Omaha tribe any money due; and jurisdiction is hereby conferred upon the Court of Claims to hear and determine all legal or equitable claims, if any, of said Omaha tribe against the United States and to enter judgment thereon. The Court of Claims shall advance said cause upon the docket. If any question is submitted to said court, it shall settle the rights, both legal and equitable, of both the Omaha tribe of Indians and the United States, notwithstanding lapse of time or statutes of limitations, and the final judgment and satisfaction thereof in said cause shall be deemed a final settlement of all claims of said Omaha Indians against the United States. Such action in the Court of Claims shall be presented by a single petition, subject, however, to amendment, to be filed within one year after the passage of said act; and such action shall make the Omaha tribe of Indians party plaintiff and the United States party defendant, and shall set forth all the facts on which the Omaha tribe of Indians bases its claim for recovery; and the said petition may be verified by the attorney employed by the said Omaha Indians under the contract filed in the Indian Office on the 4th day of March, 1898, and reported upon to the Secretary of the Interior on the 1st day of May, 1901, upon information and belief as to the existence of such facts, and no other statements or verifications shall be necessary. Official letters, papers, reports, documents, and public records, or certified copies thereof, may be used in evidence if competent under the rules of said Court of Claims: *Provided*, That the Secretary of the Interior shall furnish to the attorney or attorneys of the Omaha tribe of Indians copies of such treaties, papers, correspondence, and records as may be called for by said attorneys of the Omaha tribe of Indians: *Provided further*, That upon the final determination of such suit the Court of Claims shall have jurisdiction to decree the fees to be paid the attorney or attorneys employed by the Omaha tribe of Indians, and the same shall be paid out of any sum or sums found due said Omaha tribe of Indians.

Mr. CARTER. I observe that an amendment was read placing some limitation upon the attorneys' fees, and I understood later that that limitation had been removed. I think the bill should be amended so as to place some restrictions upon the Indian contract with reference to attorneys' fees.

Mr. SPOONER. Will the Senator allow me to interrupt him for a moment? Have these contracts for attorneys' fees been approved by the Secretary of the Interior, or are they mere contracts with the Indians?

Mr. BURKETT. I think they are contracts with the Indians; but the committee have reported to strike that out, as I understand it, and give the Court of Claims jurisdiction to decree the fees to be paid to the attorney or attorneys.

Mr. SPOONER. In the earlier part of the bill, as I heard it read, it was provided that the court should enter judgment in the matter of attorneys' fees.

Mr. BURKETT. That was stricken out. The words "and to enter judgment in favor of the attorneys of said Indians for attorneys' fees in their contract with said tribe" were stricken out by the committee.

Mr. CARTER. I doubt whether striking that out is sufficient. It seems to me that the court should be vested with jurisdiction to determine the reasonableness of the fees.

Mr. SPOONER. That provision ought to be in the bill.

Mr. PATTERSON. May not the bill be temporarily passed over, while the Senators are arranging an amendment?

Mr. BURKETT. It will take but a moment.

Mr. PATTERSON. We can recur to it. By unanimous consent it can be temporarily passed over.

The VICE-PRESIDENT. Is there objection to the request of the Senator from Colorado that the pending bill be temporarily passed over?

Mr. BURKETT. I now move the amendment. On page 3, line 16, I move to amend the amendment of the committee by striking out the word "the" and inserting "such reasonable;" so as to read:

That upon the final determination of such suit the Court of Claims shall have jurisdiction to decree such reasonable fees to be paid the attorney or attorneys, etc.

Mr. SPOONER. Let it read, "such reasonable fees as the court shall find should be paid to the attorney or attorneys."

Mr. BURKETT. Very well.

Mr. ALLISON. I should like to ask what the suggestion is as respects the interest on these claims.

Mr. SPOONER. This is as to attorneys' fees. Let the amendment be read.

The VICE-PRESIDENT. The Senator from Nebraska proposes an amendment to the last committee amendment, which will be read.

The SECRETARY. On page 3, line 16, strike out "the," the last word in the line, and insert the words "such reasonable fees as the court shall find should be paid to the attorney or attorneys."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The VICE-PRESIDENT. The question is on agreeing to the remaining amendments of the committee.

The amendments were agreed to.

Mr. BURKETT. Now, also to meet an objection, I move, on page 1, line 9, after the word "under," the second word, to strike out "any treaties or laws of Congress or the unexecuted stipulations of any treaties" and to insert:

The treaty between the United States and said Omaha tribe of Indians ratified and confirmed March 16, 1854.

The purpose of the amendment is to simply refer to one treaty.

Mr. KEAN. The words "or for the misappropriation of any of the funds of said Omaha tribe" are to be left in?

Mr. BURKETT. That clause is to be left in. There was a dispute as to the Indian agent having misappropriated some funds. He did misappropriate them, but whether the Government or the Indians is liable for it is a disputed question.

The VICE-PRESIDENT. The amendment will be read.

The SECRETARY. On page 1, line 9, after the word "under," strike out "any treaties or laws of Congress or the unexecuted stipulation of any treaties" and insert:

The treaty between the United States and said Omaha tribe of Indians ratified and confirmed March 16, 1854.

The amendment was agreed to.

Mr. SPOONER. Now, I should like an answer to the question put by the Senator from Iowa [Mr. ALLISON] as to whether the bill makes any provision for interest.

Mr. BURKETT. I do not understand that it does.

Mr. SPOONER. If it does, that clause ought to be stricken out.

Mr. BURKETT. I think it does not. I have just run over the bill since the Senator from Iowa called my attention to it. I have read it through, and I can not find any provision for the payment of interest. I did not understand that it did. If it does, I will call it back for amendment.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BURNWELL COAL AND COKE COMPANY.

The bill (H. R. 25611) to authorize the Burnwell Coal and Coke Company to construct a bridge across the Tug Fork of Big Sandy River was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DISPOSITION OF SCHOOL-LAND SECTION IN OKLAHOMA.

The bill (H. R. 24655) to authorize the legislature of Oklahoma to dispose of a certain section of school land was considered as in Committee of the Whole House. It proposes to authorize the legislature of Oklahoma, when the State of Oklahoma shall have been admitted, to grant section 16, in township 14 north, of range 4 east of the Indian meridian, Lincoln County, Okla., to the board of education of the city of Chandler, in that county, for school purposes upon such terms as the legislature may impose.

Mr. BEVERIDGE. I should be glad to have a short explanation of that bill. I do not understand it.

Mr. CARTER. Mr. President, my information concerning the bill is quite meager, but I understand from the Delegate from Oklahoma that it is desired to dispose of this particular section of school land to the educational institutions of the town of Chandler. Such donations have heretofore been made by Congress for the general school fund of a State, and the State legislature can not divert land from the purposes of the grant without the consent of Congress. This bill simply proposes to give the assent of Congress to the transfer of the particular section of land from one general school purpose to a special school purpose.

Mr. BEVERIDGE. Mr. President——

Mr. SPOONER. Why should this be done as to one town and not as to others?

Mr. BEVERIDGE. That is the very point.

Mr. CARTER. I understand the conditions are such as to make it exceptional, although I am not prepared to state in what particular. The bill has passed the other House. I have not examined the report, but the Delegate from Oklahoma is very earnest in his endeavor to have the bill passed. There appears to be no objection to it. It leaves the entire matter with the legislature of the State.

Mr. SPOONER. I suggest that the bill go over without prejudice.

The VICE-PRESIDENT. The bill will be passed over without prejudice.

REPAYMENT OF CUSTOMS DUES.

The bill (H. R. 10305) to provide for the repayment of certain customs dues was considered as in Committee of the Whole.

The bill was reported from the Committee on Finance with amendments. The first amendment was, in line 5, after the word "repayment," to insert "to John Effinger, or his legal representative;" so as to read:

That the sum of $111.70 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, for the repayment to John Effinger, or his legal representative, of the customs duties wrongfully collected at the port of Honolulu, in the Territory of Hawaii, on entries, etc.

The amendment was agreed to.

Mr. SPOONER. Though the bill states that these customs dues were wrongfully collected, that is not conclusive at all. I should like to know whether the duties were paid under protest. Who reported the bill?

Mr. CULLOM. There is no printed report with the bill.

The VICE-PRESIDENT. The bill was reported by the Senator from North Dakota [Mr. HANSBROUGH].

Mr. SPOONER. Let the bill go over without prejudice.

The VICE-PRESIDENT. The bill will be passed over without prejudice.

Mr. HANSBROUGH subsequently said: I ask that we return to House bill 10305, a bill passed over while I was out of the Chamber. I think there can be no objection to the bill.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10305) to provide for the repayment of certain customs dues.

The VICE-PRESIDENT. The first amendment reported by the Committee on Finance has been agreed to. The next amendment will be stated.

The SECRETARY. The next amendment reported by the committee is on page 2, line 2, before the name "John Effinger," to insert "the said."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

EXPATRIATION AND PROTECTION OF CITIZENS.

Mr. BACON. I ask leave to submit at this time a report from the Committee on Foreign Relations.

The VICE-PRESIDENT. The report will be received, in the absence of objection.

Mr. BACON. I am directed by the Committee on Foreign Relations, to whom was referred the bill (H. R. 24122) in reference to the expatriation of citizens and their protection abroad, to report it favorably with certain amendments, and I ask unanimous consent that the bill may be considered and put on its passage at this time.

Mr. SPOONER. I suggest to the Senator from Georgia that I have a similar report which I wish to make, but we are acting now under a unanimous-consent agreement. The time is devoted by unanimous consent to the consideration of unobjected bills on the Calendar.

Mr. BACON. I did not know that fact.

Mr. CULLOM. The time will soon be up, and the Senator can then make his report.

Mr. BACON. Then I withdraw the report. I did not know that we were acting under a unanimous-consent agreement.

The VICE-PRESIDENT. The report is withdrawn.

EDITH A. HAWLEY.

The bill (S. 569) granting a pension to Edith A. Hawley was announced as next in order.

Mr. McCUMBER. I ask that that bill may be passed over, retaining its place on the Calendar.

The VICE-PRESIDENT. The bill will be passed over, retaining its place.

Mr. BRANDEGEE. Did I understand the Senator from North Dakota to ask that the bill go over under Rule IX?

Mr. McCUMBER. No.

The VICE-PRESIDENT. The Senator simply requested that the bill should be passed over without prejudice.

Mr. BRANDEGEE. Very well.

COAL-LAND LOCATIONS IN ALASKA.

The bill (H. R. 17415) to authorize the assignees of coal-land locations to make entry under the coal-land laws applicable to Alaska was announced as next in order.

Mr. BEVERIDGE. Mr. President, I should like to have a word of explanation in regard to that bill.

Mr. FULTON. Mr. President, this bill was once before reported by the Senator from Minnesota [Mr. NELSON]. It passed the Senate, but a motion to reconsider the vote by which it was passed was entered. The motion was subsequently agreed to, and the bill was reconsidered, and re-referred to the Committee on Public Lands. Practically all the bill does as to changing existing law is to authorize the entry of coal lands in Alaska in unsurveyed regions, allowing the entryman to take up such lands by having them surveyed in rectangular form. Otherwise there is practically no way of taking up coal lands in Alaska. The change which has been made in the bill since it formerly passed the Senate is by the insertion of a provision to which I will call the attention of the Senate.

Mr. SPOONER. Mr. President, will the Senator not consent to let the bill go over without prejudice just now? It can be taken up later.

Mr. FULTON. I will; but with the permission of the Senator I wish to say a word.

Mr. SPOONER. Certainly.

Mr. FULTON. The Senator from Minnesota takes great interest in this bill and is quite anxious that it shall go through. If the Senator will allow me to complete my statement I will read the provision which has been added to the bill:

*And provided further*, That this act shall apply only to coal lands in the district of Alaska to which any right has been acquired in good faith and for the use and benefit of the claimant, and not for the use and benefit of any other person or association of persons, existent and enforceable prior to the withdrawal of such lands from entry by the orders of the Secretary of the Interior and at the date of this act; but any such right must be perfected within two years from the date hereof.

Mr. SPOONER. I suggest to the Senator that he permit the bill to go over for the time being.

Mr. FULTON. Very well.

The VICE-PRESIDENT. The bill will be passed over without prejudice.

SETTLERS ON PUBLIC LANDS.

The bill (S. 7889) for the relief of certain settlers on the public lands, and for other purposes, was announced as next in order.

Mr. ALDRICH. Let that bill go over, Mr. President.

The VICE-PRESIDENT. The bill will be passed over without prejudice.

SILETZ POWER AND MANUFACTURING COMPANY.

The bill (S. 6754) granting to the Siletz Power and Manufacturing Company a right of way for a water ditch or canal through the Siletz Indian Reservation, in Oregon, was considered as in Committee of the Whole.

Mr. KEAN. I suggest to the Senator from Connecticut [Mr. BRANDEGEE], who reported this bill, that it should be amended so as to provide for the right of repeal by Congress.

Mr. BRANDEGEE. Mr. President, the bill in its present form was passed by both the Senate and the House at the last session of Congress and failed of the President's signature simply by reason of the lack of time. It has been submitted to the Secretary of the Interior and amended according to his suggestion.

Mr. KEAN. I do not think it would be any injury to the bill to insert another paragraph saying that Congress reserves the right to alter, amend, or repeal the act.

Mr. BRANDEGEE. I have no objection whatever to that amendment.

Mr. KEAN. I move to amend the bill by inserting as a new section:

That Congress reserves the right to alter, amend, or repeal this act.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. At the end of the bill it is proposed to add as a new section the following:

SEC. 5. That Congress reserves the right to alter, amend, or repeal this act.

The amendment was agreed to.

Mr. BEVERIDGE. I do not pretend to ask even that this bill be passed over without prejudice, if the Senator from Connecticut and the committee have thoroughly investigated it, but upon the face of the bill—and that is the only reason I make the inquiry—upon the face of the bill it looks as though it were possible that an extremely valuable right were being granted here and, possibly, a very important monopoly. I do not pretend to ask even that it go over, but I want to call the attention of the Senator to that fact.

Mr. FULTON. Mr. President, I ask the Senator from Connecticut if the Department has not approved this bill?

Mr. BEVERIDGE. The Senator said that the Department had approved it.

Mr. FULTON. The Department has approved it and it has once passed Congress.

Mr. BEVERIDGE. We are passing it again now.

Mr. BRANDEGEE. Mr. President, the hearing was had before the House committee, and the House committee made a report upon the bill which the Senate committee adopted as its report. The House committee stated that the bill would be of great benefit to the white settlers along the line of the proposed ditch and canal, as well as to the Indians, for purposes of irrigation. I know nothing about it from the testimony of the witnesses, because we had no hearing, but adopted the House report upon the statement of the then Senator from Oregon, Mr. Gearin, whose bill it was, and the statement of the Senator from Oregon [Mr. FULTON] that they both advocated it and thought it was all right. We had also the statement of the Secretary of the Interior that, with the amendments we adopted, he approved of the bill. I thought there was sufficient evidence upon which to report it to the Senate.

Mr. HEYBURN. Mr. President, I would suggest that it is very doubtful if the plan will be carried out if you adopt the limitation suggested of allowing the right of repeal or amendment by Congress. I doubt if any capital would invest in an enterprise of this kind unless they knew that their right of way was a permanent grant. I know something of this class of investment in that country, and I suggest that while that is an appropriate reservation in a certain class of legislation, yet where it is contemplated to invest a large sum of money in a power plant it is not an appropriate limitation.

Mr. SPOONER. Will not the Senator in charge of this bill make a brief statement of what it involves? What is this ditch and how long is it?

Mr. BRANDEGEE. I am not familiar with and do not know the dimensions of the reservation, I will say to the Senator from Wisconsin; but I think that the Senator from Oregon will probably be able to answer that question.

Mr. FULTON. I did not understand the question.

Mr. SPOONER. What is the character of the ditch?

Mr. FULTON. I do not know what the character of the ditch is.

Mr. SPOONER. Does anybody know?

Mr. FULTON. The bill was in charge of my former colleague, Mr. Gearin.

Mr. SPOONER. Is there a report accompanying the bill?

Mr. FULTON. My understanding is, Mr. President, that the ditch is for power purposes. I do not know the size of the ditch it is intended to construct.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

INDIAN TRADER MARION WESCOTT AND OTHERS.

The bill (H. R. 19500) for the relief of Indian traders Marion Wescott, F. F. Green, and J. A. Leige, assignee of Joseph F. Gauthier, a Menominee Indian trader, with the Menominee Indians of Wisconsin, was considered as in Committee of the Whole.

The bill was reported from the Committee on Indian Affairs with an amendment, to strike out all after the enacting clause and insert:

That jurisdiction is hereby conferred upon the Court of Claims to hear and report findings of fact to Congress upon the claims of Marion Wescott and F. F. Green and J. A. Leige, assignee of Joseph Gauthier, a Menominee Indian trader, and of others who furnished supplies and goods, wares, and merchandise to certain Menominee Indians after the year 1880, for the purpose of carrying on logging operations on the Menominee Indian Reservation in Wisconsin. Said claims shall be presented to said court by verified petition to be filed within ninety days from the date of the approval of this act. Said court shall in its findings determine the amount, if any, due upon each of said claims, and if the court shall find that there is a liability upon any of these claims, it shall then determine if such liability be that of the Menominee tribe of Indians or that of individual members of said tribe, and in either case it shall determine the amount, if any, chargeable to said tribe and to each of the individual debtors. The Menominee tribe of Indians is authorized to employ an attorney or attorneys to defend their interests in said action. The compensation of such attorney or attorneys to be fixed by the court and paid out of any funds of the said Menominee tribe of Indians in the Treasury of the United States.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

TEMPORARY HOME FOR EX-UNION SOLDIERS AND SAILORS.

The bill (S. 7929) to provide a temporary home for ex-Union soldiers and sailors in the District of Columbia was announced as next in order.

Mr. KEAN. Let that bill go over.

Mr. GALLINGER. I trust that the Senator will not ask for that.

Mr. KEAN. Is it to purchase a home?

Mr. GALLINGER. It is to purchase a place for the soldiers and sailors in the District of Columbia. They are in an utterly insanitary building, without adequate facilities for taking care of them. Almost every State in the Union has a decent place for its soldiers and sailors who are unfortunate. This bill proposes to purchase a very inexpensive building and have it properly fitted for these men. I hope the Senator will let the bill be acted upon.

Mr. KEAN. Very well; I withdraw the objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the District of Columbia with amendments.

The first amendment was, on page 1, section 2, line 11, after the word "managers," to strike out "of the board of management;" so as to make the section read:

SEC. 2. That such home shall be under the control and management of the board of managers of the Temporary Home for Soldiers and Sailors, which was incorporated on the 20th day of October, 1888, under section 3 of the act of Congress approved May 5, 1870, being "An act to provide for the creation of corporations in the District of Columbia by general laws," which board shall make rules and regulations for the government of said home, subject to the approval of the Secretary of War, a copy of which rules and all amendments thereto shall be filed with the board of charities of the District of Columbia.

The amendment was agreed to.

The next amendment was, on page 2, to strike out section 5, as follows:

SEC. 5. That the Treasurer of the United States is hereby made treasurer of said board of managers, and all funds, except for the purchase, remodeling, and equipment of such home shall be paid out by him upon

accounts approved by the president of said board of managers and countersigned by the superintendent of said home.

The amendment was agreed to.

Mr. GALLINGER. On page 2, line 13, after the word "shelter," I move to insert the words "not more than."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. After the word "shelter," in section 3, page 2, line 13, it is proposed to insert the words "not more than;" so as to make the section read:

SEC. 3. That the title of the property when purchased shall be vested in the United States; and the Secretary of War is authorized to remodel and equip such home to properly house and shelter not more than 75 inmates.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CLAIMS ARISING UNDER THE NAVY DEPARTMENT.

The bill (H. R. 13605) to satisfy certain claims against the Government arising under the Navy Department was considered as in Committee of the Whole.

The bill was reported from the Committee on Claims with amendments.

The first amendment was, on page 7, after line 2, to strike out:

To pay the owners of the schooner Flirt cost of cable damaged by the U. S. S. Macdonough, on November 14, 1905, the sum of $47.50.

The amendment was agreed to.

The next amendment was, on page 7, after line 6, to strike out:

To pay Edward Simmons one-half of the cost of repairs of damages to his steam tug William Alexander, caused by collision with the U. S. S. Miantonomah on October 9, 1893, the sum of $108.50.

The amendment was agreed to.

The next amendment was, on page 7, after line 11, to strike out:

To pay the contractor for dry dock No. 4, navy-yard, New York, the cost of repairs of damages to cable tower on said dry dock, caused by collision with the U. S. S. Dolphin on August 1, 1905, the sum of $922.

The amendment was agreed to.

The next amendment was, on page 9, after line 8, to insert:

To pay John H. Lohman the balance due him on account of bounty accruing by the destruction of the enemy's vessels at the battle of Santiago, July 3, 1898, he being there and then an acting gunner, whereas he was allowed and paid bounty as chief gunner's mate only, $59.20.

Mr. KEAN. That is a different kind of claim from the others; and I do not think it belongs on this bill.

Mr. SPOONER. I ask that that amendment be again stated.

Mr. KEAN. It is not printed in the copy of the bill I have.

The VICE-PRESIDENT. The Secretary will again state the amendment.

The Secretary again stated the amendment.

Mr. FULTON. I will say that it is recommended——

Mr. LODGE. These are all audited claims against the Navy Department.

Mr. BEVERIDGE. They are all right.

The amendment was agreed to.

The next amendment was, on page 9, after line 13, to insert:

To pay to the McCall-Dinning Company, of Baltimore, Md., interest due to delay in payment of freight charges for cargoes transported from the United States to Manila, P. I., in the ships Amberton, King Robert, and Floriston, including cost of cable messages and charges in collecting freight, $1,666.57.

Mr. KEAN. The amendment just read I notice is to pay interest. I call the attention of the chairman of the committee to it. I do not think we ought to pay interest.

Mr. HALE. Strike out the interest.

Mr. FULTON. Very well. Which item is it?

Mr. KEAN. The Baltimore item. I do not object to a claim, but I do not want the Government to pay interest.

Mr. FULTON. I see that is entirely an interest item.

Mr. LODGE. Let it go out.

Mr. FULTON. I have no objection to its going out.

Mr. SPOONER. Let it be disagreed to.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the Committee on Claims.

The amendment was rejected.

The next amendment of the Committee on Claims was, on page 9, after line 20, to insert:

To reimburse Capt. E. J. Dorn, United States Navy, retired, in the amount expended by him as disbursing officer at the naval station, Tutuila, in June, 1901, and checked against his account because the vouchers representing such expenditures have been lost, $483.09.

The amendment was agreed to.

The next amendment was, on page 10, after line 2, to insert:

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Pacific Pearl Mullett, administratrix of the estate of the late Alfred B. Mullett, the sum of $2,062.06, in full for the balance due her husband, the said Mullett, on account of compensation and his actual expenses incurred as commissioner appointed from civil life on the navy-yard commission under the provisions of the act of August 5, 1882, making appropriations for the naval service, said balance being based upon vouchers heretofore issued and approved by the Secretary of the Navy, and now in the possession of the widow of said Mullett.

Mr. FULTON. Let the amendment be disagreed to.

The amendment was rejected.

The next amendment was, on page 10, after line 15, to insert:

That jurisdiction in equity is hereby conferred upon the circuit court of the United States for the ninth circuit to examine and determine the rights of American citizens under the award of the Paris arbitration concerning the jurisdiction of Bering Sea. That all American citizens whose rights were affected by said award may submit to the court their claims thereunder, and the court shall enter judgment thereon. Claims not submitted within two years from the passage of this act shall thereafter be forever barred.

Mr. LODGE. This amendment is not a naval matter.

Mr. FULTON. No; it is not.

Mr. LODGE. These are claims arising under the Navy Department, and they have been audited and they ought to be paid. The bill should pass; but the last amendment relates to the rights of American citizens under the award of the Paris arbitration concerning the jurisdiction of Bering Sea. It is not a matter which concerns naval affairs, and I hope the Senator will not press the amendment.

Mr. FULTON. A word about the amendment. In another form it has already passed the Senate. It does not arise under the Navy Department, but it has passed the Senate. It is a matter which in its nature is somewhat related to the Navy Department, and I think it is proper that it should be retained in the bill. The title of the bill should be amended slightly if this amendment is adopted. I hope the amendment will be agreed to.

Mr. GALLINGER. I rise to a parliamentary inquiry in connection with the bill.

The VICE-PRESIDENT. The Senator from New Hampshire rises to a parliamentary inquiry. He will state it.

Mr. GALLINGER. I have a copy of the bill as reported by the Senator from Oregon, and none of these amendments as stated by the Secretary appear in the bill.

Mr. FULTON. In the first print they were omitted.

Mr. GALLINGER. If the bill is to be loaded down by every claim that has passed the Senate, I shall have to object to its consideration.

Mr. HALE. The bill is a very important one. It was referred from the Committee on Naval Affairs, where it was first sent, upon the proposition that these claims ought all to be considered by the Committee on Claims. I am repeating what I said an hour ago; and I hope the Senator from Oregon will not load the bill and lose it here by insisting on any of these other provisions which are not strictly claims, and that he will consent to this clause, that is objected to, going out.

Mr. FULTON. I shall not insist on it.

Mr. HALE. Let it be disagreed to.

Mr. FULTON. I do not wish to endanger the passage of the bill.

The VICE-PRESIDENT. The question is on agreeing to the amendment reported by the Committee on Claims.

The amendment was rejected.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read: "A bill to satisfy certain claims against the Government arising under the Navy Department, and for other purposes."

PROPOSED EXECUTIVE SESSION.

Mr. SPOONER. I rise to a parliamentary inquiry.

The VICE-PRESIDENT. The Senator from Wisconsin will state his parliamentary inquiry.

Mr. SPOONER. Is there any time limit on this order of business?

The VICE-PRESIDENT. The Chair understands there is not.

Mr. SPOONER. Then I wish to give notice that at 5 o'clock I shall move an executive session.

Mr. KEAN. I will say to the Senator from Wisconsin that I was going to do the same thing at that time.

ALLEGHENY RIVER BRIDGE, IN ARMSTRONG COUNTY, PA.

The bill (H. R. 25627) to authorize the county of Armstrong, in the State of Pennsylvania, to construct a bridge across the Allegheny River in Armstrong County, Pa., was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ESTATE OF JOSEPH HAGUE, DECEASED.

The bill (S. 5878) for the relief of Phillip Hague, administrator of the estate of Joseph Hague, deceased, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims with amendments, in line 7, after the words "sum of," to strike out "thirteen thousand seven hundred and forty-one" and insert "one thousand seven hundred and forty-two;" in line 9, after the word "cents," to strike out "for loss, pilotage, towage, demurrage, and costs by him expended to estimate repairs" and insert "in full of all claims by reason;" and in line 11 to strike out "by;" so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Phillip Hague, administrator of the estate of Joseph Hague, deceased, late of New York City, N. Y., out of any money in the Treasury not otherwise appropriated, the sum of $1,742.66, in full of all claims by reason of the brigantine Mary Margaret being run into by the U. S. transport steamer Belvidere in the harbor of Galveston, Tex., on September 19, 1865.

Mr. SPOONER. I wish to ask the Senator who reported the bill, if he is present, whether it is recommended by the Department?

Mr. BURKETT. Yes and no.

Mr. SPOONER. That means "no."

Mr. BURKETT. Here is the report. The bill has been worked over for a long time. It has been to the Department. The Department can not recommend it. They can not find at present the records there; but from various places we have got the records and have established beyond doubt that the ship was run into; that a Government board was called at once and ascertained the loss to be $1,500. While the bill carries $13,000, it is proposed to be amended, cutting it down to $1,700—$1,500, the amount at which the board of review adjusted the loss, and one hundred and fifty or two hundred dollars additional for some towage that the Government ordered done.

Mr. SPOONER. I desire to inquire of the Senator how the committee gets information that the Department can not afford?

Mr. BURKETT. We dug it up from other committees, and in various ways. It had been filed with committees in years gone by.

Mr. SPOONER. How long has it waited?

Mr. BURKETT. I do not know. It has been before Congress a good many years, I will say.

Mr. SPOONER. The next session will be a long one, and I *think perhaps* it had better go to the Calendar under Rule IX.

The VICE-PRESIDENT. The bill will go to the Calendar under Rule IX.

MILLE LAC BAND OF CHIPPEWA INDIANS, MINNESOTA.

The bill (S. 8420) for the relief of the Mille Lac band of Chippewa Indians, in the State of Minnesota, and for other purposes, was considered as in Committee of the Whole. It confers upon the Court of Claims jurisdiction to hear and determine a suit or suits to be brought by and on behalf of the Mille Lac band of Chippewa Indians, in the State of Minnesota, against the United States on account of losses sustained by them or the Chippewas of Minnesota by reason of the opening of the Mille Lac Reservation, in the State of Minnesota, embracing about 61,000 acres of land, to public settlement under the general land laws of the United States.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JICARILLA RESERVATION.

The bill (H. R. 23650) to quiet title to lands on Jicarilla Reservation, and to authorize the Secretary of the Interior to cause allotments to be made, and to dispose of the merchantable timber, and for other purposes, was considered as in Committee of the Whole.

The bill had been reported by the Committee on Indian Affairs with amendments.

The first amendment of the Committee on Indian Affairs was, in section 1, on page 2, line 7, after the word "eighty-eight," to strike out the semicolon and the words "but the merchantable timber on any allotments authorized by this act is hereby excepted from allotment to be disposed of as hereinafter provided" and to insert the following proviso:

*Provided*, That in making such allotments values shall be considered so as to make the allotments uniform in value as near as practicable. That the Secretary of the Interior may dispose of all merchantable timber on allotments herein authorized during the term these are held in trust and on the surplus lands for twenty-five years, the proceeds therefor to be expended under his direction for purposes beneficial to the individual allottees hereunder and their heirs, or for families, as he may deem best, and no part of such proceeds shall be expended for community or common benefits other than irrigation, but shall be equitably apportioned as near as may be among the Indians entitled.

The amendment was agreed to.

The next amendment was, on page 2, after line 20, to strike out section 2, as follows:

SEC. 2. That the Secretary of the Interior may dispose of all merchantable timber on allotments herein authorized during the term these are held in trust, and on the surplus lands for twenty-five years; the proceeds therefor to be expended under his direction for purposes beneficial to the individual allottees hereunder and their heirs, or for families, as he may deem best, and no part of such proceeds shall be expended for community or common benefits other than irrigation, but shall be equitably apportioned as near as may be among the Indians entitled.

The amendment was agreed to.

The next amendment was, on page 3, after line 5, to strike out section 3, as follows:

SEC. 3. That the Secretary of the Interior is hereby empowered and directed to make relinquishment for any minor, insane, incompetent, or unidentified Indian for the purpose of carrying out the provisions of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

HOMER QUICK.

The bill (H. R. 22210) to correct the military record of Homer Quick was considered as in Committee of the Whole. It provides that Homer Quick shall hereafter be held and considered to have been honorably discharged from the military service of the United States on the 13th day of April, 1864.

Mr. KEAN. I think the bill ought to state what service the soldier rendered. Let the bill go over.

The VICE-PRESIDENT. It will be passed over.

Mr. KEAN. I have no objection to the bill——

Mr. BEVERIDGE. Let it go over without prejudice.

Mr. CURTIS. The junior Senator from Indiana [Mr. HEMENWAY] asked me to call attention to this bill if it came up. I understand it was drawn at the Department.

Mr. BEVERIDGE (to Mr. KEAN). I hope you will withdraw your objection to the bill.

Mr. KEAN. I have no objection to the bill, but it ought to state some service.

Mr. BEVERIDGE. It is a House bill and was drawn by the Department, as the Senator from Kansas says. I am certain of this: It was reported by my colleague from the Committee on Military Affairs, and my knowledge of him is such that I am absolutely certain no bill would be reported by him which ought not to pass here.

Mr. LODGE. The Senator from Indiana who reported the bill is not here, and I should think there would be no harm in waiting. He can undoubtedly explain it.

Mr. CURTIS. I have no objection to that course.

Mr. GALLINGER. That omission can be supplied by the report—"late captain Company K, First Missouri Volunteers."

Mr. BEVERIDGE. Let that be done now.

Mr. GALLINGER. I move that amendment.

Mr. LODGE. Add those words, and it will make it all right.

The VICE-PRESIDENT. The Senator from New Hampshire proposes an amendment, which will be stated.

The SECRETARY. After the name "Homer Quick," in line 3, it is proposed to insert "late captain Company K, First Missouri Volunteers."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

GORDON, IRONSIDES & FARES COMPANY (LIMITED).

The bill (H. R. 16085) for the relief of Gordon, Ironsides & Fares Company (Limited) was considered as in Committee of the Whole. It proposes to pay the beneficiaries $7,626.08, that sum having been exacted as duties and paid to the collector of customs at Boston, covering a consignment of 602 head of cattle and 1,757 sheep shipped from Canada in bond via Boston, Mass., to Liverpool, England, and being prohibited from being so shipped by general orders from the Department of Agriculture.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

DISPOSITION OF CERTAIN LANDS IN NEBRASKA.

The bill (H. R. 21944) relating to the entry and disposition of certain lands in the State of Nebraska was announced as the next business in order on the Calendar.

Mr. LODGE. Let the bill go over for the present.

The VICE-PRESIDENT. The bill will be passed over without prejudice.

Mr. KEAN subsequently said: Now, let us go back to the bill (H. R. 21944) relating to the entry and disposition of certain lands in the State of Nebraska.

The VICE-PRESIDENT. The Senator from New Jersey withdraws his objection to the consideration of the bill.

The bill was considered as in Committee of the Whole. It provides that all qualified entrymen who, during the period beginning on the 28th day of April, 1904, and ending on the 28th day of June, 1904, made homestead entry in the State of Nebraska within the area affected by an act entitled "An act to amend the homestead laws as to certain unappropriated and unreserved public lands in Nebraska," approved April 28, 1904, shall be entitled to all the benefits of that act as if their entries had been made prior or subsequent to the above-mentioned dates, subject to all existing rights.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FORT CONSTITUTION, N. H.

The bill (S. 32) for the relief of the State of New Hampshire was considered as in Committee of the Whole.

The bill was reported from the Committee on Claims with an amendment, on page 1, line 6, before the word "thousand," to strike out "thirty" and insert "fifteen;" so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to the State of New Hampshire, out of any money in the Treasury not otherwise appropriated, the sum of $15,000, in full for a certain tract of land, together with the fort thereon, ceded by said State in 1791 to the United States, and for an adjoining tract of land similarly ceded in 1807, said tracts of land forming the site of Fort Constitution, in Portsmouth Harbor, and said sum being a reasonable amount which has become due and payable to said State of New Hampshire under the provisions of the two several acts of cession aforesaid.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

TANANA MINES RAILROAD.

The bill (H. R. 25184) to relieve the Tanana Mines Railroad in Alaska from taxation was considered as in Committee of the Whole.

Mr. CARTER. Under the bill the period of construction can be indefinitely postponed.

Mr. BEVERIDGE. No, no, Mr. President. The period of exemption is ten years on that which is not constructed and five years on that which is constructed. I will say to the Senator that this same exemption has been made for every railroad company that has done in Alaska as these people, that has done actual work.

Mr. CARTER. I have no objection to the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ALLOTMENT OF INDIAN LANDS.

The bill (H. R. 25570) to amend an act approved May 8, 1906, entitled "An act to amend section 6 of the act approved February 8, 1887, entitled 'An act to provide for the allotment of lands in severalty to Indians on the various reservations, and to extend the protection of the laws of the United States and the Territories over the Indians, and for other purposes,'" was announced as next in order.

Mr. CURTIS. A Senator notified me of his desire to be heard when this bill is up, and I ask that it may go to the Calendar under Rule IX.

The VICE-PRESIDENT. The bill will go to the Calendar under Rule IX, at the request of the Senator from Kansas.

ISSUANCE OF BONDS IN NEW MEXICO.

The bill (H. R. 12857) to validate certain acts of the legislative assembly of the Territory of New Mexico with reference to the issuance of certain bonds was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LAND DISTRICTS IN ALASKA.

The bill (H. R. 25041) to provide for the creation of additional land districts in the district of Alaska was announced as next in order.

Mr. HANSBROUGH. I observe that this bill was reported by the Committee on Territories.

Mr. BEVERIDGE. It was.

Mr. HANSBROUGH. And it provides for the creation of additional land districts in the district of Alaska?

Mr. BEVERIDGE. It does.

Mr. HANSBROUGH. I do not know that any land district has ever been created by act of Congress where the bill did not go to the Committee on Public Lands. I do not know how it came about that this bill was referred to the Committee on Territories. Clearly a subject of that kind belongs to the Committee on Public Lands. I shall be obliged to object to the consideration of the bill.

Mr. BEVERIDGE. I hope the Senator will not object. I can make a statement that I think will show the Senator the absolute necessity of this bill becoming a law. I do not know how the bill came to be referred to the Committee on Territories. I hope the Senator, on account of its having come to the Committee on Territories instead of the Committee on Public Lands, will not object to its passage. I can make a statement that will clear up the whole bill.

Mr. HANSBROUGH. Does the Senator know of any reason why the bill should have gone to the Committee on Territories instead of the Committee on Public Lands, where it undoubtedly belongs?

Mr. BEVERIDGE. I have not the slightest idea. It came in regular course; the committee found it on the calendar of its business; but I have the impression that it was before the Committee on the Territories of the House. It is a bill which has passed the House. Anyway we have gone over the facts in the case. I will say to the Senator that there was no intention of any discourtesy in the reference of the bill to the Committee on Territories. It has been given faithful attention. I would just as soon that it had gone to the Committee on Public Lands as not.

Mr. HANSBROUGH. Mr. President, I wish to make a statement. If this were the first time that bills belonging to the Committee on Public Lands had been referred to the Committee on Territories I do not know that I would make any serious objection; but on several occasions, particularly in the case of a special bill granting a charter to a railroad company in Alaska, when there is a general law for such things, the bill went to the Committee on Territories when it should have gone to the Committee on Public Lands, because it granted public lands. Any measure granting public lands should go to the Committee on Public Lands.

Mr. BEVERIDGE. I hope the Senator will not object to this bill, but let his objection be made the next time it occurs.

Mr. HANSBROUGH. I will hear the bill read before I withdraw my objection.

The VICE-PRESIDENT. The bill will be read.

The Secretary read the bill, and the Senate, as in Committee of the Whole, proceeded to its consideration.

Mr. CARTER. Mr. President, I have no intention of objecting to the passage of the bill, but I think it is a proper time to make a suggestion with reference to the disposition of public lands in Alaska. A habit or custom has grown up with reference to Alaska not heretofore applicable to any other Territory or district of the United States. The Committee on Territories have to do with the government of the Territories. As to Alaska the Committee on Territories has assumed jurisdiction over the public domain within the Territory or district. Rights of way for railroads, grants of coal lands, particular exemptions as to the occupancy of public lands have been heretofore assumed by the Committee on Territories. I think the practice is unfortunate and should be discontinued.

This bill is undoubtedly meritorious, and it has unquestionably received full consideration, but hereafter I think it is well to have it understood that the public lands of the United States, in so far as this body is concerned, shall be dealt with by the committee created under the rules to deal with that particular subject, and that bills relating to Alaska having to do with the disposition of public lands will be referred to the committee of the Senate having direct jurisdiction over the subject-matter.

Mr. BEVERIDGE. Mr. President, lest my silence should give assent to the arrangement suggested by the Senator from Montana, I must say that I can not agree with him, nor can the Committee on Territories, as to the future disposition of bills. But of course it is better to go into the question of what committee shall have jurisdiction of a bill when the question arises in the future upon a bill concerning these various subjects. At such a time when the question is to be determined the Committee on Territories will endeavor to justify its jurisdiction. This bill is up and it ought to pass. I could make a statement regarding it which would clear it up in anybody's mind.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had

passed the bill (S. 8377) to amend an act entitled "An act permitting the building of a dam across the Mississippi River in the county of Morrison, State of Minnesota," approved June 4, 1906, with an amendment in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the amendments of the Senate to the following bills:

H. R. 10574. An act granting a pension to Edward W. Hoban;

H. R. 19589. An act granting a pension to Aaron Davis;

H. R. 21721. An act granting a pension to John R. Kissinger;

H. R. 25005. An act granting an increase of pension to Emeline H. Hardie; and

H. R. 25440. An act granting an increase of pension to Catharine Lipes.

The message further announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

H. R. 25401. An act to authorize the Secretary of War to make certain disposition of condemned guns and cannon balls;

H. R. 25716. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River above the village of Monticello, Wright County, Minn.," approved June 14, 1906;

H. R. 25717. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Clearwater, Wright County, Minn.," approved June 14, 1906;

H. R. 25773. An act permitting the building of a dam across the Savannah River at McDaniel Shoals;

H. R. 25774. An act permitting the building of a dam across the Savannah River at Turner Shoals;

H. R. 25776. An act permitting the building of a dam across the Savannah River at Middleton Shoals; and

H. R. 25795. An act to authorize the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, to construct a bridge over the Escambia River between the counties of Santa Rosa and Escambia, in the State of Florida.

HOUSE BILLS REFERRED.

H. R. 25401. An act to authorize the Secretary of War to make certain disposition of condemned guns and cannon balls, was read twice by its title, and referred to the Committee on Military Affairs.

The following bills were severally read twice by their titles, and referred to the Committee on Commerce:

H. R. 25716. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River above near the village of Clearwater, Wright County, Minn.," approved June 14, 1906;

H. R. 25717. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Clearwater, Wright County, Minn." approved June 14, 1906;

H. R. 25773. An act permitting the building of a dam across the Savannah River at McDaniel Shoals;

H. R. 25774. An act permitting the building of a dam across the Savannah River at Turner Shoals;

H. R. 25776. An act permitting the building of a dam across the Savannah River at Middleton Shoals; and

H. R. 25795. An act to authorize the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, to construct a bridge over the Escambia River between the counties of Santa Rosa and Escambia, in the State of Florida.

MONONGAHELA RIVER BRIDGE AT PITTSBURG.

The bill (H. R. 25691) to authorize the construction of a bridge across the Monongahela River, in the State of Pennsylvania, by the Liberty Bridge Company was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXTENSION OF ALBEMARLE STREET.

The bill (H. R. 23940) for the extension of Albemarle street NW., District of Columbia, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

AMENDMENT OF STATEHOOD ACT.

The bill (S. 8498) to amend sections 16, 17, and 20 of an act entitled "An act to enable the people of Oklahoma and of the Indian Territory to form a constitution and State government and be admitted into the Union on an equal footing with the original States; and to enable the people of New Mexico and of Arizona to form a constitution and State government and be admitted into the Union on an equal footing with the original States," approved June 16, 1906, and for other purposes, was announced as next in order.

Mr. LODGE. Let the bill go over.

The VICE-PRESIDENT. The bill will be passed over without prejudice.

Mr. LONG. This is a very important bill. There can be no possible objection to it. I hope the Senator from Massachusetts will not insist upon its going over. It corrects an error made in the statehood act.

Mr. LODGE. I withdraw the objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Territories with an amendment, in section 4, page 6, line 21, before the word "thousand," to strike out "five" and insert "four;" so as to make the section read:

SEC. 4. That the United States marshals and the United States district attorneys for the eastern and western districts of the State of Oklahoma shall each be paid, in lieu of all fees, per centums, and other compensation an annual salary of $4,000.

Mr. LONG. I move to strike out section 4 of the bill.

The motion was agreed to.

The VICE-PRESIDENT. Section 5 will be renumbered so as to read section 4.

Mr. BACON. I wish to suggest a slight amendment that I think the Senator from Kansas will accept. I think the words "in such cases and" ought to be put in by way of amendment on the fourth page, at the beginning of the second line. The clause has reference to review by the Supreme Court of the United States, or by the United States circuit court of appeals, and simply makes provision for review in a certain manner. I think the words "in such cases and" ought to be inserted after the word "appeals," at the end of the first line, on page 4; so as to read:

All final judgments and decrees rendered in such circuit and district courts is such transferred cases may be reviewed by the Supreme Court of the United States, or by the United States circuit court of appeals, in such cases and in the same manner as is now provided by law with reference to the judgments and decrees of the existing United States circuit and district courts.

Mr. LODGE. I have no objection to that amendment.

The VICE-PRESIDENT. The Senator from Georgia proposes an amendment, which will be stated.

The SECRETARY. On page 4, line 1, after the word "appeals," at the end of the line, insert "in such cases and."

The amendment was agreed to.

Mr BACON subsequently said: Mr. President, I move to reconsider the vote by which Senate bill 8498 was passed, so that I may correct the phraseology of an amendment. It will take but a moment.

Mr. GALLINGER. What is the order of business?

Mr. BACON. It is one of the bills we have just passed. I simply want to correct the phraseology of an amendment.

Mr. BEVERIDGE. I have no objection, if that is the purpose of the motion.

Mr. BACON. It is simply to insert the word "the" for the word "such."

The VICE-PRESIDENT. The Senator from Georgia moves to reconsider the vote by which Senate bill 8498 was ordered to be engrossed for a third reading, read the third time, and passed.

The motion to reconsider was agreed to.

The VICE-PRESIDENT. The bill is in the Senate and open to amendment.

Mr. BACON. I wish to amend the amendment on page 4, in line 1——

The VICE-PRESIDENT. In the absence of objection, the amendment will be considered as open to amendment.

Mr. BACON. In the amendment heretofore offered by me, on page 4, line 1, before the word "cases," I move to strike out the word "such" and insert the word "the;" so that the amendment will read "in the cases and" instead of "in such cases and."

Mr. BEVERIDGE. That is acceptable.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

EXTENSION OF MONROE STREET NE.

The bill (H. R. 10703) authorizing the extension of Monroe street NE. was considered as in Committee of the Whole.

The bill was reported from the Committee on the District of Columbia with an amendment, in section 2, page 2, line 12, after the word "extension," to insert the following proviso:

*Provided also, however,* That the associated professors of St. Mary's Seminary, of Baltimore, Md., on account of their dedication by contract heretofore of 9,000 feet of adjacent land for the extension of Seventh street, are not to be assessed for said benefits.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ALDRICH. I move that the Senate proceed to the consideration of executive business.

Mr. BEVERIDGE. I hope the Senator will withhold that motion.

Mr. HANSBROUGH. I ask the Senator from Rhode Island to yield to me for a moment.

Mr. ALDRICH. I will yield to the Senator from North Dakota to make a request.

PUBLIC LANDS FOR CEMETERY PURPOSES.

Mr. HANSBROUGH. I ask the Chair to lay before the Senate the amendments of the House to Senate bill 6229.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 6229) to authorize the sale of public lands for cemetery purposes; which were, on page 1, line 4, to strike out "municipal corporation;" on page 1, line 8, to strike out "forty" and insert "eighty;" and on page 1, line 12, after "acre," to insert:

*Provided,* That title to any land disposed of under the provisions of this act shall revert to the United States should the land or any part thereof be sold or cease to be used for the purpose herein provided.

Mr. HANSBROUGH. I move that the Senate concur in the amendments of the House of Representatives.

The motion was agreed to.

Mr. KNOX. Mr. President——

The VICE-PRESIDENT. Does the Senator from Rhode Island yield to the Senator from Pennsylvania?

Mr. SPOONER. I hope the Senator from Rhode Island will withhold his motion for fifteen minutes.

Mr. BEVERIDGE. Make it twenty minutes.

Mr. PATTERSON. There are only a few more bills left on the Calendar under Rule VIII.

Mr. SPOONER. Let us get through with the Calendar.

Mr. ALDRICH. I will, at the solicitation of Senators, withhold the motion.

The VICE-PRESIDENT. The Senate is still operating under the unanimous-consent agreement.

Mr. GALLINGER. Regular order!

REFUND OF INTERNAL-REVENUE TAX.

The bill (H. R. 5) to provide for the refunding of certain money, etc., was considered as in Committee of the Whole. It proposes to refund to the Phœnix Brewing Company, of Pittsburg, $1,575, and to the Ober Brothers Brewing Company, of Allegheny, $225, these amounts having been illegally assessed by the Commissioner of Internal Revenue and collected by the collector of internal revenue for the twenty-third district of Pennsylvania in the year 1898, and the same being 7½ per cent discount upon the amounts of fermented-liquor stamps purchased by these corporations, respectively, upon the 24th day of July, 1897, such assessment and collection having been decided to be illegal by the Attorney-General of the United States, and his decision having been acquiesced in by the Treasury Department.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

GEORGE W. SCHROYER.

The bill (H. R. 16581) for the relief of George W. Schroyer was considered as in Committee of the Whole. It proposes to pay to George W. Schroyer, of Lancaster, Pa., $102.30, being duty paid on certain bulbs which when received were found to be damaged and worthless.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

W. D. CLAY AND OTHERS.

The bill (S. 8542) to authorize W. D. Clay and others to select lands in lieu of lands purchased by the father of said parties from the United States Government and lost by said heirs was considered as in Committee of the Whole.

The bill was reported from the Committee on Public Lands with amendments, in line 8, before the word "unappropriated," to insert "nontimbered;" and in the same line, after the word "lands," to insert "in the State of Alabama;" so as to make the bill read:

*Be it enacted, etc.,* That William D. Clay, James W. Clay, and Maggie Click, heirs of James W. Clay, deceased, be, and they are hereby, authorized to select in lieu of lands heretofore erroneously patented by the Government to their father, James W. Clay, and lost by said heirs, any other 80 acres of nonmineral, nontimbered, unappropriated surveyed public lands in the State of Alabama subject to homestead entry: *Provided,* That before making such selection they shall deliver to the Secretary of the Interior a duly executed and recorded quitclaim deed to the United States, conveying only such right and title as the said James W. Clay, deceased, acquired to the east half of the northwest quarter of section 16, township 6 south, range 3 east, in Alabama, by virtue of a patent issued to him for the said lands on the 2d day of April, 1857, and surrendering such patent to the Secretary of the Interior if in their possession, or filing with him an affidavit that they are unable to procure said patent, if such is the case, and shall file an abstract and affidavit showing that they, or James W. Clay, the patentee, have never conveyed to anyone the title derived from said patent: *Provided further,* That the right of selection of lieu lands provided for above shall be exercised within five years from the approval of this act.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

LANDS ADJOINING COEUR D'ALENE INDIAN RESERVATION.

The bill (H. R. 24374) to fix the boundaries of lands of certain landowners and entrymen adjoining the Coeur d'Alene Indian Reservation was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FOUNDATION FOR PROMOTION OF INDUSTRIAL PEACE.

The bill (S. 8303) to establish the Foundation for the Promotion of Industrial Peace was announced as next in order.

Mr. BEVERIDGE. Let that bill be passed over without prejudice, Mr. President.

Mr. LODGE. I trust the Senator will allow the bill to pass. There can be no possible objection to it. It establishes trustees who are to receive from the President the Nobel prize for the foundation of a society for the promotion of industrial peace.

Mr. BEVERIDGE. I understand the bill, and I am for it, and if the Senator insists, I will withdraw my objection. The only reason I made the request that it should go to the Calendar without prejudice was to save time. I withdraw the objection.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill. The preamble recites that whereas Alfred Bernard Nobel, of the city of Stockholm, in the Kingdom of Sweden, having by his last will and testament provided that the residue of his estate shall constitute a fund the income from which shall be annually awarded in prizes to those persons who have during the year contributed most materially to benefit mankind, and having further provided that one share of said income shall be awarded to the person who shall have most or best promoted the fraternity of nations and the abolishment or diminution of standing armies and the formation and increase of peace congresses; and the Norwegian Parliament having, under the terms of said foundation, elected a committee for the distribution of the peace prize, and this committee having in the year 1906 awarded the aforesaid prize to Theodore Roosevelt, President of the United States, for his services in behalf of the peace of the world; and the President desiring that this award shall form the nucleus of a fund the income of which shall be expended for bringing together in conference at the city of Washington, especially during the sessions of Congress, representatives of labor and capital for the purpose of discussing industrial problems, with the view of arriving at a better understanding between employers and employees, and thus promoting industrial peace; therefore the bill provides that the Chief Justice of the United States, the Secretary of Agriculture, and the Secretary of Commerce and Labor, and their successors in office, together with a representative of labor and a representative of capital and two persons to represent the general public be appointed by the President of the United States and created trustees of an establishment by the name of the Foundation for the Promotion of Industrial Peace, with authority to receive the Nobel peace prize awarded to the President and by him devoted to this foundation, and to administer it in accordance with the purposes herein defined. Any vacancies occurring in the number of trustees shall be filled in like manner by appointment by the President of the United States, etc.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

CENTRAL COLORADO POWER COMPANY.

The bill (H. R. 24118) granting to the Central Colorado Power Company a right of way over certain public lands, for irrigation and electric power plants, in the State of Colorado was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SURETIES OF WILLIAM H. GOWDY.

The bill (H. R. 4629) for the relief of William H. Gowdy was considered as in Committee of the Whole. Section 1 proposes that Alfred S. Andrew, Leander H. Gowdy, G. Morrison Taylor, C. C. Engleman, Jacob C. McCoy, Orlander F. Ralston, L. W. Ralston, J. R. McKinnie, Henry Chatillon, James M. Parker, F. B. Wortman, Alphonse F. Perrier, and M. A. Dickinson, sureties of William H. Gowdy, late postmaster at Fremont, Moreland, Fremont, and Cripplecreek, Colo., respectively, by bonds to the United States dated August 7, 1891; December 19, 1891; March 10, 1892, and July 8, 1892, be released from their liability arising from any deficiency that may have occurred in the accounts of William H. Gowdy as postmaster during the term covered by the transcripts of accounts from the Treasury Department and from any judgment which may have been obtained thereon in favor of the United States; and it authorizes the proper officer of the Treasury to direct the cancellation and satisfaction of any and all judgments that may have been rendered against William H. Gowdy and the sureties aforesaid upon said bonds or any of them.

Section 2 directs the Secretary of the Treasury to pay to William H. Gowdy $1,500, that being the amount advanced and disbursed by him while acting as postmaster and being absolutely necessary in performing his duties as postmaster.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ALASKAN MINING CLAIMS.

The bill (H. R. 8984) to amend the laws governing labor or improvements upon mining claims in Alaska was considered as in Committee of the Whole.

The bill had been reported from the Committee on Territories with amendments. The first amendment was, in section 1, page 1, line 4, before the word "dollars," to strike out "seventy-five" and insert "one hundred;" in line 7, after the word "located," to strike out "and in addition thereto the locator or owner of each such claim shall perform $25 worth of work upon highways, roads, or trails within the recording division or district in which such claim shall be situate, or, in lieu of such work upon highways, roads, or trails, the sum of $25 may be paid to the recorder for such division or district, who shall give a receipt therefor and enter such payment upon a record of affidavits of annual work done on mining claims; and in case work of the value aforesaid shall be performed upon such highways, roads, or trails as aforesaid the affidavit of the locator or owner of such claim, or of some other person having knowledge of the facts, showing the performance thereof and specifying the highway, road, or trail and the character and extent of such work done thereon, shall be made and filed with said recorder and be recorded by him in his said record, and such affidavit when so made and filed shall be prima facie evidence of the performance of such work;" on page 2, line 13, after the word "And," to strike out "in like manner;" in line 14, after the word "claim," to insert "or some other person having knowledge of the facts;" in line 15, after the word "recorder," to insert "of the district in which the claims shall be situate;" in line 18, before the word "dollars," to strike out "seventy-five" and insert "one hundred;" in line 19, after the word "work," to strike out "and such;" after line 19 to insert "Such affidavit shall set forth the following: First, the name or number of the mining claims and where situated; second, the number of days' work done and the character and value of the improvements placed thereon; third, the date of the performance of such labor and of making improvements; fourth, at whose instance the work was done or the improvements made; fifth, the actual amount paid for work and improvement, and by whom paid when the same was not done by the owner. Such;" on page 3, line 14, after the word "of," to strike out "section" and insert "sections;" and in line 15, after the word "ninety-two," to insert "and 5393;" so as to make the section read:

That during each year and until patent has been issued therefor, at least $100 worth of labor shall be performed or improvements made on, or for the benefit or development of, in accordance with existing law, each mining claim in the district of Alaska heretofore or hereafter located. And the locator or owner of such claim or some other person having knowledge of the facts shall also make and file with the said recorder of the district in which the claims shall be situate an affidavit showing the performance of labor or making of improvements to the amount of $100, as aforesaid, and specifying the character and extent of such work. Such affidavit shall set forth the following: First, the name or number of the mining claims and where situated; second, the number of days' work done and the character and value of the improvements placed thereon; third, the date of the performance of such labor and of making improvements; fourth, at whose instance the work was done or the improvements made; fifth, the actual amount paid for work and improvement, and by whom paid when the same was not done by the owner. Such affidavit shall be prima facie evidence of the performance of such work or making of such improvements, but if such affidavits be not filed within the time fixed by this act the burden of proof shall be upon the claimant to establish the performance of such annual work and improvements. And upon failure of the locator or owner of any such claim to comply with the provisions of this act, as to performance of work and improvements, such claim shall become forfeited and open to location by others as if no location of the same had ever been made. The affidavits required hereby may be made before any officer authorized to administer oaths, and the provisions of sections 5392 and 5393 of the Revised Statutes are hereby extended to such affidavits. Said affidavits shall be filed not later than thirty days after the close of the year in which such work is performed.

The amendment was agreed to.

The next amendment was, in section 2, page 3, line 20, after the word "shall," to strike out "each give bond in such amount as the Secretary of the Treasury may require and in such form as the Attorney-General may approve, and shall account to the Secretary of the Treasury for all moneys received by them under the provisions of this act; and all such moneys shall, under the direction and control of the road commissioners of Alaska, be expended within the mining district where collected in the opening and improvement of highways, roads, and trails in Alaska," and to insert "collect the sum of $2.50 as a fee for the filing, recording, and indexing said annual proofs of work and improvements for each claim so recorded;" so as to make the section read:

SEC. 2. That the recorders for the several divisions or districts of Alaska shall collect the sum of $2.50 as a fee for the filing, recording, and indexing said annual proofs of work and improvements for each claim so recorded.

Mr. CARTER. In section 2, page 4, line 3, after the words "sum of," I move to amend the amendment of the committee by striking out "two dollars" and inserting "one dollar."

The VICE-PRESIDENT. The amendment proposed by the Senator from Montana will be stated.

The SECRETARY. On page 4, line 3, in the committee amendment, after the words "sum of," it is proposed to strike out "two dollars" and insert "one dollar;" so as to read:

Collect the sum of $1.50 as a fee for the filing, recording, and indexing said annual proofs of work and improvements for each claim so recorded.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. HEYBURN. On page 3, line 17, I move to amend by striking out the word "thirty," before the word "days," and inserting "ninety."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to amend, in section 1, on page 3, line 17, before the word "days," by striking out the word "thirty" and inserting "ninety."

Mr. BEVERIDGE. I accept the amendment.

Mr. PATTERSON. How will the text then read?

The SECRETARY. So that the amendment will read:

Sections 5392 and 5393 of the Revised Statutes are hereby extended to such affidavits. Said affidavits shall be filed not later than ninety days after the close of the year in which such work is performed.

The amendment was agreed to.

Mr. CARTER. In section 1, on line 15, page 2, I move to strike out the word "shall" and insert in lieu thereof the word "may."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In section 1, on page 2, line 15, before the word "also," it is proposed to strike out the word "shall" and to insert "may;" so as to read:

May also make and file with the said recorder.

Mr. BEVERIDGE. That is acceptable.

The amendment was agreed to.

Mr. CARTER. After the word "improvements," in line 4, on page 3, I move to strike out all down to and including the word "improvements," in line 7.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In section 1, on page 3, line 4, after the word "improvements," it is proposed to strike out the following words:

But if such affidavits be not filed within the time fixed by this act the burden of proof shall be upon the claimant to establish the performance of such annual work and improvements.

Mr. CARTER. That, Mr. President, proposes to establish a new rule of evidence, which, I take it, we do not desire to do.

The amendment was agreed to.

Mr. SPOONER. I think the bill ought to go over without prejudice.

Mr. BEVERIDGE. May I interrupt the Senator for just a moment?

Mr. SPOONER. Yes.

The VICE-PRESIDENT. Is objection made to the further consideration of the bill?

Mr. SPOONER. No.

Mr. BEVERIDGE. I think in the shape it is now the bill is acceptable to everybody, and the necessity of the bill is very great.

Mr. SPOONER. I do not want to kill the bill, but I thought it would be a good thing to have it printed as it has been amended, and then it can be taken up in the morning.

Mr. BEVERIDGE. I think that every Senator has submitted all the amendments he desires to offer, and the Senators who offered the amendments are mining lawyers.

Mr. CLAPP. I would suggest, these amendments having been put on the bill with so much rapidity, that it would be well to have the bill printed as it has been amended, so that it will be in such form that the Senate can understand it as it has been amended.

Mr. BEVERIDGE. Of course, if the Senator insists on that, the bill will have to go over.

Mr. CLAPP. No; I will not insist on it.

Mr. CARTER. Mr. President, the bill is undoubtedly a very meritorious one, but I think the construction of it again demonstrates the necessity of referring bills to the appropriate committees of the Senate. The Committee on Mines and Mining has been created by the rules of this Senate for the consideration of mining questions; and the bill as proposed makes it absolutely mandatory for these affidavits to be filed, when clearly it should be made permissive. I think hereafter all bills relating to Alaska should be referred to the committees of the Senate having jurisdiction over the subject-matter involved. There is no objection, however, I think, to the proposed bill becoming a law.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

OPENING OF MILLS AVENUE NE.

The bill (H. R. 9326) for the opening of Mills avenue NE. from Rhode Island avenue to Twenty-fourth street was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

GEORGE T. LARKIN.

The bill (H. R. 12188) for the relief of George T. Larkin was considered as in Committee of the Whole. It directs the Secretary of the Treasury to pay to George T. Larkin, late deputy United States marshal, eastern district of Tennessee, for expenses incurred in his defense for killing in self-defense a citizen of that State while resisting arrest, and in full compensation of all claims on account thereof, $692.55.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CAPT. GEORGE VAN ORDEN.

The bill (S. 3425) for the relief of Capt. George Van Orden United States Marine Corps, was considered as in Committee of the Whole.

The bill was reported from the Committee on Naval Affairs with an amendment, on page 1, line 11, after the word "by," to strike out "Corpl. Charles B. Chase, United States Marine Corps;" so as to make the bill read:

*Be it enacted, etc.*, That the sum of $291.37 be, and it is hereby, appropriated, to be paid out of any money in the Treasury not otherwise appropriated, and placed to the credit of Capt. (formerly First Lieut.) George Van Orden, United States Marine Corps, in the final settlement of his accounts as acting commissary of subsistence, United States Army, island of Guam, by the Auditor for the War Department, in lieu of Government funds to the same amount which were stolen and embezzled by a clerk in the office of the commissary of subsistence, island of Guam, in the year 1901, on account of the theft of which sum the accounts of the said Capt. (formerly First Lieut.) George Van Orden, United States Marine Corps, are now suspended in the office of the Auditor for the War Department.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FRANKLIN PATTERSON.

The bill (H. R. 3462) for the relief of Franklin Patterson was considered as in Committee of the Whole. It directs the Secretary of the Treasury to pay to Franklin Patterson, of Atlantic Highlands, N. J., $1,148, in full satisfaction of all claim against the United States under a certain attachment issued on the 4th of September, 1891, out of the inferior court of common pleas of the county of Monmouth, N. J., etc.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JOHN ALLEN.

The bill (H. R. 13122) to correct the military record of John Allen was considered as in Committee of the Whole. It authorizes the Secretary of War to revoke the dishonorable discharge which was issued in the case of Private John Allen, Company I, Thirty-second Infantry, United States Volunteers, and, if in his judgment the circumstances attending the separation of Allen from the military service warrant it, to issue an honorable discharge as of the date of his actual separation from the military service.

Mr. OVERMAN. On page 1, line 9, after the word "service," I move to insert:

*Provided*, That no pay, bounty, or other emolument shall become due or payable by virtue of the passage of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

DENATURED ALCOHOL.

The bill (H. R. 24816) to amend an act entitled "An act for the withdrawal from bond tax free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials," approved June 7, 1906, was announced as next in order.

Mr. KEAN. Let that bill go over, Mr. President, not that I have any objection to it, but it may require discussion.

The VICE-PRESIDENT. The bill will be passed over.

HARBISON-WALKER COMPANY, OF PITTSBURG.

The bill (H. R. 8) for the relief of the Harbison-Walker Company, of Pittsburg, Pa., was considered as in Committee of the Whole. It directs the Secretary of the Treasury (notwithstanding any statutory bar of limitation, and notwithstanding the requirements of the statutes as to payment under protest) to reopen and reconsider all claims of W. N. Reardon, of New York City, N. Y., or the Harbison-Walker Company, of Pittsburg, Pa., for the refunding to them or either of them, as their interest may appear, $1,820, alleged to have been improperly or illegally collected in the year 1901 by the collector of the port of New York, as assessed by the appraiser of the port of New York, and paid without protest by one or both of the above-named parties as duties upon five importations of magnesite, namely: Entry No. 35982, paid May 14, 1901, $1,315.40; entry No. 54764, paid May 14, 1901, $99; entry No. 45293, paid May 14, 1901, $131.60; entry No. 67884, paid June 1, 1901, $100; entry No. 83599, paid October 7, 1901, $174; total, $1,820; and it directs the Secretary of the Treasury to pay such amounts, not exceeding in the aggregate $1,820, as shall be shown to have been improperly or illegally collected as duties as aforesaid.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LIMIT OF COST OF CERTAIN PUBLIC BUILDINGS.

The bill (H. R. 25758) amending an act entitled "An act to increase the limit of cost of certain public buildings, to authorize the purchase of sites for public buildings, to authorize the erection and completion of public buildings, and for other purposes," and for other purposes, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MONONGAHELA RIVER BRIDGE, PENNSYLVANIA.

Mr. KNOX. I move that the Committee on Commerce be discharged from the further consideration of the bill (H. R. 25769) to amend an act entitled "An act to authorize the Fayette Bridge Company to construct a bridge over the Monongahela River, Pennsylvania, from a point in the borough of Brownsville, Fayette County, to a point in the borough of West Brownsville, Washington County," approved April 23, 1906.

The motion was agreed to.

Mr. KNOX. I now ask unanimous consent——

Mr. SPOONER. I inquire how near are we to the end of the Calendar?

Mr. GALLINGER. We have completed it.

Mr. KEAN. The Senator from Pennsylvania desires to have a bridge bill passed.

Mr. KNOX. I ask unanimous consent for the present consideration of the bill (H. R. 25769) to amend an act entitled "An act to authorize the Fayette Bridge Company to construct a bridge over the Monongahela River, Pennsylvania, from a point in the borough of Brownsville, Fayette County, to a point in the borough of West Brownsville, Washington County," approved April 23, 1906.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXPATRIATION OF CITIZENS AND THEIR PROTECTION ABROAD.

Mr. BACON. I am instructed by the Committee on Foreign Relations, to whom was referred the bill (H. R. 24122) in reference to the expatriation of citizens and their protection abroad, to report it favorably with certain amendments. As it is a very important matter, I ask the Senate to consent to its immediate consideration.

Mr. CULLOM. I hope the bill will be taken up and disposed of right now.

Mr. KEAN. It is a brief bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Foreign Relations with amendments.

The first amendment of the Committee on Foreign Relations was, in section 1, on page 1, line 3 after the word "authorized," to insert "in his discretion;" so as to read:

That the Secretary of State shall be authorized, in his discretion, to issue passports to persons not citizens of the United States as follows.

The amendment was agreed to.

The next amendment was, at the top of page 2, to strike out section 2, as follows:

SEC. 2. That the Secretary of State may issue, under such regulations as the President may prescribe, certificates of nativity to native-born American residents, setting forth the place and date of birth and place of permanent residence in the United States.

The amendment was agreed to.

The next amendment was, in section 3, on page 2, line 10, after the word "resided," to insert "for two years in the foreign state from which he came, or;" in line 11, after the word "years," to strike out "continuously;" in the same line, before the word "foreign," to strike out the article "a" and insert "any other;" in line 12, after the word "citizen," to strike out the colon and insert a semicolon and insert "and the place of his general abode shall be deemed his place of residence during said years;" so as to read:

When any naturalized citizen shall have resided for two years in the foreign state from which he came or for five years in any other foreign state it shall be presumed that he has ceased to be an American citizen, and the place of his general abode shall be deemed his place of residence during said years.

The amendment was agreed to.

Mr. CARTER. I desire to inquire of the Senator from Georgia if this bill proposes to authorize the issuance of a passport to a person who is not a citizen of the United States?

Mr. BACON. I will state that in a qualified sense that is true. It authorizes the issuance of passports to persons who have declared their intention and after a limited number of years and before they have received their final papers; but it expressly provides that the passport shall not be good as to the country of which that person is still a subject or of which he is still a citizen. In other words, it is simply a passport in other countries than the country from which he came and to which he owes allegiance.

Mr. CARTER. In addition to the declaration, a period of residence in this country is required?

Mr. BACON. Three years, I believe it is.

Mr. CARTER. I will inquire what the period is?

Mr. SPOONER. Three years.

Mr. BACON. Three years and a declaration of intention.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

UNITED STATES COURT FOR CHINA.

Mr. SPOONER. I am directed by the Committee on the Judiciary, to whom was referred the bill (S. 8409) to amend an act approved June 30, 1906, entitled "An act creating a United States court for China and prescribing the jurisdiction thereof," to report it favorably with amendments, and I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on the Judiciary with amendments.

The first amendment was, on page 2, after line 22, to strike out section 14 and in lieu thereof to insert:

SEC. 14. That members of the bar of the Supreme Court of the United States, or of any other Federal court, and members of the highest court of any State or Territory shall be admitted to practice before said court upon presentation of a certificate of admission to the bar of any said courts and upon satisfactory proof of good moral and professional character.

The amendment was agreed to.

The next amendment was to strike out section 15.

The amendment was agreed to.

Mr. SPOONER. On page 2, section 12, line 15, I move to strike out the word "findings" and insert the word "conclusions;" so as to read "conclusions of law."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

COPIAH COUNTY, MISS.

Mr. CULLOM. I move that the Senate proceed to the consideration of executive business.

Mr. McLAURIN. Will the Senator from Illinois yield to me to report a bill, which is very short, and to ask unanimous consent for its present consideration?

Mr. CULLOM. We will have all day to-morrow for the passage of bills.

Mr. McLAURIN. This is a short bill.

Mr. CULLOM. We have cleared the Calendar.

Mr. McLAURIN. It will take but a moment.

Mr. CULLOM. Very well; I withdraw the motion.

Mr. McLAURIN. I am directed by the Committee on Claims, to whom was referred the bill (H. R. 3518) for the relief of Copiah County, Miss., to report it favorably without amendment, and I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to the board of supervisors of Copiah County, Miss., $164.50, in full compensation for costs incurred in defending the suit of The United States against The Board of Supervisors of Copiah County and The Virginia Bridge and Iron Company in the circuit court of the United States for the southern district of Mississippi, at May term, 1899, held at Jackson, Miss.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXECUTIVE SESSION.

Mr. CULLOM. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened and (at 6 o'clock p. m.) the Senate adjourned until to-morrow, Thursday, February 28, 1907, at 11 o'clock a. m.

## NOMINATIONS.

*Executive nominations received by the Senate February 27, 1907.*

UNITED STATES ATTORNEYS.

Milton C. Elstner, of Louisiana, to be United States attorney for the western district of Louisiana. A reappointment, his term having expired on February 17, 1907.

Benjamin M. Ausherman, of Wyoming, to be United States attorney for the district of Wyoming, vice Timothy F. Burke, whose term expired January 19, 1907.

EXECUTIVE COUNCIL OF PORTO RICO.

Francisco de Paula Acuña, of Porto Rico, to be a member of the executive council of Porto Rico for a term of four years, vice Andres Crosas, resigned.

APPRAISER OF MERCHANDISE.

Charles K. Lexow, of New York, to be assistant appraiser of merchandise in the district of New York, in the State of New York, in place of Louis M. Martin, who declined the office. Office created by act of Congress approved February 1, 1907.

UNITED STATES DISTRICT JUDGES.

David Patterson Dyer, of Missouri, to be United States district judge for the eastern district of Missouri, in the place of Gustavus A. Finkelnburg, who has resigned, to take effect April 1, 1907.

Thomas C. Munger, of Nebraska, to be additional United States district judge for the district of Nebraska, as provided by the act approved February 27, 1907.

UNITED STATES MARSHALS.

Louis G. Davis, of Wyoming, to be United States marshal for the district of Wyoming, vice Frank A. Hadsell, whose term expired January 19, 1907.

J. Duncan Adams, of South Carolina, to be United States marshal for the district of South Carolina. A reappointment, his term having expired on January 19, 1907.

POSTMASTERS.

ARKANSAS.

Eva V. Moss to be postmaster at Earl, in the county of Crittenden and State of Arkansas, in place of Eva V. Harrington, to change name.

CALIFORNIA.

George D. Cunningham to be postmaster at Riverside, in the county of Riverside and State of California, in place of George D. Cunningham. Incumbent's commission expired February 26, 1907.

William A. Price to be postmaster at Redwood City, in the county of San Mateo and State of California, in place of George W. Lovie, resigned.

Linn L. Shaw to be postmaster at Santa Ana, in the county of Orange and State of California, in place of Linn L. Shaw. Incumbent's commission expired December 10, 1906.

COLORADO.

Augusta Reardon to be postmaster at Victor, in the county of Teller and State of Colorado, in place of Frank M. Reardon, deceased.

CONNECTICUT.

Alfred W. Converse to be postmaster at Windsor Locks, in the county of Hartford and State of Connecticut, in place of Alfred W. Converse. Incumbent's commission expired January 26, 1907.

ILLINOIS.

Frank L. Carroll to be postmaster at Manito, in the county of Mason and State of Illinois. Office became Presidential July 1, 1906.

George F. Jordan to be postmaster at Carlinville, in the county of Macoupin and State of Illinois, in place of George J. Castle. Incumbent's commission expired May 21, 1906.

J. C. Utterback to be postmaster at Salem, in the county of Marion and State of Illinois, in place of John P. Williams. Incumbent's commission expires March 3, 1907.

INDIANA.

Enos Coffin to be postmaster at Carthage, in the county of Rush and State of Indiana, in place of William L. Walker. Incumbent's commission expired February 3, 1907.

IOWA.

Lyman H. Henry to be postmaster at Charles City, in the county of Floyd and State of Iowa, in place of Lyman H. Henry. Incumbent's commission expired February 19, 1907.

Henry C. Hill to be postmaster at Milton, in the county of Van Buren and State of Iowa, in place of Henry C. Hill. Incumbent's commission expired January 29, 1907.

KANSAS.

Israel I. Diesem to be postmaster at Garden City, in the county of Finney and State of Kansas, in place of Joseph C. Kitchen. Incumbent's commission expired February 24, 1907.

MICHIGAN.

Peter Johnson to be postmaster at Thompsonville, in the county of Benzie and State of Michigan, in place of Isaac J. Quick. Incumbent's commission expired January 20, 1906.

MINNESOTA.

Samuel D. Peterson to be postmaster at New Ulm, in the county of Brown and State of Minnesota, in place of Lewis B. Krook. Incumbent's commission expired April 5, 1906.

George W. Rowell to be postmaster at North Branch, in the county of Chisago and State of Minnesota, in place of George W. Rowell. Incumbent's commission expired January 23, 1907.

MISSISSIPPI.

John C. Clifton to be postmaster at Senatobia, in the county of Tate and State of Mississippi, in place of John C. Clifton. Incumbent's commission expires March 2, 1907.

William G. Edwards to be postmaster at Enterprise, in the county of Clarke and State of Mississippi. Office became Presidential January 1, 1907.

Nevan C. Hathorn to be postmaster at Columbia, in the county of Marion and State of Mississippi, in place of Nevan C. Hathorn. Incumbent's commission expired February 9, 1907.

Lewis M. Joyner to be postmaster at Agricultural College, in the county of Oktibbeha and State of Mississippi. Office became Presidential January 1, 1907.

James R. S. Pitts to be postmaster at Waynesboro, in the county of Wayne and State of Mississippi. Office became Presidential October 1, 1906.

NEBRASKA.

Carelius K. Olson to be postmaster at Newman Grove, in the county of Madison and State of Nebraska, in place of Carelius K. Olson. Incumbent's commission expires March 10, 1907.

NEW YORK.

Gilmore O. Bush to be postmaster at Tuxedo Park, in the county of Orange and State of New York, in place of Gilmore O. Bush. Incumbent's commission expired February 12, 1907.

John K. Grant to be postmaster at Stamford, in the county of Delaware and State of New York, in place of John K. Grant. Incumbent's commission expires March 3, 1907.

James H. Hitt to be postmaster at Margaretville, in the county of Delaware and State of New York, in place of James H. Hitt. Incumbent's commission expired December 20, 1906.

Frank Stowell to be postmaster at Mayville, in the county of Chautauqua and State of New York, in place of Edward C. Fisk. Incumbent's commission expired February 12, 1907.

Daniel F. Strobel to be postmaster at Herkimer, in the county of Herkimer and State of New York, in place of Charles S. Munger. Incumbent's commission expired February 4, 1907.

NORTH CAROLINA.

S. M. Hambrick to be postmaster at Hickory, in the county of Catawba and State of North Carolina, in place of Columbus F. Blalock. Incumbent's commission expired January 13, 1907.

Charles A. Jonas to be postmaster at Lincolnton, in the county of Lincoln and State of North Carolina, in place of Franklin A. Barkley, removed.

J. Walter Jones to be postmaster at North Wilkesboro, in the county of Wilkes and State of North Carolina, in place of J. Walter Jones. Incumbent's commission expires March 3, 1907.

Isaac M. Meekins to be postmaster at Elizabeth City, in the county of Pasquotank and State of North Carolina, in place of Isaac M. Meekins. Incumbent's commission expired February 3, 1907.

Frank Roberts to be postmaster at Marshall, in the county of Madison and State of North Carolina. Office became Presidential January 1, 1907.

NORTH DAKOTA.

Agatha G. Patterson to be postmaster at Bismarck, in the county of Burleigh and State of North Dakota, in place of Agatha G. Patterson. Incumbent's commission expired February 12, 1907.

OHIO.

Charles R. Austin to be postmaster at Byesville, in the county of Guernsey and State of Ohio, in place of David S. Burt. Incumbent's commission expired April 18, 1906.

Seward L. Bowman to be postmaster at Lorain, in the county of Lorain and State of Ohio, in place of Seward L. Bowman. Incumbent's commission expired February 19, 1907.

Wilbert C. Davis to be postmaster at Wapakoneta, in the county of Auglaize and State of Ohio, in place of Wilbert C. Davis. Incumbent's commission expired June 30, 1906.

W. E. Halley to be postmaster at Greenville, in the county of Darke and State of Ohio, in place of Alonzo L. Jones. Incumbent's commission expired June 30, 1906.

Robert V. Jones to be postmaster at Sidney, in the county of Shelby and State of Ohio, in place of Robert V. Jones. Incumbent's commission expired June 30, 1906.

Charles A. McKim to be postmaster at Celina, in the county of Mercer and State of Ohio, in place of Charles A. McKim. Incumbent's commission expired May 16, 1906.

William T. Orton to be postmaster at West Unity, in the county of Williams and State of Ohio, in place of William T. Orton. Incumbent's commission expires March 3, 1907.

Akin M. Richards to be postmaster at Hicksville, in the county of Defiance and State of Ohio, in place of Akin M. Richards. Incumbent's commission expires March 3, 1907.

Henry S. Winsper to be postmaster at East Palestine, in the county of Columbiana and State of Ohio, in place of George B. Alaback. Incumbent's commission expires March 3, 1907.

OKLAHOMA.

John H. Asbury to be postmaster at Lexington, in the county of Cleveland and Territory of Oklahoma, in place of John H. Asbury. Incumbent's commission expired February 3, 1907.

OREGON.

Charles J. Howard to be postmaster at Cottage Grove, in the county of Lane and State of Oregon, in place of George W. McQueen, resigned.

PENNSYLVANIA.

Edward B. Farr to be postmaster at Tunkhannock, in the county of Wyoming and State of Pennsylvania, in place of George S. Baldwin. Incumbent's commission expired February 5, 1907.

Thomas H. Harter to be postmaster at Bellefonte, in the county of Center and State of Pennsylvania, in place of Windle W. Montgomery. Incumbent's commission expires March 2, 1907.

Edwin F. Luckenbach to be postmaster at Mauch Chunk, in the county of Carbon and State of Pennsylvania, in place of Edwin F. Luckenbach. Incumbent's commission expires March 11, 1907.

SOUTH CAROLINA.

Charles J. Shannon to be postmaster at Camden, in the county of Kershaw and State of South Carolina, in place of Charles J. Shannon. Incumbent's commission expired December 17, 1906.

SOUTH DAKOTA.

James B. Barber to be postmaster at Rapid City, in the county of Pennington and State of South Dakota, in place of James B. Barber. Incumbent's commission expired January 26, 1907.

George H. Few to be postmaster at Flandreau, in the county of Moody and State of South Dakota, in place of George H. Few. Incumbent's commission expired February 19, 1907.

Harry Goddard to be postmaster at Edgemont, in the county of Fall River and State of South Dakota, in place of James A. Stewart. Incumbent's commission expired January 13, 1907.

George H. Henry to be postmaster at Platte, in the county of Charles Mix and State of South Dakota, in place of Charles W. Anderson. Incumbent's commission expired June 27, 1906.

Thomas A. Stevens to be postmaster at Chamberlain, in the county of Brule and State of South Dakota, in place of Thomas A. Stevens. Incumbent's commission expired February 13, 1906.

TEXAS.

John W. Hedley to be postmaster at Chillicothe, in the county of Hardeman and State of Texas. Office became Presidential January 1, 1907.

WASHINGTON.

Fremont A. Tarr to be postmaster at Montesano, in the county of Chehalis and State of Washington, in place of Fremont A. Tarr. Incumbent's commission expired February 4, 1907.

WEST VIRGINIA.

Edwin H. Flynn to be postmaster at Spencer, in the county of Roane and State of West Virginia, in place of Edwin H. Flynn. Incumbent's commission expires March 2, 1907.

WISCONSIN.

Arthur P. Cheek to be postmaster at Baraboo, in the county of Sauk and State of Wisconsin, in place of Arthur P. Cheek. Incumbent's commission expired January 7, 1907.

Alfred B. Kildow to be postmaster at Brodhead, in the county of Green and State of Wisconsin, in place of Alfred B. Kildow. Incumbent's commission expired January 7, 1907.

Leonard H. Kimball to be postmaster at Neenah, in the county of Winnebago and State of Wisconsin, in place of Leonard H. Kimball. Incumbent's commission expired February 26, 1907.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate February 27, 1907.*

REGISTER OF THE LAND OFFICE.

M. H. Brennan, of Devils Lake, N. Dak., to be register of the land office at Devils Lake, N. Dak.

ASSISTANT TREASURER AT CINCINNATI.

Charles A. Bosworth, of Ohio, to be assistant treasurer of the United States at Cincinnati, Ohio.

RECEIVER OF PUBLIC MONEYS.

POSTMASTERS.

MINNESOTA.

Samuel D. Peterson to be postmaster at New Ulm, in the State of Minnesota.

Adolph J. Veigel to be postmaster at Mankato, in the county of Blue Earth and State of Minnesota.

## HOUSE OF REPRESENTATIVES.

WEDNESDAY, *February 27, 1907.*

The House met at 12 o'clock m.

Prayer by the Chaplain, Rev. HENRY N. COUDEN, D. D.

The Journal of the proceedings of yesterday was read and approved.

DAM ACROSS MISSISSIPPI RIVER, MINNESOTA.

Mr. STEVENS of Minnesota. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8377) to amend an act entitled "An act permitting the building of a dam across the Mississippi River, in the county of Morrison, State of Minnesota," approved June 4, 1906, which I send to the desk and ask to have read.

The Clerk read as follows:

*Be it enacted, etc.*, That section 1 of an act entitled "An act permitting the building of a dam across the Mississippi River, in the county of Morrison, State of Minnesota," approved June 4, 1906, be, and the same is hereby, amended so as to read as follows:

"SECTION 1. That the consent of Congress is hereby granted to the Pike Rapids Power Company, a Minnesota corporation, its successors or assigns, to construct and maintain across the Mississippi River a dam, canal, and works necessary incident thereto for water power and supply purposes at a point between sections 20, 29, and 32, in township 128 north, range 29 west of the fifth principal meridian, and sections 17 and 20, in township 39, range 32 west of the fourth principal meridian, in Morrison County, Minn.: *Provided*, That the plans for the construction of said dam and appurtenant works shall be submitted to and approved by the Chief of Engineers and the Secretary of War before the commencement of the construction of the same: *And provided further*, That the said the Pike Rapids Power Company, its successors or assigns, shall not deviate from such plans after such approval, either before or after the completion of said structures, unless the modifications of such plans shall have previously been submitted to and received the approval of the Chief of Engineers and of the Secretary of War: *And provided further*, That there shall be placed and maintained in connection with said dam a sluiceway so arranged as to permit logs, timber, and lumber to pass around, through, and over said dam without unreasonable delay or hindrance and without toll or charges: *And provided further*, That the dam shall be so constructed that the Government of the United States may at any time construct in connection therewith a suitable lock for navigation purposes, and may at any time, without compensation, control the said dam so far as shall be necessary for the purposes of navigation, but shall not destroy the water power developed by said dam and structures to any greater extent than may be necessary to provide proper facilities for navigation, and that the Secretary of War may at any time require and enforce, at the expense of the owners, such modifications and changes in the construction of said dam as he may deem advisable in the interests of navigation."

SEC. 2. That section 4 of said act above referred to be, and the same is hereby, amended so as to read as follows:

"SEC. 4. That the right to amend, alter, or repeal this act is hereby expressly reserved, and the same shall become null and void unless the construction of the dam hereby authorized is commenced within one year from June 1, 1907, and completed within three years thereafter."

Mr. STEVENS of Minnesota. Mr. Speaker, I have an amendment here which has been agreed to since the bill was read before, which I will send to the desk and ask to have read.

The Clerk read as follows:

Amend by adding after the word "thereafter," line 15, page 3, the words:

"And that except so far as may be otherwise provided by this act, the provision of the act of Congress entitled 'An act to regulate the construction of dams over navigable waters,' approved on the 21st day of June, 1906, shall be applicable to the construction of the dam provided by this act."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on agreeing to the amendment.

The question was taken; and the amendment was agreed to.

The SPEAKER. The question now is on the third reading of the Senate bill.

The bill was ordered to be read a third time, read the third time, and passed.

On motion of Mr. STEVENS of Minnesota, a motion to reconsider the last vote was laid on the table.

DAM ACROSS SAVANNAH RIVER AT M'DANIEL SHOALS.

Mr. AIKEN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 25773) permitting the building of a dam across the Savannah River at McDaniel Shoals, which I send to the desk and ask to have read.

The Clerk read as follows:

*Be it enacted, etc.*, That the Anderson Guaranty and Trust Company, a corporation organized under the laws of South Carolina, its successors and assigns, is hereby authorized to construct and maintain a dam across the Savannah River extending from a point in Hart County, Ga., to a point in Anderson County, S. C., upon or in the vicinity of McDaniel Shoals, and all works incident thereto in the utilization of the power thereby developed, in accordance with the provisions of an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906.

SEC. 2. That the right to amend or repeal this act is hereby expressly reserved.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, read the third time, and passed.

On motion of Mr. AIKEN, a motion to reconsider the last vote was laid on the table.

DAM ACROSS MISSISSIPPI RIVER, WRIGHT COUNTY, MINN.

Mr. STEVENS of Minnesota. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 25717) to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Clearwater, Wright County, Minn., approved June 14, 1906, which I send to the desk and ask to have read.

The Clerk read as follows:

*Be it enacted, etc.*, That section 3 of an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Clearwater, Wright County, Minn.," approved June 14, 1906, be, and the same hereby is, amended so as to read as follows:

"SEC. 3. That this act shall be null and void unless the construction of the dam hereby authorized is commenced within one year from June 14, 1907, and completed within three years thereafter."

The SPEAKER. Is there objection?

Mr. WILLIAMS. Mr. Speaker, reserving the right to object, I would ask the gentleman if this is at a point where the river is navigable?

Mr. STEVENS of Minnesota. No; it is not. At the same time, this act is in accordance with the general law provided last year for the construction of locks, without expense to the Government, whenever the Secretary of War shall designate. All this does is to extend the period of commencement one year from the 17th of last June.

Mr. WILLIAMS. I know that; but I have objection to the construction of dams in any navigable places.

Mr. STEVENS of Minnesota. This is about 50 miles above Minneapolis, where there may perhaps be a small boat and locks, but that is all.

Mr. WILLIAMS. This will not interfere with navigation?

Mr. STEVENS of Minnesota. No; on the contrary, it improves navigation.

Mr. WILLIAMS. It acts as a sort of slack water above?

Mr. STEVENS of Minnesota. Yes.

The SPEAKER. The Chair hears no objection. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, read the third time, and passed.

On motion of Mr. STEVENS of Minnesota, a motion to reconsider the last vote was laid on the table.

BRIDGE ACROSS THE ESCAMBIA RIVER, FLORIDA.

Mr. LAMAR. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 25795) to authorize the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, to construct a bridge over the Escambia River between the counties of Santa Rosa and Escambia, in the State of Florida, which I send to the desk and ask to have read. I ask unanimous consent that the substitute may be read in lieu of the original bill.

The SPEAKER. Is there objection to reading the substitute in lieu of the original bill?

There was no objection.

The Clerk read as follows:

*Be it enacted, etc.*, That the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, be, and is hereby, authorized to construct, operate, and maintain a bridge over the Escambia River between the counties of Escambia and Santa Rosa, in the State of Florida, at such point between the mouth of said river and the Alabama State line to be approved by the Secretary of War, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906.

SEC. 2. That the right to alter, amend, and repeal this act is hereby expressly reserved.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WILLIAMS. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Florida if this bill has the unanimous consent of the committee?

Mr. LAMAR. Yes; and the approval of the Department.

The SPEAKER. The Chair hears no objection. The question is on agreeing to the amendment in the nature of a substitute.

The question was taken; and the amendment was agreed to.

The SPEAKER. The question now is on the engrossment and third reading of the bill as amended.

The bill was ordered to be engrossed and read a third time, read the third time, and passed.

On motion of Mr. LAMAR, a motion to reconsider the last vote was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate by Mr. PARKINSON, one of its clerks, announced that the Senate had agreed to the conference report on the bill (H. R. 23551) making appropriations for the support of the Army for the fiscal year ending June 30, 1908.

The message also announced that the Senate had agreed to the report of the committee of conference on the bill (H. R. 24103) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1908, and for other purposes.

The message also announced that the Senate had agreed to the conference report on the bill (H. R. 24987) to authorize the sale and disposition of a portion of the surplus or unallotted lands in the Rosebud Indian Reservation, in the State of South Dakota, and making appropriation and provision to carry the same into effect.

The message further announced that the Senate had agreed to the conference report on the bill (H. R. 11040) to authorize the receivers of public moneys for land districts to deposit with the Treasurer of the United States certain sums embraced in their accounts of unearned fees and unofficial moneys.

The message also announced that the Senate had agreed to the report of the committee of conference on the bill (H. R. 15434) to regulate appeals in criminal prosecutions.

The message also announced that the Senate had agreed to the amendments of the House to the bill (S. 8510) to amend an act providing for the public printing and binding and the distribution of public documents.

The message also announced that the Senate had passed the bill (H. R. 13566) to amend sections 6 and 12 of the currency act, approved March 14, 1900, with amendments, in which the concurrence of the House was requested.

The message also announced that the Senate had passed with amendments the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes.

The message also announced that the Senate had passed without amendment House bills of the following titles:

H. R. 23612. An act granting an increase of pension to Thomas H. Adams; and

H. R. 25190. An act to amend sections 1, 2, and 3 of an act entitled "An act to prohibit shanghaiing in the United States," approved June 28, 1906.

The message also announced that the Senate had passed without amendment the bill (H. R. 25671) to authorize the construction of a bridge across the Grand Calumet River, State of Illinois.

The message announced that the Senate had passed bills of the following titles, in which the concurrence of the House was requested:

S. 8568. An act granting an increase of pension to Rosanna A. May;

S. 8526. An act permitting the erection of a dam across Coosa River, Alabama, at the place selected for Lock No. 12 in said river; and

S. 8556. An act to authorize the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, to construct a bridge over the Escambia River between the counties of Santa Rosa and Escambia, in the State of Florida.

BRIDGE ACROSS THE MONONGAHELA RIVER.

Mr. COOPER of Pennsylvania. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 25769.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 25769) to amend an act entitled "An act to authorize the Fayette Bridge Company to construct a bridge over the Monongahela River, Pennsylvania, from a point in the borough of Brownsville, Fayette County, to a point in the borough of West Brownsville, Washington County," approved April 23, 1906.

*Be it enacted, etc.*, That section 7 of an act entitled "An act to authorize the Fayette Bridge Company to construct a bridge over the Monongahela River, Pennsylvania, from a point in the borough of Brownsville, Fayette County, to a point in the borough of West Brownsville, Washington County," approved April 23, 1906, be, and is hereby, amended to read as follows:

"SEC. 7. That this act shall be null and void unless the construction of said bridge shall be commenced within one year from April 23, 1907, and shall be completed by April 23, 1910."

The SPEAKER. Is there objection?

Mr. WILLIAMS. Mr. Speaker, reserving the right to object, I would ask the gentleman if this is the unanimous report of the committee and is recommended by the War Department?

Mr. COOPER of Pennsylvania. Yes; and it is approved by the War Department, and its only purpose is to extend the time of building one year.

The SPEAKER. The Chair hears no objection.

The bill was ordered to be engrossed and read a third time; was read the third time, and passed.

On motion of Mr. COOPER of Pennsylvania, a motion to reconsider the last vote was laid on the table.

DAM ACROSS SAVANNAH RIVER.

Mr. AIKEN. Mr. Speaker, I ask unanimous consent for the present consideration of the following bill.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 25774) permitting the building of a dam across the Savannah River at Turner Shoals.

*Be it enacted, etc.*, That the Anderson Guaranty and Trust Company, a corporation organized under the laws of South Carolina, its successors and assigns, is hereby authorized to construct and maintain a dam across the Savannah River extending from a point in Elbert County, Ga., to a point in Abbeville County, S. C., upon or in the vicinity of Turner Shoals, and all works incident thereto in the utilization of the power thereby developed, in accordance with the provisions of an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906.

SEC. 2. That the right to amend or repeal this act is hereby expressly reserved.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed and read a third time; was read the third time, and passed.

On motion of Mr. AIKEN, a motion to reconsider the last vote was laid on the table.

DAM ACROSS THE MISSISSIPPI ABOVE THE VILLAGE OF MONTICELLO, WRIGHT COUNTY, MINN.

Mr. STEVENS of Minnesota. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 25716.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 25716) to amend an act entitled "An act permitting the building of a dam across the Mississippi River above the village of Monticello, Wright County, Minn.," approved June 14, 1906.

*Be it enacted, etc.*, That section 3 of an act entitled "An act permitting the building of a dam across the Mississippi River above the village of Monticello, Wright County, Minn.," approved June 14, 1906, be, and the same is hereby, amended so as to read as follows:

"SEC. 3. That this act shall be null and void unless the construction of the dam hereby authorized is commenced within one year from June 14, 1907, and completed within three years thereafter."

The SPEAKER. Is there objection?

Mr. WILLIAMS. Mr. Speaker, I take it this bill is like the last one.

Mr. STEVENS of Minnesota. Mr. Speaker, there are four of these bills; three of them have been passed and I have one more.

Mr. WILLIAMS. The same statement applies to all?

Mr. STEVENS of Minnesota. The same statement applies to all.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. STEVENS of Minnesota, a motion to reconsider the last vote was laid on the table.

DAM ACROSS SAVANNAH RIVER, NEAR MIDDLETON SHOALS.

Mr. AIKEN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 25776.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 25776) permitting the building of a dam across the Savannah River at Middleton Shoals.

*Be it enacted, etc.*, That the Anderson Guaranty and Trust Company, a corporation organized under the laws of South Carolina, its successors and assigns, is hereby authorized to construct and maintain a dam across the Savannah River extending from a point in Elbert County, Ga., to a point in Anderson County, S. C., upon or in the vicinity of Middleton Shoals, and all works incident thereto in the utilization of the power thereby developed, in accordance with the provisions of an act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906.

SEC. 2. That the right to amend or repeal this act is hereby expressly reserved.

The SPEAKER. Is there objection?

Mr. WILLIAMS. Mr. Speaker, this is the unanimous report of the committee?

Mr. AIKEN. Yes, sir.

The SPEAKER. The Chair hears no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. AIKEN, a motion to reconsider the last vote was laid on the table.

DAM ACROSS THE MISSISSIPPI RIVER AT SAUK RAPIDS, MINN.

Mr. STEVENS of Minnesota. Mr. Speaker, I ask unanimous consent for the present consideration of the bill S. 8400.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

An act (S. 8400) to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Sauk Rapids, Benton County, Minn.," approved February 26, 1904.

*Be it enacted, etc.*, That section 3 of an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Sauk Rapids, Benton County, Minn.," approved February 26, 1904, be, and the same is hereby, amended so as to read as follows:

"SEC. 3. That this act shall be null and void unless the dam herein authorized be commenced within three years and six months and be completed within six years from the time of the passage of this act."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. STEVENS of Minnesota, a motion to reconsider the last vote was laid on the table.

JAMES CARROLL.

Mr. HULL. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 5888) authorizing the President to appoint James Carroll a surgeon, with the rank of major, in the United States Army.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the President be, and he is hereby, authorized to nominate and, by and with the advice and consent of the Senate, appoint James Carroll, lieutenant-surgeon, United States Army, and curator of the Army and Navy Museum, a surgeon, with the rank of major, in the Medical Corps of the Army, and that the number of officers in the Medical Corps be increased by one, with the rank of major, for this purpose.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object——

The SPEAKER. Does the gentleman from Iowa yield to the gentleman from Illinois?

Mr. HULL. I want to make a statement. I understand the gentleman from Illinois desired a little information. I think he is thoroughly familiar with the case.

Mr. MANN. Is this the case of the officer of the Army who subjected himself to the yellow-fever experiments to determine whether the mosquito was the carrying medium of yellow fever?

Mr. HULL. Yes.

Mr. BUTLER of Pennsylvania. What was his name?

Mr. HULL. Doctor Carroll.

Mr. MANN. As far as I am concerned I have no objection.

The SPEAKER. The Chair hears no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. HULL, a motion to reconsider the last vote was laid on the table.

LEWIS A. TOWNE.

Mr. CHANEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 7840) granting an increase of pension to Lewis A. Towne, and that the House insist upon its amendment and agree to a conference.

The SPEAKER. The gentleman from Indiana asks unanimous consent that the House do insist upon its amendment to the bill (S. 7840) and agree to a conference. Is there objection?

There was no objection.

The SPEAKER announced the following conferees: Mr. HOLLIDAY, Mr. CHANEY, and Mr. WEISSE.

ROSEBUD INDIAN RESERVATION.

Mr. BURKE of South Dakota. Mr. Speaker, I call up conference report on the bill H. R. 24987.

The SPEAKER. The Clerk will read the title.

The Clerk read as follows:

H. R. 24987. An act authorizing the sale and disposition of a portion of the surplus of unallotted lands in the Rosebud Reservation, in the State of South Dakota, and making appropriations and provision for carrying the same into effect.

Mr. BURKE of South Dakota. Mr. Speaker, I ask unanimous consent that the statement may be read in lieu of the report.

The conference report and statement are as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24987) to authorize the sale and disposition of a portion of the surplus or unallotted lands in the Rosebud Reservation, in the State of South Dakota, and making appropriation and provision to carry the same into effect, having met in full and free conference, have agreed to recommend and do recommend to their respective Houses as follows: That the Senate recede from its amendment numbered 1.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, adding the following proviso: "*Provided*, That the same shall be reimbursed to the United States from the proceeds received from the sale of the lands described herein or from any money in the Treasury belonging to said Rosebud Indians:" and the Senate agree to the same.

ROBERT J. GAMBLE,
FRANK B. BRANDEGEE,
FRED T. DUBOIS,
*Managers on the part of the Senate.*

J. S. SHERMAN,
CHAS. H. BURKE,
JOHN H. STEPHENS,
*Managers on the part of the House.*

The statement was read as follows:

STATEMENT.

The result of the conference is that the Senate recedes from its amendment No. 1.

The bill provides that from the proceeds derived from the sale of the land there shall be a million-dollar fund deposited in the Treasury and interest shall be paid thereon for ten years. The bill of the House named the rate of interest at 3 per cent; the amendment of the Senate changed the rate from 3 to 5. The House recedes from its disagreement to amendment No. 2 with an amendment. This amendment of the Senate provides an appropriation of $15,000, or so much thereof as may be necessary for the purpose of making the allotments provided by the bill. The amendment is a proviso that the same shall be reimbursed to the United States from the proceeds received from the sale of the lands described in the bill or from any money in the Treasury belonging to said Rosebud Indians.

J. S. SHERMAN,
CHAS. H. BURKE,
JOHN H. STEPHENS,
*Managers on the part of the House.*

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and the conference report was agreed to.

ARMY APPROPRIATION BILL.

Mr. HULL. Mr. Speaker, I call up the conference report on the Army appropriation bill, and ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. Is there objection?

There was no objection.

The conference report and statement are as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23551) making appropriation for the support of the Army for the fiscal year ending June thirtieth, nineteen hundred and eight, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 10, 40, 41, 44, 57, 61, 62, 63, 67, 68, 69, 70, and 71.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 5, 7, 8, 9, 11, 12, 13, 14, 15, 16, 17, 18, 19, 21, 22, 24, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 39, 42, 43, 45, 48, 49, 50, 52, 53, 55, 56, 58, 59, 60, 65, and 66, and agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In the last line of said amendment, after the word "regulations," insert the words "and restrictions;" and the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: In lieu of the matter proposed in said amendment insert: "*Provided*, That hereafter the number of dental surgeons authorized by law shall be thirty-one, of which number one shall be detailed to the United States Military Academy;" and the Senate agree to the same.

Amendment numbered 38: That the House recede from its disagreement to the amendment of the Senate numbered 38, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "six million five hundred thousand dollars;" and the Senate agree to the same.

Amendment numbered 46: That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "three million seven hundred and fifty thousand dollars;" and the Senate agree to the same.

Amendment numbered 47: That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment as follows: In line 1 of said amendment strike out the words "not exceeding fifty acres of;" and in line 3 of said amendment strike out the words "and fifty;" and the Senate agree to the same.

Amendment numbered 51: That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "fourteen million five hundred thousand dollars;" and the Senate agree to the same.

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment as follows: In line 7 of said amendment strike out the semicolon and what follows; and strike out lines 8, 9, and to the period in line 10; the part of said amendment so stricken out being as follows: "and while traveling between their stations and Manila to take advantage of, or returning from, such leaves of absence, officers shall, unless with their commands, be deemed on detached service;" and the Senate agree to the same.

Amendment numbered 64: That the House recede from its disagreement to the amendment of the Senate numbered 64, and agree to the same with an amendment as follows: In line 10 of said amendment, after the word "therefor," strike out the comma and what follows; and strike out line 11 and the word "militia" in line 12; the part of the amendment so stricken out being as follows: "at the rate of twenty rounds of ball cartridges for each small arm so issued to the militia;" and the Senate agree to the same.

On amendments numbered 20 and 25, the committee of conference has been unable to agree.

J. A. T. HULL,
RICHARD WAYNE PARKER,
JAMES HAY,
*Managers on the part of the House.*

F. E. WARREN,
J. B. FORAKER,
J. C. S. BLACKBURN,
*Managers on the part of the Senate.*

The statement was read as follows:

STATEMENT.

Amendment No. 1 increases the appropriation for the United States service schools $5,000, and the House recedes.

Amendment No. 2 simply changes the name of The Military Secretary's Department to that of Adjutant-General's Department, and the House recedes.

Amendment No. 3 appropriates $190,000 from the receipts of the Washington-Alaska military cable and telegraph system for the extension and betterment of the system in Alaska, and the House recedes.

Amendment No. 4 appropriates $50,000 for the expense of the Signal Service of the Army in Cuba, and the Senate recedes.

Amendment No. 5 increases the amount for pay of the officers of the line made necessary by the passage of the artillery bill, and the House recedes.

Amendment No. 6 provides for assignment of pay accounts by commissioned officers to be given under such regulations as prescribed by the Secretary of War, and the House recedes and agrees to the same with an amendment.

Amendment No. 7 increases the pay for length of service made necessary by the passage of the artillery bill, and the House recedes.

Amendment No. 8 inserts a colon and the word "*Provided*," and the House recedes.

Amendment No. 9 gives to officers and enlisted men the status of being on public duty while serving by detail at the Jamestown Exposition, and the House recedes.

Amendment No. 10: Gives officers serving at Army schools the same privileges as to leave of absence as is now granted to officers at the West Point Military Academy; and the Senate recedes.

Amendment No. 11: Increases the pay of enlisted men of all grades made necessary by the passage of the artillery bill; and the House recedes.

Amendment No. 12: Increases the pay for length of service for enlisted men made necessary by the passage of the artillery bill; and the House recedes.

Amendments Nos. 13, 14, and 15: Refer to electricians of the Artillery Corps. As they are now taken care of in the

artillery bill they should not be included in the appropriation bill; and the House recedes.

Amendment No. 16: Is simply verbal; and the House recedes.

Amendment No. 17: Provides for the promotion of a major now serving in The Military Secretary's Department to the grade of lieutenant-colonel, when a vacancy occurs in either permanent or detail list; and the House recedes.

Amendments Nos. 18 and 19: Relate to the Bureau of Insular Affairs and provide simply for detail of an officer, who, while so serving, shall have the rank, pay, and allowances of a major; and the House recedes.

Amendment No. 20: Relates to the promotion of certain officers to the grade of major-general; and the conferees report a disagreement.

Amendment No. 21: Increases the dental surgeons by one; and the House recedes.

Amendment No. 22: Changes the amount appropriated so as to provide for the payment of the additional surgeon; and the House recedes.

Amendment No. 23: Provides for a dental surgeon at the Military Academy; and the House recedes, and agrees to the same with an amendment.

Amendment No. 24: Relates to number of contract surgeons; and the House recedes.

Amendment No. 25: Provides for promoting paymaster's clerks after thirty-five years' service to first lieutenancies and places them on the retired list; and report disagreement.

Amendment No. 26: Provides for extra-duty pay for enlisted men as switchboard operators; and the House recedes.

Amendment No. 27: Increases the total for mileage; and the House recedes.

Amendment No. 28: Strikes out the word "commissioned" before "officers;" and the House recedes.

Amendment No. 29: Is simply verbal; and the House recedes.

Amendment No. 30: Strikes out the words "brigade or division" in the section providing for Army maneuvers, and is made at the request of the Assistant Secretary of War, so that the Seacoast Artillery may have maneuvers on the coast of less size than brigade or division; and the House recedes.

Amendment No. 31: Is appropriation for purchase of flags for use on Memorial Day; and the House recedes.

Amendment No. 32: Strikes out the clause that provides for payment of damages incident to Army maneuvers at West Point, Ky.; and the House recedes.

Amendment No. 33: Provides for payment of 256 claims for damages; and the House recedes.

Amendments Nos. 34 and 35: Are simply punctuation; and the House recedes.

Amendment No. 36: Is a correction of totals; and the House recedes.

Amendment No. 37 provides for construction and maintenance of laundries at military posts, and the House recedes.

Amendment No. 38 is the total appropriation for the regular supplies of the Quartermaster's Department, and the House recedes and agrees to the Senate amendment with an amendment reducing the amount fixed by the Senate $275,511.07.

Amendment No. 39 provides for furnishing heat and light absolutely necessary under regulations of the War Department to officers, and the House recedes.

Amendment No. 40 provides for an additional chaplain with the rank of captain for the United States military prison at Fort Leavenworth, Kans., and the Senate recedes.

Amendment No. 41 relates to extra-duty pay of the Army-service men at West Point, and the Senate recedes.

Amendment No. 42 increases the total for incidental expenses of the Army, and the House recedes.

Amendment No. 43 increases the appropriation for horses for cavalry, artillery, and engineers made necessary by the artillery bill, and the House recedes.

Amendment No. 44 strikes out the words "other than seacoast artillery," and the Senate recedes.

Amendment No. 45 provides for the Government owning permanent heavy furniture in officers' quarters, and the House recedes.

Amendment No. 46 refers to the appropriation for barracks and quarters, and the House recedes from its disagreement and agrees to the amendment with an amendment reducing the appropriation as fixed by the Senate.

So that the total amount appropriated is $3,750,000.

Amendment No. 47: Provides for the acquisition of land near Fort Taylor, Fla., and the House recedes from its disagreement and agrees to the same with an amendment striking out the number of acres and reducing the appropriation by $50,000.

Amendment No. 48: Is to authorize the Secretary of War to grant certain rights to the Florida East Coast Railway Company, and the House recedes.

Amendment No. 49: Authorizes the Secretary of War to designate the military prison, and when so designated to place it under the law governing military prisons, and the House recedes.

Amendment No. 50: Limits the separation of estimates for transportation of Army supplies to the fiscal year only, and the House recedes.

Amendment No. 51: Relates to the total of transportation and supplies of the Army. The Senate increased the appropriation to over $15,000,000, and the House recedes with an amendment fixing the appropriation at $14,500,000.

Amendment No. 52: Authorizes the use of transports by Members of Congress and other officers of the Government while traveling under official business by regulations of the War Department, and the House recedes.

Amendment No. 53: Authorizes the Secretary of War to permit the use of transports to the island of Guam, and the House recedes.

Amendment No. 54: Fixes the time when leave of absence from the Philippine Islands shall commence, and the House recedes with an amendment striking out all after the word "stations;" so that they will not be on duty when traveling between their stations and Manila.

Amendment No. 55: Is relative to the total for clothing and camp and garrison equipage, claimed to be necessary by the artillery bill, and the House recedes.

Amendment No. 56: Makes immediately available the $30,000 appropriated for the Presidio Military Reservation, and the House recedes.

Amendment No. 57: Provides for the repair of Fort Matanzas, Fla., and the Senate recedes.

Amendment No. 58: Restores to the Medical Department the words "regulation, or contract," struck out in the House on a point of order, and the House recedes.

Amendment No. 59: Increases the appropriation for the medical and hospital department and is made necessary by amendment No. 60 following, and the House recedes.

Amendment No. 60: Is a proviso authorizing the Secretary of War to contract for the care, maintenance, and treatment of the insane natives of the Philippine army that are sent to the hospital for the insane, and the House recedes.

Amendment No. 61: Increases the appropriation for engineer equipment of troops, and the Senate recedes.

Amendment No. 62: Relates to the total, and the Senate recedes.

Amendment No. 63: Relates to the purchase of material and ammunition, and the Senate recedes.

Amendment No. 64: Provides for exchange of arms with the Militia, and the House recedes, with an amendment striking out the limitation of ball cartridges.

Amendment No. 65: Provides for marking the place where American soliders fell in Cuba and China, to complete the work already begun by Congress, and the House recedes.

Amendment No. 66: Authorizes the Secretary of War to loan tents and camp equipage to the Jamestown Commission, and the House recedes.

Amendment No. 67: Authorizes the President to appoint Wiliam H. Crook a major in the Army, and place him on the retired list; and the Senate recedes.

Amendment No. 68: Provides for the erection of a statue of Gen. Nathanael Greene; and the Senate recedes.

Amendment No. 69: Relates to a statue for General Stark; and the Senate recedes.

Amendment No. 70: Relates to a statue of General Screven; and the Senate recedes.

Amendment No. 71: Relates to an appropriation for a soldiers' monument at New Orleans; and the Senate recedes.

J. A. T. HULL,
RICHARD WAYNE PARKER,
JAMES HAY,
*Managers on part of the House.*

During the reading,

Mr. PRINCE. Is this the proper time and place to make a motion to concur in Senate amendment No. 20 with an amendment?

The SPEAKER. The statement is not yet complete. The Chair does not know what the report contains.

The Clerk concluded the reading of the statement.

The SPEAKER. The question is on agreeing to the conference report.

Mr. PRINCE. Mr. Speaker, I only want to hold my rights if

this motion prevailing does not take them away from me. There are two disagreements.

The SPEAKER. The Chair understands that the gentleman from Illinois [Mr. PRINCE] says that the conference report closes up all matters in difference between the House and Senate except as to two amendments?

Mr. HULL. That is correct.

The SPEAKER. Amendments No. 20 and No. 25?

Mr. HULL. Twenty and 25.

The SPEAKER. The first question will be on agreeing to the conference report.

The question was taken; and the conference report was agreed to.

Mr. HULL. Mr. Speaker, one of the two matters in disagreement is amendment No. 20, which provides for promotion upon retirement to those officers now serving as brigadier-generals on the active list who have had three years' service as brigadier-generals. The difference of opinion in conference was largely as to the effect of the language as it stands in the bill. It was construed that it admitted all who were in the field or at West Point. It was also construed that if passed as submitted by the Senate to the House it would exclude all who had not three years of actual service as brigadier-generals at the date of the passage of the act. I will say to the House that when this bill was to be sent to conference I made an agreement with one of my colleagues that unless a certain amendment that he desired to offer was agreed to in conference I would bring it back with a disagreement, so that he would not be deprived of the right he then held. And in obedience to that agreement we come here to submit the whole matter to the House.

And now, Mr. Speaker, I desire to yield to my colleague [Mr. PRINCE] to offer his amendment.

The SPEAKER. The Clerk will read the amendment No. 20.

The Clerk read as follows:

On page 13, line 13, after "dollars," insert:

"*Provided*, That officers who served creditably in the regular or volunteer forces during the civil war prior to April 9, 1865, and who now hold the rank of brigadier-general on the active list of the Army, having previously held that rank for three years or more, shall, when retired from active service, have the rank and retired pay of major-general."

Mr. PRINCE. I now, Mr. Speaker, make the following motion, which is to concur in Senate amendment No. 20 with an amendment as follows:

After the word "five," in line 3, page 16, insert "otherwise than as a cadet at the Military Academy at West Point."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Insert after the word "five," in line 3, the words "otherwise than as a cadet at the Military Academy at West Point."

Mr. SHERMAN. Mr. Speaker, may we have the provision read as it would be when amended?

The SPEAKER. One moment. The gentleman from Illinois [Mr. PRINCE] moves to concur in Senate amendment No. 20 with an amendment, and the Clerk will again read the amendment that he proposes, and then read the amendment as it would be after the gentleman's motion to amend.

The Clerk read as follows:

After the words "eighteen hundred and sixty-five" insert the words "otherwise than as a cadet at the Military Academy at West Point;" so that the Senate amendment as amended will read as follows:

"Page 13, line 13, after 'dollars,' insert:

"'*Provided*, That officers who served creditably in the regular or volunteer forces during the civil war prior to April 9, 1895, otherwise than as a cadet at the Military Academy at West Point, and who now hold the rank of brigadier-general on the active list of the Army, having previously held that rank for three years or more, shall, when retired from active service, have the rank and retired pay of major-general.'"

Mr. HULL. Mr. Speaker, does the gentleman desire time now? If not, I yield to the gentleman from Virginia [Mr. HAY].

Mr. HAY. I move to recede and concur in the Senate amendment.

The SPEAKER. The Chair will state to the gentleman from Illinois [Mr. PRINCE] and the gentleman from Virginia [Mr. HAY] that before the stage of disagreement the motion to concur with an amendment takes precedence of the motion to concur, but it is divisible—that is to say, first, a vote on the amendment, then on the motion to concur. The gentleman from Illinois moves not only to recede and concur, which would bring the two bodies together, but moves to recede and concur with an amendment. Now, that presents two propositions, or rather three. Does the gentleman ask a division?

Mr. HAY. I ask a division; and I would suggest, Mr. Speaker, that the motion I have made will bring the two Houses together sooner than the motion made by the gentleman from Illinois.

The SPEAKER. On former occasions there has been much of contention as to the precedence of these motions, and the Chair now recalls that the House has already once disagreed with the Senate amendment, and the Chair is informed by the Clerk at the Speaker's table that there is probably a precedent exactly in point. The Chair will read:

The stage of disagreement having been reached—

That is this case—

the motion to recede and concur takes precedence of the motion to recede and concur with an amendment—

Referring to several precedents.

Mr. HAY. Mr. Speaker, I would suggest that the gentleman from Illinois [Mr. PRINCE] does not contend that his motion has precedence over the one made by myself.

The SPEAKER. The gentleman from Illinois [Mr. PRINCE] moves to recede and concur in the Senate amendment with an amendment. That involves two propositions—to recede and to concur with an amendment; in fact, three propositions, for the motion to concur may be separated from the motion to amend. The gentleman from Virginia moves to recede and concur, a motion containing two propositions. Now, there being two propositions, one to recede and the other to concur, these if agreed to as one motion would bring the House in accord with the Senate, and as far as this amendment is concerned, pass the bill; and so it has been held that this motion when undivided has precedence of the double or treble motion that the House recede and concur with an amendment. There being two propositions in the motion of the gentleman from Virginia [Mr. HAY], the House will see at once that if it desire to amend freely, without being restricted to a single amendment, it must be possible to divide the motion to recede and concur and the motion to concur with an amendment. Hence, while the motion of the gentleman from Virginia would take precedence, yet on demand of a Member it is divisible, and the first question would be on a motion to recede, and if the House concludes to recede, then on the motion to concur, unless a preferential motion to amend should come in.

Mr. DE ARMOND. Mr. Speaker, if the Chair will indulge me a moment, I should like to make a suggestion.

Mr. HULL. Mr. Speaker, I have not yielded the floor.

The SPEAKER. Does the gentleman from Iowa yield to the gentleman from Missouri?

Mr. HULL. I will yield later; but it seems to me that the gentleman from Illinois——

The SPEAKER. The gentleman from Missouri desires to make a suggestion.

Mr. DE ARMOND. Of parliamentary law.

The SPEAKER. A parliamentary suggestion.

Mr. DE ARMOND. If I may be permitted to talk a moment on the parliamentary law involved——

The SPEAKER. The Chair will hear the gentleman.

Mr. DE ARMOND. I think the proposition is this: A motion is made to recede and concur. A motion is made to concur with an amendment, which is also a motion to recede and concur with an amendment, because unless there be a receding from the disagreement we do not approach the point of concurring. Then, taking the Speaker's line of argument, which I would not, however, myself adopt as to parliamentary law, but taking it, there are three propositions involved in the motion of the gentleman from Illinois and but two in the motion of the gentleman from Virginia.

Viewed from another standpoint, the motion of the gentleman from Virginia [Mr. HAY], adopted, closes the whole matter between the two Houses as to the amendment, and the motion of the gentleman from Illinois [Mr. PRINCE], adopted, leaves the dispute between the two Houses open. The latter is a declaration by the House that we will not concur in the Senate amendment, but are willing to concur in that amendment with another amendment, and it is an invitation to the Senate to concur with the House in an amendment to the Senate amendment. It would require action by the Senate, and, maybe, a conference. I have always understood in regard to these matters that the prime test is and has been, which motion will soonest bring the two Houses to an agreement, which of two or of several motions pending is the motion that will terminate the controversy, providing the House adopts that motion? By a test of that kind the motion of the gentleman from Virginia [Mr. HAY] unquestionably has precedence. By the test of a count as to the propositions involved it has the advantage, because there can not be more than two found in it, really but one, while there are clearly three in the other—receding, amendment, concurrence—against receding and concurrence by the motion of the gentleman from Virginia.

As these precedents, Mr. Speaker, frequently arise, to illuminate as well as to plague, it is worth while now to adopt the correct procedure, and for that reason, and in the belief that the

motion of the gentleman from Virginia clearly has precedence, I have offered these suggestions.

Mr. PRINCE rose.

Mr. DE ARMOND. I yield to the gentleman from Illinois for a question.

Mr. PRINCE. Mr. Speaker, I have no question to ask. As I understand, the Speaker has ruled, and I think the suggestions of the gentleman from Missouri [Mr. DE ARMOND] are in the nature of an argument in behalf of the motion of the gentleman from Virginia [Mr. HAY], and not germane to the point of order, which has been passed upon.

Mr. DE ARMOND. I understood the Chair was deliberating upon this question, and I have presumed that the Chair would like to decide it in accordance with parliamentary law. I offered suggestions as to what, in my judgment, is the parliamentary law of the case.

The SPEAKER. The Chair simply held that the motion of the gentleman from Virginia took precedence of the motion of the gentleman from Illinois, but also held that it was divisible if demanded.

Mr. PRINCE. Mr. Speaker, when the proper time comes, if that is held, I shall demand a division.

The SPEAKER. This is the time.

Mr. PRINCE. I demand a division.

Mr. HAY. The Chair holds my motion has precedence, but that if the gentleman desires, in the event that my motion is agreed to, to offer an amendment he may do so.

The SPEAKER. Precisely, but the gentleman demands a division. So the first question is the motion to recede and to concur. The first question is, Shall we recede from our disagreement with the Senate?

Mr. HULL. Mr. Speaker, I understand the gentleman from Illinois wants a little time. I do not want to yield the floor, but I will ask him how much time he desires?

Mr. PRINCE. Mr. Speaker, I may want ten minutes, not to exceed that.

The SPEAKER. The Chair will state to the gentleman, merely for his consideration, that it seems to the Chair that the gentleman from Illinois [Mr. PRINCE] and the gentleman from Virginia [Mr. HAY] agree on the question of receding. Then the next question would be on concurring.

Mr. PRINCE. I agree to that.

Mr. HAY. Certainly.

The SPEAKER. Then the Chair will put the question. The question is on the motion to recede.

The question was taken; and the motion was agreed to.

The SPEAKER. Now, the question is on the other branch of the motion, that the House do recede with an amendment.

Mr. HULL. Mr. Speaker, I yield ten minutes to the gentleman from Illinois.

The SPEAKER. And the motion to amend has precedence of the motion to concur. The House having retired from its position of disagreement, what amendment does the gentleman from Illinois offer?

Mr. PRINCE. I again offer the amendment which I before offered.

The SPEAKER. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk again reported the amendment offered by the gentleman from Illinois, Mr. PRINCE.

Mr. HULL. I yield ten minutes to the gentleman from Illinois.

Mr. PRINCE. Mr. Speaker——

Mr. JAMES. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. JAMES. Which motion should be put to the House first, the motion to concur?

The SPEAKER. The question is on the amendment of the gentleman from Illinois.

Mr. JAMES. Does the Speaker hold that the motion to concur does not have precedence over the motion to concur with an amendment?

The SPEAKER. The House has receded from its position of disagreement with the Senate, and that leaves the situation as if there had been no disagreement. At that stage a motion to amend takes precedence of the motion to concur.

Mr. JAMES. Would not, Mr. Speaker, a motion to concur and bring the matter before the House have precedence over a motion to concur with an amendment?

The SPEAKER. They are divisible, and the House having receded from its disagreement, the amendment is in order.

Mr. DE ARMOND. Mr. Speaker——

Mr. PRINCE. Mr. Speaker, I have the floor and I am debating the question, and I decline to yield, as I have but ten minutes.

Mr. DE ARMOND. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore (Mr. SHERMAN). The gentleman from Missouri desires to make a parliamentary inquiry. The gentleman will state it.

Mr. DE ARMOND. The parliamentary question is whether I might be heard for a minute or two upon this question of order.

The SPEAKER pro tempore. That is not a parliamentary inquiry. The gentleman from Illinois is recognized.

Mr. PRINCE. Mr. Speaker, April 23, 1904, a public law was passed by Congress and approved by the President. In that law, on page 7, under the head of "Retired officers" these words are found:

> That any officer of the Army below the grade of brigadier-general who served with credit as an officer or enlisted man in the regular or volunteer forces during the civil war prior to April 9, 1865, otherwise than as a cadet, etc.

I am simply desiring to follow the law that Congress passed in 1904 and make the same provision apply to the retirement of these officers that applied to the retirement of officers on April 23, 1904. My distinguished predecessor, a soldier of great distinction and one of the ablest men who ever served in this House, the late lamented Col. B. F. Marsh, who went to his grave with lead that he received upon southern battlefields fighting in defense of his flag, among other questions, when the Army reorganization act was up under discussion, asked this question of the then Secretary of War with reference to staff officers. This is found on page 29:

> Is not this present system the one weak point of the United States Army?

Secretary Root, one of the ablest Secretaries of War that this country has ever had, the equal, if not the superior, of the great war Secretary, Edwin M. Stanton, answered in these words:

> It is not in human nature that the men in each permanent staff corps should not regard their own work and their own powers as being of the greatest importance. They are all here in Washington, they are all in immediate contact with Senators and Members of the House, with members of the Cabinet, and with the President. Year by year, little by little, a line here in this law and a paragraph there in that law, and the powers of these staff officers are built up.

The law of February 23, 1904, made it applicable to those below the rank of brigadier-general. The provision here, as stated by the Secretary of War, a line here and a line there, provides that above the rank of brigadier-general they shall be retired as major-generals. A line here and a line there changes a West Point cadet and makes him a distinguished soldier in the war between the North and the South from 1861 to 1865. Now, it is conceded that there is but one officer involved in this controversy. In order that the House and the country—for I call the country's attention to this day's business—in the closing days of this session, when a bill containing eighty millions and more of dollars for the appropriation for the Army, is held up for personal legislation and for none other, in order to benefit one officer of the Army under the guise of giving him service in the Army prior to April 9, 1865. Who is this officer? What is his record? The country has a right to know, and the people should know who we are legislating for. Let me read from the Army Register of 1906, as follows:

> Military Secretary's office, with the rank of brigadier-general, William P. Hall, a cadet—

My countrymen, listen to what you are asked to vote for—

> cadet at Military Academy, September 1, 1864.

A cadet at the academy at West Point in September, 1864. Graduated at the academy at West Point as a second lieutenant of infantry, June 15, 1868; unassigned of March 31, 1868; assigned to Fifth Cavalry, 14th of July, 1869; first lieutenant, July 1, 1876; captain, March 8, 1887; major in the Adjutant-General's office, November 6, 1893; accepted, November 10; lieutenant-colonel in the Adjutant-General's office, September 11, 1897; colonel, April 18, 1901; brigadier-general, 23d of April, 1904.

Did he acquire that, my fellow-Members of this House, by service in the field? Did he acquire that distinction? No. In this same bill, by legislation, this man was taken from the ranks of colonel, and here is a provision on page 5 of the bill of 1904 by which he is created, by legislative act, a brigadier-general of the Army of the United States. I read from page 5:

> That of the officers consolidated as hereinbefore provided the senior in rank, who shall be chief of the consolidated department and the title of whose office is hereby changed to that of The Military Secretary, shall hereafter have the rank of major-general, and the second senior of said officers shall hereafter have the rank of brigadier-general: *Provided further*, That when the office of Military Secretary—

This same officer, created by the same mode of legislation forcing one body to accept the wishes of another under pressure, was made a brigadier-general, and now comes in a provision to make him a major-general on the retired list of the Army of the United States. I have quoted you the law that has the words in, "other than as a cadet," and I want also to substitute the

same words. I want to stop what the Secretary of War said when he claimed that little by little and change of line by line and paragraph by paragraph these officers here of the staff were increasing their power, increasing their office, increasing their rank, and increasing their pay. But it is fair, my countrymen, to say to you that I am in favor of this provision as it stands with this amendment made. I am in favor——

Mr. PAYNE. I would like to ask the gentleman a question. I understand the gentleman to say that if the Senate provision was adopted, then an officer who was serving, by being educated at West Point during the civil war, would now be entitled to the benefits of it, although he was not in the field at that time?

Mr. PRINCE. That is my judgment of it. That is why I am objecting to this amendment.

Mr. PAYNE. And the gentleman opposes that upon the decision of the Supreme Court holding that service in West Point was service in the Army?

Mr. PRINCE. There is no question about that. That is conceded by gentlemen on the other side who are arguing to concur in this amendment.

In the United States Reports, volume 112, in the case of the United States *v.* Morton, it was clearly held that a cadet at West Point was a part of the Army of the United States. He took the oath to remain in the Army for eight years. He takes the same oath when he enters as a cadet that any officer of the Army takes when he gets his commission as Lieutenant-General or any other commission that he gets.

Mr. PAYNE. I understand that is the decision of the court.

Mr. PRINCE. Yes, sir; that is the decision.

Mr. PAYNE. And the gentleman has examined the language of this Senate amendment so that he is sure?

Mr. PRINCE. I have, and I have not any doubt about it. And I want to say frankly that if there is any doubt my amendment puts it beyond the possibility of any doubt, and we ought to do that.

Mr. PAYNE. It would do no other harm than remove the doubt.

Mr. PRINCE. If these gentlemen are correct in this contention that the Senate provision does not make General Hall a major-general on the retired list, why this contention over it? If they want to be honest with the House and the country, and they say it does not include this man, then put it beyond the possibility of a doubt by saying it shall not apply to a cadet. If it means the other way, then honestly and frankly and fairly state so here.

Mr. GROSVENOR. I want to ask the gentleman from Illinois if he had read to the House all of the military service that General Hall has rendered to the country?

Mr. PRINCE. I have read, Mr. Speaker, all of the military record that I find in the official Army Register for 1906. I wish to say further that if this officer is entitled to one grade higher it is not for services rendered since he graduated from the Military Academy; but if it is for service at all it is for service that he rendered as a student at West Point, paid by the Government, because the theory by which we have increased one grade higher the man who served in the Army from 1861 to 1865——

The SPEAKER pro tempore. The gentleman's time has expired.

Mr. PRINCE. Mr. Speaker, I ask unanimous consent for five minutes more.

The SPEAKER pro tempore. The time is in the control of the gentleman from Iowa [Mr. HULL].

Mr. HULL. How much have I remaining?

The SPEAKER pro tempore. Fifty minutes.

Mr. HULL. Then I yield five minutes more to the gentleman from Illinois, and then I will yield to the gentleman from Virginia [Mr. HAY] after that.

Mr. GROSVENOR. I should like to have the gentleman tell me one thing further.

Mr. PRINCE. I will yield to the gentleman.

Mr. GROSVENOR. Mr. Speaker, I should like to ask the gentleman one further question. As I heard that record, it gave no credit for any act of service in the field.

Mr. PRINCE. I pledge the gentleman and the House that I have read the record as it appears in the Army Register.

Mr. GROSVENOR. Is it not a fact that this officer carries a medal of honor?

Mr. PRINCE. As to that I do not know, and as to the contention before the House, it has nothing to do with it.

Mr. GROSVENOR. Oh!

Mr. PRINCE. We passed a law on February 23, 1904, to give to the men who rendered service——

Mr. JAMES. I want to ask the gentleman about that medal of honor that he forgot to say anything about. Was it not given to this officer for courage on the field?

Mr. PRINCE. It may have been.

Mr. JAMES. And in the Indian wars?

Mr. PRINCE. But remember, this is for services rendered during the civil war. This is a provision for those—

Who served creditably in the regular or volunteer forces during the civil war.

It is the civil-war period that I am talking about. It is the eight months that he was there as a fourth classman at West Point. If he is entitled to this extra compensation and preferment it is by virtue of civil-war service. If you want to give it to everybody connected with the Army say so and meet the question fairly, if that is your purpose.

Now, Mr. Speaker and gentlemen of the House, I protest against this officer being put on the list as a retired major-general, when the Army Register shows many living men—such major-generals as the one-legged Daniel Sickles, who is on the retired list as a major-general. I protest against a cadet at West Point being placed on the retired list solely for his West Point service by the side of Oliver O. Howard, who has but one arm, having lost the other in defending his country. I protest against placing him there by the side of Wesley Merritt and the long line of distinguished living major-generals who are upon that list for services rendered in the great contest from 1861 to 1865. No, my countrymen, I protest against this officer being placed upon the retired list as a major-general by the side of "Pap" Thomas, the hero of Chickamauga; by the side of Meade and Hancock, of Gettysburg and Antietam. I say such legislation as this is demoralizing to the Army. I say it is unjust that one man out of 3,700 shall be selected for civil-war services rendered as a cadet, immune from all danger, and made a major-general and be given the pay that goes with that rank. Now, what is the pay? Let me tell you what he gets. He is now a brigadier-general, and the pay tables show that his pay is now $5,500 a year. His monthly pay is $458. Put him on the retired list as a major-general, and he receives an annual pay of $5,625 and a monthly pay of $468.75. He will receive more on the retired list than he receives to-day on the active list. He receives more, based upon eight months' service as a cadet at West Point, than any Member of this House to-day receives as the salary of a Member or as any Senator in yonder body receives as a Senator of the United States under the law that exists to-day. Now, when we go back to our homes, as we will in the near future, when we stand up and make Grand Army speeches and tell how we love the old soldiers and the men who followed the flag and stood by the country, I want those of you who vote to take a cadet at West Point and put him on the retired list by the side of Thomas and Meade and Hancock and Sickles to explain your vote to the old soldiers of the country.

[Here the hammer fell.]

Mr. HULL. I yield to the gentleman from Illinois [Mr. Foss] for a question.

Mr. FOSS. The gentleman from Iowa is well aware that we are trying to keep the two services upon the same plane. As I understand, the Army law of 1904 applied to Army officers of the grade of colonel or less. Now, do I understand that this provision applies to those above the grade of colonel who are now on the active list and also on the retired list?

Mr. HULL. No; on the active list only. These officers are not on the retired list. I will say, Mr. Speaker, in answer to the question of the gentleman from Illinois [Mr. Foss], that this provision takes certain men of civil-war service and gives those who have served three years as brigadier-generals on the active list on retirement the grade of major-general on the retired list; or, one construction, those who at time of passage of this act have served three years as brigadier-generals. It does not touch the retired list in any way at all. It leaves every man on the retired list just as he is to-day. It does not place the two arms of the service on an equality, because under the gentleman's law a rear-admiral of the junior grade with the rank of brigadier serving five years on the active list becomes a major-general by operation of law when he retires.

Mr. PARKER. Before he retires?

Mr. HULL. Yes; before he retires, while he is still on the active list; and in order to put the two services on an equality we should pass an amendment here that would take every brigadier-general of the Army who served a period of five years as brigadier-general and make him a major-general by operation of law, without regard to vacancies, even.

Mr. FOSS. What law does the gentleman refer to?

Mr. HULL. The law provides that on five years' service a rear-admiral of the junior rank shall be promoted to a rear-admiral of the senior rank.

Mr. FOSS. The gentleman will recall that last year a provision was placed on the naval appropriation bill, upon the motion of the gentleman from Iowa [Mr. HULL], applying to officers of the Navy not above the grade of captain——

Mr. HULL. On the retired list.

Mr. FOSS. That is to say, making a provision with reference to this in the Navy similar to the Army provision, and the argument that was used by the gentleman at that time was to put the two services upon the same plane.

Mr. HULL. That was applying to the retired list.

Mr. FOSS. It applied to the retired list and——

Mr. HULL. And it still remains the same as the Army in that respect, because we have a large number of splendid brigadiers who were major-generals in the Volunteer Army during the civil war who were retired as brigadiers and who have never received any benefit from their civil-war service. They are brigadier-generals yet.

Mr. FOSS. I want to call the attention of the gentleman to the fact that there are a number of men who served in the civil war now on the active list of the Navy who are above the grade of captain, which is the corresponding grade of colonel, of whom it may be a question whether or not they can be retired with the rank and pay of the next higher grade. I am not opposing this proposition at all, but I will say that if there is any question under the present law as to whether or not these men now on the active list who performed creditable service in the civil war shall have the rank and pay of the next higher grade—if there is any question as to it I shall, in case this provision goes through, insist in the future upon some provision with regard to the Navy which will give the same privileges to the naval officer as to the Army officer.

Mr. HULL. If the gentleman brings it in we will try and amend it so as to give our fellows the extra promotion, too.

Mr. PAYNE. Mr. Speaker, if that is true, would it not be better to knock out the whole business now at the inception of it?

Mr. HULL. Oh, let us meet each question as it comes up. How much time does the gentleman from Virginia desire?

Mr. HAY. Ten minutes.

Mr. HULL. I yield ten minutes to the gentleman from Virginia.

Mr. HAY. Mr. Speaker, I had supposed that the gentleman from Illinois [Mr. PRINCE] was actuated entirely by a principle and not by animosity against any one man. From the tenor of his remarks I take it that he is directing his opposition to this amendment against General Hall, on the ground solely that he has done service at West Point during the war and did not serve in the Army during the civil war.

Mr. PRINCE. Mr. Speaker, will the gentleman yield?

Mr. HAY. I yield for a question.

Mr. PRINCE. I know that my friend of long service on the committee will not put me in that attitude. I thought it was clearly understood——

Mr. HAY. Oh, I yielded for a question.

Mr. PRINCE. But there is only one person involved in this. Personally I have no unkindly feeling toward the gentleman. If he just was in the field with the troops, I would be delighted to be for him, but we must draw the line somewhere and follow the law that we have passed.

Mr. HAY. It is conceded that the amendment offered by the gentleman from Illinois [Mr. PRINCE] can apply to only this one man. Now, let us see what sort of a man this is—whether the service referred to by the gentleman from Illinois is the only service which this man has performed. He is a medal-of-honor man, and a medal of honor is much harder to obtain than the Victoria Cross of England or the Iron Cross of Germany. In an army of 66,000 men there are only 64 men to-day who hold a medal of honor, and this man, after his graduation at West Point, served for twenty-three years west of the Missouri River without a single billet to the eastward of that stream. He obtained that medal of honor by courage, self-sacrifice, and devotion in action, the only way that he could ever obtain it. He is not a carpet knight for whom this is asked, and he is a man who by service in the Army is entitled to receive it if the construction placed upon this amendment is that placed upon it by the gentleman from Illinois. He is the only man that can be, as he says, affected by it. No other man in the Army can be, and he would single out this man of distinguished service, of high merit, who holds a medal of honor—single him out and stigmatize him.

Mr. TOWNE. Will the gentleman yield?

Mr. HAY. Yes.

Mr. TOWNE. I want to ask the gentleman from Virginia if he has carefully examined the language in which the gentleman from Illinois proposes to amend this bill?

Mr. HAY. I have.

Mr. TOWNE. Are you not of the opinion that the language already excludes General Hall?

Mr. HAY. I am; but the gentleman from Illinois holds a different opinion, and offers this amendment in order to clear up what he thinks is uncertain, but which I believe is certain, and which I am told has been so construed by almost every lawyer who has examined it.

Mr. TOWNE. Why does not the gentleman offer an amendment which will include this brave soldier beyond peradventure?

Mr. HAY. I would be delighted to do it, but I have thought that the friends of this gentleman—of this brave soldier—were satisfied with the language of this amendment, and therefore it was not necessary for me to offer that amendment, if they chose themselves to take their chances in this way.

Mr. PRINCE. If the contention of the gentleman is correct, the language does not include him.

Mr. HAY. This amendment is for the purpose of promoting the men who have had a civil-war service, and that, you say, is a service that ought to give them this advancement—it ought to promote them.

Mr. PRINCE. We both agree as to the other men.

Mr. HAY. Then, why jeopardize all the other men in order to strike against this one man, against whom your amendment is aimed?

Mr. PRINCE. Let me say that this amendment was not presented by me nor by any Member of the House. This amendment that we are now discussing was presented by Senator BURROWS in the Senate. The House has never had anything to do with it. If the gentleman wants to criticise anybody, let him criticise those over yonder.

Mr. HAY. The gentleman from Illinois says that he is in favor of the Senate amendment; that he is in favor of giving to these other four men this promotion which this bill gives them, and by offering the amendment which he offers here he jeopardizes the promotion of these four men and does not, in my judgment, accomplish what he desires. I trust that the amendment of the gentleman from Illinois will be voted down and that the House will concur in the amendment of the Senate, which does justice to all of these gallant and brave soldiers. [Applause.]

Mr. HULL. Mr. Speaker, it is ungracious to refuse to yield time to gentlemen, but I will state that after five minutes has been occupied on this side and five on the other side I will move the previous question. I now yield five minutes to the gentleman from Ohio [Mr. KEIFER].

Mr. KEIFER. Mr. Speaker, five minutes' time is all I require. My point is that the proposed amendment of the gentleman from Illinois would leave the proviso in the bill so confused and so doubtful that we are liable to exclude the very persons whom the gentleman from Illinois would be willing to include.

Mr. PRINCE. Will the gentleman yield?

Mr. KEIFER. I have only five minutes, and they are very short.

Mr. PRINCE. The officers that the gentleman from Ohio and the House want were not a single one of them a cadet at West Point.

Mr. KEIFER. That is exactly my trouble with the amendment. What is meant by "a cadet at West Point?" I can't say. There is the Surgeon-General in the Army, who was a cadet, but whether you would call him a cadet at West Point may depend on some construction. The amendment looks like it is an amendment of exclusion, and that anybody that served at any time for any portion of the period during the war at West Point would be excluded from the operations of the provisions of this bill if it becomes a law, and that is the reason I am opposed especially to the amendment.

We would not do any great harm if we let in General Hall, for he has a brilliant record in the Army from the beginning of his service to the present time, but I am not certain that he will be excluded under the language of the proviso, with or without the amendment proposed by the gentleman from Illinois.

The language of the proviso is this:

> That officers who served creditably in the regular or volunteer forces during the civil war prior to April 9, 1865, and who now hold the rank of brigadier-general on the active list of the Army, having previously held that rank for three years or more, shall when retired from active service have the rank and retired pay of major-general.

Now, if the language "having previously held that rank for three years or more" relates to the present time and not from the time he might be retired, General Hall would not be entitled to be retired under this proviso, and all around I think Members will agree upon that. I am satisfied, however, with the proviso without amendment. I am satisfied it will recognize some of the best officers of the Army, who not only performed their duty,

some of them beginning as private soldiers in the Army, some connected with the Medical Department, as acting medical cadets, some with the Hospital Department, and all along the line, who up to the present day have fulfilled their highest duty as great soldiers or officers in this country, and I therefore hope that the House will vote down the amendment of the gentleman from Illinois and concur in this Senate amendment. [Applause.]

Mr. HULL. Mr. Speaker, I yield two minutes to the gentleman from Kentucky [Mr. JAMES].

Mr. JAMES. Mr. Speaker, I believe a man who has given forty years of the best part of his life to the service of his country is entitled to more consideration than to be assailed in the open House of Representatives by the gentleman from Illinois and when no opportunity or chance of reply is afforded this soldier. I believe a party, the one to which the gentleman from Illinois belongs, that gives ungrudgingly its millions to build up the Navy, which it hopes to be the pride of the world; that gives of its treasure for the purpose of making its Army the glory of the country, ought to deal at least fairly with the men who consecrate their lives to the defense of their country. [Applause.] The gentleman by this amendment would cut out this soldier. He would shut the door of hope and advancement in the face of this gallant soldier, one who is as patriotic and as brave as any who ever led a charge in the name of his country, and not content with making his assault upon him here, he goes back and assails him about some other legislation. But it is sufficient answer to that to say that the gentleman ought to have made his objection then, because I presume he was in Congress. If he did not make his objection at that time he ought to assault the Congress or the President rather than to assault the soldier. But here he would deny this man this preferment, while at the same time he fails to state to the House that this man upon the frontier for twenty years stood fighting the battles of his country, and when in battle with the Indians one of his men was shot he stood in the forefront and drew the fire of the enemy and stood there battling alone until the men under his command took that wounded soldier to the rear, and for this act of courage he was awarded a medal of honor. [Applause.] If there is one man in the service of the United States Army who deserves to be promoted, General Hall is the one, rather than to be denied that promotion. I say that it is the duty of this Congress to hold out some hope, some chance, some opportunity for promotion in time of peace to the soldiers who stand ready to draw the sword in time of war. I say the soldier who stands as our outpost and defense in time of peace is entitled to as much praise, as much preferment, as the soldier who does service in the field.

I hope this House will vote down the amendment of the gentleman from Illinois and vote to concur in the Senate amendment and give to this brave soldier this promotion he so richly deserves. [Applause.]

Mr. HULL. I yield one minute to the gentleman from Texas [Mr. SLAYDEN].

Mr. SLAYDEN. Mr. Speaker, I do not think the language under debate can possibly admit of any two constructions. The provision is:

That officers who served creditably in the regular or volunteer forces in the civil war prior to April 9, 1865, and who now hold the rank of brigadier-general on the active list of the Army, having previously held it for three years or more, etc.

"Previously" unquestionably refers to now.

Mr. PRINCE. Will the gentleman yield?

Mr. SLAYDEN. Yes.

Mr. PRINCE. General Hall served in the Army prior to that time?

Mr. SLAYDEN. According to this bill; yes.

Mr. PRINCE. He is now a brigadier-general?

Mr. SLAYDEN. Yes.

Mr. PRINCE. If he serves as brigadier-general for three years before retirement does he not comply with all the requirements in the law?

Mr. SLAYDEN. I think not, but I can not answer the gentleman's question; but had it been intended to provide for the future the provision would have used the future tense of the verb.

Mr. GROSVENOR. Mr. Speaker, whether or not this legislation would be wise and proper if it had come here in a proper manner I will not discuss, but when a bill or an amendment to a bill is brought into the House of Representatives with the direct purpose of striking a blow at a man who for forty years has followed the flag of my country, and who carries with him the attestation of a medal of honor, I will not discuss the merits of the proposition only to say that it is small, petty, and contemptible legislation. [Applause.] And I hope the matter may be so approved by the House of Representatives. [Cries of "Vote!"]

Mr. HULL. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the amendment proposed by the gentleman from Illinois [Mr. PRINCE].

The question was taken; and the amendment was rejected.

The SPEAKER. The question is on the motion of the gentleman from Virginia [Mr. HAY] to concur in the Senate amendment.

The question was taken; and the Senate amendment was agreed to.

Mr. PRINCE. Mr. Speaker, upon that vote I call for the yeas and nays. I want the gentlemen to go on record.

The SPEAKER. The gentleman from Illinois demands the yeas and nays. All who are in favor of demanding the yeas and nays will rise and stand until counted. [After counting.] Nine gentlemen have arisen, not a sufficient number, and the yeas and nays are refused. So the motion to concur is agreed to.

On motion of Mr. HAY, a motion to reconsider the vote by which the Senate amendment was agreed to was laid upon the table.

The SPEAKER. The Clerk will report the next amendment.

The Clerk read as follows:

On page 14, line 16, after the word "cents," insert:

"*Provided*, That hereafter any paymaster's clerk of the Army who shall have had in all thirty-five years' faithful service in the Army may be nominated by the President and, by and with the advice and consent of the Senate, be appointed a first lieutenant, mounted, United States Army, and placed on the retired list thereof as of that rank."

Mr. HULL. Mr. Speaker, I move that the House insist on its disagreement to the amendment, No. 25, just read.

The SPEAKER. The gentleman from Iowa [Mr. HULL] moves that the House insist on its disagreement to amendment No. 25.

The question was taken; and the motion was agreed to.

Mr. HULL. Mr. Speaker, I move that the House agree to the request of the Senate for a conference and that the Speaker announce the conferees.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The SPEAKER announced the following conferees: Mr. HULL, Mr. PARKER, and Mr. HAY.

## APPEALS IN CRIMINAL PROSECUTIONS.

Mr. JENKINS. Mr. Speaker, I desire to call up the conference report on the bill (H. R. 15434) to regulate appeals in criminal prosecutions, and I would ask that the report be read.

The SPEAKER. Without objection, the Clerk will read.

There was no objection.

The conference report and statement are as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 15434) to regulate appeals in criminal prosecutions, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with the following amendment: In lieu of the said amendment insert the following:

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That a writ of error may be taken by and on behalf of the United States from the district or circuit courts direct to the Supreme Court of the United States in all criminal cases, in the following instances, to wit:

"From a decision or judgment quashing, setting aside, or sustaining a demurrer to any indictment, or any count thereof, where such decision or judgment is based upon the invalidity or construction of the statute upon which the indictment is founded.

"From a decision arresting a judgment of conviction for insufficiency of the indictment, where such decision is based upon the invalidity or construction of the statute upon which the indictment is founded.

"From the decision or judgment sustaining a special plea in bar, when the defendant has not been put in jeopardy.

"The writ of error in all such cases shall be taken within thirty days after the decision or judgment has been rendered and shall be diligently prosecuted and shall have precedence over all other cases.

"Pending the prosecution and determination of the writ of error in the foregoing instances, the defendant shall be admitted to bail on his own recognizance: *Provided*, That no writ of error shall be taken by or allowed the United States in any case where there has been a verdict in favor of the defendant."

Amend the title so as to read: "An act providing for writs of error in certain instances in criminal cases."

And the Senate agree to the same.

JOHN J. JENKINS,
B. P. BIRDSALL,
D. A. DE ARMOND,
*Managers on the part of the House.*

KNUTE NELSON,
P. C. KNOX,
A. O. BACON,
*Managers on the part of the Senate.*

STATEMENT.

The House bill is as follows:

"A bill (H. R. 15434) to regulate appeals in criminal prosecutions.

"*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That in all criminal prosecutions the United States shall have the same right of review by writ of error that is given to the defendant, including the right to a bill of exceptions: *Provided*, That if on such writ of error it shall be found that there was error in the rulings of the court during the trial, a verdict in favor of the defendant shall not be set aside.

"SEC. 2. That this act shall take effect and be in force from and after its passage and shall apply to all cases pending."

The Senate struck out all after the enacting clause and inserted in lieu thereof the following:

"That a writ of error may be taken by and on behalf of the United States from the district or circuit courts to the Supreme Court or the circuit courts of appeals, as prescribed in an act entitled 'An act to establish circuit courts of appeals and to define and regulate in certain cases the jurisdiction of the courts of the United States, and for other purposes,' approved March 3, 1891, and the acts amendatory thereof, in all criminal cases, in the following instances, to wit:

"From a decision or judgment quashing, setting aside, or sustaining a demurrer to any indictment, or any count thereof, where the ground for such motion or demurrer is the invalidity or construction of the statute upon which the indictment is founded.

"From a decision arresting a judgment of conviction for insufficiency of the indictment, where the ground of insufficiency thereof is the invalidity or construction of the statute upon which the same is founded.

"From the decision or judgment sustaining a special plea in bar, when the defendant has not been put in jeopardy.

"Appeals or writs of error in all such cases shall be taken within thirty days, shall be diligently prosecuted, and shall have precedence over all other appealed cases.

"Pending an appeal or writ of error by the United States the defendant shall be admitted to bail on his own recognizance: *Provided*, That if upon appeal or writ of error it shall be found that there was error in the rulings of the court during the trial, a verdict in favor of the defendant shall not be set aside.

The Senate receded from its amendment to the extent of agreeing to substitute the following in lieu of the Senate amendment:

"That a writ of error may be taken by and on behalf of the United States from the district or circuit courts direct to the Supreme Court of the United States in all criminal cases in the following instances, to wit:

"From a decision or judgment quashing, setting aside, or sustaining a demurrer to any indictment, or any count thereof, where such decision or judgment is based upon the invalidity or construction of the statute upon which the indictment is founded.

"From a decision arresting a judgment of conviction for insufficiency of the indictment, where such decision is based upon the invalidity or construction of the statute upon which the indictment is founded.

"From the decision or judgment sustaining a special plea in bar, when the defendant has not been put in jeopardy.

"The writ of error in all such cases shall be taken within thirty days after the decision or judgment has been rendered, and shall be diligently prosecuted, and shall have precedence over all other cases.

"Pending the prosecution and determination of the writ of error in the foregoing instances, the defendant shall be admitted to bail on his own recognizance: *Provided*, That no writ of error shall be taken by or allowed the United States in any case where there has been a verdict in favor of the defendant."

Amend the title so as to read: "An act providing for writs of error in certain instances in criminal cases."

The changes in the amendment of the Senate made by the conferees are as follows:

In line 2, after the word "courts," insert the word "direct."

In line 3, after the words "preme court," insert the words "of the United States;" and, after such insertion, strike out all of the remainder of lines 3, 4, 5, 6, 7, and that part of line 8 down to and including the word "thereof."

In line 12 strike out, after the word "where," the following words: "the ground for such motion or demurrer" and insert in lieu thereof the words "such decision or judgment is based upon."

In line 16, after the word "where," strike out the following words: "the ground of insufficiency" and insert in lieu thereof the words "such decision is based."

In line 17 strike out the words "thereof is" and insert in lieu thereof the word "upon."

In line 18 strike out the word "same" and insert in lieu thereof the word "indictment."

In line 21 strike out the words "appeals or" and insert in lieu thereof the word "the;" and in line 21 take off the letter "s" from the word "writs."

In line 22, after the word "days," insert the words "after the decision or judgment has been rendered and."

In line 23 strike out the word "appealed."

In line 24, after the word "pending," strike out the words "and appeal or" and insert in lieu thereof the words "the prosecution and determination of the."

And in line 24, after the word "error," strike out the words "by the United States" and insert in lieu thereof "in the foregoing instances."

In line 26, after the words "*Provided*, That," strike out all of the balance of line 26, commencing with the word "if," and all of lines 27, 28, and 29, and insert in lieu thereof the following: "no writ of error shall be taken by or allowed the United States in any case where there has been a verdict in favor of the defendant."

Amend the title so as to read: "An act providing for writs of error in certain instances in criminal cases."

JOHN J. JENKINS,
B. P. BIRDSALL,
D. A. DE ARMOND,
*Managers on the part of the House.*

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and the conference report was agreed to.

On motion of Mr. JENKINS, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

MESSAGE FROM THE SENATE.

A further message from the Senate, by Mr. PARKINSON, one of its clerks, announced that the Senate insists upon its amendments to the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes, agrees to the conferences asked by the House, and had appointed Mr. HALE, Mr. ALLISON, and Mr. BERRY as conferees on the part of the Senate.

The message also announced that the Senate had agreed to the report of the committee of conference on the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The message also announced that the Senate had passed the following concurrent resolution, in which the concurrence of the House was requested.

IN THE SENATE OF THE UNITED STATES,
*February 27, 1907.*

*Resolved by the Senate (the House of Representatives concurring)*, That the Clerk of the House of Representatives be instructed in the enrollment of the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, to strike out the word "connecting," on page 105, line 1, and to insert in lieu thereof the word "Swan," to correct what is evidently a clerical error in the preparation or printing of the bill.

The message also announced that the Senate had passed without amendments bills of the House of the following titles:

A bill (H. R. 7153) for the relief of David McClelland for loss sustained at Chickamauga Park, Ga., January 29, 1904; and

A bill (H. R. 8080) for the relief of S. Kate Fisher.

MESSAGES FROM THE PRESIDENT.

Several messages in writing from the President of the United States were communicated by Mr. LATTA, one of his secretaries.

NAVAL APPROPRIATION BILL.

Mr. FOSS. Mr. Speaker, I desire to call up conference report on the naval appropriation bill, and ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. Is there objection?

There was no objection.

NAVAL APPROPRIATION BILL.

The conference report and statement are as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24925) making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 27.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 4, 5, 6, 7, 9, 10, 11, 12, 13, 14, 15, 17, 19, 20, 21, 22, 23, 24, 25, 26, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, and 48, and agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: On page 10 of the bill, in lines 20 and 21, change the subtotal so as to read "fourteen thousand six hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "four million one hundred and fifty thousand dollars;" and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment as follows: In line 2 of said amendment, after the word "wall" insert "on Government property;" and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment as follows: In lines 4 and 5 of said amendment strike out the words: "from its present location to the hill in the rear of building numbered sixty-five;" and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In line 6 of said amendment strike out the word "one" and insert in lieu thereof the word "two;" and the Senate agree to the same.

Amendment numbered 49: That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment as follows: In line 3 of said amendment, after the word "equal," insert: "in the judgment of the Secretary of the Navy;" and the Senate agree to the same.

Amendment numbered 50: That the House recede from its disagreement to the amendment of the Senate numbered 50, and agree to the same with an amendment as follows: In lieu of said amendment insert the word "ten;" and the Senate agree to the same.

Amendment numbered 51: That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In lieu of said amendment insert the word "twenty-three;" and the Senate agree to the same.

On amendment numbered 1 the committee of conference have been unable to agree.

GEORGE EDMUND FOSS,
H. C. LOUDENSLAGER,
ADOLPH MEYER,
*Managers on the part of the House.*

EUGENE HALE,
GEO. C. PERKINS,
B. R. TILLMAN,
*Managers on the part of the Senate.*

The statement was read as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24925) making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes, submit the following written statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report on each of the amendments of the Senate, viz:

On amendment No. 2: Provides for two copyists at the Naval War College, Rhode Island, at $900 each per year, as proposed by the Senate.

On amendment No. 3: Provides for a change of totals.

On amendment No. 4: Appropriates $4,000,000 for a reserve supply of ammunition, instead of $2,000,000 as proposed by the Senate.

On amendments Nos. 5 and 6: Provides for one clerk at $1,200 in lieu of one writer at $1,000 under the civil establishment, Bureau of Ordnance, navy-yard, Boston, Mass., as proposed by the Senate.

On amendment No. 7: Provides for a change of totals under civil establishment, Bureau of Ordnance.

On amendment No. 8: Appropriates $4,150,000 for coal and transportation, instead of $3,750,000.

On amendment No. 9: Strikes out the appropriation of $15,000 for coaling plant at the navy-yard, Portsmouth, N. H., as proposed by the Senate.

On amendment No. 10: Appropriates for the following improvements at the navy-yard, Portsmouth, N. H., pattern shop for steam engineering, to complete, $61,200; track for 40-ton crane extension, $10,000, the limit of cost to be $46,800, as proposed by the Senate.

On amendment No. 11: Provides for a change of totals under navy-yard, Portsmouth, N. H., as proposed by the Senate.

On amendment No. 12: Appropriates for the following improvements at the navy-yard, New York, N. Y., railroad equipment, additional, $5,000; railroad system extension, $10,000; sewers and drains, $10,000; cement storehouse, $11,000, as proposed by the Senate.

On amendment No. 13: Provides for a change of totals under navy-yard, New York, N. Y., as proposed by the Senate.

On amendment No. 14: Appropriates $130,000 for a central power plant at the navy-yard, Norfolk, Va., as proposed by the Senate.

On amendment No. 15: Provides for change of totals under navy-yard, Norfolk, Va., as proposed by the Senate.

On amendment No. 16: Provides for an appropriation of $2,500 for sidewalks along outside station wall on Government property at the naval station, Key West, Fla.

On amendment No. 17: Provides for the change of totals under naval station, Key West, Fla., as proposed by the Senate.

On amendment No. 18: Provides for a central light and power plant at navy-yard, Mare Island, Cal., to cost $100,000, and for the removal of office building No. 103, $1,000, as proposed by the Senate.

On amendment No. 19: Provides for change of totals under navy-yard, Mare Island, Cal., as proposed by the Senate.

On amendments Nos. 20 and 21: Appropriates $200,000 to enable the Secretary of the Navy to repair and reconstruct where necessary the buildings, wharves, and other public works recently damaged by the hurricane at the navy-yard, Pensacola, Fla., and changes totals accordingly, as proposed by the Senate.

On amendment No. 22: Provides for change of total under public works, navy-yards and stations, as proposed by the Senate.

On amendment No. 23: Strike out the word "repair" and insert the word "construction," as proposed by the Senate, so as to read, "naval hospital, Puget Sound, Washington, for the construction of naval hospital buildings, $75,000 (total cost not to exceed $150,000)," as proposed by the Senate.

On amendment No. 24: Appropriates $60,000 for the erection of an addition symmetrical with the northeast pavilion, solarium, and connecting corridor to the naval hospital, Washington, D. C., as proposed by the Senate.

On amendment No. 25: Provides for a change of totals under public works, Bureau of Medicine and Surgery, as proposed by the Senate.

On amendment No. 26: Provides for change of totals, as proposed by the Senate.

On amendment No. 28: Provides that the Secretary of the Navy shall hereafter report to Congress at the commencement of each regular session the number of vessels and their names upon which any repairs or changes are proposed which in any case shall amount to more than $200,000, the extent of such proposed repairs or changes, and the amounts estimated to be needed for the same in each vessel; and expenditures for such repairs or changes so limited shall be made only after appropriations in detail are provided for by Congress, as proposed by the Senate.

On amendments Nos. 29 and 30: Changes the words "naval station" to "navy-yard," so as to read, "navy-yard, Charleston, South Carolina," as proposed by the Senate.

On amendments Nos. 31, 32, and 33: Provides at the Naval Academy for one bandmaster, at $1,200; 21 first-class musicians, at $420 each, and 7 second-class musicians, at $360 each, and changes totals accordingly, as proposed by the Senate.

On amendments Nos. 34 and 35: Provides for seven brigadier-generals and two colonels instead of six brigadier-generals and three colonels, under Marine Corps, as proposed by the Senate.

On amendment No. 36: Strikes out the word "the" and inserts the word "each," under pay of civil force, Marine Corps; so as to read: "in the office of each assistant paymaster, one clerk, at $1,400," as proposed by the Senate.

On amendments Nos. 37 and 38: Changes totals, as proposed by the Senate.

On amendments Nos. 39, 40, and 41: Reduces appropriation for provisions, Marine Corps, from $613,503 to $548,503; and for clothing, Marine Corps, from $655,000 to $600,920; and increases military stores, Marine Corps, $782, as proposed by the Senate.

On amendments Nos. 42, 43, 44, 45, 46, and 47: Increases the appropriation for transportation and recruiting, Marine Corps, from $80,000 to $86,000; for repairs of barracks, Marine Corps, from $70,000 to $78,836; and for hire of quarters, from $40,000 to $51,548; and for contingent, Marine Corps, from $260,000 to $280,800, and changes the totals accordingly, as proposed by the Senate.

On amendment No. 48: Inserts the words "subsurface or" after the word "for;" so as to read: "to contract for subsurface or submarine boats," as proposed by the Senate.

On amendment No. 49: Inserts the following language after the word "expended:" "no part of this appropriation to be expended for any boat that does not in such test prove to be equal, in the judgment of the Secretary of the Navy, to the best boat now owned by the United States or under contract therefor; and no penalties under this limitation shall be imposed by reason of any delay in the delivery of said boat due to the submission or participation in the comparative trials aforesaid," as proposed by the Senate.

On amendments Nos. 50 and 51: Increases the appropriation for armor and armament from $9,000,000 to $10,000,000, and changes totals accordingly, as proposed by the Senate.

The committee of conference have been unable to agree on the following amendment:

On amendment No. 1: Which appropriates $50,000 for the naval training station, Port Royal, S. C., as follows:

"Maintenance of naval training station, Port Royal, S. C., namely: Manuel labor and material; general care, repairs, and improvements of grounds, buildings, and wharves; wagons, carts, implements, and tools, and repairs to same; gymnastic implements; models and other articles needed in instruction of apprentice seamen; stationery, books, periodicals, and other contingent expenses; necessary repairs to the buildings now erected to fit them for berthing, messing, and drilling purposes, and for galleys, latrines, and washhouses; for purposes of administration in connection with the training of apprentice seamen.

GEORGE EDMUND FOSS,
H. C. LOUDENSLAGER,
ADOLPH MEYER,
*Managers on the part of the House.*

Mr. FOSS. Mr. Speaker, I wish to state for the information of the House that this conference settles all matters in disagreement between the two Houses except Senate amendment No. 1, which relates to the opening of Port Royal as a naval training station. Now, the naval appropriation bill as reported to the House carried $95,404,717. As it passed the House it carried $95,027,481.50. As reported to the Senate it carried $100,727,807.50; as it passed the Senate, $101,108,007.50. After the first conference, which is this conference, in this provision in Senate amendment No. 1 it carries $99,008,007.50. Now, Mr. Speaker, I move the previous question on the adoption of the report.

Mr. FITZGERALD. Will the gentleman yield for a question?

Mr. FOSS. Mr. Speaker, I will withdraw my motion for a moment.

Mr. FITZGERALD. What disposition was made of Senate amendment No. 28, requiring the Secretary of the Navy to report the number of vessels and names and character of changes to be made in the nature of repairs?

Mr. FOSS. That provision was left in, but it was increased to $200,000 instead of $100,000. The report as to repairs is over $200,000.

Mr. FITZGERALD. Were there any important legislative changes incorporated?

Mr. FOSS. There were comparatively few Senate amendments, and no important legislative changes. Now, Mr. Speaker, if there are no other questions——

Mr. PAYNE. Does the gentleman mean to say that the bill has come over here without any provision in it to retire somebody at a higher rank, or anything of that kind?

Mr. FOSS. Those matters were left out. They were not reported to the Senate.

Mr. PATTERSON of South Carolina. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. PATTERSON of South Carolina. I desire to move that the House recede and concur in Senate amendment No. 1.

Mr. FOSS. Mr. Speaker, that is not in order at this time. The question now is on agreeing to the conference report.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. FOSS. Now, Mr. Speaker, I call up the amendment in disagreement.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amendment No. 1:

"Naval training station, Port Royal, S. C.: Maintenance of naval training station, Port Royal, S. C., namely: Manual labor and material; general care, repairs, and improvements of grounds, buildings, and wharves; wagons, carts, implements, and tools, and repairs to same; gymnastic implements; models and other articles needed in instruction of apprentice seamen; stationery, books, periodicals, and other contingent expenses; necessary repairs to the buildings now erected to fit them for berthing, messing, and drilling purposes, and for galleys, latrines, and washhouses; for purposes of administration in connection with the training of apprentice seamen; in all, naval training station, Port Royal, S. C., $50,000."

Mr. FOSS. Mr. Speaker, I wish to state to the House that this is the only matter in disagreement. The question came up a year ago, and the gentleman from South Carolina made a motion to recede and concur in the Senate amendment, but the House, by a vote of nearly two to one, voted down that proposition, and it comes again before the House in the shape of a disagreement between the two Houses. I understand the gentleman desires to speak upon the proposition.

The SPEAKER. What is the gentleman's motion?

Mr. FOSS. My motion is that the House do further insist upon its disagreement to the Senate amendment.

The SPEAKER. The gentleman from Illinois moves that the House do further insist on its disagreement to the Senate amendment.

Mr. PATTERSON of South Carolina. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The SPEAKER. The gentleman from South Carolina moves that the House recede from its disagreement and concur in the Senate amendment.

Mr. FOSS. How much time does the gentleman desire?

Mr. PATTERSON of South Carolina. Twenty minutes.

Mr. FOSS. I yield to the gentleman twenty minutes.

Mr. PATTERSON of South Carolina. Mr. Speaker, as the gentleman from Illinois has stated, this is not the first time that this proposition has been before the House. I introduced a bill last session providing for an appropriation of $96,000 for Port Royal training station. This is the second time that the Senate has made this amendment to the naval appropriation bill. The Senate desires to take care of this property owned by the Government at Port Royal. It is a business proposition that is before the House now. At Port Royal the Government has property upon which it has expended more than $1,000,000. A considerable amount of that money was expended in building elegant houses, residences for officers, and large brick structures that were at one time filled with machinery used there in connection with the naval station.

Now, Mr. Speaker, these buildings are sought after by the Navy Department. The Navy Department has time and again requested that this small appropriation be made in order that this station may be utilized as a naval training station in connection with the naval training station at Newport, R. I. The appropriation asked for is much smaller than was asked for a year ago. Last year they asked for $96,000. This year they only ask for $50,000. This $50,000 will protect and care for this valuable property owned by the Government, which cost more than $1,000,000.

As it stands to-day, that property is abandoned and virtually thrown away. It is there to rot down. It is a valuable property. The Navy Department needs it. They are clamoring for it and begging this Congress for this small appropriation. I say to you, gentlemen of the House, that it is a business proposition and it is up to you, and you should exercise just as much judgment in dealing with this as you would dealing with your own personal property. Certainly no sane business man would

invest a million dollars in lands, houses, and buildings and then throw the investment away and allow the buildings to rot down and decay, when they could be utilized. In this case the property could be well utilized for the benefit of the Government. You are building more and more war ships every year. You want American seamen to man those war ships. You want trained men, so as to avoid the accidents that we have had in the past. Here is the opportunity to utilize these grounds at Port Royal, S. C., as a naval training station.

The conversion of this place into a naval training station is no new idea. In 1902 Secretary Long brought this matter forcibly to the attention of the Committee on Naval Affairs, and I quote from his letter addressed to Hon. William Elliott, as follows:

I have the honor to inform you that the total appraised value of the plant at Port Royal is $949,000. * * * The buildings and other public works at the yard are neither extensive nor valuable. Their appraised value at that time was $284,000, the remainder of the appraised value being $147,000 for tools, furniture, and floating property. This $284,000 represents forty-five buildings. All the larger ones are of brick laid with cement and having concrete foundations, and it is believed that the cost of taking them down, preparing the material for reuse, and removing it to another site would more than equal the value of the material.

The buildings and property at the Port Royal station can wisely be used in connection with the very important purpose of training recruits for the Navy; in fact, building No. 20, intended for sawmill and boat shop, has already been fitted to accommodate 360 landsmen for training; and the Department is only waiting appropriation of the money asked for to arrange for the accommodation of 1,000 men here.

The necessity of stations for this purpose has become very urgent, and this station is peculiarly well adapted for the purpose. * * *

As Port Royal has been pronounced to be a most suitable location for a training station by the board, of which Capt. J. J. Hunker, United States Navy, commandant of the training station at Newport, R. I., was senior member; as arrangements have already been made to locate 360 men under training here, and the Bureau of Navigation is desirous of extending by October next the facilities so that 1,000 can be accommodated; as the board on torpedo boat bases has recommended the establishment of a base here, and one has been so established, and as the Bureau of Equipment has a calling station in operation here, the Department deems it unwise to sell the property. The Department can not state what price would be realized from such sale, but believes it would be difficult to effect a sale.

Rear-Admiral H. C. Taylor, United States Navy, who is to relieve Rear-Admiral A. S. Crowninshield, United States Navy, as Chief of the Bureau of Navigation, has latterly visited Port Royal and earnestly recommends the establishment of a permanent training station there.

And again, in 1906, Secretary Bonaparte, in a letter addressed to Senator HALE, chairman of the Naval Affairs Committee of the Senate, recommended an appropriation of $96,000 for Port Royal training station. His letter is as follows:

NAVY DEPARTMENT,
*Washington, May 21, 1906.*

SIR: I have the honor to recommend the following amendment to the naval appropriation bill now pending in the Senate (H. R. 18750) in order that the Department may make such use of the Port Royal Naval Station for a winter training station as may be found desirable and necessary:

On page 8, after line 8 of the bill (Naval Training Station, Rhode Island), add:

"*Provided*, That the naval station at Port Royal, S. C., including all buildings and other property thereon and the employees attached thereto, be hereby transferred to and placed under the control of the Bureau of Navigation, Navy Department, as an adjunct to the Naval Training Station, Rhode Island, to be used for the instruction of recruits during the winter months and at such other times as may be deemed advisable; and for that purpose the following sums are appropriated: Necessary repairs to the buildings to fit them for berthing, messing, and drilling purposes, and for galleys, latrines, and washhouses for apprentice seamen, and for purposes of administration in connection with the training of the same, $51,000; installing necessary distilling plant for fresh-water supply, $20,000; maintenance of the station as a training station, $25,000; in all, $96,000."

This amendment is requested for the reason that the Department deems it necessary to have available some station for the training of recruits should an epidemic of disease render one of the present training stations inadequate. This condition has existed for the past two winters, causing the partial suspension of enlistments and the unnecessary deaths of several men, besides risking the lives of a large number of others who were exposed to fatal disease.

Respectfully,

CHARLES J. BONAPARTE,
*Secretary.*

Hon. EUGENE HALE,
*Chairman Committee on Naval Affairs,*
*United States Senate.*

Several naval boards have had this matter under consideration on several occasions, and their reports have always been most favorable to the establishment of a naval training station at Port Royal, and I invite your attention to the report of the board of naval officers, of which Capt. J. J. Hunker, United States Navy, was senior member. This is quite a voluminous report. This board of naval officers took this matter up and carefully considered it in every detail. I read from this report as follows:

The board is of unanimous opinion that the Port Royal station is the most suitable one for the purpose of training landsmen, owing to its mild and healthful climate; to the opportunities furnished by the commodious buildings for quarters, drill, and inspection rooms; to the quiet and spacious waters adjoining for boat drill, gunnery practice, and exercise afloat; to the extensive level grounds that can be made available for drill and parade; to its remoteness from large cities, with their accompanying distractions, and to its ready access by rail and water, and believes that if a sufficient quantity of fresh water could be furnished to allow a liberal supply for the purpose of cooking, washing, bathing, and scrubbing clothes, hammocks, etc., the site would fulfill every requirement.

Much could be said as to the health of this locality, which is unequalled. They have never had any sickness there at all and there is an adequate supply of pure artesian water.

I might go on multiplying and piling up evidence to show the necessity of this appropriation, but I deem this sufficient to convince the Members of this House that they ought to vote for this appropriation and give us a much-needed training station and protect and preserve this valuable Government property.

Mr. Speaker, I yield to the gentleman from South Carolina [Mr. FINLEY] five minutes.

Mr. FINLEY. I shall detain the House but a very few minutes. The principal complaint that has been made against the course of Congress in increasing the Navy is that battle ships are built faster than the Government is able properly to man them. It is true, as shown from the annual report of the Secretary of the Navy on pages 34 and 35, that desertions are on the increase. I stated here a year ago, and I repeat now, that the principal reason why there are so many desertions is that boys are enlisted, are placed directly on the battle ships, are taken out of their surroundings and homes, and go into entirely new surroundings where they are incapable of discharging the duties put upon them. I say to gentlemen on the other side of this House that this question of desertions is a most serious matter; that last year or the year ending June 30, 1906, there were 3,998 desertions from the Navy of the United States, a percentage of 9.04 out of a total enlistment of 44,222; so that there is something wrong with the Navy of the United States. We are building battle ships; we are building up a great Navy that is to-day in point of effectiveness the second in the world; and, gentlemen, the charge has been made, and it has been practically substantiated, that you will not provide men for these ships; you will not provide efficient seamen. This is all I care to say; this is all there is in the proposition. The Government has the property at Port Royal suitable for a naval training station. It will cost very little to establish a naval training station there, and to send recruits to this station for training and initial service for, say, six months of the year would give them a preparatory education and they would go from there to the battle ships, and with training of this character you would not have one-half of the desertions that you have to-day. I repeat that this is a proposition that Congress must consider and the method of dealing with it effectively. The following table, from the report of the Bureau of Navigation, shows the number of desertions from the Navy in detail:

*Desertions, by ships and stations.*

Mr. FOSS. Mr. Speaker, I would like to ask the gentleman from South Carolina if the other side is through with the discussion?

Mr. PATTERSON of South Carolina. Yes.

Mr. FOSS. Mr. Speaker, a number of years ago we closed up Port Royal station, which was a navy-yard, and we understood that we were going to Charleston and there build up a new navy-yard, because that place was better fitted for a navy-yard than Port Royal. This amendment carries $50,000 for the purpose of opening up this navy-yard at Port Royal.

Mr. FINLEY. I understood the gentleman to say that there was an agreement made to close the Port Royal station. Does the gentleman know with whom that agreement was made?

Mr. FOSS. That was the understanding at that time, that Port Royal was to be closed.

Mr. FINLEY. Is this a proposition to reopen or reestablish a naval station at Port Royal? There never was a navy-yard there.

Mr. FOSS. There was a navy-yard.

Mr. FINLEY. A naval station.

Mr. FOSS. This is not a proposition to open it up as a navy-yard, but as a naval training station.

Mr. FINLEY. That is right.

Mr. FOSS. This matter was thoroughly discussed in this House a year ago and the sentiment of the House was strongly against the proposition. The vote, as I recollect it, was two to one. I do not care to enter into a discussion at this time, but I desire to put into the RECORD in connection with my remarks a report which was made upon Port Royal by the Secretary of the Navy, Mr. Moody.

Mr. MANN. Will the gentleman from Illinois yield for a question?

Mr. FOSS. Yes.

Mr. MANN. When we had the naval bill under discussion, there was considerable said in reference to moving certain men from Port Royal to Charleston.

Mr. FOSS. That only related to the clerical force. All we have at Port Royal is a caretaker, about two men, I think.

Mr. MANN. And the navy-yard is established at Charleston?

Mr. FOSS. Yes.

Mr. MANN. This is a proposition to have two naval places in South Carolina?

Mr. FOSS. This is a proposition to open up Port Royal as a naval training station.

Mr. MANN. Both in the same State?

Mr. FOSS. Both in the same State, within 60 miles of each other.

Mr. MANN. Does not the gentleman from Illinois imagine that South Carolina would like to have a third naval station in that State?

Mr. FINLEY. I think I can answer that question. While I do not think it is necessary, if there was a necessity for it I suppose South Carolina is the best fitted for it.

Mr. MANN. I suppose the gentleman thinks that South Carolina is the best for everything connected with the Navy?

Mr. FINLEY. The gentleman is correct. [Laughter.]

Mr. MANN. I assume from the attention that the gentlemen of South Carolina have given this matter that if they get Port Royal they intend to absorb all the balance of the naval stations. [Laughter.]

Mr. FOSS. They will probably want to go right along with the Charleston station at the same time. Now, Mr. Speaker, I call for a vote.

The SPEAKER. The question is on the motion of the gentleman from South Carolina [Mr. PATTERSON] that the House recede from its disagreement to the Senate amendment and concur in the same.

The question was taken, and on a division (demanded by Mr. Foss) there were 40 ayes and 78 noes.

So the motion was lost.

Mr. FOSS. Now, Mr. Speaker, I renew my motion that the House further insist on its disagreement to the Senate amendment.

The question was taken, and the motion was agreed to.

### DISPOSITION OF CONDEMNED GUNS, ETC.

Mr. GROSVENOR. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 25401) to authorize the Secretary of War to make certain disposition of condemned guns and cannon balls, which I send to the desk and ask to have read.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of War be, and he is hereby, authorized, in his discretion, to give to the Monument Association, Athens, Ohio, four condemned brass or bronze guns, with suitable outfit of cannon balls, which may not be needed in the service. Such gift shall be made subject to rules and regulations covering the same in the War Department, and the Government shall be at no expense in connection with such loan or gift.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, read the third time, and passed.

On motion of Mr. GROSVENOR, a motion to reconsider the last vote was laid on the table.

[a] Receiving ship.

JAMESTOWN EXPOSITION.

The SPEAKER laid before the House the following communication, which was read:

JAMESTOWN EXPOSITION COMPANY (INCORPORATED),
*Norfolk, Va., February 25, 1907.*

*To the Speaker and Members of the House of Representatives,*
*Washington:*

The honor of the presence of the Speaker and the House of Representatives of the United States is requested at the formal opening of the Jamestown Tercentennial Exposition at Norfolk, Va., on April 26, 1907. The acceptance of this invitation and the attendance of the Speaker and the House of Representatives upon the ceremony of the formal opening will be most gratifying to the president and the directors of the exposition and to all through whose agency the tercentennial has been made worthy of the cause it represents.

H. ST. GEO. TUCKER, *President.*

Mr. MAYNARD. Mr. Speaker, I ask unanimous consent for the present consideration of the following concurrent resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

*Resolved by the House of Representatives (the Senate concurring),* That the invitation extended to the Congress of the United States by the Jamestown Tercentennial Exposition to attend the opening ceremonies of said exposition to be held April 26, 1907, is hereby accepted.

That the Speaker of the House of Representatives and the President of the Senate be, and are hereby, authorized and directed to appoint a committee, to consist of ten Senators and fifteen Representatives of the Fifty-ninth Congress, to attend the formal opening of the ceremonies referred to and to represent the Congress of the United States on that occasion.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on agreeing to the resolution.

The question was taken; and the resolution was agreed to.

FELIX G. MORRISON.

Mr. LOUDENSLAGER. Mr. Speaker, I ask unanimous consent for the present consideration of the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

*Resolved by the House of Representatives (the Senate concurring),* That the President be requested to return the bill H. R. 21606, entitled "An act granting an increase of pension to Felix G. Morrison."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and the question is on agreeing to the resolution.

The question was taken; and the resolution was agreed to.

RELIEF OF WHITE PERSONS WHO INTERMARRIED WITH CHEROKEE CITIZENS.

Mr. SHERMAN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8535) for the relief of certain white persons who intermarried with Cherokee citizens, which I send to the desk and ask to have read.

The Clerk read as follows:

*Be it enacted, etc.,* That for sixty days after the approval of this act white persons who intermarried with Cherokee citizens prior to December 16, 1895, and made permanent and valuable improvements on lands belonging to the Cherokee Nation prior to the decision of the Supreme Court of the United States in the case of Daniel Red Bird, the Cherokee Nation, and others, against The United States (203 U. S., p. 76), shall have the right to sell such improvements to citizens of the Cherokee Nation entitled to select allotments at a valuation to be approved by an official to be designated by the Secretary of the Interior for that purpose; and the vendor shall have a lien on the rents and profits of the land on which the improvements are located for the purchase money remaining unpaid and shall have the right to enforce such lien in any court of competent jurisdiction.

With the following amendment:

*Provided,* That where citizens of the Cherokee Nation entitled to allotments have heretofore applied for lands on which intermarried white persons own improvements, such citizens entitled to allotments shall have the prior right to purchase said improvements, as herein provided.

The SPEAKER. Is there objection?

Mr. FINLEY. Mr. Speaker, reserving the right to object, I would like to have some explanation of this bill.

Mr. SHERMAN. Mr. Speaker, the decision of the Supreme Court in the Daniel Red Bird case, rendered last fall, with reference to the rights of intermarried whites with Cherokee citizens, the gentleman will recall, settled the question that the intermarried whites had no right to allotments in the Indian Territory. These intermarried whites, many of them, had made improvements to the land. Those improvements are there. This bill gives the right to these intermarried whites to sell the improvements on the land, giving the preference to the persons who had the fee to the several allotments to purchase the same.

Mr. FINLEY. Is it a fact that a number of these intermarried whites had received allotments themselves?

Mr. SHERMAN. They had asked for allotments; yes, and there had been claims in which their right to such allotments was contested. The Supreme Court of the United States has held that they had no right to such allotments.

Mr. FINLEY. I am familiar with that decision.

Mr. MANN. Who owns the fee?

Mr. SHERMAN. The fee is in the Cherokee Nation, and the land is being allotted to Cherokee citizens. Certain intermarried white people claimed that they had a right to allotments.

Mr. MANN. I understand that; and this allows the owner of the fee to take the improvements by paying for them. Who owns the fee? How is that question settled?

Mr. SHERMAN. The Indian allottees.

Mr. MANN. The property has not been allotted yet, has it, to the Indian allottees?

Mr. SHERMAN. Well, when it is allotted, it permits the white people to sell the improvements, giving the allottee the prior right to purchase.

Mr. MANN. Is there a process by which that allotment will soon be made?

Mr. SHERMAN. Certainly. It is going on right now.

Mr. MANN. It may be going on, but will it soon be made?

Mr. SHERMAN. Certainly; it is being made right along.

Mr. HINSHAW. And there is nothing in this bill that confers the preferential right absolutely. They can sell to somebody else if they do not agree upon the terms?

Mr. SHERMAN. Certainly. They simply have a preferential right.

Mr. FINLEY. About what is the number of the intermarried whites, and about the value of the improvements they made on these lands?

Mr. SHERMAN. The value is very considerable, and the number goes into the thousands; my recollection is it is something over three thousand.

Mr. MANN. The gentleman has no information as to the value of the improvements altogether?

Mr. SHERMAN. I have not definite information here; it is very considerable.

Mr. MANN. Let me ask the gentleman further. Under the provisions of this bill is the gentleman quite sure there will be no claims made against the United States on account of these improvements?

Mr. SHERMAN. I am not very sure there will be no claims made against the Government of the United States. My experience is nothing can arise in reference to the Indians, but somebody somewhere—some claim agent, I was about to say, but I will not designate them by any title—but that somebody will arise somewhere and make some claim against the Government.

Mr. MANN. Take this case of a fairly just claim. Here is a piece of land upon which a white person has settled and made improvements. Under the law it is subsequently allotted——

Mr. SHERMAN. But it is land the United States never owned.

Mr. MANN. That is what I know. Subsequently it is allotted to him in fee. Therefore we say to him he can not have the land until he pays some money to somebody else.

Mr. SHERMAN. Oh, no; we do not say that at all. We simply give authority to the white person who owns improvements upon the property to sell those improvements.

Mr. MANN. Well, I know that, but we are making a lien upon the land——

Mr. SHERMAN. Let me say to the gentleman——

Mr. MANN. Then I would like to ask the gentleman to have the bill read. There is something in there about its being a lien upon the land, or if the gentleman will call attention to that.

Mr. SHERMAN. The Clerk will again report the bill.

Mr. MANN. The gentleman can call attention to that provision of the bill.

Mr. SHERMAN. It as as follows [reading]:

That for sixty days after the approval of this act white persons who intermarried with Cherokee citizens prior to December 16, 1895, and made permanent and valuable improvements on lands belonging to the Cherokee Nation prior to the decision of the Supreme Court of the United States in the case of Daniel Red Bird, the Cherokee Nation, and others, against The United States (203 U. S., p. 76), shall have the right to sell such improvements to citizens of the Cherokee Nation entitled to select allotments at a valuation to be approved by an official to be designated by the Secretary of the Interior for that purpose; and the vendor shall have a lien on the rents and profits of the land on which the improvements are located for the purchase money remaining unpaid, and shall have the right to enforce such lien in any court of competent jurisdiction.

Now, if he buys it, it is a lien on the property; if he does not buy it, it is not.

Mr. MANN. That is a right to sell for sixty days.

Mr. SHERMAN. Certainly.

Mr. MANN. The allotment is not to be made for sixty days—that is, after the allotment or after the passage of the act?

Mr. SHERMAN. After the approval of the act.

Mr. MANN. But the allotments are not yet made.

Mr. SHERMAN. The allotments are in process of making now.

The SPEAKER. The Clerk informs the Chair that he has not the Senate bill, and until the bill is found the gentleman will suspend.

Subsequently.

Mr. SHERMAN. The Senate bill is now at the Clerk's desk.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, I understand the gentleman from New York will offer an amendment, and with that amendment to the bill I have no objection.

The SPEAKER. The Chair hears no objection. The gentleman from New York will send his amendment to the Clerk's desk.

Mr. SHERMAN. After consultation with the gentleman from Illinois, I offer the following amendment, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 3, strike out the words "after the approval of this act" and insert in lieu thereof the following: "After allotment, but in no case in less than sixty days after the approval of this act."

The SPEAKER. Has this been reported from the committee?

Mr. SHERMAN. A similar House bill has been reported from the Committee on Indian Affairs.

The SPEAKER. Is the Senate bill with the committee?

Mr. SHERMAN. The Senate bill is with the committee.

The SPEAKER. Then the gentleman's motion is to discharge the committee from the further consideration of the bill and to consider the same. Is there objection? [After a pause.] The Chair hears none.

The amendment was agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. SHERMAN, a motion to reconsider the last vote was laid on the table.

A similar bill (H. R. 25737) was ordered to lie on the table.

CONFERENCE REPORT ON DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. GILLETT. Mr. Speaker, I call up the conference report of the District of Columbia appropriation bill, and I ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. The gentleman from Massachusetts calls up the conference report on the District of Columbia bill, and asks unanimous consent that the statement be read in lieu of the report. Is there objection? [After a pause.] The Chair hears none, and the Clerk will read the statement.

The conference report and statement are as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24103) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1908, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 7, 14, 15, 17, 18, 20, 21, 22, 29, 31, 37, 40, 44, 46, 47, 52, 53, 54, 55, 56, 58, 59, 66, 68, 70, 71, 72, 73, 75, 79, 80, 90, 91, 92, 95, 96, 97, 99, 105, 106, 109, 110, 111, 112, 113, 114, 115, 116, 121, 138, 143, 145, 146, 147, 155, 163, 173, 174, 175, 181, 182, 183, 185, 186, 188, 194, 195, 201, 202, 203, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 223, 231, 234, 236, and 237.

That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 5, 8, 9, 11, 12, 13, 23, 25, 27, 30, 32, 33, 38, 39, 41, 42, 43, 45, 48, 49, 50, 51, 57, 62, 64, 65, 69, 74, 78, 81, 82, 83, 85, 87, 88, 100, 101, 102, 103, 104, 107, 108, 117, 118, 119, 120, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 137, 139, 141, 142, 148, 150, 151, 152, 153, 154, 156, 158, 159, 160, 161, 162, 164, 165, 169, 170, 171, 172, 176, 178, 179, 180, 187, 189, 192, 197, 199, 200, 206, 222, 224, 226, 228, 229, 230, 232, 233, 235, 238, 240, and 241.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one hundred and four thousand five hundred and nineteen dollars;" and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "twenty-one thousand three hundred dollars;" and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one thousand four hundred dollars;" and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one hundred and eighty-two thousand eight hundred and eighty-two dollars;" and the Senate agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "nine thousand four hundred dollars;" and the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "nine hundred dollars;" and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "thirty-four thousand nine hundred and forty dollars;" and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "sixty-six thousand nine hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "*Provided*, That hereafter no street or avenue in the District of Columbia shall be paved less in width than the width now provided by law except by express authority of Congress upon estimates to be submitted to Congress by the Commissioners of the District of Columbia;" and the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "three thousand dollars;" and the Senate agree to the same.

Amendment numbered 60: That the House receded from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one hundred and forty-seven thousand four hundred dollars;" and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: Strike out all after the word "advisable," in line 5 of said amendment, and insert in lieu of the matter so stricken out the following: "*Provided*, That all appropriations under this paragraph shall be immediately available;" and the Senate agree to the same.

Amendment numbered 63: That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one hundred and ten thousand dollars;" and the Senate agree to the same.

Amendment numbered 67: That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "four thousand dollars;" and the Senate agree to the same.

Amendment numbered 76: That the House recede from its disagreement to the amendment of the Senate numbered 76, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "seven thousand dollars;" and the Senate agree to the same.

Amendment numbered 77: That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "twenty-one thousand dollars;" and the Senate agreed to the same.

Amendment numbered 84: That the House recede from its disagreement to the amendment of the Senate numbered 84, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "twenty-one thousand dollars;" and the Senate agree to the same.

Amendment numbered 86: That the House recede from its disagreement to the amendment of the Senate numbered 86, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: " : *Pro-*

*vided*, That any association or corporation engaged in the manufacture and sale of gas for illuminating and fuel purposes in the District of Columbia, through its president or other duly authorized officer, shall make a sworn statement to Congress annually, on or before the first day of February in each year. Said report shall contain a detailed statement of the condition of the business of said association or corporation for the year ending December thirty-first next preceding, and such statement shall set forth the actual cost and also present value of the property of such association or corporation used in the conduct of its business, the amount of paid-up capital stock, the amount and character of the indebtedness of such association or corporation, the amount and cost of materials used in making gas, the amount of gas manufactured, the amount of gas sold, the average price per thousand cubic feet received for gas sold, the revnue from the sale of all by-products, the revenues from all other sources, the extensions and improvements made in the plant and works, the actual cost of the same, the amount expended for labor, the amount set aside for depreciation, the amount set apart for insurance and renewals, the amount paid out of earnings for betterments, the amount paid for betterments from other sources, the amount set aside and paid in interest and dividends, the surplus after paying the operating expenses and fixed charges, the statement of the operating expenses to be itemized and classified as is done by other public utility corporations in the District of Columbia, the names of the stockholders and the amount of stock held in such association or corporation by each of them on December thirty-first next preceding the date of such report.

"Any such association or corporation, not later than the fourth day of December in the year nineteen hundred and seven shall make to Congress a sworn report in accordance with the requirements of this provision and showing the condition of its business as near as its present method of bookkeeeping will permit for the year ending December thirty-first, nineteen hundred and six."

And the Senate agree to the same.

Amendment numbered 89: That the House recede from its disagreement to the amendment of the Senate numbered 89, and agree to the same with amendments as follows: After the word "balances," in line 2 of said amendment, insert the following: "not to exceed in all ten thousand dollars;" and at the end of said amendment insert the following: "*: Provided*, That any company, association, or corporation engaged in the manufacture and sale of electricity for illuminating or heating or power purposes, or either, in the District of Columbia, through its president or other duly authorized officer, shall make a sworn statement to Congress annually, on or before the first day of February in each year. Said report shall contain a detailed statement of the condition of the business of said company, association, or corporation for the year ending December thirty-first next preceding, and such statement shall set forth the actual cost and also present value of the property of such company, association, or corporation used in the conduct of its business, the amount of paid-up capital stock, the amount and character of the indebtedness of such company, association, or corporation, the amount and cost of materials used in making electricity, the quantity of electricity manufactured, the quantity of electricity sold, the amount received per annum for each public arc light, the amount received per kilowatt for each public incandescent light, the average price received per annum for each arc light furnished to others than the public, the varying discounts allowed to consumers using arc lights during a part of or the entire night, the average price charged per kilowatt for incandescent lights furnished to others than the public, with the varying discounts, and the price charged per kilowatt hour for power or heat furnished, and the gross revenues from each source, the revenues from all other sources, the extensions and improvements made in the plant and works, the actual cost of the same, the amount expended for labor, the amount set aside for depreciation, the amount set aside for insurance and renewals, the amount paid out of earnings for betterments, the amount paid for betterments from other sources, the amount set aside and paid in interest and dividends, the surplus after paying the operating expenses and fixed charges, the statement of the operating expenses to be itemized and classified as is done by other public utility corporations in the District of Columbia, the names of the stockholders and the amount of stock held in such company, association, or corporation by each of them on December thirty-first next preceding the date of such report. And any such company, association, or corporation, not later than the fourth day of December in the year nineteen hundred and seven, shall make to Congress a sworn report in accordance with the requirements of this provision and showing the condition of its business, as near as its present method of bookkeeping will permit, for the year ending December thirty-first, nineteen hundred and six;" and the Senate agree to the same.

Amendment numbered 93: That the House recede from its disagreement to the amendment of the Senate numbered 93, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "eight hundred and forty dollars;" and the Senate agree to the same.

Amendment numbered 94: That the House recede from its disagreement to the amendment of the Senate numbered 94, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "fifty-three thousand seven hundred dollars;" and the Senate agree to the same.

Amendment numbered 98: That the House recede from its disagreement to the amendment of the Senate numbered 98, and agree to the same with an amendment as follows: Omit the matter inserted by said amendment and in line 21, on page 47, of the bill strike out the word "four" and insert in lieu thereof the word "five;" and the Senate agree to the same.

Amendment numbered 135: That the House recede from its disagreement to the amendment of the Senate numbered 135, and agree to the same with an amendment as follows: In lieu of the number proposed insert "one hundred and ten;" and the Senate agree to the same.

Amendment numbered 136: That the House recede from its disagreement to the amendment of the Senate numbered 136, and agree to the same with an amendment as follows: In lieu of the number proposed insert "one hundred and twenty-seven;" and the Senate agree to the same.

Amendment numbered 140: That the House recede from its disagreement to the amendment of the Senate numbered 140, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "nine hundred and twelve thousand five hundred and forty-five dollars and sixty-three cents;" and the Senate agree to the same.

Amendment numbered 144: That the House recede from its disagreement to the amendment of the Senate numbered 144, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "forty-seven thousand seven hundred and fifty-five dollars;" and the Senate agree to the same.

Amendment numbered 149: That the House recede from its disagreement to the amendment of the Senate numbered 149, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one hundred and five thousand three hundred and sixty dollars;" and the Senate agree to the same.

Amendment numbered 157: That the House recede from its disagreement to the amendment of the Senate numbered 157, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "fifty-one thousand nine hundred and forty dollars;" and the Senate agree to the same.

Amendment numbered 166: That the House recede from its disagreement to the amendment of the Senate numbered 166, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "twenty-five thousand eight hundred dollars;" and the Senate agree to the same.

Amendment numbered 167: That the House recede from its disagreement to the amendment of the Senate numbered 167, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one thousand seven hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 168: That the House recede from its disagreement to the amendment of the Senate numbered 168, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "fourteen thousand three hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 177: That the House recede from its disagreement to the amendment of the Senate numbered 177, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "fourteen thousand six hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 184: That the House recede from its disagreement to the amendment of the Senate numbered 184, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "thirty-seven thousand two hundred and fifty-one dollars;" and the Senate agree to the same.

Amendment numbered 190: That the House recede from its disagreement to the amendment of the Senate numbered 190, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "one servant, one hundred and forty-four dollars;" and the Senate agree to the same.

Amendment numbered 191: That the House recede from its disagreement to the amendment of the Senate numbered 191, and agree to the same with an amendment as follows: In lieu

of the sum proposed insert "ten thousand nine hundred and forty-four dollars;" and the Senate agree to the same.

Amendment numbered 193: That the House recede from its disagreement to the amendment of the Senate numbered 193, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one thousand seven hundred and fifty dollars;" and the Senate agree to the same.

Amendment numbered 196: That the House recede from its disagreement to the amendment of the Senate numbered 196, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "thirty-nine thousand four hundred and seventy-four dollars;" and the Senate agree to the same.

Amendment numbered 198: That the House recede from its disagreement to the amendment of the Senate numbered 198, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For repairs and equipment, Central Dispensary and Emergency Hospital, four thousand dollars."

And the Senate agree to the same.

Amendment numbered 204: That the House recede from its disagreement to the amendment of the Senate numbered 204, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "four hundred and eighty dollars;" and the Senate agree to the same.

Amendment numbered 205: That the House recede from its disagreement to the amendment of the Senate numbered 205, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "eleven thousand six hundred dollars;" and the Senate agree to the same.

Amendment numbered 207: That the House recede from its disagreement to the amendment of the Senate numbered 207, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "seven thousand five hundred dollars;" and the Senate agree to the same.

Amendment numbered 208: That the House recede from its disagreement to the amendment of the Senate numbered 208, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "thirty-four thousand one hundred dollars;" and the Senate agree to the same.

Amendment numbered 225: That the House recede from its disagreement to the amendment of the Senate numbered 225, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "six thousand one hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 227: That the House recede from its disagreement to the amendment of the Senate numbered 227, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "sixteen thousand six hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 239: That the House recede from its disagreement to the amendment of the Senate numbered 239, and agree to the same with amendments as follows: In lieu of the sum proposed insert "three thousand dollars;" and on page 90, in line 1, of the bill, before the word "installing," insert the word "purchasing;" and the Senate agree to the same.

F. H. GILLETT,
WASHINGTON GARDNER,
A. S. BURLESON,
*Managers on the part of the House.*
J. H. GALLINGER,
J. W. DANIEL,
*Managers on the part of the Senate.*

The statement was read as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24103) making appropriations for the expenses of the government of the District of Columbia for the fiscal year 1908, submit the following written statement in explanation of the effect of the action agreed upon and submitted as to each of the Senate amendments in the accompanying conference report:

On amendments numbered 1, 2, 3, 4, 5, and 6, relating to the Executive Office: Strikes out increase in the salaries of the inspector of buildings and the assistant inspector of buildings of $250 and $200 each respectively; increases, as proposed by the Senate, the compensation of one steam engineer from $900 to $1,000 and the property clerk from $2,000 to $2,500; and appropriates, as proposed by the Senate, $1,200 for temporary employment in connection with plumbing inspection.

On amendments numbered 7, 8, 9, and 10, relating to the collector's office: Strikes out proposed increase in salary of the deputy collector of $200 proposed by the Senate; provides for an additional coupon clerk at $900; and one clerk at $1,000.

On amendments numbered 11, 12, and 13: Provides for an additional clerk at $720 in the auditor's office and increases the salary of the disbursing officer from $2,500 to $3,000, as proposed by the Senate.

On amendments numbered 14 and 15: Strikes out provision proposed by the Senate for an additional laborer at $365 in the coroner's office.

On amendments numbered 16, 17, 18, and 19, relating to the engineer's office: Increases the salary of the superintendent of parking from $1,300 to $1,400, instead of $1,500, proposed by the Senate; and strikes out the increase proposed by the Senate of the assistant permit clerk from $900 to $1,000; and an index clerk and typewriter from $720 to $900.

On amendments numbered 20 and 21: Strikes out increase proposed by the Senate in salary of one clerk from $1,200 to $1,500, in the street-sweeping office.

On amendments numbered 22, 23, and 24: Strikes out increase proposed by the Senate in salary of the superintendent of insurance from $3,000 to $3,500; and provides $600 for appraisers, as proposed by the Senate, in the department of insurance.

On amendments numbered 25, 26, 27, and 28, relating to the free public library: Increases, as proposed by the Senate, the salary of the assistant librarian from $1,200 to $1,500; provides for a librarian's secretary at $900; and for one additional assistant at $480.

On amendment numbered 29: Appropriates $2,750, as proposed by the House, instead of $3,000, as proposed by the Senate, for miscellaneous expenses for the coroner's office.

On amendment numbered 30: Appropriates $30,000, as proposed by the Senate, for addition to the Eastern Market House.

On amendment numbered 31: Strikes out appropriation of $1,000 proposed by the Senate for testing materials for fireproof buildings.

On amendment numbered 32: Appropriates $3,000 as proposed by the Senate for identification number tags for motor vehicles.

On amendment numbered 33: Appropriates $3,000 as proposed by the Senate for completing card indexes in office of the register of wills.

On amendments numbered 34, 35, 36, 37, 38, 39, 40, 41, 42, and 43, relating to the paving of streets: Appropriates $66,950, instead of $72,250 as proposed by the House and $72,350 as proposed by the Senate, for work on streets and avenues named in the Book of Estimates; strikes out the provision proposed by the Senate with reference to the width of streets to be paved and substitutes therefor a provision prohibiting hereafter the paving of any street less in width than the width provided by law except by express authority of Congress; strikes out the provision proposed by the Senate with reference to the name of Georgia avenue; inserts the provision proposed by the Senate increasing the price that may be paid to $1.80 per square yard for asphalt paving during the current fiscal year; inserts the provision proposed by the Senate extending to July 1, 1908, the time within which the Connecticut Avenue Bridge may be completed; strikes out the appropriation of $7,500 proposed by the Senate for paving Second street NW. from B to C streets and inserts the appropriations proposed by the Senate of $2,750 for paving Twenty-third street NW., $9,000 for paving South Carolina avenue SE., and $2,500 for paving Florida avenue.

On amendment numbered 44: Strikes out the provision proposed by the Senate with reference to condemnation of lands for reservations.

On amendments numbered 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, and 60: Inserts all of the specific appropriations proposed by the Senate for improving certain county roads and suburban streets, except the following, which are omitted, namely, Pennsylvania avenue extended SE., Seventh Street NE, Thirteenth street NW., streets in American University Park and Wesley Park NW., North Capitol street, Ontario Place NW., Girard street NE., M street NE., and strikes out the provision proposed by the Senate renaming Sixteenth street.

On amendment numbered 61: Inserts a provision authorizing changes in the lines of curb of Pennsylvania avenue and its intersecting streets in connection with their resurfacing, and makes the appropriation for repairs of streets immediately available.

On amendment numbered 62: Inserts the provision proposed by the Senate authorizing a new highway plan for that portion of the District lying north of Tilden street, south of Albermarle street, east of Reno road, and west of Connecticut avenue.

On amendment numbered 63: Appropriates $110,000, instead of $100,000 as proposed by the House and $120,000 as proposed by the Senate, for repairs to county roads.

On amendment numbered 64: Appropriates $80,000 as proposed by the Senate for the repair of Aqueduct Bridge.

On amendment numbered 65: Extends the time to July 1, 1908, within which the Anacostia Bridge may be completed.

On amendment numbered 66: Leaves in the bill the provision proposed by the House requiring any street railway company that may use the bridge carrying Monroe street over the Baltimore and Ohio Railroad to pay one-sixth of the cost of said bridge.

On amendment numbered 67: Appropriates $4,000 instead of $5,000, as proposed by the Senate, for plans and estimates for the treatment of the valley of Rock Creek from Massachusetts avenue to the mouth of Rock Creek.

On amendment numbered 68: Strikes out the provision proposed by the Senate making appropriation for sewer construction available for rights of way.

On amendment numbered 69: Appropriates $28,800, as proposed by the Senate, for a sewer in the valley of Broad Branch.

On amendments numbered 70 and 71: Strikes out the appropriations proposed by the Senate of $75,000 for dikes in connection with the sewage-disposal project and $100 for the drainage of certain houses in Tacoma Park.

On amendments numbered 72 and 73, with reference to sprinkling, cleaning, and sweeping streets: Leaves the rates per thousand square yards, as proposed by the House, in the event the work be undertaken by the District of Columbia authorities instead of by contract.

On amendments numbered 74 and 75: Appropriates $30,000, as proposed by the House, instead of $32,500, as proposed by the Senate, for the Parking Commission.

On amendments numbered 76 and 77: Appropriates $7,000 instead of $5,000, as proposed by the House, and $8,000, as proposed by the Senate, for the bathing beach.

On amendments numbered 78 and 79: Appropriates $75,000, as proposed by the Senate, for the purchase of playgrounds; and strikes out the appropriation of $10,000 proposed by the Senate for improving and equiping playgrounds.

On amendment numbered 80: Strikes out the appropriation of $500, proposed by the Senate, for the harbor and river front.

On amendments numbered 81, 82, 83, 84, and 85, relating to the electrical department: Provides, as proposed by the Senate, for one additional electrical inspector, at $1,200; appropriates $15,000, as proposed by the Senate, instead of $14,000, as proposed by the House, for general supplies; $21,000 instead of $23,000, as proposed by the Senate, and $18,600, as proposed by the House, for placing wires in conduits; and appropriates $17,260, as proposed by the Senate, for moving the fire-alarm apparatus to the new municipal building.

On amendment numbered 86: Inserts as a substitute for the provision proposed by the Senate relative to the annual reports from gas companies in the District of Columbia the provision which is fully set forth in the conference report that is printed in the RECORD.

On amendments numbered 87, 88, and 89: Appropriates $100,500, as proposed by the Senate, instead of $95,000, as proposed by the House, for electric arc lighting; fixes the price for each lamp at $85 per annum, as proposed by the Senate, instead of $80, as proposed by the House; continues available for the fiscal year 1908 not exceeding $10,000 of the unexpended appropriations for gas and electric lighting made for the fiscal year 1907, and inserts a provision requiring reports from companies manufacturing electricity, which is printed in full in the conference report.

On amendments numbered 90 and 91: Strikes out the appropriations proposed by the Senate of $10,000 for investigations and surveys for increasing the water supply, and $3,000 for a storehouse and stable at Great Falls.

On amendment numbered 92: Strikes out the provision proposed by the Senate extending to the towns of Tacoma and Chevy Chase, Md., the water-distribution system of the District of Columbia.

On amendments numbered 93 and 94: Provides for two stenographers at $840 each, instead of $900 each, as proposed by the Senate, for the board of education.

On amendments numbered 95 and 96: Restores to the bill the provisions proposed by the House with reference to the appropriations for the salaries of school-teachers.

On amendment numbered 97: Strikes out the provision proposed by the Senate extending the school hours.

On amendments numbered 98 and 99: Appropriates $5,000, instead of $4,000 as proposed by the House and $8,000 as proposed by the Senate, for industrial and commercial instruction in night schools.

On amendments numbered 100, 101, 102, 103, and 104: Makes verbal corrections in the text of the bill, and provides for a janitor at $120 for the Grant Road Public School.

On amendments numbered 105 and 106: Appropriates $15,684, as proposed by the House, instead of $17,184, as proposed by the Senate, for rent of school buildings.

On amendment numbered 107: Appropriates $70,000, as proposed by the Senate, instead of $65,000, as proposed by the House, for repairs and improvements to school buildings.

On amendment numbered 108: Appropriates $50,000, as proposed by the Senate, instead of $45,000, as proposed by the House, for changes in plumbing in school buildings.

On amendments numbered 109, 110, 111, 112, 113, and 114: Appropriates $6,950, as proposed by the House, instead of $7,750, as proposed by the Senate, for furniture for certain new school buildings.

On amendment numbered 115: Restores to the bill the provision proposed by the House with reference to service of high school cadets.

On amendment numbered 116: Strikes out the appropriation of $1,500 proposed by the Senate for free evening lectures.

On amendments numbered 117, 118, and 119: Increases the salary of the bookkeeper and custodian of text-books and supplies from $1,000 to $1,200, as proposed by the Senate.

On amendment numbered 120: Appropriates $1,000, as proposed by the Senate, for utensils, material, and labor for school gardens.

On amendments numbered 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, and 133, relating to public school buildings: Strikes out the appropriation of $57,040 proposed by the Senate for equipment of the extension of the McKinley Manual Training School; appropriates $25,000, as proposed by the Senate, instead of $40,000, as proposed by the House, for site for an addition to the Langdon school; and $33,000, as proposed by the Senate, instead of $28,000, as proposed by the House, for site and erection of addition to the Emery School; and makes certain corrections in the text of the bill.

On amendments numbered 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, and 144, relating to the Metropolitan police: Provides for twelve additional privates at $1,200 each and six additional privates at $1,080 each; and reduces the number of privates at $900 each by sixteen in number; provides for an additional laborer at $600; strikes out the increase of five proposed by the Senate in the number of officers and privates that may be mounted; increases the pay of twenty-six drivers from $600 to $720 each; appropriates $500 additional, as proposed by the Senate, for miscellaneous and contingent expenses; and strikes out the appropriation of $20,000 proposed by the Senate for the reconstruction of cell corridors in four precinct stations.

On amendments numbered 145, 146, 147, 148, 149, 150, 151, and 152, relating to the fire department: Strikes out the appropriation proposed by the Senate for two marine firemen at $720 each; appropriates $8,000, as proposed by the House, instead of $10,000, as proposed by the Senate, for repairs to engine houses; appropriates $15,000, as proposed by the Senate, instead of $13,000, as proposed by the House, for purchase of hose; appropriates $30,000, as proposed by the Senate, for a truck house in the southwest section of the city, and $500 additional for the hook and ladder truck authorized at the last session.

On amendments numbered 153, 154, 155, 156, 157, 158, 159, and 160, relating to the health department: Provides, as proposed by the Senate, for an additional inspector at $1,000 and one at $900; strikes out the appropriation proposed by the Senate of $900 for an assistant poundmaster; appropriates $2,400, as proposed by the Senate, instead of $1,920, as proposed by the House, for laborers at $40 per month each; increases the amount for the roadway to the smallpox hospital from $500 to $800, as proposed by the Senate, and appropriates $3,000, as proposed by the Senate, for maintenance of the public crematory.

On amendments numbered 161 and 162: Increases the salary of the probation officer of the juvenile court from $900 to $1,200, as proposed by the Senate.

On amendments numbered 163, 164, 165, 166, 167, and 168, relating to the police court: Strikes out the proposed increase in the salaries of the police-court judges proposed by the Senate; provides for three additional bailiffs, at $600 each, and a matron, at $600, as proposed by the Senate; and appropriates $1,750, instead of $1,500, as proposed by the House, and $2,500, as proposed by the Senate, for contingent expenses.

On amendments numbered 169 and 170: Increases the salaries of six justices of the peace from $2,000 to $2,500, as proposed by the Senate.

On amendments numbered 171 and 172: Appropriates, as proposed by the Senate, $25,000 for metal file cases in the clerk's office, supreme court of the District of Columbia, and $2,000 for repairing the records of the old circuit court of the District.

On amendments numbered 173, 174, 175, 176, and 177: Strikes out the increases in salaries of certain employees of the board of charities proposed by the Senate, and appropriates $400, as proposed by the Senate, instead of $200, as proposed by the House, for traveling expenses.

On amendments numbered 178, 179, 180, 181, 182, 183, 184, 185, and 186, relating to the Washington Asylum: Increases, as proposed by the Senate, the salaries of the property clerk from $840 to $1,000; the principal overseer, from $1,200 to $1,400, and of fifteen overseers, from $600 to $660 each; strikes out the increases proposed by the Senate in the salaries of superintendent of nursing from $600 to $720; of three graduate nurses from $365 to $480 each; appropriates $48,000, as proposed by the House, instead of $50,000, as proposed by the Senate, for provisions and other expenses, and strikes out the appropriation of $3,000 proposed by the Senate for additional land for the Home for the Aged and Infirm.

On amendments numbered 187, 188, 189, 190, 191, 192, 193, 194, 195, and 196, relating to the Home for the Aged and Infirm: Increases, as proposed by the Senate, the salaries of two female attendants from $240 to $300 each, and of one laundryman from $240 to $540; strikes out the provision proposed by the Senate for a blacksmith and woodworker, at $540, and provides for one additional servant, at $144; appropriates $1,750, instead of $1,500, as proposed by the House, and $2,000, as proposed by the Senate, for grading roadways and purchase of farm implements; strikes out the appropriation of $3,000, proposed by the Senate, for fire escapes and $600 for telephone system.

On amendments numbered 197 and 198: Appropriates $15,000, as proposed by the Senate, instead of $10,000, as proposed by the House, for the Central Dispensary and Emergency Hospital, and $4,000, as proposed by the Senate, for repairs and equipment of that hospital.

On amendments numbered 199 and 200: Appropriates $4,000, as proposed by the Senate, instead of $3,000, as proposed by the House, for the Home for Incurables.

On amendment numbered 201: Strikes out the appropriation of $5,000 proposed by the Senate for free dispensary service to be provided by the board of charities.

On amendments numbered 202, 203, 204, 205, 206, 207, and 208, relating to the Tuberculosis Hospital: Strikes out the increase proposed by the Senate in the salary of the chief cook from $480 to $600 and the provision for a gardener at $540, and increases the salary of the laundryman from $300 to $480; appropriates $7,500, instead of $5,000, as proposed by the House, and $10,000, as proposed by the Senate, for furniture.

On amendments numbered 209, 210, 211, 212, 213, 214, 215, 216, 217, and 218: Leaves the appropriations in every particular for the Board of Children's Guardians as they were provided by the House.

On amendments numbered 219, 220, 221, 222, 223, 224, 225, 226, and 227: Leaves the appropriations for the Industrial Home School for Colored Children as provided by the House, except that the salary of the farmer is increased from $480 to $600; two watchmen at $240 are provided for, and $1,500 is appropriated for a stable.

On amendments numbered 228, 229, and 230: Increases the salary of the florist at the Industrial Home School from $600 to $720.

On amendment numbered 231: Appropriates $5,400, as proposed by the House, instead of $6,000, as proposed by the Senate, for the Washington Hospital for Foundlings.

On amendments numbered 232 and 233: Fixes the salary of the superintendent of the Temporary Home for ex-Union Soldiers and Sailors at $1,200, as proposed by the Senate.

On amendments numbered 234, 235, 236, 237, and 238, relating to the militia: Appropriates $24,000, as proposed by the House, instead of $24,500, as proposed by the Senate, for rent; $750, as proposed by the Senate, instead of $500, as proposed by the House, for lockers; $1,000, as proposed by the House, instead of $2,000, as proposed by the Senate, for cleaning and repairing uniforms, and $720, as proposed by the House, instead of $840, as proposed by the Senate, for salary of a clerk.

On amendment numbered 239: Appropriates $3,000, as proposed by the Senate, instead of $2,500, as proposed by the House, for contingent expenses of the water department.

On amendments numbered 240 and 241: Inserts as a separate section the provision proposed by the Senate authorizing for the fiscal year nineteen hundred and eight advances out of the Treasury to meet any deficit that may occur in the revenues of the District of Columbia that year and makes correction in the number of a section.

F. H. GILLETT,
WASHINGTON GARDNER,
A. S. BURLESON,
*Managers on the part of the House.*

Mr. GILLETT. Mr. Speaker, this is a complete agreement; and if no information is desired, I ask for a vote.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and the conference report was agreed to.

CATHARINE LIPES.

The SPEAKER laid before the House the bill H. R. 25440, entitled "An act granting an increase of pension to Catharine Lipes," with a Senate amendment, which was read.

Mr. LOUDENSLAGER. Mr. Speaker, I move that the House concur in the Senate amendment.

The question was taken; and the Senate amendment was agreed to.

EMELINE H. HARDIE.

The SPEAKER also laid before the House the bill H. R. 25005, entitled "An act granting an increase of pension to Emeline H. Hardie," with a Senate amendment, which was read.

Mr. LOUDENSLAGER. Mr. Speaker, I move that the House concur in the Senate amendment.

The question was taken; and the Senate amendment was agreed to.

JOHN R. KISSINGER.

The SPEAKER also laid before the House the bill H. R. 21721, entitled "An act granting an increase of pension to John R. Kissinger," with a Senate amendment, which was read.

Mr. LOUDENSLAGER. Mr. Speaker, I move that the House concur in the Senate amendment.

The question was taken; and the Senate amendment was agreed to.

AARON DAVIS.

The SPEAKER also laid before the House the bill H. R. 19589, entitled "An act granting a pension to Aaron Davis," with a Senate amendment, which was read.

Mr. LOUDENSLAGER. Mr. Speaker, I move that the House concur in the Senate amendment.

The question was taken; and the Senate amendment was agreed to.

EDWARD W. HOBAN.

The SPEAKER also laid before the House the bill H. R. 10574, entitled "An act granting a pension to Edward W. Hoban," with a Senate amendment, which was read.

Mr. LOUDENSLAGER. Mr. Speaker, I move that the House do concur in the Senate amendment.

The question was taken; and the Senate amendment was agreed to.

Mr. GOLDFOGLE. Mr. Speaker, I ask that the gentleman yield to me for a few minutes for the purpose of making a statement regarding a matter connected with pensions.

Mr. LOUDENSLAGER. I can not yield, because this is only by unanimous consent under the rule to concur in the Senate amendments.

The SPEAKER. The House, under previous order adopted, is in the Committee of the Whole House for the further consideration of the merchant marine bill.

Mr. TAWNEY. Mr. Speaker, pending that motion I ask unanimous consent to take from the Speaker's table the bill H. R. 25745—the sundry civil appropriation bill—and disagree to the Senate amendments and ask for a conference.

The SPEAKER. The gentleman from Minnesota [Mr. TAWNEY] asks unanimous consent that the House disagree to the Senate amendments to the sundry civil appropriation bill and ask for a conference.

Mr. MANN. May I ask the gentleman to include in his request that the bill be printed with the Senate amendments?

The SPEAKER. It will be printed under the rule.

Mr. TAWNEY. And the Senate amendments will be numbered.

Mr. CLARK of Florida. Mr. Speaker, reserving the right to object, I want to make a statement that will just take a moment. There are two amendments that I want to call to the attention of the gentleman from Minnesota [Mr. TAWNEY]. There are amendments put upon the sundry civil bill by the Senate covering the purchase of four different tracts of land for park purposes. Two of those propositions I have investigated.

As to the one in southeast Washington, the land proposed to be sold constitutes 121 acres, and at the price which this bill proposes to purchase, considered in relation to the estimated actual value put upon it by the tax assessor of the District, makes a profit of $147,000 on the 121 acres. Also, in the Georgetown proposition, as authorized, there is a clear-cut profit of $25,000. I have all those facts here, and I simply wanted to call it to the attention of the House before the bill went to conference.

Mr. SULLIVAN. Mr. Speaker, I would like to address a question to the chairman of the committee.

The SPEAKER. Does the gentleman yield?

Mr. TAWNEY. I yield to the gentleman from Massachusetts.

Mr. SULLIVAN. In that part of the bill referring to the Panama Canal the Appropriations Committee recommended and the House adopted a provision which removed the limit of cost imposed in the act of June 28, 1902; and the reason assigned was that the act of 1902 might prevent the President from making a contract such as was then contemplated for the construction of the canal. So as not to embarrass the President or impede the progress of the work, the committee determined to raise the limit of cost and give the President power to make all contracts necessary for the completion of the construction of the canal.

All the testimony given before the committee was based upon the assumption that the bid upon a 6¾ per cent profit basis would be accepted. Now it appears that that bid, with all others, has been rejected, and therefore the premises upon which the legislation was based have been removed. We now stand confronted with this situation: We do not know whether contracts will be made for the construction of the canal, or whether it will be constructed under the auspices of Army engineers. No contracts may be made, or, if they are made, may be upon a basis of profit larger than that which the committee supposed it was acting upon as a legislative premise. The percentage of profit in a new contract may be, for example, 12 per cent or 25 per cent. Congress will have no power to control that. The House will adjourn and the President will have complete power to make any contract he pleases, involving an expenditure of a thousand million dollars, or a billion dollars, or any fanciful figure which anyone may please to put down. I simply wanted to suggest that before this session ended some means ought to be found to place some limit of cost upon the construction of the canal. I do not mean so low as to embarrass the President and those authorized to finish the work, but at all events some limit of cost, a reasonable one, based upon some approximation of the actual cost of doing the work. I do not know whether that can be reached in the conference. I do not believe it can, and if it can not be, I suggest, then, for the consideration of the chairman of the committee, that it might be well to provide for it by a joint resolution before Congress adjourns.

Mr. GAINES of Tennessee. There is no limit now?

Mr. SULLIVAN. Absolutely none.

Mr. MANN. Mr. Speaker, the suggestion or criticism of the gentleman from Massachusetts [Mr. SULLIVAN] has much weight. On the other hand, I do not anticipate that the contingency which he fears is likely to arise before the meeting of another Congress. The bid which was made has been rejected. It was obvious, I think, upon an examination of that matter, that under the specifications and advertisements which have been issued, too large a sum of money out of the 6¾ per cent was required to be paid to the men who were doing the financing, leaving a very small portion for the men who were to do the actual work. Now, that has been rejected. The chief engineer has resigned, and as I understand, it is proposed to place the management of this work, for the time being at least, in the hands of certain of the Army engineers, to make at least further experiments in two directions; first, as to whether the Government itself shall proceed with the actual construction of the canal, and second, if it shall be determined that that is not desirable, the plan upon which an advertisement shall be made or a new contract let. I may say to the gentleman that I have received some letters in reference to the actual work of excavation on the canal for the months of last year, and for the month of January of this year. Late last year this excavation in the Culebra cut was running at the rate of a little over 200,000 cubic yards per month. For the month of January it ran something over 500,000 cubic yards. It is estimated that for the month of February it will be something over 600,000 cubic yards, and that for the month of March, over 800,000 cubic yards. In the best days of the French company, while they were excavating a total amount of more than 1,200,000 cubic yards upon the entire stretch of the canal, at no time did they excavate in the Culebra cut more than two or three hundred thousand cubic yards per month; so that now, with our present organization, we are excavating two or three times as much as the French ever excavated in the Culebra cut, and it may be that with this tremendous success, which has now developed in the organization of our own work on the canal, it will not be considered desirable to do the work by contract.

Mr. FITZGERALD. Has the gentleman from Illinois any assurance that a contract will not be let before the next session of Congress?

Mr. MANN. I have not. The letters to which I referred are as follows:

ISTHMIAN CANAL AFFAIRS,
OFFICE OF ADMINISTRATION,
*Washington, D. C., February 18, 1907.*

SIR: Referring to my letter to Mr. HEPBURN of the 12th instant, inclosed herewith, the Secretary of War has informed me that what you desired was a statement as to the amount of material taken out of the Culebra cut each month since the United States undertook the construction of the Panama Canal, and he has requested me to send this information directly to you. Accordingly I beg to inclose a statement showing the amount of material excavated from the Culebra cut for each month from July, 1904, to January, 1907, inclusive.

I may also add, for your information, that on the 13th instant a cable was received from the chief engineer, stating that in February, with twenty-three working days, there would probably be 600,000 cubic yards excavated from Culebra cut, and also estimating that 800,000 yards would be excavated during the month of March.

Very respectfully,

T. P. SHONTS, *Chairman.*

Hon. JAMES R. MANN,
*House of Representatives, Washington, D. C.*

*Memorandum on excavation operations in Culebra cut.*

WAR DEPARTMENT,
*Washington, February 25, 1907.*

MY DEAR MR. MANN: I send you a copy of a letter which I have just received from Mr. Stevens.

Very sincerely, yours,

WM. H. TAFT.

Hon. JAMES R. MANN,
*House of Representatives.*

ISTHMIAN CANAL COMMISSION,
DEPARTMENT OF CONSTRUCTION AND ENGINEERING,
*Culebra, February 15, 1907.*

Hon. WM. H. TAFT,
*Secretary of War, Washington.*

SIR: I have the honor to quote from the report of work done by the construction and engineering department of the Panama Canal for January, 1907, as the matter will probably be of interest to you:

"During the month of January there was removed from the canal prism 566,750 cubic yards, at a cost of 57.22 cents per cubic yard. This yardage shows an increase over December of 288,553 cubic yards and also shows a decrease in cost of 29.80 cents per cubic yard.

"The yardage gotten out during January is the greatest taken out of the canal prism in any one month since the Americans have had control, and exceeds by 240,915 cubic yards the best previous month.

"In looking over the only records available here, 'The Bulletin du Canal Interocéanique,' the official publication of the first French canal company, published in Paris, it has been found that in any of their most active years—when their output for the year 1886 was 15,338,916 cubic yards—there was never more than 20 to 21 per cent of the total yardage of the entire canal taken out in that section of the canal now called the 'Culebra division.' This publication shows that during May, 1886, of the total output for the canal of 1,412,640 cubic yards, only 209,280 cubic yards was removed from the section now covered

"During October, 1886, out of a total of 1,230,828 cubic yards, only 264,216 cubic yards were removed from this same district.

"December, 1886, had a total output of 1,083,024 cubic yards, and only 209,280 cubic yards was removed from that section now covered by the Culebra division.

"The above figures show that during the month of January, 1907,

* Estimated.

from the records that are available, the output of the Culebra division probably doubles that of anything taken out in a month by the first French company from the same section of the canal."

Truly, yours,

JNO. F. STEVENS, *Chief Engineer.*

Mr. SULLIVAN. Right there is our difficulty.

Mr. TOWNE. I want to ask the gentleman if my impression is correct, that under the estimated time for the completion of the canal it will be necessary in each and every month to excavate an average of 1,900,000 cubic yards?

Mr. MANN. That is not correct.

Mr. TOWNE. I understand it is correct. There are about 126,000,000 cubic yards, or thereabouts, to be excavated, and you expect to do it in eight and one-third years. The gentleman will have to revise his figures in order to indulge successfully in any such optimistic predictions.

Mr. MANN. The gentleman can make his own prediction as to the time.

Mr. TOWNE. I was going to do that, with the permission of the gentleman.

Mr. SULLIVAN. Let me ask the gentleman a question.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to disagree to the Senate amendments and ask for a conference. Is there objection?

Mr. TAWNEY. Mr. Speaker, I now yield to the gentleman from Ohio.

Mr. KEIFER. Mr. Speaker, I do not object to taking this up in this way at this time. I do not desire to embarrass the conference committee, but I do wish to state, in the matter of an amendment that has been put in the bill by the Senate, to wit, an amendment providing for the transportation of silver coin, that I do not wish it to be inferred that it is the judgment of this House that it is opposed to that amendment. I wanted to say that before the vote is taken on the motion of the gentleman from Minnesota.

Mr. SIMS. Mr. Speaker, I want to ask the gentleman a question. I do not object to this, because it is a great bill and ought to go to conference, but I do hope that the chairman and the House conferees will not submit to that omnibus park bill going through this House without a particle of consideration in the House whatever. I hope they will not submit to be treated in that way by that body.

Mr. TAWNEY. I will say to the gentleman that I do not think the House will have any cause of complaint of not having an opportunity by reason of any action on the part of the conferees of the House preventing discussion on new propositions that the Senate have seen fit to put upon the bill.

Mr. WILLIAMS. Mr. Speaker, I want to say, in response to the gentleman from Tennessee, that I hope, if the conferees allow any of the parks to go through, they will no longer continue to favor the northwest at the expense of the balance of the city of Washington, but will give an equal opportunity for parks in other parts of the Federal capital.

Mr. CLARK of Missouri. Mr. Speaker, I would like to ask the gentleman from Minnesota a question. Are they going to shut all the scholars out of these parks, the way they do the rest of them?

Mr. TAWNEY. There is a provision of law now on the statute book authorizing the superintendent of public buildings and grounds to set apart certain portions of any park in the city of Washington for the use of the children as playgrounds.

Mr. CLARK of Missouri. Is that Mr. Elliott Woods?

Mr. TAWNEY. No; the superintendent of public buildings and grounds is Colonel Bromwell.

Mr. CLARK of Missouri. Very well, I will go after him, then. [Laughter.]

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The SPEAKER appointed as conferees on the part of the House Mr. TAWNEY, Mr. SMITH of Iowa, and Mr. TAYLOR of Alabama.

## LEASING COAL LANDS.

Mr. GAINES of Tennessee. Mr. Speaker, I ask unanimous consent to print in the RECORD a letter on the subject of leasing coal lands.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

The letter referred to is as follows:

MIAMI, BISCAYNE BAY, FLA., *February 22, 1907.*

Hon. JOHN W. GAINES,
*Washington, D. C.*

DEAR SIR: Your inquiry regarding the disposition that should be made of the mineral products of Government lands is so broad and so fraught with importance to the people of this country that it requires much thought and mature deliberation before attempting to suggest the best method of handling the question. If the Government had retained all the minerals in the lands it has ceded in the past, even at a nominal royalty, it would to-day pay all the legitimate expenses of the Government. The vital question to-day is: "If the Government retains the minerals, how will it dispose of them, handle them, and deal with the varying values on account of quantity, quality, and location, transportation facilities, and points of consumption?" All these are so different that it is impossible to fix a positive price, even where quality and quantity are relatively the same. Take coal, for instance. A seam of coal 1 inch thick covering an acre of land will yield approximately 100 tons, which, at a royalty of 2 cents per ton, would mean $2 per acre for each 1 inch thickness of the aggregate strata of coal in this particular section. Ordinarily a seam of coal is not considered workable commercially unless it is over 30 inches thick. This would mean 3,000 tons to the acre, and at a royalty of 2 cents per ton would be $60 per acre. Many veins in our coal lands carry as much as 100 inches of coal, which would mean 10,000 tons per acre, or at a royalty of 2 cents a ton would be $200 per acre. While this looks like a large price, the royalty which is being paid on coal mined on this basis is really from 6 cents to 15 cents per ton, which would bring the royalty value of coal, depending on the variable working values, all the way from $200 per acre up to $3,000 per acre.

As an illustration of the value of coal, it is stated that the church parish of Bishop Auckland, in England, is the richest in the world, and that the wealth is obtained and has been obtained for the past century from royalty derived from coal under lands which were given the church by the Crown over a century ago. So large are the revenues from this source that all the legitimate expenses of the church and its missions are supported from this source without absorbing all the revenue.

Another view of the question is that if the Government should decide to withdraw the mineral lands from entry and decide to lease upon a royalty, as individuals and corporations now do, what price would the Government establish as the proper royalty? In my opinion, it should be entirely governed by the "law of supply and demand." Certainly the royalty on a ton of anthracite coal in Pennsylvania would be worth very much more than the royalty on a ton of coal in any other section of the country where there is no demand for fires and no manufacturing.

I take it that the two minerals in which the Government feels the greatest interest are coal and iron ore, as these are the minerals which have the greatest value in this country. While the supply of coal is so great that the question of its exhaustion may properly be left to future generations, it is a different question with the known deposits of iron ore. At the present rate of consumption, increasing as it is at such an enormously accelerated ratio, it looks as though the next generation would see the practical exhaustion of our iron-ore supply.

I take it that the Government would hardly care to deal with the precious metals on account of their scarcity and uncertainty. The other nonmetallic minerals, with the exception of coal, seem to be so plentiful that no legislation with reference to them is necessary.

Yours, very truly,

A. M. SHOOK, *Nashville, Tenn.*

## SHIP-SUBSIDY BILL.

The SPEAKER. The House, under the rule adopted, will now resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the merchant-marine bill.

Accordingly, the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. CURRIER in the chair.

Mr. DALE. Mr. Chairman, there is one objection to the pending measure—it does not go far enough. I fully agree with Senator MALLORY, of Florida, as quoted in the report accompanying this bill:

> I do not find fault with the postal subsidy. I think that is one of the best features of this bill. The Senator knows that I acquiesced readily, as a member of the Commission. The only fault I ever found with that is I do not think we give postal subsidy enough.

Indeed, I very much question whether lines to South American ports can be maintained on the subsidy provided in this bill. But, Mr. Chairman, the bill is a step in the right direction, and for that reason I shall vote for it.

And now what is the object and purpose of this bill? In the first place, to style it a "ship-subsidy bill" is a misnomer; the true title of the bill is "to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce." I believe the title fairly expresses the object and purpose of the bill—a purpose, all will agree, truly patriotic and highly desirable. The only discussion, the only dispute, that can arise is whether the enactment of the bill will fulfill that purpose and attain that object.

If I mistake not, several years ago a ship-subsidy bill was drafted by that great constitutional lawyer, ex-Senator George F. Edmunds, and Senator WILLIAM P. FRYE, of Maine, in reporting the bill from the Committee on Commerce, used the following words:

> The importance of a national merchant marine in foreign trade to a nation of the rank of the United States is self-evident. We are almost wholly dependent on foreign agencies for the means of transporting the bulk of our exports and imports. For such favors we pay with a portion of our independence. A war between two maritime nations would leave our producers practically without access to foreign markets. Even the war between Great Britain and the Transvaal has materially reduced our means of transportation and embarrassed our ocean mail service. For our recent war with Spain we were compelled to rely to a humiliating extent on vessels bought or chartered from British owners for the transportation of troops and supplies.

Mr. Chairman, for such a power and such a nation as ours these are humiliating admissions, but that they are truthful

none will gainsay. In my opinion they show the almost absolute necessity for legislation to secure a national merchant marine in foreign trade. The decline in the amount of our exports and imports combined, carried in American vessels, is without a parallel and constitutes one of the most disheartening pages of our national history.

In 1807, with a population of 7,000,000, the United States had a larger registered tonnage for foreign trade than in 1906, with more than 77,000,000 of people. In 1869 there was carried in American vessels 33.1 per cent of our exports and imports, A decade after, in 1879, there was carried in American vessels 23 per cent of our exports and imports. In 1889 there was carried in American vessels 14.3 per cent of our exports and imports. In 1899 only 8.9 per cent of our combined exports and imports was carried in American vessels. In other words, while the value of our exports and imports constantly and continuously increased, an increase from 1869 to 1899 of over 100 per cent, the amount carried in American vessels decreased from 33.1 per cent to 8.9 per cent. And from 1899 to 1906 the value of our exports and imports combined increased as never before, while the percentage carried in American vessels decreased and decreased until to-day it practically amounts to nothing. In my opinion, Mr. Chairman, there is crying need for legislation to arrest this decline in American shipping.

Doubtless there are other reasons for this decline, but without entering upon an extended discussion, it seems to me that at least four reasons stand out prominently:

First. Because of change from wood to iron in the construction of ships.

Second. Because of the increased cost of construction of American ships on account of the higher wages paid American mechanics.

Third. Increase of cost of maintenance on account of higher wages paid American seamen.

Fourth. Because of the aid given their marine by other nations.

There is a wide diversity of opinion as to the cost to the United States Treasury if this bill becomes a law. It is the opinion of the committee reporting the bill that the cost will be merely nominal. I am inclined to agree with the committee, and believe the increased postal receipts will nearly if not entirely equal the subsidy granted by the bill. But supposing it does cost something, what of it? I, for one, am willing to vote to expend something in an attempt to put into American pockets some of the more than $200,000,000 our people are now paying every year in freight to foreign ships to transport our foreign trade.

And now who are opposing the passage of this bill? The opposition is almost exclusively confined to the Democratic side of this House. With great modesty I suggest that, with their usual fatalistic tendency, the leaders of that party are aligning their forces upon the wrong side of this question. Over and over again the national platforms of the Republican party have declared in favor of national aid to our merchant marine, and the American people have confided to the Republican party power and supremacy in the councils of our nation, with the expectation that this bill, or one drawn upon similar lines, will become a law for the building up of our merchant marine.

The protective tariff, as enacted and applied by the Republican party, has caused almost every other line of American industrial activity to go forward in such leaps and bounds as to be the envy of the nations and the wonder of the world. In my judgment, the pending bill is an attempt to apply the principle of protection to American shipping, so that eventually some appreciable part of American commerce shall be transported in American ships by American seamen and under the American flag.

In a speech delivered some years ago, and which is just as applicable to-day as then, Senator DEPEW declared:

> To-day the American makes the circuit of the globe. He sails into the harbors of Europe, of Asia, of Africa, and of South America amidst the abundant shipping which fills these ports. He passes upon the different seas the argosies of commerce, carrying the product of his own and other countries. The flags of all nations fly from the mastheads of these steamers except one. He sees nowhere the Stars and Stripes. He finds the merchants and the peoples of foreign lands familiar with every emblem but our own. If he wishes to address a letter home, it goes from South America through Liverpool, from China through London, from the East through the mails and under the flag of every country but his own. Under this bill as new lines are established between our ports and lands across the Atlantic or Pacific they must carry free American mail. With the enactment of this measure, five years will witness a wonderful change in the relation of the United States to ocean transportation. We can again proudly boast that our ships are on every sea, our flag in every port, and the name and fame of our country respected by all nations, and that the products and the goods of the United States are in successful competition in every market of the world with our rivals in production, trade, and manufacture.

Mr. MINOR. Mr. Chairman, I trust that order will be preserved as far as possible while I occupy the floor, because I find myself somewhat hampered by reason of a severe headache, and I want to speak in a tone of voice so that all may hear and yet not tax my physical powers too much.

Mr. Chairman, I support this bill not because I believe it is just such a bill as we should have, but I support it because it is the best we can get. I support it because, in my judgment, it is a step in the right direction. Had I possessed the power to legislate for the country I would have made a bill much broader in its provisions than the one before us now. I am a firm believer in the cargo subsidy, and for that I have worked the best I could, but all legislation, we are told, is the result of compromise, and in deference to that theory and accepting the judgment of those who are better able to judge than I, I give up my cargo idea and indorse this as coming the nearest to meeting my views of anything we could secure.

Mr. Chairman, there is absolutely nothing in the bill except the continuation of a policy which was adopted by Congress in 1891. We then enacted legislation that enabled the Postmaster-General to contract for the carrying of mail across the seas and to foreign countries. We subsidized or paid mail subvention to certain ships whose owners were willing to enter upon the service provided for by law. Unfortunately that subvention was too small for the legislation to accomplish all that its friends desired, and this is simply a continuation of the policy with more liberal or adequate pay for the service rendered. It has been charged throughout the length and breadth of this country, away from the seacoast, particularly in the Middle West and in the South, that we are endeavoring to put our hands into the Treasury and taking out money to pay for services not rendered, which statement we, who favor this bill, denounce as being absolutely without foundation in fact. We are simply asking that shipowners who enter into contracts with the Postmaster-General shall carry the mails as provided for at a certain rate of speed and at stated times and to receive therefor the stipulated amount provided in the contract, which may be awarded by the Postmaster-General as the bill provides.

Mr. Chairman, we are paying to-day $50,000,000 for the transportation of our mail by land. Is it right or is it wrong? If it is right to pay this vast sum of money for the rapid transportation of mail across the continent and to other points within the United States by rail on the land, why may we not with equal propriety and justice pay a reasonable sum for the transportation of mail by ships on the high seas? If it is wrong, then repeal your provisions in the postal mail law that provide for the payment of subsidies to railroads. If we are paying this vast sum to railroads for carrying mails across the continent, why do we do it if it is not for the reason that the American people demand the most expeditious transportation of their mails? They exact constant, frequent, and rapid communication one with the other, because the producer and the consumer by these rapid mails are brought in close touch with each other, and so we say the purchasers of our products in other countries should be reached by mail in the shortest time possible. We must find markets abroad for a part of our goods because the productive capacity of this country is so great that the least thing that might happen to interrupt the great wave of prosperity now running so high throughout the country under the splendid policies of the Republican party would compel us to look abroad for customers with whom we could place our surplus, and if we expect to find purchasers abroad we have got to be placed in close, frequent, and rapid communication with them. You can not expect to succeed where you are denied the advantages of rapid mail facilities that place you in close touch with the purchasers of your commodities.

In South America there are great opportunities for cultivating a demand for our products. Argentina alone has a foreign trade of $500,000,000 annually. Her wants can be supplied by us, her imports are largely what we produce and must find a market for. But, gentlemen, what is the situation? Unfortunately not one single American line plies between our ports and the ports of South America. Six or seven irregular foreign tramp ship lines, employing obsolete sailing tramp ships, are the only means by which we can reach that country direct, and it is a startling fact that if the chairman of this committee desired to go to Buenos Ayres rapidly and with some degree of comfort he would be compelled to take a ship in New York and go to Liverpool, across the Atlantic, and from Liverpool to take an English ship and recross the Atlantic and go to Buenos Ayres, thus crossing the Atlantic twice. Then our chairman, if he should undertake that trip, would reach Buenos Ayres far in advance of the fellow who left New York the same day on one of these slow foreign ships. And so it is with your mail. Those ships are making from 9 to 11 knots per hour and carrying your mail. This bill provides for 16 knots per

hour. If you desire to get a letter to Buenos Ayres quickly you must send it via Liverpool, England, across the Atlantic, and have it recross and go to Buenos Ayres, and you will get your answer much in advance of the communication between New York and Buenos Ayres by the present direct lines. So, I say, that if we expect to cultivate, to extend, to increase and build up American trade and increase the demand for American products we must place ourselves in closer communication and in more ready touch with those to whom we expect to sell our goods.

Mr. Chairman, I happened to be a member of the Merchant Marine Commission that traveled all over this country in 1904 taking testimony touching this vital question. We visited nearly every port in the United States, and at each one of these ports we invited all who wished to do so to come before us and testify, and the testimony taken at Cleveland alone was enough to convert any man, no matter what his prejudice might have been, against this proposed legislation. We were told by the president of one of the great industrial concerns of that city that they undertook to build up a trade in Argentina and other places in South America where there was great demand for their goods, but that it was absolutely impossible to do so. He said: "We can ship our products from this factory here in Cleveland without difficulty; we can lay them down at tide water regularly, but when we get to tidewater we must depend on a foreign ship to carry them to South America, and of all the ships trading to South America none, so far as we know, are equipped for the handling of heavy castings, heavy steel and iron machinery. They are not provided with powerful windlasses and winches and great purchase blocks, such as are necessary to enable them to handle this class of heavy freight, and the result is that that machinery lies at tide water waiting for a suitably equipped ship to come, and when the ship comes and takes it on board and it goes to its destination—frequently it reaches there after expiration of the contract providing it should be there—often with broken and lost parts. Thus our contract has been violated and we are liable to damages, and the result is that after several years of effort to build up that trade we have been compelled to abandon it to Europeans and other foreigners, when if we had been able to ship our goods in American ships with regular sailings we could have built up an immense trade."

Mr. Chairman, I want to refer for just a moment to the situation on the Great Lakes, because it has been my theory from beginning to end that if we do our duty toward the merchant marine engaged in foreign trade, we will thereby cheapen freight, and to illustrate my position I want to refer to the Great Lakes where I live. Well do I remember, Mr. Chairman, away back in 1858, prior to the war, when the largest cargo vessels on our lakes were what we called "canal sailing schooners," and the most that one of them could carry was twelve or fourteen thousand bushels of grain or 600 tons of coal.

These vessels sailed down to eastern ports with twelve or fourteen thousand bushels of grain and there loaded with coal for a return cargo, and on that freight, Mr. Chairman, the vessel received for the grain 16 to 20 cents a bushel and frequently 25 cents a bushel, and for coal back, $3 a ton. I have watched the progress and development of lake shipping from that time to this. We began immediately after the war, or about 1867, to build larger, and as we built larger vessels the freights went down. So it continued from decade to decade until to-day what do we find? We find the grandest ships that float upon the surface of the waters of the globe upon the Great Lakes—the most beautiful, the most useful for the purposes for which they were constructed that have been built anywhere under the sun. We find them to-day 600 feet long, 60 feet beam, and 35 feet in depth, capable of carrying 14,000 tons of coal or iron ore, and with our modern appliances we can load one of these monsters in two hours. We find them carrying 400,000 bushels of grain; and you can ship coal from Ohio ports to Duluth, a thousand miles away, for less money than it takes to move that same coal from the sidewalk into the basement of your home; and the ships that are now carrying grain for a cent and a quarter a bushel are making more money by reason of their increased carrying capacity and their modern economical power than they were when the ships were carrying 600 tons of coal each and transporting it at $3 per ton, although thousands of tons of coal are now carried at 30 cents per ton 1,000 miles. Mr. Chairman, last year through the "Soo" canals went 51,750,000 tons of freight, and down the Detroit River floated more than 70,000,000 tons. Ah, sir, 200 tons of freight pass the city of Detroit every minute in the hour and every hour in the day and every day in the month for eight months—and that means the season of navigation, and this freight was moved at the rate of eight-tenths of 1 mill per ton mile. Such a record was never before heard of in the world; and now I want to read a statement based upon official records which may be found in the War Department, made by William Livingston, the president of the Lake Carriers' Association, that may be new and possibly astonish some of the Members of this House, especially when it is known that this statement is based on the cheapest railway freights known, which are from 4 to 5 mills per ton mile.

Mr. Livingston says:

I am now in receipt of figures showing that the amount of saving in freight rates on Lake Superior alone during the year 1905 exceeded by $1,000,000 the entire amount appropriated by the United States Government for all the harbors and waterways on the Great Lakes above Niagara Falls from the formation of the Government up to the close of that year, and that the saving on Lake Superior commerce for the year 1906, just closed, exceeded by $13,000,000 the appropriations above Niagara Falls from the formation of the Government up to the close of 1906.

And, gentlemen, that is a copy of the official record that may be found at the War Department, submitted by the International Waterways Commission. If such things can be accomplished on the Great Lakes, why may we not with proper encouragement build larger ships for the foreign trade, equip them with more modern and economical machinery, plan our docks and our hoisting apparatus so that we may more expeditiously handle cargoes, and thereby cheapen the rate of freight across the Atlantic and the Pacific? Every dollar thus saved is a dollar added to the profits of the producers here at home. If we can do that, we have conferred a blessing upon the farmers, the producers, and the laboring men of this country. That has been my hope from the beginning, and that is why I have given to this measure all the consideration that I was capable of giving it for the past eight years. Another thing I want to say to you gentlemen from the Atlantic and Pacific coasts, who think perhaps we are but infants on the Lakes, that to-day on the Great Lakes floats more than one-third of all the registered and enrolled tonnage of the United States. If we can accomplish this much on the Great Lakes in such a comparatively short time, we have done a splendid work. We have brought the producer and consumer just that much closer together. It is but a few years ago that it cost the farmers of Iowa, Wisconsin, and eastern Nebraska 30 or 40 cents per bushel to get their grain to the consumer. To-day it is a cent and a quarter a bushel on wheat, so far as lake freight is concerned, and that means to the farmers of the Middle West much saved in transportation.

Mr. SULZER. Will the gentleman permit a question?

Mr. MINOR. Oh, surely.

Mr. SULZER. The ships on the Great Lakes are built there, are they not?

Mr. MINOR. Yes.

Mr. SULZER. You do not get any subsidy?

Mr. MINOR. No; but we get a better thing; we get protection by reason of the coastwise laws. [Applause on the Republican side.] And that is what I am coming to. Wherever an industry of this country has received the fostering care of protection as advocated and enunciated in Republican platforms and carried into effect by Republican Administrations that industry has prospered. [Cheers on the Republican side.] Ships flying the American flag engaged in the foreign trade are outside of the bulwark of protection, but are still under the old Democratic free-trade policy. What is the result? Gone, gone off the sea. The time was when we built ships for the world. The time was when we carried nearly all our commodities out and in——

Mr. SULZER. The gentleman does not contend that we have free ships now, does he? I would like to have the gentleman answer that question.

The CHAIRMAN. Does the gentleman yield?

Mr. MINOR. Surely. What is it?

Mr. SULZER. The gentleman does not contend that we have free ships now, does he?

Mr. MINOR. The gentleman does not contend that we have free ships, and, God being willing, he never will.

Mr. SULZER. Is the gentleman speaking for God?

Mr. MINOR. I am speaking for my people and my country, a thing that the Democratic party never did.

Mr. SULZER. I hardly think I would couple God with the Republican party.

Mr. MINOR. I hope, Mr. Chairman, that the gentleman will treat the matter a little more seriously. I know him; he is one of the best fellows on earth, but he is a Democrat, and an ardent member of his party; that means that he is opposed to every worthy and valuable thing on the face of the earth. [Applause.]

Mr. Chairman, up to 1861 we were carrying considerably more than two-thirds of the commerce in and out of this country. But in 1862, as a result of the war, 750,000 of American tonnage went out from under our flag, and we have never been able to

regain it. I know they talk about free ships. Free ships? Oh, Lord! The Democratic party is talking about free ships, free trade, and free silver, and we have been doing that for all these years and they have been rapidly losing their prestige with the American people till the places that knew them once shall know them no more forever. There is not a Democrat who served on the Merchant Marine Commission, and I believe not one now on the Committee on Merchant Marine and Fisheries, that to-day advocates the purchase of ships abroad free of duty. You can go over to England and buy them much cheaper—35 per cent cheaper—than you can purchase them here. Why? Because of the cost of labor employed in their shipyards. Where is the Democrat—let him rise if he is here—who desires that the American mechanic employed in the shipyards, the American laborer employed there, or the American labor employed in the great iron mines of the West or on the railroads shall have wages reduced to a level with foreign labor? Let him get up if that is his position, and if it is not his position and he is willing to admit that ships constructed in our yards cost from 30 to 35 per cent more than in England, then join with us and pass this bill.

Mr. GOULDEN. Will the gentleman permit an interruption?

Mr. MINOR. Surely.

Mr. GOULDEN. I would like to ask the gentleman why all the labor organizations in this country, and the Patrons of Husbandry, the Seamen's Union, in fact, all the labor organizations, are opposed to the bill?

Mr. MINOR. I want to say to the gentleman from New York, Mr. Chairman, that it is not true. The boiler makers, the riveters, and the iron-ship builders came before the committee in armies and advocated the passage of this bill in your presence.

Mr. GOULDEN. Will the gentleman allow me? I want to say that that was denied authoritatively by a telegram from the boiler makers' union and from the iron-ship builders' union. They had no authority to speak for them. You will remember it was denied by a telegram, and, authoritatively, by their president. Mr. Gompers also came before us and denied it absolutely and proved it to our entire satisfaction.

Mr. MINOR. To your satisfaction only. Mr. Chairman, it never has been successfully denied. Oh, they tried to make out that there was gross forgery. They tried to drag a certain gentleman in New York into the court, but when they got down to the facts and took the affidavits, they gave it up. The trouble is that the president of the Federation of Labor is opposed to this bill, or was opposed to it—I have not heard from him lately—because of the conscription clause, as he termed it, and gentlemen, unfortunately I believe for this country, he exercises too much control over 3,000,000 laboring men in the United States.

The so-called "conscription clause" never had any place in any bill. It could be found nowhere except in the minds of those who were opposing this legislation.

Mr. Gompers is not recognized as a broad-gauged American citizen. He is not a shipbuilder; he is a cigar maker by trade. He came before our committee and antagonized this bill in deference to the wishes of those of his order who belong to the seamen's union. The boiler makers' union, the riveters' union, the iron-ship builders' union came before our committee and urged the passage of this legislation. These men were of a high order of intelligence, fully as bright and respectable as the much-vaunted "boss." I call on every member of the Merchant Marine Committee on the majority side to correct me if I am not right. It is only a part of the Federation of Labor, under the whip and spur of its president, that opposes this bill. Why should they oppose it? They are organized for the upbuilding of the best interests of the laboring men of the country, and this bill not only touches the men in the shipyards on the coast, but it begins away up in the mines where they dig the ore from the ground. It begins in the woods where they fell the trees for the lumber. It continues along down our lakes and affects the vessels that carry the ore. It goes across to Pittsburg, and in the manufacturing plants of that city it reaches thousands of laboring men, all of whom will be benefited by this proposed legislation. Why oppose it? The opposition to this bill is grounded on misconception, false teaching, and demagogism. There is nothing in it.

Now, Mr. Chairman, on yesterday I was very much surprised to hear an eminent gentleman, for whom I entertain the highest opinion, get up on the Democratic side and say we were building more ships out of wood to-day than we ever built in the history of the country. I heard him say it, and for fear that I might be mistaken I went to the RECORD this morning and looked it up, and that was his language. Oh, I am sorry that any man who possesses intelligence enough to represent a constituency on this floor should make such a statement as that, so misleading; and it is statements of that character, made to the people in the Middle West, that has led our citizens so largely astray. What our people want is light on this subject, which is perhaps the hardest to understand of anything that has been presented to them in recent times; but when the light comes and they realize that this bill means the employment of thousands of laboring men, a demand for thousands of tons of material, and that it means an opportunity of sending our mails with dispatch, that it means the lading of those ships with American products, that it means the manning of those ships by Americans, that it means American men and American officers on American ships with American products and going abroad to find markets for the products of American farmers and laborers of our land, and that it means the flying of our flag at the masthead of additional American ships, I believe they will all support it. I want to correct the gentleman from Illinois [Mr. RAINEY], who said that we are building more ships now out of wood than ever before. I want to read an extract from the report of the Commissioner of Navigation. In the year 1855 the vessels built and documented in the United States aggregated 583,450 tons gross, of which 1,891 tons were metal and 581,659 tons were of wood.

[The time of Mr. MINOR having expired, Mr. GOULDEN yielded to him five minutes more.]

Mr. MINOR. In the year 1906 the vessels built and documented in the United States aggregated 418,745 tons gross, of which 297,000 were of metal, and only 121,000 tons were of wood. I infer that the gentleman from Illinois did not take the necessary time to inform himself thoroughly.

Mr. Chairman, there are practically no wooden vessels built for commercial purposes to-day. You can not point to them. The gentleman undoubtedly posted himself on this matter about as well as he did on the watchmaking business a short time ago.

Now, in closing, I want to say that when I see the Democratic party in the House lined up against a proposition as they are lined up against this, I do not hesitate in declaring my position. Everything they have touched in the past has gone to decay, and if they should ever have the opportunity to touch any American industry in the future it will go to decay. Democracy flourishes best when surrounded by wreck and ruin caused by its own misdirected policies that insure the decay of American industries.

Gentlemen, hark back to the last Presidential campaign; go back to the campaign between McKinley and Bryan; then go back to the time when you were shedding crocodile tears for fear of the passage of the Dingley tariff bill, that, as you said, would ruin the country and impoverish the people. Your love for us was then unceasing and boundless. We were urged to place ourselves in your fostering care, and we had your sympathies for fear we were going to disintegrate. But, thanks to the intelligence of the people and the Congress, God be blessed, the Republican party won at every point; this American Republic still lives and the flag flies over the most prosperous nation in all the world, made so by the brilliant policies of the Republican party. [Applause on the Republican side.]

The total registered and enrolled tonnage of the United States at the close of 1906 was as follows:

*Comparison of merchant marine of 1905 and 1906.*

| Classification. | 1905. | | 1906. | |
|---|---|---|---|---|
| | Number. | Gross tons. | Number. | Gross tons. |
| GEOGRAPHICAL DISTRIBUTION. | | | | |
| Atlantic and Gulf coasts | 17,357 | 3,396,452 | 17,477 | 3,427,046 |
| Porto Rico | 57 | 1,915 | 59 | 5,499 |
| Pacific coast | 2,674 | 793,088 | 2,787 | 817,572 |
| Hawaiian Islands | 56 | 28,622 | 49 | 22,463 |
| Northern lakes | 3,011 | 2,062,147 | 3,052 | 2,234,432 |
| Western rivers | 1,526 | 174,319 | 1,582 | 167,957 |
| Total | 24,681 | 6,456,543 | 25,006 | 6,674,969 |
| POWER AND MATERIAL. | | | | |
| Sail:[a] | | | | |
| Wood | 15,566 | 2,388,351 | 15,274 | 2,369,248 |
| Iron and steel | 218 | 326,698 | 232 | 330,434 |
| Total | 15,784 | 2,715,049 | 15,506 | 2,699,682 |

[a] Including canal boats and barges.

We have 6,674,969 tons of American shipping, of which amount 5,735,483 is under the coastwise laws and 939,486 tons in the foreign trade. The world's shipping at the close of 1904 amounted to 37,806,609 tons. England had at the close of the year 1904 approximately 11,000,000 tons, nearly all of which is available for the foreign trade.

We are paying to foreign ships each year for transporting our exports, imports, and passengers $200,000,000, all of which goes out of the country. At the present time foreign ships are carrying 90 per cent of our products and about the same per

cent of our imports. It is unfortunate that our people do not study this question more thoroughly. If they gave this subject more thought, they would be prepared to meet demagogues and false teachers, who are purposely or otherwise misleading the public, especially people of the Middle States.

Mr. Chairman, during the last campaign I heard a candidate in a public address say that ships on our Great Lakes did not need this kind of help, that they were in a flourishing condition, and that he was therefore opposed to this legislation. When men who assume to be competent and qualified to become Members of this House will ignorantly make a public statement of that character we should not wonder at the prejudice among our people against this bill. Let it be known once and for all time that all ships on the Great Lakes, all ships in the coasting trade on the Atlantic and Pacific, are excluded from this bill. No benefits of any kind are proposed by this bill for any ships except those contracted with by the Postmaster-General for carrying the mails, and they receive only the sums provided in the bill. And these steamships must carry the mails from ports in the United States to ports in foreign countries.

We have heard much about the cost of operating suitable ships for this service. Many Members of this House have fired their wads into this debate, each wad containing estimates of the cost of building and operating this class of vessels, and nearly every estimate is as wide of the mark as it well can be. I have taken some pains to get the true situation touching the engineer force, horsepower, coal consumption, and speed of a ship large enough and fast enough to meet the provisions of this bill. The *statement* which I shall include in my remarks was carefully prepared by two eminent engineers, who I believe are as good authority on this question as any in the United States. I refer to Capt. C. A. McAllister, engineer in chief of the Revenue-Cutter Service, and his able assistant, John Q. Walton, a chief engineer in the same Service. [Cheers on the Republican side.]

The statement above referred to is as follows:

The example taken is a medium-sized freight and passenger steamer of 10,000 tons register, fitted with twin-screw engines.

The relations between the speeds of the vessel and the corresponding horsepower required of the engines are plotted on a curve sheet, and shows the following results:

| Horsepower required for a speed of— | |
|---|---|
| 10 knots per hour | 2,100 |
| 12 knots per hour | 3,600 |
| 13 knots per hour | 4,600 |
| 14 knots per hour | 5,800 |
| 16 knots per hour | 8,600 |
| 18 knots per hour | 12,250 |
| 20 knots per hour | 16,800 |

The horsepower required for speeds not given in the above table may be read off the curve sheet. A glance at the curve shows at once the great increase in horsepower that is required to produce a small increase in speed after passing a speed of about 14 knots per hour.

The relations between the speeds of the vessel and the corresponding consumption of fuel in tons of coal per day are plotted on a curve sheet, and show the following results:

| Tons per day for a speed of— | |
|---|---|
| 10 knots per hour | 40 |
| 12 knots per hour | 67 |
| 13 knots per hour | 85 |
| 14 knots per hour | 109 |
| 16 knots per hour | 164 |
| 18 knots per hour | 233 |
| 20 knots per hour | 320 |

The consumption of fuel at speeds not given in the above table may be read off the curve sheet. A glance at the curve shows at once the great increase in the consumption of fuel required to produce a small increase in speed after passing a speed of about 14 knots per hour.

In this connection it is well to mention the fact that the consumption of fuel in tons per day is based on the presumption that the vessel has a clean bottom and clean boilers starting out on a voyage. After a few days the boiler connections, tubes, and funnels become dirty by reason of soot, etc., and then more coal would be required to produce the same speed, which, of course, would also be the case with a vessel which had not been recently docked and whose under-water body was foul with marine growths. As the above conditions usually exist, it is only fair to assume that the consumption of fuel would generally be greater and never less than that shown in the table.

The bunker capacity of a vessel making a voyage of fifteen days would have to be at least the number of tons shown in the following table, but in order to be on the safe side and have a reserve supply of coal in case of delays by storms, etc., this net capacity should be increased by 20 per cent at the very lowest.

| Tons for a speed of— | |
|---|---|
| 10 knots per hour | 600 |
| 12 knots per hour | 1,005 |
| 13 knots per hour | 1,275 |
| 14 knots per hour | 1,635 |
| 16 knots per hour | 2,460 |
| 18 knots per hour | 3,495 |
| 20 knots per hour | 4,800 |

The relations between the speeds of the vessel and the corresponding weight of machinery required, in tons of 2,240 pounds, are plotted on a curve sheet, and shows the following results:

| Tons for a speed of— | |
|---|---|
| 10 knots per hour | 383 |
| 12 knots per hour | 655 |
| 13 knots per hour | 840 |
| 14 knots per hour | 1,056 |
| 16 knots per hour | 1,566 |
| 18 knots per hour | 2,230 |
| 20 knots per hour | 3,060 |

Inspection of the curve shows at once the great increase in the weight of machinery required for a slight increase in the speed of the vessel after passing a speed of about 14 knots. This is due to the great increase in horsepower of engines and boiler power necessary to produce a high speed.

Crew required for engineer's department: One chief engineer, five assistant engineers, six oilers, three water tenders, two storekeepers. The above men should be carried in any case.

Allowing one fireman to each furnace in the boilers, which, when the watches are arranged four hours on and eight hours off, as is the custom, makes one fireman look out for three furnaces, and allowing one coal passer to every two firemen, we would have, in addition, the following fireroom force necessary for vessels of the various speeds:

| | |
|---|---|
| Firemen for a speed of 10 knots per hour | 12 |
| Coal passers for a speed of 10 knots per hour | 6 |
| Firemen for a speed of 12 knots per hour | 18 |
| Coal passers for a speed of 12 knots per hour | 9 |
| Firemen for a speed of 13 knots per hour | 21 |
| Coal passers for a speed of 13 knots per hour | 9 |
| Firemen for a speed of 14 knots per hour | 24 |
| Coal passers for a speed of 14 knots per hour | 12 |
| Firemen for a speed of 16 knots per hour | 36 |
| Coal passers for a speed of 16 knots per hour | 18 |
| Firemen for a speed of 18 knots per hour | 48 |
| Coal passers for a speed of 18 knots per hour | 24 |
| Firemen for a speed of 20 knots per hour | 66 |
| Coal passers for a speed of 20 knots per hour | 33 |

It is necessary to state that the number of men carried in the engineer's department of vessels varies with different lines, arrangement and type of boilers, etc., but the above table is based on an average example of a seagoing steamship in the merchant service.

Mr. GOULDEN. Mr. Chairman, I now yield thirty minutes to the gentleman from Michigan [Mr. TOWNSEND].

Mr. TOWNSEND. Mr. Chairman, I do not rise at this time with any hope that I can shed much light on this subject. I do speak to the question before the committee, however, because somehow or other I believe that I am not entirely alone in my lack of full knowledge on this subject, for it seems to me that for a question of so much importance there is the least absolutely reliable information upon it of any question that has ever been presented to the House since I have been a Member of it. I hesitate when I find that my ideas are different from very many men whose counsels I have been willing to adopt, men whose patriotism I do not question, who I believe are working for what they think is the best interest of our country. I think, however, as I said before, that this is a subject which has come to us in a peculiar and unusual manner. I have heard as a Member of this House that the Committee on the Merchant Marine and Fisheries had for some time been considering this question. I had supposed from what rumor had given out that an altogether different bill was to be reported from the one that is now before us. In fact, we have heard many rumors concerning that committee, and finally the result is the bill now before the committee, a bill, as I understand it, upon which there were never any hearings, and that of itself is a most marvelous thing, as it seems to me.

If it is an ex parte bill, a bill prepared in secret and not even in full committee, the proponents of it at least ought to present good and sufficient reasons, and those without reasonable doubt. Therefore, inasmuch as I have convictions on this subject and am looking for light upon it, I have seen fit to intrude upon the committee for a few moments for the purpose of asking some questions and making some suggestions.

As I understand it, the Congress has a right to legislate only as it enacts measures which are in the interest of the common good and the general welfare. However desirable the measure may be to any individual, it has no business before the Congress unless the ultimate end is to benefit all the people or a majority of them. I agree with all of the gentlemen on this side and on the other that it would be a most desirable thing to have our commerce extended, a most desirable thing for us as Americans that the Stars and Stripes should float at the mast of vessels in every port in the world; but unless they so put our flag over those ports or in those ports that the result is to bring benefit to the people it will be but something to contribute to our fancy and would hardly be worthy of the Congressional legislation. The flag is an emblem of all the people, and where it waves it should never suggest piracy or dishonor.

Now, what are the circumstances at present? Are the needs pressing? Are they so great that in this unusual manner we should present this bill and enact it into law, changing, I submit, somewhat, at least, the policy of this country. Do present conditions demand that we should proceed with this scheme at once on this large scale? There never was a time in the history of the country when our commerce was so congested at home. Why, from all over the land comes up to the Congress petitions asking us to do something to move the wheels of transportation in compliance with the needs of the people of the United States. Our railroad facilities, they tell us, are absolutely insufficient to meet the necessities of the case at home.

No man would consent at this time to Congress voting $4,000,000 for the purpose of building equipment for the railroads, and

yet I submit, gentlemen, it would be the height of wisdom as compared with the untried policy, so far as some of these things are concerned, of imposing upon the Treasury of the country the burden of $4,000,000 a year for doing something which is so little understood and about which there is so much uncertainty, and against which there is such widespread opposition.

I have read with a great deal of pleasure, a good deal of profit, and much respect the report of the great Secretary of State after he returned from South America; and, having such confidence in him as I have and believing that we owe a special duty to the countries of the Western Continent, I am in favor, and shall not oppose before this House, the proposition to extend new lines from the Atlantic and Pacific seaboards to the ports in South America.

I submit that there is a question whether, if we established a line along the Atlantic seaboard, we would not decrease our merchant marine by putting out of business possibly some of the coastwise vessels which ply along the coast, and besides there is no assurance, it seems to me, that we shall have any new ones built. No gentleman has proven that to me thus far who has spoken on this question, and I submit that declamation will not count alone. We must know for a fact whether new vessels will be built or not. It is stated that these oriental lines are not paying expenses now, and some most marvelous statements are presented to us through the mail of this House; presented, it seems to me, on the assumption that the Members of the House have not sufficient intelligence to even make computations after the figures have been given to them.

But the action of these companies themselves tells the story to the Congress whether they are profitable or not. On the 3d day of May, 1905, I was before the Senate Committee on Commerce at the time they were having hearings on the rate bill. At that meeting Mr. James J. Hill, the president of the Great Northern Railroad, was giving testimony. He made this statement, which is found in the printed record of those hearings, the second volume, on page 1493. He was being questioned by Senator FORAKER, of Ohio, and was asked a question which led up to this answer. Mr. Hill said, in substance:

> We carried 106 locomotives from Philadelphia to Yokohama for about the same price that another railroad [a southern railroad, as he called it] hauled 106 locomotives in the United States 500 miles.

He was then asked, "Were you getting too little, or the other fellow too much?" "Well," said Mr. Hill, "we were satisfied with what we were receiving."

He was shipping 106 locomotives from Philadelphia over to the Pacific coast and then on his vessels to Yokohama, and was satisfied with what he was getting. Now, if you build these lines, or if you grant this subsidy, doesn't it stand to reason, whatever gentlemen may say about it, that the vessels now in business there must either get subsidy or go out of business? No other line can compete with the one which receives this benefit. Therefore I say it seems to me we are taking the chances of putting these vessels out of business. I do not want to stand here in the House and harp on questions and make statements that might be branded perhaps as statements of a demagogue. I do not want to make an argument for the poor man as against the rich man or the rich man as against the poor man. We know no rich nor poor. I care not who grants the benefit if the people receive it. This is a plain business proposition—nothing more and nothing less. I do not care whether you call it Republican or Democratic. One gentleman on this side seems to fear something, and he denies it is Republican. Our friends on the other side deny that it is Democratic and charge it up as a Republican measure, and then the retort is made from this side that the Democratic Administrations in the past have been favorable to this kind of subsidy. I am not very particular as to whether it is Democratic or Republican. What I want you to show me is that we can go back to our constituents and give them good reasons for granting this almost $4,000,000 a year; that we shall be satisfied we are going to get results that will be beneficial to the people of the United States. It has not yet been clearly demonstrated to me, nor have I become convinced from what investigation I have been able to give the subject, that any subvention or mail subsidy which we may grant will result in great benefit to the people. The fact that we are growing, that we boast in this country of our ability as business men, of our wealth as a nation, of our genius as a people, it seems to me, should give us assurance that whenever the commerce of the country that seeks entry into another country is sufficiently large, this wealth and genius will be employed to furnish the means necessary to meet the commercial demands of the country. I believe that when the need becomes sufficient the ships will be forthcoming. I am perfectly willing, however, to try the subsidy for our South American ports. Let us begin on a small scale. Statements have been made here that our shipyards are already working overtime. They can not build all these imaginary ships at once, and by the time the next Congress meets, by another session, perhaps we will have more light on the subject. Let us be content at this time to pass a bill which shall grant some aid to some of the boats that shall sail into the southern seas, but the bill should be so amended as to provide that all contracts shall be let to the lowest bidder. Whatever gentlemen may say about it, I believe there is not a single thing in it that provides that the contract shall be let to the lowest bidder in letting these contracts. That certainly should be settled, it seems to me, if the measure shall pass.

In the course of this debate reference has been made to the representatives of "cornfields," as though it required less intelligence to represent such a constituency than some other. The gentleman, I am sure, meant no discourtesy, for his is a rural district; but it may be proper for me to say in this connection that from the cornfields must come not only the products which make ships necessary, but also the men who man and support them. Destroy your fields and every factory wheel stands still, every furnace fire goes out, every industry dies, and ships become useless things rotting at their wharves. [Applause.]

The cornfield districts are not for this measure. Does it lie with us to say they do not know what they want?

We can not afford to ignore any class of the people. My experience is that the farmers of this country come as near knowing what is right as gentlemen in the manufacturing districts, as far as that is concerned, and it has been the glory of the Republican policy, as I understand it, that all of the interests of the country have been subserved; subserved by granting such aid where it was necessary, as has spread out and taken in all of the people, either directly or indirectly. Now, if you will amend this bill so that it will simply grant a subsidy to the South American ports and stop there, well and good. Who has stood in his place here or who will stand here on this floor and tell us why they grant the specific amount of bounty in each one of these cases, why the $200,000, why the $600,000? Is there any testimony on the subject? Has anybody said that that was the amount that was necessary, or has some one guessed that we must have these amounts, and therefore they have been named in the bill? Have the gentlemen who hope to receive the benefits suggested the amounts?

I am informed that the information upon which gentlemen relied in drawing this bill was that obtained by the Commission. This information they had when the Senate bill was drawn, and yet the amounts in that measure were not the same as those in this one. In the latter they are increased. Why?

In fact, I hope some of the gentlemen who have advocated this measure will tell us how the committee, or the responsible part of the committee, came to the conclusion in regard to the particular figures put in it and the basis for such conclusion. Mr. Chairman, I did not expect to occupy over ten minutes and that is all I asked for, but I find I have intruded upon the committee longer than I expected. My suggestions may be of no avail, of no value to you. I have put them in the form of questions, in the form of statements, which I hope gentlemen will answer, not simply with assumptions, not with an appeal of oratory or to fancy, but simply give us the facts as to what is going to be accomplished. Does our country at the present time need this character of legislation, and if it does, will this measure supply that need? [Applause.]

Mr. GARDNER of Massachusetts. May I ask the gentleman a question?

Mr. TOWNSEND. Certainly.

Mr. GARDNER of Massachusetts. The gentleman has had a good deal of nautical experience? He knows this subject fairly well?

Mr. TOWNSEND. I will say the gentleman is more complimentary than correct about that.

Mr. GARDNER of Massachusetts. As his speech will unquestionably be circulated very largely in my district and in other maritime districts, I hope that when he corrects the proof he will refrain from speaking of the Stars and Stripes as "flying at the masthead of American ships." That is where we do not want the Stars and Stripes; we want them at the peak or over the taffrail. The national flag of the port of destination is carried at the masthead. If we wish to know the nationality of a vessel on the salt water—I can not speak for Michigan—we look at the peak on sailing vessels or at the taffrail on steamers. There is where we want to see the American flag. Far too often do we see it already at the masthead of foreign vessels. [Applause.]

Mr. TOWNSEND. I am very sorry I did not know we had such an authority in the Congress, or I certainly should have consulted it before making my remarks. As it is, no one, I

trust, has misunderstood me, and besides, I have afforded the gentleman from Massachusetts an opportunity to display his nautical wisdom on the floor and in the RECORD, and to me, a landlubber from Michigan, the Stars and Stripes mean the same whether on "peak" or mast. Mr. Chairman, I now yield back the remainder of my time. [Applause.]

The CHAIRMAN. The gentleman has had twenty minutes.

Mr. MINOR. If the other side does not wish to use any time just now, I yield to the gentleman from Washington [Mr. HUMPHREY] thirty minutes.

The CHAIRMAN. The gentleman from Washington [Mr. HUMPHREY] is recognized for thirty minutes.

Mr. HUMPHREY of Washington. Mr. Chairman, if I can have the attention of the gentleman from Michigan [Mr. TOWNSEND] who has just spoken, I shall attempt in the course of my remarks to answer a few questions which he has propounded to the House. As a member of the Committee on the Merchant Marine and Fisheries, I would have preferred that this bill should have gone much further than it does. In this I agree with my colleague [Mr. MINOR] who has just addressed the committee. There have been many statements made about this bill. Some of them have been absurd and some of them have been gross misstatements and some of them grotesque. The leader of the Democracy, in discussing it the other day, said that it was an extension of the protective system. That is true. That it was an extension of the "hothouse system" of the Republican party, as he is so fond of terming it. It is an extension of the protective system. We have tried the protective "hothouse" system of which he speaks.

We tried the Democratic system for four years, and looking back on those four years of idleness and hunger and rags, I think that the people of this country infinitely prefer the "hothouse" system of the Republican party to the "poorhouse" system of the Democratic party. [Applause on the Republican side.] Now, my distinguished friend from New York [Mr. GOULDEN], upon the committee, in speaking of this question yesterday, made the point against this bill that shipowners and shipbuilders and members of the Navy had been called upon to testify before our committee. I suppose if the minority upon this committee had had their way they would have called in cowboys and barbers to give testimony upon the question, and, judging from the speeches they have made, they must have gotten their information from some such source.

Mr. GOULDEN. Did not the minority of that committee have the right to do as the majority did and summon people there to give testimony upon this subject, if they thought it necessary, or if they thought the people wanted that information?

Mr. HUMPHREY of Washingon. You certainly did, and if you were not satisfied with the testimony the majority produced, why did you not bring other testimony? You admit you had the right.

Mr. GOULDEN. Mr. Chairman, it was too late. After we found that state of affairs, it was too late.

Mr. HUMPHREY of Washington. I never knew a man whom you beat in a case but when pressed into a hole made some excuse about not having had a fair opportunity.

Mr. POU. Mr. Chairman——

Mr. HUMPHREY of Washington. Mr. Chairman, I refuse to be interrupted any further at this time. Now, the gentleman from Michigan [Mr. TOWNSEND] in talking a few minutes ago said this was a new policy.

Mr. POU. The gentleman has made a statement I would like to qualify.

Mr. HUMPHREY of Washington. I yield, then, for a question.

Mr. POU. The gentleman has stated that the country tried the Democratic system for four years. I would like to inquire of the gentleman what four years they were that the country tried that system?

Mr. HUMPHREY of Washington. I did not think there was anybody in this country that could forget those four years, if they tried.

Mr. POU. The gentleman is evading the question. I would like to ask him what four years he refers to?

Mr. HUMPHREY of Washington. I mean the four years of starvation brought upon this country by the Administration of Grover Cleveland during the last four years he was in power.

Mr. POU. Does the gentleman mean to state that during these entire four years that laws passed by a Democratic Congress and a Democratic President were in force? Has the gentleman forgotten the fact that in 1892 or 1893 the laws passed by his own party were in force?

Mr. HUMPHREY of Washington. I have not forgotten the fact of the starvation period I went through under the Democratic Administration; I do not think that anyone else in this country has. [Cries of "Oh!" on the Democratic side.] I did not think that the gentlemen would still be groaning. I knew you were very sick at the time, but I thought you had by this time recovered to some extent. [Laughter.]

Now, then, replying to the gentleman from Michigan [Mr. TOWNSEND]. He said that this was an untried policy. I think the gentleman erred in that unintentionally. This is simply a continuation of the present policy as it exists to-day. It is simply an extension of the present law of 1891. He has propounded this other question, which is perfectly proper and legitimate, and that is, If this law is enacted will it build any ships? My answer to that question is that any ship that may run upon the Atlantic Ocean will have to be constructed. Upon the Pacific Ocean, if the Harriman line and Mr. Hill's line could take advantage of it—the Harriman line can; Mr. Hill's vessels can not—there would be upon the Pacific Ocean several vessels that could take advantage of the law, but outside of these there would be new vessels constructed upon the Pacific Ocean. There would only have to be two new vessels for the Australian line, there would have to be two new vessels for the Pacific Mail Line, and upon the line from Puget Sound there would have to be seven vessels, all of them new.

Mr. WILSON. Why is it that Mr. Hill's line could not take advantage of the subsidy?

Mr. HUMPHREY of Washington. The reason of it is because the ships are not fast enough. Before I get through I hope to be able to refer to the lines upon the Pacific coast, and I wish to answer the charge that has been made here that this bill is drawn in the interest of Mr. Harriman and Mr. Hill. I suppose that I am responsible more than any other one man for that item going into the bill that makes it imperative that one line shall go from the north and one from the south port of this coast. And I put it in there knowingly and deliberately, and I have no reason to attempt to conceal my purpose, and I will take pleasure in explaining to the House when I come to that point why I did it.

And, further than this, I want to make this assertion here and now, that Mr. Hill and Mr. Harriman are not in favor of these lines. If the hand of Mr. Harriman is here in this House now, it is over here on the Democratic side, trying to defeat these lines because Mr. Harriman wants them defeated. And the reason of that is plain. It is because Mr. Harriman has said—and I challenge any man to dispute it—that he will not take advantage of this subsidy, and the reason for it is easy to understand. He can not do it because he will have to change his crews; he will have to run upon regular schedules; he will have to go to the Philippines; and his manager has been before our committee and shown that it was utterly impossible for him to take advantage of this subsidy.

Now, that being true, do you suppose that Mr. Harriman wants another line subsidized to compete with his line? I challenge any man on this floor to show one word of evidence that Mr. Harriman favors this bill.

Mr. GRONNA. May I ask the gentleman one question?

Mr. HUMPHREY of Washington. Yes, sir.

Mr. GRONNA. Will the gentleman tell us why Mr. Harriman can not take advantage of this?

Mr. HUMPHREY of Washington. I have just explained that, but I will explain it again for the benefit of the gentleman; but I can not let him take up too much of my time.

The reason why Mr. Harriman can not take advantage of this subsidy is this: It will compel him to carry a certain proportion of American citizens as crews. He now carries Chinese crews. It will compel him to run to the Philippine Islands. Now he only runs to Japan and China.

Mr. GRONNA. Is it not possible for Mr. Harriman to build new boats and to ship American crews and take advantage of this subsidy?

Mr. HUMPHREY of Washington. It would be possible for him to do so, but not at the amount that is now provided. The gentleman from Michigan [Mr. TOWNSEND] asked how these sums were fixed.

Mr. TOWNSEND. May I ask you a question before you leave that subject?

Mr. HUMPHREY of Washington. Yes.

Mr. SULLIVAN. Will the gentleman yield for a question?

Mr. HUMPHREY of Washington. I have already yielded to the gentleman from Michigan.

Mr. TOWNSEND. I understood the gentleman to state that he was responsible for the line from Puget Sound being placed in the bill.

Mr. HUMPHREY of Washington. No; I did not say I was responsible for that line. I said I was responsible, I supposed,

for that item in the bill that made it impossible for both Pacific lines to run from the same port, either from San Francisco or Puget Sound.

Mr. TOWNSEND. You were working to get one line from the north.

Mr. HUMPHREY of Washington. I was not working to get one line from the north, if we did not get one from San Francisco. We are a thousand miles nearer the Orient than San Francisco, and we could certainly take our chances on getting a line. I will tell you why I wanted one line from San Francisco. Because if both lines went from Puget Sound we would have none of our ships running via Hawaii, and I believe that this country ought to have its own means of communication with its own possessions, and that was the reason why I favored one line going from San Francisco.

Mr. TOWNSEND. I do not think the gentleman will charge me with being impertinent, but I should like to ask——

Mr. HUMPHREY of Washington. There was some insinuation, though, in the gentleman's question.

Mr. TOWNSEND. I did not mean that, but what I wanted to know was if the gentleman would have voted for this bill if route No. 6, or the route at the north, whatever the number of it is, had been left out?

Mr. HUMPHREY of Washington. Why am I called upon to answer that question? The question is whether that line should be there, not whether I would vote for it. I am surprised at the gentleman standing up here a few moments ago and saying that he did not want to send out anything over the country that looked like he was playing the demagogue, and then have him two minutes afterwards ask me such a question as this. [Applause.]

Mr. TOWNSEND. I wanted to say to the gentleman that he invited that, because he brought it up. He did discuss on the floor here the action of the committee, and I have been informed—now the gentleman has brought it out—that the committee did not want to report this line in connection with the Northern Pacific Railroad Company, but was obliged to do it in order to get the measure reported out.

Mr. HUMPHREY of Washington. I do not know where you got your information, but I am perfectly free to state that I would not vote to report a bill to this House that provided for no lines to run to the Philippines. That is what I said, and there is where I stand to-day. We have only two vessels now running to the Philippines flying the American flag. Three disappeared within the last thirty days, and I said, and I say now, that I would not vote to report any bill that would not provide for our own flag to go to the Philippines, and, further than that, I will tell you why. That is what the Democratic party is trying to do now, to keep us from having communication with the Philippines in order to bring disgrace upon our administration of those islands. The Democratic party would like to see us lose the islands. They hope to make us so helpless on the Pacific that Japan will attack us, and then they hope to ride into power over their country's disgrace. [Derisive laughter on the Democratic side.]

Mr. SULLIVAN. Will the gentleman yield?

Mr. HUMPHREY of Washington. No; I will not yield.

Mr. SULLIVAN. You have made a very serious charge about this side of the House. I should like to ask you to submit a particle of evidence upon which that charge is based, that Harriman's hand is felt on this side of the House. Either prove it or withdraw it. [Applause on the Democratic side.]

Mr. HUMPHREY of Washington. I refer to the action of gentlemen themselves. If it is not true, it will not hurt them.

Mr. WACHTER. It is the gentleman's opinion?

Mr. HUMPHREY of Washington. On that side of the House several gentlemen made speeches and said this bill was brought in here for the benefit of Harriman and Hill. I deny that that is true; and whether the Democratic party is doing it knowingly or not I do not charge, but they are doing what Mr. Harriman desires, for Mr. Harriman is opposed to these lines being established on the Pacific, and Mr. Hill has never made any statement upon the question. I challenge any man upon the floor to dispute these statements.

Mr. SULLIVAN. Does it follow, because Mr. Harriman is opposed to it, that the Democrats are influenced by Harriman?

Mr. HUMPHREY of Washington. I did not say that.

Mr. SULLIVAN. You did say that this side of the House was under the hand of Harriman. If you have not more proof of that proposition than you have of the proposition that we are trying to create a war with Japan, we will let both of your statements go to the country and let the country judge of the value of your testimony.

Mr. HUMPHREY of Washington. I am perfectly willing to let my testimony line up by the side of that of the gentleman from Massachusetts.

Mr. SULLIVAN. And so is the gentleman from Massachusetts.

Mr. HUMPHREY of Washington. Now, the gentleman from Michigan [Mr. TOWNSEND] a while ago, in speaking upon this subject, wanted to know whether or not there was any present necessity for this bill. I was a member of the Merchant Marine Commission that went throughout this country getting testimony upon this question. Let me state to the committee the conditions prevailing to-day, and let them judge if there is necessity for present action by Congress.

CONDITION OF OUR MERCHANT MARINE.

The foreign trade of this country for the year 1906 will approximate $3,000,000,000, the largest ever done by any nation in all the history of the race. The balance in our favor will approximate $500,000,000, a sum never before approached on the balance sheet of nations. Of this vast commerce, the greatest the world has ever known, only about 7 per cent was carried in American ships. Our flag is disappearing from the sea. It has become but a memory in most of the ports of the world. You may sail the circle of the globe without seeing the Stars and Stripes except upon a private yacht or a vessel of war.

A half million dollars per day is paid to foreign ships by this nation for carrying our commerce. Ninety per cent of this great sum is paid to foreign labor for work that could be done by American labor. To-day, with all our vast wealth, our unlimited resources, our mighty commerce, we have 108,000 less tons of shipping engaged in our over-sea commerce than we had ninety-five years ago, in the early infancy of the Republic. Only in one port in the United States is a greater tonnage of our foreign trade carried in American vessels than in foreign vessels, and that is Puget Sound, the extreme northwest port of the country.

We are spending millions each year in the construction of naval vessels, and when finished we will have no men to man them. We have vessels of war to-day that we can not furnish with competent crews. We have no auxiliary for our Navy and no transports for our Army.

Only two American vessels to-day go regularly to the Philippines, and these vessels are slow and only 10,000 tons each, and even this shadow of a line, that remains only to shame us, is soon to be discontinued unless help comes. Up until recently twelve vessels went to the Orient. These twelve vessels were the only unsubsidized American vessels that carried our flag. They run in direct competition with heavily subsidized foreign lines. Within the last few days three of these vessels have given up the unequal struggle and have gone into the coastwise trade. Only nine vessels to-day unaided carry the Stars and Stripes, and all these are on the Pacific. Even the supplies for our little army in the Philippines must soon go under another flag. We are spending millions to improve our harbors to accommodate foreign ships. We are spending millions to build the isthmian canal, and when finished it will be traversed almost entirely by the ships of other nations. We are contributing to the naval strength of other nations, building foreign navies, and training foreign seamen that in time of war may be used against us. Our trade is at the mercy of foreign combines that discriminate against us. We are not getting our fair share of the rapidly developing trade in South America and the Orient. Foreign ship trusts and combines are preying upon our commerce. They have largely increased freight rates, in some instances more than 400 per cent.

Such are some of the humiliating and discreditable conditions which the committee found that have this bill in charge, and it was with the sincere hope that this bill would to some extent remedy these alarming conditions and would be the beginning for the complete remedying of them that this bill was reported. We believed there was great necessity for immediate action.

What has brought us to these conditions? This question can be answered in a single sentence: Higher wages paid in this country and the subsidies paid by other countries. This tells the whole story. It costs from 40 to 100 per cent more to build a ship in this country than to build it in a foreign country. It costs from 20 to 30 per cent more to operate an American ship than a foreign ship. This additional cost in construction and in operation is almost entirely due to the high price of labor in this country. In addition to the increased labor cost in this country, the American ship is handicapped by the payment of heavy subsidies by foreign nations. There is not a first-class foreign vessel in the world to-day engaged in the deep-sea commerce that does not directly or indirectly receive a subsidy.

FREE SHIPS.

The minority, in their report, have admitted the conditions which I have described, but they have not attempted to give a remedy. They do make some suggestions and intimations as to what would possibly remedy these conditions. They advocate free ships. A free-ship policy in this country would not be of any effect.

Free ships would not solve the problem. If American lines were given ships, they could not operate them at a profit. To remove the tariff from the material used in building ships would not help the situation, for shipbuilding material used in building ships for the foreign trade is now and for fifteen years has been upon the free list. The only free thing that would solve the problem is free labor. Remove the barrier that prevents the employment of the cheap labor of foreign countries and the American ship can run in spite of foreign subsidies. The mighty, insurmountable obstacle under present conditions to the American ship is the price of labor—the labor that builds the ship and the labor that operates the ship. Then the proposition is this: We must pay the difference in labor to the shipowner or we must reduce the price of labor or we must abandon the field to the foreigner. I do not hesitate to say which of the three propositions I will support, and I challenge any man on this floor to advocate either of the other alternatives. [Applause.]

When the Merchant Marine Commission was having its hearings practically every vessel owner and shipping man in the United States was asked the question, "If given the opportunity, would you buy a foreign ship and run it in the deep-sea trade?" Not one was found that stated he would try the experiment. In many places we saw splendid vessels suitable for the foreign trade swinging at anchor, driven out of business by the subsidized ships of other nations. If the American owner can not run at profit the vessel he already owns, certainly the most stupid would not contend that he would buy and run another, however low the purchase price might be. No advocate of free ships can name a single reputable man in America, who, under the present conditions, would try the experiment. We have in this country to-day practically free ships. Any man in America can buy a foreign ship and get the American flag to run it in the foreign trade. It has not been two weeks since our committee unanimously reported a bill of that character. Ever since I have been on the Merchant Marine Committee this has been the policy of that committee. Every shipowner in America knows that this is true. This is the free-ship policy, but none has ever taken advantage of the opportunity. No man who has studied the situation to-day seriously advocates free ships.

DISCRIMINATING DUTIES.

The minority also speaks of discriminating duties. Discriminating duties have been advocated by some as a remedy. It is entirely safe to use the past tense in speaking of this remedy, for I know of no one who advocates it to-day. The first obstacle that we meet in the way of discriminating duties is more than thirty treaties with foreign nations in which we agree not to do it. It is true that these treaties provide that upon due notice by either party they may be abrogated. But this might involve us in a contest of retaliation. Still, I do not agree with the distinguished Secretary of State that this is the main obstacle in the way of adopting the plan of discriminating duties. I do not have the fear of retaliation that seems to possess many. I believe that in any commercial war we can take care of ourselves.

If it would be to the interests of this country to have discriminating duties, then I would unhesitatingly advocate the abrogation of all these treaties regardless of what other nations might do. I believe it would be our duty to do it; but my opposition to discriminating duties is because it would be utterly futile. The only way to make discriminating duties effective would be to place a duty on the articles now free. This proposition, as every man in this House knows, is utterly impossible. Most of the articles on the free list are noncompeting articles. To lay a tariff on these articles has always been opposed to the policy of protection of the Republican party, except in time of war, and then only for the purpose of revenue. Of course, the Democratic party, true to the doctrines of free trade, would not consent to a duty on articles already free. To place a duty on the free list as it exists to-day would violate the traditions of both the great parties. We can not, of course, place a duty upon exports, as some have advocated, for this is prohibited by the Constitution. A discriminating duty as the tariff now stands would be utterly useless—that is, to reduce the tariff on articles now protected—and especially would this be true in the trade which we most desire, the trade with South America and with the Orient. Forty-seven per cent of our imports are now on the free list, and from the Orient and South America a much larger per cent. Take one illustration. A discriminating duty of 10 per cent upon the imports into Puget Sound would give to a vessel of 10,000 tons an average of about $70 for a 12,000-mile voyage. A Japanese steamer or a British steamer of the same capacity would receive for the same trip more than $50,000. Certainly no further evidence is needed than this one illustration to demonstrate the futility of discriminating duties. Even if we could so arrange discriminating duties as to be effective it would only be accomplishing indirectly what could be done directly by the payment of subsidies. Discriminating duties, even if they could be made effective, are wrong in principle. What we desire is to encourage exports, not imports; selling, not buying. What we desire is to make a market for the products of this country, and not to make this country a market for the products of others. [Applause.]

ATTITUDE OF LABOR.

In the minority report it is claimed that organized labor is opposed to this bill. I do not believe it. Hundreds of petitions received from various labor organizations throughout the country demonstrate that it is not true. Practically all of the opposition to this bill from organized labor has come from the president of one union, and that union has a membership that is composed of nine foreigners for every American. The only thing American about the president of that organization are his naturalization papers. For political purposes this organization is the personal property of its president. His opposition to the bill may be stated in a single sentence: His organization being composed almost entirely of foreigners, can not share in the premiums offered by the bill to American boys to enroll in the naval reserves. From their standpoint, the opposition of this organization composed of foreigners is justified. They object to the advantage given to the American sailor. This bill is not popular with foreigners—either foreign shipowners or foreign sailors. I deny most emphatically that the labor organizations of this country are in harmony with this union of foreigners. The laboring class of this country is more deeply and directly affected by this bill than any other. To-day we pay every twenty-four hours $600,000 to labor for carrying our own foreign commerce. Of this vast amount less than $50,000 are paid to American labor and more than $500,000 are paid to foreign labor. This bill will keep at home a larger and a fairer share of that vast sum and give it to the labor of this country. This bill will create and increase foreign markets for our products, and every time we sell abroad $1,000 worth of American products it puts $900 into the pockets of the men who work in this country. This bill would cause new ships to be constructed that would give employment to thousands of American workmen in our shipyards—employment, if this bill does not pass, that will go to the workmen of other countries. If we were to build our own ships and carry our own commerce, it is a low estimate to say that it would give investment to $700,000,000 of capital and work to 500,000 men. These men would earn more than $1,000,000 each day.

Is it to be doubted that the intelligent laboring men of this country are in favor of a policy that promises such tremendous results? But these results, great as they are, are only the direct benefit to labor. The indirect benefits can not be calculated. It reaches every industry. Labor must fell the trees; it must manufacture the lumber; it must take from the earth the coal and the iron for the furnaces and forges; it must transport the products of the forest, of the mill, and the mine to the shipyard. Labor must fashion and operate the great ships that will carry our products over the seas, and all these countless toilers must be fed and clothed by the farmer. Labor of every class and of every section of our country will feel the benefit of this bill. If we were to carry our own commerce, the vast sum that it would keep at home and give to our own people that now is sent abroad would quicken the pulse of every industry in all this vast country of ours. The labor of this country is not opposed to a law that will cause the American workman, at American wages, to build American ships for American commerce in American yards. [Applause.] American labor is not opposed to a bill that will rehabilitate our own almost destroyed industry, that will brush away the dust of idleness in our shipyards, that will cause the ringing of hammers, the hum of machinery in the shipyards of this country instead of in the shipyards of Europe. American labor is not opposed to a bill that will increase the markets for products fashioned by the hand and brain of the American toiler. Labor is not opposed to a measure that, if carried out fully, would give to American labor a million dollars each day that now goes to foreign labor. Labor is not opposed to a measure that will give more work and higher wages to thousands in this country who earn their daily bread by honest toil. And all the loud-mouthed demagogues that go up and down

the land exercising their lungs pretending to represent them in order to add to their own notoriety and increase their unearned salary can not make the intelligence of this country believe it. [Applause.]

When the laboring men of this country understand that every twenty-four hours they have been deprived by our stupidity of a million dollars in work and a million dollars in wages that is taken from them and given to those who owe allegiance to another flag, it will require more than a free-trade sermon or a denunciation of "subsidy" to convince them that we have honestly and intelligently performed our duty. That class who in the sweat of their brow eat bread is more interested in having this bill enacted into law than any other. Of the countless millions that this bill will keep at home that now goes abroad, more than 90 per cent of the vast sum will go directly into the hands of labor. The passage of this bill concerns directly the fireside of every toiler beneath our flag. We are committing a crime against labor when we permit our work to be done by any other. It may be the crime of ignorance, but the result is the same. The workman may not know that he is robbed, but that does not lessen his burden. It is one of the highest duties of government to first care for its own, to give its work and its wages to its own, to those who support it, to those who pay the taxes, to those who, in time of need, will take up the musket and defend it. [Applause.] This doctrine has ever been the corner stone of Republican faith. We have been true to this faith on land; we have failed to keep it on the sea. On the land we have had Republicanism, protection, progress, and prosperity; on the land we stand supreme. On the ocean we have Democracy, free trade, disaster, and defeat; on the ocean we have recorded our only failure.

WILL THE BILL BE EFFECTIVE?

The question often propounded by many who are in favor of doing something to rehabilitate our merchant marine is, Will this bill be efficient? So far as it goes, I do not hesitate to say that in my judgment it will.

At the hearings before our Commission most of the leading shipping men of the country and all those who contemplate constructing lines to take advantage of the provisions of this bill appeared before us. It was stated by these gentlemen that the sums specified were sufficient; that this bill would accomplish its purpose. Not only the weight of the evidence, but all the competent evidence was to that effect. That the lines contemplated by the bill will be undertaken I entertain no doubt.

This further question has been asked: Will not foreign nations increase their subsidies so as to make any we may give ineffectual? Of course it is impossible to demonstrate mathematically what foreign nations may do. But this we do know, that there is at present keen competition between the other nations in the payment of subsidies and it is reasonable to presume from this competition that they are paying about all that traffic will bear. Another evidence to this effect is that they are so ready to combine to discriminate against us by raising freights. In order to keep the equation as it is now the various subsidy nations, in case we pass the bill, would have to double their pay. I do not believe that so great a subsidy would be profitable. If it would, then their present profits must be enormous. I do not think that all the subsidy-paying countries have the financial resources to pay double what they are now doing. It is claimed even now—a claim which I do not, however, believe—that foreign ships are carrying at a loss. The best evidence obtainable from all sources, and especially from our foreign consuls, indicates that the foreign nations can not materially increase their present subsidies. Even if they did so increase their subsidies as to prevent us from carrying any great portion of our commerce, as a means of defense, as an auxiliary to our Army and Navy we would have our vessels. This would be true even if they had to run entirely empty. But they would not run empty, and an increase of subsidies by foreign nations would inevitably result in a decreasing of freight rates, and as we have more to carry than any other nation, we would be more greatly benefited by such reduction than any other nation.

So our investment in shipping in any event would bring some return so long as they continue to run, as a support to our Navy and by reduction in freights, even if we do not increase the sale of our exports. If another nation should increase their subsidy so that our merchant marine was only temporary, then the payment of the subsidy by us would be only temporary, for it must not be forgotten that the services must first be had and performed, that the Government must first have value received, before any money is paid, and when the service ends the payment ends. In any event there is no possibility of the Government losing, and as the shipowner is willing to take his chances, why should we hesitate? But there is another and larger answer to the argument that the foreigner will increase his subsidy to keep our ships from the sea. We are the wealthiest nation of the earth; we can pay subsidies with a less burden than any other nation. We have more to sell than any other nation; consequently are more interested in getting to foreign markets than any other nation. We can pay more for them than any other nation. From a commercial standpoint we certainly can bid against the world for the trade of the world. From the standpoint of protection we certainly would not admit that the expenditure of money would prevent us from having what safety and honor demands. When we consider our great wealth, our ability to pay, our interests to protect, no American will argue that it is not worth as much to us to have our ships on the ocean as it is worth to any other nation to keep them off the ocean. The pride, the patriotism, the honor, and the safety of the Republic imperatively demand that, whatever the cost may be, no power shall drive our flag from the sea. [Applause.]

MAIL LINES AND TRADE DEVELOPMENT.

The great purpose, the primal object of this bill, is to increase our commerce, to increase the markets for the products of the mine, the forest, the field, and the factory. From our consuls in every country comes the one universal declaration that what we need to develop our trade is direct and regular lines of communication—lines of communication that are not controlled by our competitors, lines that will not give rebates and lower rates to our rivals, lines that will not discriminate against American products, lines of our own ships.

Every American ship that touches a foreign shore is an advertisement of this country. It is an educator; it increases our prestige and our trade. It has often been said that there is no sentiment in trade. This is not far from the truth, but every steamship line favors its own country. It advocates its own products. Every American line must establish American houses and American agencies. This is not sentiment. This is selfishness.

This is the great commercial age of the world. The great contest of nations to-day is not one of arms, but of trade. We might just as well talk about conquering foreign countries by employing foreign navies and foreign armies as to talk of conquering foreign markets by foreign agents, foreign representatives, and foreign ships. The world furnishes no example of a nation expanding her foreign trade by the use of foreign ships. Human selfishness makes this impossible and absurd. You can no more buy patriotism in trade relations in time of peace than you can buy it in time of war. If we are to win the great battle of commercial supremacy we must, as in a contest of arms, use our own weapons, employ our own citizens, and do it under our own flag. [Applause.]

Will this bill, if written upon our statute books, develop our foreign markets? The best evidence of what regular lines of steamships will do in the future is the record of what they have done in the past. That regular lines will develop our markets I have no doubt, and in support of that proposition I ask consideration of the following facts:

Germany, in 1886, established a steamship line to the East Indies. In two years the export trade done by these ships was 27,369 tons; in eight years this trade had increased to 89,148 tons. So well satisfied was Germany with the East India line that in 1890 she subsidized another line running to East Africa. The receipts of this line increased from 453,000 marks in 1892 to 1,476,000 marks in 1898, and in 1898, so satisfactory had been the growth of each of these lines, that the subventions of both were increased and renewed for a period of fifteen years. The tonnage of Japan, under a tremendous subsidy both for construction and operation, has increased from 200,000 tons in 1896 to 1,000,000 tons in 1906. Her commerce has increased in the same time from $153,000,000 to $400,000,000 in 1906. Her commerce has increased in exact proportion and in harmony with her building of ships. The experience of Japan and Germany has been the universal experience of all commercial nations. But the United States does not have to depend entirely upon the experience of other nations. We have had some experience with subsidized lines. A line of subsidized ships runs from San Francisco to Australasia. Our trade with the countries touched by this line has increased from $12,500,000 in 1896 to $43,000,000 in 1906. The foreign trade of Puget Sound in 1900 was approximately $20,000,000. In 1906 it was more than $66,000,000, and this great increase was almost wholly due to the American ships running between Seattle and the Orient. We have an American line running to Cuba, and our trade has increased from $57,884,000 in 1900 to $124,684,000 in 1905. We have our own ships to Colombia, and our trade has increased with that country from $7,017,000 in 1900 to $9,993,000 in 1905. To both Mexico and Canada we have American means of transportation. Our trade with Mexico has increased from $63,620,000 in 1900

to $92,226,000 in 1905. Our trade with Canada has increased from $51,000,000 in 1895 to $161,000,000 in 1903.

In each and in all of these cases our increase in trade was very largely due to the fact of our having our own means of carrying our products to these different countries. To-day we have no line of American steamships running from the United States to Brazil. Our export trade with that country has decreased from $15,000,000 in 1895 to $10,000,000 in 1903. The time was when there were American business houses in South America, in India, and in China. Then we had ships that sailed to those countries. When the American ship disappeared the American business houses vanished and American trade decreased. History demonstrates that as a nation's merchant marine increases so her commerce expands. The experience of our own country and of all other nations demonstrates that trade does follow the flag. Wherever our flag has gone our trade has increased. Whenever it has retired our trade has diminished.

In view of these facts, who can doubt the wisdom of the words of McKinley in his last speech, when he said:

> One of the needs of the times is direct commercial lines from our vast fields of production to the fields of consumption that we have but barely touched. Next in importance to having the thing to sell is to have the convenience to carry it to the buyer. We must encourage our merchant marine. We must have more ships; they must be under the American flag, built and manned and owned by Americans. [Applause.]

CAN THE FOREIGNER DO OUR CARRYING MORE CHEAPLY?

The argument most used by those opposed to a subsidy is that if the foreigner is carrying our trade for less than we can do it ourselves, then it is distinctly to our advantage to permit him to do it. With this contention I can not agree. I do not believe that any work that can be done by American labor should be given to foreign labor. If the foreigners would do our work for nothing, it would be so costly that the adoption of such a policy would soon destroy our nation. Foreign labor is dangerously dear at any price. What more justification can there be in employing foreign labor in carrying our commerce than there would be to employ foreign labor to produce our manufactured articles?

If we shall subscribe to the doctrine that we shall employ foreign labor to do whatever it will do cheaper than American labor, then the foreigner will do entirely the work for this nation. If we adopt this policy, the foreigner will do all the work on the farm, in the factory, in the mine, for less than American labor. Would it be a good thing for the country to permit this to be done? If it is a good thing, a profitable thing, a patriotic thing, to employ the foreigner to carry our commerce because he will do it for less than American labor, then why would it not be a profitable thing and a patriotic thing to employ him to do all of our work? If this doctrine be true, then we should lose no time in changing our exclusion laws. Across the Pacific are countless millions of patient, honest, industrious, capable toilers to whom it would be the highest blessing that this world can bestow to give to them the opportunity to come here and do our work for a small fraction of the price that is now paid to American labor for doing it. And while this Oriental laborer is doing it he will at least spend a little of his wages in this country. We will at least sell him something. Not all of his money will go to foreign lands. But the foreigner who is now paid to do our shipping does not leave any of the money in this country. Of the half a million of dollars each day paid to foreign labor to carry our commerce, scarcely enough to buy a loaf of bread is again spent in the country that pays it. The foreigner that gets this vast sum, a half a million dollars each day, we do not feed, we do not clothe, we do not shelter. He pays no taxes in this country; he owes no allegiance to our flag. All of his money is given to other countries. No man in this House dare advocate for any other industry the doctrine of "cheapest" labor. The difference to-day in the cost in almost every line of human endeavor in this country and abroad is the exact difference in the price of labor at home and abroad.

The exact difference in the cost of carrying American commerce in American and in foreign ships is the difference paid to American labor and foreign labor, and this difference is the sole thing that has destroyed the American merchant marine. The difference between the price for which the foreigner can do our carrying and the price for which American ships can do it is the difference between the wage scale and the bill of fare on the American ship and on the foreign ship.

Whatever the difference in cost may be, I believe that it is infinitely better for our country that our commerce should be carried in American ships, that our employment should be given to American labor. But I do not believe that the foreigner can do our carrying for less than we can do it ourselves. I do not believe that he can do it as cheaply. This argument that is now advanced against subsidy has been advanced against the protective system, has been advanced against placing a tariff upon every article now upon our schedule. This argument that a subsidy or the protective tariff, the same thing by a different name, will increase the price of the product, and that the advantage goes to the capitalist, and that it is paid by the consumer, is now, and always has been, the foundation of the theory of free trade. Yet the history of every article upon which the protective tariff has ever been laid and the history of every industry that has been protected or subsidized demonstrates the falseness of the doctrine. The history of every protected and subsidized industry in this country proves that the foreigner can not carry our commerce as cheaply as we can do it ourselves. Our railroads demonstrate it on land. Our shipping, coastwise and on the Great Lakes, absolutely protected from foreign competition, has the cheapest freights of the world and stands as an unanswerable demonstration that the foreigner can not carry our commerce on water as cheaply as we can do it ourselves. These facts demonstrate that shipping, like every other industry, if given the same protection and encouragement would soon drive the foreigner from our ports, restore our flag to the sea, reduce freight rates, widen our markets, and increase the wages of those who work on our ships.

Even if the foreigner could do our carrying more cheaply, it is always dangerous to place your business in the control of your competitor. This has always been the doctrine of the Republican party. The Republican party has always contended that human nature was such that just as soon as you are in the power of any other you will be compelled to pay tribute to your master. Even if it were true that the foreigner could carry our freight cheaper than we could do it ourselves, present conditions absolutely demonstrate that just as soon as he is master of the situation he will increase the cost of carrying. No man can safely trust his interests solely to the generosity of his competitor, nor can any nation. The foreign shipowner, like the American shipowner, is made of the same clay as other men, and the very moment that he gets his victim at his mercy his avarice is measured solely by the ability of his victim to pay.

Yesterday, when the gentleman from Minnesota [Mr. STEENERSON] was talking upon this question, he suggested a rather novel idea. He said he was not certain, but he thought we would be better off without ships in case of war, because we would have none then to be destroyed. [Laughter.] I could not help but think that if we had no country, we would have no country to be destroyed in time of war and no necessity for a navy. But I will not take up the time of the committee in discussing this question, but will call the attention of the House to what the condition of the country would be not if we were involved in war, but if some of the great shipowning nations were to become involved in war.

IN CASE OF WAR.

Our foreign commerce is to-day almost completely in control of foreign nations. We are almost entirely dependent upon foreign ships to reach foreign markets. Most of the many million dollars' worth of products that go abroad each year must depend on a foreign flag to reach their purchaser. What would be our condition to-day if one of the leading shipping nations should become involved in war, or, worse still, if two such countries should go to war with each other and should withdraw from our carrying trade, as they would for war purposes, the vessels now engaged in carrying American commerce? We can get some estimate of what would follow such a war by studying the results of England's little contest with the Boers, and, strange as it may seem, the interests first and worst hurt was not shipping nor the importer nor the exporter nor the manufacturer, but it was the farmer. The farmer discovered then that he was interested in shipping. England withdrew her best ships immediately and substituted old, slower, and inferior vessels to carry our trade. Not only were inferior vessels substituted, but freight rates were immediately increased more than 30 per cent. From some ports on the Pacific coast freights were increased more than 150 per cent. On the Pacific coast the farmers had the price of their wheat reduced 25 cents per bushel because of the increased price charged for foreign charters. England levied tribute upon the farmers of the Pacific coast to pay the expense of the Boer war. She compelled every farmer in America to contribute for that purpose. We had stupidly placed ourselves at her mercy and were powerless to prevent this tribute. Not only did the farmer have his freight rates increased and the price of his products lowered, but he had his markets greatly decreased by being dependent upon English vessels to deliver his products. The American farmer lost in the sale of grain to England alone the first year of that war $1,750,000. He lost in sale of cattle to England alone in the same time $4,000,000. He lost in the sale of breadstuffs to Europe in two years $115,000,000. These are only a

few items of the injury brought by the Boer war to a single industry in this country.

Yet, it is argued that the farmers of this country are opposed to this bill, that they would be robbed by its becoming a law, and that its purpose is to levy a tribute upon the people generally for the benefit of those who build and operate ships. The effect upon the farmer that I have mentioned came from a little contest with a little insignificant, unknown nation, a country without a single vessel of war to contend with England, and without a single merchant vessel to be destroyed. If such damage could come from a war so insignificant, with our policy of each year more and more placing our commerce in the absolute control of foreign ships, what would be the results that would follow in case of a war between England and Germany or between either of them and another first-class power? Our foreign commerce would be destroyed; our vast over-sea commerce would be paralyzed; our crops would rot unharvested in the fields; our factories would close; the fires in our furnaces would die; wages would be reduced; labor would be forced into unwilling idleness. Panic, beggary, and want would follow. Industrially, this nation would suffer all the horrors of war. The probability of such a war, of such conditions arising, is much greater than is the probability of our ever having any use for the magnificent Navy we are constructing. While we most willingly spend millions each year for our Navy to protect our commerce, we are unwilling to spend anything to prevent its destruction by conditions more likely to arise at any time when our Navy would be entirely useless. We are willing to spend millions to protect our commerce in time of war, but refuse to spend anything to protect it in the more perilous times of peace.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. HUMPHREY of Washington. Yes.

Mr. MADDEN. The gentleman drew a picture of distress and disaster, describing in the event of England and Germany being in war with some other nation what would happen to us. Will the gentleman be kind enough to tell the House where they would get their food supplies, if they were engaged in war with some other nation, and whether, if we were called upon to supply this food we would still be in distress?

Mr. HUMPHREY of Washington. I will say to the gentleman that they probably would get it where they got it during the Boer war. They evidently got it somewhere else, because our markets decreased very greatly during that time, and not only that, but it increased the freight rates. They would probably get it from countries that had ships to carry it to them. We would have three billions of commerce dependent upon foreign ships to reach its market. Does the gentleman think that this is a safe condition? Does he believe our country would suffer if the ships used for this purpose were withdrawn? I can not take the time to repeat the facts and arguments I have already given upon that point.

ARMY AND NAVY.

According to the report of the War Department, we should have for the use of the Army in case of war 228 merchant ships of various kinds. If we were to face an emergency to-day, we could not even furnish twenty-eight good vessels for war purposes. The Department declares that in case of war thirty-eight vessels should be ready in fifteen days. If every American vessel was in her home port on the day that hostilities were declared and if every one of them should voluntarily be offered to the Government, we could not assemble that many on both oceans combined in double that time. It is doubtful if it could be done in fifteen months, let alone fifteen days. Neither could the needed vessels be purchased from foreign nations, if international law permitted it, which it does not, for practically every first-class foreign ship on the ocean to-day is receiving a subsidy that places it under a contract to its home government that would prevent us from purchasing it. We are in worse condition to-day than we were when we commenced war with Spain. Then it took us twenty days to get enough vessels to carry 10,000 men to the near-by coast of Cuba, and the vessels that we did purchase at enormous prices were inferior and unsuitable for the purpose, utterly unfit to make such a voyage as the one from here to the Philippines would be. For these antiquated, dilapidated vessels we paid an enormous price and then expended millions in addition to repair and refit them. After the war was over most of them were sold for nominal prices, fortunately, some of them were abandoned and sunk, and some still remain to curse us. Even in so short an expedition as from this country to Cuba, the transports we used exposed our troops to great peril. The War Department declares that the safe arrival of this expedition was entirely due to chance, and that the only thing that could justify its starting was its safe arrival. With a quiet sea and the decrepit Spanish navy on the other side of the globe, we managed to get a small army to Cuba. It is a beautiful dream, this of universal peace, of the time—

When the war drums shall throb no longer and the battle flags are furled,
In the parliament of man and the federation of the world,

and it is not poetic to disturb it, but some day the awakening must come to this country. What would we do to-day in case of war with a first-class power? How would we get our troops to the Philippines or Hawaii or to Porto Rico? In what position are we to-day to make a contest on the Pacific? If Japan shows any desire for our Pacific possessions, it would be the part of wisdom to give them to her and save ourselves the humiliation of having them taken from us.

Russia, Japan, Germany, and the United States, by the expenditure of enormous sums of money, have of recent years been considered as possessing great navies. Russia was classed as a great naval power at the beginning of her war with Japan, but though she had vessels she did not have a merchant marine to support them or from which to draw sailors to man them. Russia is the one nation of the earth, except the United States, that has committed the costly blunder of trying to build a great navy without at the same time building a great merchant marine to support it. Her humiliating defeat, her captured and sunken vessels, tell in graphic story her irretrievable mistake. We are as helpless to-day as was Russia when attacked by Japan. We have more battle ships to-day than we are able to furnish with crews. Why continue to spend millions to build vessels that can not be manned—vessels that, in case of war, must be kept at anchor or sunk or given to the enemy? I am thankful that the time has not yet come when even the Democratic party advocates manning our war vessels with foreigners. I am thankful that they still concede that there is at least one thing that Americans should do. I call the special attention of the House to the section of this bill which provides for the enrollment for a period of three years of American boys in the naval reserves. These reserves, under the provisions of the bill, shall be at the call of the President in time of war, and they shall receive such instructions as the Secretary of the Navy may prescribe. To my mind this is one of the most important features of the bill. We have reached the parting of the ways; either we must stop building battle ships or we must get men to man them when built. If it is wise to spend $1,000,000 a year to build up our Navy, is it not wise to spend two or three millions of dollars a year to secure and train men that can handle our vessels when constructed? The President said in a recent speech: "In the event of war the American people must rely mainly upon its volunteer soldiers. While it is comparatively a small act to turn a man into quite a good soldier, you can neither improvise a battle ship nor the crews of a battle ship." It is egotism, grotesquely absurd, for this nation to-day to talk about being a world power, for us to talk about playing a great part in world politics. We play only such a part as the great sea powers can agree that we should play. As a sea power, we are almost as helpless as Russia was at the beginning of her war with Japan. Especially is this true on the Pacific Ocean, and the fate of Russia will be our fate if we have at any time in the near future a contest upon that ocean; and upon that ocean we will have our next combat.

If it was with Japan to-day she could put a half million men in the Philippines and a hundred thousand into Hawaii before we would even dare attempt to give her battle. Not only has she a magnificent navy, but she has to-day 550 vessels that would immediately be available as transports. We have on the Pacific only a few war ships and none of them first-class. What we have are mostly in the Orient exposing their crews to all the debilitating conditions of tropical climate and spending millions for repairs in foreign yards while American yards on the Pacific are asking work. In the event of war these old crippled vessels would limp home as fast as they could, provided they were not captured. The Navy Department informs us that they only have sufficient vessels to form one squadron, so they keep that squadron on the Atlantic, where in time of war it will be practically useless but safe, and in time of peace it permits the gallant officers to show their courage and efficiency in the strenuous social functions of our eastern cities. We are face to face with this proposition to-day. We must take immediate and energetic steps or we will be driven from the Pacific Ocean within the next five years. Not only will our flag be driven from our merchant vessels, but it will be driven from our naval vessels and from our oriental possessions if our present policy is continued. Our boasting will no more save us than Russia's boasting saved her. Other nations know our weakness as well

as they knew Russia's. If this bill is defeated, it means the beginning of the end on the Pacific. Our flag will disappear; our mails, our Army supplies, and even our munitions of war and our soldiers will have to be carried by foreign vessels.

Mr. PRINCE. I desire to ask the gentleman—on page 21 of the bill——

Mr. HUMPHREY of Washington. Is it along the line of what I am now discussing?

Mr. PRINCE. Yes; I think so. I want to know if the gentleman really thinks we are liable to use the total number of petty officers and men enrolled in the Naval Reserve to the extent of not exceeding 10,000?

Mr. HUMPHREY of Washington. I only know that the Navy Department has made the statement that we have not sufficient men to run the vessels we have already. I know they have made a statement that when our battle ships are finished, if we pursue our present policy we will have no men to man them, and I think it is worse than stupidity to spend a hundred million dollars a year to build a navy when we have no crews to put upon the ships after they are finished. [Applause.] A naval vessel without men is as worthless as one without guns or ammunition.

SHIP TRUSTS.

Three years ago I called the attention of the House to the fact that, unless all history were at fault, unless human nature were to be changed, as soon as foreign ships completely dominated our carrying they would combine and raise freights. Upon the Pacific Ocean in sail tonnage the foreign ships now have practically no competition, and the thing prophesied that would happen has happened. A trust has been formed by the foreign sail vessels. It is called the "Sail Shipowners' International Union." It represents more than 1,300,000 tons. It includes almost all of the sail vessels that come to the Pacific Ocean. It is composed of English, German, and French ships. It is open and frank in its purposes. It makes no attempt to conceal its object. Copies of the agreement of this combine, its rules and regulations, can easily be obtained. I will insert copies of these documents in the RECORD. As set forth therein, its principal object is to raise freights from American ports. In this declared purpose it has been most successful. It has raised freights on the Pacific more than 400 per cent. It has increased the freight on a ton of wheat from Seattle to Europe from $1.25 to $5.62 per ton. Its by-laws provide that any ship in the combine that carries freight from an American port for less than the minimum price fixed by the trust has to pay the heavy fine of 5 shillings per ton on the dead-weight capacity of the vessel. From a European port each vessel is free to charge such rate as it sees fit. The object of the trust is not to injure the traffic of the European countries. Its sole purpose is to prey on American commerce. This trust is beyond our laws, and is open and defiant. We have no ships to compete with it and no laws to control it. We are at its mercy. The tribute that we must pay on the Pacific to this foreign combination is measured entirely by its greed. This is the position in which we are placed on the Pacific Ocean to-day by the stupidity and cowardice of Congress. How this trust, this octopus, robbing the American people should vex the virtuous soul of Democracy! [Applause on the Republican side.]

But it will not, for here is a trust where there is no opportunity to exhaust the vocabulary of vituperation upon the system of protection. As this is wholly a foreign trust, composed entirely of foreign ships preying only upon American interests, the great sympathetic heart of Democracy will gaze upon it with patience and complacency. Whatever else may be charged against the Democratic party, never once in all its history can it be said that the Democratic party has ever advocated a policy that did not meet the approval of the other nations of the world. Upon this bill, judging by the speeches that have been made on the Democratic side, the inspiration of the Democratic opposition is drawn from England and Germany. The arguments and figures that have been quoted have been furnished by the London Board of Trade, by the commercial interests of King William, and their representatives in this country.

There is another trust on the Pacific Ocean—on the other side, at Manila—a combination of foreign ships and of British merchants. This combination in its printed agreements may not be as definite as to its purposes as the trust formed by the Sail Owners' Union, but it is as effective in accomplishing its end. When an American vessel goes into Manila immediately the freight rates drop 10, 20, or 30 per cent, or to any extent to prevent the American flag from getting a cargo. When the American ship leaves the harbor she has not departed below the horizon until the freight rates go back to their normal condition. Under such conditions as these few American ships longer go to Manila, for they have found it impossible to get profitable cargoes. Last winter the Insular Committee attempted to remedy this evil.

Instead of attempting to find out what was the cause of the conditions prevailing at Manila, instead of giving the shipowners of this country an opportunity to be heard, the committee in hysterical haste rushed through a bill to prevent the extension of the coastwise laws to the Philippines until 1909. Instead of trying to find out what the real conditions were, the committee simply lifted up their hands in lamentations at the dearth of American ships. It has reached this point in our country to-day, and I say it with the shame, measuring my words as I go, that the shipping interests can no longer rely upon the promises of the Republican party, whether written into statutes or placed in national platforms. Such is our condition on the Pacific to-day. We have largely placed our foreign commerce, our markets, and the price of our products in hostile hands. It is the old story, the very foundation of the doctrine of protection, of preservation, of common sense, that you can not afford to place yourself at the mercy of another.

CONDITIONS ON THE PACIFIC.

I wish to call the attention of the House and the country to the condition of American shipping upon the Pacific Ocean and what the fate of this bill means to our shipping there and what the fate of our shipping on the Pacific Ocean means to the whole country. Three American steamship lines cross the Pacific Ocean. The Oceanic Line consists of three 16-knot 6,000-ton steamships. This line runs from San Francisco to Hawaii, Samoa, New Zealand, and Australia. Distance and all conditions considered, this is the fastest line of ships in the world, and it pays the highest wages; it employs all white crews, and one-half of its crews are American citizens. This is the fastest and the best mail and commercial line between this country and Australia. Under the act of 1891 this line now receives a subsidy of $283,000 annually for carrying the mail.

Under the provisions of this bill it would receive an addition of $200,000, or it would receive in all a subsidy of $483,000. A subsidy of $483,000, character of service considered, would be less than that received by any of its foreign competitors. This company has stated that if the pending bill is passed it will immediately build one or more larger and better vessels. The plans for these additional vessels are already drawn in anticipation of the passage of the bill. This line runs in competition with one French, one German, one Japanese, and three British vessels. Each of these lines is subsidized from two to three times as heavily as the American line. It is claimed that this line is losing several hundred thousand dollars annually. It defaulted in the interest due on its bonds last June. The company declare that this line will be abandoned unless it receives additional mail compensation.

PACIFIC MAIL.

The Pacific Mail consists of five steamers—two of 13,000 tons, two of 11,000 tons, and one of 5,000 tons. This line runs from San Francisco via Hawaii to Japan, China, and occasionally these vessels go to the Philippines. This is the principal mail line to the Orient. Its officers and leading men are white, but the crews of these vessels are Chinamen. This line competes directly with a Japanese line of three steamers, receiving a direct subsidy from the Japanese Government of $520,000 annually. Under the proposed bill this line would receive a subsidy of $700,000. The services called for under this bill would require the addition of several American vessels and would require the line to be extended to the Philippines.

LINES FROM PUGET SOUND.

From Puget Sound two vesels of 20,000 tons each—the Hill vessels—run from Seattle to the Orient. The Boston Steamship Company, consisting of two vessels of 10,000 tons each, and the Boston Towboat Company, consisting of three vessels of about 3,000 tons, until within the last few days ran from Puget Sound to Japan, China, and the Philippines, with occasional visits to Siberia and Manchuria. The vessels of the Boston Towboat Company have given up the struggle and gone into the coasting trade between Seattle and Alaska. The Boston Steamship Company's two boats are now our only regular means of communication with the Philippines. The vessels from Puget Sound run in direct competition with a Japanese line of three vessels subsidized $333,000 annually. These vessels also run in direct competition with a British line of three vessels starting from Vancouver and Victoria, British Columbia, subsidized $300,000 annually. The ships of the Boston Steamship Company have always been run at a heavy loss.

On all these lines on the Pacific new ships will be placed and on the Pacific Mail and on the Puget Sound lines the Chinese crews will be largely replaced by American crews. Japan is negotiating for the purchase of all these ships. Without Gov-

ernment aid they must be sold. Any man can read the result. If we fail to pass this bill, the only element of uncertainty in this problem is the element of time. Foreign subsidized ships have almost driven American ships from the North Atlantic. The same power is working to the same end in the same way to drive American shipping from the Pacific, the only place now left where the Stars and Stripes are still carried on regular lines without Government aid. Unless the Government comes quickly to its aid, the history of American ships on the Atlantic will be its history on the Pacific.

Mr. TOWNSEND. Is the gentleman able to tell us why there should be $350,000 for a monthly service? I would like to get at how the committee determined on the $350,000.

Mr. HUMPHREY of Washington. I will say, for the gentleman's information on that subject, that during the time the Commission went throughout the country we obtained evidence everywhere that we went upon the question of the amount of subsidy that should be paid. We called to our assistance the shipowner, the shipbuilder, the shipping commissioner, and the shipping experts throughout the country, and, taking all things into consideration—the subsidies paid by other nations, the rate of speed, and the size of the vessel—we provided just what we believed would be sufficient. I think practically upon all of these lines—possibly not upon all on the Pacific coast, but all on the Atlantic coast—there was testimony of men who were willing to undertake it at this figure. Upon the Pacific coast I do not believe we succeeded in getting anyone, so far as I recall, to say the amount was sufficient. The conditions differed on the two oceans. It is something that can not be figured out mathematically. The gentleman realizes that. We took expert testimony throughout the country, and reached this conclusion after long and careful study covering two or three years.

Mr. TOWNSEND. Will the gentleman yield for a question in connection with the one I asked a moment ago? How do you determine that $350,000 for a monthly service?

Mr. HUMPHREY of Washington. I do not hear the gentleman.

Mr. TOWNSEND. I notice in the bill your committee considered first that this line for the fortnightly service had a maximum compensation of $600,000, or $100,000 less than was finally determined upon.

Mr. HUMPHREY of Washington. What line are you talking about?

Mr. TOWNSEND. I am mistaken about that—no; I was correct——

Mr. HUMPHREY of Washington. I hope the gentleman realizes he is talking in my time.

Mr. TOWNSEND. I will change my question and ask this one. Practically the same line, as I understand, that was covered by the first bill your committee considered and provided a much less amount than you now provide in this bill, and yet you had the same information that your committee or commission had in going over the country.

Mr. HUMPHREY of Washington. That is easily answered. If you look you will see speed is increased in some cases and the distance in some cases. I think the rate per mile, speed considered, is about the same.

Mr. TOWNSEND. It provides 16 knots, and as I read it here——

Mr. HUMPHREY of Washington. I can not answer the gentleman unless I understand his question. I wish now to explain why two lines run from two different points on the Pacific coast, and if the gentleman from Michigan [Mr. FORDNEY] is in the House I hope he will listen. I said when I first commenced speaking and was interrupted—and I might say that I have, in making this speech, done like I usually do when arguing a lawsuit, had one speech in my mind and made an entirely different one when on my feet—that one line should run from Puget Sound and the other from San Francisco, because the shortest line would not go by Hawaii, and we know the Postmaster-General considers only time, and under those circumstances there would be a strong probability that both lines would run from Puget Sound; but the main reason why I insisted that there should be two lines was this: If you will look at the map of the United States, you will see that there are two great railroad systems running to the Pacific coast, and that there are only two great ports upon the Pacific coast, one at Puget Sound and one at San Francisco. The northern lines are what are termed "Hill lines," and they are to a great extent one system. The other systems all converge at San Francisco, and these are under the control of one man practically, as we speak of it, the Harriman lines. If you had two lines running from Puget Sound, Mr. Hill would not only be able to control the freight upon the land, but upon the ocean, and so all would be compelled to patronize him.

If, on the other hand, both lines started from San Francisco, Mr. Harriman would control the freight rates both upon the land and upon the sea, and what I insisted should be done was that the shippers from the great Mississippi Valley and the shippers from the East and the shippers from the South, who send their products through those ports to the Orient, should not be placed in that position where they would be compelled to patronize only one of these great systems. An opportunity for competition should be given, and that is the reason that item was inserted in the bill making it certain that one line should run from Puget Sound and one from San Francisco; and I do not believe there is any man upon this floor who will study this question, regardless of whether or not he is in favor of this bill, but will agree with me that if there are two lines that it would be wise to have this provision. In addition to the facts as I have already stated, if both lines went from Puget Sound the great Southwest would be shut off entirely. Upon the other hand, if both ran out of San Francisco the great Northwest would be entirely shut out or would have to ship a thousand miles additional by rail in order to reach the vessels.

Mr. FORDNEY. Do you think if there was no reference to Cape Mendocino in that bill the Postmaster-General would exercise such bad judgment that he would send two lines to the Orient out of Seattle or Puget Sound or two lines out of San Francisco? Do you not think, in the exercise of a reasonable judgment, he would send one from Puget Sound and the other from San Francisco, especially so when the Great Northern Steamship Company is controlled by Mr. Hill and the Pacific Mail by Mr. Harriman.

Mr. HUMPHREY of Washington. Is the gentleman through?

Mr. FORDNEY. Yes.

Mr. HUMPHREY of Washington. I will answer the gentleman by saying if it is right, and I believe it is, and the gentleman has not disputed it, why give the Postmaster-General any discretion? Why not make it secure? And in addition to that fact I want to say to the gentleman that my experience with the Post-Office Department has been that they regard nothing but speed; and it has come under my notice, and I am perfectly familiar with the fact, that they have sent mail—and the gentleman knows it—by foreign vessels rather than an American vessel, although the difference was only a few hours in many thousand miles run. And I say to the gentleman frankly I do not want to leave it to the discretion of the Post-Office Department in the light of the experience I have had with them. [Applause.]

Mr. FORDNEY. Will the gentleman permit another question?

Mr. HUMPHREY of Washington. Yes.

Mr. FORDNEY. Is it not true that the Boston Steamship Company, the Boston Towboat Company, and the Great Northern Steamship Company, all running from Puget Sound, all carry mail at the present time, and under this bill the gentleman wants to confine it to one line?

Mr. HUMPHREY of Washington. The gentleman is mistaken. Three of those vessels have already been driven out of the trade and are now running in the coastwise trade. The gentleman probably was not aware of that fact when fighting those lines, and perhaps the minority was not aware of that fact when they made their report.

Mr. FORDNEY. Pardon me, I have never fought any lines, and I am not doing it now.

Mr. HUMPHREY of Washington. It looks very much as if the gentleman was not especially friendly.

I am compelled to refuse to be interrupted further. My time will not permit it.

The gentleman from Michigan [Mr. TOWNSEND], in discussing the South American lines, said that one of the necessities for these lines was the Monroe doctrine, and because of this they were more urgent and more needed than those across the Pacific to the Orient. Does the gentleman think that it is more important to protect the countries of South America than it is to protect the Philippines? Does he think that it is more important to have our mails, our products carried to South America than to have them carried to our oriental possessions? Had we better not care for ourselves before we care for our neighbors? Would it not be wise for us to protect our own possessions before we undertake to protect foreign countries? He also urges, as have several other gentlemen, that the lines to South America are more important because we need lines where there is business, and that lines should be established where trade already exists. It may surprise these gentlemen to know that Puget Sound sent to the Orient more products last year than was sent by all this country to South America. It may surprise these gentlemen to know that our oriental trade already existing, and therefore in accordance with their arguments deserving to be protected by

steamship lines, was last year three times as great as what it was with South America.

I wish to call the attention of those gentleman especially who have taken occasion to praise the President to his attitude upon these oriental lines. In his message to Congress on the 23d of January last, he said:

To fail to establish adequate lines on the Pacific is equivalent to proclaiming to the world that we have neither the ability nor the disposition to contend for our rightful share of the commerce of the Orient, nor yet to protect our interests in the Philippines. It would surely be discreditable for us to surrender to our commercial rivals the great commerce of the Orient and even our communications with Hawaii and the Philippines.

JAPAN.

We can not longer deceive ourselves by attempting to ignore the facts. We are to-day face to face with a most serious situation on the Pacific coast. Since we acquired our new possessions, Hawaii and the Philippines, we have a far greater coast line on the Pacific than is possessed by any other nation. We should and could control the commerce of this greatest ocean, but we have criminally wasted our opportunities and have been willfully negligent of our country's interests. Instead of doing our duty by improving our opportunities to secure the trade of this great ocean, we have contented ourselves with talk about trade following the flag and boasting of our influence as a world power. A new nation has arisen on the farther shores of the Pacific that is rapidly dominating this western sea, controlling the commerce of the Orient, and playing a mighty part in the destiny of the world. Japan in the last fifty years has come from semibarbarism and taken her place among the great powers of the world. This progressive, patriotic, and pugnacious people already largely dominate the Pacific. Her ships go into every port on that ocean. Every one of her steamship lines is enormously subsidized. Every ship built in Japanese yards receives a heavy bounty. On her ways to-day are more than twenty ships under construction. Her tonnage under this tremendous government stimulation has increased from 180,000 tons in 1893 to more than 1,000,000 tons to-day. The foreign commerce of the countries bordering the Pacific Ocean last year was more than $3,000,000,000. This is the vast prize which the wisdom of Japan sees, toward which her tremendous energy is directed and for which her intense patriotism is striving. While we have been shirking our duty and doing nothing but promise, she has been performing. While we have been promising, Japan has been building ships. While she has been paying millions in subsidies, we have been apologizing and explaining for even pronouncing that word.

Japan's commerce has kept pace with her building of ships.

The marvelous increase of the one has exactly measured the growth of the other. Wherever her ships have gone her merchants have followed. New business has been established and developed. Old business has been greatly increased. Japan cares for her own. Japanese merchants on the Pacific coast in this country receive from Japanese steamship lines rebates and other advantages sufficient to destroy competition. By this favoritism many American firms have already been forced out of business, compelled to surrender the field to the Japanese competitor. Japan has not only been building ships for her merchant marine, but she has been purchasing ships wherever she could find them. Within the last year Japan has negotiated for the purchase of every first-class ship on the Pacific Ocean that flies our flag. The final result of these negotiations will probably be determined by the action of this House upon this bill. Japan understands the condition of our shipping on the Pacific far better than this House seems to understand it. She knows that every line, while it is losing money, is constantly increasing our markets. She knows that it is only a question of time when our ships must sell or go under a foreign flag. She knows that if she buys our ships that she will not only possess them, but that she will capture or destroy our markets and widen her own trade. She knows that if she can but procure these vessels that her supremacy on the Pacific is already established. Should Japan buy the vessels of the Pacific Mail—they belong to the Southern Pacific Railway—or the Hill vessels—they belong to the Great Northern Railway—one of the conditions of such sale would most certainly be a contract for a term of years to carry freight for these two great transcontinental lines. Japan would then not only control our commerce on the sea, but she would largely dictate our traffic on land. The probability of these sales is shown by the fact that Japan held for some time and probably yet holds an option of purchase upon the Pacific Mail Line, and that a commission from Japan has been negotiating for the purchase of the Hill vessels.

These are the cold facts of the situation on the Pacific to-day. To state them is sufficient to demonstrate our danger. If this bill is defeated, mark the prediction—in two years not a single American vessel will run to the Orient; in twelve months not an American vessel will run to the Philippines. We can only communicate with our possessions through foreign vessels. The fate of this bill will be the fate of our flag on the Pacific.

The action of Japan commands admiration. I can but regret that we do not possess her wisdom, her courage, her daring determination of supremacy, her splendid spirit of patriotism. Subsidy has been the magic word in Japan's matchless progress. To her subsidized merchant marine, more than to any other one thing, she owes her present greatness. It is her subsidized ships that are to-day carrying her products to every port on the ocean. It is her subsidized ships that have given her commerce a growth that has astonished the world. It was her subsidized ships that so superbly supported her navy in her mighty struggle with Russia. It was the subsidized ships of Japan transformed into transports that carried her troops to Manchuria. It was the subsidized ships of Japan that carried the food and ammunition to her mighty army on foreign soil. It was the subsidized ships of Japan that made possible her magnificent victory on land, and it was from the subsidized ships of Japan that came the trained seamen that manned the vessels of war that annihilated the mighty navy of Russia and brought undying glory to the island Empire. [Applause.] The subsidy bill of Japan was passed by her lawmaking body without a dissenting vote, and most gloriously have events demonstrated its wisdom. What man in all the Japanese Empire to-day could be found to regret the payment of that subsidy? Do you suppose that any man in Japan stutters and apologizes whenever the word "subsidy" falls from his lips? I would that some of my timid colleagues might receive a baptism of Japan's wisdom and faith and patriotism. Will we profit by Russia's humiliating defeat, by Japan's marvelous victory? Shall these mighty events mean nothing to us?

WHAT WE SUBSIDIZE.

So far as I have been able to discover, no man who has given this subject careful study within recent years but what has reached the conclusion that the remedy is subsidy or nothing. To-day every man who is not opposed to anything is in favor of subsidy. We have tried the let-alone policy for forty years, and each year has been a triumph for the enemies of American shipping. It is true that a few years ago several ships for foreign trade were built in our yards. With the single exception, possibly, of the two vessels built by the Great Northern Railway, these vessels were all built because of the promise of the Republican party to do something for our merchant marine, a promise which the party has failed to keep. The one conspicuous failure of the Republican party is the present humiliating condition of our merchant marine. It is the only page in all its glorious history blotted with regret and failure.

The Republican party has always championed the system of protection. It is solely responsible for the present tariff system. It is the system of protection alone as maintained and applied by the Republican party that is responsible for the disappearance of our flag on the sea. Every other industry has been protected by the Republican party from the deadly curse of foreign cheap labor. Every other industry pays higher wages here than is paid for the same labor anywhere else in the world. The shipbuilder must employ this high-priced labor to construct his vessels. The owner of ships must employ this high-priced labor to operate his vessels. Of all industries that of shipping meets the most direct and fiercest foreign competition, and yet is compelled to employ high-priced, protected labor to meet low-priced, free-trade competition.

This, and this alone, is responsible for the present condition of our merchant marine. Give the shipping interests of this country free trade in all things, in all commodities, especially give it free labor, and it will care for itself, notwithstanding the subsidies paid by the foreigner. So will shipping flourish if shipping is protected as every other industry is protected. The truth of the statement stands demonstrated by the history of our coastwise and Great Lake shipping. The history of the Republican party shows that its disgraceful failure in regard to our merchant marine has not been due to a want of wisdom, but for the want of courage. The Republican party heretofore has been too cowardly to meet the prejudice created by the enemies of American shipping against the word "subsidy." The Republican party has protected and subsidized everything upon the land, everything upon the inland waters, and every object of our subsidy has demonstrated the wisdom of the system. We subsidize everything. By many millions of subsidy we are building a great system of irrigation, and some who opposed that project when it was before this House are to-day opposing this bill; but they would not oppose irrigation now. They were mistaken then, and they are mistaken now. We have paid a subsidy to our rivers and harbors of more than $470,000,000. We are subsidizing them now at the rate of more than $40,000,000 annually. We have just passed a bill appropriating $83,000,000

for that purpose, and a large portion of this subsidy has been paid to improve our harbors and rivers for the accommodation of foreign ships, and to-day every time a foreign ship is built that requires an additional depth of water an additional clamor goes up for an additional subsidy to deepen our harbors for its accommodation. We have been willing to subsidize our harbors that foreign vessels may use them, but we have been unwilling to subsidize our own ships in order that they might use our own subsidized harbors, which we improve for the subsidized ships of other countries. We are willing to pay subsidies for others, but not for ourselves. We have subsidized the harbor of Galveston alone in the sum of $5,000,000, a sufficient sum to pay the subsidies proposed by this bill for two years, and, as I understand, one lone American vessel sometimes enters the Galveston harbor, and yet I have heard no Democratic protest against this Galveston subsidy.

We gave a subsidy to destroy the boll weevil, and I failed to hear any of my Democratic friends denouncing it as a robbery. We pay vast subsidies to prevent the overflow of the Mississippi River, to prevent the destruction of property in certain localities, and yet I have not heard any gentleman of the minority, when they are making their customary Democratic speech about "subsidies" being unconstitutional, a squandering of the people's money to benefit a special industry, refer to this tremendous subsidy given to protect the property in the locality of the Mississippi River. If ever a subsidy is a graft, a looting of the Treasury, the robbing of the many for the benefit of the few, a "steal"—as our Democratic friends are fond of portraying it—then the subsidy which we pay to the Southern Railway undoubtedly stands at the head of the list, for that is the most inexcusable, the most local, and it is the least beneficial of any subsidy that this House has ever voted, and yet I have noticed with deepest surprise that most of my Democratic friends, notwithstanding their rabid denunciation of subsidy, whenever this "steal" for the Southern Railway is to be voted upon that they succeeed in getting an anæsthetic for their conscience long enough to enable them to work and to vote for it. We have voted a subsidy for the Jamestown exposition, and I noticed that the Democrats were more than willing to join in this rape of the Treasury and were anxious to repeat the crime. Through the Department of Agriculture millions in subsidy are paid to farming. The great Mississippi Valley receives most of this subsidy. And much to my confounding, many of my sensitive colleagues on this side of the Chamber, whom the very word "subsidy" causes to go into political hysterics, are able to accept their part of this "plunder" with perfect complacency.

But the greatest subsidy paid in this country, paid by the people, is the subsidy that is paid to the newspapers, the magazines, the second-class postal matter of this country. Sixty million dollars a year is the subsidy paid to these publications in the way of postage.

The newspapers and magazines of this country receive a subsidy every year that would pay the subsidies provided for in this bill for twenty years. These publications receive twice as much subsidy every month as would be expended under this bill for a year, and yet, in all these papers and magazines that have so viciously opposed this bill, whose virtuous souls have been outraged by this proposed "subsidy steal," not one of them has denounced his own, not one of them has refused to take his part. When these publications stop taking their share the people will have more confidence in the sincerity of their denunciation of others. These self-righteous publications ought at least not to object to the starving shipping interests getting a few crumbs that fall from their overloaded tables. These papers and magazines whose columns have been filled with sermons on honesty and graft, because of this bill, had better take the $60,000,000 beam out of their own eye before they grow hysterical over the prospective $3,000,000 mote in the shipowner's eye. I am awaiting in breathless anticipation to hear some of these conscience-stricken subsidy-denouncing papers turn loose their lurid vocabulary against this robbery, this plunder of the Treasury in which they have so unsuspectingly, so innocently, and so uncomplainingly participated. I know that as soon as they discover what they have been doing they will return their part of the stolen property to the Treasury. I know that they will not knowingly participate in this "steal." I know that these "holier than thou" editors will not loot the Treasury; that they will not rob the taxpayer. I know that their crime is solely the crime of ignorance. I would like to see a statement from some of these editors, these self-appointed keepers of the country's honor and the country's conscience, who are so outraged by this bill, for I am sure that they are competent to throw light upon the question about another subsidy, and that is the subsidy paid to certain publications in this country by the agents of foreign subsidized steamship lines.

I want to bring this fact home to every person in America, that this Government to-day gives greater subsidies to the newspapers and the magazines of this country in the shape of postage than it gives to any other industry. I want every person in this country to know that when he reads a denunciation of this bill that he reads it in a paper that is doing exactly what the paper denounces in others. I want him to know that when he reads a denunciation of this bill he reads it in a subsidized paper. I want the people of this country to know that every year they are taxed millions, that millions are taken from the Treasury that is given to the newspapers and magazines of this country.

My experience in this House has taught me the difference between a justifiable expenditure and a subsidy steal, as defined by the gentlemen who are opposed to this measure. Their definition, as shown by their votes and their practice, is this: They say to their constituents and to the country, "It is a wise expenditure if I get it; it is a 'subsidy steal' if some one else gets it." The difference between a wise expenditure and a subsidy steal, according to the definition of these gentlemen, depends entirely upon who gets the money.

In a few years the waters of the two greatest oceans will be united by a canal built, owned, and controlled by the great Republic. How many millions it will take to complete this greatest material achievement of the human race no man to-day can tell. But, however great this vast subsidy shall prove to be, we shall most willingly pay it. What a humiliating spectacle, what a reflection upon pride and patriotism it will be if, when it is completed, we are still in the same condition that we are to-day, practically without vessels to use it, and we shall find that we have built it principally for the advantage of others!

I do not believe that the American people will be content solely with the glory of the achievement while the substantial benefit will go to other nations. I believe that the American people are going to do what is necessary to build up a merchant marine worthy of our commerce, or of our country and the canal. As it was the genius of Marcus A. Hanna that located the canal, as it was the courage and the patriotism of Theodore Roosevelt that secured the right of way, as it was the action of Congress in adopting the lock system that has made certain its rapid completion, I hope that the vessel that will first traverse the waters of the newly wedded seas will be an American vessel constructed in American yards by American labor paid American wages [applause]; that it will be manned by American seamen; that the name of that vessel will be the *Marcus A. Hanna;* that on the deck will stand Theodore Roosevelt, and that over it will float the Stars and Stripes! [Loud applause.] I hope that thereafter, so long as the tides shall ebb and flow, that the number of American ships going through the canal will be commensurate with our country's commerce and our country's greatness.

We have subsidized manufacturing, and the products of our factories are vastly more than that of any other two nations combined. We subsidized farming, and we are the greatest agricultural nation that the world has ever seen. We subsidized mining, and last year the products of our mines were far in excess of $1,000,000,000, and in each and all of these industries the cost of production is the least, the reward of toil is the greatest, and the labor engaged therein is the best paid of any similar industry in all the world. We have subsidized our railways by money and by land grants of 200,000,000 of acres, the value of which is now beyond calculation, and we have the greatest railway system and the cheapest freights upon earth, and the labor engaged therein is the best paid labor of its class in all the world. We have subsidized on the sea as well as on the land. We have subsidized our coastwise and lake shipping, and it is the cheapest transportation that men have ever known, and the labor engaged therein is the best paid labor of its class in all the world. By this bill we stand here to-day asking only that the system of protection be extended to shipping, asking only that shipping be subsidized as every other industry is subsidized.

Shipping is the only industry that is absolutely denied the protection of the Government. If protection is right, then it can not be wrong to protect all our industries. Justice demands that we protect all or that we protect none. Our foreign shipping is our only unprotected industry, and it is our only industry in which American labor and American capital has practically no part. It is our only unprotected industry and it is the only one from which American labor and American capital has been driven by foreign labor and foreign capital. It is our only unprotected industry, and of all American industries it

is the most discreditable, gives the poorest return on the investment, and pays the lowest wages to labor. [Applause.]

ATTITUDE OF REPUBLICAN PARTY.

The Republican party has always boasted that it keeps its promises and its pledges. It has always said that its platforms were guaranties of its actions. It has always claimed that it never obtained votes under false promises. What has been the party declarations in regard to American shipping? In 1888 in our national platform was the following plank:

We earnestly recommend that prompt action be taken by Congress in the enactment of such legislation as will best secure the rehabilitation of our American merchant marine, and we protest against the passage by Congress of a free-ship bill as calculated to work injustice to labor by lessening the wages of those engaged in preparing materials, as well as those directly employed in our shipyards.

In 1892, the national platform declared:

We favor the extension of our foreign commerce, the restoration of our mercantile marine by home-made ships, and the creation of a Navy for the protection of our national interests and the honor of our flag.

In 1896 the national platform contained the following plank:

Merchant marine: We favor the restoring of the early American policy of discriminating duties for the upbuilding of our merchant marine and the protection of our shipping in the foreign carrying trade, so that American ships—the product of American labor, employed in American shipyards, sailing under the Stars and Stripes, and manned, officered, and owned by Americans—may regain the carrying of our foreign commerce.

In our last convention at Chicago, in 1904, we went on record as follows:

While every other industry has prospered under the fostering aid of Republican legislation, American shipping engaged in foreign trade, in competition with the low cost of construction, low wages, and heavy subsidies of foreign governments, has not for many years received from the Government of the United States adequate encouragement of any kind. We therefore favor legislation which will encourage and build up the American merchant marine, and we cordially approve the legislation of the last Congress, which created the Merchant Marine Commission to investigate and report upon this subject.

President Harrison, with all the force of his great intellect, urged that we carry out our platform promises. Among the last words of the beloved McKinley was a statement urging the Republican party to do as it had promised. Frequently has President Roosevelt urged us to be true to the plank adopted at the last national convention. He now sends a special message indorsing this bill and showing the vital necessity for its passage. But these promises of the Republican party we have not kept. We have made no honest attempt to keep faith. A sufficient number of Republicans have always been found to prevent any action as promised by the party. These gentlemen claim that in opposing any subsidy legislation they represent the wishes of the Middle West. I do not believe it. I am from the Middle West. I am one of them. I know the people of that section better than I know any other people on earth. I know that there is not a more patriotic, a more honest, a more intelligent people in the world. If they are opposed to the bill now pending, it is because they do not understand it. If they do not understand it, then it is the fault, to a large extent, of those who represent them here. If those gentlemen who apologize and evade when they hear the word "subsidy" would have the courage to meet and tell their constituents the facts, to tell them that every other industry is subsidized, that our flag is disappearing from the sea, that the commerce of this country is in the control of foreigners, that our Navy to-day can not be manned for want of seamen, that we have no ships and can not procure them in time of war to transport our Army or to support our Navy, that we are in the same deplorable condition Russia was in at the beginning of her war with Japan; in other words, if the people of the West can but know the truth, the people of that section will demand that our merchant marine be rehabilitated just as strongly as they demand it on the Atlantic and Pacific coasts. [Applause.]

I undertake to say here and now that not a single commercial club or business association of any kind or character in the United States, not either directly or indirectly interested in the foreign shipping, has passed a single resolution against this bill or has uttered a single protest against it. Almost every commercial club and business organization, east, west, north, and south, have indorsed it. These and these only are opposed to this bill: The subsidized newspaper, the free-trade newspaper, one labor organization composed of foreigners, foreign steamship interests, and the Democratic party. Why should any Republican take his stand with this selfish, unpatriotic, nondescript aggregation of political monstrosities?

I know the Republicans of the Middle West too well to believe that they do not indorse the teachings of Blaine, of Benjamin Harrison, of Marcus A. Hanna, and of William McKinley. I know them too well to believe that they will refuse to give their indorsement to the bill that has the emphatic and unqualified approval of Theodore Roosevelt. I know them too well to believe that they will ever condemn any Member of this House for supporting a bill that Theodore Roosevelt, in a special message, has urged them to support. [Applause.]

A Democrat can vote against this bill and be consistent with what he preaches, if not with what he practices. But a Republican who votes against it votes against both what he preaches and what he practices. If we are free traders on the ocean, if we are too cowardly to do our duty, let us say it. Let us say that there are so many free traders among us that we can not protect our own interests on the seas. Let us stop making promises. Let us stop playing the demagogue. Let us put the truth in our platforms. To our cowardice, at least, let us add the virtue of honesty. Let us tell the truth. [Applause.] To show further the attitude of the Republican party upon this question I shall insert in the RECORD some of the statements of Harrison, McKinley, and Roosevelt.

DEMOCRATIC OPPOSITION.

The Democratic party is not in favor of this bill. It is useless to attempt to persuade them to see the error of their way. The Democratic party is for free trade. It is wedded to a corpse; it never unites with the living. When you attempt to convert the Democratic party, when you attempt to persuade it to favor any proposition that is right, to vote for any policy that is for the general good, in the language of Holy Writ, "You might just as well fill your belly with the east wind. Yea, they have chosen their own ways, and their souls delight in their abominations." [Laughter.] But after this legislation has been enacted, after its necessity and its success has been indelibly written in the pages of our country's history, after it has caused us to carry our commerce and restored our country's flag to the sea, then will the Democratic party claim that it was always in favor of such legislation, that such legislation was their own, and that the Republican party stole it from them. [Applause.]

The Democratic party has always been opposed to any subsidy national in its scope. The Democratic party has always been opposed to any kind of subsidy except one. It has always favored a subsidy that was local in its application and that was applied to a Democratic locality. When a subsidy possesses these virtues the Democratic party has always gotten the consent of its tender constitutional conscience to vote for it, to work for it, to receive it, and to ask for more. The great Democratic conscience is purely a matter of geography. If the subsidies provided by this bill were to go only to that portion of our coast between Baltimore and Texas, it would receive the solid Democratic vote. If a subsidy is a "steal," then there is one thing commendable about the Democratic party, it never wants to share its iniquity.

Of course the Democratic party is opposed to this bill. The Democratic party is the party of opposition and mistake. I never knew a man that was a Democrat but what he was a Democrat because he was opposed to something. The Democratic party has opposed everything that was right. The Democrat for fifty years has opposed every law that the people have approved. The Democratic party opposed giving liberty to 3,000,000 human beings. If a man's skin was not a certain shade, then the Democratic party was opposed to that man. It was opposed to any law that prevented another from robbing that man of the fruits of his honest toil. The Democratic party was opposed to that man having any of the rights of a man. It was opposed to his being treated as a human being. It was opposed to any law that recognized that man as anything but a chattel to be bought and sold, to be governed by whip and chain. And to-day the Democratic party is opposed to a man being measured by his merit, by his work of hand or brain, by what he is, but insists that a man shall be judged and that he shall be treated solely according to his complexion. The Democratic party's idea of justice has always been, and the Democratic party's idea of justice is to-day, only skin deep. The Democratic party was opposed to reconstruction, to our country being again united and great. The Democratic party was opposed to the thirteenth, fourteenth, and fifteenth amendments, and the Democratic party is opposed to them to-day. The Democratic party was opposed to paying the nation's debts after the war, opposed to the nation redeeming its promises. The Democratic party was opposed to the gold standard. It was opposed to an honest man having his honest debt paid with honest money. The Democratic party was opposed to our flag remaining in the Orient, opposed to it remaining where the honor of our country and the blood of our soldiers demanded that it should remain. [Applause.]

The Democratic party is opposed to protection; it is opposed to protecting the labor of this country from the pauper labor of the rest of the world. The Democratic party is always opposed to prosperity and happiness and content. The Demo-

cratic party always feeds on disaster and fattens on despair. For fifty years the Democratic party has opposed every step of progress in the history of the country. The Democratic party is opposed to anyone talking about its history, about its record. The Democratic party is even opposed to anyone discussing its opposition.

Of course the Democratic party is opposed to this bill. This was to be expected and to be desired. The only dangerous power possessed by the Democratic party to-day is its favor. [Applause.] The highest praise that the Democratic party can bestow is its opposition. Democratic opposition to this bill will disturb no one but its enemies. To wait until the Republican party has taken a position and then oppose it is the highest intellectual performance that the Democratic party has achieved since the day of Appomattox.

For fifty years everything that the Democratic party has favored has been wrong; everything it has opposed has been right. For fifty years the only useful purpose of the Democratic party has been to stimulate Republican endeavor by its opposition. What the Democratic party opposes lives; what it indorses dies. The seal of Democratic approval always carries the skull and crossbones. [Applause on Republican side.]

Every law of national importance upon our statute books for the last fifty years has been placed there by the Republican party in spite of Democratic opposition. The Republican party, in spite of Democratic opposition, kept our country united and freed a race. In spite of Democratic opposition the Republican party wrote the thirteenth, fourteenth, and fifteenth amendments in the Constitution, accomplished reconstruction, defeated repudiation, and made our credit unequaled among the nations of the earth.

In spite of Democratic opposition and the want and beggary and idleness and rags of a Democratic Administration the Republican party preserved the gold standard and declared that this nation could not stamp a lie upon 50 cents worth of silver and make it a dollar, and saved the country from the delusion and the disaster of free silver. The Republican party, in spite of Democratic opposition, placed our flag in the Orient and, in spite of Democratic opposition, has kept it there and prevented it from being lowered in retreat and trailed in the dust of dishonor. In spite of Democratic opposition the Republican party inaugurated and it has maintained the system of protection that has made us the greatest, the richest, and the most prosperous nation on earth and our laboring classes the pride of our country and the envy of the world. [Applause.] Every page in our history for the last fifty years that tells of progress and prosperity, of patriotism and performance, of happiness and content, of heroic deeds and grand achievements, of the triumphs of peace or the victories of war, all were made and written by the Republican party in spite of Democratic opposition. [Applause.]

And so now the Republican party, in spite of Democratic opposition, is going to write a law upon our statute books that will make us supreme upon the ocean as we are to-day supreme upon the land, a law that will cause a just part of our matchless commerce to be carried in American ships, built in American yards by American labor, paid American wages, manned by American seamen, and flying the American flag. [Applause.] The Republican party is going to place upon the statute books a law that will restore the ancient prestige, the greatness, and glory of our merchant marine, a law that will again cause our ships to travel all the highways of the ocean, our sails to whiten every sea, and our flag to shadow all the ports of the world. [Applause.]

---

## APPENDIX.

*Attitude of Republican Presidents—Harrison, McKinley, and Roosevelt—upon the necessity and desirability of legislation to assist our merchant marine.*

LETTER OF PRESIDENT BENJAMIN HARRISON ACCEPTING SECOND NOMINATION IN 1892.

Hon. WILLIAM MCKINLEY, Jr., and others,
*Committee, etc.:*

Few subjects have elicited more discussion or excited more general interest than that of a recovery by the United States of its appropriate share of the ocean-carrying trade, and this subject touches not only our politics, but our national pride. Practically all the freights for transporting to Europe the enormous annual surplus of provisions furnished by this country and for the large return of manufactured products have for many years been paid to foreign owners.

Thus the immigrants annually seeking homes under our flag have been denied the sight of it until they entered Sandy Hook, while increasing thousands of American citizens, bent on European travel, have each year stepped into a foreign jurisdiction at the New York docks. The merchandise balance of trade which the Treasury books show is largely reduced by the annual tribute which we pay for freight and passage moneys.

The great ships—the fastest upon the sea—which are now in peace profiting by our trade, in a secondary sense, are war ships of their respective governments, in time of war would, under existing contracts with those governments, speedily take on the guns for which their decks are already prepared and enter with terrible efficiency upon the work of destroying our commerce. The undisputed fact is that the great steamship lines of Europe were built up and are in part sustained by direct or indirect government aid, the latter taking the form of liberal pay for carrying the mails or of an annual bonus given in consideration of agreements to construct the ships so as to adapt them for carrying an armament and to turn them over to the government on demand upon specific terms.

It was plain to every intelligent American that if the United States would have such lines a similar policy must be entered upon. The Fifty-first Congress enacted such a law, and under its beneficent influence sixteen American steamships, of an aggregate tonnage of 57,400 tons and costing $7,400,000 have been built or contracted to be built in American shipyards.

In addition to this, it is now practically certain that we shall soon have under the American flag one of the finest steamship lines sailing out of New York for any European port. This contract will result in the construction in American yards of four new passenger steamships of 10,000 tons each, costing about $8,000,000, and will add to our naval reserve six steamships, the fastest upon the sea.

A special interest has been taken by me in the establishment of lines from our South Atlantic and Gulf ports, and, though my expectations have not yet been realized, attention has been called to the advantages possessed by these ports, and when their people are more fully alive to their interests I do not doubt that they will be able to secure the capital needed to enable them to profit by their great natural advantages.

The Democratic party has found no place in its platform for any reference to this subject, and has shown its hostility to the general policy by refusing to expend an appropriation made during the last Administration for ocean-mail contracts with American lines.

The patriotic people, the workingmen in our shops, the capitalists seeking new enterprises, must decide whether the great ships owned by Americans which have sought American registry shall again humbly ask a place in the English naval reserve, the great ships now on the designers' tables going to foreign shops for construction, and the United States lose the now brightening opportunity of recovering a place commensurate with its wealth, the skill of its constructors, and the courage of its sailors in the carrying trade of all the seas.

---

BENJAMIN HARRISON, INAUGURAL ADDRESS, MARCH 4, 1889.

We should encourage the establishment of American steamship lines. The exchanges of commerce demand stated, reliable, and rapid means of communication, and until these are provided the development of our trade with the States lying south of us is impossible.

---

BENJAMIN HARRISON, ANNUAL MESSAGE TO CONGRESS, DECEMBER 3, 1889.

There is nothing more justly humiliating to the national pride, and nothing more hurtful to the national prosperity than the inferiority of our merchant marine compared with that of other nations whose general resources, wealth, and seacoast lines do not suggest any reason for their supremacy on the sea. It was not always so, and our people are agreed, I think, that it shall not continue to be so. It is not possible in this communication to discuss the causes of the decay of our shipping interests or the differing methods by which it is proposed to restore them. The statement of a few well-authenticated facts and some general suggestions as to legislation is all that is practicable. That the great steamship lines sailing under the flags of England, France, Germany, Spain, and Italy, and engaged in foreign commerce, were promoted, and have since been and now are liberally aided, by grants of public money, in one form or another, is generally known. That the American lines of steamships have been abandoned by us to an unequal contest with the aided lines of other nations until they have been withdrawn, or, in the few cases where they are still maintained, are subjcet to serious disadvantages, is matter of common knowledge.

The present situation is such that travelers and merchandise find Liverpool even a necessary intermediate port between New York and some of the South American capitals. The fact that some of the delegates from South American states to the Conference of American Nations, now in session at Washington, reached our shores by reversing that line of travel is very conclusive of the need of such a conference and very suggestive as to the first and necessary step in the direction of fuller and more beneficial intercourse with nations that are now our neighbors upon the lines of latitude, but not upon the lines of established commercial intercourse.

I recommend that such appropriations be made for ocean mail service in American steamships between our ports and those of Central America, China, Japan, and the important islands in both of the great oceans as will be liberally remunerative for the service rendered and as will encourage the establishment and in some fair way equalize the chances of American steamship lines in the competitions which they must meet. That the American states lying south of us will gladly cooperate in establishing and maintaining such lines of steamships to their principal ports I do not doubt.

We should also make provision for a naval reserve to consist of such merchant ships of American construction and of a specific tonnage and speed as the owners will consent to place at the use of the Government in case of need as armed cruisers. England has adopted this policy, and as a result can now, upon necessity, at once place upon her naval list some of the fastest steamships in the world. A proper supervision of the construction of such vessels would make their conversion into effective ships of war very easy.

I am an advocate of economy in our national expenditures; but it is a misuse of terms to make this word describe a policy that withholds an expenditure for the purpose of extending our foreign commerce. The enlargement and improvement of our merchant marine, the development of a sufficient body of trained American seamen, the promotion of rapid and regular mail communication between the ports of other countries and our own, and the adaptation of large and swift American merchant steamships to naval uses in time of war, are public purposes of the highest concern. The enlarged participation of our people in the carrying trade, the new and increased markets that will be found for the products of our farms and factories, and the fuller and better employment of our mechanics which will result from a liberal promotion of our foreign commerce insure the widest possible diffusion of benefit to all the States and to all the peopie. Everything is most propitious for the present inauguration of a liberal and progressive policy upon this subject, and we should enter upon it with promptness and decision.

The legislation which I have suggested, it is sincerely believed, will promote the peace and honor of all the country and the prosperity and

security of the people and invoke the diligent and serious attention of Congress to the consideration of these and such other measures as may be presented having the same great end in view.

MESSAGE OF PRESIDENT BENJAMIN HARRISON TO CONGRESS, DECEMBER 1, 1890.

I desire to repeat with added urgency the recommendations contained in my last annual message in relation to the development of American steamship lines. The reciprocity clause of the tariff bill will be largely limited and its benefits retarded and diminished if provision is not contemporaneously made to encourage the establishment of first-class steam communication between our ports and the ports of those nations as may meet our overtures for enlargement of commercial exchanges. The steamship, carrying the mails statedly and frequently, offering to passengers a comfortable, safe, and speedy transit, is the first condition of foreign trade. It carries the order or the buyer, but not all that is ordered or bought. It gives to the sailing vessels such cargoes as are not urgent or perishable, and, indirectly at least, promotes that important adjunct of commerce. There is now, both in this country and in the nations of Central and South America, a state of expectation and confidence as to increased trade that will give a double value to your prompt action upon this question.

* * * * * * *

The South Atlantic and Gulf ports occupy a very favored position toward the new and important commerce which the reciprocity clause of the tariff act and the postal shipping bill are designed to promote. Steamship lines from these ports to some northern port of South America will almost certainly effect a connection between the railroad systems of the continents long before any continuous line of railroads can be put into operation. The very large appropriation made at the last session for the harbor of Galveston was justified, as it seemed to me, for these considerations. The great Northwest will feel the advantage of trunk lines to the South as well as to the East, and of the markets found for their surplus food products and for many of their manufactured products.

MESSAGE OF PRESIDENT BENJAMIN HARRISON TO CONGRESS DECEMBER 6, 1892.

Ever since our merchant marine was driven from the sea by the rebel cruisers during the war of the rebellion the United States has been paying an enormous annual tribute to foreign countries in the shape of freight and passage moneys. Our grain and meats have been taken at our own docks and our large imports there laid down by foreign shipmasters. An increasing torrent of American travel to Europe has contributed a vast sum annually to the dividends of foreign shipowners. The balance of trade shown by the books of the custom-houses has been very largely reduced and in many years altogether extinguished by this constant drain. In the year 1892 only 12.3 per cent of our imports were brought in American vessels. These great foreign steamships maintained by our traffic are many of them under contracts with their respective governments by which in time of war they will become a part of their armed naval establishments. Profiting by our commerce in peace, they will become the most formidable destroyers of our commerce in time of war. I have felt and have before expressed the feeling that this condition of things was both intolerable and disgraceful. A wholesome change of policy and one having in it much promise, as it seems to me, was begun by the law of March 3, 1891. Under this law contracts have been made by the Postmaster-General for eleven mail routes. The expenditure involved by these contracts for the next fiscal year approximates $954,123.33. As one of the results already reached, sixteen American steamships of an aggregate tonnage of 57,400 tons, costing $7,400,000, have been built or contracted to be built in American shipyards.

* * * * * * *

No subject, I think, more nearly touches the pride, the power, and the prosperity of our country than this of the development of our merchant marine upon the sea. If we could enter into conference with other competitors and all would agree to withhold government aid, we could perhaps take our chances with the rest, but our great competitors have established and maintained their lines by government subsidies until they now have practically excluded us from participation. In my opinion no choice is left to us but to pursue moderately, at least, the same lines.

PRESIDENT BENJAMIN HARRISON HOISTING THE FLAG ON THE STEAMSHIP NEW YORK FEBRUARY 22, 1893.

It gives me pleasure to consummate here to-day, by the act of lifting this flag, the efforts in support of a principle to which I give my hearty support.

I have felt as a citizen and as President a mortification which every American must feel who examines into the standing of the United States in the merchant marine of the world.

I believe we have reached an epoch in our development when we may successfully begin the work of carrying our share of the world's commerce upon the seas.

We lift the flag to-day on one ship, a magnificent specimen of the naval art, one of the best on any sea.

That event is interesting in itself, but its interest to me is in the fact that this ship is the type or precursor of many others.

PRESIDENT WILLIAM M'KINLEY'S INAUGURAL ADDRESS MARCH 4, 1897.

Congress should give prompt attention to the restoration of our American merchant marine, once the pride of the seas in all the great ocean highways of commerce. To my mind few more important subjects so imperatively demand its intelligent consideration. The United States has progressed with marvelous rapidity in every field of enterprise and endeavor until we have become foremost in nearly all of the great lines of inland trade, commerce, and industry. Yet, while this is true, our American merchant marine has been steadily declining, until it is now lower, both in the percentage of tonnage and the number of vessels employed, than it was prior to the civil war. Commendable progress has been made of late years in the upbuilding of the American Navy, but we must supplement these efforts by providing as a proper consort for it a merchant marine amply sufficient for our own carrying trade to foreign countries. The question is one that appeals both to our business interests and the patriotic aspirations of a great people.

PRESIDENT WILLIAM M'KINLEY'S FIRST ANNUAL MESSAGE TO CONGRESS, DECEMBER 6, 1897.

Most desirable from every standpoint of national interest and patriotism is the effort to extend our foreign commerce. To this end our merchant marine should be improved and enlarged. We should do our full share of the carrying trade of the world. We do not do it now. We should be the laggard no longer. The inferiority of our merchant marine is justly humiliating to the national pride. The Government, by every proper constitutional means, should aid in making our ships familiar visitors at every commercial port of the world, thus opening up new and valuable markets to the surplus products of the farm and factory.

PRESIDENT WILLIAM M'KINLEY'S MESSAGE TO CONGRESS, DECEMBER 5, 1899.

The value of an American merchant marine to the expansion of our commercial trade and the strengthening of our power upon the sea invites the immediate action of the Congress. Our national development will be one-sided and unsatisfactory so long as the remarkable growth of our inland industries remains unaccompanied by progress on the seas. There is no lack of constitutional authority for legislation which shall give to the country maritime strength commensurate with its industrial achievement and with its rank among the nations of the earth.

The past year has recorded exceptional activity in our shipyards, and the promises of continual prosperity in shipbuilding are abundant. Advanced legislation for the protection of our seamen has been enacted. Our country's trade, under regulations wisely framed at the beginning of the Government and since, shows results for the past fiscal year unequaled in our records or those of any other power. We shall fail to realize our opportunities, however, if we complacently regard only matters at home and blind ourselves to the necessities of securing our share in the valuable carrying trade of the world.

Last year American vessels transported a smaller share of our exports and imports than during any former year in all our history, and the measure of our dependence upon foreign shipping was painfully manifested to our people. Without any choice of our own, but from necessity, the Departments of the Government charged with military and naval operations in the East and West Indies had to obtain from foreign flags merchant vessels essential for those operations.

The other great nations have not hesitated to adopt the required means to develop their shipping as a factor in national defense and as one of the surest and speediest means for obtaining for their producers a share in foreign markets. Like vigilance and opportunity on our part can not fail to improve our situation, which is regarded with humiliation at home and with surprise abroad. Even the seeming sacrifices which at the beginning may be inevitable will be offset later by more than equivalent gains.

The expense is as nothing compared to the large object achieved. The reestablishment of our merchant marine involves in a large measure our continued industrial progress and the extension of our commercial triumphs. I am satisfied the judgment of the country favors the policy of aid to our merchant marine, which will broaden our commerce and markets and upbuild our sea carrying capacity for the products of agriculture and manufacturing; which, with the increase of our Navy, mean more work and wages to our countrymen, as well as a safeguard to American interests in every part of the world.

PRESIDENT WILLIAM M'KINLEY'S MESSAGE TO CONGRESS, DECEMBER 3, 1900.

American vessels during the past three years have carried about 9 per cent of our exports and imports. Foreign ships should carry the least, not the greatest, part of American trade. The remarkable growth of our steel industries, the progress of shipbuilding for the domestic trade, and our steadily maintained expenditures for the Navy have created an opportunity to place the United States in the first rank of commercial maritime powers.

Besides realizing a proper national aspiration this will mean the establishment and healthy growth along all our coasts of a distinctive national industry, extending the field for the profitable employment of labor and capital. It will increase the transportation facilities and reduce freight charges on the vast volume of products brought from the interior to the seaboard for export, and will strengthen an arm of the national defense upon which the founders of the Government and their successors have relied. In again urging immediate action by the Congress on measures to promote American shipping and foreign trade, I direct attention to the recommendations on the subject in previous messages, but particularly to the opinion expressed in the message of 1899:

I am satisfied the judgment of the country favors the policy of aid to our merchant marine, which will broaden our commerce and markets and upbuild our sea-carrying capacity for the products of agriculture and manufacturing, which, with the increase of our Navy, mean more work and wages to our countrymen, as well as a safeguard to American interests in every part of the world.

PRESIDENT WILLIAM M'KINLEY'S LAST SPEECH AT THE PAN-AMERICAN EXPOSITION, SEPTEMBER 5, 1901.

Then, too, we have inadequate steamship service. New lines of steamers have already been put in commission between the Pacific coast ports of the United States and those of the western coasts of Mexico and Central and South America. These should be followed up with direct steamship lines between the eastern coast of the United States and South American ports. One of the needs of the times is of direct commercial lines from our vast fields of production to the fields of consumption that we have but barely touched. Next in advantage to having the thing to sell is to have the convenience to carry it to the buyer. We must encourage our merchant marine. We must have more ships. They must be under the American flag, built and manned and owned by Americans. These will not only be profitable in a commercial sense, but will be messengers of peace and amity wherever they go.

REPRESENTATIVE WILLIAM M'KINLEY, IN HIS SPEECH ON THE TARIFF OF 1890, IN THE HOUSE OF REPRESENTATIVES, FIFTY-FIRST CONGRESS, MAY 7, 1890.

While Great Britain lost, between 1870 and 1880, 13 per cent of her trade, the United States gained 22 per cent. And if the United States

would give the same encouragement to her merchant marine and her steamship lines as is given by other nations to their ships this commerce on the seas under the American flag would increase and multiply. When the United States will spend from her Treasury from $5,000,000 to $6,000,000 a year for that purpose, as do France and Great Britain to maintain their steamship lines, our ships will plow every sea in successful competition with the ships of the world. [Loud applause on the Republican side.] Will you gentlemen join us in encouraging our merchant marine? [Renewed applause on the Republican side.]

PRESIDENT THEODORE ROOSEVELT'S MESSAGE TO CONGRESS, DECEMBER 3, 1901.

The condition of the American merchant marine is such as to call for immediate remedial action by the Congress. It is discreditable to us as a nation that our merchant marine should be utterly insignificant in comparison to that of other nations which we overtop in other forms of business. We should not longer submit to conditions under which only a trifling portion of our great commerce is carried in our own ships. To remedy this state of things would not merely serve to build up our shipping interests, but it would also result in benefit to all who are interested in the permanent establishment of a wider market for American products and would provide an auxiliary force for the Navy. Ships work for their own countries just as railroads work for their terminal points. Shipping lines, if established to the principal countries with which we have dealings, would be of political as well as commercial benefit. From every standpoint it is unwise for the United States to continue to rely upon the ships of competing nations for the distribution of our goods. It should be made advantageous to carry American goods in American-built ships.

At present American shipping is under certain great disadvantages when put in competition with the shipping of foreign countries. Many of the fast foreign steamships, at a speed of 14 knots or above, are subsidized; and all our ships, sailing vessels and steamers alike, cargo carriers of slow speed and mail liners of high speed, have to meet the fact that the original cost of building American ships is greater than is the case abroad; that the wages paid American officers and seamen are very much higher than those paid to officers and seamen of foreign competing countries, and that the standard of living on our ships is far superior to the standard of living on the ships of our commercial rivals.

Our Government should take such action as will remedy these inequalities. The American merchant marine should be restored to the ocean.

PRESIDENT ROOSEVELT, IN HIS ANNUAL MESSAGE TO CONGRESS, DECEMBER 7, 1903.

Deeply concerned at the decline of our ocean fleet, and the loss of skilled officers and seamen—pioneers of trade in peace, and defenders of the flag in war—the President of the United States, in his annual message to Congress, December 7, 1903, said:

"A majority of our people desire that steps be taken in the interest of American shipping, so that we may once more resume our former position in the ocean carrying trade. But hitherto the difference of opinion as to the proper method of reaching this end have been so wide that it has proved impossible to secure the adoption of any particular scheme. Having in view these facts, I recommend that the Congress direct the Secretary of the Navy, the Postmaster-General, and the Secretary of Commerce and Labor, associated with such a representation from the Senate and the House of Representatives as the Congress in its wisdom may designate, to serve as a commission for the purpose of investigating and reporting to the Congress at its next session what legislation is desirable or necessary for the development of the American merchant marine and American commerce, and incidentally of a national ocean mail service of adequate auxiliary naval cruisers and naval reserves. While such a measure is desirable in any event, it is especially desirable at this time, in view of the fact that our present governmental contract for ocean mail with the American Line will expire in 1905.

"Our ocean mail act was passed in 1891. In 1895 our 20-knot trans-Atlantic mail line was equal to any foreign line. Since then the Germans have put on 23-knot steamers, and the British have contracted for 24-knot steamers. Our service should equal the best. If it does not, the commercial public will abandon it. If we are to stay in the business it ought to be with the full understanding of the advantages in the country on the one hand, and on the other with exact knowledge of the cost and proper methods of carrying it on. Moreover, lines of cargo ships are of even more importance than fast mail lines, save so far as the latter can be depended upon to furnish swift auxiliary cruisers in time of war. The establishment of new lines of cargo ships to South America, to Asia, and elsewhere would be much in the interest of our commercial expansion."

PRESIDENT ROOSEVELT, IN HIS ANNUAL MESSAGE TO CONGRESS, DECEMBER 6, 1904.

I especially commend to your immediate attention the encouragement of our merchant marine by appropriate legislation.

PRESIDENT ROOSEVELT, IN HIS ANNUAL MESSAGE TO CONGRESS, DECEMBER 5, 1905.

To the spread of our trade in peace and the defense of our flag in war a great and prosperous merchant marine is indispensable. We should have ships of our own and seamen of our own to convey our goods to neutral markets, and in case of need to reenforce our battle line. It can not but be a source of regret and uneasiness to us that the lines of communication with our sister republics of South America should be chiefly under foreign control. It is not a good thing that American merchants and manufacturers should have to send their goods and letters to South America via Europe if they wish security and dispatch. Even on the Pacific, where our ships have held their own better than on the Atlantic, our merchant flag is now threatened through the liberal aid bestowed by other governments on their own steam lines. I ask your earnest consideration of the report with which the Merchant Marine Commission has followed its long and careful inquiry.

PRESIDENT ROOSEVELT IN SPECIAL MESSAGE TO CONGRESS JANUARY 23, 1907.

*To the Senate and House of Representatives:*

I call your attention to the great desirability of enacting legislation to help American shipping and American trade by encouraging the building and running of lines of large and swift steamers to South America and the Orient.

The urgent need of our country's making an effort to do something like its share of its own carrying trade on the ocean has been called to our attention in striking fashion by the experiences of Secretary Root on his recent South American tour. The result of these experiences he has set forth in his address before the Trans-Mississippi Commercial Congress, at Kansas City, Mo., on November 20 last, an address so important that it deserves the careful study of all public men.

The facts set forth by Mr. Root are striking, and they can not but arrest the attention of our people. The great continent to the south of us, which should be knit to us by the closest commercial ties, is hardly in direct commercial communication with us at all, its commercial relations being almost exclusively with Europe. Between all the principal South American ports and Europe lines of swift and commodious steamers, subsidized by their home governments, ply regularly. There is no such line of steamers between these ports and the United States.

In consequence, our shipping in South American ports is almost a negligible quantity; for instance, in the year ending June 30, 1905, there entered the port of Rio de Janeiro over 3,000 steamers and sailing vessels from Europe, but from the United States no steamers and only seven sailing vessels, two of which were in distress. One prime reason for this state of things is the fact that those who now do business on the sea do business in a world not of natural competition, but of subsidized competition. State aid to steamship lines is as much a part of the commercial system of to-day as State employment of consuls to promote business. Our commercial competitors in Europe pay in the aggregate some twenty-five millions a year to their steamship lines—Great Britain paying nearly seven millions. Japan pays between three and four millions. By the proposed legislation the United States will still pay relatively less than any one of our competitors pays. Three years ago the Trans-Mississippi Congress formally set forth as axiomatic the statement that every ship is a missionary of trade, that steamship lines work for their own countries just as railroad lines work for their terminal points, and that it is as absurd for the United States to depend upon foreign ships to distribute its products as it would be for a department store to depend upon wagons of a competing house to deliver its goods. This statement is the literal truth.

Moreover, it must be remembered that American ships do not have to contend merely against the subsidization of their foreign competitors. The higher wages and the greater cost of maintenance of American officers and crews make it almost impossible for our people who do business on the ocean to compete on equal terms with foreign ships unless they are protected somewhat as their fellow-countrymen who do business on land are protected. We can not as a country afford to have the wages and the manner of life of our seamen cut down; and the only alternative, if we are to have seamen at all, is to offset the expense by giving some advantage to the ship itself.

The proposed law which has been introduced in Congress is in no sense experimental. It is based on the best and most successful precedents, as, for instance, on the recent Cunard contract with the British Government. As far as South America is concerned, its aim is to provide from the Atlantic and Pacific coasts better American lines to the great ports of South America than the present European lines. The South American republics now see only our war ships. Under this bill our trade friendship will be made evident to them. The bill proposes to build large-sized steamers of 16-knot speed. There are nearly 200 such steamships already in the world's foreign trade, and over three-fourths of them now draw subsidies—postal or admiralty, or both. The bill will encourage our shipyards, which are almost as necessary to the national defense as battle ships, and the efficiency of which depends in large measure upon their steady employment in large construction. The proposed bill is of importance to our Navy, because it gives a considerable fleet of auxiliary steamships, such as is now almost wholly lacking, and also provides for an effective naval reserve.

The bill provides for fourteen steamships, subsidized to the extent of over a million and a half, from the Atlantic coast, all to run to South American ports. It provides on the Pacific coast for twenty-two steamers subsidized to the extent of two millions and a quarter, some of these to run to South America, most of them to Manila, Australia, and Asia. Be it remembered that while the ships will be owned on the coasts, the cargoes will largely be supplied by the interior, and that the bill will benefit the Mississippi Valley as much as it benefits the seaboard.

I have laid stress upon the benefit to be expected from our trade with South America. The lines to the Orient are also of vital importance. The commercial possibilities of the Pacific are unlimited, and for national reasons it is imperative that we should have direct and adequate communication by American lines with Hawaii and the Philippines. The existence of our present steamship lines on the Pacific is seriously threatened by the foreign subsidized lines. Our communications with the markets of Asia and with our own possessions in the Philippines, no less than our communications with Australia, should depend not upon foreign, but upon our own steamships. The Southwest and the Northwest should alike be served by these lines, and if this is done they will also give to the Mississippi Valley throughout its entire length the advantage of all transcontinental railways running to the Pacific coast. To fail to establish adequate lines on the Pacific is equivalent to proclaiming to the world that we have neither the ability nor the disposition to contend for our rightful share of the commerce of the Orient; nor yet to protect our interests in the Philippines. It would surely be discreditable for us to surrender to our commercial rivals the great commerce of the Orient, the great commerce we should have with South America, and even our own communications with Hawaii and the Philippines.

I earnestly hope for the enactment of some law like the bill in question.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *January 23, 1907.*

[From the State of Washington Republican platforms.]

1898: We are in favor of upbuilding the American merchant marine and the protection of American rights in every quarter of the world with an adequate navy.

1900: We stand for loyalty to the flag, * * * for the further enlargement of our trade and commerce; for such discrimination and national aid as shall speedily result in the upbuilding of our merchant marine.

1904: Trans-Pacific commerce is of vital importance to our State. We heartily indorse the action of the President and of Congress which resulted in the appointment of a commission to investigate and report

the condition of our merchant marine to the ultimate end that American commerce may be carried in American ships.

1906: Of our vast foreign commerce of over $3,000,000 annually not more than 10 per cent is carried in ships flying the American flag. That it may be an auxiliary to our Navy in time of war and carry our commerce in time of peace we are in favor of and earnestly urge immediate legislation by Congress to upbuild our merchant marine.

*Rules, table of rates, and other documents relative to the Sailing Ship Owners' International Union.*

[Telegraphic address, "Langstaff," London. Telephone No. 4283 avenue.]

SAILING SHIP OWNERS' INTERNATIONAL UNION,
LEADENHALL BUILDINGS,
*London, E. C., June 1, 1904.*

DEAR SIR: Referring to your entry in this union, I have now to inform you that more than 75 per cent of British, French, and German tonnage have joined, and the union has therefore been constituted.

The figures are as follows:

| Country. | Total tonnage, 1,000 tons and upward, excluding liners. | Tonnage entered International Union. |
|---|---|---|
| Great Britain | 1,127,809 | 848,522 |
| France | 299,073 | 240,605 |
| Germany | 365,710 | 277,822 |
| Total | 1,792,592 | 1,366,949 |

I inclose herewith copy of the rules as finally approved; also circular intimating the minimum rates of freight so far fixed by the committee.

Herewith also is note of your subscription for the current year.

Kindly send check for same to enable me to forward certificate of membership.

Yours, faithfully,

O. H. POLLAK,
*Honorary Secretary.*

SAILING SHIP OWNERS' INTERNATIONAL UNION,
LEADENHALL BUILDINGS,
*London, E. C., June 1, 1904.*

The committee met in London the 26th instant, and fixed the following as the minimum rates of freight below which the members of the union shall not engage their vessels.

These rates shall apply to all engagements entered into on and after June 6, 1904.

Although only one rate has been fixed as a minimum from each port, the committee expect that, at any rate for moderate-sized ships, higher figures will be obtained.

West coast North America: Calling for orders to U. K., H. A. D., Hamburg.

If San Francisco loading: Wheat, 22/6; flour, 23/9; barley, 23/9. Lay days not before July 15.

If Los Angeles, San Diego, or San Pedro loading: Wheat, flour, barley, 22/6. Lay days not before July 15.

If Portland (Oreg.) loading: Wheat, flour, barley, 27/6. Lay days not before September 1.

If Seattle and/or Tacoma loading: Wheat, flour, barley, 26/3. Lay days not before September 1.

Continent, Bordeaux, and Hamburg range other than H. A. D. H., 2/6 additional to above rates.

If ordered from loading port direct to port of discharge, not exceeding one-third less than above rates.

If cargo other than wheat, flour, barley, shipped, rate to be 2/6 in excess of the rate for wheat.

West coast South America: Chile to U. K., Cont., B/H., calling for orders.

Nitrate 20/– less 1/3 direct. Lay days not before August 15.

Australia: To U. K., Cont., B/H., calling for orders. No reduction direct. Wheat flour basis: If loaded at one port South Australia, 20/–; if loaded at Sydney, 20/–; if loaded at Melbourne or Geelong, 20/3.

New Caledonia: To U. K., Cont., B/H., calling for orders. No reduction direct. Nickel ore, 20/–; chrome ore, 25/–.

O. H. POLLAK, *Honorary Secretary.*

THE SAILING SHIP OWNERS' UNION—THE RULES.

Mr. O. H. Pollak, the honorary secretary of the Sailing Ship Owners' International Union, has sent to all the shipowners who have joined the union a letter, in which he states that more than 75 per cent of British, French, and German tonnage have joined, and the union has therefore been constituted. The figures are as follows:

| Country. | Total tonnage, 1,000 tons and upward, excluding liners. | Tonnage entered, International Union. |
|---|---|---|
| Great Britain | 1,127,809 | 848,522 |
| France | 209,073 | 240,605 |
| Germany | 365,710 | 277,822 |
| Total | 1,792,592 | 1,366,949 |

RULES.

The rules are as follows:

(1) The association shall be called "The Sailing Ship Owners' International Union," and its headquarters shall be situated in London.

(2) The only object of the union for the present shall be to fix minimum rates of freight for the principal voyages in which sailing ships engage, excepting only outward voyages from the United Kingdom or Continent of Europe, for which no rates of freight shall be arranged, each vessel being left free to make the best terms she can.

(3) The business of the union shall be managed by a committee, consisting of seven representatives from Great Britain, four from France, and four from Germany, who shall meet where and as often as they think desirable in the general interest, with leave, in case of necessity, to each member of the committee to send a substitute of his own nationality who is a member of the union. This committee shall remain in office until 31st December in each year. Prior to that time the representative or representatives on the committee of each group of members of the union—British, French, German, or any other nationality—shall call a general meeting of the members of that group, at which the representative or representatives shall be elected to represent that group on the committee for twelve months from the ensuing 1st January. Due intimation of the election to be sent to the secretary of the international committee. The persons named above shall be the first committee of the union, and shall remain in office till 31st December, 1904.

(4) This committee shall from time to time fix the minimum rates of freight from the various loading ports as they judge best in their absolute discretion, and they shall have power to fix different minimum freights for ships of different sizes. Intimation of the rates of freight fixed by this committee shall, as required from time to time, be given to the members of the union per circular letter. This letter shall name a date for any specified rate coming into force, and this date shall apply to the charter party or loading agreement and not to the actual loading date. Not less than five days shall elapse between the dispatch of any registered letter from the London office of the union and any rate of freight which it prescribes becoming operative.

(5) Such owners as agree to join this union shall bind themselves not to accept for the ships which they control less than the minimum rate appointed by the above-mentioned international committee for any voyage for which the committee shall have fixed a rate of freight, and for all such voyages the various owners are prohibited from chartering except on the recognized terms of charter for the particular trade without any extra commissions, rebates, or back letters. Owners, however, shall be allowed to reimburse the charterers the net cost of any extra insurance the latter may have to pay on the cargo owing to the age or special condition of the ship.

(6) Should the minimum rates of freight not be obtainable for any vessel she shall be laid up until such a rate can be got, or, in the option of the owners, she has liberty to leave the port in ballast.

(7) The committee shall have power to call upon each member of the union to disclose on oath the rate of freight and conditions of any charter.

(8) In the event of any member of the union committing any breach of his undertaking or of the rules of the union, he shall pay liquidated damages to the committee of 5s. per ton on the dead-weight capacity of the ship in connection with which the breach has been committed, but should said breach be committed unwittingly and through no fault of the member, the committee have discretion to modify the damages.

(9) Only owners of ships of 1,000 tons net register and upward shall be eligible to be enrolled in this union.

(10) The various owners joining this union shall remain members thereof from year to year, but may terminate their membership at 31st December in any year on giving two months' written notice (say on or before 31st October of that year) to the committee.

(11) To provide for the expenses of the union each owner enrolled shall contribute, in advance, £1 sterling per annum for each of his vessels of 1,000 tons net register and upwards.

COMMITTEE.

Representing Great Britain: Mr. J. A. Roxburgh, of Glasgow, president; Mr. R. W. Leyland, of Liverpool; Mr. Robt. J. Thomas, of Liverpool; Mr. P. Hugh Marshall, of Liverpool; Mr. George Milne, of Aberdeen; Mr. Andrew Weir, of Glasgow; Mr. Thomas Potter, of London.

Representing France: M. Eugene Pergeline, of Nantes, vice-president; M. Leon Gueugnier, of Paris; M. Eugene Salles, of Marseille; M. Joseph Polo, of Nantes.

Representing Germany: Mr. F. Loesener Sloman, of Hamburg, vice-president; Mr. F. W. Dahlstrom, of Hamburg; Mr. Emil Watjen, of Bremen; Mr. A. D. Vinnen, of Bremen.

Mr. O. H. Pollak, Leadenhall buildings, London, E. C., is the honorable secretary.

A scale of minimum freights has also been sent to the shipowners, and, of course, it is the object of the union to try and raise these rates. The dates upon which the scale takes effect vary with each port, the earliest date being July 15.

[From an occasional contributor.]

The International Union of Sailing Ship Owners is the most remarkable body of its kind in the world. Indeed, it may be regarded as the most powerful shipping combination in existence, and it has no parallel in the international character of its constitution, which at first appeared to be a weakness, but is now seen to be a source of strength, for without foreign cooperation the union would have been impossible, and the French and German owners are even more enthusiastic for the union, if possible, than the British. The union does not include sailing ship "liners" of 1,000 tons and upward, because these do not come into competition with the "tramps," who are chiefly hit by the ruling low rates. Excluding, therefore, these liners, there remain 1,792,592 tons of British and foreign sailing ships that could possibly join the union, and the total quantity that has joined the union is no less than 1,366,949 tons, so that the balance outside is only 425,643 tons, too small to offer effective competition to the union; besides which, some of those still outside, if not all, will no doubt join shuld the union realize the hopes of its promoters.

There will be great curiosity in shipping circles to see how such a novel and powerful combination works. It is formed to fix homeward freights alone, whether for the United Kingdom or the Continent, and not outward, as to which members are left a free hand. Mr. R. W. Leyland, the well-known Liverpool shipowner, will perhaps be more interested than anybody else in the fate of the union, for it is practically his creation.

Mr. GOULDEN. I yield thirty minutes to the gentleman from Illinois [Mr. WILSON].

Mr. WILSON. Mr. Chairman, I desire to state that it is my opinion that if a bill had been reported from our committee which I thought was a proper bill, one that I believed had had proper consideration before the committee, and one on which I had been duly advised and informed, I would not have been opposed to a line of steamships being reasonably subsidized to run to South America. I intend to state the reasons why I am

opposed to the present bill, and in particular I propose to state my objections to the subsidizing of the lines running from the Pacific coast.

During the last four years and during the time I have been a Member of Congress and a member of the Committee on Merchant Marine and Fisheries we have had under consideration a bill known as the "ship-subsidy bill," to which bill I have always been opposed. The present bill was introduced in the Senate by Senator GALLINGER and in the House by Mr. GROSVENOR, of Ohio. After some consideration it passed the Senate, and is now before us for approval in a much mutilated form. It has been on the operating or dissecting table for so long I doubt if the parent would recognize the child.

On the 14th day of January of this year our committee was called together to consider this amended bill. We met, and at our meeting Mr. LITTAUER—by the way, a brand-new member of this committee—introduced a substitute for Senate bill 529 which provides only for a mail subsidy and a naval reserve. The only time that the minority of this committee had any chance to consider this bill was on the day and afternoon of its introduction. We had never seen it and knew nothing about its provisions. No evidence was taken as to its merits or demerits or any feature of it, which I am constrained to state is one of the most unusual proceedings in a legislative committee that I ever heard of, and I am frank to state that I believe it is the first committee of this Congress or any other Congress that has reported a bill carrying with it a $4,000,000 annual appropriation under an irrevocable contract for ten years. And I do not believe any other committee in this House would have had the audacity or nerve to take such action on such important legislation.

Mr. GROSVENOR. Mr. Chairman——

Mr. WILSON. I shall be glad to yield to the gentleman.

Mr. GROSVENOR. The regular number of copies of the report was printed. Then there were eight or ten thousand more printed, and day before yesterday I asked unanimous consent and obtained it for the reprinting of the report. There has been no moment of time since that report was made when any gentleman who knew how could not have obtained this report, and any number of copies of it that he desired.

Mr. WILSON. Mr. Chairman, I am not talking about the report of the committee. I am talking about the report of the evidence taken before our committee substantiating this measure. The people do not want the conclusions of some one man or some eight men, drawn from testimony that has been taken.

Mr. GROSVENOR. Will the gentleman allow me?

Mr. WILSON. I will be pleased to allow the gentleman at any time.

Mr. GROSVENOR. The testimony before the Maritime Commission that traveled over the country was printed by order of the Senate and House, and a certain number of copies given to each Member of the House. There has been no considerable amount of testimony taken since the return of the Commission and since the bill came before our committee on this occasion, but the regular number of copies of the hearings was printed and were available to any Member who wanted them, and we did not think it was necessary that every man, woman, and child in the United States should have a copy of that.

Mr. WILSON. Mr. Chairman, I am perfectly well aware of the fact that there was testimony taken and printed by the Commission, but as I said a moment ago, the testimony that you will find in the report of the Commission which traveled over this country and spent over $20,000 of the people's money to gather this testimony, that testimony does not relate to the features of this mail-subsidy bill which we are now asked to vote upon, and that is the complaint I make about the way this matter has been conducted. I have a number of copies of those books containing that testimony, and I shall be glad to give them to any Member of this House. That testimony does not relate to this bill. I am not contradicting that, and do not intend to. You can get the navigation reports from the Commissioner of Navigation and you can read about it in them, and you will not find any testimony that shows that it was taken on this bill now under consideration. That is what I am complaining about, and I am going to show you the inconsistency of it; I intend to show you that this legislation has never been considered; I am going to show you that it is not a proper measure for us to vote upon and consider at this time.

Mr. Chairman, the gentleman from Washington [Mr. HUMPHREY], who has just preceded me, tells us that this is not new legislation; that it is only a continuation of a law that was enacted in 1891. That, Mr. Chairman, was a piece of legislation that was brought out of the Committee on the Post-Office and Post-Roads; a piece of legislation that was fully and duly considered by that committee. He says this is a continuation of that law, and so did the gentleman from New York. I tell you, gentlemen, it is not a continuation of that law; certain features of it are a continuation, but under that law certain provisions of it are that the beneficiaries shall receive a dollar per mile for a mail subsidy on an outward-going trip only. Under the provisions of the bill that we are now considering the rate per mile, as provided for, is from $5.55 per mile to two dollars and some cents per mile for mail subsidy. That is a material difference, and under this bill of extension the price per mile is increased, and that is why I am so bitterly opposed to it.

There has been little said about the bill. Most of the speaking has been in reference to the history of this legislation and the history of our merchant marine, how it has decayed, and why it is that we do not carry our share of goods in our own vessels. Gentlemen, you will notice from this map a proposition that is carried under this bill. The first two steamship lines that are supposed to be subsidized under this bill are lines 1 and 2, running from New York City down to the coast of South America to Buenos Ayres and Rio de Janeiro. You will also notice what appears to be from here one line on the map, but a close inspection will show you that it is really two lines. One is to receive a subsidy of $600,000 per year and the other a subsidy of $800,000 per year, or $1,400,000 per year. These two lines, for the greatest distance of their travel for 5,000 miles, absolutely parallel each other from New York City to South America. One is nothing more than a continuation of the first line of a thousand miles. I will ask you if you were considering a business proposition, if your client or your firm or your business were interested in it, would you have two lines over the same territory for 5,000 miles? Is it not true, if the subsidy is right, that one line will do the business as well as the two? That is one of the features of the bill I am bitterly opposed to.

Mr. ELLIS. Will the gentleman yield?

Mr. WILSON. Yes.

Mr. ELLIS. Before the gentleman leaves that proposition I would like to have this explained—why these lines are duplicated. What is the argument of those who support it?

Mr. WILSON. I am glad the gentleman has called my attention to it. I have been trying to find out ever since the bill was reported what was the argument in favor of it. I asked the man who introduced the bill at the time—we only had a few minutes to consider it—I asked him why these lines were being duplicated, each running over the same route? I was not able to get a reply, and I have not been able to receive any information on the subject to date. I do not know myself unless it is because they desire to give more subsidy to the shipowners and the shipbuilders. I fail to see the necessity of any such duplication of lines; I know nothing about it at all. There are no hearings upon our measure; we know nothing about them; but we do know from their own map, which they have hung before us on the walls of the Hall of the American Congress, that the lines are paralleled and go to the same ports.

In all, the majority of this committee has reported for the consideration of this House a business proposition to pay over and into the hands of certain interests nearly $40,000,000, without a hearing as to the law or the facts. We have not one scintilla of evidence or testimony in any shape or form to justify our action or that will sustain this measure. A favored few members of this committee may have, but where did they secure their evidence and their information, and if it was good for them, why not give it to the whole committee and the House and the country? Let your evidence be printed. Tell us where you got it; write it up and put it on the desk of every Member. All other hearings before committees are written up and ready for the use of the Members of this body. I believe—and I believe that the Members of this House believe—that such important legislation should at least have had a respectable hearing, so that if we are inclined to support it we could justify any action that we see fit to take in this matter.

If this amended bill, carrying with it nearly $40,000,000 appropriation of the people's money, is a fair and reasonable one, then I ask, Why is it you were afraid to consider it as all other measures are considered in the committee? If the information the majority of the committee have on this proposition justifies their action, why hide it in this unseemly manner and keep it from the rest of us? If they can justify their actions to their constituents, it stands to reason that we might justify ours.

From whom did they secure this valuable information which led them to support and report this bill? Whose testimony have they had in support of it? Who were their star witnesses? Who examined them from the various view points that one may make in considering this measure? Who are the parties so vitally interested in this legislation? Who are pushing it? The shipbuilders or the shipowners? Or do they claim the farmers and the merchants and the clerks and the professional men and

the laboring men and the miners are back of it? If they have had no witnesses at special hearings, where have they secured their information? Where did they secure their information that this $40,000,000 which we are asked to appropriate was a sufficient amount of subsidy to carry our mail to these foreign ports, and if this is enough, how do we know that it isn't entirely too much? This substitute which we are considering is supposed to be an amendment to a section of our statutes which was passed in 1891, and which section provides for an ocean mail service between the United States and certain foreign ports and for the purpose of promoting commerce. Was this law of 1891 reported from the Committee on the Merchant Marine and Fisheries or from the Committee on Interstate and Foreign Commerce or from the Appropriations Committee? No; it was reported by the Post-Office and Post-Roads Committee, which has to do with the mail service of this country, and a committee which is familiar with the needs of our mail service and which committee has plenty of information on this subject, as it has on all other subjects that come before it, and it always has hearings, and they are printed for general use and information.

Why is it that the Committee on Post-Offices and Post-Roads did not consider this measure? Was it because the naval-reserve feature of this subsidy bill is tacked on, or is it because this bill in its original form, which provided for a tonnage tax, passed the Senate, and if this substitute passes the House, do you not believe that the conferees of the Senate and the House on this substitute bill will agree to disagree on the substitute and agree on the original as it passed the Senate, and during the last hours of this Congress, when everything is in confusion and turmoil, the conferees' report will be brought in under a rule and the old Senate bill will be passed, and the Republican Members of this Congress can go back to their people and say the Republican party is responsible for this legislation? At last a ship-subsidy bill has been passed which carries with it millions of dollars a year of the people's money to the shipbuilders' trust, the steel trust, the shipowners' trusts, and if it does pass and become a law I will venture to say that more Members who voted for this often tried and always failing obnoxious legislation will fall by the wayside because of the action of his party than any other piece of legislation that has been before this Congress in many a day.

Mr. Chairman, this subsidy bill is not *the product of our* committee. *It is not a creature of our committee.* I do not believe the provisions of this bill originated in the fertile mind of any member of our committee. The real author of it is unknown to us. His name is *Stranger.* His *home unknown*, except we all know he did not hail from our district.

Why did they substitute this bill for the Senate bill? The Senate bill was *their ideal.* They claim it is the most perfect measure ever introduced, and would build up the merchant marine until the *Stars and Stripes were floating in the breeze* of all seas and the ports of every nation.

Why did you not stick to your first love and report it out when you had the chance and let this House pass on it? Because you were afraid of it. You knew it would fail, and this is your only show *to dip into the public fund for a private enterprise.*

Mr. Chairman, *this substitute subsidy bill comes to us in an unfair manner. It had an ex parte trial in the judges' chamber, behind closed doors, in the darkness of night. No one* was there *except* its *friends.* They had a *lovely* time; everything was considered and *agreed* to. The *sailing* was *clear* and *smooth.* Not a *breeze ruffled the waters.* Not a *wave disturbed their progress.* Not a *harsh voice* or *discordant sentiment* provoked their *peaceful dreams* of the passage of this bill.

Now, let us go into the main features of this bill and take each one of them up and see what they call for, and the result of this legislation. The first section of this bill provides for a steamship with either a monthly or fortnightly service from the *Atlantic coast of the United States, from New York City to Rio de Janeiro, South America*, with not less than 16 knots speed and a compensation not to exceed *$600,000* per year. The second provides for a line from the *Atlantic coast* of the United States, *from New York City* to *Buenos Ayres, South America*, with not less than 16 knots speed for a compensation not exceeding *$800,000* per year. These lines parallel each other and touch at the same ports.

They say that this subsidy is not for the benefit of existing lines now engaged in seagoing trade, but for prospective companies, and that these new lines will be obliged to build practically a new fleet to take advantage of this subsidy to the South American ports. If that is true, why was there not incorporated a provision in this bill that this subsidy should not apply to any ships now sailing under the American flag. They are emphatic in their statements that this bill is for the purpose of building up the merchant marine, and a part of the consideration for this subsidy is that we will have twenty-five or thirty new vessels specially built by direction of the Secretary of the Navy, same as the law of 1891, and not a vessel was ever so built, that we may have and use in time of war, and yet with all of their assertions they leave the bill open so that any American ship that is now built and carrying our flag or a foreign flag, with sufficient speed, irrespective of tonnage or construction, may take advantage of this proposed subsidy. They have absolutely no other qualifications than that of speed, and *that is a very uncertain one*, as I will show later on. They claim because no American steamship is now running to the South American ports that we have none that could, and that the entire fleet for this purpose would have to be designed and built. To show you the absurdity of this proposition, permit me to state that one man by the name of C. W. Morse, of New York City and Boston, has now a fleet of eighty-eight or more vessels, a number of which are capable and able and have the necessary qualifications and requirements to immediately enter into this service and reap the benefits of this subsidy, and I will prove it and challenge anyone to contradict my proof.

Mr. WANGER. It seems to me that the proof would be very interesting.

Mr. WILSON. I am just going to present it to the committee. Mr. C. W. Morse, who is known in New York and Boston, as the shipowners of the Atlantic coast, has now a line of vessels of something over 88 or nearly 100. In that line of vessels he has 19 or 20 with sufficient speed, with sufficient tonnage, and construction to take advantage of this subsidy—vessels that are now plying in the trade between the Atlantic coast and the Gulf of Mexico, Panama, and South America, and all he would have to do would be to continue some of them down the line.

Mr. LAW. At what speed?

Mr. WILSON. They have a speed of 14, 16, and 20 knots, as I remember. I know some of them have a speed of 18 knots.

Mr. WANGER. Would my friend kindly give the names of the ships that have that speed?

Mr. WILSON. I am just coming to that. You will find the list of these vessels in a publication of the Bureau of Navigation. The vessels that I am now about to mention were vessels that until a few days ago were owned and controlled by a Mr. Ward, who was in that line of business on the Atlantic coast. Since this bill has been reported from my committee and believed by a number of people likely to pass the House, or that some features of it, at any rate, will become a law, this same Mr. Morse has purchased this Ward Line of steamers of some 18 or 19 vessels. One of the vessels that Morse has purchased from Ward is known as the "*Moro Castle*," with a tonnage of over 6,000 and a speed of 18 knots. The *Moro Castle* is one of the *newest and best and finest vessels*, I understand, that is built and plying the seas to-day. Is there anyone who believes that this vessel could not take advantage of this subsidy to the South American republics? The *speed is sufficient*, the *tonnage* is sufficient, and its *construction is sufficient. What more elements are there that we must take into consideration?* The next vessel is the *Mexico*, She has a tonnage of 5,667 and a speed of 17 knots. She is *new* and *modern* and *fast* and *large* enough. Do you believe that that vessel could not go into that trade? Do you believe they have to build another vessel to take the place of that one? The next one is the *Havana*, with the same tonnage and the same speed. The next one is the *Esperanza*, with a tonnage of 4,700 and a speed of over 16 knots. Then there is the *Monterey*, with a tonnage of over 4,700 and a speed of 16 knots. Then there are several others, one of them known as the "*Seguranca*," with a tonnage of over 4,000 and a speed of 14½ knots, and the *Vigilancia*, with a tonnage of 4,000 and a speed of 14 knots. There are a number of them at 14 knots and one or two more at 15 knots, but I have not enumerated them because they are not likely to enter into the trade.

Mr. WEEKS. Are not those vessels under contract with the Government now to carry mails to Cuba and Mexico?

Mr. WILSON. I do not think they are. Maybe some of them are, but I do not know. If so, it's at $1 per mile, and not $5.55.

Mr. WEEKS. They have been.

Mr. WILSON. I do not know that they are.

Mr. WEEKS. If they were, would not that prevent their being used for anything else?

Mr. WILSON. Not under this legislation.

Mr. FOWLER. Certainly it would.

Mr. WILSON. It is right on the route. Those steamers could easily do it.

Mr. WEEKS. Mexico is not on the route to South America.

Mr. WILSON. It is not very far removed, the gentleman will observe from the map.

Mr. HINSHAW. Under this bill it is not required that vessels to be operated in this trade shall be now under contract with the United States, but that they are now duly registered by citizens of the United States, and if it be a corporation that a majority of the stock shall be owned by citizens of the United States, so that there is no requirement that vessels shall hereafter be built, but they may use those now constructed.

Mr. WILSON. That is very true. There is no question about that. From the list which I have given I have enumerated nine. To-day there are being constructed in the shipyards on the Atlantic coast five vessels that I know of by this man Mr. Morse, and those five vessels, from the best information I am able to secure, are *new, large, fast,* and *perfectly capable* to take advantage of this subsidy and to ply in the trade.

*The largest ship reported as regularly plying between* New York and Brazil and the Argentine ports is a British steamer by the name of *Canning,* with a capacity of *3,600* net tons, and the rest of the ships, and there are many of them engaged in that trade, are on an average much less than 3,000 tons, and some of them a little more than a third as large.

The Morse steamship interests now have *six large* steamers with more than a sufficient amount of tonnage, with the necessary speed and all other qualifications, that could immediately embark in this enterprise, as follows: *Calvin Austin,* built in 1903, with 2,856 net tons; *Horatio Hill,* built in 1898, with over 2,000 net tons; *North Star,* built in 1901, with over 2,000 net tons; the *San Jacinto,* built in 1903, with over 4,000 net tons; the *Gov. Cobb,* built in 1906, with over 2,500 net tons, and they are now building *five fine, large,* and modern new steamers which are almost ready for launching, three at the *Cramp shipyards* and two at the *Bath shipyards;* which would make, all told, eleven, or more than enough to supply the fleet to engage in this commerce; and none of these ships are *especially qualified* so *that in case of war they would be of special benefit* to the *American Navy;* and while these ships are now engaged in the coastwise trade on the Atlantic coast, they could easily be taken out of that service and put in the South American service *and reap* this *rich subsidy* which you propose in this measure. It would bring them such a *handsome profit that* the coastwise trade would be *no temptation* to them whatever; and another *great injustice* would be done the American people by taking out of this coastwise trade these vessels that are now engaged in it, thereby limiting the supply of ships and increasing the demand for those engaged in the trade and crippling the coastwise business and increasing the rate of transportation, which this and previous Congresses have been trying so faithfully to lower and regulate for the benefit of the people. This subsidy or money which you propose to pay to the parties who secure the contract to carry the mail to the South American ports, as provided for in this legislation, *is unreasonable, exorbitant,* and far in excess of the amount necessary to encourage such a line. *I am advised by a man who knows* that it is enough to pay *all* of the *expenses of a fleet,* and any trade or tonnage that it might and will carry will be *all profit;* and if that is true, *and this committee should know whether or not it is true, this proposed subsidy is entirely too large.*

While I am on this subject and at this point I desire to submit some *facts* and *figures* and *information* which I could not get from the committee, and no one else could get it unless they were in favor of this subsidy bill. I secured my information from other sources. *It is the best I could get.* I am sorry it is not in report form and on the desks of all Members, so you all could have it, but I have it and I wish to refer to it now while I am on this eastern coast and at this particular part of this legislation.

Mr. MINOR. Will the gentleman permit?

Mr. WILSON. I will be glad to yield to the gentleman.

Mr. MINOR. I desire to say to the gentleman I am really sorry the gentleman from Illinois casts such a reflection upon the committee.

Mr. WILSON. I am sorry I am obliged to cast such a reflection upon the committee.

Mr. MINOR. I want to say to the gentleman that there never was a right accorded to any member of the committee that was denied the gentleman from Illinois, and if he has not obtained the information, if the committee had it, it was because the gentleman did not ask for it.

Mr. WILSON. If I had the same information the gentleman from Wisconsin had I would have gotten it in the same way he did, and the way he got it was a way I was not in favor of getting it. He knows it as well as I do. He knows this bill was *considered at dinners, night after night,* and I was not invited, and *other members* of the committee were not invited, and that is when you considered this measure and when you brought it out.

Mr. MINOR. Mr. Chairman, night after night——

Mr. McCALL. Mr. Chairman, I rise to a point of order. I submit it is not in order to refer to what took place in committee or between members of a committee.

Mr. SULZER. *He complains about what did not take place.*

Mr. MANN. *The trouble was* it *was not* a *committee meeting.*

The CHAIRMAN. The Chair has not been following very closely the speech of the gentleman from Illinois when interrupted; but the Chair will say to the gentleman from Illinois that to refer to proceedings in a committee is not in order.

Mr. SULZER. He referred to *proceedings* at a *dinner.*

Mr. GROSVENOR. I regret very much that the gentleman's argument should be interrupted by any objection either by the Chair or on the floor.

The CHAIRMAN. The gentleman will proceed in order.

Mr. WILSON. I am glad the gentleman from Ohio feels so kindly toward my argument. I will assume that it does not agree with his ideas as to this bill, and he very likely will reply to it, and I hope he does, and I expect to be here when he replies to it.

Mr. GROSVENOR. Mr. Chairman, I pledge myself never to reply to it.

Mr. WILSON. I *will ask* the *gentleman* to *reply to it.* I will ask the gentleman to *answer some questions* that I will *put* to *him now,* and advise this committee on them. Mr. Chairman, as I said a few minutes ago, I have taken the pains to secure some information. The longest line on the Atlantic coast, from New York City to Buenos Ayres, is supposed to be 6,000 miles. It pays a subsidy of $800,000 under this proposed bill. I have taken the pains to ascertain whether or not this subsidy of $800,000 per year was enough money to pay the ships that might take advantage of this opportunity to carry our mail to South America. For example, I took the vessel the *Morro Castle,* of over 6,000 tons and 18 knots speed. I find, from my best information, *and it is true* that this *Morro Castle* uses 110 tons of coal per day; that the average pay of the crew of this vessel is $140 per day, and the cost of feeding this same crew is $78.10 a day, and that the cost of bunker coal, including the trimmings, is $3.40 per ton, which are the actual expenses of running a vessel—less repairs, which I am unable to estimate. At the rate of speed it is supposed to make it will take about thirty days of continuous sailing to make this trip from New York City to Buenos Ayres, South America, and return. Of course that does not include the stop it may make at two or three different ports on the way, or the length of time, but I do not know how many stops it will make. I do not know how much time it will spend at each stop, and the only thing that I could do was to compute the actual number of days of sailing it would take this vessel in making a trip, and I find it is thirty days and that it would consume 3,300 tons of coal, at $3.40 a ton, which would be $11,220. That is the price of the coal at New York, according to this information, and I have information from other statistics that I have gathered that it was less than $3 a ton in 1906. But the difference, I understand, provides for putting the coal on the vessels and all the expenses incident thereto.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. WILSON. As soon as I get through with this I will be glad to do so. That means that the price of coal is $11,220. The wages of the crew of this same vessel for thirty days is $4,206.30, and the food that the crew will consume in that length of time is $2,243, making, *in all, $17,669.30* cost per ship. The subsidy that is provided for in this bill—and the gentleman from New York [Mr. LITTAUER] made the statement on the floor of this House and it was made in our committee—is $800,000, which provides for *$30,770 per trip.*

The CHAIRMAN. The time of the gentleman has expired.

Mr. WILSON. Mr. Chairman, I would like permission to complete this computation which I have for the benefit of the House and the country.

Mr. GOULDEN. How long will it take the gentleman to complete?

Mr. WILSON. Thirty minutes.

The CHAIRMAN. The gentleman is recognized for thirty minutes longer.

Mr. WILSON. As is shown, the exact expense is $17,699.30 in making one trip, and the subsidy provided under this bill is $30,770 per trip, leaving, if you please, a net profit on that trip of $13,070.70. And if they make twenty-six trips, and they should to take advantage of the fortnightly service, the profit in one year would be $339,838.20, and under this contract for ten years it would mean a net profit of $3,398,382 from the subsidy provided for under this bill. This *profit* from the subsidy would more than pay for all the ships on this line. It would make the shipowners very, very happy and grateful and prosperous, to say nothing about the freight and passenger hire,

which would grow to immense proportions and amounts. *These are figures and facts I ask the gentleman from Ohio to contradict.*

Mr. Chairman, I may not have computed all of the expenses incidental to the running of a vessel, but I contend that I have computed the greatest expense and the most of it, and the greatest of it is *coal* and *labor* and *food*. The other expenses that might come under this are wear and tear, insurance, and the natural decay of a vessel that is run year in and year out. But, if you please, Mr. Chairman, these vessels which make these trips are supposed to carry some freight; they are supposed to carry a few passengers; and if they carry freight and passengers, they will be paid for so doing, and that sum is to be added to the subsidy profit as a profit.

Mr. WANGER. How many men does it require to man this ship?

Mr. WILSON. I have the statement. It requires 128 men on the *Morro Castle*.

Mr. WANGER. And the gentleman allows two hundred and fifty-odd dollars for thirty days' sailing?

Mr. WILSON. Oh, no. I allow for thirty days' sailing $4,206.30. I tell you how I have done it. The cost per day of the crew, as this letter shows, is $140.21, and thirty days would be thirty times that, which is $4,206. The cost of food is $78.10 a day, and for thirty days would be $2,243. You will see the cost of food at $78 a day for thirty days would be $2,243. You will find that my computation is right, and according to that there is a profit, as I said, of over $3,398,382 in a ten-year contract, which provides for $8,000,000 from the Government; *and I contend that it is too much*, and if it is too much in this line, *I contend that it is likely to* be *too much* in the other lines.

Mr. PRINCE. Will the gentleman yield to a question? Will you be kind enough to state to the House what the first cost of that vessel is?

Mr. WILSON. About $650,000, and it would take three vessels, with a total cost of about $2,000,000. The vessels would be paid for out of the *subsidy profit* in six years.

Mr. PRINCE. About 20 per cent on that?

Mr. WILSON. About $650,000, as I remember, was the first cost of this vessel. It might have been more; it might have been $800,000. But let it be $800,000 or a million; the expense of running the vessel would be no more.

Mr. HUMPHREY of Washington. Will the gentleman yield for a question?

Mr. WILSON. I will be glad to do so.

Mr. HUMPHREY of Washington. The gentleman knows, in making his statement to the House, that the vessel of which he speaks is now under contract with the Government to run to Cuba and receiving a compensation equal to what it would receive under this contract.

Mr. WILSON. I know it is not, and I would not care if it did. I use that vessel as an example to show to this House and to the people of this country that this sum provided for under this bill is unreasonable, unwarranted, and altogether out of proportion to the amount that is needed.

Mr. HUMPHREY of Washington. I admit that the gentleman's argument is legitimate in that particular. But a few moments ago the gentleman was arguing that this vessel would take much of the subsidy.

Mr. WILSON. I said that it could take advantage of it, possibly. I do not know that it can, and I do not know that the gentleman from Washington [Mr. HUMPHREY] knows that it can not, and I don't care. Its the principle I am talking about.

Mr. HUMPHREY of Washington. I know it is under contract.

Mr. WILSON. I have no information that it is under contract. There were no hearings before our committee that it is under contract. The members of this committee do not know whether it is under contract or not. And if the Members of this House care to learn, they must go, as I have gone, to the different Departments of this Government or write letters and secure the information for themselves.

*Mr. Chairman, the people of this country* are not in sympathy with any legislation which will pay a private enterprise's expenses and give them full rein to make such exorbitant profits. It is not the *spirit of the times*. The subsidizing of special interests is *unpopular, unjust*, and *contrary* to the wishes of the *American people* and the *spirit of the Constitution;* and we now see in many cases the folly of such laws as were enacted by our forefathers. The spirit of the times is more to take a hand in the supervision of public enterprises like this and to see that no exorbitant profits are being made on capital invested as a result of overcharging the patrons of their enterprises and to see that a fair deal and fair show is given everyone, and that money or owners of wealth shall not be supreme and defeat all equities in commercial or business life. In other words, this Government is supposed to have a fatherly care for all of its people. It is supposed to see that all men and business enterprises are treated fairly and equally, and we are here for the purpose of seeing that such a spirit is duly exercised. *No man would willingly, consciously, and honestly legislate this sum of money to any enterprise if he knew or if he believed that the sum proposed was out of proportion with the sum required* to make this business reasonably profitable. *And he should know* before he casts his vote for this or any like measure, and if he does not know, *and you do not*, he should vote against it. If any subsidy is ever legislated by this Congress—and I hope there will be none—I for one trust that it will be legislated in such a manner that the Government may maintain supervision over it. Let such subsidy depend upon the requirements, the business needs, after a thorough investigation by the Government each year.

Let us learn something about their business. Let us ascertain what they do and how much they need each separate year to pay only a reasonable profit on money invested. I am sincerely opposed to a maximum subsidy, a guess, a hit-or-miss sum or policy, or a lump subsidy for ten years, and there are many reasons for it; but the main reason is that if this contract is entered into it is irrevocable. As soon as a line is established to the South American ports the commerce between the two countries may soon be enough to pay the expenses and make it a profitable business without any subsidy; and if such would be the case this Congress would be *rightly accused* of *ignorantly or maliciously legislating millions* upon *millions* of *dollars* of the *people's money* to *private enterprise*. The *policy* is *un-American*. The *demands* are *unreasonable*. The people of this country are not in sympathy with this movement. If we are to vote a mail subsidy to the American merchant marine of this kind and the spirit of it is *solely* for the building up of an enterprise and *creating better* and *closer relationship* between *this* and some *foreign country*, which is to be for the *benefit* of all of the *people* and the *American merchant marine*, let it be given for the *sole* and *only purpose* of *encouraging* and *building* up our *merchant marine* and *our commerce*, and let the business men who believe in the undertaking or enterprise devote some of *their patriotism, pride*, and *business ingenuity* for and in consideration of the help we may give them. Let us go into an *open, honest, frank business deal*—one in which the *pioneer* of this enterprise wants only a *reasonable* interest on the *actual* money invested and the *honor* that he would have in the hearts of his countrymen. It might take three or four hundred thousand dollars the first year or two from our Treasury, but I will venture to say that it would grow much less each year and that in ten years a successful business enterprise would be established *without expense* to the *Government*, as has been the case in many lines of transportation on land and sea. Give this aid to an *ambitious, patriotic, energetic, up-to-date American business man*, such as *this country alone has known*, and then you will have your merchant marine.

On the Pacific coast the majority advise us in their report that there are perhaps one-half as many American ships on the Pacific coast as would be needed to take advantage of the contracts as provided for by this subsidy, and that the owners of these ships must have this subsidy or help, or they will either be laid up or sold to some foreign nation. I have heard that remark so many times that if they do not stop repeating it I will believe it, as some others do. Their old threat to sell to a foreign nation unless we give them money is unpatriotic and unworthy of an American merchant. It is a hold-up game, nothing more. I have heard it in our hearing before our committee on the Senate bill. I have read it in the hearings before the Commission. I have heard it in private conversation. I have heard it on the floor of the House. I heard it two years ago. I heard it four years ago, and still their threat has never been carried out; but in lieu thereof they have continued to carry the traffic of the Pacific coast and the other ports, and they are doing it to-day. *There is absolutely no truth in their statements to that effect*, as is shown by the testimony of Mr. Schwerin, of the Pacific Mail Steamship Company, during the hearings before the ship-subsidy Commission at San Francisco, Cal., in August, 1904, when he said, in talking about the cost of operation of vessels and the business his company was doing: "The *Korea* and *Siberia* cost the Pacific Mail Company about $3,400,000 to construct and put upon the seas. The *Mongolia* and the *Manchuria* cost the same company for the same purpose about $4,500,000. The *Korea* and the *Siberia* were built in 1902. They carry over 11,000 gross tons each, with a speed of 18 knots per hour. They are now traveling from San Francisco to China and Japan by way of Hawaii. They are two of the several vessels belonging to the Pacific Mail Company which

are used as an outlet and a feeder to the great transcontinental railroads belonging to the system controlled by E. H. Harriman." Mr. Schwerin stated that they had paid off on the indebtedness of the *Korea* and *Siberia* up to the end of the fiscal year ending June 30, 1904, it being two years or thereabouts of service, the sum of $2,700,000, and at that time there still remained owing on these two ships about $1,300,000, from which statement it can plainly be seen that there is a profit now being made in the foreign trade of this country by America's merchant marine. *They are traveling side by side with* the Japanese and other foreign steamship lines. They are doing their loading and unloading at the same ports. They are receiving the same compensation for carrying this trade that these other vessels are receiving, and their agreement is so complete that they have the same agencies, that they use the same time-table, that they advertise together, that their vessels do not conflict with each other in departure. I claim that they have a business arrangement, a gentlemanly agreement, and there is practically no competition between them to-day. The arrangement is so complete and so harmonious and so agreeable that a splendid profit is maintained by all interested and concerned.

There are three distinct lines on the Pacific coast that are in such dire need and distress and so badly in want and on the verge of destruction that they are about to pick up their anchors and *float away*, never to be seen and heard of again, because the American people will not pay subsidy for their maintenance. They are not making enough profits to fill the coffers and swell the bank accounts of several multimillionaires of this country. They are so poor and needy that they want us to buy their little patriotism with a few million of dollars of the people's money.

The first line as provided for under this proposed bill, in accordance with section 4, for the line from the Pacific coast to the Isthmus, Peru, and Chile, is a line which is now owned and controlled by that splendid general of finance; by that splendid American citizen; by that splendid builder of American enterprise; by that splendid general of Wall street; by that splendid American financier, who has grown up from obscurity to the top round of the financial ladder of fame, to the highest pinnacle of American industrial wealth; by that man who has at all times under his control in the banks of New York $100,000,000 to be used for the purpose of building or buying great railroad or steamship interests; by that splendid American citizen who has in a day or a night so manipulated the market of a certain product or enterprise that tens of millions of dollars have been lost by the unsuspecting public and millions and millions gained by these high financiers. By a single expression he has created such competition in certain enterprises that the business was done at a loss and the weaker ones eventually fell into his power and under his supervision. Then by one magnificent stroke of his this same enterprise picked up the broken threads of destruction and commercial ruin and became thriving and prosperous, and the people, the patrons thereof, paid the bill.

*The records of financial ruin* are full of many such cute, shrewd commercial dealings. *The hearings before the Interstate Commerce Commission* show that this same man purchased the Coos Bay property for a sum far in excess of its value, simply for the purpose of stifling competition, and *how this same man acquired the Oregon Railway and Navigation Company in 1901* and immediately circulated literature in China and Japan warning merchants and others not to ship over the Graham lines, "the Oregon and the Oriental," as it had no transportation facilities on this side of the ocean, and after an immense expense of money, energy, and time the Graham lines went out of business and left the trade with Japan, China, and the Orient in his control so far as the output of his immense lines of railway between the Pacific coast and the Atlantic coast, with all of its tributaries, is concerned; and do you believe that after this stifling of competition had been accomplished by him that the transportation for our exports and imports became materially reduced? Do you believe that he put these competitors of his out of business and purchased their properties for the good of the American people and for the purpose of keeping freight rates and transportation at a more reasonable price? And do you believe that he will still lower the price of transportation and freight rates as soon as he receives this splendid sum of many millions of dollars as a subsidy, and that he will spend the greater part of it in bettering the condition and wages of the common seaman? Do any of you people think that if this subsidy is voted to the special interests that it will in any material manner affect the transportation and the freight rates to and from foreign countries, or will it better the lines that are now established and doing a good and profitable business?

Section 5 of the proposed bill provides for a subsidized line from the Pacific coast to Hawaii, Japan, China, and the Philippines; and I wonder who is there now indulging in Pacific trade that cares to enter into competition for the commerce of the world with this same splendid American when he has now established a well-defined line of ships connecting directly with the Southern Pacific Railroad Company on the Pacific coast at San Francisco with a line of steamships running by the way of Hawaii, Japan, China, and the Philippines? A well-established and a well-equipped line with an advertised trade and travel. He now has in this same line the following ships, *Manchuria*, *Mongolia*, *Korea*, *China*, and *Siberia*, carrying with them 55,000 tonnage, with a sufficient rate of speed. *They are doing good business;* they have been doing good business, and they are making money on the actual capital invested. *They are growing greater and greater* every year, and it will only be a matter of a few years, and I may say long before this proposed subsidy is exhausted, that it will be one of the most paying branches of their lines of transportation from the Atlantic coast to the Orient. *It is now nothing more than a continuation of his railroads across the seas.* These two proposed lines will run from San Francisco, one to South America, and one to the Orient. They will be known *as the outlet for the southern railroad companies.* One of them is well established, the other is partially established. Both of them are owned and controlled by the same man, and both of them will receive these same millions of subsidy as proposed in this bill; *and this same subsidy will not provide a cheaper freight rate nor a better service.*

Section 6 of this proposed bill provides another subsidized line from the Pacific coast to China, Japan, and the Philippines. Of course this provision in the law is as indefinite as the others; *but we must look at it from a practical standpoint*, we do not know from which point this line will start. We must speak of it frankly, and in my mind, and I believe in the mind of every member of the committee, this is for a line from Seattle. There is and can be no doubt about it, *or in other words, it is a continuation of* the *Great Northern Railroad Company to the Orient over* the *deep waters* of the *Pacific Ocean.*

There is to-day a well-established line over that route. It is the finest line of steamers floating the American flag. They are newly built and modernly equipped in every possible way. There are four of them in number, and as follows: *Minnesota*, 20,700 tons, 14½ knots speed; *Dakota*, 20,700 tons, 14½ knots; *Shawmut*, 9,600 tons, 14 knots; *Tremont*, 9,600 tons, 14 knots. They carry in the aggregate 60,000 tons and have 14 knots of speed. *They are there in reality.* They have an *established line. They* have an *established trade. They have* an *established business. They have advertised.* The people that do business on this line will continue. *No competitor could venture* on the seas in the same course with the subsidy which is provided under this bill. There is no place for them to go. There is no trade that they could get. There are no people that have the nerve and the enterprise and the wealth and the patriotism to bid for this subsidy in competition with the Great Northern Railroad Company, and if this steamship line is a continuation of the Great Northern Railroad Company across the seas the Great Northern Railroad Company will be the beneficiary under this bill. Mr. Chairman and representatives of the American people, I ask you, down deep in your hearts, as representatives of your constituency, do you believe that the Great Northern Railroad Company needs these extra millions of dollars for the purpose of staying in business and satisfying the stockholders with a larger dividend? Do you believe any other line would bid for this unless it was a part of the Great Northern Company? Do you believe that your constituents will sustain you in voting for this proposition to help along the Great Northern Railroad Company? How many of you have constituents in your district who are stockholders in this company who would get a part of these millions, and who of you have not constituents who would pay a part of these millions to this railroad company? Whose constituents are not sufficiently taxed to-day in the interest of these enterprises?

The seventh and the last provision for a subsidy in this bill is from the Pacific coast by way of Hawaii and Australia. It is more specific than the previous sections, as it specifically provides for a subsidy of $200,000 per year to be paid for a line which is now in the service to the same ports and a line which is now receiving $293,000 every year for carrying the mails of this country—*a line which is also well established and doing business and getting a subsidy from other countries for carrying* their mail to this country, of many thousands of dollars, but which comes to this Congress begging for more money to help pay more dividends; begging for money and promising if it does not receive it it will break its contract with the Government. Were we hired to come here and vote a large sum of our money to a concern which claims that if it does not secure its price

that it will break its contract or agreement deliberately and willingly reentered into with the Government? *Is that patriotism that* we are to *buy from them* for a *price* the *kind of patriotism* that *will establish markets* and *commerce* in *the foreign world?*

Mr. Chairman, I contend that this bill is full of deceit and double meaning. There is absolutely no doubt in my mind, and I hope that there is none in the minds of the Members of this House. I claim that each provision of this bill is specifically a provision for certain shipowners, shipping interests, or shipping lines that are now established and plying in their trade. The subsidy which provides for a line from Seattle to the Orient is an extension of the Great Northern Railway Company across the seas, and section 6 should state that this $700,000 a year is to be paid to it. No other man or company could or would compete with it in this trade, and if they did exist, it would use every effort at its command to stifle the competition and put such man or concern out of business. That has been its record on land and we have every reason to believe that it would be the same on the seas.

Sections 4 and 5 are sections which specifically provide for a subsidized line or lines, now owned and controlled by the Southern Pacific Railway Company, and we all know there is not a doubt in the mind of any man that the Southern Pacific Railway Company would stifle and crush any concern, if it was in its power, that would come into this territory for the purpose of taking away from it any part of the trade. These two sections provide for lines running from San Francisco out into the seas. They are to be the outlets of the products of the great lands and industries in the North, the West, and the Middle West, through which this great system of railroads runs, and these railroads so owned and controlled will deliver their freight to this line of steamers and to no one else. These railroads have the absolute control of the traffic of that part of this country. The hearings before the Interstate Commerce Commission and other inquiring boards are full of testimony telling us of the manner in which competitors are put out of business and competition and industries are destroyed; and for that reason and for many others I say there is absolutely no doubt, in my mind, that these subsidies are special provisions for the Southern Pacific Railway Company and should so state in the language of this bill, if you intend to be honest.

Section 7 is more specific, and plainly states that the $200,000 a year provided for in this bill is in addition to the compensation now provided for under the contract with the Government to the Claus Spreckels Line, which is now receiving $294,000 per year and which Mr. Spreckels claims is not enough, although he knowingly and willfully reentered into a contract for that price with the Government. He also receives a subsidy of many thousand dollars per year from foreign countries for same ships and on same run.

The subsidy under sections 1 and 2 belongs to none other than C. W. Morse, of Boston and New York, who has under his ownership and control sixty-seven of the finest vessels on the Atlantic coast, plying in the coastwise trade, and since this bill was reported from the committee he has been negotiating for several other Atlantic steamship lines, and has recently purchased what is known as the "Ward Line," for $20,000,000 or more, giving him a total of nearly a hundred vessels.

*Mr. Chairman, what does this mean? Does it not mean that he is bidding for this subsidy,* and that *he expects to get it,* and that he is making every preparation to secure it? And does it not further mean that he is endeavoring to *monopolize* the *coastwise trade* and *vessels* of the *Atlantic coast?* And with this subsidy and the immense shipping interest which he has he will be able to put out of business practically every line and *absolutely control* the *transportation* and *traffic* on the *Atlantic coast. If the subsidy helps one line, it will injure the others to such an extent that they will be unable to bear up under it.* The subsidy which is mentioned under this bill as the mail subsidy is a sham and a fraud. It is not a mail subsidy. A mail subsidy is for the purpose of bringing this country and foreign countries in closer commercial touch with each other. It is supposed to be for the purpose of increasing our trade relations. It is for the purpose of securing and taking more orders for business. That manner of doing business has long since passed, and to-day it is estimated that over 90 per cent of all the business done between foreign countries is done by cablegram. This busy business world can not afford to wait for weeks and weeks for the coming on of orders which may never come. Consequently there has been established in every large city of this and foreign countries boards of trade and brokerage houses which buy and sell to be delivered at some future date the products of their respective countries. The price at the day of purchase may be more or less at time of delivery. It is purely a case of speculation, and we can plainly see the inconsistency of doing business by mail over the seas. The most important mail matter that the vessels would carry would be composed of advertising matters, dun and love letters, and the most important business of these same subsidized mail vessels would be in the freight that they would carry, and the subsidy *which they would receive would enable them to absolutely put out of* business *all competing lines in their course. The subsidized ships under this law may go into the coastwise trade, and if they do, they will destroy competition and build* up the *greatest monopoly in the world in transportation.* This subsidy bill provides for payments to lines that are already in operation. *There is no defense for such appropriations,* and if Congress insists on making them, the members of this body will very likely hear from their constituents on the subject. Mr. Chairman, the Great Northern Railway Company, the Southern Pacific Railway Company, and the Spreckels Steamship Company, who own these well-established lines, do not look *well as applicants for public charity.*

While this bill professes to provide better mail facilities between this and the foreign countries and relies on that provision for the justification of its passage, the bill, if passed as it now stands, will not accomplish such results, so far as the oriental service, at least, is concerned, unless our Post-Office Department continues to pay for mail service and mail subsidies as now exist in that service.

On page 25 of the report of the superintendent of methods of the Post-Office Department the superintendent says:

By means of steamers sailing three or four times a month from San Francisco and three or four times a month from Seattle or Tacoma mails for Japan and China have been dispatched not less than seven times a month.

These mails have included articles for the Philippines, but mails for the Philippines have also been dispatched by Army transports, which sailed from San Francisco for Manila about every twenty days. Correspondence for Japan and China has also been forwarded to Vancouver, British Columbia, for dispatch per steamers leaving that port about every three weeks, when the delivery of the correspondence would be thereby expedited.

Mails for the Australasian colonies have been dispatched from San Francisco once every three weeks by means of the contract steamers of the Oceanic Steamship Company, the transit time from San Francisco to Sydney being twenty-one days and mails being delivered en route at Pago Pago.

Advantage is also taken of the opportunities offered for the dispatch of correspondence for those colonies by means of the Canadian Line of steamers, sailing from Vancouver, British Columbia, once every four weeks.

The Oceanic steamers and those from Vancouver, above referred to, call at Honolulu, and most of the steamers en route from San Francisco to Japan and China usually call at Honolulu. Including the service under domestic mail contracts between San Francisco and Honolulu, there were from seven to ten opportunities a month for communication by mail with Hawaii, and generally there are not less than eight.

Mails for Japan, China, and the Australasian colonies are forwarded from San Francisco to Honolulu, to be transferred there to steamers sailing from Vancouver and calling at Honolulu en route to those countries, and mails for the United States arriving at Honolulu by steamers bound for Vancouver are transferred to steamers sailing from Honolulu to San Francisco. By such transfers the delivery of the mails so transferred is expedited by three or four days.

Mr. Chairman, in conclusion I say that our mail facilities to foreign countries are ample; that few, if any, new vessels would necessarily be built; that these exorbitant amounts of subsidy are to be paid mostly to steamship and railroad companies now in existence and doing a good and profitable business, and that the $40,000,000 carried under this bill will be a drain upon our Treasury and a wicked waste of the people's money. [Prolonged applause.]

Mr. GROSVENOR. Mr. Chairman, the Commission appointed by Congress to take testimony and report to Congress in relation to the merchant marine of the country printed its own record, on the order of the chairman, Senator GALLINGER, and there were furnished to any Member of Congress who desired them the three volumes of the printed testimony. I never had but one copy myself. I could have obtained more. I knew how to get more if I had wanted them. The hearings before the committee on the pending measure, which hearings occupied three days in the month of April, were printed, 8,000 copies of them, under the authority given to the committee by order of the House. A copy of those hearings was put into the post-office, in the mail box of every Member of this House, and a sufficient number were retained, so that each Member could have had ten or more copies if he had called for them. There are thousands of those copies in existence now.

Mr. WILSON. Mr. Chairman——

Mr. GROSVENOR. Let me finish my statement. There have been several documents printed by order of the committee since that time. The majority report and the minority report have been printed, first by the House, and then the majority report reprinted by order of the committee. There have also been printed the President's message, the speech of the Secretary of

State, and each document, without a single exception—I challenge contradiction, and I denounce any other statement than that as utterly false—has been put into the box of every Member of this House.

Mr. WILSON rose.

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Illinois?

Mr. GROSVENOR. Not at present. Moreover, there has never been a time when there was a lack of these documents available for any Member of the House who would call for them. But we have been extremely careful to put into the box in the post-office a copy of every document that was printed by order of the committee.

Mr. McCALL. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Massachusetts?

Mr. GROSVENOR. Yes.

Mr. McCALL. Will the gentleman undertake to have the committee informed before the conclusion of the consideration of this bill what would be the reasonable cost of one of these ships and what would be the cost of operating?

Mr. GROSVENOR. One of what ships?

Mr. McCALL. One of the ships that will meet the requirements of the provisions of the bill. I think that is a very important matter.

Mr. GROSVENOR. I will have an official statement here tomorrow at an early period of time.

Mr. WILSON. Were the hearings that the gentleman from Ohio just referred to in relation to the bill which is now under consideration, the amended bill?

Mr. GROSVENOR. There were no hearings had after the amended bill was brought into the House.

Mr. WILSON. Did the original bill, upon which the hearings which you refer to were had, carry with it the same provisions as the bill now under consideration?

Mr. GROSVENOR. Not entirely the same.

Mr. WILSON. Are the amounts of subsidy to be paid under the bill now under consideration the same amounts as were to be paid under the bill which was considered by the committee?

Mr. GROSVENOR. Certainly not.

Mr. WILSON. That is exactly my position.

Mr. GROSVENOR. Well, it is exactly the position of every intelligent member of the committee.

Mr. Chairman, I now yield five minutes to the gentleman from Pennsylvania [Mr. GRAHAM].

Mr. GRAHAM. Mr. Chairman, in the brief time allotted me I simply desire to put myself on record as favoring this bill, with a few reasons therefor.

First, as an ardent and consistent Republican, I stand firmly for what I consider a fundamental principle of that party, viz, "Protection to American industries." American shipping engaged in foreign commerce is the only industry in this country that is not now nor has it for many years been protected, and as a consequence foreign subsidized competition has almost driven our shipping off the seas.

Foreign governments, in their anxiety to develop their trade, have granted liberal subsidies. It is estimated that over $8,000,000 is now paid annually by our foreign competitors to their steamship lines. With such a fearful handicap, how is it possible for our shipping to survive? It is not natural, but subsidized competition with which we have to contend. Even little Spain, whose navy we wiped off the sea, is endeavoring to build up a merchant marine and is granting liberal subsidies to its steamship lines.

From 1800 to 1861 our country was second in ocean supremacy, being excelled only by England, the "mistress of the seas." Under the wise counsel of all of our Presidents, from Washington, Jefferson, Madison, down to Polk, the policy of the Government favored and fostered our foreign commerce, with a tonnage tax on foreign bottoms. The Democracy, however, under unwise leadership, finally took off those duties and tonnage tax, and our foreign shipping declined rapidly. At that time American ships were carrying 65 per cent of our foreign commerce. Last year it was less than 10 per cent.

Is it not time that we were awakening from our Rip Van Winkle sleep and, under advice given us by our Republican Presidents—Grant, Harrison, McKinley, and Roosevelt—take some vigorous steps toward reestablishing our merchant marine and wrest from our foreign competitors the supremacy of the seas?

Foreign companies now monopolize nine-tenths of our ocean trade and receive each year over $200,000,000 for carrying our foreign mails, freight, and passengers.

As a representative of the greatest manufacturing center, not only of America but of the whole world, I am deeply interested in this matter. Our manufacturers have been so busy in supplying the home demand of this great country that they have virtually neglected the foreign market, so that we to-day are only exporting 5 per cent of our manufactures. But we are increasing our facilities so rapidly, giving work at remunerative wages to all who desire to labor, that the supply is now almost equal to the demand, and if we desire to keep up this prosperous condition we must soon look abroad for a market for our surplus, like our foreign competitors are now doing.

England and France now send to other countries 75 per cent of all their manufactures; Germany, 25 per cent, while, as I said before, this country only exports 5 per cent of its manufactures. These foreign nations, through the agents of their subsidized steamship companies, are constantly seeking freight and developing new markets for their wares, advising and posting their manufacturers as to the particular wants and peculiar designs desired in South American, South African, and oriental countries; also giving advice as to the necessary mode of packing for convenience of sale and handling, as well as conforming to the peculiar ideas and usages of these foreign countries. The only such advice our manufacturers receive is the little which is forwarded by our diplomatic and consular officers abroad.

With the completion of the Panama Canal and a 9-foot channel down the Ohio and Mississippi rivers, Pittsburg will have almost seaport advantages and can ship her great products (mostly of a heavy and bulky nature) by cheap water rates to all parts of the globe, thus enabling her to successfully compete with Germany, who is to-day almost her only rival in the manufacture of iron, steel, and glass.

Many of my hearers may be unaware of the fact that Pittsburg, known as the "Iron City," began her unparalleled career in manufacturing by building ships. Early in the last century, in 1804, I believe, one of the ships built there (the *John Adams*) floated on flood waters down the Ohio and Mississippi to the Gulf and carried the American flag around the world, being one of the first to carry the new flag into oriental waters.

For what reason are we providing for the expenditure of two or three hundred million dollars for the construction of the isthmian canal if it is not to benefit and improve our ocean traffic? Shall we sit supinely by and permit our merchant marine to be supplanted by foreign ships and see the pitiful 10 per cent of our foreign commerce now carried in American bottoms transferred entirely to other flags? Is this glorious emblem of universal freedom that fifty and seventy-five years ago floated from the peak of American ships in every clime and on every sea only to be found upon the comparatively few battle ships and cruisers we have in foreign waters? I can not, I will not believe it.

Another feature of this bill that commends itself very strongly to me is the provision for building up a naval reserve of skilled and hardy young Americans. As stated in the very able report accompanying this bill, the United States is the only important naval power that has no naval reserve of trained professional seamen. While some of the States, my own among the number, have a small volunteer naval militia, they are not composed of men habituated to the sea. This measure if enacted into law will furnish a fine body of men, estimated at 10,000, thoroughly inured to the sea, ready at the call of the President in case of war to man our battle ships and cruisers or to handle the numerous auxiliary fleet, such as transports, colliers, supply ships, etc., and assist our men behind the guns to wipe off the seas any foreign foe that might attack us.

What was the secret of the success of little Japan in first bottling up the fleet of her proud and haughty foe and then demolishing them so quickly and completely, as Dewey and Schley did the Spanish fleets at Manila Bay and Santiago? To my mind one of the great factors was the hardy, seasoned fishermen of that island kingdom that constituted Japan's naval reserve, which with a little training became a counterpart of our typical "men behind the guns," to whom Admiral Dewey gave such credit for his victory.

Now, as to the cost of all this. The committee report that it will not cost the American people one dollar, the money collected for sea postage defraying all the bounties, expenses, etc.

In conclusion, I will state frankly that while this bill to my mind does not go far enough, yet it is a step in the right direction, and when followed up by future legislation, as I am firmly convinced it will be after a fair trial, even our Democratic opponents, who are so strongly opposed to protection in any form, will be compelled to admit its inestimable advantage to the whole country. [Applause.]

The CHAIRMAN. The committee will now rise under the order of the House to dispatch business mentioned in that order.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. CURRIER, Chairman of the Committee of the Whole House on the state of the Union, reported that that

committee had had under consideration the merchant marine ship bill and had come to no resolution thereon.

ENROLLED BILLS SIGNED.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that bills of the following titles have been found correctly enrolled; when the Speaker signed the same:

H. R. 17814. An act granting an increase of pension to Simon E. Chamberlin;

H. R. 21413. An act granting an increase of pension to Mary S. Platt;

H. R. 21788. An act granting an increase of pension to Satina A. Waymer;

H. R. 21818. An act granting an increase of pension to William Hardesty;

H. R. 21827. An act granting an increase of pension to Francis Murray;

H. R. 21899. An act granting an increase of pension to Catharine Koch;

H. R. 21911. An act granting an increase of pension to George Newton;

H. R. 21914. An act granting an increase of pension to Ferdinand Pahl;

H. R. 21974. An act granting an increase of pension to John W. Lowell;

H. R. 21983. An act granting an increase of pension to James E. Pusey;

H. R. 22055. An act granting an increase of pension to Maria Lorch;

H. R. 22063. An act granting an increase of pension to Horace F. Packard;

H. R. 22093. An act granting an increase of pension to Lars Isaacson;

H. R. 22165. An act granting an increase of pension to John Hand;

H. R. 22169. An act granting an increase of pension to Cynthia M. Bryson;

H. R. 22170. An act granting an increase of pension to Benjamin James;

H. R. 22175. An act granting an increase of pension to Charles Prendeville;

H. R. 22199. An act granting an increase of pension to William Templin;

H. R. 22216. An act granting an increase of pension to Griffin A. Coffin;

H. R. 22251. An act granting an increase of pension to Samuel Manly;

H. R. 22260. An act granting an increase of pension to James E. Bissell;

H. R. 22283. An act granting an increase of pension to Stoddard Caswell;

H. R. 22294. An act granting an increase of pension to Perry Lamphere;

H. R. 22302. An act granting an increase of pension to Burrell H. Gillam;

H. R. 22326. An act granting an increase of pension to Mary Levina Williams;

H. R. 22327. An act granting an increase of pension to Isabel Manney;

H. R. 22328. An act granting an increase of pension to Susan Baker;

H. R. 22329. An act granting an increase of pension to Margaret L. James;

H. R. 22330. An act granting an increase of pension to Mary C. Jones;

H. R. 22426. An act granting an increase of pension to Louisa E. Robertson;

H. R. 22441. An act granting an increase of pension to Jacob Mose;

H. R. 22468. An act granting an increase of pension to William Kelso;

H. R. 22503. An act granting an increase of pension to William A. Clarke;

H. R. 22529. An act granting an increase of pension to William Truett;

H. R. 22540. An act granting an increase of pension to Richard Turnbull;

H. R. 22547. An act granting an increase of pension to John Hickcox, jr.;

H. R. 22548. An act granting an increase of pension to Franklin H. Davis;

H. R. 22562. An act granting an increase of pension to George J. Abbey;

H. R. 22592. An act granting an increase of pension to Andrew J. Frayer;

H. R. 22613. An act granting an increase of pension to Isaac G. McKibban;

H. R. 22617. An act granting an increase of pension to Margaret O'Reilly;

H. R. 22629. An act granting an increase of pension to Josiah N. Pratt;

H. R. 22630. An act granting an increase of pension to George Wiley;

H. R. 22650. An act granting an increase of pension to Thomas T. Baldwin;

H. R. 22701. An act granting an increase of pension to James R. Fairbrother;

H. R. 22703. An act granting an increase of pension to Benjamin F. Richards;

H. R. 22707. An act granting an increase of pension to Sebastian Gerhardt;

H. R. 22727. An act granting an increase of pension to John Miller;

H. R. 22763. An act granting an increase of pension to Charles H. Slocum;

H. R. 22785. An act granting an increase of pension to Morton A. Pratt;

H. R. 22788. An act granting an increase of pension to Isaac B. Gilmore;

H. R. 22798. An act granting an increase of pension to George W. Robinson;

H. R. 22801. An act granting an increase of pension to Robert McMillen;

H. R. 22823. An act granting an increase of pension to John Tipton;

H. R. 22859. An act granting an increase of pension to Samuel Boyd;

H. R. 22863. An act granting an increase of pension to Oscar A. Fuller;

H. R. 22894. An act granting an increase of pension to Louisa Berry;

H. R. 22947. An act granting an increase of pension to Benjamin F. Sibert;

H. R. 22949. An act granting an increase of pension to George W. Wells;

H. R. 22950. An act granting an increase of pension to Hezekiah Poffenberger;

H. R. 22964. An act granting an increase of pension to Eudocia Arnett;

H. R. 22986. An act granting an increase of pension to George W. Beeny;

H. R. 22987. An act granting an increase of pension to John D. Lane;

H. R. 22988. An act granting an increase of pension to Benjamin F. Horton;

H. R. 23031. An act granting an increase of pension to John H. Terry;

H. R. 23034. An act granting an increase of pension to Thomas A. Snoddy;

H. R. 23148. An act granting an increase of pension to Robert Liddell;

H. R. 23150. An act granting an increase of pension to Samuel H. W. Riter;

H. R. 23175. An act granting an increase of pension to Henry A. Fuller;

H. R. 23198. An act granting an increase of pension to Lucie A. Allyn;

H. R. 23280. An act granting an increase of pension to Bartholomew Burke;

H. R. 23282. An act granting an increase of pension to John W. Tumey;

H. R. 23311. An act granting an increase of pension to Jeremiah Burke;

H. R. 23312. An act granting an increase of pension to William Lewis;

H. R. 23313. An act granting an increase of pension to Benjamin D. Reed;

H. R. 23323. An act granting an increase of pension to Robert Foote;

H. R. 23360. An act granting an increase of pension to Robert Hastie;

H. R. 23407. An act granting an increase of pension to Hurd L. Miller;

H. R. 23411. An act granting an increase of pension to George H. Martin;

H. R. 23414. An act granting an increase of pension to Joseph Riddle;

H. R. 23426. An act granting an increase of pension to John S. Bergen;

H. R. 23442. An act granting an increase of pension to James J. Lawley;
H. R. 23443. An act granting an increase of pension to Louisa R. Matthews;
H. R. 23467. An act granting an increase of pension to Michael Flanagan;
H. R. 23609. An act granting an increase of pension to Samuel P. Wallis;
H. R. 23626. An act granting an increase of pension to Richard C. Taylor;
H. R. 23627. An act granting an increase of pension to William B. Walton;
H. R. 23628. An act granting an increase of pension to Clara E. Daniels;
H. R. 23660. An act granting an increase of pension to Harriet U. Burgess;
H. R. 23673. An act granting an increase of pension to John T. Grayson;
H. R. 23675. An act granting an increase of pension to Watson F. Bisbee;
H. R. 23677. An act granting an increase of pension to John D. Dryden;
H. R. 23682. An act granting an increase of pension to Joseph R. Bartlett;
H. R. 23685. An act granting an increase of pension to Robert Brake;
H. R. 23698. An act granting an increase of pension to William H. Wyman;
H. R. 23709. An act granting an increase of pension to James M. Dick;
H. R. 23729. An act granting an increase of pension to John Vandegrift;
H. R. 23732. An act granting an increase of pension to Rosanna Kaogan;
H. R. 23733. An act granting an increase of pension to Gifford M. Bridge;
H. R. 23744. An act granting an increase of pension to John O. Cravens;
H. R. 23748. An act granting an increase of pension to Emily J. Vanbeber;
H. R. 23751. An act granting an increase of pension to Charles D. Moody;
H. R. 23763. An act granting an increase of pension to James Riley;
H. R. 23791. An act granting an increase of pension to Calvin B. Fowlkes;
H. R. 23797. An act granting an increase of pension to James D. Tomson;
H. R. 23802. An act granting an increase of pension to Thomas J. Brown;
H. R. 23806. An act granting an increase of pension to William F. Barker;
H. R. 23834. An act granting an increase of pension to Samuel Langmaid;
H. R. 23849. An act granting an increase of pension to Charles A. Mathews;
H. R. 23850. An act granting an increase of pension to William Freeman;
H. R. 23852. An act granting an increase of pension to James G. Crozer;
H. R. 23857. An act granting an increase of pension to Isaac C. Smith;
H. R. 23864. An act granting an increase of pension to James A. Miller;
H. R. 23890. An act granting an increase of pension to Jacob B. Haslam;
H. R. 23912. An act granting an increase of pension to James E. Fitzgerald;
H. R. 23961. An act granting an increase of pension to Oscar N. Cowell;
H. R. 23966. An act granting an increase of pension to Hugh Stevenson;
H. R. 23967. An act granting an increase of pension to Henry Hill;
H. R. 23968. An act granting an increase of pension to Alexander McWhorter;
H. R. 23971. An act granting an increase of pension to Mary E. C. Butler;
H. R. 23982. An act granting an increase of pension to Thomas H. Seed;
H. R. 23997. An act granting an increase of pension to Michael M. Field;
H. R. 23999. An act granting an increase of pension to John F. Gough;
H. R. 24000. An act granting an increase of pension to Mary Holle;
H. R. 24002. An act granting an increase of pension to Michael F. Gilrain;
H. R. 24015. An act granting an increase of pension to Aaron C. Sanford;
H. R. 24028. An act granting an increase of pension to George H. Boney;
H. R. 24030. An act granting an increase of pension to Andrew J. Foor;
H. R. 24031. An act granting an increase of pension to John Downey;
H. R. 24034. An act granting an increase of pension to Mary I. Banta;
H. R. 24037. An act granting an increase of pension to Theodore Teeple;
H. R. 24061. An act granting an increase of pension to John C. Nelson;
H. R. 24068. An act granting an increase of pension to John Maginnis;
H. R. 24079. An act granting an increase of pension to David Jones;
H. R. 24100. An act granting an increase of pension to Henry W. Wilson;
H. R. 24101. An act granting an increase of pension to George W. Ashton;
H. R. 24161. An act granting an increase of pension to Hugh O'Neal;
H. R. 24171. An act granting an increase of pension to Finus M. Wyatt;
H. R. 24183. An act granting an increase of pension to Joseph B. Joyce;
H. R. 24189. An act granting an increase of pension to Frederick Hoffner;
H. R. 24194. An act granting an increase of pension to William Davis;
H. R. 24197. An act granting an increase of pension to Mary Ann Foard;
H. R. 24210. An act granting an increase of pension to George H. Maddox;
H. R. 24215. An act granting an increase of pension to George Hoell;
H. R. 24220. An act granting an increase of pension to William P. Robbe;
H. R. 24225. An act granting an increase of pension to William Ivans;
H. R. 24226. An act granting an increase of pension to Francis J. Eachus;
H. R. 24269. An act granting an increase of pension to William L. Stewart;
H. R. 24288. An act granting an increase of pension to John Gooding;
H. R. 24294. An act granting an increase of pension to Daniel R. Lamoreau;
H. R. 24299. An act granting an increase of pension to William B. Doyle;
H. R. 24308. An act granting an increase of pension to Lyman Thompson;
H. R. 24334. An act granting an increase of pension to Emma Case;
H. R. 24338. An act granting an increase of pension to James M. Gardner;
H. R. 24343. An act granting an increase of pension to James M. Haney;
H. R. 24344. An act granting an increase of pension to John H. James;
H. R. 24397. An act granting an increase of pension to David Prunkard;
H. R. 24405. An act granting an increase of pension to Mary H. Bishop;
H. R. 24406. An act granting an increase of pension to Edmund Johnson;
H. R. 24413. An act granting an increase of pension to William Thomas;
H. R. 24493. An act granting an increase of pension to Theodoric Gage;
H. R. 24502. An act granting an increase of pension to A. Judson Conant;
H. R. 24504. An act granting an increase of pension to John H. Leiter;
H. R. 24518. An act granting an increase of pension to Reuben Nye;
H. R. 24530. An act granting an increase of pension to David Miller;

H. R. 24531. An act granting an increase of pension to David E. Jefferson;
H. R. 24532. An act granting an increase of pension to Absalom R. Shacklett;
H. R. 24553. An act granting an increase of pension to Sarah J. Reed;
H. R. 24560. An act granting an increase of pension to Margaret Lesley;
H. R. 24577. An act granting an increase of pension to John L. Flanery;
H. R. 24586. An act granting an increase of pension to Jotham A. Vincent;
H. R. 24599. An act granting an increase of pension to Thomas L. Richardson;
H. R. 24638. An act granting an increase of pension to Bernard Shallow;
H. R. 24681. An act granting an increase of pension to Lewis M. Jarvis;
H. R. 24691. An act granting an increase of pension to Edward Burtch;

H. R. 24971. An act granting an increase of pension to Elijah Devore;
H. R. 24984. An act granting an increase of pension to Lauranah J. Hedgepeth;
H. R. 25016. An act granting an increase of pension to Frederick G. Ackerman;
H. R. 25020. An act granting an increase of pension to Cinderella B. McClure;
H. R. 25023. An act granting an increase of pension to Virginia C. Galloway;
H. R. 25025. An act granting an increase of pension to John Ham;
H. R. 25069. An act granting an increase of pension to William A. Decker;
H. R. 25097. An act granting an increase of pension to Edmund P. Weatherby;
H. R. 25101. An act granting an increase of pension to Nancy A. Meredith;
H. R. 25106. An act granting an increase of pension to Francis A. Biffar;
H. R. 25108. An act granting an increase of pension to William H. Brown;
H. R. 25112. An act granting an increase of pension to William Turner;
H. R. 25113. An act granting an increase of pension to John H. Hayes;
H. R. 25120. An act granting an increase of pension to Charles B. Spring;
H. R. 25143. An act granting an increase of pension to Elizabeth Wolfe;
H. R. 25145. An act granting an increase of pension to Charles Henry Weatherwax;
H. R. 25149. An act granting an increase of pension to Joshua L. Hayes;
H. R. 25172. An act granting an increase of pension to Burgess N. Isaacs;
H. R. 25174. An act granting an increase of pension to Henry W. Casey;
H. R. 25176. An act granting an increase of pension to Gottfried Haferstein;
H. R. 25211. An act granting an increase of pension to Alphonso Brown;
H. R. 25214. An act granting an increase of pension to Robert H. Douglas;
H. R. 25224. An act granting an increase of pension to David C. Smith;
H. R. 25229. An act granting an increase of pension to James T. Blair;
H. R. 25247. An act granting an increase of pension to Warren Onan;
H. R. 25248. An act granting an increase of pension to Knute Thompson;
H. R. 25254. An act granting an increase of pension to George W. Warfel;
H. R. 25255. An act granting an increase of pension to Samuel Loy;
H. R. 25256. An act granting an increase of pension to Cyrus W. Scott;
H. R. 25257. An act granting an increase of pension to James H. Phillips;
H. R. 25260. An act granting an increase of pension to Thomas J. Richie;
H. R. 25261. An act granting an increase of pension to William M. Helvy;
H. R. 25263. An act granting an increase of pension to Thomas McDermott;
H. R. 25288. An act granting an increase of pension to Minna Y. Field;
H. R. 25303. An act granting an increase of pension to Adeline Brown;
H. R. 25305. An act granting an increase of pension to Edgar A. Stevens;
H. R. 25309. An act granting an increase of pension to Joseph Casavaw;
H. R. 25325. An act granting an increase of pension to Polly Ann Bowman;
H. R. 25328. An act granting an increase of pension to James W. Barr;
H. R. 25391. An act granting an increase of pension to Richard Gogin;
H. R. 25445. An act granting an increase of pension to William E. Webster;
H. R. 25451. An act granting an increase of pension to William H. Maxwell;
H. R. 25455. An act granting an increase of pension to Emma Hempler;
H. R. 23974. An act granting an increase of pension to John P. Bennett;
H. R. 25511. An act granting an increase of pension to Hiram Filkins;
H. R. 23612. An act granting an increase of pension to Thomas H. Adams;
H. R. 8894. An act granting an increase of pension to James C. Strong;
H. R. 22392. An act granting an increase of pension to Eugene W. Rolfe;
H. R. 12021. An act granting a pension to James M. Wood;
H. R. 14322. An act granting a pension to Abbie L. Hanford;
H. R. 15779. An act granting a pension to Margaret A. Jordan;
H. R. 19239. An act granting a pension to Salome Jane Marland;

The SPEAKER announced his signature to bills of the Senate of the following titles:

S. 8510. An act to amend an act providing for the public printing and binding and the distribution of public documents;
S. 8451. An act ratifying and confirming chapter 58 of the twenty-third legislative assembly of the Territory of Arizona, providing for repair of the Territorial bridge at Florence, Pinal County, Ariz.;
S. 8533. An act to authorize the Court of Claims to hear, determine, and adjudicate the claims of the Sac and Fox Indians of the Mississippi in Iowa against the Sac and Fox Indians of the Mississippi in Oklahoma and the United States, and for other purposes;
S. 3638. An act providing for the retirement of noncommissioned officers, petty officers, and enlisted men of the Army, Navy, and Marine Corps of the United States; and
S. 925. An act authorizing the construction of four steam vessels for the Revenue-Cutter Service of the United States.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred as indicated below:

S. 8568. An act granting an increase of pension to Rosanna A. May—to the Committee on Invalid Pensions.

RIVER AND HARBOR BILL.

Mr. BURTON of Ohio. Mr. Speaker, I desire to call up the conference report on the bill H. R. 24991, the river and harbor bill, and I ask unanimous consent that the reading of the report be dispensed with and the statement of the House conferees be read.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report and statement are as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 4, 9, 13, 14, 15, 16, 17, 18, 27, 30, 33, 37, 38, 40, 41, 43, 47, 50, 59, 71, 72, 73, 74, 87, 89, 90, 93, 94, 98, 99, 100, 104, 108, 111, 113, 114, 115, 116, 119.

That the House recede from its disagreement to the amendments of the Senate numbered 5, 7, 8, 10, 19, 20, 21, 22, 26, 28, 29, 35, 36, 42, 45, 51, 57, 60, 63, 64, 65, 66, 67, 68, 75, 76, 77, 78, 79, 80, 81, 82, 84, 86, 88, 92, 95, 96, 97, 101, 102, 105, 106, 107, 112, 117, 118, 120, 121, 123, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Improving Sasanoa River, Maine: Completing improvement in accordance with the report of the Board of Engineers, dated February seventh, nineteen hundred and seven, forty-four thousand dollars."

And the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In the language proposed, in lieu of the word "Constructing" insert the word "Improving;" and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In the language proposed strike out the words "surveys, preparation of plans, and preliminary work in connection with securing easements and releases" and insert in lieu thereof the following: "investigation and further examination;" and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Improving Providence River and Harbor, Rhode Island, by dredging to a depth of twenty-five feet for a uniform width easterly from the main ship channel between Long Bed and Kettle Point, in accordance with the plan submitted in House Document Numbered One hundred and eight, Fifty-sixth Congress, first session, ninety thousand seven hundred and fifty dollars."

And the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment as follows: Strike out the language as proposed and in lieu thereof insert the following:

"Improving Bay Ridge and Red Hook channels, New York: The Secretary of War may prosecute the improvement in said channels with a view to obtaining a depth of thirty-five feet and subsequently increasing said depth to the full forty feet with a width of twelve hundred feet in accordance with the project adopted in the river and harbor act of eighteen hundred and ninety-nine."

And the Senate agree to the same.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Improving and constructing inland waterway from Pamlico Sound to Beaufort Inlet, North Carolina, ten feet in depth, in

accordance with the report submitted in House Document Numbered Eighty-four, Fifty-ninth Congress, second session, two hundred thousand dollars: *Provided*, That the Secretary of War may enter into a contract or contracts for such materials and work as may be necessary for the completion of said project not exceeding in the aggregate three hundred and fifty thousand dollars, exclusive of the amounts herein and heretofore appropriated."

And the Senate agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"The Secretary of War may cause a reexamination to be made of the Cape Fear River above Wilmington, North Carolina, with a view to reporting what modifications, if any, should be made in the existing project, the expense of which shall be paid from the amount appropriated in section two."

And the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment as follows: In lieu of the word "shall" insert the word "may;" and the Senate agree to the same.

Amendment numbered 31: That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment as follows: In lieu of the words "ninety thousand," as proposed, insert "seventy-five thousand;" and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Improving Club and Plantation creeks canal, Georgia, in accordance with House Document Numbered One hundred and fifty-nine, Fifty-eighth Congress, second session, twenty thousand dollars."

And the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In the language proposed to be inserted, strike out the words "by obtaining a depth of twenty-four feet of water at mean low tide between the channel as it now is and the pierhead lines as established by the Government in front of said city and extending from the Florida East Coast Railway bridge to Hogans Creek;" and the Senate agree to the same.

Amendment numbered 39: That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Improving harbors on the coast of Mississippi: The Secretary of War may, in his discretion, construct a dredge for use in said harbors and the channels adjacent thereto, at a cost not exceeding two hundred thousand dollars, of which amount, in case said dredge is constructed, twenty-five thousand dollars shall be taken from the appropriation herein for Gulfport Harbor and fifty thousand dollars from the appropriation for Pascagoula River."

And the Senate agree to the same.

Amendment numbered 44: That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "including the extension of channel to Fifty-sixth street;" and the Senate agree to the same.

Amendment numbered 46: That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Improving channel to Port Bolivar, Texas, by obtaining a channel one hundred and fifty feet wide and twenty-five feet deep, with an increased width in front of the wharf, as set out in House Document Numbered Seven hundred and nineteen, Fifty-ninth Congress, first session, fifty thousand dollars."

And the Senate agree to the same.

Amendment numbered 48: That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "of which amount seven thousand five hundred dollars, or so much thereof as may be necessary, may, if directly and necessarily required in the interest of navigation, be used to prevent a cut-off in said river between Choctaw Railway bridge and the town of Devall Bluff, Arkansas;" and the Senate agree to the same.

Amendment numbered 49: That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following at the end of the preceding paragraph and not as a separate paragraph: "And the Secretary of War may appoint a Board of Engineers, whose duty it shall be to examine the present condition of the United States canal and the Tennessee River from the head of Elk River Shoals to the Florence Railway bridge, in the State of Alabama, with a view to permitting the improvement of the above-described stretch of said river by private or corporate agency in conjunction with the development of water power by means of not more than three locks and dams; and the said Board may examine any plans presented by such agency and shall report whether the same, if constructed, can, without injury to navigation, or with advantage thereto, be used to develop water power, and what portion, if any, of the expense of the work should be borne by the United States; and such Board shall report its findings not later than the first Monday in December, nineteen hundred and seven, and until such Board shall make its report and action shall be taken thereon by Congress no permits shall be issued under the provisions of the act approved March sixth, nineteen hundred and six, entitled 'An act to authorize the construction of dams and power stations on the Tennessee River, at Muscle Shoals, Alabama;'" and the Senate agree to the same.

Amendment numbered 52: That the House recede from its disagreement to the amendment of the Senate numbered 52, and agree to the same with an amendment as follows: Restore the language proposed to be stricken out, and in lieu of the language proposed to be inserted insert the following:

"Improving Lock and Dam Numbered Nineteen in the Ohio River, in the States of Ohio and West Virginia, two hundred thousand dollars."

And the Senate agree to the same.

Amendment numbered 53: That the House recede from its disagreement to the amendment of the Senate numbered 53, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "Improving the great Miami embankment of Ohio River east of Lawrenceburg, Indiana; repairing damage caused by the recent flood of the Ohio River and tributaries, twenty thousand dollars, if such repair shall be directly and necessarily required in the interest of navigation;" and the Senate agree to the same.

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment as follows: In lieu of the language proposed to be inserted, insert the following:

"*And it is further provided*, That the work of improvement shall proceed without delay by reason of conflicting or other claims of title or interests and without prejudice to any pending litigation in reference thereto.

"And all lands and waters north of the present St. Marys Falls ship canal throughout its length, and lying between said ship canal and the international boundary line, needed in connection with the execution of this project, or any project heretofore adopted by Congress, for improving St. Marys River at the falls, aside from any lands owned by the United States, all of which are hereby made available for said project, shall be acquired in the following manner and under the following conditions:

"The Secretary of War may, in his discretion, enter into negotiations with any persons or corporations claiming title to any portion of the land or waters required for the construction of the said canal, and may acquire title to such portions of such river or lands as may be required for its construction and operation, but any agreement made by him shall be without prejudice to any claim of title by the United States and without the grant of any rights or privileges in said river or lands therein which shall create a right to compensation in case any further portion of said river or said lands therein between the canal herein provided for and the international boundary line shall be hereafter required for purposes of navigation.

"If such lands and waters can not be obtained in the manner and under the conditions above set forth the same shall be acquired as follows:

"The Secretary of War may cause proceedings in condemnation to be prosecuted under existing law, or a copy of the said plan numbered 3 on a large scale shall be prepared and exhibited in the office of the United States engineer at Sault Ste. Marie, and the Attorney-General shall proceed to ascertain the owners or claimants of the premises embraced therein, and shall cause to be published for the space of thirty days in one or more daily newspapers in the city of Sault Ste. Marie that

the same has been taken for the uses mentioned in this act, and notifying all claimants to any portion of said premises to file, within its period of publication, in the Department of Justice a description of the tract or parcel claimed and a statement of its value as estimated by the claimant. On application of the Attorney-General the presiding judge of the circuit court of appeals of the United States for the sixth circuit shall appoint three persons not in the employ of the Government or related to or in any manner connected with the claimants to act as appraisers, whose duty it shall be, upon receiving from the Attorney-General a description of any tract or parcel, the ownership of which is claimed separately, to fairly and justly value the same and report such valuation to the Attorney-General, who thereupon shall, upon being satisfied as to the title of the same, cause to be offered to the owner or owners the amount fixed by the appraisers as the value thereof; and if the offer be accepted, then, upon the execution of a deed to the United States in form satisfactory to the Attorney-General, the Secretary of War shall pay the amount to such owner or owners from the appropriation made therefor in this act.

"In making the valuation the appraisers shall only consider the present value of the land or property acquired, without reference to its value for the uses for which it is taken under the provisions of this act.

"The appraisers shall each receive for their services five dollars for each day's actual service in making the said appraisements.

"Any person or corporation having any estate or interest in the premises who shall for any reason not have been tendered payment therefor as above provided, or who shall decline to accept the amount tendered therefor, may, at any time within one year from the publication of notice by the Attorney-General as above provided, file a petition in the Court of Claims of the United States setting forth his right or title and the amount claimed by him as damages for the property taken, and the court shall hear and adjudicate such claims in the same manner as other claims against the United States are now by law directed to be heard and adjudicated therein: *Provided*, That the court shall make such special rules in respect to such cases as shall secure their hearing and adjudication with the least possible delay.

"Judgments in favor of such claimants shall be paid as other judgments of said court are now directed to be paid; and any claimant to whom a tender shall have been made, as hereinbefore authorized, and who shall decline to accept the same, shall, unless he recover an amount greater than so tendered, be taxed with the entire cost of the proceeding. All claims on account of ownership of any interest in said premises shall, unless petition for the recovery thereof be filed within one year from the date of the first publication of notice by the Attorney-General as above directed, be forever barred: *Provided*, That owners or claimants laboring under any of the disabilities defined in the statute of limitation of the State of Michigan may file a petition at any time within one year from the removal of the disability. Upon the publication of the notice, as above directed, the Secretary of War may take possession of the premises embraced in said plan numbered 3, and proceed with the construction herein authorized; and upon payment being made therefor, or without payment, upon the expiration of the time as above limited, without filing the petition, absolute title to the premises shall vest in the United States, and no permits shall be granted by the Secretary of War or other official of the United States granting the right to occupy any portion of the land or waters of St. Marys River in the locality for said ship canal herein provided for, or between the same and the international boundary line except upon the express condition, accepted by the grantee therein, to the effect that the erection of structures or the utilization of water power shall create no rights against the United States in case the whole or any part of the said river or the lands therein is required for the purposes of navigation, and further, that such structures or rights so granted shall be surrendered to the United States without cost when so required for purposes of navigation aforesaid, and any and all rights under any permits or licenses heretofore granted shall be deemed to be revoked unless such permits or licenses are reissued upon the terms that further improvements and expenditures shall entitle the licensee to no greater consideration than such licenses are now entitled to, if any; but nothing herein contained shall be held to imply that any right now exists to compensation on account of expenditures made or alleged claims under licenses heretofore granted.

"The Secretary of War may acquire lands for the location of remedial or compensating works to the extent required to enable the Michigan-Lake Superior Power Company to comply with the provisions of the river and harbor act of 1902, but such lands, if so acquired, shall be obtained without expense to the United States."

And the Senate agree to the same.

Amendment numbered 55: That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment as follows: Omit the language proposed to be inserted and restore the language proposed to be stricken out with an amendment as follows: After the word "bridge" strike out the word "five" and insert the word "seven;" and the Senate agree to the same.

Amendment numbered 56: That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment as follows: In lieu of the word "four" insert the word "three;" and the Senate agree to the same.

Amendment numbered 58: That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: After the words "Fox River, Illinois," following said amendment, insert a colon instead of a period and insert these words as the beginning of the following paragraph instead of as a heading; and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment as follows: At the end of the language proposed insert the following paragraph:

"Sixth. And the said Board shall also report upon any water power which may be created in the portion herein directed to be surveyed, as well as in the proposed waterway from Saint Louis to Chicago heretofore surveyed, and the value thereof, and what means should be taken in order that the Government of the United States may conserve the same or receive adequate compensation therefor, and upon lands which may be drained by the construction of either of said proposed waterways, and shall also report what steps, if any, shall be taken to cause the cost of the improvement to be defrayed, in whole or part, by means of such water power or lands."

And the Senate agree to the same.

Amendment numbered 62: That the House recede from its disagreement to the amendment of the Senate numbered 62, and agree to the same with an amendment as follows: In lieu of the language proposed to be inserted insert the following: "and the Secretary of War may prosecute this work in accordance with the report submitted in House Document Numbered Three hundred and forty-one, Fifty-ninth Congress, second session, for the purpose of ultimately securing and maintaining a depth of channel of six feet;" and the Senate agree to the same.

Amendment numbered 69: That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: Insert the language as proposed, and after the word "navigation" where it occurs for the second time after this amendment, and before the words "*Provided further*," insert the following: "*Provided further*, That so much of the amount as is to be expended north of the forty-sixth parallel may be applied for improving the harbor at Bismarck, North Dakota, on the east side of the river below the Northern Pacific Railroad bridge;" and the Senate agree to the same.

Amendment numbered 70: That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same with an amendment as follows: After the words "*Provided further*" insert the word "also," and at the end of the language proposed strike out the period and insert a comma and the words "and shall also report whether the same is directly and necessarily required in the interest of navigation;" and the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following: "and the entrance thereto;" and the Senate agree to the same.

Amendment numbered 85: That the House recede from its disagreement to the amendment of the Senate numbered 85, and agree to the same with an amendment as follows: In lieu of the word "and" insert the word "also;" and the Senate agree to the same.

Amendement numbered 91: That the House recede from its disagreement to the amendment of the Senate numbered 91, and agree to the same with an amendment as follows: At the end of the language proposed strike out the period and insert a comma and the following words: "and Saint Marks River;" and the Senate agree to the same.

Amendment numbered 103: That the House recede from its disagreement to the amendment of the Senate numbered 103, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"Boise de Sioux River, Lake Traverse, and Big Stone Lake, and the portages between the said lakes and said river, with a view to diverting the flood waters of the Red River of the North into the Minnesota River."

And the Senate agree to the same.

Amendment numbered 109: That the House recede from its disagreement to the amendment of the Senate numbered 109, and agree to the same with an amendment as follows: In the language proposed to be inserted strike out the word "thirty" and insert in lieu thereof "twenty-five;" and the Senate agree to the same.

Amendment numbered 110: That the House recede from its disagreement to the amendment of the Senate numbered 110, and agree to the same with an amendment as follows: In the language proposed to be inserted strike out the words "and overcoming the effect of sliding or encroaching shores;" and the Senate agree to the same.

Amendment numbered 122: That the House recede from its disagreement to the amendment of the Senate numbered 122, and agree to the same with an amendment as follows: In lieu of the language proposed insert the following:

"SEC. 6. That the Secretary of War may approve a change of plans or of location of any bridge over the North or Hudson River at New York City which has heretofore been approved by the Secretary of War under any act of Congress, upon application to him by the parties authorized to erect such structure, their successors or assigns, provided that such changed location shall not be over any anchorage ground and shall be within the original authorization for such structure, and shall not be deemed by the Secretary of War to be detrimental to navigation or to the public interest after public hearings held thereon, and the structure whose changed plans or location is so approved shall be a lawful structure."

And the Senate agree to the same.

WM. P. FRYE,
S. B. ELKINS,
JAMES H. BERRY,
*Managers on the part of the Senate.*

THEODORE E. BURTON,
B. B. DOVENER,
J. H. BANKHEAD,
*Managers on the part of the House.*

The Clerk read the statement as follows:

STATEMENT.

The House conferees on H. R. 24991, making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, would respectfully report that they have reached an agreement with the Senate conferees, and recommend that the conference report on the bill filed herewith be adopted.

The total appropriations and authorizations in the bill as passed by the House was $84,198,138. The amount added by the Senate amendments was $8,685,334. As agreed upon in conference these additions have been reduced to $2,815,294, making the total amount carried by the bill in appropriations and authorizations $87,013,432.

Aside from items of appropriation, the two main differences between the House and the Senate were in the provision for the acquisition of necessary land for the construction of a canal in St. Marys River, Michigan. Upon this an agreement has been reached which is set forth in the conference report. The Senate provision sought to authorize the acquisition of all land and waters between the existing canal in St. Marys River and the international boundary line. The question of the acquisition of this land is much embarrassed by conflicting claims of title. The provision as agreed upon provides only for the acquisition of the land immediately needed for the new canal and lock appropriated for in this bill, but seeks to prevent the creation of rights which will hereafter embarrass the Government in case, as is probable, other canals and locks may be required to meet the growing demands of traffic.

The Senate added as section 6 a provision authorizing the Secretary of War to approve a change of plans or of location in or over any navigable water of any pier, wharf, bridge, or other structure which has heretofore been or may hereafter be approved by the Secretary of War upon application by the parties interested, provided that such change shall be within the original authorization for such structure, etc., is stricken out, and this section is made to apply only to a bridge across the Hudson or North River at New York City.

THEODORE E. BURTON,
B. B. DOVENER,
J. H. BANKHEAD,
*Managers on the part of the House.*

Mr. BURTON of Ohio. Mr. Speaker, unless there are some inquiries to be made or discussion to be had, I ask for the previous question on the adoption of the report.

The SPEAKER. The gentleman from Ohio demands the previous question on the adoption of the report.

The question was taken; and the previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and the conference report was agreed to.

On motion of Mr. BURTON of Ohio, a motion to reconsider the vote whereby the conference report was agreed to was laid on the table.

Mr. BURTON of Ohio. Mr. Speaker, I move to take from the Speaker's table a concurrent resolution, which provides for the correction of a typographical error.

The SPEAKER. The gentleman from Ohio asks unanimous consent to take from the Speaker's table concurrent resolution No. 30. Is there objection?

There was no objection.

The Clerk read as follows:

*Resolved by the Senate (the House of Representatives concurring)*, That the Clerk of the House of Representatives be instructed in the enrollment of the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, to strike out the word "connecting," on page 105, line 1, and to insert in lieu thereof the word "Swan," to correct what is evidently a clerical error in the preparation or printing of the bill.

The concurrent resolution was agreed to.

MARCUS WOOD.

The SPEAKER laid before the House the following message from the President of the United States, which, with the accompanying bill, was ordered printed and referred to the Committee on Invalid Pensions:

*To the House of Representatives:*

In compliance with the resolution of the House of Representatives (the Senate concurring) of the 25th instant, I return herewith House bill No. 21121, entitled "An act granting an increase of pension to Marcus Wood."

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 27, 1907.*

J. W. BAUER AND OTHERS.

The SPEAKER also laid before the House the following message from the President of the United States, with the accompanying bill, which was read:

*To the House of Representatives:*

I return herewith without approval House bill No. 2326, entitled "An act for the relief of J. W. Bauer and others," for the reasons set forth in the following letters from the Secretary of the Treasury and the Commissioner of Internal Revenue:

"I have the honor to return herewith H. R. 2326, 'An act for the relief of J. W. Bauer and others,' for the amount assessed against and paid by said parties to the United States Government as penalty for failure to make return for special tax as retail duties of oleomargarine.

"The report of the Commissioner of Internal Revenue in the matter, of the 23d instant, is herewith transmitted, and for the reasons given in the report it is recommended that the bill be not approved."

"Relative to a bill (H. R. 2326) for the relief of J. W. Bauer and others, submitted to you by direction of the President under date of the 21st instant, with request for information as to whether or not there is any objection to its approval, I have the honor to submit the following statement covering the facts upon which the proposed relief is based:

"A certain manufacturer of oleomargarine in Chicago sold, in 1903, to a large number of dealers in the city of Louisville, Ky., among whom were the parties named in this bill, artificially colored oleomargarine, which had been tax paid at the rate of one-fourth cent per pound, as oleomargarine free from artificial coloration.

"These several parties were visited by a revenue officer, who found that they had sold the article manufactured in Chicago, artificially colored, which made them liable for special taxes as retail dealers in oleomargarine at the rate of $48 per year, and the special tax was assessed against each from the beginning of the month in which the liability accrued to June 30, 1903, with 50 per cent penalty for failure to make return in the time and manner provided by law.

"These parties, after assessment, paid the special taxes and penalties and filed in this office claims for the refunding thereof, which, after investigation, were rejected for the reason that as the amounts had been legally assessed and collected there was no authority of law to refund the same.

"A bill (H. R. 11100) authorizing the refunding of the penalties collected as aforesaid was introduced in the Fifty-eighth Congress, and upon its reference to this office for report and recommendation, I reported favorably thereon under date of April 14, 1904, for the reason that these parties supposed they were selling oleomargarine free from artificial coloring, and their failure to make return was therefore without willful intent to defraud the Government.

"This bill was not passed, and subsequently the parties sued the collector to whom the taxes and penalties were paid for the recovery thereof, and on the 19th day of May, 1906, judgment was entered in the circuit court for the western district of Kentucky in favor of the plaintiffs.

"The cases were divided by distinguishing facts into two classes. Those in the first class contended that they had not sold colored oleomargarine in any quantity, and those in the second class alleged that the oleomargarine sold by them was not colored within the meaning of the law.

"Judgments were rendered in favor of fourtten claimants included in the first class for the full amount of taxes and penalties paid by them, with interest thereon from the date of the rejection of their claims, as follows:

"John L. Gruber, $36; Woodford Blanton, $72; Charles Boeswald, $72; Fred Gausman, $50.40; John Heinz & Co., $72; C. A. Heuser, $72; E. C. Jansen, $72; L. A. Kissel, $72; Fred Keller, $72; J. S. Reynolds, $56.70; G. H. Young, $72; Frank Zeigler, $72; J. B. King, $72; H. B. Kruse, $31.50.

"As these cases had been submitted to the court without a jury, and the findings of facts by the court appeared to support the judgments, no appeal was taken, and claims for the amounts included therein were allowed by this office on October 27, 1906, referred to the accounting officers, adjusted by the Auditor for the Treasury Department November 15, 1906, and as there was no appropriation to pay the same the claims were scheduled and by you transmitted to Congress on the 7th instant for an appropriation under section 2 of the act of July 7, 1884.

"In the other class of cases the court found from the evidence that the parties had sold colored oleomargarine rendering them liable to the payment of special taxes, but held that as section 3176, Revised Statutes, had not been incorporated in the oleomargarine acts there was no warrant for the assessment and collection of the 50 per cent penalties against said dealers for failure to disclose liability within the time and manner specified by said section, and gave judgments to the following-named plaintiffs for the amounts only which had been collected as penalties with interest thereon:

"I. Schafer, $24; C. A. Culver, $28; Samuel Goldsmith, $16; M. J. Madden, $6; S. Weisebach, $12; J. W. Bauer, $24; C. Caudel, $24; Frank Bloemer, $24; C. J. Finnegan, $24; John W. Kleier, $24; Joseph Kaelin, $24; F. H. Linkenberg, $27.60; Frank E. Muth, $24; Oscar E. Rehm, $24; W. J. Schieber, $24; T. J. Wathen, $24.

"These judgments were not acquiesced in by the Government for the reason that it was desired to finally settle the question of law therein presented, in order that, if the court of last resort should affirm the judgments of the trial court, Congress might be asked to so amend the oleomargarine act as to bring its provisions in harmony with the general revenue system relative to returns and payment of special taxes. Therefore these cases were appealed on that question of law to the circuit court of appeals, where they are now pending.

"The cases of three other claimants—Julius Straus, I. Felsenthal, and F. H. Worries—were dismissed for the reason that it appeared that the taxes and penalties sued for by them had been voluntarily paid in a former compromise accepted September 2, 1905. Similar suits by several other claimants are pending.

"For the foregoing reasons I am of the opinion that bill H. R. 2326, which was not presented to this office for report on the facts before its passage, should not be approved."

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 27, 1907.*

---

An act (H. R. 2326) for the relief of J. W. Bauer and others.

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed, out of any money in the Treasury not otherwise appropriated, to pay to the following-named persons, citizens of Louisville, Ky., the respective sums following their names, to wit: J. W. Bauer, $24; Frank Bleemer, $24; C. J. Finnegan, $24; Samuel Goldsmith, $16; John Hopmeister, $24; L. A. Kissel, $24; M. J. Madden, $6; W. J. Schieber, $24; T. J. Wathen, $24; Windhorst & Grimmer, $24; I. Schafer, $24; J. A. Hess, $12; Daniel Scherer, $24; Sebastian Weisbach, $12; John Heinz & Co., $24; Oscar E. Rehn, $24; John W. Kleier, $24; Mrs. G. Caudel, $24; Frank E. Muth, $24; Mrs. E. C. Jansen, $24; G. H. Young, $24; Charles Boeswald, $24; Fred Keller, $24; Frank Zeigler, $24; Joseph Kaelin, $24; G. Schlange, $24; J. B. King, $24; Woodford Blanton, $24; C. W. Hall, $6; C. A. Henson, $24; John L. Gruber, $12; C. A. Culver, $8; Fred Gausmann, $16.80; H. B. Kruse, $10.50; J. S. Reynolds, $18.90; Christ Keller, $16, being the amount assessed against and paid by said parties to the United States Government as penalty for failure to make return for special tax as retail dealers of oleomargarine.

J. G. CANNON,
*Speaker of the House of Representatives.*
CHAS. W. FAIRBANKS,
*Vice-President of the United States and President of the Senate.*

I certify that this act originated in the House of Representatives.

A. MCDOWELL,
*Clerk.*
By WM. J. BROWNING,
*Chief Clerk.*

Mr. DALZELL. Mr. Speaker, I move the bill and message be printed and referred to the Committee on Claims.

The motion was agreed to.

WITHDRAWAL OF PAPERS.

By unanimous consent, the following requests were granted:

To Mr. SAMUEL, to withdraw from the files of the House, without leaving copies, papers in the case of Randolph Hayman, Fifty-sixth Congress, no adverse report having been made thereon.

To Mr. HUNT, to withdraw from the files of the House, without leaving copies, papers in the case of Charles H. Bunge, Fifty-ninth Congress, no adverse report having been made thereon.

To Mr. NEVIN, to withdraw from the files of the House, without leaving copies, the papers in the case of Susannah Payne et al., Fifty-eighth Congress, no adverse report having been made thereon.

LEAVE OF ABSENCE.

Mr. MCKINLAY of California, by unanimous consent, was given leave of absence indefinitely on account of sickness.

ABRAHAM LINCOLN.

Mr. TOWNE. Mr. Speaker, I desire to ask unanimous consent that a speech recently made in Jersey City by my colleague, Mr. SULZER, on the occasion of Lincoln's birthday, may be printed in the RECORD.

The SPEAKER. The gentleman from New York asks unanimous consent that the speech of his colleague, Mr. SULZER, made upon the occasion of Lincoln's birthday, be printed in the RECORD. Is there objection?

There was no objection.

The speech is as follows:

"ABRAHAM LINCOLN—THE MAN."

Response of Hon. WILLIAM SULZER, of New York, to the above toast, at the banquet of the Lincoln Association, of Jersey City, N. J., Friday evening, February 12, 1907:

Mr. SULZER. Mr. President and gentlemen, this is Lincoln's birthday, and we are met to honor his memory.

It is a matter of much personal gratification for me to be with you to-night. The hospitality of the Lincoln Association, of Jersey City, in the grand old Commonwealth of New Jersey, is famous from one end of the country to the other; and justly so, because your association rises above creed and condition and race and prejudice and stands for the toast assigned to me—"Abraham Lincoln—the Man," and the eternal principles of liberty, justice, and humanity, that must ever be dear to every heart that believes in the greatness and the grandeur of our first martyred President.

I am glad to see so many here to-night—so many distinguished gentlemen, so many eloquent speakers, and I am glad to pay my tribute to your association—the only Lincoln Association in all the land that has never failed, year in and year out, for nearly half a century, to fittingly celebrate the anniversary of the birth of Abraham Lincoln—and to say that you are to be commended and congratulated for all you have done in the past, for all you are doing now, and for all you will continue to do in the future to make the name of "Lincoln—the Man" shine resplendent with the immortals of all time in all the centuries yet to come.

> His name, reaching down through the age of time,
> Will still through the age of eternity shine—
> Like a star, sailing on through the depths of the blue,
> On whose brightness we gaze every evening anew.

Let me say, Mr. President, that Lincoln has ever been my ideal of a man—a great man. I have been a believer in and an admirer of Abraham Lincoln ever since early boyhood days. I have studied his speeches, read and reread his writings, worshiped at his shrine, gloried in his career, and have always been a close student of his wise and just and patriotic teachings. He was, in my opinion, take him all in all, the most heroic figure in all our history, and next to the Declaration of Independence, he wrote the greatest political document in our annals—the Emancipation Proclamation.

In the words of John Stuart Mill, "Abraham Lincoln was the kind of a man Carlyle in his better days taught us to worship as a hero." And as the years come and go he will be worshiped more and more in every land and in every clime, from the Occident to the Orient—throughout the world—by the friends of human liberty.

He was one of the purest patriots, one of the wisest statesmen, and one of the greatest men that ever lived, and that ever will live in the world's history for all the years to come. He loved liberty, believed in the people, and battled for the rights of man. He was the friend of the masses and the champion of the oppressed. He loved liberty and truth and justice. He hated cant, despised hypocrisy, and denounced aristocracy. He believed in civil and religious liberty; he advocated not only the freedom of man, but the freedom of conscience, the freedom of speech, and the freedom of the press. He could not tolerate class, or caste, or special privilege. He was the greatest many-sided and myriad-minded man of his day. He had few prejudices and no bigotry. All the prejudices he had were against the evils of his time—against the pride, the assumption, the arrogance, the special privilege, and the intoleration of his fellowman. He knew the right, and he was great enough and grand enough and brave enough to dare maintain it.

Abraham Lincoln stood for the freedom of man like the Rock of Ages in a tempestuous sea. He never faltered, he never lost hope, he never wavered, he never betrayed a cause or deserted a principle.

He searched for the truth, and, knowing the truth, he had the courage and the manhood, without fear or favor, to promulgate it to all the world. He was a man who stood immovable for man, and he did as much for human liberty as any man who ever lived.

In the retrospect—as the years come and go and the decades pass away—this wonderful man, whose mind had a thousand eyes and whose heart had a thousand thoughts, grows greater and grander and more glorious.

As the centuries come and go the immortal figure of Abraham Lincoln will loom larger and larger on the horizon of human destiny—a great beacon light of eternal progress ever onward and ever upward.

The history of his life, of his joys and sorrows, his hopes and discouragements, from the little log cabin in Kentucky, where he was born, to the Presidential chair, reads like a romance and could not have occurred in any other country than our own, where the humblest boy can rise step by step on the political ladder to the White House. The story of the life and the struggles of Lincoln, of his trials, his tribulations, and his triumphs, is the bright star of hope for the poorest boy in all our land and the inspiration of all America.

Lincoln was a deep thinker, a profound reasoner, a great lawyer, and one of the greatest political philosophers that ever lived; and during his Presidential career, in the darkest hours of our country's history, he was the guiding genius for the Union.

He was a great statesman, enunciated great principles of Government, formulated great policies of State, held the Union intact; and his policies and principles and example will live as long as the Republic endures and ever be an inspiring incentive to every patriot in all our land.

Abraham Lincoln believed in exact justice to all men. He was the incarnation of democracy. He was no respecter of persons, of conditions, or of power. He cared nothing for position and less for wealth. He believed in and enunciated the great cardinal principle of Jefferson—"Equal rights to all; special privileges to none."

He was a great commoner; he gloried in the Declaration of Independence; he believed in its principles, and he honored and revered its immortal author. In speaking of Jefferson in 1861, Mr. Lincoln said:

> All honor to Jefferson; to a man who, in the concrete pressure of a struggle for national independence by a single people, had the coolness, forecast, and capacity to introduce into a merely revolutionary document an abstract truth, applicable to all men and all times and so to embalm it there that to-day and in all coming days it shall be a rebuke and a stumbling block to the harbingers of reappearing tyranny and oppression!

In my opinion no higher tribute was ever paid to the author of the Declaration of Independence. All honor to the memory of Jefferson! All honor to the memory of Lincoln! The two great American immortals.

When I was in the legislature of the State of New York, I asked the late Senator Donald McNaughton, the representative from Rochester, who knew Lincoln well, and who frequently met him in the trying days of the civil war, "Who, in your opinion, was the greatest politician and statesman that America has ever produced?" and the wise old Scotch senator, without a moment's hesitation, replied, "Lincoln." And then after a few moments of quiet thought he said:

> My young friend, if you want to become a real man and a great man in the American Republic, study and emulate the life of Abraham Lincoln.

From his earliest youth to the sadness of his tragical dying day Abraham Lincoln was always true to the promptings of his heart, true to his principles, and they were the principles of humanity, the principles of liberty, and the principles of a free government. He was always true to his political faith, true to the fundamental teachings of the fathers of the Republic, true to the men who were striving to do right. In one of his speeches he said:

> I am not bound to win, but I am bound to be true. I am not bound to succeed, but I am bound to live up to what light I have. I must stand with everybody that stands right; stand with him while he is right, and part with him when he goes wrong.

What a noble sentiment!

Lincoln was a great lawyer. In his own way probably one of the greatest lawyers that ever lived in America. He was a great orator, and his simple speech at Gettysburg is one of the great classics of America; and his innumerable speeches, especially his wonderful debates with Douglas, conclusively prove that he was one of our greatest orators.

He was a man of quaint humor, of much sorrow, of infinite jest, of much common sense, and he searched and knew the human heart. He had faith that right makes might, and in the light of that faith he dared to the end to do his duty as he saw it.

He was a simple man—simple in his strength and in his greatness. In moments of repose he was sad and reflective. His sympathy was with the poor and the lowly—with the sorrowing. His great heart went out to those who struggle and fail. He was always the same, yet ever different—like the waters of the sea—but he remembered, as he said in his first speech, that he was "humble Abraham Lincoln."

He was a great statesman, and no one to-day, reading his letters and his state papers, can doubt for a moment that he was the ablest and the most farseeing politician of his time, and the greatest and grandest statesman this country has ever produced.

Lincoln stands alone in the illumined pages of American history—the greatest and the grandest and the most colossal figure in all our annals.

No one will ever know the blood drops and the suffering of Abraham Lincoln during the darkest and most trying days of the civil war, the greatest war of modern times, when a million men from the North and a million men from the South, with their guns and drums, and their tramping to and fro, met in the shock of battle, shook the earth, and the very pillars of our free institutions. Thank God, father Abraham won, and we are brothers again.

In this connection I want to tell a story, that perhaps has never been printed before, regarding Mr. Lincoln's sadness and greatness, and dry wit and inimitable humor, and in this composition there was much of all these elements. In the early days of the war for the Union a great body of leading bankers and financiers of New York called at the White House to see Mr. Lincoln, and asked him to send ships and troops to New York to protect their treasures. Mr. Lincoln listened patiently to all this committee had to say, and when they finished he said, in his quiet, sad, and simple way:

> Gentlemen, in answer to all you have said, I reply that I am doing everything in my power with the forces at my command to save the Union. There is no danger to your treasures in New York City, and instead of asking me to send war ships and troops to New York to protect them, you should go back home and lend your money to the Government and help save the Union.

The great committee of bankers and financiers returned to New York wiser and more patriotic men from these few words of the immortal martyred President.

Lincoln loved the Union, and his first inaugural message proves that his only desire was to save the Union from civil strife and dissolution. He had said many times before that a house divided against itself can not stand, and Lincoln was right.

When Doctor Long, an intimate friend of Lincoln, said to him one day, "Well, Lincoln, that foolish speech will kill you—will defeat you for all office—for all time to come," referring to the "house divided" speech, Mr. Lincoln replied:

> If I had to draw a pen across and erase my whole life from existence, and I had one poor gift or choice left, as to what I should save from the wreck, I should choose that speech, and leave it to the world unerased.

He was the friend of the toiler—of the producer—of the great army of men who earn their bread in the sweat of their face. In his message to Congress in December, 1861, he said:

> Labor is prior to and independent of capital. Capital is only the fruit of labor, and could never have existed if labor had not first existed. Labor is the superior of capital, and deserves much the higher consideration. No men living are more worthy to be trusted than those who toil up from poverty—none less inclined to take or touch aught which they have not honestly earned.

Lincoln died in the prime of his life, at the summit of his career, in the zenith of his fame, in the service of his country, loved by every friend of man, and mourned by all the world.

> There is a reaper whose name is Death,
> And with his sickle keen
> He reaps the bearded grain at a breath,
> And the flowers that grow between.

But the reaper can never rob humanity of the undying fame of Abraham Lincoln. As my friend Col. Henry Watterson has most truly and eloquently said:

> A thousand years hence no story, no tragedy, no epic poem will be filled with greater wonder or be read with deeper feeling than that which tells of his life and death.

Lincoln was indeed a man—the man—upon whose like we shall not look again; and take him all in all he was the friend of man—the greatest apostle of human liberty the world has ever seen.

The mortal Lincoln is no more. He sleeps beneath the marble shaft at Springfield, and his shrine is, and ever will be, the Mecca of the liberty-loving people of the world whither shall journey to the end of time the countless millions yet unborn to kneel and kindle anew their patriotism and their zeal for liberty.

But Lincoln needs no monument of marble to perpetuate his memory; he will live forever in his work for man; his words will live in the hearts of the people of free America, and future

generations will arise to call him blessed as the patron saint of their consecrated liberties.

President Lincoln was perhaps more abused and caricatured during the time he was in the White House than any other man that ever lived in our country. And yet, when he was stricken down by the cruel bullet of an irresponsible lunatic, all the world bowed down and wept, and every Government on earth paid homage to his great heart and sympathetic soul, to his deeds and works and words and worth.

No paper in all the world abused Lincoln more than Punch of London, and yet, upon the death of Lincoln, it wrote one of the most beautiful tributes that ever was written to the memory of man, and James Russell Lowell, one of America's greatest poets, summed it all up in a stanza in his Commemorative Ode when he said of the undying fame of Lincoln:

Great captains, with their guns and drums, disturb our judgment for the hour;
But at last silence comes—these all are gone;
And standing like a tower our children's children shall behold the glory of his fame,
This kindly, earnest, brave farseeing man—
Sagacious, patient, dreading praise, not blame—
New birth of our new soil—the first American.

SUBSIDY BILL.

Mr. GROSVENOR. Mr. Speaker, on consultation with my colleague, the gentleman from New York [Mr. GOULDEN], the senior member of the Committee on Merchant Marine and Fisheries, we have agreed to ask unanimous consent that we may have one hour of general debate to-morrow at the beginning of the session, whenever we can go into Committee of the Whole, on the pending bill, one-half to be controlled by the gentleman from New York and one-half by myself.

The SPEAKER. Is there objection to the request of the gentleman from Ohio? [After a pause.] The Chair hears no objection. Under the order, the House will now resume its session in Committee of the Whole House.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. CURRIER in the chair, for the further consideration of the ship-subsidy bill.

Mr. ROBINSON of Arkansas. Mr. Chairman, the measure now under consideration, commonly called the "ship-subsidy bill," is a miserable compromise that is at once a source of disappointment to both the friends and the opponents of substantial ship-subsidy legislation. It is practically without loyal, unqualified support in this assembly. The best that has been said in its favor is that it is not a real ship-subsidy bill at all, but only a mail subsidy; that it in no wise recognizes the principle of subsidies to American ships except in so far as it relates to the ocean mails. Its friends have consumed their time in this debate in apologizing for it—in explaining that it is but an extension of the act of 1891 and involves no new principle. No one has sought to justify this proposed legislation on the ground solely that it is a subsidy to American ships engaged in carrying our products upon the high seas. Even the gentleman from Ohio seems to be ashamed of this bill. This fact illustrates how pitiable and impotent the proposed measure is in fact. The gentleman from Ohio [Mr. GROSVENOR] veiled his disgust for this bill but poorly on last Monday, when he said in substance that it is not a Republican measure; that he did not like to call it a Republican measure, and sought to justify the legislation by asserting that Mr. Polk when President advocated similar legislation. Everybody here knows what that means. When the gentleman from Ohio labors for years upon a subject and then brings from his committee a bill which he is ashamed to call a Republican bill and seeks to justify it by declaring it to be in fact a Democratic measure, we know that it must be hopelessly infamous or incurably impotent.

How keen must be the mortification of the advocates of ship subsidy at the provisions of this bill. After a long-continued hearing before the Committee on Merchant Marine and Fisheries, after many conferences and much wrangling over the subject, there has been brought forth this misshapen, deformed progeny whom no one seems willing to father. [Applause on the Democratic side.] *Not a ship subsidy at all, only an ocean mail subsidy. Not a Republican measure, but really a Democratic measure.* Ah, my Republican friends, take the responsibility for this legislation. Lay not the blame on us because in "ancient times" some Democrat favored it.

Why, Mr. Speaker, when gentlemen seek to defend this piece of folly by asserting that President Polk advocated something similar in 1846, I am moved to pity them. Has it come to pass in this year of grace that the Republican party, boastful of a spirit of progress, proud of readiness to grasp present problems and solve them in the light of future necessities, must turn back a half century and take its stand on this important subject where a Democratic President stood so long ago? Is the Republican party fifty years behind the times? You Republicans have frequently criticised us for inaction. Yet your bravest defense of the position assumed on this bill is that slowly you have advanced to a position occupied by some Democrats fifty years ago, a position long since abandoned for the more advanced ground upon which the Democracy have long stood and now stand solidly united. Is this the best that you can do toward keeping step with the march of our nation along the highways of political progress? If so, then boast no more of your alleged aggressive spirit. Admit yourselves unable to keep time to the music; acknowledge that on this subject at least you have labored for years and accomplished next to nothing. [Applause on the Democratic side.]

By the terms of this bill subsidies are authorized to seven steamship lines, as follows:

| | Monthly service. | Fortnightly service. |
|---|---|---|
| Atlantic coast to Brazil, 16-knot steamers | $300,000 | $600,000 |
| Atlantic coast to Argentina, 16-knot steamers | 400,000 | 800,000 |
| Gulf coast to Isthmus of Panama, 14-knot steamers | [a] 75,000 | [a] 150,000 |
| Pacific coast to Isthmus of Panama, Peru, and Chile, 16-knot steamers | 300,000 | 600,000 |
| Pacific coast, via Hawaii, to Japan, China, and the Philippines, 16-knot steamers | 350,000 | 700,000 |
| North Pacific coast to Japan, China, and the Philippines, 16-knot steamers | 350,000 | 700,000 |
| Pacific coast to Samoa and Australia, 16-knot steamers | [b] | [c] 200,000 |
| Total | 1,775,000 | 3,750,000 |

[a] Fortnightly and weekly.
[b] Once in three weeks.
[c] In addition to present compensation of $283,000.

SOME REASONS WHY THIS BILL SHOULD BE DEFEATED.

In this country subsidies are inconsistent with the fundamental theories on which our Government is established. The doctrine of "*equal and exact justice to all, special favors to none,*" forbids the use of the public revenues to enrich any individual or class. Gentlemen who regard legislative subsidies as fair overlook the fact that every dollar which finds its way into the vaults of our Treasury is the product of toil. They forget that our revenues constitute a common fund which can only be used for the common benefit; that to pervert any part of it from the legitimate purpose for which it has been collected by voting it to favorites of the Administration is political dishonesty, which, if pursued as far as some of its advocates desire, would establish greed and oppression as the dominant influences in our political system and destroy liberty and equality. No man or set of men ought to be permitted to thrust their hands into the public treasure, nor ought any legislative body to countenance a policy of favoritism and partiality in the use of governmental funds such as is contemplated by this bill. Public moneys represent the common sacrifice which energy and civic virtue make to the maintenance of law and order. They constitute a sacred tribute to the cause of justice, the maintenance of law, the preservation of rights and liberties, the security of persons, the perpetuation of institutions. I hold it to be the self-evident duty of every Representative in Congress to guard the public Treasury with sacred fidelity; that he who raids it with impunity or permits privilege to plunder it is a traitor to the Constitution and an enemy to free government. It is not the duty or the province of Congress to reduce the profit of one citizen or class of citizens to increase the prosperity of another citizen or class of citizens. It is not permissible to tax the overburdened energies of the masses for the pleasure or profit of any class. The burden of every subsidy must finally fall upon the back of the toiler. He who works sustains all our institutions. *Labor, with its million hands, has wrought wonders indescribable in history. What justice can there be in taking from the wearied hand of toil its well-earned recompense to reward avarice, indolence, or greed?* [Applause on the Democratic side.]

Our Government in the past has already done too much of this. It has permitted, even encouraged and authorized, unjust taxation, unjustifiable expenditures of public funds in bonuses and subsidies. We have now reached a time when avarice no longer justifies its outrages. The advocates of subsidies to ships have seemingly abandoned any claim that it is just. In any event they are now masking behind this cowardly subterfuge which they call an "ocean-mail subsidy," but for which no adequate return in improved mail service is expected. Let no gentleman be deceived. The purpose of this legislation is not so much to quicken or facilitate the carriage of ocean mails. It is to subsidize the favored owners of vessels which come within the provisions of the bill. You could not pass a real avowed ship-subsidy bill through this Congress, gentlemen of the majority. You know you could not. You are afraid to try it.

This bill is not advocated as wholesome or effective ship-subsidy legislation, but it is put forward in a spirit of compromise. Underlying it is the hope that hereafter it may become a precedent for more vicious legislation. You will test the temper of the American people by this bill. If the people appear submissive you will follow it with bolder legislation on the subject. After wrangling for months you have brought forward a measure which was never seriously considered by the committee, and you propose to pass it under the guise of a mail subsidy, hoping that in the closing hours of the session it may escape the attention of the public whose money you will vote to the favored shipowner engaged in carrying ocean mails. Are you not satisfied with having already so extravagantly handled the revenues as to face a probable deficit of $100,000,000 during the fiscal year of 1908? Why do you want to augment that deficit by the almost $4,000,000 carried by this bill? A few years ago we heard a Congress ridiculed and condemned throughout the United States as a "billion-dollar Congress." Yet this Congress will be approximately a $2,000,000,000 Congress. The total estimate for appropriations for the fiscal year 1908 is more than $1,005,000,000. The appropriations provided for by the present session of Congress for that year will probably exceed $900,000,000, and may reach the $1,000,000,000 mark.

Unless the prophet from Minnesota fails in his forecast, our revenues for the fiscal year 1908 will be $100,000,000 less than our expenditures! Are you not satisfied with creating a deficit of $100,000,000? Have the sponsors for this Administration computed the cost of maintaining the General Government? Think of it! We have voted away for one year's expense about $12.50 *per capita* to the entire population of the United States! Twelve dollars and fifty cents to every man, woman, and child beneath our flag! Is it not time to call a halt in this reckless, needless waste of public moneys? What limit, if any, will you gentlemen of the majority fix to appropriations? There are so many meritorious public purposes to which our revenues may now be applied that no misappropriation of any part of them to private greed can be approved or tolerated. The principle underlying this bill is class legislation, favoritism. It is a pity that the closing hours of this session should be devoted to such an unholy cause when the tables of our committees are piled high with measures of general public interest that can not receive consideration, but are quietly creeping into pigeonholes and dropping into everlasting sleep. Facing a deficit of $100,000,000 for the next fiscal year, we are solemnly asked to vote about $4,000,000 a year more to a few steamship lines, *just as if we were looking for some way in which to increase the deficit. And gentlemen on the other side of the Chamber justify it, not so much on the ground of substantial merit as on the claim that a Democrat once advocated it.* Favoritism run mad! Who asks a subsidy to the farmer when drought withers his crops? Who favors a subsidy to the miner, the artisan, the merchant, and all the countless thousands who toil in other ways? If none are bold enough to justify subsidies to them who love the country and obey its laws, what spirit prompts this legislation—this foolish, fruitless, indefensible favor to them who neither need nor especially deserve the public favor? [Loud applause.]

Mr. Chairman, listening to the remarks of the gentleman from Washington [Mr. HUMPHREY] and other gentlemen on this floor I think warrants me in illustrating the spirit in which they seek to evade full responsibility for this measure by telling a story. It is said that the distinguished gentleman from Ohio, when returning from the Orient a few years ago, observed a lady very seasick sitting upon the deck of the vessel beside a gentleman whose head was lying in her lap, and who seemed to be just as sick as she was. The gentleman from Ohio approached the lady and said, "Madam, can I do anything for you?" She replied, "Oh, my God, no; go away and let me alone; I am so sick." The gentleman from Ohio insisted further and said, "Then perhaps, madam, I can do something for your husband," indicating the gentleman whose head reposed in the lady's lap. She then looked down and for the first time discovered that she was holding the sick man's head. In horror she looked up and said, "Oh, my God; he is not my husband; I never saw him in my life before; I do not know who he is." That, gentlemen, is the spirit in which some Members of the majority seek to evade the responsibility for this measure. [Applause and laughter.]

Mr. GOULDEN. I yield ten minutes to the gentleman from Massachusetts [Mr. SULLIVAN].

Mr. SULLIVAN. Mr. Chairman, I regret that the gentleman from Washington [Mr. HUMPHREY] who addressed the House this afternoon on the question of the ship subsidy has been obliged to leave, but I trust he may return in time to hear a portion of my remarks. If he had not spoken, I would not have inflicted the House with my remarks upon this question, but he said some things this afternoon which ought not to go without comment. I know from personal observation that there is much interest displayed by Members of this House in the question of the ship subsidy. I am not surprised that that interest is felt more particularly upon the seacoast, but I have observed filling the spaces in this gallery for the last four years representatives of the ship subsidy lobby, who have been most persevering in their efforts to stimulate this Congress into favorable action upon this project.

I assume that it is because the gentleman from Washington [Mr. HUMPHREY] represents a section of the country at which one of these subsidized lines will touch that he became so fervent in his criticisms of the attitude of the Democratic party upon this question. He seemed to be at a loss to account for Democratic opposition to this bill, except upon one ground, and so I will read from his remarks, where he makes reference to Mr. Harriman, who is the railroad magnate with whom the country is now so familiar. He says:

> The hand of Harriman is here in this House now, and it is over here on the Democratic side, and trying to defeat these lines because Harriman wants them defeated, and the reason of that is plain. It is because Harriman has said, and I challenge anyone to dispute it, that he will not take advantage of this subsidy, and the reason for it is easy to understand.

Now, when the gentleman from Washington was challenged to submit to the House a single particle of proof upon which this grave charge was founded, he failed to do so, but reiterated the statement that Harriman was opposed to this ship-subsidy legislation. I have not been able heretofore to discover the connection, the close political connection, which the gentleman assumes to exist between Mr. Harriman and the Democratic party. I had always supposed that if he had any connection with a political party it was the Republican party, and as I recollect a portion of his testimony in the insurance investigation in the State of New York, there was something said about his ownership of a Republican governor of the State by the name of Benjamin Odell. That is the last officially declared connection of Mr. Harriman with any political party that I was aware of until the gentleman from Washington sought to establish, by his own unsupported statement on this floor, the connection between Mr. Harriman and the Democratic party.

Now, he says Mr. Harriman wants this bill defeated. If Mr. Harriman wants it defeated, it does not follow that because the Democratic party wants it defeated also that the Democratic party is obeying the mandate of Mr. Harriman. If we could find no other reason for Mr. Harriman's disregard of the bill, it would be found perhaps in the fact that it carries a subsidy of only $3,700,000 a year, which is a mere bagatelle and something which he can not afford to spend any of his valuable time in the attempt to secure. The gentleman has failed utterly to produce a particle of evidence in support of his proposition that the Democratic party was actuated by any motives except honorable ones in its opposition to this bill. But the gentleman made other charges against the Democratic party. It would seem that the Democratic party was sufficiently distressed without having to carry the burden of these new charges upon its back; but he made other charges, and I read further from the gentleman's remarks:

> That is what the Democratic party is trying to do now—to keep us from having communication with the Philippines in order to bring disgrace upon the administration of those islands. They hope to inveigle us into a war with Japan, to make us so weak that Japan will attack us, and then they hope to ride into power over their country's disgrace.

Well, if Japan does attack us she will attack us at our most vulnerable point. The gentleman from Massachusetts, my colleague [Mr. MCCALL], has already pointed out the strategic value to Japan of the Philippine Islands. He called attention in a very able article to the fact that if Japan attacked the Philippine Islands we would be forced to fly to their defense, concentrate our Navy in Philippine waters, and give the Japanese a tremendous advantage over us in that conflict. That advantage Japan would not possess if we did not retain the Philippine Islands, but it is a long step from that set of facts to the reasoning of the gentleman which makes us appear to be seeking a war with Japan in order to defeat the Republican party and come into possession of power.

I will admit that the country might well suffer a great deal in order to secure the inestimable boon of defeating the Republican party and retiring it from office, but I indignantly disclaim any intention, as one member of the Democratic party, of bringing war upon the nation in order to accomplish even that splendid result. And I may add further that I do not believe a single individual in the 80,000,000 of people in the United States will place any credence in the statement of the gentleman from Washington, but will account for it as a chimera of the imagination, which afflicts no one except the gentleman from Washington. But if the gentleman from Washington

really wishes to know why the Democratic party, if it takes party action upon this bill, opposes it, he will find other motives than the one which he attributes to us. The first one is this: The Democratic party believes that the taxpayers of this country are already bearing greater burdens than should be imposed upon them by law, and that it is not the duty of statesmanship in this land to impose additional burdens upon our people, but to relieve those people from some of the burdens which oppress them now.

If he seeks a further reason, it will be found in the Democratic party's historical opposition to the policy of paternalism. The Democratic party regards a ship-subsidy measure as highly paternalistic. It is properly a Republican measure, because it is a piece of the same scheme of paternalism that has inflicted upon this country the infamous Dingley law that is now upon the statute books. The Democratic party does not believe it to be statesmanship or good policy, or political expediency, even, to tax all the people of the United States in order to enable one class of its people to transact the shipping business at a loss. We believe that every industry should stand or fall upon its individual merits. If we sought inspiration, we could go back to the declaration of Daniel Webster, who in 1816, speaking upon an allied question, said:

> How, sir, do shipowners and navigators accomplish this? How is it they are able to meet and in some measure to overcome universal competition? Not, sir, by protection and bounties, but by unwearied exertion, by extreme economy, by unshaken perseverance, by that manly and resolute spirit which relies upon itself to protect itself.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GOULDEN. I yield the gentleman five minutes more.

Mr. SULLIVAN. Now, if the people of the United States had paid heed to that injunction of Webster and relied upon themselves to protect themselves, I take it there would be no need of the advocacy of a ship-subsidy bill to-day in order to restore the merchant marine. Since when has the American flag disappeared from the ocean? The disappearance began, Mr. Chairman, at the time of the advent of the policy of high protection. In 1860 Great Britain had a net over-sea tonnage of 4,658,687 tons. The United States had 2,546,237 tons. To-day, after forty years of free trade, I read the figures for 1901, Great Britain has increased her tonnage to 9,608,420 tons, while the United States, under forty years of high protection, has had its tonnage reduced to 889,129 tons.

There is the story and the reason of the disappearance of the American flag from the ocean. If we could have free materials for our ships we could construct them cheaper and we could put them in competition with any other country in the world, but the Department of Commerce and Labor, through one of its officials, has made the statement that materials in this country cost the shipbuilders 30 per cent more than the same American materials cost their competitors to build ships in foreign lands. That handicap is alone sufficient to account for the disparity in the tonnage between Great Britain and the United States. But if this were not so, if we could not compete, because of the high price of labor and of materials in the construction of ships, with shipbuilders in foreign lands, still the question remains, Would it be good policy to force a single industry at the expense of the taxpayers of the whole nation?

In the last analysis, if we take the statements of the gentlemen upon the other side, this whole proposition means this, that the foreigners are willing to transact this shipping business for us now at low prices and that it is not desirable for the American public to get low prices, but we should pay a bounty to American shipbuilders in order that we may have the disadvantage of high prices. Is that the acme of American citizenship in the twentieth century? I submit that there is no consideration of policy or principle which justifies the singling out of one class and making the whole United States bear the burden of the payment for the transaction of that business, which but for that bounty would have to be transacted at a loss.

Now, in a book recently published—a very excellent one, by Franklin Pierce—entitled "The Tariff and the Trusts," a most illuminating table appears, in which the relation of the tonnage of several nations to their tariff taxes is displayed, and the inference follows inevitably from this table that in those countries where the tariff taxes are highest the amount of tonnage per capita is lowest. In those countries where the tariff taxes are lowest the amount of tonnage per capita is highest.

I read from the table to support those conclusions. The average ad valorem of import duties is given in this table of twelve countries, beginning with Russia, and the average ad valorem rate of import duties is 131 per cent, and it has 1 ton of steam shipping to every 330 inhabitants. The United States with an average of 73 per cent——

The CHAIRMAN. The time of the gentleman has expired.

Mr. SULLIVAN. I want just three minutes more in which to finish this table.

Mr. GOULDEN. Mr. Chairman, I yield three minutes more to the gentleman.

Mr. SULLIVAN. The United States, with an average of 73 per cent ad valorem on manufactures, shipped from England to the United States, has 1 ton to 166 persons; Austria-Hungary, with an average of 35 per cent ad valorem tariff rate, 1 ton to 110 persons; France, with an average of 34 per cent in its tariff rates, ad valorem, has 1 ton to 71 persons; Italy, with a 27 per cent rate, 1 ton to 72 persons; Germany, with a 25 per cent rate, 1 ton to 34 persons; Sweden, with a 23 per cent rate, 1 ton to 24 persons; Greece, with a 19 per cent rate, 1 ton to every 12 persons; Denmark, with an 18 per cent rate, 1 ton to every 9 persons; Norway, with a 12 per cent rate, 1 ton to every 4 persons; Holland, with a 3 per cent rate, 1 ton to every 15 persons; and the United Kingdom, with no high protective tariff, 1 ton to every 4.6 persons, which proves, it seems to me, that in those countries which have the lowest artificial barriers and the freest facilities for an interchange of products between the people of their respective nations there is a larger tonnage employed to transport the commerce of those nations. And it seems to me that the lesson from those tables is that if the United States would modify its tariffs it would increase its tonnage.

To-day the farmers of the Mississippi Valley are threatened with tariff taxes. On the 30th of June under the new tariff with Germany, which increased the rates upon American agricultural products tremendously, wheat will be increased 114 per cent in its rate; corn, 212 per cent; flour, 156 per cent; bacon, 80 per cent.

Why should the farmers of the Mississippi Valley adhere to a policy which shuts out the German market for their surplus products of wheat, corn, flour, lard, and bacon and at the same time fastens upon them a policy of ship subvention that puts additional taxes upon them without bringing any recompense to them? [Applause.]

Mr. GROSVENOR. Mr. Chairman, I yield thirty minutes to the gentleman from Massachusetts [Mr. WEEKS].

Mr. WEEKS. Mr. Chairman, it must be admitted that it is a matter of some speculation just what legislation should be adopted to give the greatest impetus to our merchant marine and to put us in more direct communication with markets which are now reached either through indirect channels or not at all. The fact is, however, and it must be apparent to everyone, that our merchant marine is at its lowest possible stage and that our direct communications with various sections of the world, especially those South American countries which should be among our best markets, and for whose products we should supply a market, are extremely unsatisfactory. If any business man were managing the entire business affairs of the United States, and there were millions of people producing a billion dollars of foreign trade, as is the case in South America, with whom he had no satisfactory connections, he would be utterly lacking in enterprise if he did not at once attempt to obtain some part of that trade; and even though his first attempts might be failures, he would continue to modify his methods until he had obtained a reasonable share of it. Adopting the same reasoning, I am in favor of passing this bill reported from the Committee on the Merchant Marine, although in many respects it lacks what I believe are the good qualities contained in the bill passed by the Senate last winter. Among the objections to it there are very many which apply to the principles involved in this legislation. As these objections will be discussed by others, I do not propose to consider them; but I am specially interested in and am going to speak briefly on that part of this legislation which applies directly to the establishment of a national naval reserve. This part of the subject has not been given the consideration which it deserves, neither has it met the criticisms which have been made against other parts of the bill. In fact, in my search for reasons why a national naval reserve should not be established I am confined almost entirely to the objections which have been made by Mr. Samuel Gompers, the president of the American Federation of Labor, a gentleman well known to many Members of this House.

Before, however, taking up Mr. Gompers's objections to a naval reserve I wish to refer to an article published in the January number of the Federationist entitled "Ship subsidy," which states that this legislation has been furthered by almost every conceivable method of deception, forgery, and bribery. I use Mr. Gompers's language in this case when he says, "In all our country there is not a more corrupt gang than the well-known coterie who are engaged in the scheme to promote ship-

subsidy legislation." If there is any such corrupt gang, they are not in evidence in this Capitol, and I do not believe that any improper methods have been used to bring about this legislation. I can say to Mr. Gompers and others, if they doubt it, that a very large proportion of the business interests of this country, and especially the interests which are contiguous to the coast, believe that this legislation is of vital importance, and this question has not come before any commercial body having to do with commercial relations, within my knowledge, that it has not met the approval of that association. Certainly there has been no greater effort made in promoting this legislation by those interested in it than has been made by the agents of foreign steamship companies, who have opposed it at every stage. I for one prefer to support and build up our own commercial relations, rather than to listen to the advice of those foreign steamship interests which are enjoying our entire carrying trade at a cost to us of more than $200,000,000 annually. Mr. Gompers says:

It is well known that for many years labor has been almost a unit against ship subsidy in any form. In the past few years there has been no dissenting voice among workingmen on that proposition, and the promoters of ship subsidy are well aware of this general view of labor on the subject. For the purpose of deceiving the American people, including the Members of Congress, they agreed upon a scheme whereby it would on the surface seem that a number of labor organizations undertook to create a sentiment in favor of the ship-subsidy bill now pending in Congress. A number of petitions were presented in Congress by Speaker CANNON. It was all regarded as a joke. Organized labor had declared against the proposition, and here were a number of locals petitioning for it.

It may have been considered a joke, but Mr. Gompers's number of petitions coming from local organizations has reached thousands. I presume every Member of this House representing manufacturing sections has received similar petitions, and the Speaker has received, addressed to "The Speaker of the House of Representatives," more than twenty-five hundred. I will read one which I recently received from the Milford Central Labor Union (a union affiliated with the American Federation of Labor), of Milford, Mass., one of the largest manufacturing towns in my district, which is typical of them:

*Resolved*, That the Central Labor Union of Milford, Mass., favors the earliest possible passage of a bill by the Congress of the United States that will cause the use in the United States of American materials by American workmen for the building of the ships needed for the carriage of our foreign commerce, in order that the United States may save and keep in its own channels of trade the $200,000,000 now annually paid to foreign shipowners by the American people for the carriage of our foreign commerce, in order that the Government may be fortified with ships and men for the national defense in time of possible need, and for the employment of American labor.

Attest:
[SEAL.] WILLIAM F. CLANCY, *Secretary*.

Those addressed to the Speaker were in the form of a memorial, not directed to JOSEPH G. CANNON, and therefore he could not properly treat them in any other way than to present them to the House. It is well for labor as well as others to know, when Mr. Gompers apparently attempts to give the impression that the Speaker has presented petitions which had been fraudulently obtained, that this large number of petitions seem to furnish ample evidence that labor is not entirely bound by the wishes of Mr. Gompers and those who in close association with him are attempting to divert the wishes and interests of the laboring man from the channels which will supply employment at remunerative prices for a large number of men.

Mr. Gompers then goes on, in the article to which I have referred, to describe how he has investigated these fraudulent petitions. He writes a letter to T. E. Flynn, general organizer, address 14 Middle street, Cleveland, Ohio, a letter dated, by the way, December 7, 1906, directing Mr. Flynn to go to New York and investigate these fraudulent petitions which have been forwarded by the American Trades Council of the city of New York. It is worth observing that Mr. Flynn is most expeditious in his action, for he reports to the president of the Federation of Labor that he arrived in New York City on Friday evening, the 7th, the same day that Mr. Gompers wrote from Washington instructions to Cleveland for him to go to New York, and that many conferences were held on the following day, Saturday, the 8th, to outline the work of the investigation. After giving this report of Mr. Flynn's careful study, I am convinced that if there was any fraud in this matter it was information which was fraudulently furnished one labor organization by another, that the so-called promoters of this legislation had nothing whatever to do with it other than possibly paying the postal expenses for sending out the blank petitions; and any attempt to connect the name of the Speaker of this House with such fraudulent attempt does not deserve any further consideration. Mr. Gompers, while he may be diligent in furthering what he considers the interests of the Federation of Labor, has never, to my knowledge, placed himself on record as favoring any attempt to strengthen our national military organizations, or to perfect and make efficient the militia organizations of the several States, and I do not recall any statement or argument ever made by Mr. Gompers which would bring about a reduction in national appropriations. Doubtless in this case his prejudice is created against ship-subsidy legislation by the attempt which is being made to create a national naval reserve, and this prejudice is so great that he overlooks the direct benefit which such legislation must bring to every man he is supposed to represent.

Trade conditions in this country, due largely to combinations and consolidations, are such that it has been considered desirable to organize labor for the protection of labor's interests. In my judgment, conditions have warranted and justified such action. It should be, and doubtless is, the main purpose of such organizations to as far as possible provide for the laboring man steady work at a wage as high as the conditions of the special trade employing them warrant. There should be no dissent from this position of labor. But here is an instance where labor of the highest order would receive a large amount of additional work at excellent wages, but the president of the organization, who is employed to further the interests of labor, uses every means in his power to thwart and defeat this legislation. He apparently overlooks the benefits which those he represents may receive for the purpose of discrediting an attempt to increase the national defense in a form which will at the same time materially decrease the cost of maintaining one of the branches of our military service, the Navy, a statement which I will later attempt to prove. Before doing so, however, I am going to refer to one other criticism which is frequently made against this legislation, and that is that it is being urged by the seaboard States for entirely selfish reasons, and that the very States which urge it have not shown any disposition to develop shipping interests at their own expense. I presume it is true that selfishness to a certain degree is behind a large part of the legislation which Congress is urged to consider, but in this case the charge is not well founded, and I especially call the statement which I am about to make to the notice of the Representatives of those States in the interior who feel unwilling to support this legislation for this or some similar reason.

Some of the seaboard States have been alive to this question for years, especially the States of Massachusetts, New York, and Pennsylvania. Under an act of Congress approved June 20, 1874, an act encouraging the establishment of public marine schools, the President was authorized to turn over to certain ports suitable vessels of the Navy, with complete outfit, to be used at stipulated places for marine schools. The States to which I have referred have taken advantage of this law, Massachusetts by an act which was approved June 11, 1891, under which the U. S. S. *Enterprise* was turned over to the State of Massachusetts, and has since that time been in active commission, educating young men for a seafaring life. The Commonwealth has appropriated in the last fifteen years $921,617.74 to maintain this school, an average of more than $61,000 a year, and there have been graduated from the school during the past eleven years 225 students in what is known as the "seaman section" and 257 students who were graduated in the engineer section, a total of 482 men, all of whom have found employment at sea, filling positions of responsibility. About one-half of these graduates are now following a seafaring life, but at this time, owing to the condition of our deep-sea service, there are not places enough for all the graduates.

The city of New York accepted the act of Congress to which I have referred, and the U. S. S. *St. Marys* has been used by the board of education of the city of New York for the last twelve years as a training ship for a seafaring life. The superintendent of that ship states to me, in a letter which I have recently received, that, owing to the condition of our merchant marine, many of the young men who are turned out at that school do not continue a seafaring life, as there are greater opportunities offered on shore. The entire appropriation for maintaining the *St. Marys*, which has come out of the school funds of the city of New York, is $45,000 a year; in addition to that, any repairs which have been made on the vessel are provided for in a separate appropriation, and as the *St. Marys* is an old wooden ship, it is fair to assume that the cost to the city has been about $60,000 annually.

The data is not at hand for the U. S. S. *Saratoga*, which has been loaned to the city of Philadelphia, but as the *Saratoga* is a somewhat larger vessel than either the *Enterprise* or *St. Marys*, I assume that a similar appropriation must have been made by the city of Philadelphia for this purpose.

Now, it must be quite apparent to anyone that these appropriations are made not because they directly benefit the State of Massachusetts, the city of New York, or the city of Philadelphia, but for the general good. If, for instance, an industrial school

to study the textile trade had been established, the graduates of that school would be available to promote the textile industries of the State where the school was established, and they would naturally continue during life in that line of work, and quite likely as citizens of the State where they had obtained their education. But if the graduates of these school ships are able to obtain employment at sea, they necessarily spend the greater part of their time away from the State which has educated them, so that the direct benefits to a State from the maintenance of a school of this kind are not comparable with the same amount of money expended in any other industrial educational enterprise, but I have never heard in Massachusetts, or in the other communities which maintain such schools, any suggestion that the appropriations should not be continued, or any expression that it was not desirable to educate young men so that they would be well fitted for a seafaring life.

During the Revolutionary War and the war of 1812, in fact, in every emergency which has arisen up to and including the days of the civil-war period, the putting of men-of-war in reserve, or laying them up, was not a serious matter, because in those days a large proportion of our population lived on the seaboard and were engaged in seafaring occupations, and especially in the earlier days of the Republic it was necessary for merchant vessels to go armed to protect themselves against pirates. Therefore there was no difficulty in obtaining crews for our men-of-war on the shortest possible notice, and they were not only American seamen, thoroughly equipped to handle their ships, but they were, in addition, familiar with the ordnance of that time.

Since the civil-war period these conditions have very largely changed. Our ocean carrying trade has not increased in proportion to the size of our Navy or to the business affairs of the country. Our men-of-war are now complicated machines. The merchant sailor, having no longer any knowledge of gunnery, which is the first desideratum in the man-of-warsman, can not be depended on to fill the more important positions, such as gun pointers, etc., but they would, with a reasonable amount of training, be valuable to fill the less responsible positions on our men-of-war. The best illustration we have of our defective system, or lack of system, is the condition we were in when the Spanish war broke out. It was then almost impossible for the Government to obtain suitable men for even the minor positions on board those ships which had been laid up at navy-yards, to say nothing of the vessels which were purchased and converted into different types of men-of-war. From February 15, 1898, about sixty days before war was declared, but when it was apparent that war was imminent, until August 15 of the same year, a period which included the entire duration of the war, the Navy Department was able to ship only 2,616 seamen and 1,942 ordinary seamen, although the greatest efforts were made to obtain men, and even this limited number included the enlistment of men of those classes taken from the Naval Militia organizations. This reference to the Naval Militia reminds me that it is the only organized force we have now or ever have had which could be classed as a naval reserve.

The proper functions of a naval reserve and a naval militia, however, are not the same, though they are often confused. If we did not have State governments, the Naval Militia organizations would naturally be included as one branch of our National Naval Reserve, as is done in England; but in this country they are all organized under State laws, and therefore they must be treated from a different standpoint. A naval reserve should supply the additional personnel needed in time of war:

(*a*) To man the additional vessels of war which will be called into war service and to man the auxiliaries.

(*b*) To provide for additions to the complement of vessels already commissioned and manned.

(*c*) To provide the necessary forces to replace casualties in the fleet.

While the Naval Militia in time of war should—

(*a*) Supply the forces to man the naval patrol of the coast.

(*b*) Man the special naval-patrol signal stations on the coast under the control of the Navy.

(*c*) Man the auxiliaries recommended for improvised defense of threatened coast points not defended by the fixed defenses of the Army.

(*d*) Man such harbor-defense vessels or torpedo boats and supply such automobile torpedo crews, etc., as shall be assigned to the inner line of defense.

Generally speaking, the men who have joined naval militia organizations have not been men who obtained their livelihood by going to sea, but they have almost invariably been yachtsmen and, at the same time, men with a fondness for a military training, so naturally they have joined the Naval Militia rather than the land militia forces. The instruction given them has, from the beginning, varied in different States, but, without any exception, they have been prepared for coast-defense work, and in no State had they been especially drilled for, or considered suitable for, service, except as landsmen, on men-of-war away from their own coasts; and no one had had any idea that they would be used for any other service than in connection with the third line of defense. But when the Spanish-American war broke out, the Government, having bought four large steamers from the Morgan Line, which were rechristened the *Prairie*, the *Yosemite*, the *Yankee*, and the *Dixie*, having no reserves and not being able to obtain suitable men by the ordinary methods of enlistment, was compelled to resort to the Naval Militia of the several States to obtain crews for these ships. The Navy Department selected these forces from the four States having the oldest and largest organizations, and the ships referred to were completely officered and manned by the naval militiamen, with the exception of the captain, executive, navigator, and chief engineer, and a few of the leading petty officers. The Naval Militia from Michigan manned the *Yosemite*, that from Maryland the *Dixie*, that from New York the *Yankee*, and the Massachusetts Naval Militia manned the *Prairie*. I have no intention of taking the time of the committee to go into the service which was actually performed by the men from naval militia forces who served not only on these ships, but on many others which were commissioned for coast defense and other purposes; but I am going to ask unanimous consent to insert in the RECORD, so that the House may have knowledge of the value and timeliness of this service, parts of the report made by Rear-Admiral John R. Bartlett, the officer who was, during the Spanish-American war, at the head of the auxiliary navy.

Organizations of Naval Militia existed in January, 1898, in fifteen States, aggregating 3,703 petty officers and enlisted men, and about 200 commissioned officers. Just prior to the war, organizations were officially recognized in two additional States, and provisional organizations were formed in two others. Without waiting for special legislation, the Department called upon the State Naval Militias, in the latter part of March, to furnish officers and crews for the single-turret monitors (which had seen service in the war of the rebellion and were then laid up at League Island Navy-Yard), and had arranged with the governors of the various States that either leaves of absence or discharges should be granted to such officers and men as should volunteer for this duty. The responses were prompt and satisfactory, and showed the patriotic spirit of the Naval Militia, eight monitors being rapidly put in commission, each under command of a naval officer, all the other officers and the entire crews being furnished by the Naval Militias of the various States.

The Department also called upon the States of New York, Massachusetts, Michigan, and Maryland to furnish officers and men for the merchant steamers purchased for the war, and renamed the *Yankee*, *Prairie*, *Yosemite*, and *Dixie*. This was in accordance with the suggestion that some of the older organizations of Naval Militia were competent to furnish officers and men for seagoing vesels. This call was one which taxed to the utmost the resources of the Naval Militia organizations, coming closely as it did upon that for volunteers to man the monitors, but it was responded to with most gratifying alacrity. To fill complement of these vessels, each organization called upon contributed about 250 men.

As examples of the promptness with which the call was met, the contingent from the First Naval Battalion, New York, reported uniformed, armed, equipped, and ready for duty in six hours after receiving notice; and the contingent from the Massachusetts Naval Brigade, which was notified at 1 o'clock on a Saturday afternoon, arrived at the New York Navy-Yard, fully prepared for service on the *Prairie*, at 9 o'clock the next morning. For the first time in the history of the Navy, professional men, business men, and men of leisure and of the highest education were brought into the lower ratings, and from the reports which have come incidentally to my notice, it appears that they served with great intelligence and enthusiasm, and after a short experience made good men-of-warsmen, although they had had little or no training as seagoing sailors, and exhibited some of the lack of knowledge of the care of property and themselves that is common to all volunteers.

The naval militia of the seaboard States had also been taxed to furnish officers and men for the Coast Signal Service. They had been trained to expect such duty, and the admirable manner in which they performed it has been commented upon by me in another report previously submitted.

As this is the first time that the Naval Militia has been called into service by the United States, it is of great interest to note the character of work performed by it and the manner in which it fulfilled the requirements previously outlined by the Department. Apart from their services on seagoing ships (in which they acted as a substitute for a naval reserve and acquitted themselves far better than could have been reasonably expected, in view of their lack of training for such life), and of their services in the Coast Signal Service (in which they more than fulfilled the highest expectations of their friends concerning them), the efficiency of the officers and men of the Naval Militia must be judged from their work in the Auxiliary Naval Force.

The character of the work performed was twofold—first, guard duty, and, second, patrol duty. The scope of the former was limited to the possibilities of the old type of monitors. It must be remembered that these vessels were hastily put into service after having been laid up for a period of over thirty years, and that after the most necessary repairs had been made at the navy-yards there was still a large amount of work which had to be done by their crews to fit them for the service for which they were intended. This was done cheerfully and well by officers and men, who were naturally anxious to be at the front, but who also fully appreciated the exigency which required coast-defense vessels to protect home ports. The routine duties of the first few weeks on these vessels were performed under very adverse circumstances, as repairs were going on (with the attendant noise, confusion, and dirt), painting was being done, and coal, provisions, etc., were being got on board.

After the vessels had been cleaned up and the crews shaken down, and they had reached their stations, a high degree of discipline and efficiency was attained. The crews were regularly exercised and drilled in boat work and artillery with the secondary batteries; target practice was also performed with the old 15-inch smoothbore guns. Many of these vessels cruised from port to port in the district to which they were attached, went to sea for target practice, and entered harbors by day and night, thereby showing that the officers and men of the Naval Militia were thoroughly competent to handle ships of that or a similar type, and there was no mishap of even the slightest character on any of the ten monitors during the four and a half months in which they were in service. The monitors were brought back to be put out of commission in excellent condition, and were so readily handled and manned by their officers and crews that it is fair to believe that the coast-defense vessels in the future can be turned over to the Naval Militia with entire confidence.

The patrol duty was performed by converted yachts and tugs, and the officers and men displayed special aptitude for this work, owing to their intimate knowledge of local waters. Their acquaintance with harbors and bases of supplies, with the local prevailing weather conditions, and with the landmarks which would have to be relied upon in case of the removal of the aids to navigation, make them the force, par excellence, for the work of an inshore patrol. In the duty of protecting the mine fields the high order of intelligence of the officers and men, as well as their knowledge of the local personnel in the merchant marine, aided them in properly enforcing the harbor regulations and in dealing with merchantmen. Their officers also proved to have considerable ability in the handling of small vessels, and the fact that there were no accidents or casualties in the fleet shows that they were qualified to perform their duties. The results of their practice in scouting and reconnoissance work showed that they would have been of great value to the service if the seat of war had unfortunately been transferred to these shores. In order to illustrate the aptitude of these officers for the character of service mentioned, I annex a copy of an "Information blank for signal and boat reconnoissance parties," returned by two of the officers attached to the third district, who were sent to report upon the character of communication by water between Shinnecock Bay and Peconic Bay, Long Island, New York. (Appendix N.)

It is not, however, merely in the performance of guard and patrol duty that the Naval Militia has been of service to the Department, but in many other ways, and the officers and men of the Navy have cause for sincere thankfulness that the Naval Militia existed during the war with Spain. Its officers and men have cheerfully and patiently endured the monotonous and often uninteresting duties connected with shore stations and the coast defense. They put aside whatever ideas they might naturally have had of more active service at the front, and have filled many humble and arduous posts in the navy-yards, on receiving ships, and even in the offices of the Department. In this way many officers and men of the service were freed from these employments and given a chance for experience at the front in actual warfare—an experience which every officer and man who enters the service covets, no matter from what source he entered it.

It must have been a most gratifying disappointment to those critics in the service who feared that in time of war the officers of the Naval Militia would be tenacious of their rank in the State service and overconfident as to their abilities, to see the manner in which they disregarded their titles and accepted commissions of the lower grades, often performing under them work requiring the highest ability. Of the three captains of the Naval Militia in the United States, one was given the grade of lieutenant-commander, owing to his long and honorable record in the Navy, and the other two were commissioned as lieutenants. Of the commanding officers of battalions, none were given a higher grade than that of lieutenant, and some not higher than lieutenant (junior grade). It must be remembered that all of these men left good positions and incomes and that their presence in the service was the only thing that enabled many regular officers to get to the front.

As an evidence of the assistance that the Naval Militia has been to the Navy, I would cite the instance of one of the officers who was assigned to duty in the Department at the outbreak of the war and who was enabled to have a command, owing to the exertions of an officer of the Naval Militia in getting an appropriation from which several vessels were purchased. It was a coincidence that, while this regular officer was absent at the front, his duties were performed for a time by the very officer who had secured the appropriation. There are many other instances which have probably come to the notice of the Department where work was patiently and well performed by the officers of the Naval Militia to the distinct advantage of the officers of the regular service, and the same holds just as true of the petty officers and men.

On the whole, the work of the officers and men from the Naval Militia was performed in a thorough and efficient manner, but our recent experience shows that there is a certain class of work which they should not undertake to do. Their anxiety to see active service and to get away from receiving ships led many men of education to enlist as coal passers and in other ratings which they were not physically competent to fill. This, of course, was quickly discovered and easily remedied without mishap, and only resulted in the discomfiture of the men themselves. In some cases, too (while commissions were being given without examinations), officers undertook duties for which they were not properly qualified, but they were quick to realize their mistake and were assigned to duty which they were found competent to perform after going before examining boards. When it is considered that the Naval Militia put its men promptly in the service when they were most needed, and that no time or money had to be spent in arming, uniforming, or equipping them, it is apparent that the country realized the full benefit of the appropriations which have been made during the past six years and of the services which have been rendered by the Department in drilling and instructing them.

There are at present naval militia forces organized in fifteen States, mustering something over 5,000 men, and while they are a valuable part of our naval establishment, they do not in any sense supply the place of a national naval reserve such as is proposed in this bill. It is difficult to understand why such an important question as the establishment and maintenance of an adequate national reserve should have been so long neglected. This neglect is equally true whether it applies to the press, to Congress, or to those in whose hands naval administration has been placed in recent years, and it is even true when applied to the Navy itself. To a certain extent this condition may be explained by the fact that until comparatively recently it has not been such a pressing question, for the Navy has been so small that public sentiment and service conditions have required that our ships should be fully manned with trained seamen as soon as completed. So personnel and matériel have, in a measure, kept pace; but even under such circumstances it seems rather remarkable that there has not been at least an academic discussion worthy of it. A casual examination of naval reports and the proceedings of the Naval Institute, while showing how alert and diligent the officers of the Navy have been in discussing and recommending every feature of naval appliance, as well as every conceivable question relating to personnel, from a vice-admiral to an apprentice boy, shows, at the same time, very little consideration of this important question, and while our Navy holds a relatively strong position compared with the navies of the world, we are entirely outclassed by them in auxiliaries and reserves, and I wish to call attention to the advanced position which other first-class powers have taken relative to these questions, for they indicate to me, with a degree of certainty, the course which we should follow.

When we are contemplating the establishment of some additional military or naval force, we should take advantage of the experience of other nations, and especially of the results which have been obtained in England, where conditions are, to a certain extent, similar to our own. England has for many years maintained a naval reserve, which has been largely reorganized within the last half dozen years. She has now naval reserve forces which may properly be divided into four classes: The royal naval reserve, royal naval volunteers, royal fleet reserve, and the coast guard.

The total number of officers and men in these different reserves at the last enrollment was 2,299 officers and 53,973 men. In addition to these there are 350 officers and 5,946 men who are pensioners under 55 years of age, and are therefore subject to service, making a grand total of 2,649 officers and 59,919 men.

The royal naval reserve is largely made up of men who leave the navy under the noncontinuous system, and in addition to these men a very large proportion of the men in this reserve are fishermen. It can be readily seen that the very best men to make up a naval reserve are those who have served on board men-of-war, but who have returned to civil pursuits, and especially those men who have served on board men-of-war who, after their term of service has expired, continue in a seafaring vocation. The officers of the royal naval reserve are appointed by the lords commissioners of the Admiralty from officers and others in the mercantile marine. A system of annual and biennial trainings and drills is instituted, and, generally speaking, officers and men, when in service, are paid the same rates paid officers and men in the royal navy; and in addition to that they are paid a retaining fee, which, in effect, amounts to a pension.

The royal naval volunteers were authorized three years ago. The purpose in establishing this reserve was to create a force of naval and marine volunteers to be used on land or sea, but generally on land, in connection with service in ports, coast guard service, and at signal stations. This is a service very similar to that required from our Naval Militia, and the men composing the royal naval volunteers come from very much the same classes as our Naval Militiamen—that is, from almost all commercial walks in life. These men, when called out for war service, are paid the same rates as officers and men in the royal navy. A large number of men in this force are recruited from workmen in shipyards, who are, by their employment, intimately acquainted with the matériel of war. They are given a capitation allowance at the rate of 35 shillings annually for each efficient, and in addition, if they are given a certificate in a course of training, they receive an additional allowance.

The royal fleet reserve is made up of three classes:

Class A, men in receipt of long-service pension, as seamen, stokers, or marines—that is, they must have served twelve years.

Class B, men who have served as seamen, stokers, or marines, but are not in receipt of a pension for such service.

Class C, men employed as artisans or otherwise in any of the naval or civil establishments under the Admiralty, being subjected also to a condition of service in the reserve.

All of these men are entered for twelve years.

The coast guard service includes protection of the revenue service, life-saving service, light-house service, and enforcing the quarantine. It is recruited exclusively from the navy and naval reserves. A coast guardsman is liable to be called upon for sea service at any time, but after nine years' service at sea he is always eligible for the coast guard when not on active duty aboard ship.

In addition to the classes in the naval reserve which I have enumerated, the entire British sea transportation is managed by the royal navy. As a practical proposition the army states the number of troops or quantity of stores it wants transportation for and the navy furnishes the means. My own judgment is that the same system should be adopted in our Navy, that the Army's responsibility when embarking should end at the water line, and when debarking it should commence at the same boundary. The English transportation system consists of three classes, and necessarily any transportation system must be similarly classed, namely:

1. Private vessels, which applies to special lines making regular trips over a fixed route.
2. Government transports.
3. Ships chartered for general transportation service.

The second of these classes should suffice for the ordinary needs of the Army and Navy in times of peace, and the first and third classes should be called into service only in time of emergency. It is the policy of the English Government in calling the first and third classes into service to retain on board the officers and men of the ships taken for this service, so that practically the handling of the ship is continued under the same control and by the same men that handle it in time of peace. The many and direct benefits which may be obtained through the maintenance of such a naval reserve as this is well stated by the Right Hon. Arthur James Balfour, M. P., who, in a speech delivered in the House of Commons May 11, 1905, on the imperial defense, said:

Under the new admiralty system we should have for sea in a comparatively few hours—I believe that six hours would be sufficient—six first-class battle ships and six first-class cruisers, now in reserve, kept ready to put to sea as soon as steam could be raised, manned by crews specially trained to maneuver and to fight them. And in addition to these we should have in reserve, with nucleus crews ready for rapid action, six first-class battle ships, nineteen cruisers of various classes, fifty-eight destroyers, and twenty-eight torpedo boats.

The total time of German service with the colors is seven years; as a rule, three years in active service and four in the reserve. After that men are transferred to the naval defense of the first levy, in which they remain five years, and then to the naval defense of the second levy, to which they continue to belong until they reach their thirty-ninth year. All men of the seafaring or semiseafaring population who are found temporarily or permanently unfit for naval service or who, from some other reason, are exempt from serving with the colors, are assigned to the relief reserve of the navy, in which they remain for a period of twelve years. Officers and men in the reserve are called out for two periods of training of eight weeks each annually. Those in the naval defense of the first levy are called out for two periods of training of two weeks each annually. Those in the second levy are not drilled in time of peace. The total number of officers in the German naval reserve is 1,707, and there are now about 131,000 men.

FRENCH NAVAL RESERVE.

All Frenchmen who are mariners must enter their names in a register kept in the administration bureau. They in that way become recruits for the navy. The duration of service of the recruit is from the age of 18 to the age of 50. Men are allowed retainers, and in addition to that they are accorded special privileges. For instance, the profession of seaman, the sea fishing industry, and the right to sell their catch do not require any license of those who are on the roll. Any man reaching the age of 50 who can count three hundred months of actual seagoing service in the aggregate, either in men-of-war or merchant vessels, is entitled to a pension which amounts to nearly one-half the pay which he would receive when in active service with the fleet. There are many other privileges of a minor character attached to this service, which now is made up of 878 officers and 129,000 men.

The Japanese naval reserve consists of men who have completed their period of service in the active list, and is also recruited from the merchant fleet. Nearly all of the men in the Japanese navy are volunteers, who engage for eight years' active service and four years in the reserve. If conscription is resorted to, the conscripts are kept four years on active service and eight years in reserve. There are to-day in the Japanese reserve about 300 officers and 12,000 men.

There is another element of importance in connection with this bill which has, I think, been largely overlooked in the past. When we are brought face to face with a war it becomes necessary to provide a large number of auxiliary vessels, such as supply vessels, tenders, dispatch vessels, colliers, transports, etc. At the beginning of the Spanish-American war the Navy was entirely unprovided with vessels of this character. It became necessary to procure them without delay, and a board was appointed for that purpose. I have personal knowledge that this board was made up of officers of great intelligence and experience, and I doubt if it could have been organized any more efficiently than it was. But the board had the greatest difficulty in finding suitable vessels, and when vessels of proper character were found it was necessary to pay the owner's price for them. Naturally, the owner's price was largely in excess of their ordinary commercial market value. Therefore the Government was put to a large expense, which, if it had been provided with vessels of this class before, could have been prevented.

For various purposes there were purchased altogether ninety-nine vessels, only three of which were men-of-war, the latter being the only ships of a fighting character which could be bought. Thirteen of these vessels have been sold since the war, most of them immediately after its close; two of them have been lost, and the remainder have been retained in the naval service. The thirteen vessels sold cost $2,095,281.40. They were sold for $1,051,488.50, almost exactly one-half the purchase price. The total cost of all the ninety-nine vessels purchased was $17,727,258.35. If those vessels sold represented what would have been the probable relative price obtained for the unsold ones, provided it had not been considered advisable to retain them in the service, they would have shown a net shrinkage of very nearly $9,000,000. Such a shrinkage would not be possible if the provisions of this bill are carried out, so that the Government may have reserve ships to call upon in case of need, and it would not be necessary to keep many of the vessels referred to in the naval service if we had such a reserve supply to call upon. I will present at this time a complete list of these vessels, showing the prices paid for them, the cost of repairs to make them available, and the prices obtained for those sold. It should be noted that the Navy Department was forced to buy these ships, as it was absolutely impossible to charter vessels for transport or other auxiliary purposes; and as an illustration of the additional cost, due to the scarcity in ships, it is only necessary to state that the cost of chartering vessels on the Atlantic—those vessels chartered by the War Department for transport service—was about 21 cents per ton per day, while the cost on the Pacific, where there was a greater demand at one time and a smaller supply, averaged about 30 cents per ton per day.

In all these cases, where the Government chartered vessels for transport services, the prices which I have named were net to the owners. The cost of managing them became a charge to our Government. Any changes which were made in them to adapt them for the purpose needed were paid for by the War or Navy Departments, and the vessels, at the end of service, were returned to the owners in the same condition they were in when delivered to the Government. Whenever England finds it necessary to take over vessels, conditions are very different from this. The average cost per ton per month has been about $6, though it has ranged as low as $5 and as high as $7.50. This would be equivalent to about 20 cents per ton per day. But it means very much more than that, for the owner is obliged to dock his vessel at his own expense, and the rate of hire does not commence until the ship is ready for sea. The owners are obliged to cut the decks for increased ventilation and hatchway accommodations, to take down and rearrange bulkheads, and they have no claim for compensation for any alterations or restorations at the termination of the service. Furthermore, the owners of the vessels assume all charges for wages, food, and other expenses connected with handling the vessel, which must be kept in readiness for service when desired. The master of the vessel is liable to punishment for misconduct. The owners of the transport are responsible for Government stores lost through negligence, and in many other minor details the Government is protected in its charter.

Six vessels of the Cunard company and the Canadian Pacific Railway Company are held as royal naval reserve merchant cruisers or in some other way at the disposal of the Government. They are:

| Name of vessel. | Gross tonnage. | Speed. | Owner. |
|---|---|---|---|
| | *Tons.* | *Knots.* | |
| Campania | 12,950 | 20.75 | Cunard Co. |
| Lucania | 12,952 | 20.75 | Do. |
| Umbria | 8,128 | 18.0 | Do. |
| Empress of India | 5,934 | 16.5 | Canadian Pacific Rwy. Co. |
| Empress of China | 5,947 | 16.5 | Do. |
| Empress of Japan | 5,940 | 16.5 | Do. |

These companies are paid an annual subvention of £21,120, which is exclusive of the amount paid for the transportation of mails. These vessels are built so as to be turned over to the government to be used as cruisers, the armaments

and fittings being ready for installation. Two additional steamers of the Canadian Pacific Railway Company, the *Tartar* and *Athenian*, are held at the disposal of the Admiralty without additional subsidy.

In France a large number of the best known ocean steamers belonging to the General Trans-Atlantic Company and the Messageries Maritime Company are built for cruiser purposes, and the armaments and fittings are kept ready for installation at all times. The following is a list of these vessels, and they include the fastest and best merchant steamers sailing under the French flag:

| Name of vessel. | Gross tonnage. | Speed. |
|---|---|---|
| *Compagnie Générale Transatlantique.* | *Tons.* | *Knots.* |
| La Lorraine | 11,146 | 20 |
| La Savoie | 11,168 | 20 |
| La Provence | 15,000 | 21 |
| La Touraine | 8,349 | 18 |
| La Navarre | 6,343 | 17 |
| La Bretagne | 6,756 | 17 |
| La Champagne | 6,724 | 17 |
| La Gascogne | 7,090 | 17 |
| LaNormandie | 6,029 | 16 |
| *Messageries Maritimes.* | | |
| Amazone | 6,240 | 18 |
| Tourane | 6,344 | 18 |
| Magellan | 6,253 | 18 |
| Tonkin | 6,364 | 18 |
| Chili | 6,375 | 17 |
| Cordillere | 6,379 | 17 |
| Atlantique | 6,708 | 18 |
| Australien | 6,570 | 17.5 |
| Polynesien | 6,569 | 17.5 |
| Ville de la Ciotat | 6,631 | 17.5 |
| Armand Behie | 6,635 | 17.5 |
| Dumbea | 5,917 | 16.5 |
| Nera | 5,824 | 16.5 |
| Ernest Simons | 4,562 | 17 |

In Germany the fast steamers of the Hamburg-American Line and the North German Lloyd are held as auxiliary cruisers, and their armaments and fittings are ready at all times for installation. In addition to the list, I will add to my remarks, held as above there are also available for service as cruisers or transports twenty other vessels of these lines having an average speed of 15 knots:

| Name of vessel. | Displacement. | Speed. |
|---|---|---|
| | *Tons.* | *Knots.* |
| Hamburg-American Line: | | |
| Deutschland | 32,000 | 23.5 |
| Amerika | 42,000 | 17.0 |
| Kaiserin Aug. Victoria | 42,500 | 17.0 |
| Kronprinz Wilhelm | 22,300 | 23.5 |
| Norddeutscher Lloyd: | | |
| Kaiser Wilhelm der Grosse | 21,300 | 23.0 |
| Kaiser Wilhelm II | 26,600 | 23.5 |
| Trave | 9,300 | 18.0 |
| Kronprinzessin Cecelie | 28,000 | 24.0 |

Japan has retained a large number of vessels, flying the Japanese flag, for cruiser purposes in time of war. These vessels belong to different Japanese companies and are thirty-three in number. For these armaments and equipments are ready for installation at any time. In addition to that, there are a large number of smaller vessels, having a low rate of speed, which may be taken over for transport service. The total amount paid by Japan in 1905 for vessels under this subsidy amounted to $4,147,604.

Having demonstrated that it is a great waste not to be able to obtain vessels by charter or otherwise for transport and other auxiliary purposes in time of war, I wish now to call the attention of the committee to the saving which might be made provided we had an adequate reserve personnel. The average cost for maintaining the first-class battle ships in our fleet last year was $483,000. This includes the pay of officers and men, cost of stores, and all other kinds of supplies except medical stores and cost of repairs. The average cost of repairs of our battle ships last year was $65,000, and the average estimate for medical stores was $1,000; making the total average cost of maintaining one battle ship in commission for one year $549,000. These figures might vary from this amount from year to year, but quite likely would not vary more than $25,000. Now the unit of our battle ship fleet is a division of four ships. Two divisions make a squadron, and two or more squadrons a fleet. Therefore, if our Atlantic fleet, which is the training school for the handling of battle ships, is made up of sixteen ships, we should have a complete organization, giving all the experience and benefits from fleet maneuvers and drills which could be obtained from any larger number of ships which might be detailed for this purpose. We will have at the end of this year at least twenty-four battle ships in commission. It is fair to estimate that a battle ship will be laid up for some purpose about one-fourth of the time. Therefore, in order to make a complete fleet it would be necessary not only to have sixteen ships, but four in addition to take the place of those laid up. This would leave four battle ships which could be put in reserve if there were any assurance that they could be put into active service quickly in case of need. Definite figures of the cost of a battle ship in reserve are not obtainable, but very careful estimates have been made by the Bureau of Navigation, and they are substantially as follows: That the ship shall carry one-fourth of her crew, or one complete crew of all ratings for each four battle ships in reserve. To provide for a ship in this condition the estimated expense is as follows:

| | |
|---|---|
| Estimated pay of officers and men | $70,000 |
| Estimated rations | 6,000 |
| Incidental expenses | 500 |
| Equipment stores | 2,000 |
| Ordnance stores | 500 |
| Construction stores | 500 |
| Steam-engineering stores | 1,000 |
| Stores for the supplies and accounts | 12,000 |
| Total | 92,500 |

The estimated average repairs for a battle ship in reserve is $10,000, and for medical stores, $300, making an estimated total expense in reserve of $102,800. The difference in expense between a battle ship in reserve and one in commission would be $446,200. If at the end of the year we have four battle ships in reserve instead of in commission (this can be done without weakening the fleet, provided we can man these ships on short notice), there would be a net actual saving of four times that amount, or $1,784,000. But this saving is none the less marked in other vessels of the Navy than in the case of the battle ship. In fact, it will be as certainly possible to lay up ships of other classes as battle ships, because they will not be needed for fleet maneuvers, but will be used for the ordinary purposes which go to make up our naval establishment in time of peace. Take, for instance, the other classes in the order of their prominence. The cost of maintaining an armored cruiser of the *Colorado* type, including repairs, the latter item estimated, would be about $570,000, it being more expensive to maintain an armored cruiser than a battle ship, because the cruiser carries more men. If the proportional cost for maintaining this ship in reserve is the same as in the case of the battle ship, the cost in reserve would be $114,000, showing a net saving of $456,000. There are four vessels of this class in commission, and if these were laid up in reserve it would make a net saving of $1,824,000. By the same processes the saving in putting in reserve a first-class cruiser would be $332,000; of a second-class cruiser, $285,000; of a third-class cruiser, $198,000. As I have said, the only possible objection to this procedure is the improbability—in fact, impossibility—under present conditions of providing suitable crews for vessels in reserve.

A large number of battle ships and armored cruisers have been completed and put in commission during the past two years, and many more will be turned over to the Navy Department this year, so that by January, 1908, with the exception of the battle ships *South Carolina* and *Michigan*, we may practically say that our present building policy has been completed. The latter two battle ships will not be completed until about January 1, 1910. Therefore I want to show what will be the relation of the personnel and the material in our Navy January 1, 1908. Our present authorized enlisted strength is 37,000 men, and of this number 32,035 were recruited January 1, 1907. It is proposed by the Navy Department to divide our fleets into active and reserve. The active fleet will include only those battle ships, armored cruisers, protected cruisers, scout cruisers, and gunboats built to carry the latest types of gun—that is, those designed to use smokeless powder. To these must be added the gunboats required for service on inland waters, torpedo-boat destroyers, and torpedo boats, dispatch vessels, tenders, training and station ships, supply vessels, colliers, and tugs required for the training and maintenance of the active fleet, and all of these vessels must have their complements of men. It is the intention to include in the first reserve fleet those vessels not originally designed for smokeless powder guns, together with a proportionate number of torpedo boats, fleet auxiliaries, etc.; a certain number of gunboats not necessary for immediate active service, such dispatch vessels and other similar vessels as are not required for use with the active fleet as well as coast defense vessels, such as monitors, old cruisers, etc. To this reserve fleet should be added those battle ships

which are not required for the training of the fleet as well as armored cruisers and other cruisers not necessary for immediate active service. If this division is made, as it is now the intention of the Navy Department, the active fleet will require 37,283 men; the first reserve, which will be manned by skeleton crews, only one-fourth of the usual force of officers and men being attached to these vessels, 3,309 men; for shore stations, 1,219 men.

To put the ships of the first reserve in commission and man all colliers with naval crews would require 7,827 men; to put ships of the second reserve in commission would require 1,986 men. It is estimated that the men with a fleet of this size in training—that is, on training ships, in navy-yards, and in hospitals—would number 8,250 men, making a grand total of 59,874. If from this number is taken the whole enlisted authorized strength, 37,000, there will be a shortage January 1, 1908, of 22,874 men. As our enlisted strength is now about 5,000 men below the maximum, we will, in fact, be 28,000 men short January 1, 1908.

The average cost of pay and rations for the men in our Navy is $492 a year, or 10,000 men would cost $4,920,000 annually. Now, if we can supply the place of 10,000 men, as provided by this bill, we would save the difference between the cost of a man in the regular establishment and a man in reserve. The cost of the latter can not be absolutely determined until the regulations for drill periods, etc., are worked out, but I believe $100 annually would much more than cover the cost of the reserve man, which would mean a net saving of $392 annually for the 10,000 provided by this bill, or a total of 3,920,000.

To summarize: If this bill passes and the steamship lines authorized by it are established, it will prevent the waste which was so evident at the beginning of the Spanish war in providing auxiliaries for our fleet; it will furnish vessels which can be transferred into scouts, or even cruisers, if it is necessary to do so, and it will supply a reserve for our permanent naval establishment without which it will be necessary to largely increase the number of men in the permanent establishment, or leave ourselves in the position of having built men-of-war which we have no means of manning. Instead of manning parts of our fleet which will be put in reserve, provided there are reserve men to man them, I believe that I have conclusively shown that a saving of about $4,000,000 annually can be made. This is more than the entire appropriation for subsidies called for by the bill, and would in itself, in my judgment, justify the passage of the bill if there were no other reasons for its passage. [Applause.]

The CHAIRMAN. The hour of 6 o'clock having arrived, in pursuance of the previous order of the House, the committee will stand in recess until 8 o'clock.

Accordingly (at 6 o'clock p. m.) the committee took a recess until 8 o'clock p. m.

---

EVENING SESSION.

The recess having expired, the Committee of the Whole House on the state of the Union resumed its sittings, with Mr. CURRIER in the chair.

Mr. GOULDEN. Mr. Chairman, I now yield ten minutes to the gentleman from Texas [Mr. GILLESPIE].

Mr. GILLESPIE. Mr. Chairman, this bill can not be discussed in ten minutes. But it is so objectionable to me I desire to express my opposition to it. It is the entering wedge of a system of ship subsidies, although now thinly disguised under the name of mail subvention. No one can be mistaken in the hope and purpose of the forces that are behind this bill. Every man in the Republic is to be taxed for the benefit of the shipbuilder and the shipowner—the American ship trust.

Mr. Chairman, the thing that makes possible all these raids upon the Treasury of the Republic is our large idle surplus wrung from the people by unjust and unnecessary taxation. This surplus explains a $2,000,000,000 Congress—a tax of more than $100 upon every family in the country. What thoughtful man, Mr. Chairman, can see the end of these extravagant expenditures?

This bill, Mr. Chairman, is the beginning of a return to our shipbuilders of the amount of tariff taxes that they long have claimed have been unjustly taken from them. They say: "The surplus is here; let us have our share."

Mr. Chairman, the policy of subsidizing shipbuilding is not only unjust and discriminatory in that it forcibly takes from those who have earned and gives to those who have earned it not, but it is a narrow and unwise policy for the Republic to pursue in an economic sense. It is taking labor and capital from the more profitable fields of industry and devoting them to the less profitable. Our labor and capital are now both profitably employed. The demand is most urgent from all over this country for greater supplies of both labor and capital. There is no idle capital and there is no idle labor.

This policy does not propose to employ any labor not already employed nor engage any capital not already engaged. To the extent of the subsidy it is a wasteful expenditure of the people's money.

Not only that, Mr. Chairman, but it is false economy as applied to our foreign trade. We are as dependent upon foreigners as they are upon us. We boast of our prosperity, and it is apparently unsurpassed, but how plainly our prosperity depends upon that of the foreigner! What would become of the great surplus of the products of our mines, factories, and fields if the foreigners were not prosperous enough to take it at remunerative prices? This surplus would be thrown upon the home market. Low prices would result. Stagnation of business would set in. The arm of industry would be paralyzed.

Now, suppose it is true that this foreigner, upon whom we so much depend, by reason of the overcrowded conditions of population of his country and the resultant fierce struggle for existence—suppose that it is true under these conditions he builds and operates ships cheaper than our people can afford to do; is it a wise policy, I submit, by our subsidies to drive him from the seas and close up his shipyards? This policy is not only unjust to the foreigner, but equally unwise and short-sighted for us.

We frequently hear the absurd statement made in the discussion of this question on this floor and elsewhere, that if we could carry our foreign tonnage in our ships we could save each year $200,000,000, that being the sum we pay per year to foreigners for ocean tonnage.

To make such an absurdity true we would have to have idle capital and labor to thus employ. If, as is claimed, the difference between the investment value of our capital and the price of our labor is at least 25 per cent in our favor, as compared with the foreigner, then our annual tonnage, if carried at American standards, would cost us $250,000,000, a loss of $50,000,000, which we would have to make good by subsidy if this policy were carried out. Is it not wiser to pay the foreigner the $200,000,000 for carrying our freight and we employ the amount of labor and capital necessary for that in the building of railroads and factories, the opening of mines and farms, which at the end of the year would be worth $250,000,000, a clear gain in wealth of $50,000,000? And not an American will have worked any harder or received any less wage.

But, Mr. Chairman, I do not believe it is true that the foreigner can build ships any cheaper than we can, because we are making locomotives, paying the freight on them, and selling them in the foreign market cheaper than the foreigner can. The same is true of other expensive and complicated machinery. Why can we not build ships, also, as cheaply as the foreigner? While our labor is more expensive, it is more effective by reason of the superior physical and mental condition and greater skill of the American laborer.

Mr. Chairman, this ship subsidy is unjust. It is, in my opinion, morally wrong, and it is false as a principle of political economy. It is of supreme importance, Mr. Chairman, that our people learn again the lesson of economy in governmental expenditures, of taxation only to meet those expenditures, of determined opposition to all special favors and privileges. If American institutions are worth preserving, these simple but most essential lessons must be learned again. Mr. Chairman, the greatest danger to this Republic is the surplus of $250,000,000 now in our Treasury. [Applause.]

Mr. SHACKLEFORD. Mr. Chairman, I shall not undertake to discuss this question at any length. The Republican party is in full control of this House, and whatever its leaders may have determined upon as a policy will be adopted. Nothing that I can say would in any manner shape the destiny of this piece of legislation, and it is not worth while to discuss it at length. I rise simply to call attention to some of the methods that have been pursued in pushing the measure. For more than a year a literary bureau, paid for by somebody, has been sending arguments in favor of this bill to every part of the country. Not a day has passed but we have received literature of one kind or another in favor of ship subsidy. This has undoubtedly cost money. Who has paid for it, Mr. Chairman? Those who expect to be benefited by it. There is a ring, a clique, which is pushing this measure, hoping to rob the American people. Fraud of various kinds has been resorted to in order to give the measure strength before the American people. Among other things, Members of the House have been flooded with the literature purporting to come from labor organizations of the country, all in favor of this legislation. Mr. Chairman, that was a subterfuge;

it was a fake; it was a fraud, perpetrated knowingly and willfully by those who hoped to benefit by this piece of legislation, to benefit by this legislation which taxes the great body of the American people for the benefit of a few already overrich corporations, and gives the country nothing in return for it. As an evidence of the subterfuges and the frauds and the misrepresentation that have been practiced to promote the passage of this bill I hold in my hand an article written by Mr. Samuel Gompers taken from the American Federationist. I insert it here that this House and the country may know to what extent these greedy corporations, thirsting for this money to be wrung from the people, will go. The article is as follows:

SHIP SUBSIDY.

[By Samuel Gompers.]

In all our country there is not a more corrupt gang than the well-known coterie who are engaged in the scheme to "promote" ship-subsidy legislation. It is their business to conduct news bureaus so that every ingenious argument which can be invented or presented may reach the public; to create a "public sentiment" in favor of the scheme; to its iniquitous features, iniquitous not only as to subsidy itself, but also to hide the effort to establish by false pretense the un-American proposition of conscription in the naval service as a condition precedent to employment on privately owned vessels. Trying to "buy" men is their regular business; nothing is too mean or contemptible for the "promoters" to stoop to if it only seems to give their schemes the appearance of success. It is well known that for many years labor has been almost a unit against ship subsidy in any form; in the past few years there has been no dissenting voice among workingmen upon that proposition. Particularly has this been emphasized since the disguised conscription feature has been incorporated as part of the general scheme. The "promoters" of ship subsidy are well aware of this general view of labor on the subject. For the purpose of deceiving the American people, including the Members of Congress, they hit upon a scheme whereby it would, on the surface, seem that a number of labor organizations undertook to create a sentiment in favor of the ship-subsidy bill now pending in Congress. A number of petitions were presented in Congress by Speaker CANNON. It was all regarded as a "joke." Organized labor had declared against the proposition, and here was a number of the locals "petitioning" for it. It was indeed a good joke, but no one seemed to regard it of sufficient importance to try to learn the cause of the apparent inconsistency. I knew the character of the ship-subsidy "promoters" and some have given me credit for knowing something of the labor organizations. It seemed to me to be worth while to learn the true inwardness of the whole matter, and I decided that a complete and truthful investigation should be made, and if it were of sufficient public interest to print it, as I now do, in the columns of the American Federationist.

The initiation of the investigation and its results are given below, and it will amply repay the readers to follow them carefully to the end:

WASHINGTON, D. C., *December 7, 1906.*

Mr. T. E. FLYNN,
*General Organizer, 14 Middle Street, Cleveland, Ohio.*

DEAR SIR AND BROTHER: I wired you to-day to come to this office, and inasmuch as I am leaving here and will not be able to meet you, I address you this letter, which you will use for your guidance.

While at the convention of the American Federation of Labor, several unions forwarded to me some petitions, resolutions, leaflets, etc., upon the subject of "ship-subsidy bill," Senate bill 529, which purported to emanate from the Marine Trades Council of the port of New York and vicinity and were sent to the unions, misrepresenting certain features of the bill and omitting to state other features of that bill.

From my knowledge of the financial and other conditions in regard to the Marine Trades Council of the port of New York, it seemed to me to be exceedingly peculiar that that council could afford to circularize the country and bear the expense of printing, addressing, postage, etc., involved in this matter. However, as I was very busily engaged with the many affairs of the convention, I transmitted to the committee having the subject of ship-subsidy bill under consideration these documents, requesting the return of same to me.

On my return to the headquarters of the American Federation of Labor in Washington, a large number of organizations forwarded here these circulars, petitions, and resolutions, and asked whether they were bona fide, and, in view of the position of labor upon the subject of ship subsidy, as well as the practical conscription feature of the bill, they protested against the receipt of such communications from an organization purporting to represent labor even locally.

During this period I learned that Speaker CANNON presented a number of petitions purporting to come from labor organizations, and of the same character to which I refer. I attach herewith a copy of each of these documents which were forwarded to the labor organizations of the country.

As I have already stated, I strongly doubt whether it was possible for the Marine Trades Council of the port of New York to take the position it purports to have taken or could bear the expense involved by that action, even if it has authorized the issuance of these documents.

You are a member of the Brotherhood of Boilermakers and Iron Ship Builders of America. You know that that organization once favored a feature of ship subsidy, but that at its later conventions repudiated any advocacy of that bill or ship subsidy in any way, and directed that the members and local organizations should not, in the future, take any affirmative action upon that subject. Because you are familiar with the history of this subject-matter, I desired that you should come to this office and then immediately upon perusal of this letter to proceed to New York and make a thorough investigation of this entire subject-matter. You should visit the Marine Trades Council and ascertain from that body what it has done, if anything, upon the subject.

I would suggest that you avoid publicity, particularly for the present, but your investigation must be impartial, thorough, and comprehensive, and make full report thereon to me. I want you to take nothing for granted. Everything you report must be founded upon fact; it must be detailed and complete. If you should find it necessary to associate some one having an understanding of the subject or the means of ascertaining the facts, you may associate such a one with you in making this investigation.

Please give this matter your prompt, careful consideration and action, and submit your report at as early a date as possible.

Fraternally, yours,

SAMUEL GOMPERS,
*President American Federation of Labor.*

GENERAL ORGANIZER FLYNN'S REPORT.

NEW YORK, *December 13, 1906.*

Mr. SAMUEL GOMPERS,
*President American Federation of Labor,*
*423 G Street NW., Washington, D. C.*

DEAR SIR AND BROTHER: I herewith submit a report of the matter signed to me by you to investigate the Marine Trades Council of the Port of New York and Vicinity, and its alleged participation in advocating the passage of Senate bill No. 529, known as the "ship-subsidy bill."

I arrived in New York City on Friday evening, the 7th, arranged for conferences with our representative, Herman Robinson, and several members of the Marine Trades Council. Many conferences were held on Saturday, the 8th, to outline the work of investigation.

On Monday, the 10th, Organizer Robinson and myself attended the meeting of the Marine Trades Council. We were courteously received and accorded the privilege of the floor. We placed the entire matter before the Marine Trades Council and produced document or letter marked "Exhibit A," which purports to be an official communication upon the letter head of the Marine Trades Council, signed by Walter S. Weeks, as secretary. We also produced the pamphlet marked "Exhibit B," and several copies of resolutions, marked "Exhibits C," "D," "E," and "F," and one letter, entitled "Facts about American shipping," marked "Exhibit G," and the half letter entitled "The shipping bill in a nutshell," marked "Exhibit H." All of these exhibits have been sent to thousands of organizations throughout the United States in the name of the Marine Trades Council, and after their examination by the delegates of the Marine Trades Council they denied absolutely their authorization. Nothing of this nature has been authorized by them and no moneys have been appropriated for the printing or distribution. A resolution was thereupon unanimously adopted, which is also herewith attached, dated New York, December 10, 1906, marked "Exhibit I," and signed by the president, the recording secretary pro tempore, with the seal of the Marine Trades Council of the Port of New York and Vicinity attached, which is self-explanatory.

For your further information will say that among a number of the individual organizations, whose names appear upon the back of the communication marked "Exhibit A," are those of the Pattern Makers' Association and the Ship and Machinery Riggers' Union, and both of these organizations have denied over their seals and signatures having ceased affiliation with the Marine Trades Council over two years ago. These denials are herewith attached and marked "Exhibits J and K."

Prior to our departure from the meeting of the Marine Trades Council on Monday evening the following action was taken: That a committee representing the Marine Trades Council be appointed to cooperate with the representatives of the American Federation of Labor to ascertain who had the printing done, who contributed the money therefor, and who were responsible for the issuance and distribution of these various exhibits in the name of the Marine Trades Council.

The printer was located and is Mr. C. J. O'Brien, of 227 William street, New York, N. Y. A visit to his establishment revealed nothing, his reply being that he was desirous of protecting his customers as far as possible, and the committee of investigation was compelled to resort to legal means.

Believing that a crime had been committed, the committee and I proceeded to the office of the district attorney of the city of New York, and the entire matter was placed before him, which resulted as follows: He immediately summoned the printer to his office, also summoned Mr. Walter S. Weeks, whose name appeared on the letter of the Marine Trades Council as secretary, and from them we obtained information that led to the discovery of the person or persons who were responsible for the issuance of these communications and resolutions.

A Mr. A. D. Story, who, during cross-examination by the assistant district attorney, said that he was employed by Mr. Alex. R. Smith, whose office is in the Rockefeller Building, in Cleveland, Ohio, and who occasionally comes to New York City, and is engaged in the furthering of legislation for the shipping interests. Mr. Story also admitted that he was employed by said Mr. Smith to look after the printing and addressing and that the communications were mailed, for which he was compensated, and the entire subject-matter regarding Mr. Story's connection is hereto attached by a copy of a sworn affidavit in the district attorney's office, which is self-explanatory.

Another copy of a sworn affidavit obtained from Mr. Walter S. Weeks, as secretary of the Marine Trades Council, explaining the use of his name, which is self-explanatory, all of which will tend to show that the petitions for the indorsement of the ship-subsidy bill (S. 29) have been obtained by fraudulent means; and Assistant District Attorney Krotel stated: "The crime as committed and as per evidence in this case is a serious one, as the name of an organization comprising a number of other organizations has been used without authority, knowledge, or consent, and is punishable by a term of from one to ten years' imprisonment."

I believe that Mr. Alexander R. Smith, who is the person that supplied Mr. Story with the copy for the printer, furnished the money to pay the expense and is no doubt the guilty person, and upon the affidavit obtained from Mr. Weeks and Mr. Story, as Exhibits L and M, are sufficient to indict Mr. Smith.

All the above is respectfully submitted by

Yours, fraternally,

T. H. FLYNN,
*General Organizer, American Federation of Labor.*

The reader's attention is called to the following fraudulent letter, referred to in Mr. Flynn's report as "Exhibit A." It purports to emanate from a bona fide labor organization over the signature of its secretary; yet even the letter head on which it is printed is a counterfeit, the name of the secretary is forged, and the subject-matter of the letter was never authorized by the organization in question. This fraudulent letter perverts the facts in connection with the ship-subsidy bill, omits any reference to the features of the bill, which practically make compulsory naval service a condition upon which seamen can find employment on privately owned vessels.

It appeals to organized labor to help a supposed labor organization in an alleged honorable move.

The counterfeit letter head reproduced below should be compared with the genuine, also reproduced in this article. The motto in quota-

tion marks on the counterfeit is printed in red; no such motto appears on the genuine.

EXHIBIT A.

NEW YORK (BOROUGH OF MANHATTAN), *November 5, 1906.*

Mr. WILLIAM VAN BECKUM, *Green Bay, Wis.*

DEAR SIR AND BROTHER: Will you please bring inclosed documents before your lodge? They show resolutions by other labor unions favoring a bill that will give American workmen employment in building ships of American materials, in American shipyards, for our foreign-carrying trade. Blanks are also sent that you may chose and adopt one, or to help you draw up one of your own and adopt it. We also send a summary of the bill as it passed the Senate. I will also ask that you read "Facts About American Shipping" at your next meeting.

We are asking your help in order to get Congress to pass the bill that will give us work at our trades in American shipyards. If things go on as they are, alien labor, using foreign materials, builds the ships employed in our foreign trade. If this bill goes through, it means that American materials, used by American labor, will build the ships in this country. This bill is in the interest of American labor. It means work for us where there is now idleness. Will you help us out?

If you adopt a resolution, will you send it to your Congressman and a copy to Hon. JOSEPH G. CANNON, the Speaker of the House of Representatives, Washington, D. C., signed by your secretary and with the seal of your lodge attached? We would thank you to let us know what you do.

Fraternally, yours,

WALTER S. WEEKS,
*Secretary Marine Trades Council.*

This communication on the counterfeit letter head contained on the back a list of organizations purporting to belong to the Marine Trades Council.

EXHIBIT B.

A pamphlet purporting to contain resolutions adopted by labor unions in favor of the ship-subsidy bill was inclosed with the above letter, and these resolutions were used as the inducement, the bait, to influence other labor organizations to regard the entire matter as emanating from and absolutely and exclusively in the interest of labor.

With the above letter and pamphlet were various forms of resolutions which the unions were urged to adopt and forward to Speaker CANNON. These resolutions were referred to in Mr. Flynn's report as "Exhibits C, D, E, and F."

"Exhibits G and H" were printed circulars containing arguments and special appeals urging the reason why the ship-subsidy bill should pass. The following is the resolution adopted by the Marine Trades Council of New York upon learning that the above fraudulent documents were being circulated. A facsimile of the true letter head of the Marine Trades Council is reproduced below. It will be seen that the counterfeit (Exhibit A) differed considerably from it both in style of type and matter.

EXHIBIT I.

NEW YORK, *December 10, 1906.*

Whereas we, the delegates of the Marine Trades Council of the Port of New York, are in possession of facts that letters and copies of resolutions have been printed, mailed, and distributed among the different labor organizations throughout the United States in the name of the Marine Trades Council of the port of New York, requesting the indorsement of organized labor in favor of the passage of Senate bill 529, known as the ship-subsidy bill; and

Whereas the Marine Trades Council of the Port of New York has neither authorized the printing, the mailing, or distributing, nor has any money been appropriated for the printing, mailing, or distribution of such letters or resolutions; and

Whereas said letters and resolutions have been mailed and distributed without either the sanction or authority of the Marine Trades Council of the Port of New York: Therefore, be it

*Resolved*, That we, the Marine Trades Council of the Port of New York, in regular meeting assembled on the evening of the above date, repudiate the issuing of said letters and resolutions or mailing of the same in the name of this Marine Trades Council of the Port of New York.

Adopted unanimously.

Attested by—

[SEAL.]

PETRO NEVIL, *President.*
HUGH J. MCLAUGHLIN,
*Recording Secretary pro tempore.*

The following organizations, whose names were printed on the back of the fraudulent document (Exhibit A), are not even part of the marine trades council, as their protests, which follow, show:

EXHIBIT J.

NEW YORK, *December 10, 1906.*

Communications have recently been sent out by an organization calling itself the "Marine Trades Council of the Port of New York," requesting indorsements for the ship-subsidy bill now pending in Congress, and among the names of the organizations affiliated with said council appears that of our organization under the title of the "Ship and Machinery Riggers' Union."

We desire to say that this organization of riggers has not been affiliated with said council for over two years, and any communication issued by them with the name of our organization attached is unauthorized and unwarranted.

[SEAL.]

JOSEPH W. MCFADDEN, *President.*
C. J. POOLE, *Recording Secretary.*

The pattern makers also promptly repudiated the counterfeit documents which they were quoted as indorsing.

EXHIBIT K.

PATTERN MAKERS' ASSOCIATION OF NEW YORK AND VICINITY,
*New York, December 10, 1906.*

Communications have recently been sent out by an organization calling itself the "Marine Trades Council of the Port of New York," requesting indorsement for the ship-subsidy bill now pending in Congress, and among the names of the organizations affiliated with said council appears that of our organization under the title of the "Pattern Makers' Association."

We desire to say that this organization of pattern makers has not been affiliated with said council for over two years and any communications issued by them with the name of our organization attached is unauthorized and unwarranted.

ARNOLD B. MACSTAY, *Business Agent.*

The following is a copy of the affidavit of Walter S. Weeks, made in the office of the district attorney of New York City:

EXHIBIT L.

People of the State of New York against Alexander R. Smith, Arthur B. Story, and Walter S. Weeks.

STATE OF NEW YORK, *County of New York, ss:*

Walter S. Weeks, being duly sworn, says that he is the business agent and president of the International Brotherhood of Boiler Makers and Iron-Ship Builders, Helpers, etc., of America, and that he knows the defendants, Arthur B. Story and Alexander R. Smith, and that, after having been duly sworn in the presence of a committee of the Marine Trades Council of the Port of New York and Vicinity, and also of the American Federation of Labor, said committee consisting of Henry Bohn, of the Marine Trades Council, and Messrs. Herman Robinson and Thomas H. Flynn, representing the American Federation of Labor, makes the following statement in regard to his connection with a certain forged communication dated November 5, 1906, and purporting to issue from the Marine Trades Council of the Port of New York and Vicinity, and purporting to be signed by deponent as secretary of said council.

Deponent further says in the latter part of August or in the first part of September the defendant, Alexander R. Smith, came to deponent at Nos. 67 and 69 St. Marks place, in the city and county of New York, and asked me if the resolution presented by the boiler makers, or asked whether a resolution passed by the Marine Trades Council in April, had been voted on. I told him "Yes;" and he asked me if I would allow him to use my name as the international president of the Boiler Makers, etc., of America to get copies of the journals—monthly journals—of the international organization, containing the addresses of the secretaries of local organizations, to be used as coming from Walter S. Weeks, representing the Boiler Makers, etc., of America, and I did, for the consideration of $200, and that I had never allowed or given Mr. Smith the privilege to use my name as the secretary of the Marine Trades Council and absolutely deny that I had ever seen a copy of this letter head sent out with the name of the Marine Trades Council, and the only part of the communication that I saw was a copy of the resolution unsigned.

I did not see a copy of the pamphlet with the resolutions supposed to be passed by the Marine Trades Council on April 30, 1906, or the resolutions supposing to come from the boiler makers and iron-ship builders' organization throughout the country. That is not one of the official letter heads of the Marine Trades Council, and also it does not bear the seal of said Marine Trades Council (which was shown to me in the district attorney's office), and that the Marine Trades Council has not authorized or appropriated any of the moneys for the payment of such printing.

Sworn to before me this 14th day of December, 1906.

WALTER S. WEEKS.

The following is a copy of the affidavit of Arthur B. Story, made in the office of the district attorney of New York City:

EXHIBIT M.

People of the State of New York *v.* Alexander R. Smith, Arthur B. Story, and Walter S. Weeks.

STATE OF NEW YORK, *County of New York, ss:*

Arthur B. Story, being duly sworn, makes the following statement in the presence of the aforesaid committees:

Some time in the month of September, 1906, Mr. Alexander R. Smith came to me at the Maritime Exchange Building, in the city and county of New York, and asked me if I would take charge of the printing to be sent out and attend to the addressing, which names he would furnish, and that Mr. Weeks was to furnish the journals for these names. After printing being completed the documents to be inclosed in envelopes and sent to the several addresses, which I attended to.

Q. Did he give you any data upon which to fill the order—the printing order?—A. He sent me copies of the several different kinds of pamphlets and the four resolutions and what other documents there are there to take to the printer and have the printer set them up and print them.

Q. Did you not see Mr. Weeks at that time?—A. Yes; I had seen Mr. Weeks.

Q. Previous to seeing Mr. Smith?—A. No.

Q. How did Mr. Weeks come into that, as far as you are concened?—A. Mr. Smith introduced me to Mr. Weeks at the Maritime Exchange Building.

Q. And what did he say to you when he introduced you to Mr. Weeks?—A. He said that Mr. Weeks was to hand me in as fast as he could receive them the several lists from the different lodges which he had written to, I believe. That was all the conversation I remember. That I was to use those lists as to inclose these documents to the several different organizations.

Q. Who was it that gave you this form—this Marine Trades Council letter head—who gave you that?—A. I don't remember where that came from, whether that was inclosed in the document that Mr. Smith handed me or not.

Q. Did Mr. Weeks hand you any document at all outside of the rosters?—A. I don't remember if he handed me any.

Q. Don't you remember that Mr. Smith gave you any instructions in regard to this letter—this communication? There must have been some instructions.—A. He gave me instructions to have the letter head printed and the letter——

Q. Did he dictate the form of the letter, or Mr. Weeks?—A. I don't know who dictated that. I got it in typewritten form.

Q. What form did you get it?—A. I believe it was a typewritten letter.

Q. What kind of paper was it?—A. I don't remember whether it was on a letter head of one of the Marine Trades Council or on a blank letter head.

Q. But you understood you were to transcribe it upon one of the letter heads which you were to have printed?—A. Yes, sir.

Q. Mr. Smith was very particular about that?—A. Yes, sir.

Q. Did he tell you where he got this letter head?—A. No.

Q. What conversation did you have with Mr. Weeks about the use of his name?—A. I don't remember ever having any conversation with Mr. Weeks about the use of his name otherwise than that he arranged with Mr. Smith.

Q. What did he arrange with Mr. Smith?—A. That I don't know.

Q. What did Mr. Smith tell you he had arranged with him?—A. Mr. Smith didn't say just what arrangement he had made with Mr. Weeks other than it was all right to go ahead with the work.

Q. Who instructed you to sign Mr. Weeks's name to this document

as secretary?—A. I believe Mr. Smith did at that time. I think that was understood between him and Mr. Weeks.
Q. You thought it was understood between Mr. Weeks and him?—A. Yes. He said that anything he told me to do had been understood between himself and Mr. Weeks.
Q. Did he tell you that Mr. Weeks was the secretary of the Marine Trades Council?—A. I believe so; yes, sir.
Q. Did you ever ask Mr. Weeks whether he was the secretary of the Marine Trades Council?—A. I don't remember whether I ever did.
Q. Now, you say you had a model to work on to get this printing done. Did Mr. Smith give you any instructions as to what style he wanted the printing done—the printing of the letter heads like this? If you were doing a straight job, why didn't you copy the letter head that was submitted to you as a model? Why did you change it?—A. (No answer.)
Q. The one that you showed me, the black one, is the official letter head. Why did you copy it in that shape?—A. I gave the order for the printing and followed instructions. Those were the instructions I had.
Q. Those were the instructions you had that Mr. Smith gave you?—A. I didn't know that was to be——
Q. Did he instruct you to put the various organizations on the back of it, which was not on the official?—A. He instructed me to have—I believe he said copy over that letter head.
Q. Now, Mr. Story, be perfectly frank with us. That was not so long ago that your memory can be so weak. There is the evidence itself. You know perfectly well what you copied and how you copied it. Tell us the whole thing.—A. Now, I am not trying to keep anything back. I don't want to get confused and say things that are not so.
Q. Now, here is the situation. Here is a peculiar style of printing. Is that your own choice of the style of letter head or was that suggested to you by somebody else?—A. The copy for that letter head was sent to me by Mr. Smith.
Q. In precisely that shape?—A. Well, I don't know—but it was in that shape.
Q. Now, you must know whether it was in that shape or not, because the two are entirely so different. It was either in that type or that type [indicating different letters]?—A. I don't know whether that was the exact type.
Q. Don't you think there is a lot of difference between the two?—A. Yes.
Q. Did Mr. Smith invent this out of his own mind or did you invent it, or did he instruct——A. He sent me a copy how to have them printed.
Q. Is that the copy [indicating letter with black type]?—A. I could not tell you whether that is the exact copy or not. Mr. Smith sent me a copy for that letter head and I handed it to the printer and the printer followed that copy. I don't remember whether the copy was exactly like that or whether it was like that [indicating].
Q. You don't remember this—whether this was the original that was handed to you or this [indicating]?—A. I could not say offhand. I know that the copy was handed me; whether it was just in this style of type or whether in this style I don't know.
Q. Did the printer return the copy to you when the job was finished or did he still keep that in his possession?—A. I believe he still has a copy.
Q. As a general rule printers return whatever copies they send them. I believe that is the custom.—A. They submit you a proof and they keep the copy.
Q. When you had this copy completed and ready for the printer, did you show it to Mr. Weeks?—A. I don't remember whether I did or not; whether I showed that particular copy to Mr. Weeks or not. Mr. Weeks, I understood, knew that that letter was to go out.
Q. Did you ever talk to Mr. Weeks about it?—A. I talked to Mr. Weeks; asked him if it was all right, and I believe he said all right.
Q. Asked him if this letter was all right [indicating]?—A. You see there was so much of this printing that I asked Weeks about the printing, and he said all right, and whether it was that particular letter or not I don't know.
Q. Now, what about that pamphlet, Mr. Story [indicating]?—A. I had that printed.
Q. Who gave you the data for that?—A. Mr. Smith.
Q. Bring a copy?—A. Yes; sent me a copy.
Q. Written out in long hand?—A. I believe it was written on the typewriter.
Q. Did you ever speak to Mr. Weeks about that?—A. I don't remember speaking to Mr. Weeks about that.
Q. When you received this copy from Mr. Smith did you not also have Mr. Weeks's signature on the copy?—A. On the copy?
Q. Yes, sir.—A. No; I believe not.
Q. How did you get Mr. Weeks's signature?—A. Mr. Weeks gave it to us.
Q. To you personally?—A. Signed—yes; and I had a cut made.
Q. How did he sign it?—A. The same as the copy.
Q. Walter S. Weeks, secretary?—A. No; Walter S. Weeks.
Q. Now, Mr. Story, are you sure about that?—A. Quite sure.
Q. Who put on the secretary?—A. The secretary was on the copy.
Q. You had a woodcut made of the whole thing?—A. Yes.
Q. Just of the signature?—A. Yes.
Q. Who told you to have that woodcut made?—A. I was authorized to have that made by Mr. Smith.
Q. Did you ever speak to Mr. Weeks about it?—A. Yes.
Q. Did you tell him that you had a copy of a letter signed by him as secretary?—A. I believe I did; yes.
Q. Did he say it was all right?—A. Yes; because he gave me his signature. He wrote his signature out for me.
Q. He did that?—A. Yes, sir.
Q. That was not in the copy you got?—A. No.
Q. He wrote it out for you?—A. Yes, sir.
Q. All you got was "fraternally, yours, secretary," and you wrote his name in?—A. No; he first wrote his name in; he wrote his name on a piece of paper, which I had the wood cut made from, to be put on those letters.
Q. Still you showed him the copy, didn't you?—A. I don't remember showing him the copy at the time I asked him for his name—for his signature.
Q. Had you got the copy at the time he gave you his name?—A. I don't remember whether that copy was here at the time or not.
Q. Then that must be the copy you had, Mr. Story [indicating]?—A. It may have been, but I don't remember.
Q. Why did you change it—the type?—A. There was not any particular reason for it. It was submitted to the printer, and the printer set up the letter head.
Q. Now, how much money did you spend on all this business?—A. You just mean on the printing?
Q. On the whole thing.—A. About $2,000.
Q. And that money was supplied by whom?—A. It was sent to me by Mr. Smith.
Q. By check?—A. Yes.
Q. His personal check?—A. I don't remember whether that was his personal check or not.
Q. It was a check?—A. It was a check; yes.
Q. And you had the check cashed in the city of New York?—A. Yes.
Q. Who cashed it for you?—A. I believe it was Mr. Pendelton.
Q. Where?—A. He is on Pearl street. I don't know whether he is just above—I think it is 27 Pearl.
Q. What is his business?—A. Ship broker.
Q. Ship broker?—A. Yes; he is a ship broker.
Q. You mean that he put the check through his bank?—A. I believe so; yes.
Q. Don't you know how you got it cashed?—A. He sent one of his men out, I presume, to get it cashed.
Q. And he brought you back the cash?—A. Yes.
Q. With which you paid that printer?—A. Yes.
Q. You paid Mr. Weeks $200?—A. No; Mr. Weeks got a check.
Q. Did he get the second hundred in cash?—A. No.
Q. Then you didn't give him the first hundred?—A. I believe Mr. Smith gave him the first hundred.
Q. Did you deposit this money in your own bank?—A. No, sir.
Q. You held it as cash?—A. Yes.
Q. To pay printing bills?—A. Yes.
Q. And gave Mr. Weeks $50?—A. Yes.
Q. What did you do with the balance?—A. There is still a balance of some $40 left.
Q. Forty dollars left, and you say all you got out of it was fifty?—A. Yes, sir.
Q. Now, did you ever remember having any conversation with Mr. Weeks about this communication—with Mr. Weeks?—A. (No answer.)
Q. Didn't you have any curiosity at all about it?—A. (No answer.)
Q. Here you were getting $2,000 to put the thing on the market, and Mr. Weeks, he was getting something out of it, but the Marine Trades Council apparently was not getting anything out of it?—A. I supposed this resolution had been adopted by the Marine Trades Council——
Q. And didn't you at all ask Mr. Weeks about that?—A. No; because Mr. Smith told me that that had been——
Q. Mr. Smith always comes in between us and Mr. Weeks. Mr. Weeks never volunteered any statement to you?—A. Nothing but that it was all right.
Q. He said it was all right?—A. Yes.
Q. What was all right?—A. To go ahead with the job.
Q. Go ahead with the job, the whole job, you mean?—A. The whole job.
Q. And he saw the copy with which you were going ahead?—A. I don't know whether Mr. Smith submitted it to Weeks.
Q. Well, did you submit it to Mr. Weeks? He must have known what you were going ahead with.—A. Mr. Smith had talked it over, I understand, and he handed me the copy and——
Q. After the job was completed did you have any conversation with Mr. Smith, after your part of the work was done? How about that—after the job was completed; what conversation did you have with Mr. Smith?—A. I have never seen Mr. Smith. He has only been in New York once.
Q. Have you not seen him since the job was completed?—A. No, sir.
Q. You got $2,000; how much did you spend in printing?—A. Well, it was all spent in printing, with the exception——
Q. You can get a good deal done for $2,000; that sort of cheap printing.—A. (No answer.)
Q. Have you the bill of the printer?—A. No.
Q. Did he ever render you a bill?—A. Yes; he rendered me a bill, and the bill was paid and forwarded to Mr. Smith.
Q. Paid by you?—A. I paid the bill and sent the bill forward to Mr. Smith.
Q. You forwarded the bill—receipted bill?—A. Yes, sir.
Q. Don't you know how much it was?—A. There is one for $600 and some odd, and addressing—and addressing the envelopes, and all that amount—all those things were paid out of the $2,000. That includes everything—postage and printing.
Q. How many envelopes were sent out, do you suppose?—A. About 14,000. They took 2-cent stamps.
Q. Now, that is not so long ago. How much did you pay him?—A. I paid the printer at one time $600 and some odd dollars.
Q. And another time you made another payment?—A. And another time there was several jobs, and they were paid at different times. I don't remember just the exact amounts.
Q. Did you not use this type [indicating]? Did you suggest the use of this type or did the printer?—A. The copy was submitted and the printer used his own discretion.
Q. You are a sensible man; if that is the only official letter head of the council [indicating], you knew you had no right to use another. If you used a different letter head, then you were doing something that was not very close to the line. This is an organization and has some dignity, and all that sort of thing. You would not have any right to change printing of it unless you knew what you were doing. There is the evidence right there of your knowledge of what you were doing.—A. I believe that was understood between Mr. Weeks and Mr. Smith. I submitted the copy——
Q. That is the copy you submitted [indicating]?—A. I don't know; no, sir.
Q. Is that the copy you got [indicating]?—A. Let me ask you a question, when you mean this is the copy I got or this is the other. I want to know this: Do you mean whether the copy that I handed the printer was in the same type as this?
Q. Yes; exactly.—A. I can't tell you that. I sent the printer the copy that I received, and he followed it as near, I believe, as he could when he made the letter head up. Mr. Smith came to me and told me a proposition, and I carried it out with his instructions.
Q. You worked for Mr. Smith before?—A. Yes.
Q. On a similar proposition?—A. No.
Q. Just a moment ago you were trying to take up the cudgels for Smith, and it seems to me you knew what he was after, and it seems to me you knew the whole scope of this communication, which is an illegal communication. It is a more serious matter than you thought it is.—A. Mr. Smith came to me and he told me what he wanted done.

He said that he had seen Mr. Weeks and that Mr. Weeks had agreed to everything, and therefore I carried it out. I understood that it was understood between Mr. Smith and Mr. Weeks.

Q. Well, that is about the situation now, gentlemen. You made statements under oath, and anything you want to change, now is the time to do it.—A. Nothing to change on my part. I have told everything I know. I have nothing to change. I have told the truth, and that is as far as I know.

Q. Well, poor Smith, he has to bear the whole thing. If anybody has got to go to jail, it is Smith.

Sworn to before me this 14th day of December, 1906.

ARTHUR B. STORY.

With that evidence spread upon the records of this House I conclude what I have to say upon this subject. A syndicate, a clique, a combination of capitalists who would resort to that sort of means to deceive the Members of this House would resort to any other kind of unfair and dishonest means to enrich themselves at the expense of the country. All honor to Mr. Gompers for his timely and patriotic exposure of the dishonesty and despicable methods of the looters who thus seek to rob the people. There is not a man on this floor who believes that the bill now before the House will aid American shipping. It is not intended for that purpose. It is intended as an opening, to be hereafter followed in asking for ship subsidies in the future. It is a prelude to a system of syndicated graft to be levied upon the people.

Mr. SULZER. Mr. Chairman, my position regarding this subject I believe is well known, but I want to say again to the Members of this House that I have always been, am now, and always hope to be opposed to every effort to place upon the statute books of our country a ship-subsidy law. I have given considerable study to this question, and I think I know something about it. I agree substantially with the gentleman from Ohio regarding the deplorable condition of our merchant marine, but I differ with him absolutely respecting the cause of the decline of our over-sea carrying trade; and we are as far apart as the poles respecting the best and most practical remedy for the rehabilitation of our shipping industries and the carrying of our ocean trade in American ships, built by American workmen, manned by American sailors, and flying the American flag.

It is a fact that can not be successfully denied—a most deplorable fact—and every man who has investigated the subject knows it, that we have less registered tonnage for ocean carrying trade to-day than we had one hundred years ago. In 1806 the United States, with a population of less than 7,000,000 inhabitants, owned more registered tonnage for ocean carrying trade than the United States in 1906, with a population of over 85,000,000. The American tonnage in 1806 was over 900,000, and it is now less than 800,000, and, what is worse still, it showed an actual decrease of more than 6,000 tons last year. In 1806 American ships, flying the American flag and manned by American sailors, carried over 90 per cent of our deep-sea trade and a great part of that of all the countries of Europe. To-day we carry very little of our own trade and practically none of other countries, notwithstanding the fact that we should be the foremost maritime power in the world. More than nine-tenths of our once great and powerful deep-sea fleet has vanished, and not one new keel for an ocean-going ship is being laid to-day on either our Atlantic or Pacific coast, while the vessels of foreign nations throng our ports and monopolize more than nine-tenths of all our import and export commerce.

In 1806 over 92 per cent of our export and import trade was carried in American bottoms; in 1906 less than 8 per cent of our imports and exports are carried in American ships. The United States pays to the owners of foreign deep-sea vessels for conveying our freights and passengers over $200,000,000 a year, and much of this vast sum of money goes to the owners of foreign steamers which are regularly enrolled on the merchant cruiser lists of European governments, manned by naval reserve officers and sailors, and available for immediate service against us in case of war. The British Empire has 14,800,000 tons of merchant shipping; Germany has 4,960,000 tons; France, 1,680,000; Norway, 1,460,000, and Italy, 1,280,000. The larger part of all these great deep-sea fleets is engaged in the ocean carrying trade, but the Government of the United States, which produces and exports more merchandise than any other nation on earth, has a fleet registry of deep-sea commerce of less than 800,000 tons.

The Republicans, taking advantage of this deplorable condition, are now seeking to remedy the situation by ship subsidies, and hence earnestly favor and eloquently advocate this ship-subsidy bill, which is no remedy at all, but a mere temporary makeshift to rob the many for the benefit of the few, by taking money out of the pockets of the taxpayers generally and giving it to a few favored individuals. I am opposed to this subsidy policy. The taxpayers, when they understand it, will never consent to it. This substitute for the Gallinger bill is a subsidy bill pure and simple, and at the very best is only a temporary expedient, and no one who understands this subject believes for a single moment that it will ever accomplish what its advocates so vociferously claim. A subsidy is a bounty, a bonus, a gratuity, and it never has succeeded, and it never will succeed, in accomplishing the purpose desired. All history proves it conclusively. Wherever and whenever it has been tried it has failed. In my opinion, if this subsidy bill should pass as it is to-day it would not restore our American merchant marine or aid materially our shipbuilding industries. It is a waste of time to talk about ship subsidies, and I believe every honest American is absolutely opposed to them. We might just as well pass a bill to pay a subsidy to every man who grows a bushel of wheat, or a barrel of potatoes, or a bale of cotton, or who makes a wagon, or builds a locomotive, as to pay a subsidy to a man who builds a ship or sails a vessel.

The taxpayers of our country, burdened now almost beyond endurance, are opposed to ship subsidies. They are opposed to this gift bill. They say no private business interests should be aided by direct grants from the Treasury. Ship subsidies are subversive of the eternal principles of justice and equality, contrary to the theory of our free institutions, of doubtful expediency, and at war with the spirit of the Constitution. It is doubtful if the Congress has power to subsidize any trade or any calling or any business on land or sea at the expense of all the taxpayers of our country.

This ship-subsidy proposition is not a new one. It is the same old effort to get something from all the people for somebody for nothing. It has been pending in either one branch or the other of the Congress, in one form or another, for the last ten years. At one time it was the Hanna ship-subsidy bill, and Senator Hanna succeeded in passing it through the Senate, only to have it ignominiously defeated in the House of Representatives. In another Congress it was the Hanna-Payne ship-subsidy bill, and Senator Hanna did his very best to pass it again through the Senate, but failed, and in this Congress we have the old foe with a new face in this substitute for the Gallinger ship-subsidy bill.

This new ship-subsidy bill differs but little in principle from its predecessors, and its fate should be the same. It is essentially a subsidy bill, and by subsidy I mean that the Government is compelled by law to take a part of its money, paid in taxes by all the people for the support of the Government, and give the money to a special interest to aid that interest in its special line of business. This is the scheme in a nutshell, and any policy of this character is inherently wrong in principle, constitutionally indefensible, and can not be justified by any theory of our system of Government. Subsidies are monarchial and not republican; they have no place in a government of the people and by the people.

The Gallinger ship-subsidy bill was cleverly manipulated through the Senate on the 14th day of February a year ago by a vote of 38 to 27. Not a Democratic Senator, I am glad to say, voted for the bill, and to their eternal fame be it said that five Republican Senators voted against it. These Republican Senators, in my opinion, are entitled to the commendation of the people, and I take great pleasure in giving their names. They were: Messrs. BURKETT, DOLLIVER, LA FOLLETTE, SPOONER, and WARNER. The American people should remember these names.

Let me say again what I have frequently said before, that I have always been, and always expect to be, a sincere friend of our shipping industries and an enthusiastic advocate of just and proper and honest legislation that will build up and restore our merchant marine. I believe every true American desires the supremacy of American ships in our over-sea carrying trade, but I believe they prefer it along the lines of tonnage taxes, and not by subsidies. They see no necessity of taking money out of the Treasury and paying it to the present trust owners of ships for doing what they are already doing; and those most conversant with the subject even go so far as to declare that this ship-subsidy scheme, if enacted into law, will not lay a new keel in any American shipyard, or secure an additional ton of freight of our over-sea commerce. Practically every dollar of the fifty million granted will go to the ships now afloat owned by the shipping trust.

Ship subsidies do not build ships—they create ocean-trading monopolies. Ship subsidies will not give workmen employment in American shipyards—the money will simply go into the capacious pockets of the plutocratic beneficiaries of the shipping trust. Every scheme of this kind simply permits respectable corruption and benefits the few at the expense of the many. The principle of ship subsidies is inherently wrong and absolutely indefensible—it is unrepublican, undemocratic, and un-American, and no man who understands the question can justify this steal in the face of the facts. If the Congress should pass

this pilfering ship-subsidy bill, I believe the people will demand its repeal in less than five years, but I hope the wisdom of this House will never permit this iniquitous bill to pass.

Mr. Chairman, I am now, always have been, and always will be a friend of the American merchant marine. I long for the coming of the day when American ships will be on every sea, and our flag gloriously floating on the breeze in every port. I am willing to go as far as any man in this country to legislate for the restoration of the American merchant marine to all its former glory, and to secure for the American people their just share of the over-sea carrying trade of the world. As I have said, I do not agree with the reasons advanced by the advocates of this ship-subsidy bill as to the cause of the decline of our merchant marine and the loss to the United States of our over-sea carrying trade. I know, and every man who has investigated this subject knows, that our loss of deep-sea commerce is due entirely to our own iniquitous legislation and short-sighted policies. If the American Congress would legislate intelligently regarding this subject, we could restore our merchant marine and secure nine-tenths of all our commerce on the high seas, exports and imports, without a ship subsidy, or without taking a single dollar from the pockets of the taxpayers to give subsidies to favored shipowners. This whole subject is a very simple matter when reduced to an intelligent business proposition. We do not need to take a dollar out of the pockets of the taxpayers, or out of the Treasury of the United States, to revive our shipbuilding industries or restore our merchant marine. All we need to do is to legislate intelligently, repeal the iniquitous laws against our deep-sea shipping now on our statute books, put in their place laws similar to the navigation laws that were enacted by the early statesmen of the country—laws that built up our merchant marine in those historic days—laws that placed our flag on the high seas and gave us nine-tenths of our entire over-sea carrying trade. It is a simple matter, and would be done but for the influence of special interests and the tenacious power of monopoly.

Now, sir, I have introduced in several Congresses bills to aid our shipping industries and our merchant marine—not subsidy bills, not bills that rob the many for the benefit of the few, not bills that take money out of the pockets of the taxpayers generally and hand the money over specifically to special interests, but bills along intelligent businesslike lines, and in accordance with the policy of the fathers of the Republic and the framers of our Constitution who understood this subject of over-sea shipping trade and legislated accordingly, and the United States had in those days the finest merchant marine the world had ever seen. If we had continued the policy of the fathers we would to-day be the greatest maritime nation in the world and our flag would be on every sea, and our ships would be carrying the commerce not only of our own country but perhaps half of that of all the other great nations of the world.

I introduced at the beginning of this session of Congress a bill to accomplish this (H. R. 21196), but it has been sleeping the sleep that never awakes in the Committee on Merchant Marine and Fisheries. It will never come out. It will never be reported, simply because it is an honest bill and not a subsidy bill, because it does not rob the many for the benefit of the few, because it will accomplish practically all the people of the country desire—the building up of our merchant marine upon legitimate lines, in a business way, and the restoration of the American flag to the high seas.

My bill is a tonnage-tax bill in favor of American-built ships and against foreign-built ships—and the foreigner pays the tax. In other words, the essential difference between my ship tonnage-tax bill and this ship-subsidy bill is that this subsidy bill compels the American people to give a bonus, or a subsidy—and they are all the same—to the American shipowner, while my bill makes the foreign shipowner pay an additional tonnage tax. This bill of mine is a most comprehensive measure, covering every phase of this question, and in the judgment of those who know most about the matter it would effectually solve the problem without taking a single dollar from the pockets of the taxpayers of our country. I send this bill of mine to the Clerk's desk and ask to have it read in my time. I want the bill to go into the RECORD, so that those interested in this subject can read it and judge for themselves.

The Clerk read as follows:

[H. R. 21196, Fifty-ninth Congress, second session.]

IN THE HOUSE OF REPRESENTATIVES, *December 5, 1906.*

Mr. SULZER introduced the following bill; which was referred to the Committee on the Merchant Marine and Fisheries and ordered to be printed:

A bill to regulate commerce with foreign nations, to make preference for the use of American freighting vessels, to extend the postal service by American steamships, and to promote American trade by sea.

*Be it enacted, etc.,* That the law relating to vessels, to the duties laid upon tonnage, and to the ocean mail service in force when this act shall be approved, be, and the same is hereby, supplemented and amended as follows:

PART 1.—TONNAGE DUTIES.

SECTION 1. That no vessel coming direct from her own country, its colony, or possession with merchandise or passengers in excess of one-fourth of her capacity for the same, to be landed in the United States, shall be charged with an additional or extra tonnage duty, except in cases where the country whence she sailed direct charges an additional or extra tonnage duty to vessels of the United States; and in all such cases, if there be any, the extra duty per ton of the vessel's country so charged shall be added to the extra duty per ton of the United States, and the sum so found shall be the full charge per ton for additional or extra duty to be collected; or unless the country whence such vessel so laden or coming direct shall hold out to its vessels by law the payment of bounty, subsidy, or subvention of some sort in consideration of making voyages like the one in question, in which case three-fourths of the amount of the gratuity as aforesaid shall be charged and collected as countervailing duty in addition to the regular and extra duty otherwise chargeable and to be collected. And every vessel not of the United States that shall arrive in ballast or with merchandise or passengers in a proportion less than one-fourth of her capacity for the same from the country, its colony, or possession, direct as aforesaid, shall pay a duty of 50 cents per ton on the gross admeasurement in addition to the regular duty imposed by law. And if the country whence a vessel may come direct in ballast or with freight or passengers less than one-fourth her capacity, as aforesaid, holds out to its vessels by law the payment of bounty, subsidy, or subvention of some sort in consideration of making voyages like the one in question, then the countervailing duty shall be one-half of the amount of the gratuity payable as aforesaid, to be added to the regular and extra duty and collected, as aforesaid. Surveyors of tonnage shall ascertain and certify to the collector the proportion of carrying capacity occupied by passengers, by freight, and by ballast, respectively, and no vessel so laden shall be discharged except upon acceptance of the report of the surveyor by the master or agent of the vessel.

SEC. 2. That a discriminating tonnage duty, based upon the gross admeasurement in all cases, in addition to the regular duty imposed on vessel tonnage by law, shall be levied and collected from all vessels, not of the United States, that shall arrive with merchandise, passengers, or mails to be landed in the United States from countries, colonies, or possessions where the said cargo, in whole or in part, was laden, to which said vessels do not belong, as follows:

CLAUSE 1. On all vessels not exceeding 4,000 tons gross the additional duty shall be $1.25 per ton until the 1st day of January, 1909, after which date it shall be $1.50 per ton until the 1st day of January, 1911, after which date it shall be $1.75 per ton.

CLAUSE 2. On all vessels between the sizes of 4,000 and 8,000 tons the additional duty shall be $1.50 per ton until the 1st day of January, 1909, after which date it shall be $1.75 per ton until the 1st day of January, 1911, after which date it shall be $2 per ton.

CLAUSE 3. On all vessels between the sizes of 8,000 and 12,000 tons the additional duty shall be $1.75 until the 1st day of January, 1909, after which date it shall be $2 per ton until the 1st day of January, 1911, after which date it shall be $2.50 per ton.

CLAUSE 4. On all vessels between the sizes of 12,000 and 16,000 tons the additional duty shall be $2.25 per ton until the 1st day of January, 1909, after which date it shall be $2.75 per ton until the 1st day of January, 1911, after which date it shall be $3.25 per ton.

CLAUSE 5. On all vessels exceeding the size of 16,000 tons the additional duty shall be $3.50 per ton until the 1st day of January, 1909, after which date it shall be $4 per ton until the 1st day of January, 1911, after which date it shall be $5 per ton. Any vessel violating this section or refusing to pay duties as aforesaid shall not be permitted by the collector to load cargo in a port of the United States.

SEC. 3. That a discriminating tonnage duty, based on the gross admeasurement in all cases, in addition to the regular duty imposed on vessel tonnage by law, shall be levied and collected from all vessels not of the United States that shall arrive in ballast without merchandise, passengers, or mails to be landed in the United States from countries, colonies, or possessions to which said vessels do not belong, as follows:

CLAUSE 1. On all vessels not exceeding 4,000 tons gross the additional duty shall be 75 cents per ton until the 1st day of January, 1909, after which date it shall be $1 per ton until the 1st day of January, 1911, after which date it shall be $1.25 per ton.

CLAUSE 2. On all vessels between the sizes of 4,000 and 8,000 tons the additional duty shall be $1 per ton until the 1st day of January, 1909, after which date it shall be $1.25 per ton until the 1st day of January, 1911, after which date it shall be $1.50 per ton.

CLAUSE 3. On all vessels between the sizes of 8,000 and 12,000 tons the additional duty shall be $1.25 per ton until the 1st day of January, 1909, after which date it shall be $1.50 per ton until the 1st day of January, 1911, after which date it shall be $1.75 per ton.

CLAUSE 4. On all vessels between the sizes of 12,000 and 16,000 tons the additional duty shall be $1.50 per ton until the 1st day of January, 1909, after which date it shall be $1.75 per ton until the 1st day of January, 1911, after which date it shall be $2 per ton.

CLAUSE 5. On all vessels exceeding the size of 16,000 tons the additional duty shall be $2.50 per ton until the 1st day of January, 1909, after which date it shall be $3 per ton until the 1st day of January, 1911, after which date it shall be $4 per ton. Any vessel violating this section or refusing to pay duties as aforesaid shall not be permitted by the collector to load cargo in a port of the United States.

SEC. 4. That a discriminating tonnage duty, based on the gross admeasurement in all cases, in addition to the regular duty imposed on vessel tonnage by law, shall be levied and collected from all vessels not of the United States but of a country that holds out to its vessels by law the payment of bounty, subsidy, or subvention of some sort, in consideration of making voyages like the one in question, that shall arrive in ballast without merchandise, passengers, or mails to be landed in the United States from countries, colonies, or possessions to which said vessels do not belong, as follows:

CLAUSE 1. On all vessels not exceeding 4,000 tons gross the additional duty shall be $1 per ton until the 1st day of January, 1909, after which date it shall be $1.25 per ton until the 1st day of January, 1911, after which date it shall be $1.50 per ton.

CLAUSE 2. On all vessels between the sizes of 4,000 and 8,000 tons the additional duty shall be $1.25 per ton until the 1st day of January, 1909, after which date it shall be $1.50 per ton until the 1st day of January, 1911, after which date it shall be $1.75 per ton.

CLAUSE 3. On all vessels between the sizes of 8,000 and 12,000 tons the additional duty shall be $1.50 per ton until the 1st day of Janu-

ary, 1909, after which date it shall be $1.75 per ton until the 1st day of January, 1911, after which date it shall be $2 per ton.

CLAUSE 4. On all vessels between the sizes of 12,000 and 16,000 tons the additional duty shall be $1.75 per ton until the 1st day of January, 1909, after which date it shall be $2 per ton until the 1st day of January, 1911, after which date it shall be $2.25 per ton.

CLAUSE 5. On all vessels exceeding the size of 16,000 tons the additional duty shall be $2.75 per ton until the 1st day of January, 1909, after which date it shall be $3.50 per ton until the 1st day of January, 1911, after which date it shall be $5 per ton. Any vessel violating this section or refusing to pay duties as aforesaid shall not be permitted by the collector to load cargo in a port of the United States.

SEC. 5. That a discriminating tonnage duty, based on the gross admeasurement, in all cases, in addition to the regular duty imposed on vessel tonnage by law, shall be levied and collected from every vessel not of the United States that shall arrive from a country not its own, whether with or without cargo, passengers, or mails, but under engagement to load cargo, passengers, or mails for another country than its own, or that shall effect such engagement after arrival at a time and while there shall be one or more vessels of American registry in port listed at the custom-house as ready and offering to engage for the same or a similar voyage, as follows:

CLAUSE 1. On all vessels not exceeding 4,000 tons gross the additional duty shall be $2 per ton until the 1st day of January, 1909, after which date it shall be $2.25 per ton until the 1st day of January, 1911, after which date it shall be $2.50 per ton.

CLAUSE 2. On all vessels between the sizes of 4,000 and 8,000 tons the additional duty shall be $2.75 per ton until the 1st day of January, 1909, after which date it shall be $3 per ton until the 1st day of January, 1911, after which date it shall be $3.25 per ton.

CLAUSE 3. On all vessels between the sizes of 8,000 and 12,000 tons the additional duty shall be $3 per ton until the 1st day of January, 1909, after which date it shall be $3.50 per ton until the 1st day of January, 1911, after which date it shall be $4 per ton.

CLAUSE 4. On all vessels between the sizes of 12,000 and 16,000 tons the additional duty shall be $3.25 per ton until the 1st day of January, 1909, after which date it shall $3.75 per ton until the 1st day of January, 1911, after which date it shall be $4.25 per ton.

CLAUSE 5. On all vessels exceeding the size of 16,000 tons the additional duty shall be $3.50 per ton until the 1st day of January, 1909, after which date it shall be $4 per ton until the 1st day of January, 1911, after which date it shall be $5 per ton.

CLAUSE 6. But if, in addition to coming as aforesaid, under engagement or making it after arrival, as above, a foreign vessel shall have held out to her by law the payment of bounty, subsidy, or subvention of some sort in consideration of making voyages like the one in question, then, and in such case, a duty of 25 per cent over and above the rate per ton stated in clauses 1, 2, 3, 4, and 5 of this section shall be levied and collected: *Provided, however*, That if there be no vessels of American register listed at the custom-house at the time of arrival, or of engagement afterwards, as ready and offering to engage for the same or a similar voyage, then tonnage duty shall be payable under section 2 or 3 or 4, according to the circumstances described. Any vessel violating this section or refusing to pay duties as aforesaid shall not be permitted by the collector to load cargo in a port of the United States.

SEC. 6. That all vessels not of the United States running under bounty, subsidy, or subvention of some sort, arriving at the Gulf ports of the United States from the Atlantic ports, or vice versa; or arriving at the Pacific ports of the United States from the Atlantic or Gulf ports, or vice versa; or arriving at any port of the insular possessions of the United States, or vice versa, in ballast and without freight or passengers, seeking cargo, shall pay additional tonnage duties for the privilege thus enjoyed as follows: On arrival from Atlantic to Gulf ports, or vice versa, 30 cents per ton; on arrival from Atlantic or Gulf ports to Pacific ports, or vice versa, $1 per ton; on arrival from any port of the mainland to any port of the insular possessions of the United States, or vice versa, $2 per ton, gross measurement in all cases. No vessel not of the United States shall discharge or take in cargo without a permit from the collector. Any vessel violating this section or refusing to pay duties as aforesaid shall not be permitted by the collector to load cargo in a port of the United States.

SEC. 7. That a duty of 50 cents per ton on the gross admeasurement, in addition to the regular duty imposed on vessel tonnage by law, shall be levied and collected from every vessel that shall enter a port of the United States from a port of her own country, either with or without cargo, passengers, or mails, if she has not come direct, but has called or stopped on the way at a port of a country not her own and there, either in or off the port, has received merchandise, passengers, or mails, and the same shall be landed in the United States, unless said vessel has been built in the United States or is owned by citizens of the United States to the extent of 40 per cent, to be proved to the satisfaction of the collector and the district attorney of any United States court.

SEC. 8. That a tonnage duty, to be termed light tax, of 3 cents per ton on the gross admeasurement of every merchant vessel not of the United States that shall enter a port of the United States, shall be levied and collected, in addition to the duties required by preceding sections, before clearance for sea, except in case such vessel shall clear in ballast, or may have made port in distress, or was built in the United States.

SEC. 9. That a tonnage duty, to be termed race tax, of 4 cents per ton on the gross admeasurement of every merchant vessel not of the United States that shall enter a port of the United States and there discharge merchandise, passengers, or mails shall be levied and collected, in addition to the duties required by preceding sections, if said vessel shall be manned to an extent exceeding 10 per cent of the crew by persons belonging to a different race of men from the owners of said vessel.

SEC. 10. That the regular tonnage tax referred to in preceding sections shall be paid by all vessels in the foreign trade, whether American or foreign, shall be hereafter collected on every entry and computed on the gross admeasurement. The present rates shall be increased from 6 cents to 10 cents and from 3 cents to 5 cents per ton, respectively. American steamers carrying mails shall pay tonnage tax but once a year.

PART 2.—EXPORT PREMIUMS.

SEC. 11. That all collections of tonnage duties and charges of every sort against vessels of every kind, whether regular or additional duties, light, race, and immigrant tax, entrance and clearance fees, and permits provided by this and former acts to be levied, collected, and paid at the custom-house, and all fines, penalties, and forfeitures paid into the courts from violations of the navigation and revenue laws of the United States, this act included, shall, after the passage of this act, be set apart in the Treasury as a special fund from which to pay, first, for the support of marine hospitals for American seamen employed in the foreign trade, and second, for the payment of premiums to exporters of merchandise for giving preference in the employment of vessels to those of the United States not in fact owned by themselves. No part of this fund shall ever be covered into the General Treasury, but be carried over.

SEC. 12. That on and after fifteen months from the passage of this act there shall be paid, out of the special export fund in the Treasury provided for by section 11 of this act, to the bona fide owners and exporters of merchandise the growth, production, and manufacture of the United States, to foreign countries not adjoining the United States, in vessels of the United States registered pursuant to law and not owned in fact by themselves, as follows: A premium of one-fourth of 1 per cent on the cash valuation of each shipment direct to a port not less than 65 miles from the tidal or national boundary of the mainland of the United States; and a premium of one-half of 1 per cent on the cash valuation of each shipment direct to a port not less than 400 miles from the port of departure in the United States; and a premium of three-fourths of 1 per cent on the cash valuation of each shipment direct to a port not less than 1,000 miles from the port of departure in the United States; and a premium of 1 per cent on the cash valuation of each shipment direct to a port not less than 2,000 miles from the port of departure in the United States; and a premium of 1¼ per cent on the cash valuation of each shipment direct to a port not less than 3,000 miles from the port of departure in the United States; and a premium of 1½ per cent on the cash valuation of each shipment direct to a port not less than 4,000 miles from the port of departure in the United States; and a premium of 1¾ per cent on the cash valuation of each shipment direct to a port not less than 5,000 miles from the port of departure in the United States; and a premium of 2 per cent on the cash valuation of each shipment direct to a port not less than 6,000 miles and upward from the port of departure in the United States. These premiums to an exporter shall be payable to his order upon report of the clearance of the vessel, with a statement of the collector of the port fixing the value of the shipment, which must be sworn to by an appraiser for the United States, within ten days, according to such regulations as the Secretary of the Treasury shall prescribe, distances between ports to be determined by the Hydrographic Office of the Navy Department and stated in sea miles.

PART 3.—MAIL CARRIAGE.

SEC. 13. That the postal act approved March 3, 1891, be, and it is hereby, amended to provide and to read as follows:

CLAUSE 1. That the Postmaster-General shall as often as once in each year advertise for informal proposals for the carriage of mails by sea in American vessels between such ports of our own and other countries as to exporters may seem advantageous. The advertisements shall be inserted four times weekly in a paper printed in Boston, New York, Philadelphia, Baltimore, New Orleans, Galveston, Norfolk, Charleston, Savannah, Mobile, San Francisco, Portland, and Seattle, describing the service as that of mail and naval vessels adapted to promote the postal, commercial, and naval interests of the United States and to subserve those of their owners as well. Proposers will state the size and speed of vessels, number of trips yearly, remuneration required, time when service could be begun, and such other particulars as may seem useful for the Government to consider.

CLAUSE 2. That within one month after receipt of informal proposals the Secretary of the Navy and the Postmaster-General shall together consider their contents, the wants of the Navy and the needs of the postal service, and fix upon a schedule of requirements that will satisfy both interests. The Secretary of the Navy will control the plans for the vessels, and the Postmaster-General will decide upon the postal programme, and the two together shall advertise formally to let contracts for the running of the vessels required. Such advertisements shall be inserted in the same papers that called for informal proposals four times weekly, describing the route, the character of the vessels, the size and speed, the number of trips yearly, the times of sailing, and the time when the service shall begin. These requirements shall not be such that bidders can not be found. The Navy Department shall pay the cost of formal advertising. The letting of such contracts shall be the same as prescribed by law for the letting of inland mail contracts, so far as shall be applicable to vessels. Every contract must have the approval of the President, and none shall exceed the limit of thirty years; but the President may require improved service every ten years.

CLAUSE 3. That the vessels employed under any contract made under this act shall constitute a line, which shall have a sailing day or days, as often as three times a week, but no line shall monopolize the carriage of mails to any foreign port. Another line may have a contract to run to the same port on different days of the same week, and from the same port.

CLAUSE 4. That the owners of lines contracting for mail carriage may be persons or corporations, but if the latter, the contract must be with the individuals of the board of directors, who must be citizens of the United States and at all times prepared to swear that not more than 40 per cent of the capital stock of the corporation is held by aliens, and that a citizen manages the line, under penalty of forfeiture of the contract, which, in such case, the President of the United States is hereby authorized to declare. No line shall combine or consolidate with another, under the same penalty.

CLAUSE 5. That the vessels employed under this act shall be commanded by citizens, and at least two officers and two engineers of each vessel shall also be citizens of the United States, to wit: During the first year, one-eighth thereof; during the next two years, one-fifth; during the fourth and fifth years, one-fourth; during the sixth and seventh years, three-tenths; during the remainder of contract time, one-third thereof. But no mail carrier shall be delayed in sailing to obtain a crew in above proportion. It may be stipulated that mails may be brought from abroad, the foreign country paying for the service; also that passengers and baggage and freight may be carried both ways. After July 1, 1909, the mails shall be sent foreign by vessels of the United States and no others, without express consent of Congress; and in cases of need, when private enterprise fails to undertake or carry on the mail service at reasonable or lawful rates of remuneration, the Secretary of the Navy shall have authority, and it shall be his duty, to furnish suitable vessels of the Navy in which to send mails foreign or bring them home, until the further order of Congress.

CLAUSE 6. That all vessels in the postal service and hereafter built for it shall be prepared to receive arms for immediate use as cruisers, scouts, or transports in time of war; and in future their plans and specifications shall be agreed upon by and between the owners and the Secretary of the Navy, the strength and stability to be sufficient to

carry armament required in naval service, and the materials of hull and machinery to be such as will command the highest classification given by American inspection of vessels. And all such vessels hereafter built shall be constructed under the inspection of a naval officer detailed by the Secretary of the Navy, to whom he will report in writing the progress made monthly, whether or not the contract is being well performed, and when the trial trip may be made; and no vessel not approved by the Secretary as fulfilling the contract, as to hull and machinery, shall be accepted for the service.

CLAUSE 7. That the compensation to be agreed upon and paid for such service as may be contracted for under this act shall be reasonable and as low as responsible bidders will perform the same, having regard to the encouragement to vessels provided by this act, to the commercial circumstances in each case, and to the rate of compensation for similar service paid by other countries. Where a bid may be deemed too high the programme may be modified or the route readvertised, payment for services to be made at the end of each round voyage. If the contract shall fail to be fulfilled for six months, the President may declare it forfeited, and thereupon the route shall be readvertised and let to another bidder, but on no account shall the service be abandoned to other countries. Readvertising shall be done in a paper printed in Washington, D. C.

CLAUSE 8. That upon each mail vessel the United States shall have transported, free of charge, one messenger, whose duty shall be to receive, sort, take in charge, and deliver the mails to and from the United States, and who shall be provided with suitable room for himself and for the mails.

CLAUSE 9. That officers of the Navy may volunteer for service on mail vessels, and when accepted by the contractors may be assigned to such duty by the Secretary of the Navy whenever in his opinion such assignment can be made without harm to the service, and while in said employment they shall receive furlough pay from the Government and such other compensation from the contractors as may be agreed upon: *Provided*, That they shall be required to perform only such duties as pertain to the service.

CLAUSE 10. That said vessels shall carry as cadets one American boy under 21 years of age for each 2,000 tons gross register, who shall be taught the duties of the service as seamen, rank as petty officers, and receive reasonable remuneration.

CLAUSE 11. That said vessels may be taken and used by the Government as cruisers, scouts, or transports at any time, on payment to the owners of their fair, actual value at the time of the taking, either for service by the voyage, by the month, or year, or may be purchased outright, and if there shall be a disagreement as to the value, then the same shall be settled by two appraisers, one appointed by each party, they selecting the third, who shall act in case the two disagree.

CLAUSE 12. That all vessels not of the United States, coming with passengers from a country to which said vessels do not belong, shall pay to the collector of the port an immigrant tax of $20 for each and every passenger brought from such country who shall be landed with his or her effects.

PART 4.—GENERAL PROVISIONS.

SEC. 14. That marine underwriters or insurance companies belonging abroad, in person or through agencies in the ports of the United States, may issue policies, in conformity with State regulations, on shipments of goods, wares, and merchandise to be exported, but any discrimination made by them or their agents in the clauses of policies, in the premium rates, or affected through inspection of hulls or otherwise, which shall tend to favor the employment of foreign vessels, or tend to disfavor the engagement of vessels of the United States, shall be deemed a misdemeanor, *punishable* by a fine as a penalty in a district court of the United States. Said fine for the first offense shall not exceed five thousand nor be less than three thousand dollars; for a second offense said fine shall be not less than $10,000; and for the third offense and each one afterwards said fine shall be not less than fifteen thousand nor more than twenty-five thousand dollars, and suits shall be prosecuted by the attorney of the court aforesaid for each and every violation of this section that may be brought to his notice. In any such suit it shall be no defense that the orders or directions of any person, or the rules and regulations of any association of underwriters, shipowners, merchants, marine surveyors, or their agents, not citizens of the United States, or that the inspection or classification of any vessel by any person, society, or authority whatsoever, can be claimed to justify the discrimination that may have been the subject of complaint. A refusal to insure goods, wares, and merchandise under this act, to be carried by American vessels, shall forfeit the privilege of doing business in American ports, or make the parties fineable as above, to be decided by the court.

SEC. 15. That in a time of peace it shall not be lawful for any officer of the Government to receive tenders of service to be performed by vessels not of the United States, and in all contracts for the performance of public work it must be provided that transportation shall be performed by vessels of the United States. And the transportation of passengers, mails, goods, wares, and merchandise between the United States, its Territories, and possessions, and the ports and places of the Panama Canal Zone is hereby declared to be reserved for vessels of the United States under the coastwise laws.

SEC. 16. That in a time of war it shall not be lawful for vessels not of the United States to import or land anywhere in the United States, its Territories or possessions, any goods, wares, or merchandise the growth, production, or manufacture of a country not at peace with the United States. And all goods, wares, and merchandise imported by a vessel, not of the United States, admitted to storage in bonded warehouse is hereby limited to a period of ten days, within which time the lawful duties and charges must be paid, whether entered for consumption or reexportation. In cases where minimum or reciprocity duties are imposed by law on goods, wares, and merchandise imported, there shall be levied, collected, and paid full rates of duty, notwithstanding any convention, if the same shall have been brought in by a vessel not of the United States, or not of the reciprocating country from which such goods, wares, or merchandise were exported; or if the same, not being the growth, production, or manufacture, of a country contiguous to the United States, shall have been brought across the line from such country.

SEC. 17. That on and after the passage of this act it shall be lawful for the space of thirty months, but no longer, for any bona fide citizen, citizens, or domestic corporation engaged in, or intending immediately to engage in the carriage of merchandise, mails, or passengers in the foreign trade of the United States, to import and enter at the customhouse, for his or their own use, and that of no other person or persons in said trade, and not to be held for sale or sold to others, and not to be employed in the domestic trade more than two months in the year, any vessel or vessels suitable therefor, of size not less than 2,000 tons gross, and of age not more than five years, and have the same duly registered as a vessel of the United States, but upon the following conditions, nevertheless, to wit, that all vessels imported in the first six months of the term of thirty months, as aforesaid, shall pay a duty of $4 per gross ton; those imported in the second six months shall pay a duty of $5 per gross ton; those imported in the third six months shall pay a duty of $6 per gross ton; those imported in the fourth six months shall pay a duty of $7 per gross ton; those imported in the fifth six months shall pay a duty of $8 per gross ton measurement. The Treasury Department may allow credit on duties for imported tonnage to the extent of six and twelve months' time on secured notes of owners with interest at 2 per cent per annum. And it shall be unlawful upon penalty, as for a misdemeanor, punishable by fine of not exceeding $1,000 in a district court of the United States, for the master, owner, or agent of any foreign-built freighting vessel or yacht not duly registered, enrolled, or licensed to fly the flag of the Union from or abaft of the aftermost mast, spar, or pole, except as a sign of distress.

SEC. 18. That the making or offering to make exclusive contracts for the carriage of exports of goods, wares, or merchandise to foreign countries, conditioned partly on the future shipment of same by no other vessel or line of vessels, and the payment of rebates of freightage in consideration thereof, is hereby declared a misdemeanor, punishable by fine in a district court of the United States of not less than one thousand nor more than three thousand dollars on each conviction of the owner, agent, or master of any such offending line or vessel, and the vessel or vessels of such owner, agent, or master so convicted shall not thereafter be permitted to load cargo in the United States if under foreign registry. Where it may become suspected by, or known to, the collector of any port that such contracts are in force and that rebates of freightage are offered, promised, or paid in an endeavor to engross the carriage of export goods, wares, or merchandise, he shall forthwith place the facts before the district attorney, who shall bring suit to break up the practice. And for the prevention of frauds under this act in indirect voyaging, foreign vessels not built in the country of registry shall undergo a probation of three years before being adjudged by the collector as belonging in good faith to the country of registration, unless built in the United States.

SEC. 19. That after the passage of this act it shall not be lawful for any officer of the Government to issue a register, enrollment, or license for any vessel built abroad, except such as have been captured in war and condemned as prize; such as have been forfeited for a violation of the laws and bought at public sale, or may have belonged to a country that has come under the Government of the United States or been admitted by an act of Congress.

SEC. 20. That the regular duties of tonnage, computed on the gross admeasurement, and the usual passenger tax shall be paid alike by American and foreign vessels on each and every arrival, in foreign trade, when entry of vessel is made. Immigrant tax shall be paid when permit is given for the landing of passengers from vessels, not of the United States, brought from countries to which said vessels do not belong. All additional tonnage duties and the light and race tax shall be paid before lading permit is issued, but if loading be delayed, then, at latest, at the end of two months from date of entrance. American vessels carrying crews of which one-eighth the number are citizens or owe allegiance to the United States shall have rebate of tonnage tax to the extent of 20 per cent; if one-fourth of the crew be citizens, the rebate shall be 30 per cent; if three-eighths of the crew be citizens, the rebate shall be 40 per cent; if one-half of the crew be citizens, the rebate shall be 50 per cent; if five-eighths of the crew be citizens, the rebate shall be 75 per cent; and if three-fourths of the crew be citizens the rebate shall be 100 per cent. The United States shipping commissioner shall ascertain and certify to the collector the proportion of citizens in each crew where rebate of tax may be demanded. Regular apprentices as seamen or engineers, if citizens, shall count as men in computing rebate of tax. In trade to and from tropical countries, where it may not be practicable to find any but natives of such regions to man American vessels, permits may be issued, on applications under oath of the owner or agent, by the Secretary of Commerce and Labor for one year, or while necessary, to carry a crew such as it may be practicable to engage in any given place. In all cases where vessels may be fined for infractions of law, in accordance with the statutes, it shall be unlawful for the Secretary of any Department to remit any portion thereof without an order of court duly recorded; and it shall also be unlawful for the Commissioner of Navigation to order refunds of tonnage taxes that have been paid to a collector without a trial and judgment of the case.

SEC. 21. That sections 11, 13, 14, 15, 17, 18, 19, and 21 of this act shall take effect upon its passage, and sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 16, and 20 in one year and thirty days thereafter, and all acts or provision of law in conflict herewith are hereby repealed; also any and all articles or clauses in existing maritime reciprocity conventions or treaties, whose time fixed has expired, that are in contravention herewith, are hereby annulled and abrogated, in conformity with the stipulations and equities of said agreements and the rights of the United States; and the formal notice of the Congress of the United States is hereby given all countries concerned that, in one year from the approval of this act by the President, all conventions or treaty stipulations for the suspension of commerce regulations under the aforesaid agreements, so far as they are terminable, are receded from on the part of the United States, and all enactments therefor are by this act repealed. An agreement, as above, not yet terminable, may be observed until its term expires, but not longer.

Mr. SULZER. Now, Mr. Chairman, that bill speaks for itself, and I have had it read at the Clerk's desk for the purpose of getting it again in the RECORD, so that the people who are interested in this great shipping question can read the bill and judge accordingly. I shall offer it, if I can get a chance, as an amendment to the pending bill. I place my tonnage-tax bill by the side of this ship-subsidy bill and submit the merits of the two measures to the impartial judgment of the taxpayers of the country, confident that the general principles of my bill will be accepted by them in preference to those of the ship-subsidy bill. My bill is a practicable, honest, businesslike measure, and, in the opinion of those most competent to testify regarding this matter, its enactment into law will go far to solve the shipping problem, restore our merchant marine, place our flag on the high seas, and give us at least our share of the world's ocean-going commerce. There is a difference as wide

as the poles between the principle of my bill and the principle of this subsidy bill. My bill is a tonnage-tax bill, and the foreigner pays the tax. This being the case, foreign shipowners would have to charge higher freight rates than American shipowners, with the consequence that the American shipowners would get all the advantage in ocean carrying trade. This would create a demand for American-built ships, and the demand would revive our languishing shipbuilding industries, and the revival of those industries would give employment to thousands and thousands of workmen on both the Atlantic and Pacific coasts. Of course no foreign shipowner will commend my bill. No subsidy grabber advocates it. No shipowners' trust favors it. No marine monopoly likes it. Naturally every foreign shipowner is absolutely opposed to it, because every foreign shipowner knows that if a bill like this should become a law in this country, in less than ten years the United States would be the mistress of the seas and do the major part of the deep-sea carrying trade of the world.

I do not expect foreign shipowners to favor my bill, but I know when the question is understood by the taxpayers of our country every patriotic American will be in favor of my bill in preference to any ship-subsidy bill which takes money out of the pockets of the people of this country and pays it over in the nature of a gratuity to a special business interest. There is no graft in my bill; no private gain at public expense; it is just a plain, simple, practical, business, maritime measure for a tonnage tax on the gross admeasurement of foreign ships.

Now, sir, I know we all realize that there is a strong feeling throughout the country in favor of the rehabilitation of our merchant marine. This is a patriotic sentiment, eminently proper, and should be encouraged by every true American. It is unfortunate, however, that a great many well-meaning citizens, who desire to see our ocean carrying trade restored, have little knowledge of the causes which drove our shipping from the high seas and placed us at the bottom of the list of the world's maritime powers; and consequently the noisy subsidy boomers, knowing they are sure to get all the benefits, are having everything down here pretty much their own way.

Mr. Chairman, I see my time is nearly consumed and I must conclude; and in doing so I want to say that my bill is not a makeshift. It is not a temporary expedient. It is a permanent remedy, and once adopted and upon the statute books it would continue in favor for years and years to come, until the American people possessed the greatest merchant marine in all the world; and I therefore say in conclusion that from a careful study of the whole subject-matter I sincerely believe that the adoption of my bill will speedily restore our ocean carrying trade, revive our shipbuilding industries, give employment in our shipyards to thousands and thousands of men in all parts of the country, bring about an era of prosperity such as we have never known before in our shipping trade and deep-sea commerce, place our flag on ships on every ocean and in every port, and make the American sailor what he was in the historic days of the Republic—the master of the seas, and the arbiter of the ocean highways of the world. [Loud applause.]

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. SULZER. Mr. Chairman, I ask unanimous consent to print in the RECORD some data in connection with the matter under discussion.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The data referred to is as follows:

[From the New York Press, February 21, 1907.]

SUBSIDY GRAFTERS READY TO RAID THE TREASURY FOR THE POCKETS OF THE ROCKEFELLER, HARRIMAN, AND HILL TRUSTS.

The ship-subsidy grafters "packed" the Committee on Merchant Marine of the House of Representatives to get their bill reported out—that is to say, since a majority of the members were opposed to the graft, the Speaker changed the committee, and it is significant that those chiefly relied on to do the work of the subsidy grafters are members whose terms expire in a few days, so that they can not be punished by their constituents for the raid they are making on the Treasury.

Having "packed" the committee, and thus engineered the situation to have the bill reported out, the Speaker has now arranged a plan to have it passed by dark-lantern methods at night sessions, when it is expected that opposing Representatives will be absent, but when pains will be taken to have every legislative agent of the ship-subsidy grafters in his seat to vote public money into the pockets of the shipping trusts.

Before this dark-lantern work is carried out the people of the United States should understand exactly what the present subsidy bill is, so that when the voters pass on this affair at the polls next year they can defeat the Members who are responsible for this mockery of "aid to American shipping" and this outrage upon the public of the United States.

The subsidy-graft bill is not a measure to revive or expand our merchant marine. It is a jimmy to break into the Treasury and a conspiracy to create an absolute monopoly of what over-sea shipping floats the Stars and Stripes. It does not propose to do anything at all for the general shipbuilder or owner who is anxious to have a merchant marine. It does not make provisions that will establish new shipbuilding industries and stimulate old ones. It makes provision for paying out of the Treasury an annual revenue to the existing shipping trusts of the Rockefellers, the Harrimans, and the Hills. It proposes to make it impossible for other American shipowners to compete with those monopolies on the Atlantic and Pacific sides of the country or to have any existence on the high seas.

The subsidy-graft bill is in the private interest of the Rockefeller, Harriman, and Hill shipping trusts and against the welfare of the American people. There is absolutely nothing else to the measure.

A few days ago Representative SULZER made a speech in the House showing how, if they really wanted to do something for American shipping and the American shipbuilding industry, the Members who are behind the subsidy graft could do it. Assuming the impracticability at present of the old discriminating tariff duty which favored American bottoms and built up our merchant marine until it was the most prosperous and the proudest on the waters of the globe, Mr. SULZER explained the possibilities of a policy embodied in a bill of his which sleeps in the House Committee on the Merchant Marine, the body "packed" to accomplish the purpose of the grafters. This measure, briefly described, provides for a graduated tonnage tax on foreign bottoms bringing cargoes into and carrying them from our ports. Not only would there be this extra tonnage tax for the foreign vessels to pay, but there would be an additional light tax, together with a race tax covering the nationalities of the crews of the foreign vessels. There would be further discriminations in the form of fees to be paid by foreign vessels bringing in passengers from other countries than those where the ships were owned, etc.

Such provisions would increase the cost of the operation of foreign vessels engaged in the American trade. This would make for an equalization of expenses as between the American and foreign vessels. It would enable American bottoms to compete with them. A further assistance to our shipping would be rendered in the clause providing that all the tonnage taxes, light fees, race fees, etc., should go into a fund to be distributed among American exporters using American bottoms for their shipments. This would divert American cargoes into American bottoms. It would create and foster American shipping by giving it business. It would establish and increase the shipbuilding industry by enlarging and making profitable our shipping.

This would enable any capital to go into American shipping. The field would be open to all. Anybody could build ships and operate them on even terms, competing for the cargoes thus offered to our own shipping. But this is not the kind of thing the subsidy grafters want. They don't want an equal chance for all capital; they don't want everybody in the country to have a free opening to this ocean traffic. They want only the shipping trusts of the Rockefellers, the Harrimans, and the Hills to be permitted to engage in the ocean carrying trade. So they provide specific annual payments to their particular lines. Not another thing. Nothing for general shipping; nothing for the American people; nothing for anybody but the grafters who are planning to loot the Treasury.

Their proposition amounts to exactly this: There ought to be a bounty—a subsidy—out of the United States Treasury for raising potatoes—but not to John Smith for raising potatoes; not to James Brown for raising potatoes; not to William Jones for raising potatoes. A subsidy for raising potatoes, but only to Rockefeller, Harriman, and Hill.

How do the American people like that sort of plundering of the Treasury for rich and powerful trusts which can command legislation for the benefit of their private pockets? And what are they going to do at the polls, in the Congressional elections next year, to Members of the House of Representatives who do this jimmy and dark-lantern work for the ship-subsidy grafters?

---

[From the Washington Post, Wednesday, February 20, 1907.]

FIGHTING SHIP SUBSIDY—NATIONAL GRANGE MASTER IS AT ODDS WITH GROSVENOR—FAILED TO PRINT ANSWER—FORMER GOVERNOR BACHELDER, OF NEW HAMPSHIRE, REPRESENTING 900,000 FARMERS, DECLARES AGAINST PLAN TO SUBSIDIZE MERCHANT MARINE—CHAIRMAN OF COMMITTEE SHOULD HAVE HAD LETTER PRINTED.

The National Grange, composed of 900,000 farmers throughout the United States, is disappointed because Chairman GROSVENOR, of the House Committee on Merchant Marine and Fisheries, did not print, with other data, its reply to a letter from him in opposition to ship-subsidy legislation. The correspondence may be read on the floor of the House.

Former Governor Bachelder, of New Hampshire, who is master of the National Grange, sent a letter to President Roosevelt, in which he said:

"I regret the duty which devolves upon me to advise you, on behalf of the great national organization of farmers which I have the honor to represent, that the farmers of the nation are for the first time unitedly and steadfastly opposed to the legislative recommendations you have made to Congress in your recent message favoring ship subsidies. We protest most urgently against any future payments of the public funds to any private firm or corporation for any purpose whatsoever without safeguarding such payments by a public accounting of the business of the firm or corporation to whom such payment is made.

GENERAL GROSVENOR REPLIED.

The President turned this letter over to General GROSVENOR, who replied in a letter, in which he said that the bill encouraged American farmers, and that a great majority of the members of the National Grange approved it.

"You would make a waste place of our last shipyard and drive our last ship owners and seamen and shipyard mechanics to choose between the poorhouse and foreign lands," said he.

This correspondence was published in a public document compiled by the general. The former governor replied at length; but, according to the legislative committee of the Grange, General GROSVENOR declined to print the reply. As a result, the members of the Grange are sending floods of letters to their respective Representatives in the House, urging them not to vote for the ship-subsidy bill.

Governor Bachelder, in his reply, impresses upon General GROSVENOR that in his opposition to the subsidy bill he is backed by 900,000 farmers, who have in their conventions decided against the proposition by overwhelming majorities. Continuing, he says:

"I wish to take exception to your assumption that the proposal to pay out of the United States Treasury subsidies to steamship companies, over and above a fair price for carrying mails, has anything in common with the protection of American farmers or American workingmen against foreign competition.

PURPOSE OF PROTECTION.

"So far as I know, not even the most extreme protectionist has ever claimed that it would be right, even if it were possible, to protect the products of American farmers or labor by giving a subsidy to the portion of those products sold in foreign markets. Protection is intended for the home market only, and it is an application of the protective policy hitherto undreamed of that our Government should put its hands into the Treasury to aid our industries in competing in neutral markets.

"I must also take exception to your assumption that I wish to make a waste place of our shipyards and drive our shipowners and seamen into the poorhouse. I favor nothing of the kind. So far as our domestic and coastwise trade is concerned our shipowners and sailors have an absolute monopoly of the business, and it is only in connection with international trade that the advocates of ship subsidies claim that our shipbuilding industries are languishing.

"You are generous enough to assume that in opposing subsidy legislation, I am doing so through a misapprehension of the facts.

PLENTY OF TRAMP STEAMERS.

"You will pardon me if I suggest that this is a matter to which I have given sufficient attention to be in a position to know that there is not the slightest foundation for your statement that foreign steamship companies are ousting our farmers from the markets in Brazil and elsewhere. You refer to evidence to this effect submitted to your committee. I have heard of this evidence, but could never find that it was more than mere rumor or groundless allegation, which had no foundation in fact.

"Your statement that because foreign nations had ships and we have none Australian farmers are enabled to drive us out of the flour market of the Orient is a fair sample of the argument used in support of subsidies. If you will consult any of the large flour milling concerns in Minneapolis or other parts of this country, they will tell you that there are always more tramp steamers seeking freights for any part of the world than are needed.

"I can not agree with you that the practically unanimous attitude of the farmers against subsidies is due to ignorance of the facts.

"FARMERS KNOW SITUATION.

"The farmers have been reading about this subject and discussing it at their local State and national grange meetings for the past ten or twelve years, and they are fully convinced that it is contrary to their best interests. They do not see how it would benefit them for the foreign consumer of their wheat or meat products to have his freight carried at possibly slightly lower rates.

"Any benefit which might result from increased competition in the ocean carrying trade would inevitably redound to the foreign consumers, and not to the American farmer.

"I would call your attention to the fact that there are many hundreds of business and commercial organizations in this country, and, so far as I can learn, comparatively few are in favor of the subsidy bill.

"I regret as much as you do the fact that our shipping industry, in so far as the foreign trade is concerned, has fallen off so largely since 1861. I am sincerely desirous of seeing this industry restored to its former great proportion of the world's carrying trade, but I can not see how the taxpayers of the country can justly be called upon to pay money out of their pockets toward this particular industry any more than they should to pay subsidies to a local express or freight service in the farming sections of the country to enable carriers to make larger profits than they do now."

---

[From the Philadelphia Inquirer, February 27, 1907.]

A STEP TOWARD SHIP SUBSIDIES.

The House at Washington has agreed to settle the question of ship subsidy at 3 o'clock on Friday afternoon. At that time the miserable little substitute for the Senate bill will be brought to a final vote.

It is a mere makeshift. The Senate bill was bad enough. It was all right as far as it went, but it did not go very far. The House has presumed to take liberties with it, and the result is a measure of trifling value when the whole vast subject of restoring the American flag of commerce to the ocean is taken into consideration.

---

[From the Washington Post, February 18, 1907.]

SUBSIDY AND FOREIGN TRADE.

Mr. Secretary Shaw continues to insist on hothouse political economy, and demands the creation of a merchant marine by subsidy that is to go forth and fetch to our shores all the foreign trade we can manage with both hands. Here is one of his declarations, his latest in New York Friday night: "Countries which consume imports equal in value to our aggregate manufactured products, which in turn equal the manufactured products of any three other countries on the map, have scarcely heard of the United States as a commercial country. Let our flag be exhibited in their waters and our wares in their ports, and the danger of industrial stagnation will be materially minimized."

Suppose we show our flag in their waters and dump our goods in their marts? Shall we return in ballast? Certainly we will if we preserve the home market for our own manufactures. We can not eat our cake and have it. If we send our goods abroad, we must exchange them for other goods. That is prohibited in the Dingley law, and until there is tariff revision it is folly to talk about a merchant marine for the foreign trade.

We hear a heap about the Argentine Republic, down yonder, and its stupendous potentialities, and it is proposed to subsidize ships to go down there and fetch her trade home with them. Argentina produces what we produce—meat and bread. Why should we go thousands of miles after grain, beef, and mutton when we have more grain, beef, and mutton at home than we can eat? As well for Alabama to send her cotton to Mississippi; as well for Illinois to send her corn to Iowa, when Mississippi has more cotton and Iowa more corn than they know what to do with.

And yet in every "subvention" speech there is a wilderness of statistics to prove we are on the road to the poorhouse and will surely land there if our shipmasters are not hired at public expense to capture this trade for us that we would not know what to do with if we had it. Argentina is our rival; so is Australia; so is New Zealand. We do get some beef hides from South America, brought in foreign bottoms, and the ship that fetches them is fined 15 per cent at the custom-house on their value before it is permitted to land them. That is for the beef trust.

The Omaha Bee is a stanch Republican paper, as good a protectionist as Secretary Shaw, or Speaker CANNON, or General GROSVENOR, or Mr. DALZELL and the Bee warns the interests that are clamorous for this subsidy that big foreign trade and highly protected domestic trade are inconsistent and can not long exist together. That ought to be as plain as the sun at noonday. Foreign trade means exchange of products, and it means nothing else. Before it can prosper the duties on such products in the tariff schedules must be enormously decreased.

So it is reduced to this: We must let the foreign trade slide or abandon tariff for protection only, with incidental revenue.

We once had that foreign trade—fruit of the Robert J. Walker tariff of 1846. We will get it again when we return to the Walker idea, and not until then.

Our subventionists, we fear, are a little averse to that.

---

[From the Journal of Commerce and Commercial Bulletin, February 25, 1907.]

GOVERNMENT SERVICE FOR SUBSIDY GRAFTERS.

Has the Government Printing Office and the consular service been put to use to help the ship-subsidy grafters in their effort to reach into the public Treasury for profits for a new combination of capital? A pamphlet of 44 pages has been issued from the Government Printing Office with the label "Memoranda of the Committee on the Merchant Marine and Fisheries on the substitute for S. 529." It is not an official document of the committee and has never been submitted to the House or to any public authority and "ordered printed." By whom it was prepared does not appear, but it is made up of a farrago of statements, quotations, and references, after the exact manner of the "campaign documents" of the Merchant Marine League in support of the subsidy policy. It is not sent out in the ordinary way as an official document for the public, but is distributed privately for the evident purpose of affecting public opinion and securing support for the pending subsidy bill. Is this a legitimate use of the Government Printing Office and the resources provided for the service of the public?

Is it a mere coincidence that in the single number of the Daily Consular and Trade Reports for February 21 there appear simultaneously in front of everything else quotations from reports from consuls at leading South American ports complaining of a lack of shipping facilities, a lack that notoriously does not exist unless "under the American flag" is to be implied, and suggesting the need of such facilities to help American trade to those ports? It certainly is not a coincidence that much more is implied in the editorial sentences introducing these quotations than can be found in the quotations themselves. For instance, on the front page the editor in Washington starts off with the statement: "Consul-General Snyder calls attention to the fact that there is practically no direct trade communication between the United States and Buenos Ayres, all American goods imported being sent by way of England." This statement is so notoriously contrary to fact that one naturally scrutinizes the passage quoted from Mr. Snyder's report for the basis of it. No ground for it is to be found there, though Mr. Snyder does say, being thereto prompted perhaps from Washington, that "the chief improvement in the matter of shipping facilities between the United States and Buenos Ayres should be the establishment of a fast steamship line between the two countries." The fact is that there is regular and frequent communication with all the river Plata ports, ample for all the trade requiring them.

Consul-General Anderson is said to furnish "the following in regard to lack of United States tonnage in trade with Brazil." The "following" in this case conforms better than the other with the introductory line, but is almost equally far from the facts. It represents that the Brazilian trade is dependent upon the triangular route via Europe and says that much of the extra tonnage employed late last year in bringing coffee here from Rio Janeiro "has been unable to meet the present demand in American ports for tonnage for South America, particularly for Brazil." Evidence of this inability to meet the demand is not found in the American ports themselves.

Skipping over to Chile, the Washington editor of this consular information finds that Consul Winslow, at Valparaiso, reports that "the shipping facilities between the United States and Chile are not what they should be in order to develop business between the two Republics." What this consul says is that the two lines from New York "under the British flag" charge a rate that is "fair" and render a service that is "very satisfactory, considering everything," but he is prompted to add, whether by suggestion from superior authority does not appear, that "there should be one or two lines for this coast sailing under the American flag," and that "something should be done to encourage American shipping if the United States is to get the trade it should have in this part of South America." He conceals the fact that the lines "under the British flag" are owned and managed by Americans and anxious to do all they can to develop the trade, and would gladly carry the American flag if the benevolent Government did not make it impossible.

The lively editor jumps back to Montevideo and remarks that Consul O'Hara reports that "American trade communication with Uruguay appears to be limited and insufficient." Mr. O'Hara says nothing to imply that, unless "American trade communication" means communication by American vessels, though he does say, under the prompting that seems to have gone along the South American coast with remarkable simultaneousness, that "one of the first steps to be taken in improving the commercial relations between the United States and Uruguay would be to establish a first-class steamship line between the two countries."

It is evident on the face of these publications that the Government service and the public money have been used directly in these cases, not to furnish facts and information for the public and enable it to form a fair judgment for itself, not even to serve a partisan purpose for the Administration, which would be sufficiently reprehensible, but to promote the efforts of that clique of capitalists and promoters who are hunting for subsidies from the Public Treasury to give them a promise of profit in their schemes. It is a disreputable business, for which it is to be hoped the head of the Administration or any Department thereof is not responsible, and which ought to be discontinued and reprimanded.

---

[From the Mitchell (S. Dak.) Gazette, February 21, 1907.]

CONSERVATIVE LEGALIZED GRAFT.

The ship subsidy steal bill, offered at the last session of Congress by Senator GALLINGER, has been knocked out, and the new bill recommended by President Roosevelt under a little different name is very sure not to become a law. The Congressmen have heard from the people at home, and with the exception of the open grafting element in both branches of Congress they have decided to not tax 99 per cent of

the people to build up a water monopoly transportation trust for the other 1 per cent. A ship subsidy is a bounty or bonus given to favored individuals or corporations who are eternally seeking special privileges so they may rob the rest of mankind. It is very easy to convert transportation companies or common carriers of public necessities into a monopoly, and when any class of avaricious, greedy men secure a monopoly or a corner on things the public must use they at once become despots and tyrants, and the people are rapidly learning that it is unsafe to give over any class of business exclusively to individuals who can force the public to use their trust or monopoly.

When the Gallinger ship bounty bill was before Congress a year ago many able arguments were made against it, and the lower House of Congress refused to pass the steal, although the Senate, with the aid of the South Dakota members, pushed it through by a vote of 38 to 27. Not a Democratic Senator voted for the bill at that time, and there were five Republicans who had the honesty and courage to vote against it. Those Republican Senators were BURKETT of Nebraska, DOLLIVER of Iowa, LA FOLLETTE and SPOONER of Wisconsin, and WARNER of Missouri. When the Gallinger bill came to the lower House a year ago, having passed the Senate by 11 majority, Congressman WILLIAM SULZER, the antimonopoly Democrat from New York, helped to give it a death blow in a very able argument which he then made, a part of which was as follows:

"Ship subsidies do not build ships—they create ocean trading monopolies. Ship subsidies will not give workmen employment in American shipyards. The money will simply go into the capacious pockets of the plutocratic beneficiaries of the shipping trust. Every scheme of this kind simply permits respectable corruption and benefits the few at the expense of the many. The principle of ship subsidies is inherently wrong and absolutely indefensible. It is un-Republican, un-Democratic, and un-American, and no man who understands the question can justify the steal in the face of the facts. If we had continued the policy of our fathers, we would to-day be the greatest maritime nation in the world, our flag would be on every sea, and our ships would be carrying the commerce not alone of our own country, but perhaps half of that of all the great nations of the world."

These ship-subsidy advocates are not satisfied to rob the American people by the grace of the tariff in selling American-made goods at home to American consumers at a price 30, 40, and 50 per cent higher than they sell the same articles in foreign countries. They now want these same American consumers to pay these big transportation trusts a few million dollars bounty every year, so they can make more money on the American manufactured goods which they will haul in these big ships and sell them at a low price in foreign lands. The plan has been and still is to make a tariff tax so high that American consumers can not have a chance to buy foreign-made goods, but must pay the American monopolist any price he demands, and then also make him pay a hauling bounty for the goods he takes to Europe and sells at a big discount below the price in this country. Any public officer who advocates such a plan ought to be speedily removed from office for conspiracy to defraud the American people.

It is a continuation of the respectable thieving laws that have been put on the statute books of this country under the name of "conservatism," which means legalized graft.

---

Whereas the so-called "ship-subsidy bill" is still being vigorously pushed; and

Whereas we are informed that threats are applied to public men, and especially Members of Congress who refuse to indorse or assist in the passage of the same through the House of Representatives; and

Whereas somebody calling itself the Maritime Trades Council of New York and Vicinity, probably "Maritime" because there are no mariners in it, are either consciously or unconsciously misrepresenting the nature of the bill in communications sent to all local and national trades unions whose address they can obtain, including in the same blank forms or resolutions to be adopted, signed, sealed, and forwarded to Congressmen urging the passage of this measure: Therefore, be it

*Resolved by the eleventh annual convention of the International Seamen's Union of America*, That we hereby warn all organizations of workingmen against these communications coming from this so-called "Maritime Trades Council," concerning such shipping bill, and we hereby declare the information sent out to be misleading to the reader in this, that it misrepresents both the shipping bill itself, the purpose for which it was drawn, and what it will accomplish if enacted; further

*Resolved*. That as seamen, representing seamen, and having given careful consideration to the bill, we protest against its enactment into law.

---

THE AMERICAN ANTITRUST LEAGUE,
*New York, February 27, 1907.*

The HOUSE OF REPRESENTATIVES,
*Washington, D. C.*

GENTLEMEN: The undersigned hereby protest against the passage by Congress of the ship-subsidy bill, either in the form of the Littauer bill in the House or the still more objectionable Gallinger bill in the Senate.

The ship-subsidy policy of taking the people's money from the public Treasury and making it a present to corporations of such a questionable character as those who have monopolized our land and water transportation is utterly indefensible, yet this is just what the ship-subsidy bill will do.

The healthy growth and development of the American merchant marine can never be secured by the gift to the combined shipping and railroad trusts of public money taxed from the people. Any action by Congress to advance the interests of the American shipping can best be accomplished by laws for tonnage duties, giving preference to American ships, as provided for in H. R. 21196, introduced by Congressman WILLIAM SULZER, of New York, in the present House. By the line of legislation proposed in this bill we shall build up American shipping by extending the principle of competition, which is the very life of trade, both on land and sea.

The application of the principles embodied in Congressman SULZER'S bill will build up American shipping by a policy that will stimulate and encourage that industry without taking money from the public Treasury for the benefit of private corporations, instead of strengthening the lawless and extortionate transportation monopolies by gifts of the taxpayers' money, as proposed by the Littauer and Gallinger bills.

Respectfully,

M. L. LOCKWOOD, *President*,
H. B. MARTIN, *Secretary*,
C. T. BRIDE, *Treasurer*,
*National Executive Committee Antitrust League.*

[From the American Federationist for March, 1907.]

SHIP SUBSIDY—THE CHARLATANISM OF ITS "PROMOTERS."

In the January issue of the American Federationist we published an article in which was exposed some of the deception, forgery, and bribery as part of the methods of the "promoters" of ship-subsidy legislation. The exposure was so complete that it rather staggered the "promoters" and their hangers-on. In desperation the spokesman of the "promoters," Alexander R. Smith, of Cleveland (he who figured so conspicuously and unenviably in the exposé), issued a circular, which he sent to every Member of Congress. It was a labored effort to explain how he was caught in his scheme of meddling in the affairs of organized labor; trying to place it in a false position, and how he managed to play upon the weakness of an uninformed man. The circular then proceeds, by indirection, to declare that the American Federation of Labor and its representatives, and particularly its president, have not the interests of labor at heart.

Measuring men by his own standard, Mr. Smith, who never manifested activity in any public matter, unless he was sure as to what there was in it for himself, insinuates that labor and its representatives are prompted by the same motives in regard to ship-subsidy legislation. Congressmen generally, and particularly those who have had some experience with Mr. Smith's former exploits, as well as his activity in the ship-subsidy promotion scheme, wholly disregarded his circular. Others, unacquainted with his tactics, desired information from the American Federation of Labor. Among the latter was the Hon. THOMAS SPIGHT, and to whose request a response was made. The letter is sufficiently comprehensive and important to warrant its publication, and we therefore print it here. It is as follows:

HEADQUARTERS AMERICAN FEDERATION OF LABOR,
*Washington, D. C., February 7, 1907.*

Hon. THOMAS SPIGHT,
*Member of Congress, House of Representatives,*
*Washington, D. C.*

DEAR SIR: Your letter to Mr. Arthur E. Holder, a member of our legislative committee, in which you inclosed copy of a circular issued by Mr. A. R. Smith, of the Merchant Marine League, in other words, one of the chief promoters of the ship-subsidy bill, was, as you requested, turned over to me. You desire an expression of opinion from me on the matters referred to in Mr. Smith's circular.

You will, of course, note that Mr. Smith throughout the circular refers to the opposition of labor to the ship-subsidy bill as "Samuel Gompers and his organization." The very spirit of that designation is unquestionably intended to belittle the intelligence of the men composing the great trade-union movement of the country which constitutes the American Federation of Labor, and also is intended to convey the notion that, regardless of the wishes or the interests of the men of labor, my personal prejudices or interests dominate the whole labor movement. I refer to this simply to call attention to the petty methods which Mr. Smith employs to cast odium upon the oft-repeated declarations of the rank and file of the organized wage-earners of our country.

No one who knows the attitude of labor and how that attitude is ascertained; no one who has any knowledge of the efforts which I have endeavored to put forth in the interests of the working people and of all the people of our country, would for a moment give credence to any statement made by Mr. Smith which in any way reflects upon the labor movement or the cause which it represents, or myself, either personally or officially.

Take Mr. Smith's own version of his negotiations with Mr. Weeks and it is quite clear then that he took advantage of the weakness of a poor uninformed man. However, the affidavit voluntarily made by Mr. Weeks shows clearly that Mr. Smith wantonly undertook to suborn him, and that he (Mr. Smith) falsely made it appear that the organization of the Marine Trades Council of New York authorized the issuance of appeals to the labor organizations of America, when, as a matter of fact, no such authority was either asked or given; that a counterfeit letter head of the Marine Trades Council was made at the instance of Mr. Smith; that a new motto, which he invented, was placed on the head of the counterfeit letter head; that the name of Mr. Weeks was put to documents without his consent or the consent of the Marine Trades Council, from which body the appeal was supposed to have emanated.

We are not wholly dependent upon the statement of Mr. Weeks, but it is corroborated by the voluntary affidavit of Mr. Story in the district attorney's office of the city of New York.

As a matter of fact, the whole transaction is of a character which Mr. Alexander R. Smith is well known to have practiced on previous occasions.

A little more than eight years ago, when Mr. Smith could neither persuade, cajole, nor bring his other "peculiar" influences to force me into line to help ship-subsidy legislation, he left my office uttering threats as to what he would do. What he did do was to bring a lobby to the convention of the American Federation of Labor for the double purpose of having the convention change its attitude and declare for ship subsidy and to punish me. Just before that convention I met with a serious railroad accident and could only attend the convention for less than a half hour of the ten days' session; yet the convention rejected, with but one dissenting vote, the proposition to indorse ship subsidy, the author of the resolution being the only one who voted for it.

It is one of the adroit tricks of those who have a bad case to abuse and asperse the motives of anyone who differs from them. It is a favorite trick of those who are antagonistic to the labor organizations to say, among other things, that it is foreign in origin and has no place in our country, forgetting, or trying to hide the fact, that like causes produce like results and that the industrial conditions of our country naturally produce the great organizations of labor here.

Organized labor of America favors the building of ships to the fullest in the United States. It believes in the fullest extension and development of our industrial resources. We have urged the passage of a bill to prevent the wholesale towing of unfit or undermanned vessels. The passage of such a bill would compel the building of an immense number of vessels properly manned and which would possess their own propelling power. What has Mr. Smith or any of those who favor ship subsidy said in the interest of such a bill? They have allowed it to remain in committee and have never uttered a word but in opposition to it.

American workmen, I repeat, favor the building of American ships to carry American passengers and American commerce to any part of the world, but they do not believe that a subsidy is necessary to accomplish that purpose. They believe that the principle involved in the proposition of subsidy is vicious and contrary to American principles.

The insinuation contained in Mr. Smith's circular that either other representatives of the American Federation of Labor or I are working

in the interest of foreign shipowners in foreign countries is a malicious, false, and contemptible utterance. While I am not authorized to speak for any other men in the labor movement, yet I am confident they have never, and, so far as I am concerned, I am positive I have never had any conference or communication, directly or indirectly, with any foreign shipbuilders, shipowners of foreign countries, by representatives or otherwise, upon any subject remotely referring to the question under consideration, or, for that matter, to any other question.

Then, again, letters which organizations have sent favorable to the passage of the ship-subsidy bill were sent under the false impression that they were aiding a measure which was asked by organized labor of the country, and they were wholly unconscious that the circular was issued under a forged signature, upon a counterfeit letter head, and without authority or consent from the organization from which it purported to emanate, and that it avoided the mention of one of the particular features of the ship-subsidy bill—the conscription provision—to which labor is particularly opposed.

Your attention is called to Senate bill 529 of the Fifty-ninth Congress, second session, report No. 6442, upon that bill. Together with other representatives of labor, I had occasion to appear before the House Committee on Merchant Marine and Fisheries on several occasions, conveying labor's protest against the passage of the so-called "ship-subsidy bill," particularly upon the ground that it contained provisions which made conscription (compulsory naval service of seamen) a condition precedent to their employment on privately owned vessels.

In discussing that bill, it may be necessary to call attention to the fact that the advocates of the bill questioned the accuracy of our contention on this latter point, and asserted that the naval service required is of a voluntary character.

It is true that the language employed in the bill gives the superficial appearance that such service, if undertaken, would be voluntary; but upon an examination of the language and its practical application there is no escape from the conclusion that it means, and is intended to mean, compulsory naval service in time of peace or war as a condition upon which seamen can find employment on privately owned vessels; in other words, that seamen would be required to sign articles enlisting in the naval service before they would be permitted to earn their own livelihood and to support those dependent upon them.

For your information I quote the provisions of the bill bearing upon this subject. The bill is known as "Senate 529" of the first session of the Fifty-ninth Congress. The provisions referred to are as follows:

"That there shall be enrolled in such manner and under such requirements as the Secretary of the Navy may prescribe, from the officers and men now and hereafter employed in the merchant marine and fisheries of the United States, including the coastwise trade of the Atlantic and Pacific and the Great Lakes, such officers, petty officers, and men as may be capable of rendering service as members of a naval reserve for duty in time of war. * * * These members of the naval reserve shall be enrolled for a period of four years, during which period they shall be subject to render service on call of the President in time of war. They shall also possess such qualifications, receive such instructions, and be subject to such regulations as the Secretary of the Navy may prescribe.

"A vessel shall not be entitled to the subvention (subsidy) above provided for unless during the period of employment in the foreign or deep-sea fisheries the following proportions of the crew of the vessel, after the dates specified, shall have been enrolled in the naval reserve."

The bill then proceeds to prescribe the continual increased proportion of the constantly increased number of those seamen employed in privately owned vessels "who shall have been enrolled in the naval reserve."

It will be observed that the bill provides that enrollment of seamen is compulsory; that it prescribes that they shall be enrolled for a period of four years, compelled to render service in time of war, and subject in times of peace to the instructions and regulations prescribed by the Secretary of the Navy. And further that the vessels can not receive the subsidy unless there is a constantly increased number of seamen who shall have been enrolled in the naval service. It is not difficult to understand that if the owners of vessels can only receive the subsidy upon the condition that their seamen shall have enrolled themselves in the naval service, these owners will insist upon their seamen signing the articles of enlistment in order that they may be employed.

The theory, declared the American Federation of Labor at its last convention, upon which the bill is drawn and the reasons given by its advocates are that we have not the vessels needed as auxiliaries to the Navy and not all the men needed to man the Navy in time of war. Accepting these contentions as facts, it is contended, therefore, that the cost of building a vessel in an American shipyard and the cost of sailing a vessel under the American flag in the foreign trade is so much higher than that under other flags that a subsidy is necessary. It is further contended that with an adequate subsidy we shall have more vessels, and having more vessels we shall have all the native or naturalized seamen needed.

That we have not now the necessary number of native or naturalized seamen needed for the merchant marine and the Navy is a fact not disputed; it is patent to all who are at all acquainted with maritime conditions. The American boy is not seeking the sea as a means of livelihood and the American man at sea is seeking and finding more agreeable and more remunerative employment on shore.

There is employed at present, according to the census, about 120,000 men as seamen or deep-sea fishermen under our flag, and among the seamen from 10 to 15 per cent are either natives or naturalized; the rest are men owing allegiance to other flags and not subject to draft upon order of the President.

If the seamen and fishermen employed in our fisheries and our coastwise and Lake trades were either native or naturalized Americans, the number of men necessary for the Navy could at any time be obtained. The difficulty, therefore, lies not so much in the number of men as in the number of men available, and the primary cause is that for some reasons the American does not seek the sea or remain there. If the American does not seek the coastwise trade, when there is no competition with the foreign vessels and small wages, and onerous conditions are not caused thereby or an excuse therefor, there seems to be no reason why he should seek employment in the foreign trade where the shipowner has the reason of competition for the wages and conditions which he imposes upon the seamen. The American ceased to go to sea because he could do better on shore than he possibly could at sea, where, no matter what his industry and thrift, he could not and can not earn sufficient upon which to keep a family.

As to the cost of operating a vessel under the American flag, the contention that American vessels in the foreign trade provide better quarters, more and better food, that they carry more men, and pay more wages than vessels under other flags is not based upon facts. When the steamers *Paris* and *New York* were placed under the American flag the number of firemen and coal passers and of able and ordinary seamen was reduced.

The wages of sailors and marine firemen depend upon the port in which they are engaged and the voyage they are about to make, and not at all upon the flag under which the vessel sails, and our law, enacted in 1884, gave to the shipowner the right to hire his crew in a foreign port, bring them to the United States and back to a foreign port without reshipping them in the United States. This puts him on an absolute equality as to wages, exclusive of officers, with any country with which he trades. He pays English wages if he trades with England, French wages if he trades with France, and Chinese wages if he trades with China. The law gives him this privilege and he avails himself of it to the fullest extent.

The other costs of operating a vessel are coal, lubricating oils, and provisions; like other vessels, he buys it where it is cheapest. If it be a sailing vessel it consists in spars, canvas, ropes, and blocks, and these things we furnish to other nations to a very large extent.

Since the organization of our Government no industry has been as well cared for through absolute authority over the men employed therein, through immunities granted and special privileges conferred, as has been the merchant marine. By law enacted in 1790 the seaman was made the property of the vessel upon which he served. If he sought to withdraw himself from the servitude of his master, he could be and he was arrested, put in prison, there to remain until called for by such master. If he succeeded in escaping from his service and his master, he could be and he was pursued from State to State, or from one country into another, forcibly returned to his master, and compelled to continue the labor on pain of imprisonment. When involuntary servitude was taken off the negro by war and the thirteenth amendment and the statutes revised accordingly, the vessel's ownership of the seaman remained undisturbed. Conditions as to quarters on board, food, and working hours were by Congress left at the discretion of the owner. Some improvements have been made, but the seaman's status yet remains that of a serf or a peon. He is still compelled to live in a place 6 feet long, 6 feet high, and 2 feet wide. In this place he has to eat, to live, and to sleep when off duty. It has been described as too large for a coffin and not large enough for a grave. He is still compelled to sign away in the foreign trade a certain sum of the wages to be earned in order to obtain employment. He must obey any order from the master or any other officer or go to prison. But if crippled for life by injury thereby received, he has no remedy. He must, in obtaining employment, compete with the unskilled and destitute, not only in this country, but from all nations and races. The vessels are undermanned, both as to skill and number, and the shipowner is resisting every improvement by every means within his power.

In the meantime the shipowners have been relieved of risks arising from acts of God or dangers of the sea through a system of insurance; arising from piracy through the present imperfect policing of the seas; from those arising from popular local disturbances through damages paid by such localities or States; of liabilities to the shipper, passenger, or seaman through limited-liability laws and judicial decisions; of taxes on floating property by several States; of fees to be paid for the enforcement of navigation laws, except in some unimportant instances; of care and cure of sick seamen, cost of which is now borne by the Public Treasury, and the burial of dead seamen, who are handed over to the coroner and then buried by the community; of the duty to carry a certain number of citizens in the crew of the vessel; of the duty of training men for the sea service, now done by foreigners or in training ships at public expense. In addition to this he may carry as many or as few men as he pleases, with such skill or lack of skill as he chooses; he may carry as much cargo on deck and load his vessel to any depth that he thinks profitable. There are no laws or regulations on these subjects.

He may hire and, in a foreign port in the foreign trade, by assistance of the police, keep the cheapest men that can be found in any part of the world.

Under our coastwise-navigation laws he has an absolute monopoly of all trade from one American port to another.

Under the act of 1892 he may make contracts to carry the mail through which he receives more pay for this service than he pays in wages to every man and boy employed on his vessel as a seaman in any capacity.

Having been relieved of risks and liabilities, and having been given immunities as have been herein mentioned, and having driven the American from the sea, thereby weakening our Navy, and now employing and thereby training foreigners and men of alien and antagonistic races, making them ready to be employed by other navies, he insists upon continuing these conditions, while he urges Congress to further tax the whole American people to help him carry on his private business.

The convention then reiterated its condemnation of any such legislation, and especially against this bill, with its un-American provision for conscription.

In passing it may not be amiss to say that the workingmen of our country, the organized workingmen, are no less patriotic than any of our citizens in other walks of life. In all the great events and vicissitudes, when the honor, the interests, and the safety of our country have been at stake, none more promptly, zealously, and patriotically enlisted and offered their services and lives under the flag of the Republic than did the men of labor. We have lost none of our love for and devotion to our country. The past is but a presage of what the toilers of America will do should the necessity ever arise, but we can not refrain from entering an emphatic protest against an attempt to subvert a principle of civilized government, and particularly republican institutions, by a system of conscription and compulsory military or naval service, especially in times of peace, even if conscription and compulsory service are hidden disingenuously behind the subterfuge that they are voluntary.

You will please note the substitute for Senate bill 529, Fifty-ninth Congress, second session, that section 3 in its entirety is a practical restatement of the provisions of the compulsory naval-service feature of the original bill. Every organization in the boiler making, shipbuilding, and kindred trades has gone on record deliberately and repeatedly as opposed to ship-subsidy legislation. Mr. Smith in his circular quotes a so-called "United Boiler Makers' Association." You should know that this so-called "united boiler makers" is composed of a few locals of the Brotherhood of Boiler Makers and Iron-Ship Builders of America, which seceded from the parent organization upon an entirely different subject, and in no way related to the ship-subsidy proposition. It forms but a very insignificant part of the trade in the United States.

It assumed this position simply as a matter of pique and antagonism because of the other differences which exist.

I should be glad to submit to you originals and copies of the correspondence which passed between Mr. Smith and Mr. William J. Gilthorpe, secretary-treasurer of the Brotherhood of Boiler Makers and Iron-Ship Builders of America, in which it is clearly shown that the efforts of Mr. Smith, acting for the promoters of ship subsidy, in trying to suborn Mr. Gilthorpe and induce him to follow just such a course and practice with his organization, were the same as he (Mr. Smith) used in his scheme to suborn Mr. Weeks.

It may not be uninteresting for you to know that there is not a promoter of ship-subsidy legislation but who has antagonized in Congress every bill of a tangible character which might favorably affect the interests of the working people of our country—the 8-hour bill, the bill to regulate and limit the abuse of the issuance of injunctions, the bill to accord to seamen the right of ownership in themselves, and all other measures for which labor has asked at the hands of Congress.

There are other additional interesting matters in connection with this subject which I hope for the opportunity to present to you for your consideration, but this letter is already too long to attempt of their incorporation here.

Very truly, yours,

SAMUEL GOMPERS,
*President American Federation of Labor.*

In the first session of the present Congress the ship-subsidy "promoters" brought a body of half dozen "labor" men to Washington who, without authority, and in fact against the distinct declarations of their organizations, made a pretense that they were voicing the sentiments of labor when they hypocritically asked for ship subsidy "in the interest of labor." These "labor" men were and are well known to be out of touch and sympathy (and some out of membership) with organized labor. While in Washington at the time they were seen and heard wrangling as to the money consideration they received from the ship-subsidy "promoters" for their dirty part in the dirty business.

It seems to be the part assigned by the "promoters" to Mr. Alexander R. Smith to seek out some poor, weak-kneed men in the labor movement, to cajole, flatter, or hoodwink them; if these fail, to suborn or bribe them. In our efforts to advocate, protect, and further the interests of the toiling millions of our country we have at times run counter to these men, and in every instance the origin of their having "gone wrong" was immediately traceable to the ship-subsidy "promoters," of which Alexander R. Smith is the conspicuous figure.

We can find no more fitting description of the work and methods of the men engaged in the effort to fasten ship subsidy and particularly conscription upon the people than our opening characterization of them in the January article in the American Federationist: "In all our country there is not a more corrupt gang than the well-known coterie who are engaged in the scheme to 'promote' ship-subsidy legislation."

We commend to ship-subsidy "promoters" the well-known but oft-despised couplet:

"What a tangled web we weave,
When first we practice to deceive!"

Mr. GOLDFOGLE. Mr. Chairman, this bill provides, in my judgment, the worst character of class legislation. Though I doubt at this stage that anything that will be said on this side of the Chamber will change a vote on this bill, I want to rise in my place to utter my protest against this unfair and iniquitous attempt to seize millions of the people's money out of the public Treasury for the further enrichment of a favored few. [Applause on the Democratic side.]

In common with other gentlemen of this House, I deplore the fact that America is not to-day the mistress of the sea; that American vessels do not float in the great numbers we would wish them to float everywhere upon the ocean highways. I, too, would wish to see the American shipyards busy turning out in larger number than they now do fast ships built by American mechanics, to be manned by American seamen, and to sail under the American flag. But, sir, the bill before us will not produce that result. It will not build ships. It is not a commerce proposition. It is a subsidy pure and simple. It is to put millions of the public funds into the treasuries of a few shipbuilding concerns without conferring back upon the general public a corresponding benefit.

It has been asserted, and by many fully experienced in the shipbuilding trade, that we can, upon the Great Lakes of this country, build vessels as large and as cheaply as they can be built in foreign yards. This fact has been stated before the Committee on Merchant Marine and Fisheries. It has been substantially admitted by some of those engaged in the shipbuilding industries. The Literary Digest of December 22, 1900, quotes Mr. J. J. Hill as saying:

> We can build ships in this country as well and as cheaply as they can be built anywhere in the world. Now, I had figures within the last year furnished from the best builders on the Clyde and figures from as good builders as there are in this country, and to my utter amazement the American figures on a single ship were £8,000 to £10,000 under the best Clyde builders.

But for the purposes of this discussion we need not so much inquire whether the facilities on the Great Lakes are sufficient now to turn out the fast-going ships that are said to be needed or whether they can be built there as cheaply as in the foreign market. Let us revise the tariff schedules. Let the materials which enter into the shipbuilding industry, to be used in American shipyards, be brought in free from excessive duty; let the trusts and monopolies sell the materials and implements as cheaply in the American market as they do in lands abroad, and through American thrift and American energy and business perseverance we can again restore in all its glory the American merchant marine upon the seas. But this will not suit the purpose of Hill and Harriman interests and the Spreckels and others of their class. They are awaiting these subsidies. They seek the people's money for the enrichment of their enterprises. True that has been disclaimed here. But the fact remains that to further private enterprises and help build up private business concerns it is proposed by this bill to take from the public Treasury during a period of ten years about four millions per annum. This is not all. I fear it is but the entering wedge to further assaults upon the nation's Treasury.

For years and years the subsidy seekers have been knocking at our doors for this subsidy—sometimes in one form, sometimes in another, but always to the same end and for the same purpose. The lobby has been busy for years. Their methods and operations have been public scandals in the past. They have flooded us with literature all emanating from the same source in the hope of making us believe that there is a general demand for this subsidy.

Mr. Chairman, there is no such demand. The people do not want it. They protest against it. The business man is already overburdened with taxation; the laboring classes feel heavily the result of this over and excessive taxation. The labor organizations, backed by public sentiment, have denounced this bill as vicious and as a robbery of public funds. Stripped of all disguise, it is just what the minority of the Committee on Merchant Marine have declared it to be—an attempt to loot the Treasury of millions for the benefit of the few, and the promotion of private business at the expense of the entire people.

I refrain from entering upon a discussion of many of the details that prove that the bill neither makes for American trade, American commerce, nor American prosperity. Its so-called "postal" feature and "naval-reserve" provision at heavy cost during times of peace are but thin disguises to veil a subsidy grab.

One might stand on this floor an entire day to voice opposition to this bill, and yet not better express the views which the public entertain of it than are expressed in an editorial published some time ago in one of the newspapers of my city. It is not a Democratic sheet. It is a Republican newspaper that has always been Republican in its politics and true to Republican principles. I send the editorial from the New York Press to the Clerk's desk to be read.

The Clerk read as follows:

THE SENATE SHIPPING PIRACY.

The ship-subsidy bill passed by the Senate ought not to receive even the courtesy of debate in the House. Divested of its sham virtues of naval reserves and fixed precentages of American seaman in the service, it is nothing but naked piracy against the United States Treasury to turn money into the hands of individuals already holding investments in shipping, but not satisfied with their financial returns.

The Senate piracy is not a bill to restore, enlarge, and maintain a flourishing shipping; it is a bill to fatten those already in the business, without creating a new merchant marine.

The people of this country do want a merchant navy. They realize that it must be built. They would favor any plan which embraced the creation of more shipping. From the Senate they would get nothing of the sort. They would, for the most part, only pay money into the hands of those owning existing shipping. This Senate scheme is not one to restore the merchant marine; it is one to enrich a few individuals, with absolutely no benefits following to the nation.

There is one way to assure enormous merchant fleets plying across the seas as successful and complete as the fleets on the Lakes and in the coastwise trade. There is no coastwise shipping anywhere else in the world to compare with ours. No subsidies have been called for by it. There is no whine for subventions; no lobbying for mail contracts. The powerful industry has grown and continues to grow because it exists under a policy which provides business for it.

If there were a policy that provided business for transoceanic ships as for the coastwise vessels, capital would build and operate shipping for the oceans as for the Lakes and the coastwise traffic, and it would never ask nor want for subsidies; and the fleets, springing into being, would make money—they would flourish and increase. The American bottoms would regain the supremacy which they held on the oceans for half a century when the shipping policy of the nation provided business for American ships.

If the House is to make an effort to restore American shipping and to provide that it shall be maintained as a self-supporting institution, it will waste no time on the Senate measure. It will insist on something that will provide business for American bottoms. A tonnage tax discriminating against foreign vessels engaged in the traffic with this country will do this; a discriminating tariff duty in favor of the vessel which sails into our ports under the Stars and Stripes will do it. Subsidy without business never will.

Mr. KAHN. Mr. Chairman, will the gentleman yield for a question?

Mr. GOLDFOGLE. I am sorry I can not yield, for I have but a minute or two remaining. In that minute I want to say that it looks very bad to the country that at this late hour, when the session is about to close, an attempt should be made to jam this bill through Congress. The restrictive policy of our Government thus far pursued has driven millions of dollars of our money to find investment in shipping under foreign flags. Our navigation laws are no longer suited to the conditions of our times. Let us correct these matters by sober, sane, wholesome legislation. They can not be remedied

by the bestowal of bounties to a favored few at the expense of the many, or by subsidies to the monopolistic combine, who, aided by a powerful lobby, stand behind this measure, which is nothing short of an attempted robbery of the people's money. [Applause on the Democratic side.]

The principle embodied in the bill is opposed to sound Democratic doctrine. It adds to the burden of taxation for the sole benefit of a few. It grants special and unusual favors to a special class. Called by any other name, it is still the same old subsidy which will not restore nor build up, as its advocates claim, our American merchant marine. Such being my view, I shall vote against the bill.

Mr. GREENE. Mr. Chairman, Massachusetts has unquestionably suffered a heavier loss from the decline of American ocean shipping—from 2,500,000 tons in 1861 to less than 1,000,000 in 1906—than any other State in the Union. Shipbuilders and navigation for many years were her chief industries. This was particularly true of the counties of southern Massachusetts and of Cape Cod, which have furnished more officers and sailors to the American flag in peace and war than any like area in the nation.

This present bill does not confer much direct and immediate advantage upon Massachusetts. There is not now registered in that State a single steamship which would be eligible for service on any of the mail routes proposed in this bill, except perhaps on the short route from the Gulf coast to the Isthmus of Panama. Massachusetts men are builders and owners of heavy cargo carriers rather than of swift mail craft. But Massachusetts applauds this bill and supports this bill because its citizens regard it as a measure which will be of great benefit to the commerce and the shipping of the nation as a whole.

Though our Commonwealth now owns only half a dozen steamships in the foreign trade, and these not within the scope of the proposed legislation, yet there is one element indispensable to a strong merchant marine which Massachusetts does produce in considerable numbers. These are the brave and skillful officers of the deck and engine room and the hardy young seamen trained from boyhood on our rugged coast to "hand and reef and steer," unsurpassed in their hazardous calling and famed for their courage and endurance on every ocean of the world. To say that a man is a New England sailor in any port the whole world over is as proud a boast as in the old days one would say he was a Roman citizen.

Massachusetts has heretofore been a State of wooden-ship building. It was the birthplace half a century ago of the most famous clippers that ever sailed the seas. Even now the art of the wooden-ship builder is actively followed for the fisheries and coastwise trade. But steel-ship building has sprung up in Massachusetts for our coastwise navigation and the Navy, and one of the largest modern shipyards in the country, the Fore River Ship and Engine Company, stands on the shores of Boston Harbor. New England can compete with Pennsylvania or Virginia in the construction of modern ocean ships. She has no native materials, it is true—no native coal or iron. But in the early days for a long time her shipyards brought much of their oak and pine from the far Southern States to have them wrought into finished ships by the unflagging skill and industry of her mechanics. Moreover, Massachusetts realizes that all the materials for an ocean ship constructed for the foreign trade are duty free and that she can get her steel and iron, her wood, and all the manifold articles of equipment without being troubled by the exactions of the tariff.

OF BENEFIT TO THE WHOLE NATION.

This bill now before the committee calls for the construction of a great fleet of twenty-five or thirty swift and powerful ocean steamers, built on designs approved by the Navy Department, and fit for the service of the Government in war. They are to be ships of a type far larger, more elaborate, and more expensive than the cargo carriers which ply up and down our coast. And though these fast mails ships belong to a peculiar class, resembling war ships, and are far apart from the mail body of our merchant marine, yet the building of them means a vast stimulus and improvement of the entire shipbuilding industry of America. Just as the construction of the armor clads and cruisers of our new Navy has made its influence felt upon the protected coastwise fleet, improving the character of these domestic ships and enabling our shipyards to produce commercial steamers of a size and speed before unheard of in America, so the building of the fleet of mail steamers provided for in this bill, one by one, will quicken still further the entire American shipbuilding industry, thereby improving the skill of our mechanics and the ability of our naval architects, and enabling them to produce better vessels for our great and prosperous coastwise trade and for all the general demands of ocean commerce.

One severe handicap now upon our ocean shipyards, because of the paralysis that has long afflicted our shipping in foreign trade, is the haphazard character of employment. For a few months our shipyards have been fairly busy, as they happen to be at the present time, to meet the demands of the coastwise service, or to construct a few heavy men-of-war. But these fortunate periods have always been followed by many months of depression and idleness, in which the skilled workmen have been scattered or reduced to the roughest kind of manual labor at the lowest wages.

You can not maintain a healthy and prosperous industry on such conditions as these. You can not have an efficient industry out of such uncertain and spasmodic employment. You can not produce ships at a low cost if your shipyards are working only half the time, and are unable to standardize their products, and to effect the economies of administration which only constant work at the fullest capacity makes possible.

Twenty-five or thirty new mail steamers called for in this bill mean not only the addition of a large and valuable tonnage to our merchant marine, but also the strengthening of the power of our shipyards to construct ocean vessels of improved character at a lower cost. Thus while directly this proposed bill encourages only the fast steamer element in our merchant fleet, indirectly this bill will benefit the whole body of our merchant shipping. This is frankly recognized by some of the principal sail-vessel owners of Boston, who state that though they regret that their cargo carriers are excluded from this bill, yet they earnestly desire that the bill become a law, because these great mail lines will heavily increase the total volume of our commerce with South America, and give our cargo vessels, both sail and steam, a chance to share in this increased carrying of at least the bulkier commodities.

A QUESTION OF WAGES.

The present difference in cost between an American ship and a British ship is simply a question of labor. Our shipbuilders have testified before the House Committee on Merchant Marine and Fisheries that with all materials for ships for foreign trade on the free list, steel from Pennsylvania is laid down in a New England yard at the same price for which similar steel can be delivered duty free from Scotland. Our timber, which now comes chiefly from Virginia, the Carolinas, Georgia, Florida, and Mississippi, is of course as cheap as any in the world. If it costs more to build a steel ocean steamship on Boston Harbor than it costs on the Clyde or the Tyne, the difference is to be found in this contrast of American and British shipyard wages.

I do not deny that our New England mechanics in trades where they are steadily employed will do more work in a given time than their low-wage competitors on the other side of the ocean. Our people live better. Their higher wages enable them to secure more varied and abundant food. They read the newspapers and books. They have a better opportunity to get ahead in the world and to help their children to get ahead. They have a keener personal ambition than is possible in Europe.

All these things tell in the character of their handiwork. But while I believe heartily in the superiority of the American workman, I do not go so far as to say that under present conditions, with his present experience, he can do any more work in a day than his kinsman and rival abroad. Undoubtedly under present conditions of partial, spasmodic employment the higher wages obtained by American mechanics are a serious handicap upon American shipbuilders.

HOW TO LOWER THE COST OF SHIPS.

But this is not a permanent condition. We know that our steel mills, and our locomotive works, and many of our cotton mills engaged in weaving certain classes of fabrics pay wages practically double those paid in similar callings abroad, and yet, after years of experience and of constant employment at full capacity, they are now able to sell their products in foreign lands at the same prices as their European competitors. This fact, that even with high wages American producers in certain trades can turn out articles for the European price, is a fact so well known and understood that it is being made the pretext for a demand for a reduction or entire removal of the protective tariff on such articles.

If, after years of adequate protection and constant employment, such facility has been attained by our high-wage workmen and manufacturers in the production of locomotives and steel bridges that American locomotives and steel bridges are being sold all over the world, there is no escaping the conclusion that if you will protect the ocean shipping industry so as to create a great and steady demand for American ships, the time will come when American shipyards, turning out these ships regularly in large numbers, standardizing their product, and effecting

the economies possible only with great and constant production, will be building ships as cheap as any other nation in the world. For what is an ocean steamship but a locomotive and a steel bridge wrought together?

THE WORD "SUBSIDY."

The peculiar insistence with which the word "subsidy" is still used to characterize this bill has much significance. As a matter of fact such payments as it provides for are not subsidies, but they are merely payments for work performed. The United States Government is in the business of distributing the mails. It employs all sorts of vehicles for accomplishing that distribution—railroads, wagons, stages, men—all are employed when and where needed. Ships are also employed, and ships are paid for the services performed precisely as the electrical, the gasoline, and the horse vehicles are paid for, as the men are paid—for services performed. The mere calling of a payment a "subsidy" because it is made to a ship, when the word "subsidy" is unpopular in many minds and begets prejudice, is not done without intent. It has a purpose.

The vested interests now monopolizing our foreign carrying trade and enjoying $200,000,000 a year for carrying our mails, passengers, and freight to and from foreign countries dislike to have this country encourage its shipping in the foreign trade. Personally I am not aware of any attempt on the part of foreign shipping interests to oppose bills which are brought up in Congress with the intent of unbuilding American shipping in foreign trade. That it would be natural for them to oppose anything that advances American shipping interests goes without saying. We may, I think, properly ascribe to them the influence that persists in calling provisions for paying American steamships for carrying the United States mails to distant parts of the world by harsh and unreasonable names. The press which oppose this bill teem with such characterizations as "ship-subsidy grab," "the ship-subsidy steal," "the ship-subsidy graft," and those interested in the bill's passage are savagely referred to as "grafters," as "subsidy beggars," as "Treasury looters," as men anxious to plunge their arms into the National Treasury with the intent to steal the people's money; they are characterized as people seeking to obtain the people's money without adequate return, when, as a matter of fact, a very valuable and necessary service must be performed for the Government—for the people—by the steamship lines that are to receive this payment if the bill becomes a law.

The bill is a mail-line bill, and, as I have stated, it is a bill to accelerate the carriage of our mails to distant parts of the world. Possibly thereby opportunities will be afforded to business men in other countries to visit the United States more frequently, more readily, more comfortably than ever before. Unquestionably such opportunities availed of by business men of other countries, who thereby familiarize themselves with our resources, our productions, our prices, our possibilities, will increase their trade with us.

On the other hand, the operation of direct, swift American mail lines to foreign countries, especially where no such lines are now operated, and making frequent sailings, will induce our own business men to send their agents and salesmen to those foreign countries for the purpose of establishing business relations with their business men. This will bring the distant countries that will be connected with our own into more close and intimate relations with the United States; they will understand us, and we shall understand them better. We may well characterize these proposed lines of swift mail steamships under the American flag as pioneers of trade, and it is to be hoped that they will accomplish all that their most enthusiastic advocates predict for them. Certainly we need them; we need them for the chief purpose for which they are to be paid—for carrying and thus expediting the delivery of our mails to distant countries; we need them as trade solicitors; but, most of all, we need them for essential auxiliary naval purposes. For these purposes they will be invaluable in times of emergency, as is clearly set forth in the very valuable, detailed, and explicit reports that were submitted to Congress toward the close of the year 1905 by Admiral Dewey, expressing the views of the Navy in respect to the great and pressing need of such ships, and of General Chaffee and the Secretary of War in transmitting the views of the Army War College. These facts are printed in the reports of the House Merchant Marine and Fisheries Committee. That these ships would be useful for naval and military purposes will be apparent to anyone who will give to the reports even the most casual study, for even limited as the bill is in the number of ships it will bring into existence it will nevertheless be of the greatest aid to our Army and Navy, if need for that aid shall ever arise.

Least of all is the pending bill a protective measure. A measure that merely provides for payments for services rendered can not be called a protective measure, and as this is a bill that provides only reasonable, fair, just, and necessary payment for carrying the United States mails, it should not be opposed because it is mistakenly charged with being, and as mistakenly believed to be, a protective measure.

The pity about this amended House bill is that its terms are not understood by the great majority of our Members; it is not understood by the press of the country, and it is not astonishing, therefore, that it is not understood by the people of the country. Members will be inclined to vote against this bill because of the belief that they are thereby helping to prevent the establishment of a very dangerous precedent. Gentlemen tell each other on the floor of this House that they are afraid to try the "experiment," and with serious faces they say to each other that this is only "an entering wedge;" that if successful, in time it will be extended, and that thereby a dangerous interest will be fostered and encouraged. Therefore they hesitate to support this bill which provides for carrying the United States mails to far-distant countries.

The Post-Office Department is constantly improving the different methods of mail distribution and delivery. In every way possible, and in many cases quite regardless of seemingly excessive costs, the delivery of our mails is hastened. The prime object always is to secure the most rapid and safe handling of the mails, to shorten the time in every possible manner between the sender and receiver of the mails. To this end pneumatic tubes are favored to prevent the congestion and delay arising from accumulations of mail, and this method has solved a grave problem. Does anyone mean to say that the owners of these pneumatic tubes are subsidized, or that they are "grafters" or "subsidy beggars?" I think not. We have established and we are constantly extending our rural free-delivery service, and the expense, great as it is, is not objected to. The end accomplished is what is sought, and the people voice their approval.

So it is with our mails to foreign countries. The President and the Secretary of State and many others tell us that our mails at the present time for South America are more promptly delivered if they are first carried across the Atlantic to Europe and then brought back across the Atlantic again by foreign steamships. In most cases those foreign steamships enjoy fair and just compensation—subsidies if you prefer the word—for carrying the mails. As a result of these payments for mail carriage fine lines of steamers have been established and steadily maintained. But without the payments they receive for the carriage of the mails the lines might not in many cases be operated at all. What European countries have by experience found it to their interest to do we may well undertake to do, and we can afford to pay for a better delivery of our mails to such foreign countries where deliveries are now made irregularly, slowly, unsatisfactorily, and unreliably. We have no mail lines of any kind either to Brazil or to Argentina. Those are both great American Republics of extensive areas, with large populations, enormous resources, and with products that we can utilize to our advantage, and whose people need many of the things that we can produce in abundance. They are anxious to do business with us, and we are anxious to do business with them. But the chief instrumentalities with which to conduct such business—swift mail steamships making frequent and regular sailings—are lacking. This bill proposes to overcome this disadvantage—that is all—and by the swiftness, regularity, and frequency of the delivery of our mails, and incidentally the mingling of our business men and their business men, and with the better distribution of freight to and from their ports, we shall establish a growing and prosperous trade. Moreover, we shall soon get into the most cordial and delightful relations with peoples about whom we know but little at present and who know very little about us, all for our mutual good.

These are the things that the establishment of the lines proposed in this bill will accomplish. The United States Government, in the progressive steps it has taken to improve its postal service, has reached the seaboard, and dissatisfied with the service now rendered in the carriage of our mails, especially to South American countries, purposes improving it. Call it a subsidy, if you choose; call it anything you like, so long as what it is is clearly known. The name "subsidy" will lose its terrors and be robbed of its sinister suggestiveness once its purpose is found to be, as in this case, merely the more rapid, more regular, and more frequent delivery of our mails to distant countries.

Let it not be forgotten that this is in no sense an "experiment." Quite the contrary, Sixty years ago it was an experiment. When it was proposed in 1845 and 1847, under the Administration of President James K. Polk, it was, so far as this country was concerned, an experiment. To be sure, Great Britain had been paying large, generous, and bountiful sums to British steamships for establishing regular lines and carrying

British mails to the uttermost parts of the world. They were called "subsidies" then, as they are now. Great Britain has steadily persisted, however, in paying these sums to British steamships for carrying British mails. In the past seventy years Great Britain has expended in this way sums aggregating $300,000,000. If payments for the carriage of the mails by steamships are subsidies, then unquestionably is Great Britain the greatest subsidizing nation on earth.

Only a few years ago when an ambitious American accustomed to doing things industrial and financial upon a large scale bought up a million tons or thereabout of fine British steamships—the cream of the trans-Atlantic fleet—he stirred our good friend, John Bull, to his very marrow. To save the one remaining British trans-Atlantic line of consequence from the devouring clutches of this ambitious American Great Britain came to the support of the Cunard Line. Years before "the blue ribbon of the Atlantic," the palm for speed, had passed from the British to their German rivals, and it was a sore point with Great Britain that she had been compelled to lower her standard on the Atlantic to her younger and more successful rival. So it was agreed by the British Government to loan to the Cunard Line, a British steamship line that has been receiving mail pay from the British treasury for nearly seventy years, the large sum of $13,000,000 for a period of twenty years at 2½ per cent interest. It did not matter that a year or so later, when Great Britain came to sell her bonds, that she was compelled to pay for the use of the money that she had loaned to the Cunard Line 3½ per cent. In other words, Great Britain had to pocket a loss of one-half of 1 per cent for twenty years on $13,000,000.

She wanted swift British mail liners, which had to be the largest and swiftest steamers afloat, and Great Britain was willing to pay the cost. But it did not end at that. Great Britain further stipulated that as these huge, swift "greyhounds of the sea" would be useful for auxiliary naval purposes, she was willing to pay their owners for their possible use in time of war. So she agreed to pay the line a matter of $750,000 a year for twenty years for the naval uses that the ships might in an emergency be needed. Some people would call that a subsidy, but the proper phrase is admiralty subvention. But Great Britain was not disposed to stop with paying these Cunard owners for the possible naval uses that their ships might be required to perform. In addition, she agreed to pay these ships a matter of $340,000 a year for twenty years for carrying the mails.

It is nothing to Great Britain that she pays out several millions of dollars more every year for the carriage of the British mails than she receives from the postal revenues of her foreign mails. The act is regarded broadly by our British cousins, and they count the money well spent when the mails are delivered regularly, swiftly, and frequently, and incidentally the trade of Great Britain is built up. At the same time auxiliaries for her naval needs are brought into existence and kept in constant state of readiness for use.

The same is true of Germany, France, Norway, Holland, Spain, Italy, Austria, Russia, and Japan. They all make liberal payments to the steamships that are built in their countries for the carriage of their mails to distant countries. The countries know that they are making necessary, just, and fair payments for the carriage of the mails, and no one terrorizes them with the fear of the meaning of the word "subsidy." The only country in which the word "subsidy" has become a bogy man is in the United States, but we ought to be large enough now not to be needlessly scared at any word, however ill-favored it may appear or however sinister may be its suggestion.

I neglected to state that when Great Britain provided all of those loans and admiralty subventions and mail payments for the two great Cunard ships she stipulated that the ships must be built in the United Kingdom. That was a very wise provision, since she wanted her own people to build the ships, and thereby she provided for their employment.

Returning to the pending bill. Who stops to think that it is an amendment to a bill passed by Congress sixteen years ago? Who recalls the terms of the act of March 3, 1891, known as the "ship-subsidy bill" of that time, called the "ocean mail act" at the present time? The fact is that it gave an impetus to the building of steam vessels in this country that we had not known for a quarter of a century. Our steam shipping in the foreign trade had actually declined between 1866 and 1890. But since the passage of the act of March 3, 1891, payments for the carriage of our mails aggregating $1,500,000 a year are made to five different American lines running to different parts of the world.

The advent of our mail-carrying steamships cut freight rates in two so many times that it wasn't thought anything to send our products across the ocean. Since the "ocean mail act of 1891" went into effect we have trebled our steam shipping in foreign trade. This result of the last sixteen years would lead us to believe that the legislation of 1891 to encourage shipping was a great success.

Then again this country has a surplus of over $3,000,000 a year from its sea postage. We have that sum in the Treasury with which to pay for the ocean carriage of our mails, and before this bill takes a dollar out of the Treasury the surplus sea postage collected by our Government in eight years will have exceeded $20,000,000. Besides, the annual revenue from sea postage will suffice for all the payments required under this bill. The mails that our steamships will carry will themselves supply the revenue for their transportation. And this is the bogy man of a ship-subsidy bill. This mild, economical, necessary, and useful mail-carrying bill—this subsidy, if you like.

I believe in protecting our merchant shipping on the seas in free trade competition with foreign shipping, with so-called "subsidized foreign shipping," with foreign ships being liberally paid by their governments for the carriage of their mails. But this bill is not a protective shipping bill. It is a purely mail-carrying act and nothing else, except that it contains the wise provision for the establishment of a needed naval reserve of not exceeding 10,000 men.

We need five or six million tons of American ships before we can do the great bulk of our own foreign carrying, as I believe we ought to do, but this bill, which will bring into existence a couple of hundred thousand tons of swift American steamships, will not be a drop in the bucket as compared with our real need of an American merchant marine. Whether this bill passes or fails to pass, the problem of upbuilding our shipping in the foreign trade will still be unsolved; it will be as acute as ever; the necessity of protecting our ships that are in free-trade competition with foreign ships will be as great, if not greater, than ever. But I again repeat this is not protection. It is fair and just pay for carrying the United States mails on American steamships to distant foreign countries.

The Postmaster-General tells us that we need this bill; the Secretary of State pleads for it; the President in special message has asked for its passage. I say let us pass this bill, and let it be understood that it is nothing but a mail-line bill, that it is neither subsidy nor protection for American shipping in the foreign trade. Protection denied by a House of Representatives overwhelmingly composed of protectionists will evidently have to be deferred until some future time. American protectionists seem at this time to be unwilling to extend protection to our cargo ships upon the seas. Why they are unwilling I can not understand. But I urge my colleagues to join with me in the passage of this mail-line bill for the advantage which even this bill will confer upon the American nation. [Applause.]

Mr. GOULDEN. Mr. Chairman, I now yield to the gentleman from North Dakota [Mr. GRONNA].

Mr. GRONNA. Mr. Chairman, I certainly feel that I should not at this late hour attempt to make any extended remarks. But the question before us is of such great importance that I feel it my duty to submit some facts and figures which I believe this honorable body should consider. The question has been raised and the statement has been made that this is a party measure. To this I do not agree, but deny. Were it so, Mr. Chairman, I should indeed hesitate before opposing this measure. As a new Member of this House, and one who has watched the proceedings as carefully as I possibly could have done, I will say that I think too much of the leaders on the Republican side to vote against a measure which, in my opinion, would be against the policies of my own party. The gentleman from Wisconsin [Mr. MINOR] and the gentleman from Washington [Mr. HUMPHREY] paid considerable attention to the fact that the merchant marine of the United States in 1861 had two-thirds of the business at that time, and that the business we now have is only about 8 per cent. I do not believe, Mr. Chairman, that if you take the volume of business as a whole and figuring on a percentage that there will be a percentage of 75 per cent to 8 per cent. I shall submit to you some figures and give as briefly as I possibly can my opinion and my understanding—give you my views and an analysis of the situation as I see it.

I will admit, Mr. Chairman, that what benefits certain localities of the United States benefits us all; but I will not admit that when that benefit is given to a few individuals it benefits the entire people of the United States. The gentleman from Massachusetts [Mr. GREENE], who just took his seat, tried to make a comparison between the rural route service and that service which you are now trying to establish or extend. I leave it to the Members of the House to decide whether that has any merit or not. You propose in this bill to give to seven

steamship lines $3,750,000 annually for ten years. It is true that we expended nearly $25,000,000 in 1906 for rural service, but this was paid to 35,666 people for actual service performed and at the lowest rate paid to any person in the Government employ. There has been an economic revolution in the art and science of agriculture, and as a result crops beyond comprehension have been produced by the American people, by the American farmer, so that there is now a congestion by the railroads, and has been for some considerable time. Just think of it! This last year alone we produced 4,688,000,000 bushels of cereals. I am surprised that a comparison should be made, or that reference should be made, to the rural route service in connection with this proposition. For the producer is the one who keeps both the common carrier and the manufacturer busy.

Now, the railroads and transportation companies have been unable to take care of this business; but, Mr. Chairman, do we come to Congress and ask for a subsidy to do the business in our own land? There was a time, Mr. Chairman, that Congress was asked to pay large sums of money to these railroads, which have been built up to such an extent that they now own practically one-seventh of the entire wealth of this nation. They have been built up at the expense of the people of this country. Now you are making the same cry for the steamship companies, and so far as I am personally concerned, if I thought that it would benefit the people of the United States, I should not oppose the measure; but I have not heard a single argument on this floor convincing me that the entire people of the United States will be benefited by the passage of this bill. What do you propose to do? To establish seven steamship lines and subsidize them—pay tribute to them. What does this mean? It means that those who have a sufficient amount of money—a large amount of money—will build these ships, and they will crush out the little fellows; and there will be no competition in the future. A paying out of nearly $40,000,000 of the people's money to eliminate competition. To my mind that is exactly what it means. We had a measure before this House, and which is upon the Calendar now, to obtain a loan of $1,000,000 for the drainage of the Red River Valley, a valley in the State of North Dakota and a part of what is known as the "bread-basket of the world," unequaled in productiveness in the United States. This is a proposition which would benefit a great number of people, a proposition that would not be in the interests of the few, but which would benefit all of the people living in that community, and it would be something that would last for all time to come. We do not ask it as a subsidy; we ask it merely as a loan, agreeing to return the Government every dollar of this money; but we wanted some strong arm to put the measure through so that this work could be done. However, we are denied even the privilege of calling the bill up, thereby preventing an intelligent discussion of the meritorious measure.

Following are the exports and imports of the United States, as shown by the Statistical Abstract and the Bulletin of Commerce and Finance for June, 1906, for ten years preceding June 30, 1906:

| | |
|---|---|
| Imports: | |
| 1897 | $764,000,000 |
| 1898 | 616,000,000 |
| 1899 | 697,000,000 |
| 1900 | 849,000,000 |
| 1901 | 823,000,000 |
| 1902 | 903,000,000 |
| 1903 | 1,025,000,000 |
| 1904 | 991,000,000 |
| 1905 | 1,117,000,000 |
| 1906 | 1,226,000,000 |
| Exports: | |
| 1897 | 1,051,000,000 |
| 1898 | 1,231,000,000 |
| 1899 | 1,227,000,000 |
| 1900 | 1,394,000,000 |
| 1901 | 1,487,000,000 |
| 1902 | 1,381,000,000 |
| 1903 | 1,420,000,000 |
| 1904 | 1,460,000,000 |
| 1905 | 1,518,000,000 |
| 1906 | 1,743,000,000 |
| Excess of exports over imports: | |
| 1897 | 286,000,000 |
| 1898 | 615,000,000 |
| 1899 | 529,000,000 |
| 1900 | 544,000,000 |
| 1901 | 664,000,000 |
| 1902 | 478,000,000 |
| 1903 | 394,000,000 |
| 1904 | 469,000,000 |
| 1905 | 401,000,000 |
| 1906 | 517,000,000 |

The total foreign trade of the United States in 1906 (exports and imports) was nearly $3,000,000,000—all built up by the exporters and importers of the country without subsidy or subvention. Neither the farmers that raise the largest part of the exports nor the exporters who sell the goods to foreign lands have any interest in the sentimental question of who carries the goods. All that the farmer or exporter cares about is a market and cheap transportation. If foreigners are willing to carry our goods cheaper than the American shipowners, the farmer and exporter are content that they should have the trade. The farmer and exporter, unaided by Government, have found a market for nearly $2,000,000,000 of exports. They have gained for our country a grand foreign trade, to which the American shipowner and shipbuilder have contributed nothing whatever. They have been idle for years, while foreigners have been busy building their transportation lines to enter and carry our trade. To tax the farmer and exporter now in order to subsidize American shipping is unfair and unjust. Even then, it is by no means certain that the American shipowners will carry American goods as cheaply as the foreign shipping masters.

COST OF FOREIGN MAILS.

From the report of the Superintendent of Foreign Mails for the year ended June 30, 1906, it appears that the following amounts were paid out for carrying ocean mails last year:

| | |
|---|---|
| For trans-Atlantic service | $1,443,908 |
| For trans-Pacific service | 447,247 |
| For miscellaneous service | 659,122 |
| Total | 2,550,277 |

Besides these amounts a number of smaller items—as $42,976 to Panama Railroad Company, $39,000 special steamboat service at New York, and others—brought the grand total of cost for foreign mail service last year to $2,965,624. Of this amount, about $1,500,000 was paid to subsidized American steamship lines under the law of 1891, as follows:

| | |
|---|---|
| Trans-Atlantic service | $762,638 |
| Trans-Pacific service | 292,065 |
| Miscellaneous service | 427,012 |

EXCESS OF SUBSIDY COST.

The Superintendent of Foreign Mails calculates the excess of cost under the contract or subsidy service over regular ocean rates for the year 1906 at $393,559. Why the people should pay this enormous amount over and above regular postal rates is not easily answered. But this is not the worst of it. Regular sea and inland postal rates are about four times what the Government pays foreign steamship lines. Steamers of United States register not subsidized are paid at the rate of $1.60 per pound for letters and post cards and 8 cents a pound for other articles. Steamers of foreign register are paid 44 cents a pound for letters and post cards and 4½ cents for other articles. The calculation which gave the subsidy excess at $393,559 was made on the basis of $1.60 for steamships of American register not subsidized. Had foreign ships been given the mail matter at 44 cents a pound the amount paid out would not have been much more than $400,000. Subsidy as we now have it costs us nearly $1,000,000 more than it would cost were the mails carried by foreign steamships.

We paid $114,774 to the subsidized steamships for carrying the mails to Port Antonio. Regular sea and inland postage was but $10,864, an excess by reason of subsidy of $103,909, as calculated by the superintendent of foreign mails. Subsidy received $72,398 for mails to Habana, which at regular rates amounted to $2,661, a pure gift to the steamship line of $69,736, as calculated by the superintendent of foreign mails. Eighty-two thousand four hundred and thirty-seven dollars' worth of mail at regular rates to New South Wales cost us $249,885, or three times what it was worth. One thousand and twenty-seven dollars' worth of mail to Tahiti cost us $42,180, or a subsidy grab of forty-two times what the service was worth. These are some of the features of subsidy as we now have it, and it is unwise, in my opinion, to extend it further.

RECEIPTS FOR FOREIGN MAILS.

This is an interesting phase of the question, but unfortunately nothing definite can be said of it. The superintendent of foreign mails estimates that $6,000,000 were taken in from foreign mail service, excluding Canada and Mexico. He says that it is impossible to calculate how much of this should go to the inland postal account for transporting the mails between exchange post-offices to United States post-offices at which they were mailed or delivered. He is certain, however, that after making every allowance for this charge the postage collected by the United States largely exceeds the gross expense incurred by the Department in connection with mails exchanged with foreign countries.

Were there no subsidies the excess would be still greater and would aid materially toward wiping out the annual deficit of

postal revenues. Simply because the foreign mail service more than pays its way is no reason for giving what is made to a lot of greedy shipowners as an annual subsidy. We are willing to pay generously for an actual service, but we are unwilling to pay anything for mere sentiment or to swell the profits of corporations who have not contributed one iota to our foreign trade.

WAGES PAID TO SHIPPING LABOR.

From the bulletin of the Bureau of Labor for July, 1906, it appears that the following wages were paid labor in 1905 in the shipbuilding industry:

| | Cents per hour. |
|---|---|
| Blacksmiths: | |
| California | 35 |
| Delaware | 25 |
| Maine | 26 |
| Maryland | 25 |
| Massachusetts | 30 |
| New Jersey | 33 |
| New York | 34 |
| Pennsylvania | 28 |
| Boiler makers: | |
| California | 36 |
| Delaware | 25 |
| Maryland | 26 |
| New Jersey | 36 |
| Pennsylvania | 24 |
| Calkers, iron: | |
| New York | 30 |
| Pennsylvania | 26 |
| Calkers, wood: | |
| Maine | 29 |
| Maryland | 27 |
| Massachusetts | 38 |
| New Jersey | 38 |
| New York | 32 |
| Carpenters: | |
| California | 37 |
| Delaware | 27 |
| Maine | 24 |
| Maryland | 29 |
| Massachusetts | 32 |
| New York | 30 |
| Pennsylvania | 29 |

Drillers were paid from 15 to 23 cents; fitters from 23 to 30 cents; joiners, 25 to 37 cents; laborers, 13 to 21 cents; machinists, 25 to 33 cents; painters, 24 to 29 cents; riggers, 18 to 32 cents, and riveters, 22 to 34 cents.

Carpenters in the building trades are paid from 31 to 55 cents an hour, much higher than in the shipbuilding industry. Painters in the building trades get from 31 to 45 cents, and the same proportions hold for the other positions. Labor in the shipbuilding industry is not paid as well as in iron and steel, the building trades, and others.

*Comparative table of British and American sailors' wages.*

| | Per month. |
|---|---|
| On sail vessels: | |
| Able seamen | $18 to $30 |
| Boatswains | 23 to 28 |
| Carpenters | 35 to 50 |
| First mates | 40 to 55 |
| Second mates | 30 to 40 |
| On steam vessels: | |
| Able seamen | 25 to 30 |
| Boatswains | 30 to 35 |
| Carpenters | 30 to 60 |
| First mates | 60 to 120 |
| Second mates | 40 to 70 |
| Firemen | 30 to 45 |
| Trimmers | 25 to 40 |
| First engineers | 100 to 150 |
| Second engineers | 75 to 90 |

These figures are from the Report of the Bureau of Navigation for 1903, page 66.

| British sailors' wages on sail vessels: | Per month. |
|---|---|
| Able seamen | $12 to $15 |
| First mates | 27 to 43 |
| Second mates | 21 to 72 |
| Boatswains | 19 to 43 |
| Carpenters | 25 to 30 |
| On steam vessels: | |
| Able seamen | 19 to 38 |
| Boatswains | 19 to 43 |
| Carpenters | 24 to 43 |
| First mates | 38 to 92 |
| Second mates | 24 to 75 |
| Firemen | 19 to 24 |
| Trimmers | 17 to 20 |
| First engineers | 56 to 170 |
| Second engineers | 36 to 100 |
| Third engineers | 30 to 85 |

Above figures taken from Report of Bureau of Navigation of 1903, page 94.

From all this it appears that for the skilled labor of engineers English wages are higher than in the United States. Officers get a trifle more in America than in England, but not from 50 to 100 per cent more, as subsidy advocates claim. The English service is the best in the world; the sailors are a high body of men and are well paid. A fair estimate can not be made, as different ports have different scales, but the difference will never be more than 20 per cent on an economically administered scheme. To get a subsidy, however, it is necessary to make the difference as great as possible—a difference far greater than the facts will justify. When it is known that the British pay a subsidy of but $45,000 per annum for 20-knot ships, the folly of paying American ships of from 14 to 16 knots per hour an annual subsidy of from $300,000 to $800,000 becomes apparent. There is no such difference in cost of ships or in sailors' wages.

SUBSIDY EXCESSIVE.

The following table, taken from the report of an English committee headed by Lord Camperdown, and printed in the Report of the American Commissioner of Navigation for 1903, page 267, shows what Great Britain pays for mail service on vessels having a speed of 20 knots or more:

| Speed. | Engine power. | Annual subsidy. |
|---|---|---|
| | *Horsepower.* | |
| 20 knots | 19,000 | $45,000 |
| 21 knots | 22,000 | 97,500 |
| 22 knots | 25,000 | 202,500 |
| 23 knots | 30,000 | 337,500 |
| 24 knots | 40,000 | 552,500 |
| 25 knots | 52,000 | 990,000 |
| 26 knots | 68,000 | 1,020,000 |

The English idea is fast service, and in demanding this England agrees to pay the extra cost for making the speed over and above demanded for ordinary mercantile purposes. You will observe that every additional knot in speed is only gained at a most rapidly increasing scale of cost. England pays 20-knot ships an annual subsidy of $45,000 a mile. Grant that labor costs us more and that the first cost of the ship is greater. The ship, according to the Report of the American Merchant Marine Commission of 1904, costs from 30 to 40 per cent more made in the United States than in England, and labor is from 20 to 30 per cent higher, making 50 per cent difference possibly for all contingencies. The American subsidy, then, for a 20-knot ship would be less than $70,000 for each year's service.

This bill calls for no speed greater than 16 knots, and the average is about 15 knots, and it carries from $300,000 to $800,000 per annum. If England can get 20-knot ships for $45,000 per annum the United States should certainly get 14-knot vessels for $45,000, and a payment of from $300,000 to $800,000 is the height of extravagance. It is criminally excessive, absolutely unnecessary, and without justification on any rational grounds. I shall vote against it and be proud of the vote. The farmers of the United States create more than half of the wealth of the whole country and are not interested in any kind of subsidy legislation. Their burdens are already great enough without giving the shipping industry a gratuity to carry their products. The subsidy does not help the farmer, as he is now getting a cheaper carriage than American shipowners will give him. The farmers of North Dakota are less interested in subsidy than in other questions and are opposed to all such legislation. They are especially opposed to the exorbitant, excessive, and unjustifiable rates proposed by this bill as mail subsidy, and they can see no reason for paying even an American shipowner from three to ten times what the service is worth—from three to ten times what the service can be easily obtained for in the open markets of the world.

We welcome the day when our merchant marine shall again have 75 per cent of the ocean trade; when the American ships under the American flag shall have regained their power and rule the seas as they did before any subsidy was granted them.

MAIL PAY UPON TONNAGE BASIS.

The gentleman from Michigan [Mr. FORDNEY] has been taken to task upon this floor for stating that the postal subsidy now paid to the Oceanic Steamship Company, the Spreckels line, is in excess of the entire wages of the crews upon the ships drawing this subsidy. His statement was well within the facts. I have looked up this matter from several standpoints and I will prove the correctness of the statements of the gentleman from Michigan from another standpoint than that upon which his information was correctly based. One of the common methods of calculating the wages of crews is upon the amount of cost of running the ship based upon its gross tonnage.

I will quote several statements upon this basis regarding officers' and seamen's wages from the Commissioner of Navigation. In his report for 1899, page 55, he shows that the wages per month for the steamship *Cherokee*, 2,557 gross tons, carrying thirty-two men in all, were $1,385, which is 54 cents a gross ton.

In his report for 1900, page 37, he showed that the wages per month for the steamship *Pleiades*, 3,700 gross tons, carrying

5,300 tons of cargo, twenty-six men in all, were $1,215, or 33 cents a gross ton.

In his report for 1901, page 39, he shows that the wages per month of the steamship *St. Louis* (one of the largest ships of the International Mercantile Marine Company, which gets three-quarters of a million subsidy for carrying the mails to England), 11,000 gross tons, 380 men in all, were $11,306, or $1 a gross ton.

The commissioner states on page 39 of this report that the pay roll of the year will, as a rule, be equivalent to about nine months' wages.

On page 42 of the report of the Commissioner of Navigation for 1902 is given the pay roll of six steamships engaged in Pacific commerce as follows:

The Oceanic Line—the line referred to by the gentleman from Michigan [Mr. FORDNEY]—has three ships which carry the mails to and from the Australasian colonies: The *Sonoma*, 6,253 gross tons; the *Ventura*, 6,253 gross tons; the *Servia*, 5,989 gross tons.

Each of these is a 17-knot ship. The amount received by the Oceanic Line for the fiscal year ending June 30, 1906, for carrying the mails to and from the Australasian colonies was $249,885.

This company also received $42,180 during the fiscal year ending June 30, 1906, for carrying a very small amount of mail, as previously stated, to Tahiti.

Calculation like that employed by the Commissioner of Navigation in the instances above cited shows that if the crews of these ships were employed and paid for full twelve months' service, this amount of subsidy that they have received would equal $1.12 a gross ton per month for all the wages of their officers and men. This shows $1.12 a gross ton paid in subsidy for these small vessels against a cost of $1 a gross ton, as calculated by the Commissioner of Navigation, upon a basis of nine months' service in the year for the big steamship *St. Louis*, a vessel of 20-knot speed and nearly twice as large as any of the steamers on the Oceanic Line. In other words, if the Oceanic Line was to pay its crews for full twelve months' service, the sum it already receives from the Government would enable it to pay 12 per cent higher wages than were paid the crew of the *St. Louis*. And, as a matter of fact, for the fiscal year ending June 30, 1906, the number of trips actually made by the Oceanic Line would reduce the wage period even below the nine months estimated by the Commissioner of Navigation for the *St. Louis*. If, then, the pay roll for the year be considered equivalent to about nine months' wages, the sum received by the Oceanic Line from the United States Government would allow that line to pay 50 per cent higher wages than was paid on the *St. Louis*.

How absurd, then, is the proposition contained in this bill to give this line an additional $200,000 subsidy.

RAILROAD SUBSIDIES.

In the olden days we subsidized the railroads of the country by giving them large parts of the public domain. More than 100,000,000 acres of choice lands were given them, which yielded them from $250,000,000 to $1,000,000,000. Besides this, the Government guaranteed the principal and interest of the Pacific railroads, amounting to more than $65,000,000. What was the result? The railroads became great. They rolled in wealth and began to fleece the people in all manner of ways. They acted as though they owned the country and defied its regulating power.

The shipbuilding industry now asks the same kind of aid and will, in all probability, take the same course.

There are 213,932 miles in railway track in the country, with the commercial value of $11,244,000,000, according to the report made in Senate Document No. 178, second session of the Fifty-eighth Congress. This value was based on the market value of the stocks and bonds of the corporations, and agrees in the main with the value fixed by the Bulletin No. 21 of the Census Bureau. The railroads own between one-seventh and one-ninth of all the wealth of the country. These railroads have gone into public affairs to control public legislation. They have gained large influence over our local public officials and have thereby escaped taxation. The taxed value of their property is less than one-fifth of the market value of their holdings. In Idaho they pay taxes on a valuation which is but 11 per cent of the market value; in Nebraska, 19.5 per cent; in Oklahoma, 15.2 per cent; in Washington, 14.3 per cent; in North Dakota, 18 per cent; in Colorado, 35 per cent; in New York, 25.6 per cent, and in Iowa, 16 per cent. All these figures are carefully worked out in Census Bulletin No. 21, and show the danger of building up great corporations through subsidies and subventions to fatten from the spoils of purchased legislation and a system of rebates and discriminations so iniquitous as to be a stench in the nostrils of the people.

The following table from Bulletin No. 21 shows the commercial and taxed value of the railroads, and is especially worthy of study at this time:

| State or Territory. | Commercial value. | Assessed for taxation. | Ratio of assessment to commercial value. |
|---|---|---|---|
| | | | *Per cent.* |
| United States | $11,244,852,000 | | |
| Alabama | 150,211,000 | $53,926,026 | 35.9 |
| Arkansas | 124,626,000 | 34,709,623 | 27.8 |
| California | 350,694,000 | 92,378,550 | 26.3 |
| Colorado | 198,261,000 | 49,492,135 | 25.0 |
| Connecticut | 105,369,000 | 120,493,648 | 114.4 |
| Delaware | 17,285,000 | | |
| Florida | 80,467,000 | 21,817,478 | 27.1 |
| Georgia | 156,603,000 | 63,105,810 | 40.3 |
| Idaho | 91,877,000 | 10,115,378 | 11.0 |
| Illinois | 805,057,000 | 425,709,055 | 63.8 |
| Indiana | 375,541,000 | 165,863,267 | 44.2 |
| Iowa | 344,847,000 | 57,535,160 | 16.7 |
| Kansas | 356,356,000 | 60,093,534 | 16.9 |
| Kentucky | 155,772,000 | 77,658,040 | 49.9 |
| Louisiana | 123,401,000 | 29,044,195 | 28.9 |
| Maine | 80,146,000 | | |
| Maryland | 132,342,000 | | |
| Massachusetts | 250,052,000 | | |
| Michigan | 277,597,000 | 196,795,000 | 70.9 |
| Minnesota | 466,734,000 | | |
| Mississippi | 107,884,000 | 29,847,640 | 27.7 |
| Missouri | 309,768,000 | 97,916,869 | 31.6 |
| Montana | 196,209,000 | 36,759,827 | 18.7 |
| Nebraska | 263,170,000 | 46,082,853 | 18.5 |
| Nevada | 43,745,000 | 13,778,049 | 31.5 |
| New Hampshire | 79,786,000 | 22,625,000 | 28.3 |
| New Jersey | 333,568,000 | 231,655,525 | 69.5 |
| New York | 898,222,000 | 229,582,064 | 25.6 |
| North Carolina | 113,146,000 | 69,480,974 | 61.4 |
| North Dakota | 123,390,000 | 22,160,304 | 18.0 |
| Ohio | 689,797,000 | 133,858,945 | 19.4 |
| Oregon | 75,661,000 | | |
| Pennsylvania | 1,420,608,000 | | |
| Rhode Island | 25,719,000 | 15,832,003 | 61.6 |
| South Carolina | 75,500,000 | 29,467,716 | 39.0 |
| South Dakota | 49,646,000 | 14,354,930 | 28.9 |
| Tennessee | 131,166,000 | 58,536,566 | 46.6 |
| Texas | 237,718,000 | 95,209,785 | 40.0 |
| Utah | 90,325,000 | 20,682,461 | 22.9 |
| Vermont | 37,311,000 | 27,344,020 | 73.3 |
| Virginia | 221,315,000 | 63,269,623 | 37.7 |
| Washington | 182,837,000 | 26,066,949 | 14.3 |
| West Virginia | 201,799,000 | 28,771,358 | 14.2 |
| Wisconsin | 284,510,000 | 218,024,900 | 76.6 |
| Wyoming | 100,307,000 | 7,498,232 | 7.5 |
| Alaska | 100,000 | | |
| Arizona | 68,356,000 | 6,667,349 | 9.7 |
| District of Columbia | 5,578,000 | 2,486,024 | 44.6 |
| Indian Territory | 79,405,000 | | |
| New Mexico | 86,400,000 | 8,511,538 | 9.9 |
| Oklahoma | 78,668,000 | 11,936,317 | 15.2 |

It was estimated by the Department that the increased cost for the conveyance of foreign mails from 1893 to 1906 was more than $4,000,000. We have given to seven steamship lines $1,475,138 annually for fifteen years, or more than $22,000,000, and about $8,000,000 more than Mr. Wanamaker estimated. Still you say that our merchant marine has gone to decay for lack of a subsidy.

You propose under this bill to establish a mail service to South America, Australasia, and the Orient; one from the Atlantic coast to Brazil; one from the Atlantic coast to Argentina; one from the Gulf coast to the Isthmus of Panama; one from the Pacific coast to the Isthmus of Panama, Peru, and Chile; one from the Pacific coast to Samoa, New Zealand, and Australasia, and one from the Pacific coast, via Hawaii, to Japan, China, and the Philippines, at a cost of $3,750,000 annually. The seven lines proposed and their compensation are as follows:

| | Monthly service. | Fortnightly service. |
|---|---|---|
| Atlantic coast to Brazil, 16-knot steamers | $300,000 | $600,000 |
| Atlantic coast to Argentina, 16-knot steamers | 400,000 | 800,000 |
| Gulf coast to Isthmus of Panama, 14-knot steamers | [a] 75,000 | [a] 150,000 |
| Pacific coast to Isthmus of Panama, Peru, and Chile, 16-knot steamers | 300,000 | 600,000 |
| Pacific coast, via Hawaii, to Japan, China, and the Philippines, 16-knot steamers | 350,000 | 700,000 |
| North Pacific coast to Japan, China, and the Philippines, 16-knot steamers | 350,000 | 700,000 |
| Pacific coast to Samoa and Australia, 16-knot steamers | [b] | [c] 200,000 |
| | 1,775,000 | 3,750,000 |

[a] Fortnightly and weekly.
[b] Once in three weeks.
[c] In addition to present compensation of $283,000.

Under the act of March 3, 1891, John Wanamaker, in 1892, contracted with eleven steamship lines. The following is a list which have received a subsidy:

| Beginning of contract. | Termini of routes. | Number of trips. | Period of contract. |
|---|---|---|---|
| Apr. 26, 1893 | Galveston to La Guayra | 3 times a month. | 5 years. |
| Mar. 1, 1892 | New York to La Guayra | ....do | 10 years. |
| Feb. 1, 1892 | New York to Colon | Weekly | Do. |
| Do | San Francisco to Panama | ....do | Do. |
| Do | San Francisco to Hongkong | Biweekly | Do. |
| Oct. 12, 1895 | New York to Southampton | Weekly | Do. |
| Do | New York to Antwerp | ....do | Do. |
| Dec. 10, 1892 | New York to Buenos Ayres | ....do | 5 years. |
| Dec. 1, 1892 | New York to Rio | Monthly | Do. |
| Nov. 1, 1892 | New York to Tuxpan, Mexico | Weekly | Do. |
| Do | New York to Habana | ....do | Do. |

Mr. Chairman, we find that three of these lines, viz, San Francisco to Panama, San Francisco to Hongkong, and New York to Rio went out of business inside of one year. As to the remaining eight lines, we have information as to their value to the Government. Postmaster-General Bissell, in his report for 1893, said:

I am unable to ascertain that any positive advantages have accrued from either a mail or a commercial point of view by reason of the contracts thus far placed in operation by the act of March 3, 1891.

I believe the ocean mail service contract routes on which service is now being actually performed were in existence and were having performed on them the same service before the change in compensation took place, and it is probable that had the Department not executed contracts the steamship companies would still have found it desirable to continue their operation as at present. The gains in the expedition of the mails have not been material, and the advantages to be derived from the Government's control of the ships, other than first-class ships, do not seem to be sufficient to outweigh the additional cost involved and which becomes directly chargeable to the revenues of the Post-Office Department.

The route to La Guaira has been abandoned, and we have the following mail service left: Routes Nos. 36 and 37, to Puerto Cabello and Maracaibo; route No. 57, New York to Southampton; route No. 69, New York to Tuxpan; route No. 70, New York to Habana; route No. 75, San Francisco to Australia, and route No. 76, San Francisco to Tahiti.

The subsidy of $4 per mile to route No. 57, New York to Southampton (fifty-three trips of 3,641 miles each, or 192,973 statute miles), is a gratuity pure and simple of $771,892 per annum, or $9,262,604 for twelve years of the contract's existence.

The friends of this measure say it is not new legislation, but only an extension of the service we now have. They also say that the deplorable decay and humiliating conditions of our merchant marine is due to the fact that the steamship companies have been kept out of the public Treasury, when, as a matter of fact, millions of dollars have been paid to them in gratuities, and still they have made a failure, an absolute failure. According to the statements of the friends of the bill, they have not restored the trade which we had some fifty years ago, when our merchant marine, in the day of its glory, "ruled the seas." That was a time when the steamship lines were not subsidized at all. [Applause.]

BETTER TO PLANT TREES THAN TO BUILD SHIPS.

We can have the mails carried more cheaply than this bill provides for, and the money so demanded can be employed to better purpose in many ways. It can be a thousand times better employed in the improvement of our forest reserves. There is a great and righteous demand for forestry legislation. Twelve great States, through their governors or through their legislatures or through other agencies, have petitioned Congress for large appropriations for forest reserves. The Secretary of Agriculture has repeatedly called attention to it in his annual reports. Two Presidents of the United States have indorsed it, and President Roosevelt, in many public utterances, has strongly urged legislative appropriations for the preservation and creation of forests.

We can use the money to better advantage than that of subsidizing these steamships. We can use any surplus available in the way of forestry and tree culture. Forestry, tree culture, and irrigation have been carried on in the West for some time, but have been at the expense of the West. We have not asked for an appropriation, nor do we ask for one now.

The great work being done by the Chief Forester of that Bureau, Mr. Pinchot, will be appreciated for generations to come. The national policy of forest preservation should extend not only to the Rocky Mountains, but also to the White Mountains and the southern regions of the Appalachian Mountains. We should encourage not only forestry, but also tree culture. A great deal of interest is manifested in protecting the shipowners. It requires timber to build ships. It is infinitely of greater importance to encourage tree culture and to protect our forests, which in so many respects are indispensable and of the greatest value to mankind. Russia, a country which, it has been said, is far behind the times, years and years ago established a national policy of forestry, with the result that now the valley of the Black Sea is like unto the Garden of Eden.

From the Baltimore News of January 5, 1907, the following is pertinent as indicating what has been done in France for the forestry of that Republic:

The work of reforesting the denuded mountains in that country was begun in 1860. By 1900 France had spent over $15,000,000 and had acquired over 400,000 acres of land, while the annual expenditures were still going on at the rate of over $600,000 a year. It is estimated that the expenditure of over $20,000,000 more will be required to complete the work as now planned, and at least one-fourth of the area must be unproductive for many years. But if the proposed reserves in this country are acquired now they can be made to pay their way from the start. The outlay proposed by the bill is only $3,000,000. Merely as a productive investment the money could not be better spent. The total income of the forest reserves of the United States in 1905 was about $500,000—a remarkable showing in view of the fact that the Forest Service has only recently undertaken to exploit the commercial resources of the timber lands under its control. In Europe forestry has become an important source of public revenue. The Swiss forests yield a net return to the Government of $8 an acre a year.

The possibilities of our national forest reserve system would stagger the imagination of France and of all Europe. They are absolutely colossal. Our Forestry Bureau has now under actual, practical administration 127,000,000 acres. Through all this vast system runs police patrol by a small army of forest rangers. In watching after fires, in protecting the reserves from spoliation, in the many duties incident to this system of forest policing a great many more rangers than are now provided are needed. In supplying these rangers, in supplying all the aids and facilities necessary for preserving and building up our great forestry system there is room for the wise expenditure of funds such as under the terms of this bill are absolutely donated to private uses. The glory of this Forestry Service is that it is not and can not be for the benefit of special interests, but that it is and must be for the benefit of the whole people.

The Secretary of Agriculture, in an official letter to the Chief Forester, dated February 1, 1905, set forth so clearly the administrative policy under which the forest reserves are managed that I will insert it here for the information of this House and the country.

In the administration of the forest reserves it must be clearly borne in mind that all land is to be devoted to its most productive use for the permanent good of the whole people, and not for the temporary benefit of individuals or companies. All the resources of forest reserves are for *use*, and this use must be brought about in a thoroughly prompt and businesslike manner, under such restrictions only as will insure the permanence of these resources. The vital importance of forest reserves to the great industries of the Western States will be largely increased in the near future by the continued steady advance in settlement and development. The permanence of the resources of the reserves is therefore indispensable to continued prosperity, and the policy of this Department for their protection and use will invariably be guided by this fact, always bearing in mind that the *conservative use* of these resources in no way conflicts with their permanent value.

You will see to it that the water, wood, and forage of the reserves are conserved and wisely used for the benefit of the home builder first of all, upon whom depends the best permanent use of lands and resources alike. The continued prosperity of the agricultural, lumbering, mining, and live-stock interests is directly dependent upon a permanent and accessible supply of water, wood, and forage, as well as upon the present and future use of these resources under businesslike regulations, enforced with promptness, effectiveness, and common sense. In the management of each reserve local questions will be decided upon local grounds; the dominant industry will be considered first, but with as little restriction to minor industries as may be possible; sudden changes in industrial conditions will be avoided by gradual adjustment after due notice, and where conflicting interests must be reconciled the question will always be decided from the standpoint of the greatest good of the greatest number in the long run.

There is a distressing though enlightening contrast between this use of the great forest reserves for the greatest good to the greatest number and the donations of public funds, as provided in this ship-subsidy bill for the greatest profit to the fewest number.

The Chief Forester, in reply to recent criticisms of the forest-reserve system, has made the following statement, which is of further interest upon this great question:

National forests (formerly called forest reserves) are created with the main object of using all their resources in the wisest way. Everything is for use; the timber, the range, the water, the land. Only those lands chiefly valuable for the production of timber or the protection of the water flow are included in national forests. It happens that little patches of agricultural land, small mountain meadows, and very inconsiderable areas of open grazing land must necessarily fall within their boundaries, because it would be impossible to exclude them.

PASS TO HOME BUILDERS.

All such little tracts, where cultivation is possible, are being classified, and are passing to private ownership through the act of June 11, 1906, which is merely an extension of the homestead law to the national forests, within which every bit of agricultural land will eventually be made to support a home.

The miner is better off in a national forest than on the unreserved public domain. The mineral laws apply in precisely the same way. The prospector can explore and locate his claims without the slightest restriction, and in mining localities the timber is protected, kept in the country, and kept from burning up, for the particular benefit of the miner.

All timber and wood in the national forests is for use, and for prompt use. It is sold to the small man and to the big man. Everybody who needs timber to establish his home gets it free of charge, and gets it

when he asks for it. In the case of the national forests recently created, the settler will not have to wait until they are under administration. He may take what timber he needs for domestic use without asking.

NO CHANCE FOR MONOPOLY.

In the sale of timber there is no chance for monopoly, for the Secretary of Agriculture can sell as much or as little as he pleases, to whomever he pleases, and for whatever price he deems fair for the best interests of all the people.

The Government gets a fair return for its own timber, whereas before, under the timber and stone law, it practically gave it away, and gave it away in such a manner that it was monopolized in vast tracts by corporate interests. And after it was cut off the land was burned over and became a nonproductive waste.

In a national forest the lands are protected, wisely cut over, and kept productive forever.

As of further interest in this connection, I insert a table showing the cost of administration as officially reported for various countries, as follows:

| Year. | State. | Government forests. | Actual expenditure on management of State forests. | | Percentage of gross income expended. |
|---|---|---|---|---|---|
| | | | Total. | Per acre. | |
| | | *Acres.* | | | |
| 1898..... | Baden..... | 231,082 | $685,972 | $2.97 | 43 |
| 1895..... | Bavaria..... | 2,350,193 | 3,701,000 | 1.50 | 50 |
| 1899..... | Switzerland..... | 94,280 | 124,740 | 1.32 | ..... |
| 1895..... | Prussia..... | 6,846,733 | 8,408,000 | 1.23 | 50 |

AWAY WITH SPECIAL PRIVILEGES.

Mr. Chairman, away with ship subsidies and bounties and special gratuities of every sort for the benefit of the favored few. Let us employ the vast resources of the National Government in the building up of internal improvements, in the proper development of rivers and harbors; if you please, in the building of good roads, in the further preservation and development of our magnificent forest reserves—all for the benefit of the whole people of this great country. Then will the desert be made to blossom as the rose, then will trees flourish upon the now arid plains, then will prosperity cover the earth like the dew, then will the voice of the people go up in a hymn of thanks to God for the wisest Government of the greatest country on the face of the earth.

Let me read from the President's message, on page 30:

If it prove impracticable to enact a law for the encouragement of shipping generally, then at least provision should be made for better communication with South America, notably for fast mail lines to the chief South American ports. It is discreditable to us that our business people, for lack of direct communication in the shape of lines of steamers with South America, should in that great sister continent be at a disadvantage compared to the business people of Europe.

Now, as a business proposition, Mr. Chairman, that is the only thing that appeals to me, that if you want to establish one line from the Pacific and another from the Atlantic to the South American ports, that seems to me to be all that should be done as a business proposition. We have been charged that we are opposed to the Administration by opposing this bill. I want to say, Mr. Chairman, that so far as I am concerned I indorse the policy of this Administration—the policy regarding corporations and campaign contributions, injunctions, antilynching, capital and labor, eight-hour law, and the employers' liability law, investigations of disputes between capital and labor, a graduated inheritance tax, and a graduated income tax. They say that we want to reach the markets of the world. As a Republican I have been taught that the markets of the world should be in the United States. I believe that is a Republican doctrine. I am not in favor of this bill. I am not in favor of giving $40,000,000 as a subsidy to the steamship companies. I do not wish to array one class against another. We have the rich, and we will always have the poor, and I am for special privileges to none and charity for all.

Now, regarding our President, Mr. Roosevelt, permit me to say that the State of North Dakota is proud of him. He came to our State in 1884 and lived there until the year 1886. He was a resident and an officer of that State. He held the office of deputy sheriff in Billings County under Billy Jones. He came there not as a dude, but, in a blue shirt and slouch hat, he took up the life of a rancher. He is the first President which North Dakota has had, and I want to say to you that in 1908 North Dakota will be for Roosevelt because we believe in his policies, and we believe that he is the man who can best carry them out. [Applause.] We believe, Mr. Chairman, in the policies that have been inaugurated by this great President. I say now that North Dakota will send a delegation to the national convention that will urge the renomination of the man who recognizes the 90,000,000 of people and does not recognize merely a few millionaires in this country. We are for him because he has inaugurated the policies of reform in all of the Departments which we have. [Prolonged applause.]

Mr. GROSVENOR. Mr. Chairman, I yield to the gentleman from California [Mr. KAHN].

Mr. KAHN. Mr. Chairman, during the progress of this debate we have heard a great deal from the other side of this House about the iniquity of subsidy. Indeed, almost every gentleman on the Democratic side who has spoken has raised his voice in horror against this so-called "iniquity." And what has been the attitude of the gentlemen on that side of the Chamber respecting subsidy? Why, year after year on the floor of this House I have heard my good friends on the Democratic side of this Chamber vote the poor people's money into the pockets of the Southern Railroad. [Applause.] "Money," to use their favorite expression, "wrung from the pockets of the toiling farmers and the poor laboring people of these United States" and paid as a subsidy to the Southern Railroad, a gigantic railroad corporation.

Mr. GOULDEN. Will the gentleman allow an interruption?

Mr. KAHN. Certainly.

Mr. GOULDEN. Does the gentleman from California include all on the Democratic side?

Mr. KAHN. No; I do not.

Mr. GOULDEN. I want to say to the gentleman that I have always and invariably for the years I have been here voted against that measure, and I know the leader of the minority has voted against it.

Mr. KAHN. But the gentleman from Mississippi [Mr. SPIGHT], the ranking Democratic member of the Committee on the Merchant Marine and Fisheries, who made the minority report on this bill, has always voted for the railroad subsidy. [Applause on the Republican side.]

Mr. GOULDEN. I supposed you referred to the leader on the minority side, who has always been consistent in the matter of subsidy, whether railroad or ship subsidy——

Mr. KAHN. I decline to yield for a speech.

Mr. JAMES. Will the gentleman yield for a question?

Mr. KAHN. One at a time. [Laughter.] I yield to the gentleman from Kentucky.

Mr. JAMES. Does the gentleman attempt to justify the action of the Republican side now in voting for this subsidy by claiming to follow the example of some Democrats, as you say, in voting for a subsidy?

Mr. KAHN. I simply say this: That if I had voted for railroad subsidies year after year and as recently as the first session of the present Congress, I would not arise on the floor now and denounce subsidies.

Mr. JAMES. I will say to you, so far as I am concerned, I have uniformly voted against it.

Mr. KAHN. The gentleman can put that into the RECORD in his own time.

Mr. JAMES. The Republican party is so used to taking Democratic platforms and Democratic issues it is not astonishing that you attempt to follow the action of a few Democrats when the example was a bad one.

Mr. KAHN. I yield to a question, not to a speech.

Mr. GROSVENOR. If the gentleman will permit me, is it possible that the disclaimer made by gentlemen on the other side to rid themselves of the stigma of having voted for that subsidy is intended as a reflection on the great majority on that side of the House?

Mr. KAHN. I am not prepared to say that it was a stigma.

Mr. LEGARE. The gentleman speaks of that railroad subsidy as a Democratic measure. I know the gentleman wants to be fair. Will not the gentleman state that the railroad subsidy, like the ship subsidy, came from the Republican party?

Mr. KAHN. But when the House was Democratic the Democrats were always in favor of that railroad subsidy just the same. I decline to yield further.

The CHAIRMAN. The gentleman from California declines to yield further.

Mr. GROSVENOR. The first time it was ever passed it was by a Democratic House.

Mr. KAHN. I want to say, Mr. Chairman, we have heard a great deal said in the debates on that side about paternalism; but when the agricultural appropriation bill comes here and an item for $250,000 is put in the bill for free seeds, every Member on that side of the floor rushes forward in the mad scramble to get between the tellers and vote for it. Is that paternalism?

Mr. SULZER. You said every Member. I want to say to my friend on the other side I have always voted against it.

Mr. KAHN. Perhaps I should have said "nearly every Member." I decline to yield further.

Mr. GOULDEN. The gentleman should be fair. I did not vote for free seed at any time. [Laughter and applause.]

Mr. KAHN. Well, Mr. Chairman, I am glad to see one or two oases in the desert. [Laughter.]

Now, Mr. Chairman, I have voted for subsidy, and I am not ashamed of it. I believe in fast communication between the different sections of our country. I believe in giving the people the best and fastest kind of transportation obtainable, and the more of it we have the better for the country.

Why, I come from the far West. Away back in the Administration of the lamented Lincoln the first steps were taken to build the transcontinental railroads. Was there a subsidy given for that purpose? Why, of course there was. Could those roads have been built without the land grants that were given and without the Government aid—I think it was $30,000 a mile at the beginning—to build those roads? Could private capital have undertaken the task? Was that subsidy? And how many Democrats in Congress at that time voted for it? If it had not been given, it is probable that to-day that great western country, which is populated by millions of happy, contented Americans and with unlimited opportunity for development, would still be—a great part of it, at least—in the language of Daniel Webster, "a desert of drifting sands and whirlwinds of dust; of cactus and prairie dogs." Therefore when we talk about subsidy let us be fair; let us be honest.

I confess I do not know very much about the lines that have been projected in this bill on the Atlantic seaboard, but I profess to know something about those lines that are projected on the Pacific seaboard. Let us take the Oceanic lines, for instance. What is the history of the effort to build a successful line from the Pacific coast to Australia? It is a record of failure—of squandered treasure and blasted hopes. Prior to the time that the Oceanic Steamship Company went into that business there had been seven lines to the Antipodes, and every one of them had failed, some of them having become absolutely bankrupt.

Listen to the record:

We know that the first line ran from June, 1866, to December, 1868. It was the Panama and New Zealand Royal Mail Company. It had a subsidy of £55,000 a year and it failed. A subsidy of £55,000 a year was not enough at that early time to make it a paying line.

The second line was a service from San Francisco, which started in 1869 and was abandoned in 1871.

Third. Two lines undertook the service between 1871 and 1874. Both of them gave up.

No. 4. A monthly service started in 1874 and contracted for six years, as follows: Ten-knot speed, 60,000 pounds; 11-knot speed, 75,000 pounds; 12-knot speed, 90,000 pounds per annum. The contractors threw up the service and paid £10,000 forfeit after running one year.

The fifth line: In 1875 the Australian Steam Navigation Company ran vessels under special contract, but gave it up.

Sixth. The Pacific Mail Steamship Company entered into a contract in 1876 for a monthly service and ran until 1884. It received £89,950 per annum subsidy, but it could not make the line pay.

In 1885 the Oceanic Steamship Company started and has followed the route for twenty-two years, not because the service by itself was profitable, but because the company sacrificed its profits on other lines in order to maintain an Australian service.

The Oceanic Steamship Company ran for many years three steamers, the *Alameda* and the *Mariposa*, which were both American ships of about 3,000 tons register. Its managers also had an arrangement with the owners of the *Moana*, a British ship of about the same register, so that these three ships carried on that service for some years and made money.

Along in 1900, when the line was paying fairly well and the stockholders were getting a dividend, the directors of the Oceanic Steamship Company thought it would be advisable to put on three new American ships twice the size of the ships that were then in that service. The managers of that company came East and negotiated a contract with President McKinley and Postmaster-General Smith to carry on what is known now as "ocean mail route No. 75." Then, with three new 6,000-ton ships they started out under that contract. These new ships were the *Sierra*, the *Sonoma*, and, I believe, the *Ventura*. Now, the *Moana*, as I said before, was a British ship, owned by the Union Steamship Company, of Australia. That company is probably the most powerful shipping company in the southern seas. As soon as these new ships were put on, or about that time, the coastwise-trade laws were extended to Hawaii, and under those laws the *Moana* was no longer allowed to carry passengers and freight to Honolulu as well as to San Francisco, and therefore she was taken off that line. The Oceanic Company soon found that instead of carrying more business than it had before, and instead of making more money for the stockholders than it had ever made before, there was a loss, and that loss continued year after year. This was the reason for it: The *Moana* was put into a new line which ran from Australia to Vancouver, the Canadian-Australian Line, and every effort was made to divert the business to that line. Furthermore, the colony of New Zealand, which had been paying the Oceanic Company a subsidy of $118,025 on the basis of thirteen trips a year and which should have paid under the seventeen trips a year schedule $154,333 per annum, when it found that the *Moana* was no longer in that service and that that vessel was shut off from the Hawaiian trade, reduced the subsidy to $75,000. About that time, too, the Pacific Mail Steamship Company ordered its new ships, the *Siberia* and the *Corea*, and later on it leased the *Mongolia* and the *Manchuria*, and they, too, diverted a part of the profitable business of the Oceanic Steamship Company, and under the then existing conditions the latter company failed to pay any dividends and has never paid any since, while its securities have constantly depreciated.

The stock of the Oceanic Steamship Company, which is worth $100 at par, has gone down to $2 a share. The 5 per cent bonds of that company, which were worth $1,000 each, have gone down to $600 each. If these lines were making the great sums of money that gentlemen on that side of the House would have us believe, does anyone for a moment think that you could go into the open market to-day and purchase their stock for $2 a share and their bonds at 60 cents on the dollar? Why, the idea is simply ridiculous. What is more, the company has defaulted on its bonds, and under the conditions attached to those bonds if the interest on them is not paid within six months from the time that it falls due a receiver will be appointed and the affairs of the company will be liquidated. On the 1st of next July, if this interest is not paid, that company will go into the hands of a receiver, and instead of the American flag flying proudly from the masts of those ships, the chances are ninety-nine in a hundred that they will go into another service and that another flag will float from the masthead.

This Oceanic Line is in direct competition with the Canadian Line that runs from Sydney to Vancouver. The only reason why that latter line has not taken away more of the business is that it does not make the time. The *Moana* is a 3,000-ton ship, and can not make the time to Vancouver in the same way that the Oceanic ships make the time to San Francisco. So the people of New Zealand prefer to pay a subsidy of $75,000 a year to the Oceanic Company, because by keeping that company afloat they enable the citizens and residents of New Zealand to go to England in a shorter time than they can go over any other route. The people of New Zealand are intensely loyal to British interests, and if the Canadian Line were to put on new steamers of 6,000 tons each, the chances are that the government of New Zealand would withdraw her subsidy entirely from the Oceanic Line and would give it to the Canadian Line. That would cause almost all of the travel to be diverted to Canada, and that would mean a loss of millions of dollars to the people of the United States in the way of business, because the men who come from these colonies at the present time in the steamers of the Oceanic Steamship Company strike an American port first. They have an opportunity to interview American merchants, they have a chance to buy American goods; whereas if they first went to Canada they would come into touch with Canadian merchants and they would buy Canadian goods.

Again, we hear gentlemen on the floor of this House saying that there is no need to give additional subsidies to this line, because it is one already in operation; that it is owned by rich men, and that therefore it can get along without any assistance. Get along! Owned by rich men! Did you ever hear of a poor man building a $2,000,000 ship? Did you ever hear of an aggregation of poor men building a $2,000,000 ship? And that is what one of these modern vessels costs. It is rich men who have to build them, and where is the rich man in the United States or elsewhere to-day who wants to put up a single dollar of his money in an enterprise where he does not see the possibility of collecting a cent of interest for years and years to come?

Mr. BONYNGE. Is the Canadian Line subsidized?

Mr. KAHN. Mr. Chairman, the gentleman from Colorado wants to know if the Canadian Line is subsidized. Yes; even that line, with its 3,000-ton steamers, gets an annual subsidy of $330,000 from its government. That is $47,000 a year more than the Oceanic Line receives from the Government of the United States for carrying the mails.

I was very much amused yesterday, or the day before yesterday, when the gentleman from Michigan [Mr. FORDNEY] made a brilliant, as he thought, speech upon this floor, calling attention to the fact that the Oceanic Steamship Company only pays $235,000 or $250,000 a year for wages.

Why, does the gentleman think, or does anyone think, that the entire expense for wages is what is paid to the crews of ships? What becomes of the hundreds of men who wait around on the docks to unload the ships when they come into port? What has become of the army of hired men who perform all sorts of services in connection with the proper equipment and proper running of a line of modern steamers?

Mr. JAMES. Will the gentleman yield?

Mr. KAHN. Yes.

Mr. JAMES. Would the gentleman vote to take from the public Treasury and give to each one of the laboring men in this country sufficient amount to make up $2 a day to those who were unable to make that sum per day?

Mr. KAHN. If he did something to build up the Government's business, if he would perform services for the benefit of the Government, I would say yes.

Mr. JAMES. Suppose he was doing his duty—the first duty of an American citizen—trying to keep his family in food and raiment?

Mr. KAHN. If he was in the Government service—and these lines are all to be engaged in the Government service in carrying United States mail, and they can not get a dollar if they do not do that—if he was engaged in that service I should want him to get the highest pay that could be obtained by anybody in any part of the world for performing similar services.

Mr. GAINES of Tennessee. Mr. Chairman——

The CHAIRMAN. Does the gentleman from California yield to the gentleman from Tennessee?

Mr. KAHN. Yes.

Mr. GAINES of Tennessee. The gentleman just now said, if I understood him, that, in speaking of labor, there were men standing around on the banks of the harbor.

Mr. KAHN. Oh, no, no; I didn't say banks of the harbor. [Laughter.] I said they stood around on the wharves and docks.

Mr. GAINES of Tennessee. On the side of the Golden Gate. Will that suit the gentleman for geography?

Mr. KAHN. Oh, no; the ships don't land on the Golden Gate. One did—the *Alameda*—and it took the Oceanic Steamship Company over ten days to get her off, and cost $150,000 to do it. No; the docks are on the other side of the city. [Laughter.] But I shall have to decline to yield, Mr. Chairman.

Mr. GAINES of Tennessee. The gentleman is making the galleries laugh so—— [Laughter.]

Mr. KAHN. My time is almost up, and I must go on.

Mr. GAINES of Tennessee. But I want to put my question, Mr. Chairman.

Mr. KAHN. Mr. Chairman, I must decline to yield.

Mr. GAINES of Tennessee. Well, I don't care whether you yield to me or not. If you don't want to yield, go ahead.

Mr. KAHN. Oh, go ahead. [Laughter.]

Mr. GAINES of Tennessee. Well, now, if you will stop laughing until I can put my question [laughter]—the gentleman stated that labor was standing around ready, somewhere in this country, to unload the ships.

Mr. KAHN. Why——

Mr. GAINES of Tennessee. Wait a minute; and unless we gave this subsidy he asks what is going to become of them. I suggest that they go to work and help to rebuild San Francisco and vote for Democrats to put them in office so as to give us free raw material, that the gentleman said we could not do. I introduced a bill for that purpose at the last session, and the gentleman said it was unconstitutional.

Mr. KAHN. The gentleman from Tennessee has, as usual, Mr. Chairman, butted into my speech. I want to say to him now that I never said the bill was unconstitutional, but I did say, and I reiterate it here, that a committee of the Senate declared it was unconstitutional; and, as a matter of fact, every member of my delegation will bear me out, and I think the chairman of the Committee on Ways and Means will bear me out, and other members of the Committee on Ways and Means will bear me out when I say that from the moment I came back from San Francisco after the disaster of last April I took up the matter of free raw material. I——

Mr. GAINES of Tennessee rose.

Mr. KAHN. I will not yield. I was a member of the California delegation on the floor of this House. While I was in San Francisco the gentleman from Tennessee [Mr. GAINES] introduced a bill granting a drawback on building material to be used in the rehabilitation of the stricken city for the period of one year. He did not even show me the courtesy after my return from the stricken city to come to me and speak to me about his bill and ask me whether he could help us in any way. I never heard of his bill until he was on the floor here one day and began to make a speech and taunt the Members from California about not having taken the matter up. On the other hand, the gentleman from Illinois [Mr. MADDEN], a Republican, who had introduced a similar bill, came to me almost on the day of my return and offered his services—unstintedly, freely, fairly, and never attempted to make any political capital out of his action on the floor of this House. [Applause on the Republican side.]

Now, Mr. Chairman, that I have had to digress, I think I had better get back to the text. Gentlemen on the other side of the House have had a good deal to say about the number of ships that are now on the seas floating the American flag; that we are now the second nation in the amount of tonnage employed in the carrying trade on the seas; and yet we have 10,000 fewer ships floating the seas to-day than we had in 1861, and what does that mean? It means that there are probably twenty-five or thirty thousand fewer places as officers for American boys, and that is why the American boy does not go to sea. There is no chance for him to rise. There is no opportunity for him to get up in the world, and the American boy is not content to go to sea and stay in the forecastle. He is endowed with ambition and bright hope. He wants to become an officer, and you can not blame him for not going into a service where he sees nothing ahead of him but the constant grind of the forecastle.

A great many gentlemen have spoken on that side about what a good thing it would be if we could only get free ships—"buy free ships, no matter where you can purchase them, bring them in here and put them under the American flag and you will rehabilitate your merchant marine." Why, gentlemen, the initial cost of a vessel is almost nothing as compared with the cost of running expenses. That is where the cost comes. Under the navigation laws of the United States it costs an owner of a merchant vessel more money to feed his crew than it costs the Government of the United States to feed a crew upon any naval vessel that we own. I am glad of it. The rations, under existing law, that are dealt out to men in the Navy do not begin to cost as much as the rations which, under existing law, must be handed out to the seamen and to the officers of a ship in the American merchant marine. I am glad that that is so. I am glad that the Government of the United States and that the Congress of the United States has enacted legislation so that the American seaman shall be used as a man and not as a brute, to be knocked down with a belaying pin by any captain or mate that treads the deck of his vessel. I am glad the American Congress has legislated in that way, and because the American Congress has legislated in that way I do not see why it can not take a step in advance of that and do everything in its power to enable American capital to go into the construction of, the equipment of, and the running of American ships under the American flag.

I want to say just one or two words in connection with the Pacific Mail Steamship Company. We have heard a great deal here about Mr. Harriman and Mr. Hill of the Northern line. I do not believe that Mr. Harriman will ever take advantage of the provisions of this bill. I do not know whether Mr. Hill ever will. I am in hopes that the time will come when some enterprising American may see his way clear to take advantage of those provisions and build a line of ships to ply across the Pacific from San Francisco, by way of Hawaii, to Manila and from Puget Sound to Yokohama and Manila. In that way we can build up the commerce of the Pacific. It is a well-known fact that two steamers, the best two steamers of the Pacific Mail Steamship Company, the *Mongolia* and the *Manchuria*, are not the property of the Pacific Mail Steamship Company. That company has never had the money to buy and pay for them. They are leased to the company—leased by the Union Pacific Railroad Company, whose property they are. The Pacific Mail Steamship Company has not paid a dividend for years. Its stock, which has a par value of $100 a share, can be bought in the open market to-day for $35 a share, which, to my mind, is the best evidence in the world that "this great, gigantic monopoly, the Pacific Mail Steamship Company, owned by this man Harriman," as the opponents of the pending measure constantly exclaim, is not a paying venture at all, and that much of the talk that has been indulged in by my friends on the other side of the Chamber in that regard has been mere buncombe and noise. [Applause.]

Mr. GROSVENOR. If the gentleman from New York desires, I will finish my time now, fifteen minutes.

Mr. GOULDEN. I have three speakers, and I desire now to

yield to one of them. I yield ten minutes to the gentleman from Texas [Mr. RANDELL].

Mr. RANDELL of Texas. Mr. Chairman, I wish to enter my protest against this legislation. To discuss the merits of it there is neither adequate time allowed, nor would any argument avail. The edict has gone forth that the bill must pass. [Applause.] Individual opinion on that side of the Chamber is coerced by the thumbscrews of the Republican machine. To amend or in any way improve the measure will not be tolerated. [Applause.]

The leaders of the dominant party are evidently in great straits in their attempt to hold the popular confidence and at the same time to keep faith with the political pilferers who live and flourish by class legislation and are now clamoring for campaign promises to be redeemed. [Applause.]

They hope by this bill to inaugurate a system of plunder that will take hold of our ocean transportation facilities [applause] and, under the fostering care of the Republican party, gain such strength that it can not be uprooted, but will continue, like the oppressive and unjust discriminations in our so-called "protective-tariff system." [Applause.]

When the exploiters of the Treasury get their hands into its vaults they never willingly withdraw them, but by specious pretense and corrupt influence go deeper and deeper, even to their very armpits. [Applause.]

The only hope that this bill will not pass at this session is that perhaps the rush at this late hour by the party management in this House may be only a hypocritical effort to evince a desire to enact the coveted legislation, knowing it will not get through the Senate. [Laughter.]

The hope to avoid this enactment rests in the cunning of those controlling the action of Congress—the Republican leaders. By making a plausible effort, but not passing the bill, is to retain this leverage on the adipose tissue of the fattened favorites of corporate monopoly to secure extra contributions for the campaign fund next year. [Applause.] Thus infamy will be thwarted by hypocrisy and public pelf by duplicitous chicanery. Those recognizing the evils of this measure should not, however, rely on the Senate. [Laughter.] It has already passed a ship-subsidy bill, of which this is a substitute. It might accept the substitute and thus enact the law. If the people have any real friends on that side of the Chamber, I appeal to them to show it now. [Applause.] The bounties given by this bill are an admitted subsidy. The only plausible argument for it is to overcome artificial barriers to shipbuilding in this country and the artificial disadvantages of our merchant marine. It is an attempt by subsidies from our Treasury to compensate for the wrongs that class favoritism has inflicted on our industries and commerce. That we may build ships in America let us free the material for building them from the fetters of the Dingley tariff act. [Applause.] That we may have a merchant marine let us cut the bonds of iniquitous legislation that now bind and strangle our commerce. [Applause.]

We can not make a remedy by piling wrong upon wrong and injustice upon injustice. We should correct the evil by repealing unjust and discriminating laws and returning to just regulations and natural conditions. We have the best material for building ships, in the greatest quantity and most convenient locations, but the price of it is inflated by enormous tariff duties and ever-growing and absorbing monopolies. Our mines, our forests and mills, furnish the foreigner cheap shipbuilding material, but you deny to our own citizens the natural advantageous resources of the country and forbid the pursuit of occupations for which our people are so admirably fitted. [Applause.] If the tariff on material necessary for shipbuilding is not a revenue producer, but monopolistic and prohibitive, why not remove or reduce it? Why do you not give our citizens desiring to build ships the products of our iron mines cheaper than to the foreigner across the ocean? Because the steel trust tells you not to do it. Why do you not let Americans procure the products of our forests cheaper than aliens living thousands of miles away? Because the lumber trust says you must not. Why is it that our own people can not have the privilege of purchasing the necessary material for building ships in the markets of the world, at home as well as abroad, free from the oppression and exactions of monopoly and tariff discrimination? Because the trusts in the United States are in league with the Republican party and you dare not offend corporate monopoly [applause], on whose bounty you exist and by whose power alone you can hope to retain control of this Government. [Continued applause.] If you will not let our people build ships, why not let them buy ships and own them like other property? Is it because the "protected" interests forbid you to thus expose to the public gaze the iniquity by which shipbuilding is discouraged and prevented in this country? If we were permitted to buy ships and use them without hindrance under the American flag, the reason why we can not now profitably build them would become so apparent to the public that the oppressive tariff rates would be changed and monopoly would receive a violent blow. [Applause.] You or, rather, your moneyed masters, are determined this shall not happen. Many of our tariff schedules are prohibitive in amount of duty, thus producing no revenue. Yet they stand as a wall to keep out foreign trade. The unjust exactions of the tariff-created trusts operate to the detriment of our trade in other countries. Foreign governments resent our oppressive and unnecessary regulations and retaliate by unfriendly tariffs and prohibitive regulations against our products. Under such conditions, how can we build up a merchant marine? Real trade is necessary for commerce. There must be an exchange of goods, and this exchange must be mutually profitable or commerce is well-nigh impossible.

Subsidies are always objects of suspicion. They are usually impolitic and nearly always dishonest. [Applause.]

They have another peculiarity. Their advocates always claim that a subsidy is not a subsidy, but it is necessary to pay for some sort of service that is desirable in the interest of the public; and yet every man that they can persuade to vote for such a measure, such as what they now call a "subsidy" for the Southern Railroad, is claimed by them as an ally who must thereafter vote for anything that has the name of subsidy. [Applause on the Democratic side.]

I am glad I am one of the number of those who have never voted for any such provision at any time; yet I remember it was claimed by the advocates of the appropriation for the benefit of the Southern Railroad that that was not a subsidy, but was a proper compensation for reasonable services and was a benefit to the people all through the Southern States. If that claim was true, then the pay was proper, and the "subsidy," as you call it now, ought to have been given. [Applause.]

Mr. GOULDEN. I yield ten minutes to the gentleman from Indiana [Mr. HOLLIDAY].

Mr. HOLLIDAY. Mr. Chairman, in determining my duty toward any measure which comes up on the floor of the House I am glad to take into earnest consideration the views of the great leader of the Republican party and the greatest statesman of the age, the President of the United States. I am always glad and invariably do try to take into consideration the views of my party associates upon any question upon which I am called upon to vote, and in determining whom I shall follow in this House there is no man whose banner I more readily follow than that of the distinguished gentleman from Ohio, whom we all love whether we agree with him or not. [Applause.] There is another matter that I sometimes take into consideration, and that is to find out what the Democratic party wants and then to take the other side. But, Mr. Chairman, beyond all these considerations, beyond the question of what the President of the United States believes in, beyond the question of what attitude my party may take, beyond the question of what blunders the Democracy may make, the highest and chief consideration that ought to govern us is what is everlastingly right in the premises. [Applause.] Viewed from that standpoint, Mr. Chairman, I can not support the pending proposition. I am not opposing it because it is favored by particular individuals or opposed by particular individuals. I place my opposition upon the high standard that the whole thing is fundamentally wrong, from the beginning to the end, and that the legislation is unwise. In saying that it is unwise I do not want to arrogate to myself superior virtues. I know that the men who favor this proposition are just as earnest, just as sincere and patriotic as myself. The only trouble is that I can not possibly bring myself to see the situation from their viewpoint.

Now, Mr. Chairman, when we take the people's money—it is not ours—and put it into the hands of a private corporation or a private individual to be used in his private business we ought to be actuated by very grave and powerful reasons.

Why, some gentleman said, a few hours ago, that the river and harbor bill was a subsidy. That is a startling proposition. Why, Mr. Chairman, the nation owns the rivers and harbors. When we are improving them we are improving our property, and I insist here now, and shall continue to insist, that if the Government is to build ships on any ocean the Government ought to own them and ought to get the benefit of whatever wealth they create. [Applause on the Democratic side.] I do not think it is right to take the people's money on any pretext whatever and give it to private individuals. [Applause on the Democratic side.] And, Mr. Chairman, it did me good to see so many men rise from their seats this evening and declare that they did not vote for the graft to the Southern Railroad a year or two ago. To the best of my recollection two-thirds

of the membership of the House voted for it, and yet out of that two-thirds I have not found many to get up and justify it, and I am glad to know that is true.

Mr. WILLIAM W. KITCHIN. It only carried by 1 vote. We came very near beating it a year ago.

Mr. HOLLIDAY. I am referring to the vote of three years ago. I have been voting against it ever since I have been in Congress, and I am glad to know that we have eliminated it from the last post-office appropriation bill.

Mr. JAMES. I want to suggest to the gentleman that there were yea-and-nay votes on the Southern Railroad subsidy, and when any man who makes a claim relative as to how he voted the record will show whether it is true or not.

Mr. HOLLIDAY. The point I make is that the men who claim that they voted against it are up telling about it and the others are not. That is the proposition I stated. Now Mr. Chairman, what are the arguments in favor of this bill? One is that we may get our exports more directly to foreign countries. I am not speaking technically. I am speaking as a man unfamiliar with naval affairs. The proposition is that it will create additional exports and help our country. Why, Mr. Chairman, during the last fiscal year the exports of the United States were greater than in any one year in the history of the Government, and in spite of that they say that our commerce is languishing. It is not necessary that we should own the ships in order to get our goods from here to the men who want to buy them. If I raise hogs and corn in Indiana, and lots of us do raise hogs and corn, and raise lots of both, and want to have a market in New York, we do not have to buy the railroad from Chicago to New York. As a matter of fact, most of the exports that go from the United States to South America and to the Orient are not carried in subsidized ships of any nation, but in tramp vessels. [Applause.]

There is a proposition in here to help the Navy—our fighting men—by offering a subsidy to sailors who are employed. Let us see what that is. For each seaman, first class, $36; for each seaman, second class, $30; for each seaman, third class, $24 per annum. In other words, we offer the magnificent inducement of $2.50 a month for men to enter the American Navy. You can not get them at those figures, and it occurs to me that this proposition was placed in the bill simply to get friends for it that it otherwise might not have. Why, we have a large merchant marine now, and my information, which I think is reliable, is that you do not get recruits for the American Navy from the merchant marine. You get them from the farms of the Middle West, and I never heard one particle of complaint about the material that was recruited from those places. If you want to do that, instead of making this ship subsidy, give it directly to the sailor; increase the wages of the seamen employed on the naval vessels and you will get proper results far more readily than you will by this extravagant method. Some gentlemen upon our side of the House have argued that we can afford to pass this bill, because it is somewhat innocuous; that the worst features have been eliminated, and better let it go through. Why, my friends, I want to say that is absolutely false logic. If ship subsidy is a good thing, we can not have too much of it; if it is a bad thing, we ought to have none of it. That is all there is about it. [Loud applause.] Let us go the whole hog. [Laughter.]

There is another proposition that strikes me with amazement. Whenever there is a proposition to raid the Treasury somebody brings up the grim specter of war and flings it out. Why, my genial friend from Washington [Mr. HUMPHREY] looked like he was absolutely scared about war with Japan, as if Japan might invade Washington to-morrow morning. Suppose we should have a war with Japan; and suppose overnight by some inscrutable process we could have these particular ships referred to in this bill, so that they could be ready to transport men to the Philippine Islands. How rapidly would they get there? We could not prevent the landing of the Japanese.

Now, Mr. Chairman, if we are to protect our insular possessions, we must do it by our Navy. We are too far from base to depend upon the Army. Russia tried that, and although her soldiers were vastly superior, what was the result?

The CHAIRMAN. The time of the gentleman has expired.

Mr. GOULDEN. I yield three minutes more to the gentleman.

Mr. HOLLIDAY. Now, my friends, whenever a proposition of this kind is brought in before us our patriotism is appealed to. We are told that the grand old flag that we love so well—I followed it for three or four years myself—is about to be driven from the ocean. In pathetic words we are asked to do something for that flag. But I have noticed that the trust magnates, the great captains of industry, who will be the chief beneficiaries of this bill, care nothing for the old flag unless there is an appropriation hitched onto it. [Applause.] I am opposed to the whole business. I do not like this subsidy business. Stripped of all its verbiage, reduced to the last analysis, it means to go down into the Treasury of this country and turn over to private individuals part of the people's money in order that they may carry on their business heretofore found to be unprofitable. That is all there is to it.

Mr. GAINES of Tennessee. Has the gentleman calculated how many rural routes or thousands of rural routes the $25,000,000 subsidy carried by the bill will perpetuate?

Mr. HOLLIDAY. I do not care. We will perpetuate the rural route whether this bill passes or not. [Laughter and applause.]

Mr. GAINES of Tennessee. How many more could be put in operation if we had that $25,000,000?

Mr. HOLLIDAY. Now, Mr. Chairman, this is really not a political question; it is a business question; it ought to be looked at from a business standpoint. I regret very much that some gentlemen on the other side have seemed to work harder trying to obtain a political advantage than to beat the bill. The questions of right and wrong are not necessarily political. If we enter upon this proposition, we enter upon an unknown sea. It may mean $3,000,000 to-day; it may mean $30,000,000 next year, and it may mean $300,000,000 in the future. [Applause.] Let us pause while we may. Let us call a halt upon the proposition of giving the Government money to private individuals right here and now. Let that be the last of it. [Loud applause.]

Mr. GROSVENOR. I yield fifteen minutes to the gentleman from Michigan.

Mr. McMORRAN. Mr. Chairman, I had not intended to speak upon this question of ship subsidy this evening, and I would not have done so had it not been for the remarks made by my colleague [Mr. TOWNSEND] this afternoon. While I have the highest respect for my colleague and regard him as one of the leading Members of the Michigan delegation, I fear he has been inoculated with the free-trade theory of our Democratic friends.

I want to say to the Members here that I am a protectionist; I am in favor of any measure that will protect the American farmer and build up his interests as well as those of the American manufacturer, and protect American labor.

My friend wants to know what is the pressing necessity for this great bill we are attempting to pass here. I will attempt to give him my reasons why there is a pressing necessity for the passage of this bill and my position on it.

In my judgment, there never was a time in the history of this country when we needed the ships that are covered by this bill as badly as we do to-day. We are appropriating annually millions of dollars to build a Navy, and to-day we are as helpless with our Navy, in case of war, as a ship on a lee shore without an anchor. We are drifting forward to the shore; and from a mathematical and business standpoint, it is my judgment that it would be economy for this Government not only to subsidize to the extent of $4,000,000, but even $5,000,000 a year rather than to build and own these ships itself.

We are confronted with two propositions. We must either build from twenty-five to fifty or a hundred scouts and transports, or else we must encourage capital in this country to build and operate them; and I believe, as a business proposition, that it is better for this Government to encourage private capital to build and operate these ships.

There is another theory of this subject, Mr. Chairman. Our facilities for manufacturing in this country are growing at a very rapid pace. We are needing greater markets, and unless we are successful in creating facilities that will give us larger markets for the manufactured products of this country, we are going to reach the limit of the demand in this country for those manufactured products in a very few years, and then a period of stagnation must come unless we can provide means for reaching the outside countries whose trade we are entitled to.

Now, my colleague [Mr. TOWNSEND] says that he might be inclined to vote for a subsidy for a line to South America; but he says nobody knows anything about this bill. He believes it is a poor bill. He thinks that sufficient consideration has not been given to the preparation of it. I agree with him that perhaps the bill is not a perfect one, but if we are to wait here until we can theorize and bring in a perfect bill, we never will agree upon a bill at all. If that theory were to be carried out here in this Congress, we would enact very little legislation. If the principle is wrong, if it is wrong to grant a subsidy to a line to South America, it is wrong to grant a subsidy to a line going anywhere. But, as a matter of fact, our Democratic friends on the other side, who are crying out against subsidies, have been voting for years for a subsidy, only in another shape. They

have voted freely here for millions every year to deepen our harbors and rivers, and thereby they have created such facilities that they have enabled us to build up one of the largest and best internal merchant marines existing anywhere on the face of this globe, and they ought to be proud of it. That is one of the instances in which they have been consistent in their votes in this House in so doing.

I want to say to my Democratic friends that there are some other instances where they have been consistent in their votes. When they voted for the Philippine tariff they were consistent in their theory of free trade, while many of my colleagues on this side were inconsistent in the doctrine that they have preached for many years, viz, the doctrine of protection to every American interest.

I am not one of those American citizens who favor neglecting any American interest, no matter how small, in favor of any foreign country or any uncivilized nation. I believe that the theory of reciprocal trade with foreign countries is wrong where it involves competition with any American product. I heard the remark made here that the American farmer is not protected—that this is taking money from the farmer. Now, as a matter of fact, it is one of the best measures ever brought forward in an American Congress, in my judgment, in aid of the American farmer.

The American farmer is interested in home markets; he is interested in having manufacturing interests built up in his locality, and every manufacturing industry that is built up in the vicinity of the American farmer creates a home market for his product and enables him to get a better price at home rather than to ship the product abroad in competition with the cheap labor of foreign countries.

I believe that in my district, which is an agricultural district, the farmers are in favor of any measure that will build up the industry in which they are engaged. I believe that every manufacturing industry in the country can not help but favor this measure. It is one of the most beneficient, truest, American principles that I have ever heard of since I have been in politics.

Take our lake marine; it is a fact that years ago ships of a thousand or fifteen hundred tons were considered enormous craft, and when they reached port it took from three to four days to unload them. What is the result? To-day, as a result of the appropriation by this Government of some eighty to one hundred millions biennially to deepen the rivers and harbors, we have been enabled to build ships of ten to twelve to fourteen thousand tons capacity, and have created facilities for the unloading in our lake ports, where we are able at the present time to have a ship enter a port in the morning with 12,000 tons of ore and be unloaded and reloaded with coal and leave on her return voyage before 6 o'clock in the evening. Where is there a country on the face of this globe that can show a record like that? And it is all the result of what might be called a subsidy, which has been voted for almost en masse by our friends on the Democratic side.

It is a mystery to me how any member of the Republican party can cast his vote in any other way except for the building up of the American merchant marine. In my judgment the bill does not go far enough. If I had my way, I would have inserted in this bill that the seamen on these ships should be American citizens and that the ships should be sailed by American seamen, and if it was necessary to subsidize them to a greater extent I would vote to do it rather than have them manned by the races of the Orient. I am not in favor of subsidizing ships, if I had my way, to be manned by Asiatic labor. I want to see everything in this country that is subsidized manned by American labor.

I am very sorry indeed that the gentleman from Michigan [Mr. TOWNSEND] takes the position that he does on this bill. I am satisfied that in his discussion here to-day he has discussed it more from an academic standpoint than from a practical and business standpoint. The gentleman is usually on the right side of every question, but I regret to say that he is on the wrong side of the ship-subsidy bill. [Applause.]

Again, my colleague from Michigan [Mr. TOWNSEND] asks the question, How can we justify a vote for a bill of this character with our constituents? I am pleased to say to the gentleman that I believe the constituents of every Member of Congress from the State of Michigan will favor a vote for any bill that will increase the facilities for providing greater trade for American interests. Has any Member of Congress from the State of Michigan ever been criticised for casting his vote in favor of rural free delivery to the extent of some twenty-odd million per year. On the contrary, have not the farmers almost universally commended the action of their Members in creating the law that furnished them the facilities for a daily mail, providing a luxury which they never before enjoyed, that of having the mail daily at their door, and all as the result of the doctrine of the Republican party of protection to every American interest?

Mr. GAINES of Tennessee. Mr. Chairman, I am very much surprised—indeed, I am astonished—with the record standing open as it does before my eyes and the public at large, that the gentleman from California [Mr. KAHN], a few moments ago, disputed my statement, which was, in substance, that the gentleman, in the last session of Congress, had argued that the bill giving relief to the California sufferers by giving them drawbacks on building material actually used in putting up their ruined homes and buildings was unconstitutional.

Mr. KAHN. Mr. Chairman——

Mr. GAINES of Tennessee. Mr. Chairman, I decline to be interrupted now until I state my case.

Mr. KAHN. Mr. Chairman, I rise to a point of order.

Mr. GAINES of Tennessee. Mr. Chairman, I decline to be interrupted until I state my case. I will then yield to the gentleman, but not until then.

The CHAIRMAN. Both gentlemen will be silent long enough for the Chair to say that the gentleman from California rises to a point of order, which the gentleman will state.

Mr. KAHN. Mr. Chairman, the gentleman is not in order. He is not speaking upon a case which is germane to this bill. Ordinarily I would not make this point at this time, because I should like to reply to the gentleman. But I insist——

Mr. GAINES of Tennessee. Mr. Chairman, my time is not to be consumed by the gentleman who argued this very question a moment ago and refused to permit me to reply in his time, and now when I undertake to reply he runs from my attack. [Applause on the Democratic side.]

The CHAIRMAN. The Chair will call the attention of the gentleman from Tennessee to the rule under which the Committee is acting, that discussions are to be confined to the bill; but the Chair thinks that the gentleman from Tennessee should have an opportunity to answer any statement which was made. [Applause.] The Chair relies upon the gentleman from Tennessee to confine his speech as much as possible to the bill in question.

Mr. GAINES of Tennessee. Mr. Chairman, I was trying my best and intended to discuss the bill, but it seems that the gentleman has undertaken to take up my time and make points of order, and bar me from replying to a direct denial of a statement that I made here, and his personal allusions to me. Now, Mr. Chairman, I have lying before me the speech of the gentleman touching upon the matter that we alluded to a few moments ago, this "unconstitutional" question, in which are five or six columns in the CONGRESSIONAL RECORD, where the gentleman not only argued that the proposition to permit free imported articles for the relief of this stricken California was unconstitutional——

Mr. KAHN. I deny that I ever argued—I simply stated the facts.

Mr. GAINES of Tennessee. Mr. Chairman, if the Chair does not protect me from the offensive conduct of the gentleman, I shall do it myself. [Applause.]

The CHAIRMAN. The gentleman declines to be interrupted.

Mr. GAINES of Tennessee. The gentleman ought at least to be courteous while he is here in this House.

Mr. KAHN. I can not expect courtesy from the gentleman from Tennessee.

Mr. GAINES of Tennessee. The gentleman has not only treated me discourteously but offensively, and I denounce his conduct as cowardly and ungentlemanly in the extreme.

The CHAIRMAN. The gentleman from Tennessee is transgressing the rule.

Mr. GAINES of Tennessee. I am perfectly willing to come back in order, if the gentleman will keep his seat and not get out of order.

The CHAIRMAN. The Chair will protect the gentleman against interruptions.

Mr. GAINES of Tennessee. Now, Mr. Chairman, since the point of order is made against the gentleman from Tennessee by the gentleman from California that I can not reply to his speech with a direct reply to a statement that I made in his speech, I of course must retreat from the proposition.

Mr. JAMES. Mr. Chairman, I understood the Chair to rule that he might reply.

The CHAIRMAN. The Chair stated that the gentleman might answer any statement that was made regarding this matter. The Chair calls the attention of the gentleman from Tennessee to the rule adopted by the House and relies upon the gentleman from Tennessee to observe it.

Mr. GAINES of Tennessee. I will proceed to do that, and I

hope the Chair will protect me from being interrupted by the gentleman from California.

The CHAIRMAN. The Chair will try to do so.

Mr. GAINES of Tennessee. Mr. Chairman, here is [counting] one, two, three, four, five columns of original argument of the gentleman from California against the proposition that it was constitutional to pass the bill in question, and, in addition to that, the gentleman from California went and dug up an old report of twenty or twenty-five years ago, made by the members of the Senate, containing [counting] one, two, three, four columns in the CONGRESSIONAL RECORD, arguing that the proposition was unconstitutional. And when I reminded the gentleman that there was a dissenting report filed in the matter, the gentleman uses this language:

As far as that goes, the committee passing upon the question at that time considered the very proposition of the gentleman from Tennessee *and held that it was unconstitutional. I commend him to the report of the debates in the Senate at that time, and also to a reading of the committee report. They will prove instructive to him.*

Mr. KAHN. I said that.

Mr. GAINES of Tennessee. He asked me to read this long report. [Laughter.] And we argued the unconstitutionality of the proposition, and he said that when he came back from California and he found that the proposition of its unconstitutionality was being argued he wrote back to his people that nothing could be done, and, in addition to that, so strongly did he believe it was unconstitutional, so greatly was he impressed with the arguments of his colleagues and the Carpenter report, that he even went so far as to say:

*Now, I want to say in conclusion, there is no need to hold out false promises to the people of California—*

For the reason it was unconstitutional——

Mr. KAHN. No, sir; that is a deduction of the gentleman.

Mr. GAINES of Tennessee. It is a deduction of a gentleman and a good lawyer. [Applause.]

The *California* delegation in this House has *discussed* this matter *repeatedly. They are not chasing rainbows.*

[Applause.]

He says here "they are not chasing rainbows." What else, Mr. Chairman? In addition to that, Mr. Chairman, it was so very unconstitutional that the Republican party in convention in the State of California on September last, following that speech—

*Resolved*, That we favor an enactment by Congress of an amendment to the existing tariff law providing, as a measure of relief in San Francisco, that for a period of three years all building material be admitted into the port of San Francisco free of duty.

That was September the 8th. That was the party convention of the distinguished gentleman from California, and I assume he was elected under the promise that when he came back here he would find the proposition *was* constitutional, for we find on *February 21, 1907*, that the gentleman from California introduced a bill in Congress to put *building material on the free list for a period of five years.*

Mr. KAHN. Will the gentleman yield?

Mr. GAINES of Tennessee. I will not yield. The gentleman has taken up my time now.

Mr. KAHN. Mr. Chairman——

Mr. GAINES of Tennessee. Mr. Chairman, I decline to yield. The gentleman has taken too much of my time as it is. Now, Mr. Chairman, the gentleman said I did not consult him about my bill. Mr. Chairman, I never consult anybody in this House in doing what I think is right. I introduced my bill to help the earthquake sufferers. I helped the delegation all I could, and the first news I had that the proposition was unconstitutional came from Members of the California delegation. The first news that was stated on the floor of this House that it was unconstitutional came from the lips of the gentleman from California [Mr. KAHN].

The CHAIRMAN. The time for general debate for the evening has expired, and, under the order of the House, the committee will rise.

The CHAIRMAN. The time for general debate for the evening has expired, and under the order of the House the committee will rise.

Accordingly the committee rose; and Mr. DALZELL, as Speaker pro tempore, having resumed the chair, Mr. CURRIER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 529, and had directed him to report that it had come to no resolution thereon.

Mr. GROSVENOR. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 11 o'clock and 1 minute) the House adjourned to meet to-morrow at 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of the Treasury, transmitting a copy of a letter from the Secretary of War submitting an estimate of appropriation for operating and care of Rock Island bridges and viaduct—to the Committee on Appropriations, and ordered to be printed.

A letter from the Secretary of Commerce and Labor, transmitting report of Charles M. Pepper on trade conditions in India—to the Committee on Interstate and Foreign Commerce, and ordered to be printed.

A letter from the Secretary of Agriculture, transmitting a statement of the persons employed under the meat-inspection law and the contingent expenses thereof—to the Committee on Expenditures in the Department of Agriculture, and ordered to be printed.

A letter from the Acting Secretary of the Treasury, transmitting a copy of a letter from the Secretary of Commerce and Labor submitting an estimate of appropriation for additional aids for navigation—to the Committee on Appropriations, and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills of the following titles were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. CRUMPACKER, from the Committee on Insular Affairs, to which was referred the bill of the Senate (S. 6249) to provide for the establishment of an agricultural bank in the Philippine Islands, reported the same with amendment, accompanied by a report (No. 8115); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. YOUNG, from the Committee on Military Affairs, to which was referred the bill of the Senate (S. 8128) granting to the St. Johns Light and Power Company a right of way for street railroad purposes through the United States military reservation of Fort Marion, in St. Augustine, Fla., and through other Government property in said city, reported the same without amendment, accompanied by a report (No. 8117); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ESCH, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the Senate (S. 8299) to confer certain civic rights on the Metlakahtla Indians of Alaska, reported the same without amendment, accompanied by a report (No. 8116) which said bill and report were referred to the House Calendar.

Mr. PARSONS, from the Committee on Insular Affairs, to which was referred the bill of the House (H. R. 23568) to secure a better system of report and accountability by the governments of the insular possessions of the United States, reported the same with amendment, accompanied by a report (No. 8118); which said bill and report were referred to the House Calendar.

Mr. MEYER, from the Committee on Naval Affairs, to which was referred the bill of the House (H. R. 25788) repealing part of section 8 of the act approved March 3, 1899, entitled "An act to reorganize and increase the efficiency of the personnel of the Navy and Marine Corps of the United States," reported the same without amendment, accompanied by a report (No. 8119); which said bill and report were referred to the House Calendar.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills of the following titles were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. GRONNA, from the Committee on the Public Lands, to which was referred the bill of the Senate (S. 6134) providing for the conveyance to the State of North Dakota of certain tracts of land for the use and benefit of the North Dakota State Historical Society, reported the same without amendment, accompanied by a report (No. 8114); which said bill and report were referred to the Private Calendar.

Mr. PRINCE, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 21091) authorizing and directing the Secretary of the Treasury to enter on the roll of Capt. Orlando Humason's Company B, First

Oregon Mounted Volunteers, the name of Hezekiah Davis, reported the same without amendment, accompanied by a report (No. 8120); which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills of the following titles were introduced and severally referred as follows:

By Mr. HAMILTON: A bill (H. R. 25832) to authorize Herman L. Hartenstein to construct a dam across the St. Joseph River, near the village of Mottville, St. Joseph County, Mich.—to the Committee on Interstate and Foreign Commerce.

By Mr. FREDERICK LANDIS: A bill (H. R. 25833) to incorporate the National Hay Association, of the District of Columbia—to the Committee on Agriculture.

By Mr. WEBBER: A bill (H. R. 25834) to repeal all United States laws that provide for the payment by any person, company, or corporation of internal or other revenue for the right to manufacture or sell intoxicating liquors, whether spirituous, malt, or vinous—to the Committee on Ways and Means.

By Mr. BURLESON: A bill (H. R. 25835) directing the fixing of a standard of cotton classification—to the Committee on Agriculture.

By Mr. COCKS: A bill (H. R. 25836) providing for the regulation, identification, and registration of motor vehicles engaged in interstate travel—to the Committee on the Judiciary.

By Mr. LACEY: A bill (H. R. 25845) to authorize the Secretary of the Interior to investigate the status of the Indian reserves set aside under the Choctaw treaty of 1830 and the Creek and Chickasaw treaties of 1832, for which no patents have been issued and the ownership of which is in question, and appropriating money therefor—to the Committee on the Public Lands.

By Mr. AIKEN: A bill (H. R. 25846) permitting the building of a dam across the Savannah River at Calhoun Falls—to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 25847) permitting the building of a dam across the Savannah River at Hattons Ford—to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 25848) permitting the building of a dam across the Savannah River at Andersonville Shoals—to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 25849) permitting the building of a dam across the Savannah River at Cherokee Shoals—to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 25850) permitting the building of a dam across the Savannah River at Trotters Shoals—to the Committee on Interstate and Foreign Commerce.

## PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills of the following titles were introduced and severally referred as follows:

By Mr. CALDERHEAD: A bill (H. R. 25837) granting a pension to Margaret E. Dunlap—to the Committee on Invalid Pensions.

By Mr. CUSHMAN: A bill (H. R. 25838) granting an increase of pension to John E. Phelps—to the Committee on Invalid Pensions.

By Mr. HALE: A bill (H. R. 25839) granting a pension to John Metler—to the Committee on Invalid Pensions.

Also, a bill (H. R. 25840) granting a pension to Catherine Hartly—to the Committee on Invalid Pensions.

Also, a bill (H. R. 25841) granting an increase of pension to James Shelby—to the Committee on Invalid Pensions.

By Mr. LITTLEFIELD: A bill (H. R. 25842) granting a pension to Olive J. Stacy—to the Committee on Invalid Pensions.

Also, a bill (H. R. 25843) granting an increase of pension to Robert T. Warren—to the Committee on Invalid Pensions.

By Mr. WALLACE: A bill (H. R. 25844) for the relief of Asa Townsend—to the Committee on Claims.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER: Petition of various organizations, protesting against passage of bill H. R. 13655, known as the Littlefield bill—to the Committee on the Judiciary.

By Mr. ACHESON: Petition of the Trades League of Philadelphia, for bill S. 6923 as a first step toward 1-cent letter postage—to the Committee on the Post-Office and Post-Roads.

Also, petition of Washington Court, No. 23, Tribe of Ben Hur, against the bill to codify and classify the statutes relating to second-class mail matter—to the Committee on the Post-Office and Post-Roads.

Also, petition of Camp La Loma, Army of the Philippines, for bill H. R. 18276, for campaign badges by General Orders, No. 4, to all who served honorably in the United States Army, Navy, or Marine Corps—to the Committee on Military Affairs.

Also, petition of the Peace Association of Friends, of Philadelphia, for an international congress of arbitration and peace court at The Hague—to the Committee on Foreign Affairs.

By Mr. BANKHEAD: Paper to accompany bill for relief of the heirs of William M. Crump—to the Committee on War Claims.

By Mr. BATES: Petitions of National Protective Legion, No. 1289, of Titusville, Pa.; National Protective Legion, No. 381, of Erie, Pa., and Court No. 17, Order of Ben Hur, of Meadville, Pa., against passage of bill H. R. 608 (codification of the statutes relative to the classification of second-class mail matter)—to the Committee on the Post-Office and Post-Roads.

Also, petition of L. V. Thayer, of Atlantic, Pa., for bill H. R. 24282 (eight hours a day for telegraphers)—to the Committee on Labor.

By Mr. BEALL of Texas: Papers to accompany bill to make Dallas, Tex., a port of delivery—to the Committee on Ways and Means.

By Mr. BELL of Georgia: Paper to accompany bill for relief of Ruth E. Anderson—to the Committee on Pensions.

By Mr. BURKE of Pennsylvania: Petition of the Chamber of Commerce of Pittsburg, Pa., against any legislation to establish a parcels post—to the Committee on the Post-Office and Post-Roads.

Also, petition of the Trade League of Philadelphia, for bill S. 6923, as a step toward 1-cent letter postage—to the Committee on the Post-Office and Post-Roads.

By Mr. BURTON of Delaware: Petition of the National Protective Legion, against an amendment to codify and classify second-class matter and rates of postage thereon, as per report of the Postal Commission, designated House Document No. 608—to the Committee on the Post-Office and Post-Roads.

By Mr. CLARK of Florida: Paper to accompany bill for relief of Horace O. Balch—to the Committee on Invalid Pensions.

By Mr. COOPER of Pennsylvania: Petition of Camp La Loma, Army of the Philippines, for bill H. R. 18276, to extend the foreign campaign badges to all who have honorably served in the Army of the United States—to the Committee on Military Affairs.

Also, petition of Uniontown Legion, No. 1749, Order of the National Protective Legion, against the bill to codify the statutes relating to classification of second-class mail matter—to the Committee on the Post-Office and Post-Roads.

By Mr. DAWSON: Petition of the Trades League of Philadelphia, favoring bill S. 6923, as a first step looking to 1-cent letter postage—to the Committee on the Post-Office and Post-Roads.

By Mr. DENBY: Petition of the Shipmasters' Association of Detroit, for legislation for relief of the Life-Saving Service by pension or otherwise—to the Committee on Appropriations.

By Mr. DRAPER: Petition of the Trades League of Philadelphia, for bill S. 6923, as a first step toward 1-cent letter postage—to the Committee on the Post-Office and Post-Roads.

Also, petition of Whitehall Legion, No. 664, Order of the National Protective Legion, against the bill to codify and classify the statutes relative to second-class mail matter—to the Committee on the Post-Office and Post-Roads.

By Mr. ESCH: Petition of the Trades League of Philadelphia, for bill S. 6923, as a first step toward the adoption of a general 1-cent letter postage—to the Committee on the Post-Office and Post-Roads.

By Mr. FOSTER of Indiana: Petitions of Isthmian Court, No. 17; Poseyville Court, No. 223, and Yankeetown Court, No. 146, Tribe of Ben Hur, against the bill to codify or classify the statutes relative to second-class matter—to the Committee on the Post-Office and Post-Roads.

By Mr. GARBER: Petition of dealers and shippers of freight at Lima, Ohio, for the Madden bill (H. R. 23558) and the Culberson bill (S. 7887)—to the Committee on Interstate and Foreign Commerce.

By Mr. GOLDFOGLE: Petition of Trades League of Philadelphia, for bill S. 6923, as a first step toward 1-cent letter postage—to the Committee on the Post-Office and Post-Roads.

By Mr. GRAHAM: Petition of the Chamber of Commerce of Pittsburg, against any legislation to establish a parcels post—to the Committee on the Post-Office and Post-Roads.

Also, petition of the Trade League of Philadelphia, for bill S. 6923, as a first step toward 1-cent letter postage—to the Committee on the Post-Office and Post-Roads.

Also, petition of the Peace Association of Friends, of Philadelphia, for an international congress of arbitration and peace court at The Hague—to the Committee on Foreign Affairs.

By Mr. GRONNA: Petition of citizens of North Dakota, for an amendment to the free-alcohol law—to the Committee on Ways and Means.

By Mr. HALE: Paper to accompany bill for relief of John Metler—to the Committee on Invalid Pensions.

By Mr. HUFF: Petition of Trevyline Court, No. 12, Tribe of Ben Hur, against the bill to codify the statutes relating to classification of second-class mail matter (House Doc. No. 608)—to the Committee on the Post-Office and Post-Roads.

Also, petition of the Peace Association of Friends, of Philadelphia, for an international congress and permanent court at The Hague—to the Committee on Foreign Affairs.

By Mr. KENNEDY of Nebraska: Paper to accompany bill for relief of William H. Gray—to the Committee on Invalid Pensions.

By Mr. KNAPP: Petition of Glenfield Legion, No. 319, and Fulton Legion, No. 318, against passage of a bill to amend and codify the statutes relating to classification of second-class mail matter—to the Committee on the Post-Office and Post-Roads.

By Mr. LAMAR: Petition of the Journal, of Pensacola, Fla., against tariff on linotype machines—to the Committee on Ways and Means.

By Mr. LITTAUER: Petition of Fonda Legion, No. 1090, against the bill to amend and codify the statutes relating to second-class mail matter—to the Committee on the Post-Office and Post-Roads.

By Mr. LORIMER: Petition of N. D. Connelly, for legislation making eight hours a day's work for telegraphers—to the Committee on Labor.

By Mr. McCALL: Paper to accompany bill for relief of Gardner W. Perkins—to the Committee on Invalid Pensions.

By Mr. McKINLEY of Illinois: Petition of Simonides Court, No. 62, of Moline, Ill., Tribe of Ben Hur, against the bill to codify the statutes relating to second-class mail matter (House Doc. No. 608)—to the Committee on the Post-Office and Post-Roads.

Also, petition of the Mail, of Moline, Ill., against tariff on linotype machines—to the Committee on Ways and Means.

By Mr. OVERSTREET of Indiana: Petition of Goethe Lodge, No. 13, Independent Order Knights of Pythias, of Indianapolis, Ind., against the Littlefield bill—to the Committee on the Judiciary.

By Mr. REYBURN: Petition of the Peace Association of Friends, of Philadelphia, for an international congress and court at The Hague—to the Committee on Foreign Affairs.

By Mr. SAMUEL: Petition of citizens of Columbia County, Pa., asking an appropriation of $20,000 to present a sword of honor to Admiral W. S. Schley, and to cause to be struck bronze medals commemorating the battle of Santiago, and to distribute such medals to the officers and men of the American squadron under command of Commodore W. S. Schley on July 3, 1898—to the Committee on Appropriations.

By Mr. SHERMAN: Petition of Rome Legion, No. 844, against the passage of the bill to amend and codify the statutes relating to second-class mail matter—to the Committee on the Post-Office and Post-Roads.

By Mr. VAN WINKLE: Resolution of citizens in public meeting in Jersey City, N. J., protesting against the arrest and deportation of Moyer, Haywood, and Pettibone—to the Committee on the Judiciary.

## SENATE.

THURSDAY, *February 28, 1907.*

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. EDWARD E. HALE.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. BURROWS, and by unanimous consent, the further reading was dispensed with.

The VICE-PRESIDENT. The Journal stands approved.

### CLAIMS OF CONFEDERATE OFFICERS AND SOLDIERS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting a letter from the Secretary of War submitting an additional estimate of appropriation ($40,000) for the payment of claims for property taken from Confederate officers and soldiers after surrender, under the act of February 27, 1902; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

### SPECIAL EMPLOYEES IN DEPARTMENT OF COMMERCE AND LABOR.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of Commerce and Labor, transmitting, in response to resolutions of the 8th instant and 14th instant, certain information relative to employees of the Department of Commerce and Labor; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H. R. 9767) granting a pension to William J. Crane.

The message further announced that the House had passed the bill (S. 8535) for the relief of certain white persons who intermarried with Cherokee citizens, with amendments; in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to the concurrent resolution of the Senate authorizing a correction to be made in the enrollment of the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The message further announced that the House has passed a concurrent resolution requesting the President to return to the House the bill (H. R. 21606) granting an increase of pension to Felix G. Morrison; in which it requested the concurrence of the Senate.

The message also announced that the House had passed a concurrent resolution accepting the invitation of the Jamestown Exposition Company to attend the opening of the exposition, and providing for the appointment of a joint committee of the two Houses of Congress; in which it requested the concurrence of the Senate.

### ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

S. 925. An act authorizing the construction of four steam vessels for the Revenue-Cutter Service of the United States;

H. R. 1561. An act authorizing the Secretary of the Navy to grant a discharge to Peter O'Neil;

H. R. 4586. An act for the relief of Mrs. R. E. Miller;

H. R. 8894. An act granting an increase of pension to James C. Strong;

H. R. 10574. An act granting a pension to Edward W. Hoban;

H. R. 11279. An act to remove the charge of absence without leave from the military record of Oscar O. Bowen;

H. R. 12021. An act granting a pension to James M. Wood;

H. R. 14322. An act granting a pension to Abbie L. Hanford;

H. R. 15027. An act to remove the charge of desertion against Cornelius O'Callaghan;

H. R. 15779. An act granting a pension to Margaret A. Jordan;

H. R. 19239. An act granting a pension to Salome Jane Marland;

H. R. 19589. An act granting an increase of pension to Aaron Davis;

H. R. 19932. An act for the relief of John Lavine;

H. R. 21910. An act granting a pension to Emil S. Weisse;

H. R. 22041. An act granting a pension to John P. Walker;

H. R. 22086. An act granting a pension to Amelia Schmidtke;

H. R. 22392. An act granting an increase of pension to Eugene W. Rolfe;

H. R. 22395. An act granting a pension to Edward Miller;

H. R. 22599. An act to grant certain lands to the city of Boulder, Colo.;

H. R. 22696. An act granting a pension to Charles F. Ellingwood;

H. R. 22709. An act granting a pension to Martha E. Muhlenfeld;

H. R. 23391. An act to change the time of holding the United States district and circuit courts in the eastern district of North Carolina, and to provide for the appointment of a clerk of the courts of Washington, N. C.;

H. R. 23440. An act granting a pension to Carrie May Allen;

H. R. 23612. An act granting an increase of pension to Thomas H. Adams;

H. R. 23821. An act making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes;

H. R. 23855. An act granting a pension to Sarah E. Selders;

H. R. 23974. An act granting an increase of pension to John P. Bennett;

H. R. 24134. An act providing for the granting and patenting to the State of Colorado desert lands formerly in the Southern Ute Indian Reservation, in Colorado;

H. R. 24223. An act granting a pension to Martha A. L. Stephens;

H. R. 24300. An act granting a pension to Sadie E. Hawthorn;

H. R. 24355. An act granting a pension to Mary O. Learned;

H. R. 24404. An act granting a pension to Lauraette La Fleur;

H. R. 24414. An act granting a pension to Van C. Wilson;

H. R. 24419. An act granting a pension to Belle M. Ocker;

H. R. 24483. An act granting a pension to Clarence W. Thomas;

H. R. 24635. An act granting a pension to Elizabeth Stuessi;

H. R. 24838. An act granting an increase of pension to Henry H. A. Walker;

H. R. 24845. An act granting an increase of pension to Andrew J. Price;

H. R. 24846. An act granting an increase of pension to Robert M. Wolf;

H. R. 24851. An act granting an increase of pension to Oren S. Rouse;

H. R. 24855. An act granting a pension to George W. Robins;

H. R. 24861. An act granting an increase of pension to Otho E. D. Culbertson;

H. R. 24868. An act granting an increase of pension to John M. Stevens;

H. R. 24899. An act granting an increase of pension to Mary W. Lusk;

H. R. 24902. An act granting an increase of pension to John W. Rawlings;

H. R. 24905. An act granting an increase of pension to Susan E. Davis;

H. R. 24907. An act granting an increase of pension to Lloyd Roberts;

H. R. 24910. An act granting an increase of pension to William H. Churchill;

H. R. 24911. An act granting an increase of pension to James C. Cosgro;

H. R. 24921. An act granting an increase of pension to Patrick F. Shevlin, alias Patrick Burns;

H. R. 24924. An act granting an increase of pension to William V. Monroe;

H. R. 24940. An act granting an increase of pension to Timothy H. Gibson;

H. R. 24946. An act granting a pension to Phebe Wright;

H. R. 24947. An act granting an increase of pension to Edward Mailey;

H. R. 24957. An act granting an increase of pension to Francis H. Ferry;

H. R. 24958. An act granting an increase of pension to Henry Kanline;

H. R. 24965. An act granting an increase of pension to Jacob Gilbrech;

H. R. 24968. An act granting an increase of pension to John Burke;

H. R. 24969. An act granting an increase of pension to Charles N. Stafford;

H. R. 24971. An act granting an increase of pension to Elijah Devore;

H. R. 24984. An act granting an increase of pension to Lauranah J. Hedgepeth;

H. R. 25016. An act granting an increase of pension to Frederick G. Ackerman;

H. R. 25020. An act granting an increase of pension to Cinderella B. McClure;

H. R. 25023. An act granting an increase of pension to Virginia C. Galloway;

H. R. 25025. An act granting an increase of pension to John Ham;

H. R. 25069. An act granting an increase of pension to William A. Decker;

H. R. 25097. An act granting an increase of pension to Edmund P. Weatherby;

H. R. 25101. An act granting an increase of pension to Nancy A. Meredith;

H. R. 25106. An act granting an increase of pension to Francis A. Biffar;

H. R. 25108. An act granting an increase of pension to William H. Brown;

H. R. 25112. An act granting an increase of pension to William Turner;

H. R. 25113. An act granting an increase of pension to John H. Hayes;

H. R. 25120. An act granting an increase of pension to Charles B. Spring;

H. R. 25143. An act granting an increase of pension to Elizabeth Wolfe;

H. R. 25145. An act granting an increase of pension to Charles Henry Weatherwax;

H. R. 25149. An act granting an increase of pension to Joshua L. Hayes;

H. R. 25172. An act granting an increase of pension to Burgess N. Isaacs;

H. R. 25174. An act granting an increase of pension to Henry W. Casey;

H. R. 25176. An act granting an increase of pension to Gottfried Haferstein;

H. R. 25211. An act granting an increase of pension to Alphonso Brown;

H. R. 25214. An act granting an increase of pension to Robert H. Douglas;

H. R. 25224. An act granting an increase of pension to David C. Smith;

H. R. 25229. An act granting an increase of pension to James T. Blair;

H. R. 25247. An act granting an increase of pension to Warren Onan;

H. R. 25248. An act granting an increase of pension to Knute Thompson;

H. R. 25254. An act granting an increase of pension to George W. Warfel;

H. R. 25255. An act granting an increase of pension to Samuel Loy;

H. R. 25256. An act granting an increase of pension to Cyrus W. Scott;

H. R. 25257. An act granting an increase of pension to James H. Phillips;

H. R. 25260. An act granting an increase of pension to Thomas J. Richie;

H. R. 25261. An act granting an increase of pension to William M. Helvy;

H. R. 25263. An act granting an increase of pension to Thomas McDermott;

H. R. 25288. An act granting an increase of pension to Minna Y. Field;

H. R. 25303. An act granting an increase of pension to Adeline Brown;

H. R. 25305. An act granting an increase of pension to Edgar A. Stevens;

H. R. 25309. An act granting an increase of pension to Joseph Casavaw;

H. R. 25325. An act granting an increase of pension to Polly Ann Bowman;

H. R. 25328. An act granting an increase of pension to James W. Barr;

H. R. 25354. An act granting a pension to Alice House;

H. R. 25355. An act granting a pension to William McCraney;

H. R. 25391. An act granting an increase of pension to Richard Gogin;

H. R. 25445. An act granting an increase of pension to William E. Webster;

H. R. 25451. An act granting an increase of pension to William H. Maxwell;

H. R. 25455. An act granting an increase of pension to Emma Hempler; and

H. R. 25511. An act granting an increase of pension to Hiram Filkins.

## PETITIONS AND MEMORIALS.

The VICE-PRESIDENT presented resolutions adopted at the reunion of the Fifth Cavalry, Cameron Dragoons, of Philadelphia, Pa., extending their thanks to the President of the United States for his approval, on February 6, 1907, of the service-pension law; which were ordered to lie on the table.

He also presented a petition of the National Association of Cement Users, praying for the continuance of the annual appropriation for the investigation by the Geological Survey of cement, mortar, and concrete; which was ordered to lie on the table.

Mr. BURROWS. I have received several dispatches, in the nature of petitions, praying for the passage of the so-called "Murphy bill." I shall read only one:

OXFORD, MICH., *February 27, 1907.*

For the protection of traveling public and railroad operators we ask your support of Murphy bill.

I ask that the telegrams be noted in the RECORD, and that they may lie on the table.

The VICE-PRESIDENT. Without objection, it is so ordered.

The telegrams were ordered to lie on the table, as follows:

From G. C. Gillespie, M. J. Shop, and Claude Helfrich, of Oxford, Mich.; from L. Ueberhorst, Berry and Berry, operators, of the Michigan Central Railroad, of Bay City, Mich.; from Glass and Bowlby, operators, of Fabius, Mich.; from H. N. Marsh and J. R. Seavitt, operators, of Warren, Mich.; from C. A. Anderson, operator, of Vermontville, Mich.; from E. F. Slowey, of Albion, Mich.; from J. T. Northrup, of Van Horn, Mich.; from J. C. Culkins, general chairman, of Albion, Mich.; from J. P. Rourke, of Van Horn, Mich.; from O. D. Campbell, of Mason, Mich.; from H. V. Healy and C. Marshall, operators, of Nashville, Mich.; from M. F. Ryan, of Marshall, Mich.; from K. H. Brenard, of Doster, Mich.; from G. A. Needham, C. E. Carpenter, and H. M. Sargeant, telegraph operators, of Owosso Junction, Mich.; from M. J. Granger and C. R. Cady, of Lansing, Mich.; from F. W. Knapp and N. D. Vanauker, of Rives Junction, Mich.; from O. D. Campbell, H. D. Powers, and K. J. Mattison, telegraph operators, of Saginaw, Mich.; from C. H. Keefe, of Kalamazoo, Mich.; from W. R. Moore and G. H. Rose, operators, of Roscommon, Mich.; from R. D. Williamson, of Oakley, Mich.; from G. H. Stokes and J. E. Anstett, of Gaylord, Mich.; from M. K. Campbell, of Mason, Mich.; from G. M. Smith, operator, of Eden, Mich.; from A. O. Bourass and W. H. M. Creine, of West Branch, Mich.; from D. W. Barr and W. C. Erther, of Utica, Mich.; from L. Ruppert and C. H. Kaiser, of Pinconning, Mich.; from O. F. Foster, of Otter Lake, Mich.; from S. F. J. Stephenson and Murray Taylor, operators, of Metamora, Mich.; from White and Ketchum, Michigan Central operators, of Cassopolis, Mich.; from C. E. Honey and D. C. Honey, operators, of Standish, Mich.; from Frank M. Fangbomer, of Rochester, Mich.; from W. J. Shaw and E. G. Shaw, operators, of Grayling, Mich.; from H. L. Schell and R. C. Phillips, operators, of Dowagiac, Mich.; from Lewis and McIntyre, operators, of Eaton Rapids, Mich.; from O. K. Renner, F. A. Barrett, F. J. Wicks, G. H. Moulton, L. G. McMurray, G. E. Emmons, V. C. Vest, M. S. Hatch, and E. J. Bennett, of Niles, Mich.; from W. H. Weeks, of Monroe, Mich.; from J. Phibbs, W. Ellsworth, F. Avery, W. Beebe, F. Schoonmaker, D. Fuller, O. Edgett, and H. Hessmer, of Three Rivers, Mich.; from F. E. Schram, operator, of Kawkawlin, Mich.; from H. J. Keen and H. D. Trattles, operators, of Vandalia, Mich.; from Lewis and Wilson, of Middleville, Mich.; from E. H. Spencer, of Joma, Mich.; from J. L. Lacrone, W. V. Oconner, C. R. South, and C. W. Berry, operators, of New Buffalo, Mich.; from F. Fitch, E. J. Phillips, P. C. Johnson, A. R. Graham, B. Burlington, and C. L. Dine, of Decatur, Mich.; from McDonald, Ells, Martin, Rice, and Thomas, of Charlotte, Mich.; from John Wilkinson, of Parma, Mich.; from Daniel Odehu, of Rochester, Mich.; from W. E. Ames, of Monroe, Mich.; from E. B. Greenfield, of South Haven, Mich.; from C. M. Selby, Jefferson Kendalls, H. W. Phillips, T. F. Enright Williams, D. L. Stuart, and L. A. Culver, of Lacota, Mich., and from Isaac F. Boyer, operator, of Lawton, Mich.

Mr. PLATT presented petitions of sundry labor organizations of New York, Port Jervis, Buffalo, Albany, and Brooklyn, all in the State of New York, praying for the enactment of legislation providing for the protection of labor and industry from competition with convict labor and prison-made goods; which were referred to the Committee on Education and Labor.

He also presented a petition of sundry citizens of West Exeter, N. Y., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which was referred to the Committee on the Judiciary.

He also presented petitions of sundry telegraph operators of Rochester, Blasdell, Shortsville, Salem, Randolph, Cayuga, Hoosick, and Akron, all in the State of New York, praying for the adoption of a certain amendment to the bill (S. 5133) limiting the hours of employment of railroad telegraph operators; which were ordered to lie on the table.

Mr. BURNHAM presented petitions of sundry citizens of Portsmouth and Lakeport, in the State of New Hampshire, praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

He also presented petitions of Local Union No. 125, International Brotherhood of Blacksmiths, of Portsmouth; of Local Union No. 179, United Garment Workers of America, of Whitefield; of Loom Fixers' Union No. 548, of Lebanon; of Local Union No. 442, International Brotherhood of Blacksmiths and Helpers, of Concord; of Boot and Shoe Workers-Lasters Union No. 51, of Manchester; of Local Union No. 132, United Garment Workers of America, of Keene, and of the Manchester Mule Spinners' Union, of Manchester, all in the State of New Hampshire, praying for the enactment of legislation providing for the protection of labor and industry from competition with convict labor and prison-made goods; which were referred to the Committee on Education and Labor.

He also presented petitions of sundry citizens of Littleton, Lisbon, Bath, East Tilton, Gorham, Weirs, Winona, Ashland, Rumney Depot, Laconia, Plymouth, Wing Road, and Tilton, all in the State of New Hampshire, praying for the adoption of a certain amendment to the so-called "sixteen-hour bill," relating to railroad employees and telegraph operators; which were ordered to lie on the table.

Mr. SCOTT presented a memorial of sundry citizens of St. Marys, W. Va., remonstrating against the enactment of legislation to amend the law relating to the classification of second-class mail matter; which was ordered to lie on the table.

Mr. STONE presented a memorial of the Retail Merchants' Association of Springfield, Mo., remonstrating against the passage of the so-called "parcels-post bill;" which was referred to the Committee on Post-Offices and Post-Roads.

He also presented a petition of sundry citizens of Westphalia, Mo., praying for the adoption of certain amendments to the present denatured-alcohol law; which was ordered to lie on the table.

He also presented petitions of Local Union No. 166, of St. Louis; of Local Union No. 168, of Joplin; of Local Union No. 86, of Jefferson City, all of the United Garment Workers of America; of Local Lodge No. 113, of Sedalia; of Local Union No. 230, of Joplin, all of the International Brotherhood of Boiler Makers and Iron Shipbuilders and Helpers of America; of Local Union No. 2, International Brotherhood of Blacksmiths and Helpers, of De Soto, and of Iron Mountain Lodge, No. 6, Brotherhood of Railway Clerks, of St. Louis, all in the State of Missouri, praying for the enactment of legislation providing for the protection of labor and industries from the competition of convict labor and prison-made goods; which were referred to the Committee on Education and Labor.

Mr. HANSBROUGH. I present concurrent resolutions of the legislature of the State of North Dakota, which I ask may be printed in the RECORD and referred to the Committee on Agriculture and Forestry.

The concurrent resolutions were referred to the Committee on Agriculture and Forestry and ordered to be printed in the RECORD, as follows:

Concurrent resolution offered by Mr. Cashel.

*Be it resolved by the senate (the house of representatives concurring)*:

Whereas the valley of the Red River of the North is by nature one of the best, if not the best, of the river valleys of the American continent from an agricultural standpoint, but is at times from a combination of conditions so flooded, both by the overflow of the Red River and its tributaries and by the run-off of the higher lands lying adjacent to and on both sides thereof, and the raising of crops adjacent to the river is to a certain extent uncertain and hazardous; and

Whereas the people residing in the said valley are in the most urgent need of aid for the drainage of their lands in order that crop raising may be assured, and also of the regulation of the flow of the Red River for the purpose of insuring and improving its navigability and the prevention of overflow which results in great damage to life and property; and

Whereas numerous surveys and investigations of portions of this valley have been prosecuted in the past, both in the United States and in Manitoba; and

Whereas the officers of the United States Agricultural Department, in cooperation with the proper officers of the various States affected, are at the present time engaged in making a detailed study of the said valley in the United States, and the engineers of the public works department of Manitoba are also engaged in the study of the drainage conditions prevailing in the said valley in that province, all of which investigations and study are being carried on with the greatest possible speed consistent with careful study and the funds available; and

Whereas there still remains much to be done before there can be a full and complete understanding of the situation: Therefore, be it

*Resolved*, That liberal appropriations be made for the prosecution of these surveys by the departments of the Government having the same in charge, to the end that the data required for the proper drainage of the Red River Valley and the regulation of the flow of the Red River may be secured. Be it further

*Resolved*, That we earnestly and urgently request the government of Canada and the Congress of the United States to secure the appointment of an international commission as early as possible for the purpose of making a thorough investigation of the Red River and its tributaries, with a view of regulating the flood flow thereof, so as to prevent its overflow in the times of flood and improve navigation in periods of low water. Be it further

*Resolved*, That the extensive drainage projects now being carried on throughout the valley, and which will materially affect the volume of water in said river in the flood period, make it imperative that the flow of this river be regulated as far as possible, with a view to meeting the conditions created by these improvements. Be it further

*Resolved*, From estimates made by the Government engineers and local engineers it is apparent that the waters of the Red River can be controlled by the construction of a canal connecting Lake Traverse with the Big Stone Lake, thereby lowering the water level of said Lake Traverse and turning the flow from its basin into the Minnesota River in flood time, and by the construction of a reservoir dam at Otter Tail Lake, a reservoir dam at the foot of Red Lake, a reservoir dam on the Sheyenne River at some feasible point, to retain the waters of its basin during flood periods, and a dam on the Pembina River, suitably located to control the floods of that stream, which drains from a large area in Manitoba and North Dakota. By the construction of these dams and reservoirs the damage from overflow of the Red River would be averted and navigation materially improved in low stages of water. From investigations and estimates made by competent engineers the proposed improvements can be constructed at a cost not to exceed $500,000. Be it further

*Resolved*, That the Senators and Representatives from the States of Minnesota, North and South Dakota be requested to use all earnest endeavors to have a joint commission appointed, and that an appropriation be made sufficient to defray the expenses thereof; and that

the government of Canada be requested to cooperate in the appointment of such joint commission. Be it further

*Resolved*, That the legislative assembly of the States of Minnesota and South Dakota, the legislature of Manitoba, and the parliament of the Dominion of Canada be respectfully requested to consider these resolutions and to cooperate, through their representatives in their respective lawmaking bodies, in carrying out the object sought in these resolutions; and be it further

*Resolved*, That the secretary of state be instructed to forward certified copies of these resolutions, one each to the Senators and Representatives in Congress of the three States named, the speaker of the legislature of Manitoba, the presiding officer of the Dominion parliament at Ottawa, Canada, and the Secretary of War, Washington, D. C.

R. S. LEWIS, *President of the Senate.*
JAMES W. FOLEY, *Secretary of the Senate.*
TREADWELL TWICHELL, *Speaker of the House.*
P. D. NORTON, *Chief Clerk of the House.*

I, James W. Foley, secretary of the senate, do hereby certify that the foregoing concurrent resolution originated in and was adopted by the senate of the tenth legislative assembly of the State of North Dakota, and was concurred in by the house of representatives.

JAMES W. FOLEY, *Secretary of the Senate.*

Mr. GALLINGER presented a petition of sundry citizens of Somersworth, N. H., and a petition of sundry citizens of Rindge, N. H., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

Mr. BULKELEY presented petitions of sundry citizens of New Milford, Derby, and Middletown, all in the State of Connecticut, praying for the adoption of certain amendments to the present denatured-alcohol law; which were ordered to lie on the table.

Mr. CULLOM presented petitions of sundry telegraph operators, in the State of Illinois, praying for the adoption of a certain amendment to the bill (S. 5133) to limit the hours of employment of railroad telegraph operators; which were ordered to lie on the table.

He also presented petitions of sundry citizens of the State of Illinois, praying for the adoption of a certain amendment to the service-pension law of February 6, 1907, relating to attorney's fees, etc.; which were referred to the Committee on Pensions.

Mr. DEPEW presented petitions of sundry citizens of New York, Portville, and Brooklyn, all in the State of New York, praying for the adoption of certain amendments to the present denatured-alcohol law; which were ordered to lie on the table.

He also presented a memorial of sundry citizens of Syracuse, N. Y., remonstrating against the enactment of legislation requiring certain places of business in the District of Columbia to be closed on Sunday; which was referred to the Committee on the District of Columbia.

He also presented petitions of sundry telegraph operators of Shortsville, Eagle Bridge, Randolph, Phelps, Poughquag, Chili Station, and Salem, all in the State of New York, praying for the adoption of a certain amendment to the bill (S. 5133) to limit the hours of employment of railroad telegraph operators; which were ordered to lie on the table.

He also presented a petition of the Art Metal Work Class, Pratt Institute, Brooklyn, N. Y., praying for the removal of the duty on works of art; which was referred to the Committee on Finance.

He also presented a petition of the Chamber of Commerce of Utica, N. Y., praying for the enactment of legislation to provide for the separate development of surface lands for agricultural purposes and extraction of minerals; which was referred to the Committee on Agriculture and Forestry.

He also presented petitions of sundry citizens of Tottenville, Lyons, Farmington, Otto, Minaville, Root, Lee Center, and New York City, all in the State of New York, praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were ordered to lie on the table.

He also presented memorials of Dwight Post, No. 109, Department of New York, Grand Army of the Republic, of Sodus; of the executive committee of the Grand Army of the Republic of Brooklyn, and of the executive committee of the Grand Army of the Republic of Buffalo, all in the State of New York, remonstrating against the enactment of legislation abolishing the pension agencies throughout the country; which were ordered to lie on the table.

Mr. LODGE presented a petition of the Carter's Ink Company, of Boston, Mass., praying for the adoption of certain amendments to the present denatured-alcohol law; which was ordered to lie on the table.

He also presented petitions of sundry citizens of Maynard and Readville, all in the State of Massachusetts, praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

Mr. FRYE presented a petition of sundry citizens of Yarmouthville, Me., praying for the enactment of legislation providing that no railroad trainman shall work for more than sixteen hours in twenty-four and a telegraph operator for more than nine hours in twenty-four; which was ordered to lie on the table.

Mr. KNOX presented a memorial of the German Club of Pittsburg, Pa., remonstrating against the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which was referred to the Committee on the Judiciary.

He also presented petitions of Local Union No. 44, International Broom and Whisk Makers' Union, of Pittsburg; Local Union No. 156, International Brotherhood of Blacksmiths and Helpers, of Altoona; Lodge No. 2, Amalgamated Association of Iron, Steel, and Tin Workers, of Newcastle; Local Union No. 5, National Print Cutters' Association, of York; Messrs. Balbirnie & Johnson, of Philadelphia; Local Union No. 382, Boot and Shoe Workers' Union, of Allentown, all in the State of Pennsylvania, praying for the enactment of legislation providing for the protection of labor and industries from the competition of convict labor and manufactures; which were referred to the Committee on Education and Labor.

He also presented petitions of C. B. Dudley, of Altoona; Parker Boiler Company, of Philadelphia; Baldwin Locomotive Works, of Philadelphia; A. D. Granger Company, of Pittsburg; Frank Miles Day, of Philadelphia; Vulcanite Portland Cement Company, of Philadelphia; James L. Lyons and sundry structural engineers, of Ambridge; William White, of Pittsburg; Elton D. Walker, of State College; Thomas J. Brerton, of Chambersburg; Fred N. Loher, of Harrisburg; Emil Swensson, of Pittsburg; J. A. Atwood, of Pittsburg; George T. Barnesly, of Pittsburg; T. D. Lynch, of Pittsburg, all in the State of Pennsylvania, and D. Robert Yarnall, of Newark, N. J., praying for the enactment of legislation providing for appropriations for the continuation of the investigations of fuel substances and structural materials; which were referred to the Committee on Appropriations.

Mr. HOPKINS presented petitions of sundry citizens of Blue Island, Evanston, Sullivan, Matteson, Melrose Park, and Riverside, all in the State of Illinois, and 107 petitions of sundry citizens of Chicago, Ill., praying for the repeal of section 3 of the service-pension law of February 6, 1907; which were referred to the Committee on Pensions.

Mr. OVERMAN (for Mr. SIMMONS) presented a petition of sundry citizens of North Carolina, praying for the adoption of certain amendments to the present denatured-alcohol law; which was ordered to lie on the table.

Mr. PENROSE presented memorials of sundry citizens of Lancaster, Sunbury, and Lehigh counties, all in the State of Pennsylvania, remonstrating against the enactment of legislation requiring certain places of business in the District of Columbia to be closed on Sunday; which were referred to the Committee on the District of Columbia.

He also presented petitions of sundry citizens of Brookville and Bradford County, in the State of Pennsylvania, praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

He also presented memorials of District Lodge, No. 46, German Beneficial Union, of Tarentum; of the Deutscher Landwehr Unterstuetzungs Verein, of Philadelphia; of the Deutscher Club, of Philadelphia, and of the Deutscher Krieger Verein, of Philadelphia, all in the State of Pennsylvania, remonstrating against the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

Mr. FULTON. I present a joint memorial of the legislature of the State of Oregon, which I ask may be printed in the RECORD and referred to the Committee on Pensions.

The joint memorial was referred to the Committee on Pensions and ordered to be printed in the RECORD, as follows:

Senate joint memorial No. 7.

*The honorable Senate and House of Representatives,*
*Congress of the United States.*

GENTLEMEN: Your memorialists of the legislative assembly of the State of Oregon would respectfully and earnestly represent to your honorable body that the citizens and early settlers of what is known as "eastern Oregon" were subject to an invasion by hostile Indians in what is known as the "Bannock war," in 1878, and that it became necessary for the actual residents to take up arms against these hostile Indians; that in spite of the fact that they rallied to the defense of their families and their country, they were subject to great loss of property and loss of life, and that during this war there was fought by the volunteers in that locality what was known as the "Willow Springs battle," and that at this place a number of people lost their lives; that there are a few at the present time living; that the volunteers who resisted the Indians at this place were made up of two companies, one from western Oregon and the other from Pendleton, Oreg., and that they were under the command of one Capt. W. W. Oglesby, an officer duly commissioned by the governor of the State of

Oregon, and that we believe that these people are as justly entitled to a pension as a great many of the Indian-war veterans: Therefore,

We urge your honorable body to take up the early passage of a bill granting them a pension on a par with other Indian-war veterans. It is hereby directed that a copy of this memorial, after being duly signed by the president of the senate and the speaker of the house of representatives and attested by the chief clerks of the two houses, be forwarded to each of Oregon's Senators and Representatives in Congress.

Adopted by the house February 20, 1907.

FRANK DAVEY, *Speaker.*

Attested by the chief clerk of the house of representatives.

W. LAIR THOMPSON, *Chief Clerk.*

Adopted by the senate February 19, 1907.

E. W. HAINES, *President.*

Attested by the chief clerk of the senate.

FRANK S. GRANT, *Chief Clerk.*

Mr. FULTON. I present a joint memorial of the legislature of Oregon, which I ask may be printed in the RECORD and referred to the Committee on Public Lands.

The joint memorial was referred to the Committee on Public Lands, and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that the annexed page contains a full, true, and complete copy of house joint memorial No. 4, adopted by the house of representatives of the State of Oregon February 12, 1907, and by the senate of the State of Oregon February 18, 1907, original of which memorial was filed in this office February 18, 1907.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 19th day of February, A. D. 1907.

[SEAL.] F. W. BENSON, *Secretary of State.*

House joint memorial No. 4.

*To the honorable Senate and House of Representatives of the United States of America:*

Your memorialists, the legislative assembly of the State of Oregon, most respectfully represent that—

Whereas Congress in its wisdom has granted large forest reserves within the boundaries of the State of Oregon; and

Whereas many public highways traverse through said reserves; and

Whereas the lands embraced in said reserves are withdrawn from public sale or entry by settlers and are not and can not be subject to taxation; and

Whereas the construction and maintenance of such highways is a great burden and expense to the several counties of the State bordering upon such reserves:

Therefore, the legislative assembly of the State of Oregon memorialize and pray the Congress of the United States to appropriate and pay to the county court of each county containing such highways traversing such reserves a sum equal to $10 per mile annually, to be expended under the supervision of the county courts of the respective counties, for the purpose of keeping in repair such highways where the same traverse such reservation, and your memorialists will ever pray.

*Resolved*, That the secretary of state of the State of Oregon be, and he is hereby, instructed to forward a copy of this memorial to the Oregon Senators and Representatives in Congress with the request that they use every honorable means to secure the appropriation herein asked.

Adopted by the house February 12, 1907.

FRANK DAVEY,
*Speaker of the House.*

Adopted by the senate February 18, 1907.

E. W. HAINES,
*President of the Senate.*
W. LAIR THOMPSON,
*Chief Clerk.*

Filed February 16, 1907.

F. W. BENSON, *Secretary of State.*

Mr. FULTON. I present a joint memorial of the legislature of the State of Oregon, which I ask may be printed in the RECORD and referred to the Committee on Post-Offices and Post-Roads.

The joint memorial was referred to the Committee on Post-Offices and Post-Roads, and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA, STATE OF OREGON,
OFFICE OF THE SECRETARY OF STATE.

I, F. W. Benson, Secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that the annexed page contains a full, true, and complete copy of house joint memorial No. 3, adopted by the house of representatives of the legislature of the State of Oregon February 1, 1907, and concurred in by the senate of the State of Oregon February 4, 1907, original of which memorial was filed in this office February 5, 1907.

In testimony whereof I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 6th day of February, A. D. 1907.

[SEAL.] F. W. BENSON, *Secretary of State.*

House joint memorial introduced by Mr. Holt.

Whereas since the establishment of the systems of rural free delivery of mail in Oregon the State has become more populous and the labors of rural mail carriers have increased in proportion; and

Whereas the compensation paid carriers on the rural delivery routes has always been inadequate and is not commensurate with the labors performed: Therefore, be it

*Resolved by the house of representatives of the State of Oregon (the senate concurring)*, That the compensation of rural mail carriers should be increased by Congress to at least $1,000 per annum, and that the Congress of the United States is hereby memorialized to provide a compensation of at least $1,000 per annum for rural mail carriers: Be it

*Further resolved*, That a copy of this memorial be sent to the Oregon delegation in Congress.

Adopted by the house February 1, 1907.

FRANK DAVEY,
*Speaker of the House.*

Concurred in by the senate February 4, 1907.

E. W. HAINES,
*President of the Senate.*

Filed February 5, 1907.

F. W. BENSON,
*Secretary of State.*

Mr. FULTON presented a petition of sundry citizens of Plainview, Oreg., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which was referred to the Committee on the Judiciary.

He also presented a petition of the Quarterly Meeting of Friends, of Salem, Oreg., praying for the enactment of legislation providing for some general plan for the reduction of armaments among the nations of the world; which was referred to the Committee on Naval Affairs.

Mr. TELLER. I present a joint memorial of the legislature of the State of Colorado, which I ask may be printed in the RECORD, and referred to the Committee on Post-Offices and Post-Roads.

The joint resolution was referred to the Committee on Post-Offices and Post-Roads, and ordered to be printed in the RECORD, as follows:

[Certificate.]

STATE OF COLORADO,
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA, *State of Colorado, ss:*

I, Timothy O'Connor, secretary of state of the State of Colorado, do hereby certify that the annexed is a full, true, and complete transcript of senate joint resolution No. 3, passed by the sixteenth general assembly of the State of Colorado, which was filed in this office the 20th day of February, A. D. 1907, at 10.50 o'clock a. m.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Colorado at the city of Denver this 20th day of February, A. D. 1907.

[SEAL.] TIMOTHY O'CONNOR,
*Secretary of State.*

Senate joint resolution No. 3.

Whereas the House of Representatives of the United States is about to consider proposed reductions in the appropriation of moneys for the carriage of the United States mails aggregating about 30 per cent; and

Whereas any reduction from the usual appropriation for that purpose would seriously impair and cripple the mail service throughout the Western States to the great damage and injury of the business interests thereof, and would to a large extent destroy the efficiency of the present mail service, upon which the business interests of the Western States are largely dependent; and

Whereas the business interests of the Western States have had no opportunity for a hearing before the Congress in relation to the matter: Now, therefore, be it

*Resolved by the senate of the sixteenth general assembly of the State of Colorado (the house concurring)*, That Senators and Representatives in Congress from the State of Colorado be, and they are hereby, urged and requested to use every honorable effort to prevent a reduction in the appropriations for carrying the United States mails until a full hearing can be had before the committees of the Congress and ample opportunity afforded to the people and commercial bodies of the Western States to be heard in relation thereto; and be it

*Further resolved*, That a copy of this joint resolution be sent at once by the secretary of state of the State of Colorado to each of the Senators and Representatives in the Congress from this State.

E. H. HARPER,
*President of the Senate.*
R. G. BRECKENRIDGE,
*Speaker of the House of Representatives.*
HENRY A. BUCHTEL,
*Governor of the State of Colorado.*

February 20, 1907.

Filed in the office of the secretary of state of the State of Colorado on the 20th day of February, A. D. 1907, at 10.50 o'clock a. m.

TIMOTHY O'CONNOR,
*Secretary of State.*
By JOHN E. RAMER, *Deputy.*

Mr. TELLER. I present a joint memorial of the legislature of the State of Colorado, which I ask may be printed in the RECORD and referred to the Committee on Public Lands.

The joint memorial was referred to the Committee on Public Lands, and ordered to be printed in the RECORD, as follows:

[Certificate.]

STATE OF COLORADO,
OFFICE OF THE SECRETARY OF STATE.

UNITED STATES OF AMERICA, *State of Colorado, ss:*

I, Timothy O'Connor, secretary of state of the State of Colorado, do hereby certify that the annexed is a full, true, and complete transcript of senate joint memorial No. 2, passed by the sixteenth general assembly of the State of Colorado, approved February 19, 1907, and filed in this office the 19th day of February, A. D. 1907, at 11 o'clock a. m.

In testimony whereof I have hereunto set my hand and affixed the great seal of the State of Colorado at the city of Denver this 20th day of February, A. D. 1907.

[SEAL.] TIMOTHY O'CONNOR,
*Secretary of State.*

Senate joint memorial No. 2.

*To the honorable Senate and House of Representatives of the United States of America in Congress assembled:*

Your memorialists, the general assembly of the State of Colorado, would respectfully represent that there are many thousands of acres

of arid lands in the former Southern Ute Indian Reservation, in this State, which are so located and at such a distance from any permanent water supply for irrigation that individual settlers are practically prohibited from reclaiming such lands; and on account of the great expense necessary to construct canals and reservoirs for irrigating the same private capital for such enterprises can not be obtained without some reasonable security for the investment, and for these reasons, although this land has now been open to settlement for eight years, this portion of Colorado remains in its original state.

Your memorialists desire to call the attention of your honorable body to the so-called "Carey Act," which was enacted by Congress in 1894 for the purpose of meeting just such conditions as now exist in the former Southern Ute Reservation, in this State, by attracting capital sufficient to furnish a permanent water supply at a reasonable cost on easy payments to the home seeker.

Your memorialists desire to state further that while Colorado accepted the provisions of the Carey Act in 1895, yet when the State, in accordance with the provisions of such act, made application to the Commissioner of the General Land Office for the segregation of a tract of approximately 16,000 acres, for the complete irrigation and reclamation of which a system of canals and reservoirs was partially completed, financed by a company which was amply able to and did guarantee its immediate completion, and a permanent water supply for every acre thereof, such segregation was refused on account of a former law enacted by your honorable body, providing that the moneys derived from the sale of these lands should constitute a trust fund for the benefit of the Southern Ute Indians.

Your memorialists further represent that notwithstanding the latter law Congress passed an act in 1901 exempting from the provisions thereof all homesteads and provided therein that all sums of money that might be lost to such trust funds thereby should be paid by the United States Government.

Your memorialists therefore urgently request that your honorable body pass an act donating, granting, and patenting to the State of Colorado, free of price or cost of survey, such desert lands, upon compliance by this State with the provisions of section 4 of the so-called "Carey Act," and that the United States shall pay into such trust fund for the benefit of the Ute Indians all moneys which might be lost to them by such law, to the end that this vast territory may no longer remain uninhabited and in its natural state, but may be fully reclaimed, settled upon, and peopled.

E. R. HARPER,
*President of the Senate.*
R. C. BRECKENRIDGE,
*Speaker of the House of Representatives.*
HENRY A. BUCHTEL,
*Governor of the State of Colorado.*

February 19, 1907, 11 a. m.

Filed in the office of the secretary of state of the State of Colorado on the 19th day of February, A. D. 1907, at 11 o'clock a. m.

TIMOTHY O'CONNOR,
*Secretary of State.*
By JOHN E. RAMER,
*Deputy.*

Mr. TELLER presented petitions of sundry citizens of Pueblo and Denver, in the State of Colorado, praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

He also presented a petition of the Grand River Stock Growers' Association, the Roaring Fork and Eagle River Stock Growers' Association, and the Colorado Cattle and Horse Growers' Association, all in the State of Colorado, praying the enactment of legislation to protect their rights to grazing upon the forest reserves, etc.; which was ordered to lie on the table.

He also presented a memorial of the United States Monetary League, of Denver, Colo., remonstrating against the recommendation of the President in his annual message relative to the betterment of the money system of the country; which was referred to the Committee on Finance.

He also presented a petition of the Printing Pressmen's Union of Denver, Colo., and a petition of the Musical Protective Association of Denver, Colo., praying for the enactment of legislation to amend the Chinese-exclusion law so as to include Japanese and Koreans; which were ordered to lie on the table.

He also presented a petition of the Commercial Club of Greeley, Colo., praying for the enactment of legislation authorizing the Interstate Commerce Commission to make investigation into the cause of all railroad wrecks; which was referred to the Committee on Interstate Commerce.

Mr. SPOONER presented petitions of sundry citizens of Ellsworth, Wis., praying for the adoption of certain amendments to the present denatured-alcohol law; which were ordered to lie on the table.

He also presented a memorial of sundry citizens of Fish Creek, Wis., remonstrating against the enactment of legislation requiring certain places of business in the District of Columbia to be closed on Sunday; which was referred to the Committee on the District of Columbia.

### MILITARY ACADEMY APPROPRIATION BILL.

Mr. SCOTT submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24537) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1908, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 3, 4, 18, and 20.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 5, 6, 7, 9, 10, 11, 12, 13, 14, 16, 19, and 21, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "twenty-six thousand nine;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 15, and agree to the same with an amendment as follows: In lieu of the matter proposed in said amendment insert: "The members of the Senate and House of Representatives appointed to serve on the Board of Visitors to the Military Academy at West Point for the year nineteen hundred and seven are directed to investigate as to the advisability of maintaining a children's school at Government expense at said academy, and to report their findings to the next session of Congress;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "fifty-four thousand nine hundred and thirty-five;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: In lieu of the amount proposed in said amendment insert "forty-three thousand and twenty-five;" and the Senate agree to the same.

N. B. SCOTT,
J. A. HEMENWAY,
JO. C. S. BLACKBURN,
*Managers on the part of the Senate.*
J. A. T. HULL,
A. B. CAPRON,
JAMES L. SLAYDEN,
*Managers on the part of the House.*

The report was agreed to.

### REPORTS OF COMMITTEES.

Mr. BURROWS, from the Committee on Finance, to whom were referred the following bills, reported them severally without amendment:

A bill (H. R. 8727) for the relief of James W. Kenney and the Union Brewing Company; and

A bill (H. R. 19275) for the relief of T. E. Boyt.

Mr. HOPKINS, from the Committee on Post-Offices and Post-Roads, to whom was referred the bill (H. R. 6104) to reimburse John Waller, late postmaster at Monticello, N. Y., for moneys expended in carrying the mails, reported it without amendment, and submitted a report thereon.

Mr. WARREN, from the Committee on Military Affairs, to whom was referred the bill (S. 8585) for the relief of Charles W. Spalding, reported it with an amendment, and submitted a report thereon.

Mr. CURTIS, from the Committee on Indian Affairs, to whom was referred the bill (S. 8540) to ratify a certain lease with the Seneca Nation of Indians, reported it without amendment, and submitted a report thereon.

Mr. DICK, from the Committee on Naval Affairs, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 8230) for the relief of Harold D. Childs; and

A bill (S. 8009) to correct the naval record of Charles H. Haswell.

Mr. PETTUS, from the Joint Select Committee on the Disposition of Useless Papers in the Executive Departments, submitted a report relative to useless papers in the Post-Office Department; which was ordered to be printed.

### THE METROPOLITAN POLICE.

Mr. GALLINGER. I have favorable reports to make from the Committee on the District of Columbia on two House bills, and it is quite important that they should be passed.

I am directed by the Committee on the District of Columbia, to whom was referred the bill (H. R. 25630) to amend an act entitled "An act to amend section 1 of an act entitled 'An act relating to the Metropolitan police of the District of Columbia,' approved February 28, 1901," approved June 8, 1906, to report it favorably with an amendment, and I venture to ask unanimous consent that it may be considered at this time.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The amendment was, to add at the end of the bill the following:

And any unexpended balance of the appropriation providing for salaries of members of classes 2 and 3 during the fiscal year in which said appointments are made is hereby made available for the payment of the salaries of the additional privates of class 1 provided for herein.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. GALLINGER. I am directed by the Committee on the District of Columbia to report back adversely the bill (S. 8442) to amend an act entitled "An act to amend section 1 of an act entitled 'An act relating to the Metropolitan police of the District of Columbia,' approved February 28, 1901," approved June 8, 1906. I move that the bill be indefinitely postponed.

The motion was agreed to.

FIRE ESCAPES IN THE DISTRICT OF COLUMBIA.

Mr. GALLINGER. I report back favorably without amendment, from the Committee on the District of Columbia, the bill (H. R. 19524) to amend an act entitled "An act to require the erection of fire escapes in certain buildings in the District of Columbia, and for other purposes," approved March 19, 1906, and I ask unanimous consent for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

Mr. HALE. There was so much noise in the Chamber I could not well hear the reading of the bill. Let me ask the Senator who reports it whether it is directory or permissive?

Mr. GALLINGER. It is absolutely directory. I will say to the Senator that during the last session a bill was passed providing for fire escapes on all buildings three stories in height except private residences. That was made mandatory. The Commissioners have recommended that in fireproof buildings occupied as offices that might be waived if proper stairways are built, as provided for in the bill, two stairways 3 or more feet wide and at least 30 feet apart, one of them reaching to the roof. That is the only change made. It is a well-guarded bill, and it takes care, I think, absolutely of life and property in the District.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ANNA JOHNSON.

Mr. HANSBROUGH. I am directed by the Committee on Public Lands, to whom was referred the bill (S. 8580) granting land to Anna Johnson, to report it favorably without amendment, and I ask unanimous consent for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It directs the Secretary of the Interior to issue to Anna Johnson, wife of Ging Sing, alias Jim Johnson, a patent to the following-described land, to wit: The southwest quarter of section 29, in township 13 south, range 3 east of the New Mexico principal meridian.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PETER PARSCH.

Mr. FORAKER. I am directed by the Committee on Military Affairs to report back favorably without amendment the bill (H. R. 15320) to remove charge of desertion standing against Peter Parsch, and I ask for its immediate consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It directs the Secretary of War to remove the charge of desertion standing against Peter Parsch, late a member of Company E, One hundred and twenty-fourth Regiment Ohio Volunteer Infantry, and issue him an honorable discharge. But no pay, bounty, or other emoluments shall become due or payable by virtue of the passage of the act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

NORFOLK AND PORTSMOUTH TRACTION COMPANY.

Mr. TALIAFERRO. I report back favorably from the Committee on Military Affairs, without amendment, the bill (H. R. 24605) granting to the Norfolk and Portsmouth Traction Company the right to operate trains through the military reservation on Willoughby Spit, Norfolk County, Va., and I ask unanimous consent for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BUILDING OF DAMS ACROSS MISSISSIPPI RIVER.

Mr. FRYE. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 25716) to amend an act entitled "An act permitting the building of a dam across the Mississippi River above the village of Monticello, Wright County, Minn.," approved June 14, 1906, to report it favorably without amendment, and I ask for its consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. FRYE. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 25717) to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Clearwater, Wright County, Minn.," approved June 14, 1906, to report it favorably without amendment, and I ask for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BUILDING OF DAMS ACROSS SAVANNAH RIVER.

Mr. FRYE. I am directed by the Committee on Commerce, to whom was referred the bill (S. 8583) permitting the building of a dam across the Savannah River at Calhoun Falls to report it favorably without amendment, and I ask for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. FRYE. I am directed by the Committee on Commerce, to whom was referred the bill (S. 8581) permitting the building of a dam across the Savannah River at Trotters Shoals to report it favorably without amendment, and I ask that it be put on its passage.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. FRYE. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 25776) permitting the building of a dam across the Savannah River at Middleton Shoals to report it favorably without amendment, and I ask that it may be put on its passage.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. FRYE. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 25774) permitting the building of a dam across the Savannah River at Turner Shoals, to report it favorably without amendment, and I ask that it be put on its passage.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. FRYE. I am directed by the Committee on Commerce, to whom was referred the bill (H. R. 25773) permitting the building of a dam across the Savannah River at McDaniel Shoals, to report it favorably without amendment, and I ask for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. FRYE. I am directed by the Committee on Commerce,

to whom was referred the bill (S. 8572) permitting the building of a dam across the Savannah River at Andersonville Shoals, to report it favorably without amendment, and I ask for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. FRYE. I am directed by the Committee on Commerce, to whom was referred the bill (S. 8584) permitting the building of a dam across the Savannah River at Hattons Ford, to report it favorably without amendment, and I ask for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CONDEMNED GUNS AND CANNON BALLS.

Mr. WARREN. I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 25401) to authorize the Secretary of War to make certain disposition of condemned guns and cannon balls, to report it favorably without amendment. It is a short bill and I ask for its present consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MORRIS H. WALKER.

Mr. WARREN. I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 24022) to correct the military record of Morris H. Walker, to report it favorably without amendment, and I submit a report thereon. I ask that the bill be put upon its passage.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It directs the Secretary of War to correct the record of Morris H. Walker, late a private of Company K, Sixty-fifth Illinois Volunteers, by considering him absent with leave from October 12, 1862, to November 20, 1862. But no pay, bounty, or other emolument shall become due or payable by virtue of the passage of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

CHARLES H. KELLEN.

Mr. WARREN. I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 24390) to correct the military record of Charles H. Kellen, to report it favorably without amendment, and I submit a report thereon. I ask that the bill be put upon its passage.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It provides that Charles H. Kellen, late sergeant, Company F, Seventh Regiment Rhode Island Volunteer Infantry, shall hereafter be held and considered to have been mustered into the military service of the United States as a second lieutenant of the Seventh Regiment Rhode Island Volunteer Infantry on December 8, 1862, and to have continued in service as second lieutenant of the regiment until the date of his death, to wit, the 28th day of December, 1862, but no pay, compensation, or remuneration of any kind or nature whatsoever shall accrue or become due or payable to any person or persons whatsoever by reason or on account of the passage of the act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

JACOB ROCKWELL.

Mr. HEMENWAY. I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 21857) to correct the military record of Jacob Rockwell, to report it favorably without amendment, and I submit a report thereon. I ask for the immediate consideration of the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It authorizes the Secretary of War to review the military record of Jacob Rockwell, late of Battery L, Fourth United States Artillery, and grant him an honorable discharge, but no pay, bounty, or other emoluments shall become due or payable by virtue of the passage of the act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PROPOSED INVESTIGATION BY FINANCE COMMITTEE.

Mr. ALDRICH, from the Committee on Finance, reported the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

*Resolved*, That the Committee on Finance be, and they are hereby, authorized and directed, by subcommittee or otherwise, to make an investigation of internal revenue, customs, currency, and coinage matters, and to report from time to time to the Senate the result thereof; and for this purpose they are authorized to sit, by subcommittee or otherwise, during the recess or sessions of the Senate, at such times and places as they may deem advisable, to send for persons and papers, to administer oaths, and to employ such stenographic, clerical, and other assistance as may be necessary, the expense of such investigation to be paid from the contingent fund of the Senate.

ESCAMBIA RIVER BRIDGE IN FLORIDA.

Mr. MALLORY. From the Committee on Commerce I report back without amendment the bill (H. R. 25795) to authorize the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, to construct a bridge over the Escambia River between the counties of Santa Rosa and Escambia, in the State of Florida, and I ask for its immediate consideration.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. MALLORY. Yesterday the Senate passed identically the same bill, the bill (S. 8556) to authorize the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, to construct a bridge over the Escambia River, between the counties of Santa Rosa and Escambia, in the State of Florida. I suppose the bill has been sent to the House, and I ask unanimous consent that the House be requested to return the bill, with a view to its indefinite postponement.

The VICE-PRESIDENT. Without objection, the bill will be recalled from the House of Representatives, and a motion to reconsider will be entered.

RETIREMENT OF ARMY OFFICERS.

Mr. WARREN. I am directed by the Committee on Military Affairs, to whom was referred the joint resolution (S. R. 91) adjusting the status of certain officers of the Army as to their period of service required by the act of Congress approved June 30, 1882, to entitle an Army officer to retirement on his own application, to report it favorably without amendment, and I submit a report thereon. I ask for the present consideration of the joint resolution.

The Secretary read the joint resolution; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It provides that the period of service entitling an Army officer to retirement on his own application, as required by act of Congress approved June 30, 1882, shall include all service rendered by such officers as cadets at the United States Naval Academy, Annapolis, Md., or subsequent to graduation therefrom, or to service as commissioned officers of the Navy, or to both.

Mr. HALE. Has the joint resolution ever been before the Committee on Naval Affairs?

Mr. WARREN. I do not think it has been there. It is merely to count the naval service in an Army officer's service in computing the time for retirement.

Mr. HALE. I thought it applied to the Navy.

Mr. WARREN. Only that the service in the Navy may be counted as in the Army in the matter of retirement. The law now provides that the time of service at West Point as a cadet is counted, but if the officer has served in the Navy or at the Naval Academy it does not count on the Army side. This is merely to count that time.

Mr. HALE. His service in any branch of the Navy would count for a naval officer at present, and this gives the Army officer the benefit of any naval service he rendered.

Mr. WARREN. I do not know that I made myself clear. In a case where the officer's life has been with the Army except possibly one, two, or three years that formerly may have been spent in the Navy, the time spent in the Navy is to be counted.

Mr. HALE. I think I am stating it correctly. It gives the Army officer the benefit of any service he has rendered in the naval establishment——

Mr. WARREN. Yes; for the purpose of computing the time of retirement.

Mr. HALE. For the purpose of computing his Army service, but it applies only to Army officers.

Mr. WARREN. It applies only to Army officers.

Mr. HALE. The object of the joint resolution is not to affect the retirement of officers now in the Navy, but it applies only to Army officers.

Mr. WARREN. That is all.

Mr. HALE. That is the main point.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PHILIP HAGUE.

Mr. PLATT. I ask for the consideration of the bill (S. 5878) for the relief of Philip Hague, administrator of the estate of Joseph Hague, deceased.

Mr. CULLOM. Let the bill be read.

The VICE-PRESIDENT. The bill will be read for the information of the Senate.

Mr. CULBERSON. The bill is on the Calendar under Rule IX?

The VICE-PRESIDENT. It is on the Calendar under Rule IX. The Senator from New York asks unanimous consent for its present consideration.

Mr. CULBERSON. I understand that it requires a motion.

Mr. PLATT. I move to proceed to the consideration of the bill.

The VICE-PRESIDENT. The Senator from New York moves to proceed to the consideration of a bill, which will be read for the information of the Senate.

The Secretary read the bill.

Mr. CULBERSON. From what committee does the bill come?

The VICE-PRESIDENT. It was reported from the Committee on Claims, and the committee has reported an amendment reducing the sum to $1,740.

Mr. CULLOM. Is there any report?

Mr. CULBERSON. Is there a report accompanying the bill?

The VICE-PRESIDENT. A report accompanies the bill.

Mr. HALE. Where is the bill now?

The VICE-PRESIDENT. It is on the Calendar under Rule IX.

Mr. HALE. Then, of course, a motion is required to take it up.

The VICE-PRESIDENT. It is. The question is on agreeing to the motion of the Senator from New York to proceed to the consideration of the bill.

The motion was not agreed to.

Mr. SCOTT. I ask unanimous consent to call up——

The VICE-PRESIDENT. The morning business is not concluded. Reports of committees are still in order.

Mr. HALE. Let us have the regular order.

REFUND OF MONEY TO LAND OFFICERS.

Mr. HANSBROUGH. I am directed by the Committee on Public Lands, to whom was referred the bill (H. R. 11044) authorizing and directing the Secretary of the Treasury, in certain contingencies, to refund to receivers of public moneys acting as special disbursing agents amounts paid by them out of their private funds, to report it favorably without amendment. This is a short bill, asked for by the Department, and it is very necessary, I think, that it should be passed. I ask that it may be considered at this time.

The Secretary read the bill.

The VICE-PRESIDENT. Is there objection to the present consideration of the bill?

Mr. HEYBURN. I should like to know more of the bill. I did not catch the first part of it when read. I should like to have a chance to examine it. From what committee was it reported?

The VICE-PRESIDENT. The bill was reported from the Committee on Public Lands.

Mr. HEYBURN. Let it go over until I can examine it.

Mr. HANSBROUGH. The bill was drawn by the Department, and they are very anxious to have it passed in order to relieve a peculiar situation. It does not involve more than two or three hundred dollars.

Mr. HEYBURN. Does it affect land titles at all?

Mr. HANSBROUGH. Not at all. It provides for the repayment to receivers of general land offices who have paid out money as disbursing agents from their own private pockets.

Mr. HEYBURN. I withdraw my objection.

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

FOREST RESERVATION LANDS.

Mr. HANSBROUGH. I am directed by the Committee on Public Lands, to whom was recommitted the bill (H. R. 8970) authorizing the Commissioner of the General Land Office to quitclaim the title conveyed to the United States for land in forest reservations, under certain conditions, to report it favorably with an amendment, and I submit a report thereon. I ask for the consideration of the bill at this time.

The VICE-PRESIDENT. The bill will be read for the information of the Senate. The amendment of the committee is to strike out all after the enacting clause and to insert a substitute. The amendment of the committee will be read.

The SECRETARY. Strike out all after the enacting clause and insert:

That any person or corporation who, prior to March 3, 1905, in good faith, conveyed title in fee simple to the United States to land in any forest reservation and duly recorded such conveyance in the proper county prior to such date, and who thereafter filed proof of such conveyance and recording in the General Land Office, as required by the Secretary of the Interior under Senate resolution of March 19, 1906, as shown by the reports made by the Secretary of the Interior, dated November 21, 1906, December 3, 1906, February 20, 1907, February 21, 1907, February 25, 1907, and February 26, 1907, and printed as Senate Documents No. 18; No. 18, part 2; No. 332, No. 337, No. 350, and No. 352, respectively, Fifty-ninth Congress, second session, shall be permitted to make selections in lieu of the lands thus conveyed to the United States for an equal quantity of the surveyed unoccupied and unappropriated public lands of the United States, not mineral or timbered, and patents shall issue for lands thus selected: *Provided*, That no part of this act shall be held to apply to any land or conveyance other than those filed in the General Land Office and specified in the report of the Secretary of the Interior, contained in the documents aforesaid.

Mr. HEYBURN. I should like to know to what particular class of lands the bill refers. We have not had an opportunity to examine it at all.

Mr. HANSBROUGH. Mr. President, this refers to lands that were quitclaimed to the Government in forest reserves prior to the time that the "lieu-land scrip repeal bill," so called, was passed, which occurred before the owners of the land or the owners of the right had an opportunity to make selections.

Mr. HEYBURN. Am I correct in understanding that this would affect about 40,000 acres of railroad lands that were caught between the perfection of their surrender and exchange by the passage of this act?

Mr. HANSBROUGH. I do not know whether the lands affected are railroad lands or whether they are homestead lands, or otherwise. They comprise about 40,000 acres. I will say to the Senator that an officer of the Government, the Attorney-General for the Interior Department, who was before the Committee on Public Lands, stated that this was a measure of equity and justice and that the bill should be passed.

Mr. HEYBURN. I should like the bill to go over, as I should like an opportunity to examine it.

The VICE-PRESIDENT. The bill will go over.

BILLS INTRODUCED.

Mr. PENROSE introduced a bill (S. 8609) to amend section 3 of an act entitled "An act to amend and further extend the benefits of the act approved February 8, 1887, entitled 'An act to provide for the allotment of land in severalty to Indians on the various reservations,'" and so forth, approved February 28, 1891; which was read twice by its title, and referred to the Committee on Indian Affairs.

Mr. BURROWS introduced a bill (S. 8610) to authorize Herman L. Hartenstein to construct a dam across the St. Joseph River near the village of Mottville, St. Joseph County, Mich.; which was read twice by its title, and referred to the Committee on Commerce.

Mr. OVERMAN (for Mr. SIMMONS) introduced a bill (S. 8611) granting an increase of pension to Annie B. Berry; which was read twice by its title, and referred to the Committee on Pensions.

Mr. CLAY introduced a bill (S. 8612) for the relief of the estate of John W. Hill; which was read twice by its title, and referred to the Committee on Claims.

Mr. TELLER introduced a bill (S. 8613) for the relief of George Washington Turner; which was read twice by its title, and referred to the Committee on Claims.

AMENDMENTS TO DEFICIENCY APPROPRIATION BILL.

Mr. PENROSE submitted an amendment proposing to appropriate $350 for the preparation of a table of contents and index to the final report of the Louisiana Purchase Exposition Commission, intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. BURNHAM submitted an amendment proposing to appropriate $7,500 to pay L. K. Scott in full for royalty upon telescopic sights, intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. BURROWS submitted an amendment proposing to appro-

priate $291.37 to pay the claim of Capt. George Van Orden, United States Marine Corps, for credit on account of loss resulting from the larceny and embezzlement by a clerk, etc., intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations.

Mr. FRYE submitted an amendment proposing to appropriate $8,000 to reimburse John Bassett Moore for expenses incurred by him in the preparation of the Digest of International Law, intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. BLACKBURN submitted an amendment proposing to appropriate $1,140 to pay Sandy Wallace, a laborer on the rolls of the Senate, for extra labor performed by him for the six years and three months from December 1, 1893, to March 4, 1900, intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. LA FOLLETTE submitted an amendment relative to the labor performed in excess of eight hours per day by all laborers, workmen, and mechanics employed by or on behalf of the Government of the United States, etc., intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. SUTHERLAND submitted an amendment proposing to appropriate $15,000 to reimburse REED SMOOT for expenses incurred by him in the matter of the protest against his right to retain his seat in the Senate, intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. WARNER submitted an amendment proposing to appropriate $25,000 to enable the Government of the United States to accept the invitation of the French Government to participate in the International Maritime Exposition to be held at Bordeaux, France, etc., intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. BACON submitted an amendment giving the Court of Claims jurisdiction of claims for captured and abandoned property which was sold and the proceeds thereof placed in the Treasury of the United States, intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. DANIEL submitted an amendment proposing to pay H. P. Huddleson, clerk in Public Health and Marine-Hospital Service, $58.50 out of the unexpended balance of the appropriation for the Public Health and Marine-Hospital Service, 1906, in reimbursement for actual expenses under Department approval while on duty at the St. Louis Exposition, intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

### WITHDRAWAL OF PAPERS—MARTHA E. DOEBLER.

On motion of Mr. PENROSE, it was

*Ordered*, That leave be granted to withdraw from the files of the Senate the papers in the case of Martha E. Doebler, accompanying Senate bill 8205, Fifty-ninth Congress, second session, subject to the provision of clause 2 of Rule XXX.

### WITHDRAWAL OF PAPERS—JOHN C. WEBB.

On motion of Mr. PENROSE, it was

*Ordered*, That leave be granted to withdraw from the files of the Senate the papers in the case of John C. Webb, accompanying Senate bill 2173, Fifty-ninth Congress, first session, subject to the provision of clause 2 of Rule XXX.

### WITHDRAWAL OF PAPERS—MILTON A. ROMIG.

On motion of Mr. FORAKER, it was

*Ordered*, That there may be withdrawn from the files of the Senate all papers relating to the bill (S. 2258, 59th Cong.) to remove the charge of desertion from the military record of Milton A. Romig, there having been no adverse report thereon.

### WITHDRAWAL OF PAPERS—ANNA K. CARPENTER.

On motion of Mr. MCCREARY, it was

*Ordered*, That the papers in the case of Anna K. Carpenter or her heirs at law be withdrawn from the files of the Senate, there having been no adverse report thereon.

### REPORT OF COMMISSIONER OF EDUCATION.

Mr. PENROSE submitted the following concurrent resolution; which was referred to the Committee on Printing:

*Resolved by the Senate (the House of Representatives concurring)*, That 20,000 copies of the report of the Commissioner of Education for the year 1906 be printed, 1,000 for the Senate, 4,000 for the House, and 15,000 for distribution by the Commissioner of Education.

### HOSPITALS AND CHARITABLE INSTITUTIONS.

Mr. GALLINGER submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

*Resolved*, That the Committee on the District of Columbia be, and hereby is, authorized and directed, by subcommittee or otherwise, to make an inquiry into all matters relating to the hospitals and other charitable institutions in the District of Columbia and to report from time to time to the Senate the result thereof; and for this purpose is authorized to sit, by subcommittee or otherwise, during the recess or sessions of the Senate, to send for persons and papers, to administer oaths, and to employ such stenographic and other assistance as may be necessary, the expense of such inquiry to be paid from the contingent fund of the Senate.

### THE PANAMA CANAL.

Mr. MILLARD submitted the following resolution; which was considered by unanimous consent, and agreed to:

*Resolved*, That the testimony taken before the Senate Committee on Interoceanic Canals, pursuant to a resolution of the Senate under date of January 9, 1906, be printed as a Senate document.

### INDIAN AND FREEDMEN ENROLLMENT CASES.

Mr. TELLER submitted the following resolution; which was considered by unanimous consent, and agreed to:

*Resolved*, That the Secretary of the Interior be, and he is hereby, directed to transmit to the Senate the following information:

1. The number of Indian and freedmen enrollment cases pending before the Commissioner to the Five Civilized Tribes on the 25th day of February, 1907, involving the rights of persons to enrollment as citizens and freedmen in the Choctaw, Chickasaw, Cherokee, Creek, and Seminole tribes, and the aggregate number of persons included in said cases.

2. The number of Indian and freedmen enrollment cases pending in the office of the Commissioner of Indian Affairs on review from the Commissioner to the Five Civilized Tribes on said date, and the number of persons included in said cases.

3. The number of such Indian and freedmen enrollment cases pending before the Office of the Secretary on review on said date and the number of persons included in such cases.

### WILLIAM O. BEALL.

Mr. CLAPP. A few days ago the Secretary of the Interior transmitted to the Senate, in compliance with a resolution of the 18th instant, certain papers in connection with the investigation of the official conduct of William O. Beall, recently secretary of the Commissioner to the Five Civilized Tribes. I move that the papers be printed as a document.

The motion was agreed to.

### PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. M. C. LATTA, one of his secretaries, announced that the President had approved and signed the following acts:

On February 25:

S. 8288. An act authorizing and empowering the Secretary of War to locate a right of way for and granting the same and a right to operate and maintain a line of railroad through the Fort Wright Military Reservation, in the State of Washington, to the Portland and Seattle Railway Company, its successors and assigns; and

S. 1160. An act to correct the naval record of John McKinnon, alias John Mack.

On February 27:

S. 8182. An act authorizing the Twin City Power Company to build two dams across the Savannah River above the city of Augusta, in the State of Georgia; and

S. 2769. An act to divide the judicial district of Nebraska into divisions and to provide for an additional district judge in said district.

On February 28:

S. 5119. An act authorizing the extension of W and Adams streets NW.

### RULES AND REGULATIONS OF DEPARTMENT OF STATE.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, with the accompanying paper, ordered to lie on the table and be printed:

*To the Senate:*

I transmit herewith a report by the Acting Secretary of State, with accompanying papers, in response to the resolution adopted by the Senate on February 1, 1907, requesting to be furnished with a copy of all rules and regulations governing the Department of State in its various branches.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *February 28, 1907.*

Mr. HEYBURN. I ask that the report be printed as a Senate document. I think it is included within the resolution of a few days ago.

The VICE-PRESIDENT. Without objection, it is so ordered.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the following bills:

S. 7994. An act authorizing the State of North Dakota to

select other lands in lieu of lands erroneously entered in sections 16 and 36 within the limits of the abandoned Fort Rice and Fort Abraham Lincoln military reservations in said State;

S. 8063. An act to amend an act entitled "An act to amend an act approved August 3, 1894, entitled 'An act concerning leases in the Yellowstone National Park,'" approved June 4, 1906; and

S. 8128. An act granting to the St. Johns Light and Power Company the right of way for street railroad purposes through the United States military reservation of Fort Marion in St. Augustine, Fla., and through other Government property in said city.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 11040) to authorize the appraisers of public moneys for land districts to deposit with the Treasurer of the United States certain sums embraced in their accounts of unearned fees and unofficial moneys.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24537) making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1908, and for other purposes.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H. R. 24122) in reference to the expatriation of citizens and their protection abroad.

The message further announced that the House had agreed to the amendments of the Senate to the joint resolution (H. J. Res. 31) recognizing the change of name of the Regular Army and Navy Union of the United States to the Army and Navy Union of the United States of America.

The message also requested the Senate to furnish the House with a duplicate engrossed copy of the bill (S. 1462) to establish one or more fish-cultural stations on Puget Sound, State of Washington, the original having been lost.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

S. 5888. An act authorizing the President to appoint James Carroll a surgeon, with the rank of major, in the United States Army;

S. 6229. An act to authorize the sale of public lands for cemetery purposes;

S. 7017. An act extending the time for making settlement and final proof and payment on public land in certain cases;

S. 7684. An act to provide and maintain for the port of Galveston, Tex., a customs boarding boat;

S. 8400. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Sauk Rapids, Benton County, Minn.," approved February 26, 1904;

S. 8435. An act granting to the city of Durango, in the State of Colorado, certain lands therein described for water reservoirs;

S. 8446. An act to extend the time for the completion of a bridge across the Missouri River at Yankton, S. Dak., by the Yankton, Norfolk and Southern Railway Company; and

S. 8534. An act providing that the State of Wyoming be permitted to relinquish to the United States certain lands heretofore selected and to select other lands from the public domain in lieu thereof.

ALASKA-YUKON-PACIFIC EXPOSITION.

Mr. PILES obtained the floor.

Mr. HANSBROUGH. Mr. President——

The VICE-PRESIDENT. Does the Senator from North Dakota rise to morning business?

Mr. HANSBROUGH. I rise for an order of the Senate, Mr. President. I desire to have the Senate take up a bill on the Calendar.

The VICE-PRESIDENT. The Senator from Washington [Mr. PILES] was first recognized.

Mr. PILES. I move that the Senate proceed to the consideration of the bill (S. 7382) to encourage the holding of an Alaska-Yukon-Pacific Exposition at the city of Seattle, State of Washington, in the year 1909.

Mr. ALDRICH. Is a motion of that kind in order at this hour, Mr. President, except by unanimous consent?

The VICE-PRESIDENT. It is, as the morning business has closed.

Mr. ALDRICH. I would suggest that, under the rule, it is not in order at this time, except by unanimous consent, to move to proceed to the consideration of a bill.

The VICE-PRESIDENT. The Chair is of the opinion that the motion is in order, morning business having closed. The question is on the motion of the Senator from Washington [Mr. PILES] to proceed to the consideration of the bill named by him.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. DUBOIS. I think that bill has been read, Mr. President, though I may be mistaken as to that.

Mr. PILES. It has been read.

Mr. ALDRICH. I am sure the Chair will be glad to have his attention called to the first paragraph of Rule VII——

Mr. PILES. I rise to a question of order, Mr. President.

Mr. LODGE. The Senator from Rhode Island [Mr. ALDRICH] has risen to a question of order.

The VICE-PRESIDENT. The Senator from Rhode Island has risen to a question of order.

Mr. ALDRICH. The Chair was so prompt in his decision that I did not have an opportunity to read the rule to which I refer.

The VICE-PRESIDENT. The Chair will be pleased to hear the Senator.

Mr. ALDRICH. I refer to the second paragraph of Rule VII, which provides:

Or until the hour of 1 o'clock has arrived.

The VICE-PRESIDENT. The rule provides that—

Until the morning business shall have been concluded, and so announced by the Chair, or until the hour of 1 o'clock has arrived, no motion to proceed to the consideration of any bill * * * upon the Calendar shall be entertained by the Presiding Officer unless by unanimous consent.

Mr. ALDRICH. Yes; "or until the hour of 1 o'clock has arrived." But the hour of 1 o'clock has not been reached.

The VICE-PRESIDENT. But the morning business has been concluded, as has been announced by the Chair.

Mr. ALDRICH. The rule says that one of these things must occur.

The VICE-PRESIDENT. That is true. One of these things has occurred—that is, the conclusion of the morning business—and upon the conclusion of the morning business the Chair entertained the motion of the Senator from Washington [Mr. PILES]. The rule is in the alternative. It does not say——

Mr. ALDRICH. The rule of the Senate, or the practice of the Senate, has been just to the contrary effect. I shall not appeal from the decision of the Chair now, because I think the Chair, upon an examination of the precedents, will find that he is mistaken in his ruling.

The VICE-PRESIDENT. The Chair is informed that the bill has heretofore been read.

Mr. SPOONER. Mr. President, I think Rule VIII has something to do with this subject. That rule provides that—

At the conclusion of the morning business for each day, unless upon motion the Senate shall at any time otherwise order, the Senate will proceed to the consideration of the Calendar of Bills and Resolutions, and continue such consideration until 2 o'clock.

Mr. ALDRICH. And it continues:

And bills and resolutions that are not objected to shall be taken up in their order.

Mr. SPOONER. Yes.

At the conclusion of the morning business for each day, unless upon motion the Senate shall at any time otherwise order.

The VICE-PRESIDENT. The Senate has just otherwise ordered by a vote, and the Chair is clearly of the opinion that the bill is before the Senate under the rules and uniform practice of the Senate. There are several committee amendments reported to the bill, which will be stated.

Mr. HALE. Let the bill be read, Mr. President. It is a very important bill.

The VICE-PRESIDENT. The Secretary will read the bill, at the request of the Senator from Maine.

The Secretary read the bill.

Mr. HALE. Mr. President, I will not at present call for the reading of the report, because I am called into conference on an appropriation bill, but I desire to say a few words, with which I shall occupy the time of the Senate now.

This, Mr. President, is a very elaborate scheme for another national exposition. Everything that we have done in connection with national expositions in the last few years must be fresh in the minds of Senators. I do not, I think, need to say that one rule applies to all, and that when we begin to launch an exposition and commit the Government in any way to it, as we do to all of these, we have only just embarked on the sea of expenditure that we will be called upon to make.

I think, Mr. President—other Senators may not agree with me—that we have had enough of these national expositions.

We have had a sorry experience with them, and time and again it has been said here upon the floor of the Senate that we would have no more of them. But notwithstanding that, the project for each exposition has been brought to us and urged upon us by the personal solicitation of Senators who are interested. That, Mr. President, they have an entire right to do. There is nothing whatever in the rules or in good practice or in good manners that should forbid a Senator from a State, or the Senators from a State, who desire one of these expositions within the borders of their State, urging it in season and out of season; but I should hope that in embarking upon so vast a project as this is Senators would look at the subject aside from the solicitation of Senators who are interested in it.

This bill, which has been read, is most elaborate. It commits the Government in a hundred different ways. It starts in, as I have looked it over, in connection with the amendments offered, with an appropriation of seven hundred and twenty-five or seven hundred and seventy-five thousand dollars. The nations of the world are to be invited. We are to erect buildings for Territories and outlying dependencies, and we are, I notice, in a clause that is as wide as space, directed to show to the world such matters as will demonstrate to all the people attending the world power of the United States. Under that proposition you may have the most elaborate of military displays; you may have all the panoply that surrounds fleets and armies and the operations of the Navy and War Departments, and Senators who vote for this bill will, I hope, bear in mind how far they are going.

As I say, I am called away and do not desire to take up further time of the Senate. I wish to make my protest and to call Senators' attention to it, and I hope Senators will read the bill and will read the report, the reading of which will be called for, and that the subject may be, as its importance demands, considered and debated here; and then if the Senate on a yea-and-nay vote determines to embark in this enterprise, there is nothing for us who are opposed to it but to submit to the action of the Senate. I am only asking for due consideration and that this measure shall not be put through precipitately without due consideration. I urge Senators to give their attention to it, because unless some day we shut down and end these expositions every locality that desires one will be pushing and importuning for it.

Let the report be read, Mr. President.

The VICE-PRESIDENT. The Secretary, without objection, will read the report.

The report submitted by Mr. WARNER on the 8th instant was read, as follows:

The Select Committee on Industrial Expositions, to whom was referred the bill (S. 7382) to encourage the holding of an Alaska-Yukon-Pacific Exposition at the city of Seattle, State of Washington, in the year of 1909, having had the same under consideration, begs to report back the same with the following amendments:

On page 3, line 15, strike out the word "five" and insert the word "two;" so that it will read "$250,000."

On page 3, line 21, strike out the word "seventy;" and on page 3, line 22, strike out the word "five" and insert the word "fifty."

On page 4, line 12, strike out the words "one hundred" and insert the word "seventy-five."

On page 5, line 4, strike out the word "five;" and on page 5, line 5, strike out the word "hundred" and insert in lieu thereof "three hundred and twenty-five."

On page 5, line 8, strike out the word "three" and insert the word "two."

On page 5, line 9, strike out the word "fifty" and insert the word "twenty-five."

On page 5, line 11, strike out the words "one hundred" and insert the word "fifty."

So that the bill when amended shall read as follows:

"A bill to encourage the holding of an Alaska-Yukon-Pacific Exposition at the city of Seattle, State of Washington, in the year 1909.

"Whereas it is desirable to encourage the holding of an Alaska-Yukon-Pacific Exposition at the city of Seattle, in the State of Washington, in the year 1909, to fittingly illustrate the vast and constantly increasing importance of the commerce of the Pacific Ocean countries in North America, South America, Asia, and Oceania, the resources and potentialities of the Alaska and Yukon territories of the United States and the Dominion of Canada, and the marvelous development of the western part of the United States, by a display of the arts, industries, manufactures, and products of the soil, mines, and sea; and

"Whereas many of the States of the Union have signified their intention of enacting laws and appropriating money to enable them to participate in said exposition, and satisfactory assurances have been given by representatives of foreign governments that their governments will make interesting and instructive exhibits at said exposition illustrative of their material progress during the past century, and it is believed that the commerce of the United States in the countries bordering upon the Pacific Ocean will be materially aided and developed by such exposition; and

"Whereas no exposition has ever been held in the United States having for one of its main objects the promotion of Pacific commerce and the advancement of the trade of the United States with Pacific Ocean countries; and

"Whereas Alaska-Yukon-Pacific Exposition, a corporation organized and existing under the laws of the State of Washington, has undertaken to hold such an exposition beginning on the 1st day of June, 1909, and closing on the 15th day of October, 1909; and

"Whereas the collection of exhibits in the Territory of Alaska is exceedingly slow, difficult, and costly, on account of the vast extent of the Territory and the lack of transportation facilities, and it is necessary that, if a satisfactory display of the resources of Alaska shall be made, all exhibits must be collected in 1907 and 1908, and be at tide water in Alaskan ports ready for shipment to Seattle by the early fall of 1908, and it is also desirable that ample time shall be given for the assembling of the exhibits of the Territory of Hawaii and the Philippine Islands: Now, therefore, for the purpose of contributing to the success of said exposition, and enabling Alaska and our insular possessions and also oriental and oceanic countries to exhibit their products and resources at said exposition: Therefore

"*Be it enacted, etc.*, That the Secretary of the Interior is hereby authorized and directed to aid the inhabitants of the Territory of Alaska and of the Territory of Hawaii in providing and maintaining appropriate and creditable exhibits of the products and resources of said Territories at the said Alaska-Yukon-Pacific Exposition, and for that purpose he is authorized to appoint one or more persons to supervise the selection, purchase, preparation, transportation, arrangement, installation, safe-keeping, exhibition, and return of such articles as may be exhibited from said Territories at said exposition: *Provided*, That the cost of said exhibit of said Territory of Alaska, including such selection, purchase, preparation, transportation, arrangement, installation, safe-keeping, exhibition, and return of the articles so exhibited shall not exceed the sum of $250,000, which sum is hereby appropriated out any money in the Treasury not otherwise appropriated: *And provided further*, That the cost of said exhibit of said Territory of Hawaii, including such selection, purchase, preparation, transportation, arrangement, installation, safe-keeping, exhibition, and return of the articles so exhibited shall not exceed the sum of $50,000, which sum is hereby appropriated out of any money in the Treasury not otherwise appropriated.

"SEC. 2. That the Secretary of War is hereby authorized and directed to aid the inhabitants of the Philippine Islands in providing and maintaining an appropriate and creditable exhibit of the products and resources of the Philippine Islands at the said Alaska-Yukon-Pacific Exposition, and for that purpose he is authorized to appoint one or more persons to supervise the selection, purchase, preparation, transportation, arrangement, installation, safe-keeping, exhibition, and return of such articles as may be exhibited from said Philippine Islands at said exposition: *Provided*, That the cost of said exhibit of said Philippine Islands, including such selection, purchase, preparation, transportation, arrangement, installation, safe-keeping, exhibition, and return of the articles so exhibited shall not exceed the sum of $75,000, which sum is hereby appropriated out of any money in the Treasury not otherwise appropriated.

SEC. 3. That the Secretary of the Treasury shall cause a suitable building or buildings to be erected on the site selected for the Alaska-Yukon-Pacific Exposition for the use of the Territory of Alaska, the Territory of Hawaii, and the Philippine Islands, and also oriental and oceanic countries, and for the exhibition therein of the products and resources of said Territories and countries. Said buildings shall be erected from plans prepared by the Supervising Architect of the Treasury, to be approved by the United States Government board herein created, and the Secretary of the Treasury is hereby authorized and directed to contract for said buildings in the same manner and under the same regulations as for other public buildings of the United States, but the contract for said buildings and the preparation of grounds therefor and the lighting thereof, inclusive, shall not exceed the sum of $325,000, which sum is hereby appropriated out of any money in the Treasury not otherwise appropriated, and apportioned as follows: For the cost of the Territory of Alaska building, $250,000, and for the cost of the Territory of Hawaii building, $25,000, and for the cost of the Philippine Islands building, $50,000. The Secretary of the Treasury is authorized and required to dispose of said buildings, or the materials composing the same, at the close of the exposition, giving preference to the State of Washington or to the Alaska-Yukon-Pacific Exposition corporation or to the city of Seattle to purchase the same at an appraised value to be ascertained in such manner as the Secretary of the Treasury may determine.

"SEC. 4. That to secure a complete and harmonious arrangement of the exhibits authorized by this act, and such other exhibits as may hereafter be authorized by act of Congress, a United States Government board shall be created. Such Government board shall be composed of the secretary, the Secretary of War, and the Secretary of the Interior. The President shall name one of said persons as chairman, and the board itself shall appoint its secretary, disbursing officer, and such other officers as it may deem necessary. The officers and employees of said Government board, including officers of the Army and Navy, shall receive no compensation in addition to their regular salaries, but they shall be allowed their actual and necessary traveling expenses, together with a per diem in lieu of subsistence, to be fixed by the Secretary of the Treasury, while necessarily absent from their homes engaged upon the business of the board. Officers of the Army and Navy shall receive said allowance in lieu of the subsistence and mileage now allowed by law, and the Secretary of War and the Secretary of the Navy may, in their discretion, detail retired Army or Navy officers for such duty. Any provision of the law which may prohibit the detail of persons in the employ of the United States to other service than that which they customarily perform shall not apply to persons detailed for duty in connection with said Alaska-Yukon-Pacific Exposition. Employees of the board not otherwise employed by the Government shall be entitled to such compensation as the board may determine, and such employees may be selected and appointed by said board. The disbursing officer shall give bond in such sum as the Secretary of the Treasury may determine for the faithful performance of his duties, said bond to be approved by said Secretary. The Secretary of the Treasury shall advance to said officer from time to time, under such regulations as the Secretary of the Treasury may prescribe, a sum of money from the appropriation for the exhibits herein authorized, not exceeding at any one time three-fourths the penalty of his bond, to enable him to pay the expenses of said exhibits as authorized by the United States, and said Government board shall report to the session of Congress which shall meet in December, 1907, what further exhibits, in its judgment, the Government of the United States should make at said exposition as will illustrate the function and administrative faculty of the Government in time of peace and its resources as a war power, tending to demonstrate the nature of our institutions and their adaption to wants of the people.

"SEC. 5. That the allotment of space for exhibitors in the building or buildings erected under authority of this act for the use of the Territory of Alaska, the Territory of Hawaii, the Philippine Islands, and also for the use of oriental and oceanic countries, shall be done and performed without charge to exhibitors by the Government board authorized by this act.

"SEC. 6. That the United States shall not be liable on account of said exposition for any expenses incident to or growing out of the same, except for the construction of the building or buildings hereinbefore authorized and for the purpose of paying the expense incident to the selection, preparation, purchase, installation, transportation, care, custody, and safe return of the exhibits made by the Government and for the employment of proper persons as officers and assistants by the Government board created by this act, and for other expenses, and for the maintenance of said building or buildings and other contingent expense to be approved by the chairman of the Government board, or, in the event of his absence or disability, by such officer as the board may designate, and the Secretary of the Treasury, upon itemized accounts and vouchers: *Provided*, That no liability against the Government shall be incurred and no expenditure of money appropriated by this act shall be made until the officers of said exposition shall have furnished to the satisfaction of the Secretary of the Treasury proof that there has been obtained for the purpose of completing and opening said exposition bona fide subscriptions to the stock of the Alaska-Yukon-Pacific Exposition (a corporation), by responsible parties, contributions, donations, and appropriations, from all sources, aggregating a sum not less than $1,000,000.

"SEC. 7. That the United States shall not in any manner or under any circumstances be liable for any of the acts, doings, or representations of said Alaska-Yukon-Pacific Exposition (a corporation), its officers, agents, servants, or employees, of any of them, or for service, salaries, labor, or wages of said officers, agents, servants, or employees, or any of them, or for any subscriptions to the capital stock, or for any stock certificates, bonds, mortgages, or obligations of any kind issued by said corporation, or for any debts, liabilities, or expenses of any kind or nature whatever attending such exposition corporation, or accruing by reason of the same.

"SEC. 8. That nothing in this act shall be construed so as to create any liability upon the part of the United States, direct or indirect, for any debt or obligation incurred or for any claim for aid or pecuniary assistance from Congress or the Treasury of the United States in support or liquidation of any debts or obligations created by said United States Government board in excess of appropriations hereafter made by Congress therefor.

"SEC. 9. That this act shall take effect from and after its passage and approval."

As amended the committee respectfully recommends that the bill do pass.

The proposed Alaska-Yukon-Pacific Exposition deals not merely with the rising young States of the Pacific slope, but with Alaska, Yukon Territory, British Columbia, Hawaii, and the Philippines. Its object is to commemorate the purchase of Alaska, to celebrate the progress of the entire region of the Pacific, and to forecast as completely as may be done the possibilities of oriental trade. In this aspect the Alaska-Yukon-Pacific Exposition is broadly international, and it is unique among enterprises of that character in that it deals with the resources of our own Territory of Alaska and the Canadian territory of Yukon, affording the unusual spectacle of two territories under different flags joining forces and uniting interests in the city of Seattle, nearly 1,000 miles away. Yukon territory and British Columbia, both of them under the Dominion government, are to be as much a part of this exposition as is Alaska, under the Government of the United States, a situation expressive of harmony, good will, and international comity and augurring a continuance of the amicable relations between us and our English-speaking neighbors. It is estimated that 7,500,000 persons live in the section of country in the United States and Canada within a radius of 1,000 miles of Seattle who are directly interested in the Alaska-Yukon-Pacific Exposition as a true index of their material wealth and development.

The Alaska-Yukon-Pacific Exposition is incorporated under the laws of the State of Washington. The people of Seattle were asked to subscribe $500,000 toward the enterprise. In a single day they subscribed $654,000, or $154,000 more than was asked of them.

The legislature of the State of Washington has appropriated $1,000,000 for the exposition.

In the message at the beginning of the second session of the Fifty-ninth Congress, the President of the United States, referring to the needs of Alaska and the scope of the Alaska-Yukon-Pacific Exposition, said:

"Our fellow-citizens who dwell on the shores of Puget Sound with characteristic energy are arranging to hold in Seattle the Alaska-Yukon-Pacific Exposition. Its special aims include the upbuilding of Alaska and the development of American commerce on the Pacific Ocean. This exposition, in its purposes and scope, should appeal not only to the people of the Pacific slope, but to the people of the United States at large. Alaska since it was bought has yielded to the Government $11,000,000 of revenue and has produced nearly $300,000,000 in gold, furs, and fish. When properly developed it will become in large degree a land of homes. The countries bordering the Pacific ocean have a population more numerous than that of all the countries of Europe; their annual foreign commerce amounts to over $3,000,000,000, of which the share of the United States is some $700,000,000. If this trade were thoroughly understood and pushed by our manufacturers and producers, the industries not only of the Pacific slope, but of all our country, and particularly of our cotton-growing States, would be greatly benefited. Of course, in order to get these benefits, we must treat fairly the countries with which we trade."

Alaska, which has an area of 586,400 square miles and a population of about 90,000, has all the elements ultimately to sustain a population of millions. Not only is it an empire in expanse, but in climate, that prime factor in civilization, it presents no obstacle to a numerous citizenship; and in natural resources it bids fair to eclipse all our other domains—it has inexhaustible stores of the precious metals, and coal of the best quality yet discovered in any country bordering on the Pacific; it has fish, it has furs, it has timber, it has agricultural lands of vast extent and incomparable fertility, and on its Pacific shore line it has a score of harbors open, like those of the Atlantic, the year round. We paid for Alaska $7,200,000, and its returns to this Government, as emphasized by the President in his message quoted in the foregoing lines, have approximated $300,000,000. The commerce between Alaska and United States already exceeds that between Great Britain and her American colonies just before the war of the Revolution. For the calendar year 1906 exports from Alaska into the United States proper were $31,534,392, and the imports were $18,368,145, a grand total of trade between us and our northern territory of $49,902,537.

Yukon has an area of about 197,000 square miles and a population of 7,000. That territory has produced $135,000,000 in placer gold, and it is estimated that the Klondike alone will yield as much more. Yukon Territory, like its neighbor, Alaska, is destined ultimately to support an agricultural population.

British Columbia is south of Alaska and Yukon Territory. It has an area of about 380,000 square miles. It is the province of Canada which fronts the Pacific and affords the Dominion an unrestricted route from ocean to ocean. Its minerals, timber, and agricultural lands contribute to resources that are practically inexhaustible.

The State of Washington has an area of a little less than 70,000 square miles and a population of about 1,000,000. In its two grand divisions—the inland empire, lying east of the Cascade Mountains, and the Puget Sound region, lying to the westward of that range—are immense wheat belts, almost unlimited grazing lands, valuable minerals, measures of coal and iron, inexhaustible forests, invaluable agricultural regions, and an inland sea stocked with fish. Within the past five years the population of Washington has almost doubled.

The prime object of the Alaska-Yukon-Pacific Exposition is to stimulate trans-Pacific trade, a phase of the enterprise of direct interest to all the people of the United States. The foreign exhibits at the exposition will be confined strictly to the products of nations bordering upon the Pacific Ocean. Those countries cover an area of 17,096,060 square miles and have a population exceeding 904,000,000. Their annual commerce with the United States is nearly $718,000,000, of which $396,000,000 is imports and $322,000,000 exports.

It is believed that the exposition will not only illustrate to a wonderful degree the mineral resources of Alaska, which have as yet been barely touched, notwithstanding the enormous amount of gold already taken from the placer diggings of the interior and quartz regions in southeast Alaska, but will demonstrate to the thousands looking for homes out of the public domain that such can be found in Alaska. It is believed further that it will enable us to enter into closer trade relations with Asia and to increase materially the volume of our commerce with the most populous nations on earth.

Mr. LODGE. Mr. President, it is always a very thankless task to offer opposition to a bill of this character. I have offered similar opposition to similar bills before, because it seemed to me, as I have said before, that the getting up of expositions was becoming an industry of the country, one which was likely to be of enormous expense to the Government of the United States.

I have no special opposition to this exposition, but before the bill passes the Senate I should like for my own satisfaction to call attention to what seems to me the danger of the policy upon which we are entering in regard to these expositions. Hitherto they have had a historical excuse. We are now passing beyond that slight limitation, and we are getting on to the ground that expositions are to be given to every locality that desires one. There is no reason why one locality should have it more than another. If one locality has it, all the others ought to have it.

The eastern part of the country from which I come is peculiarly rich in historical events, having been the first part of the country to be settled, and it is very easy to multiply anniversaries of great significance and crown them with expositions. We have had so many already that foreign nations, I think, have ceased to take much interest in them, and they really come down to an expenditure of money by the State, the locality, and the Government for the benefit chiefly of the locality where the exposition is held. That may be a wise policy to enter upon, but if we do enter upon it we must make up our minds that we can not discriminate. We can not select one State or one region and give it an exposition and refuse an exposition to another.

It is only two years, I think, since we had the exposition in Oregon to celebrate the Lewis and Clark expedition. Now we have one proposed in the adjoining State. I understand that one is proposed for San Francisco, with an initial appropriation of $5,000,000. I do not know precisely what historical anniversary that is to commemorate, but some, I have no doubt. Behind that comes one for New York, to commemorate the voyage of Henry Hudson, I believe. There is $5,000,000 asked there as a preliminary. I understand there is to be one at Tampa. I do not know precisely why. We are to have one, a second, I have been told, at Atlanta.

Mr. President, as was once said by a Senator in this Chamber, human nature is very widely diffused in this country, and each State, each city, and each locality as they see these expositions going on in different parts of the country will feel that they must not be neglected, and their Senators and Representatives will be bound to take charge of their desires and to have them fulfilled, if possible.

I think what we are coming to is that we shall very soon have every year or every two years, as we have a public-building bill, as we have a river and harbor bill, an exposition bill, and we shall distribute expositions over the country. I am not prepared to say whether that is a wise policy or an unwise one. It may be very valuable to the business of the country, just as this exposition may open up our eastern trade. I do not think the expositions hitherto held have had any very marked effect on our commerce anywhere. But it will involve us in a large expenditure of money. It is a very great policy to enter upon. And as we multiply the expositions we must remember that with

each one we pass we make it more difficult to refuse the next. In fact, we can not refuse it. It is not fair to give it to one State and refuse it to another, and each State or each city that asks for it comes with a stronger case. I would be as glad to see an exposition in the State of Washington as anywhere; I have no opposition whatever to the locality; but I do think that as we pass beyond the line of historical commemoration and enter upon the new policy of an exposition to anyone who wants it and can present a good prima facie case, we ought to realize just what policy we are entering upon and that it is one which will involve the United States in a new branch of heavy expenditure.

The expenditures of the Government this year are enormous. I have never opposed reasonable expenditures in any direction. I believe that the expenditures of the Government are necessarily large, and I have always resisted what has seemed to me any disposition toward a niggardly or parsimonious policy in any proper direction of public expenditure. But I think we can not overlook the fact that the expenditures in all directions this year have reached a point never reached before and that before opening up and confirming a new policy of expenditure we ought to consider the subject very carefully.

It is very easy and very pleasant to vote money for these expositions. We all like to oblige our friends who are interested in them. I should like to do it. It is disagreeable to say anything against it; and yet, Mr. President, I should not be satisfied with myself if I did not at least call the attention of the Senate to what I think is a very important precedent that is being set here and ask them to consider before they enter finally on the policy of aiding expositions and spending anywhere from one or two to five or ten millions of the Government's money for the purpose of industrial expositions.

Mr. DEPEW. Mr. President, I can hardly agree with the Senator from Maine [Mr. HALE] or the Senator from Massachusetts [Mr. LODGE] on this question. I was early brought in contact with these expositions, and from study on the ground I have become impressed with their value and usefulness. It is not a new departure for us, nor is the policy one upon which no experiment has been made.

It must be remembered that we commenced these expositions in 1876, and that we have had a great many of them since, every one to commemorate something which appealed to all of the United States as well as to the Congresses which made liberal appropriations. In each of these expositions the city and the State within whose boundaries it was held became necessarily the largest contributors, and in every one of them both the city and the State have felt that the money which they advanced and which was not returned, because the Government as a creditor comes in first, was not lost, but was well invested.

Now, I became familiar with these expositions because I delivered the address at the opening of the exposition at Chicago and also at the one in Omaha, and I think one other. That of 1876, commemorating the Declaration of Independence, was educational to a degree to a generation which knew nothing of what had led to the formation of our Government and of the deeds of our forefathers, except as they had read them in histories; and I am sorry to say that in our material progress, both in the schools and on the platform, 1876, and all that its events meant, had largely ceased to be taught or discussed, but the exposition of 1876 revived patriotic feeling in the country, and not only that, it revived a study of the source and origin of our Government and the principles upon which it was founded.

So the exposition of 1893 at Chicago, celebrating the four hundredth anniversary of the discovery of America by Columbus, led to the distribution of an immense amount of literature and information in regard to the discovery of this continent and what had followed from it in its influence upon humanity and the world. So the exposition at St. Louis, which I attended, similarly called to mind the early French voyagers and all that followed from the development of the southwestern country and the Mississippi, and the one at Portland recalled that wonderful trip of Lewis and Clark across the continent which gave to us our territory on the Pacific coast. All of these, without enumerating any more, have been educational in the first place and immensely valuable in the second in two ways. One in bringing together the inventors and the manufacturers of our own country, and the other in bringing from abroad the inventors, manufacturers, and producers to exhibit their wares.

We have done more to educate the people of Europe as to what we had to sell and what we could produce in these expositions than we could possibly have done in any other way by agents or prospectuses or literature. After each one of them there has been a distinct and recognizable advance in every department of American industry and energy. They have inspired our merchants and manufacturers to seek foreign markets, and not only to go beyond the seas to Europe, but to South America, Mexico, and Canada, for the purpose of exploiting and expanding our commerce in the things which we can produce and whose exportation will be beneficial to the country in its productions and labor.

Now, I know of no exposition, having been familiar with them all and attended many of them, which appeals to me more than this, which celebrates the purchase of Alaska. I remember very well when Mr. Seward purchased Alaska. I remember the howl that went up all over the country against the Administration, and especially against that distinguished citizen of New York. I remember how it was denounced in Congress and upon the platform and in the newspapers as throwing away for an idle dream by a dreamer $7,200,000 for ice and snow. I remember how Russia was congratulated and her foreign minister received the highest praise from the opposition press because in dealing with the Yankee he had outwitted him to such a marvelous extent, because that Yankee did not represent the commercial instinct of the country, but had always lived in the clouds and was a dreamer upon most questions.

I can not recall it now, because it is many years since I saw it, but it would be instructive to read what Mr. Seward said would be the benefit of that purchase, the prophecy which he made as to the results of the annexation of Alaska to the United States, both for our protection in extending our coast line on the Pacific coast and for the products and development which would ultimately come from it, and then compare those criticisms with the realization of to-day. Here before us is the message of the President of the United States and the report which has just been read, showing what has been the result within the few years which elapsed since this dreamer, who was more than a dreamer, sir, because he was one of the greatest statesmen this country ever produced and one of the most farsighted, bought for the United States the Territory of Alaska for $7,200,000. According to this report the Government has received in revenues $11,000,000, and the country has been enriched $300,000,000 by the products of a land whose territory has not yet been scratched and whose interior has not yet been explored.

I believe, sir, that this exposition will lead to capital going to Alaska for the building of railways and settlers going there when it is known what that Territory has of resources of every kind in agriculture and minerals and possibility for manufactures. Not only the Pacific coast but the whole country will benefit by this exposition. It will demonstrate in a remarkable way the wisdom of the purchase by Mr. Seward and the realization of his prophecy.

Mr. PILES. Mr. President, I have been advised not to take up the time of the Senate at this late day in making anything of a speech concerning this bill, and I shall accept that advice. I wish, however, to occupy two or three minutes in a brief explanation to the Senate of some of the features connected with this proposed exposition. The people of Alaska proposed the holding of such an exposition in the city of Seattle, and the people of the Canadian Yukon concurred with the Alaska people as to the place of holding it, as Seattle is the gateway not only to Alaska, but to the Canadian Yukon. The Canadian government, as I understand it, is willing to aid the enterprise in view of the interest the Canadian Yukon territory has taken in it, if the United States shall see fit to lend a helping hand toward its successful consummation.

The State of Washington, in which it is proposed that this exposition shall be held, has since its admission into the sisterhood of States, contributed generously to every great exposition that has been held in this country. The people of the Pacific coast, without exception, have upon every occasion not only donated their money, through their legislative bodies, but they have erected buildings and have participated with their capital and with their enterprise in all the great expositions that have been held upon the American continent. Of the more than $28,000,000 that have been appropriated by the Federal Government toward the holding of expositions both in this and in foreign countries, we of the West have contributed our just share, and we have made our contributions in a liberal and generous spirit and have been much gratified at the success of these undertakings, to which we, in common with other States and with the Government, have been glad to contribute.

Now, sir, with the expenditure of more than $28,000,000 behind us for exhibitions of this character, it would seem unjust to that country which lies yonder beyond the Rocky Mountains, and which has contributed so generously to that sum, and which has done so much to make a success of similar undertakings, that we should be cut off with the paltry sum of $485,000,

which was appropriated in aid of the Lewis and Clark Exposition, recently held at the city of Portland.

Mr. President, there is Alaska, as the Senator from New York [Mr. DEPEW] has well said with her wonderful production of fish, fur, and gold; but who knows anything about it from a practical point of view except the people of the West, who have fought and struggled to make something of it. It was my good fortune, Mr. President, to be in Alaska in 1883, before that great expanse of country which lies in the interior was known to civilized man. When I stood in 1883 upon the shores of southeastern Alaska there was but a little settlement along the coast. The interior was practically unexplored. The Fairbanks country, named in honor of our worthy presiding officer, was then unknown to man or to fame. In the last year that region alone enriched our Government by more than $7,000,000 in gold, dug from its placers, and this year it will yield more than $10,000,000 in gold.

It is safe to say that if anyone unacquainted with that section of the country were to ask me as I stand here now a question as to the climate of Alaska he would have in his mind in so asking some picture, more or less clearly defined, of icebergs and snow-swept wastes; and if I should answer that upon the southeastern coast of Alaska to-day has probably been as beautiful and as warm a day as we have just passed here in the city of Washington, it is quite possible that you would scoff at the statement. We of the West want to show to the people of this and other countries what there really is in Alaska.

Alaska, with its more than 500,000 square miles of area, and which was in 1867, when purchased by the United States, thought to be an iceberg, is worthy of having its resources displayed where all the world may see them. It has done enough for this Government to deserve to have the Government take an interest of this character in it, in order that the world may know what it has done and what it is capable of doing in producing great mineral and agricultural wealth. It has produced since 1880 nearly $100,000,000 in gold. It has a wealth of fur, of fish, of timber, and of mineral riches which I believe to be unsurpassed on the habitable globe, and we of the West want to exhibit to the world some of the products of that country. We want to show what the pioneers of the placer diggings of Alaska have accomplished since the great discoveries in the Klondike in 1897. We want to show that the region opened by those pioneers, who in 1897 went up to Skagway, carried their provisions and blankets across the mountains, went down to the shores of the lakes and with their own hands hewed down the trees and fashioned therefrom their boats and then floated down that mighty river—the Yukon—to the Klondike country, and went on from the Canadian Yukon into Alaska, has since that time added to the material wealth of this country millions and millions of dollars and has contributed almost incalculably to the prosperity of the whole people of the United States.

The State of Washington has appropriated $1,000,000 toward this exposition. The city of Seattle, in which it is to be held, contributed within the space of ten hours $654,000, although its citizens were only asked to contribute $500,000 toward the enterprise.

Other States of the Union have, through their legislative bodies, recognized the exposition, and have made liberal arrangements for participating therein. Exhibitions of this character, Mr. President, are expensive. They are a great expense to the people of the communities in which they are held, and therefore I think that the Senator from Massachusetts [Mr. LODGE] need not worry over the possible introduction each year of a bill in Congress providing for expositions of this character, for they will never, on account of the expense which they will entail upon the community in which they are held, be undertaken save to commemorate some great event or to display the resources and products of some great section like Alaska and the islands of the Pacific.

Mr. President, I wish I had time—and I shall take occasion at some future day—to discuss in detail the salient features of this exposition and the countries whose resources, accomplishments, and possibilities it is intended to set forth; but I have been warned against taking up the time of the Senate, and inasmuch as I have been endeavoring for several weeks to get a vote upon this bill, I feel that I have already trespassed upon the time of the Senate more than I should, and I therefore leave it to the vote of the Senate, feeling confident that the Senate will recognize the merits of the cause which I have briefly urged.

Mr. SPOONER. Mr. President, I listened with great pleasure to the observations of the Senator from Massachusetts [Mr. LODGE] in opposition to expositions. I always have listened with great pleasure to that speech. I have been convinced more than once by the speech, and have solemnly resolved that I would not vote for any more expositions, and I have, with great inconsistency but uniform regularity, voted for all of them, I believe.

Whether the exposition policy, Mr. President, is a good one or not, I think no man is in a position definitely to say. What good has come to the country in the interchange of commodities between the States and the association of the peoples from different States and the bringing of the products of manufacture and otherwise from other countries for exhibition in our own, whether the coming of peoples from other lands who become acquainted with our own has been of advantage to this country, of course I can not say, nor can any Senator say with authority.

The Senator from Massachusetts, in his succinct and admirably stated argument, seemed to me to be a little illogical, if I may say so, with great deference to him. He denominated this as an industry. Well, it is almost getting to be that, but it can not have become almost an industry and be also a novelty and an innovation. Yet the Senator suggested that he thought this a bad precedent for the Congress to establish. There are many precedents and that is the burden of the argument against this measure.

Mr. LODGE. If the Senator will allow me, I only meant by that that this was broadening the ground very much. Hitherto it has been ostensibly to commemorate some great historical event. This is avowedly simply for the benefit of a certain section of the country.

Mr. SPOONER. Now, Mr. President, I deny the accuracy of the Senator's proposition last uttered. I want to say, in all the votes I have cast for expositions, I have never known one which appealed to me more strongly as based upon broad grounds in the general public interest than this Alaska-Yukon-Pacific Exposition. I think the notion of the Senator from Massachusetts that the motive of this exposition is to exploit a city or to advantage it by the expenditure which comes about from the assemblage of large numbers in a city is entirely away from the fact.

There is no broader-minded people on this continent than the cosmopolitan people who inhabit the State of Washington, and who are working out the magnificent destiny of the city of Seattle. There is no people in this country with a clearer view of the importance of or a closer interest in the development of our oriental commerce than the people of the North Pacific.

Mr. President, after resolving that I would not vote for any more expositions, I voted for Omaha, I voted for St. Louis, I voted for Buffalo; then came the Charleston Exposition. I voted for that for several reasons, mainly because I was not willing to draw the line on a southern city, and for another reason, Mr. President, peculiarly applicable to the city of Charleston, mainly because of its relation in history to the beginning of the struggle between the North and the South. I felt that at a time when we were absolutely united, of all southern cities against which I would not vote to draw the line was Charleston. So when the proposition for the Jamestown Exposition came up I could not find it in my heart, or any justification in my mind, in view of the policy upon which the Government had entered, to vote against that.

Now, Mr. President, a few words only about these expositions. This proposition, so far as merit is concerned, from the standpoint of the general public interests, is to my mind unique. There is "historical incident" connected with it (but the exploitation of that might not and probably would not justify this expenditure, which is very small relatively), and that is the acquisition of Alaska.

You remember and I remember with what doubt perhaps a majority of the people of this country looked upon the acquisition of Alaska. You remember the fight made upon it in both Houses of Congress. The Senator from New York [Mr. DEPEW] states correctly that, while at that time it was of very doubtful wisdom in the general judgment, it turned out to be one of the wisest acquisitions of territory known, almost, to our history.

Alaska, Mr. President, ought to be helped by the Government of the United States to exploit her wealth at the Seattle exposition, or in any other city in this counry where an exposition is held. First, it is in the general public interest that the people of the United States shall be made fully to understand the resources of Alaska as to agriculture, as to timber, as to fisheries, and as to gold, copper, tin—all of its resources. It is for the interest, in a broad way, that we shall speedily people Alaska with American citizens, the hardy people who will go there. I hope to see railroads rapidly constructed into Alaska. It has immense agricultural and other resources.

It is an outpost, Mr. President. Its relation to us geographically is peculiar. Without going into detail, I believe it to be

in the interest of the United States that as rapidly as possible Alaska shall be filled by hardy men who love the flag—brave men who will fight for it should occasion require.

Alaska can not afford to make exhibit of her resources. We have collected more money from Alaska into the Treasury of the United States than this Government has ever expended in Alaska in public improvements or for the benefit of the people who have gone there. Alaska is not in a position to appropriate money to pay the expense of this exhibit. Will anyone say that it is not a good thing to have, somewhere in this country, a searching and complete exhibit of the resources of Alaska? Will anyone say that it is not in the large public interest that the attention of the whole country shall be invited to the possibilities of Alaska? And to refuse to aid Alaska in contributing an exhibit to this exposition, for which the city of Seattle and the State of Washington have made such splendid provision, is to forget our own people of Alaska, and to forget the fact that Alaska, whose development has hardly begun, has already contributed over $300,000,000 of gold to the channels of commerce and trade in the United States.

Now, Mr. President, how about Hawaii? Should not the Government of the United States be willing to pay the expense—and it is not much—of an exhibit from Hawaii, an island Territory far out in the Pacific? There are reasons peculiarly applicable to Hawaii just at this time why, in my opinion, this ought to be done.

And the Philippines. A great many people feel that we have not done our duty to the Philippines in this Congress. I do not stop to discuss that, but the 7,000,000 people in the Philippines sustain a peculiar relation to the people of the United States. Everyone knows that the Philippine government is in no position to facilitate, by the payment of the expense of it, a complete exhibit of the resources of the archipelago at any exposition held in this country.

Is it said by anyone that such an exhibit ought not to be at this exposition? Mr. President, our people can not become too quickly familiar with the resources and capabilities of that archipelago, and our people can not come too quickly and closely into touch with that people and the best representatives of that people. Outside of the mere question of dollars it will make for good in every way.

On broad grounds, Mr. President, it has seemed to me that having the recommendation of the President in his message for aid to this exposition, in a characteristically broad way advocating it, we ought to support it. It is not a large sum.

We had an exposition at Buffalo. No one will ever forget that McKinley died there. We spent a great deal of money on it. That was to exploit the South American products and to bring about a commingling of the business men of the southern republics with the business people of our own land. Is it any less important that we should bring our own peoples far distant from our immediate shore—the continental shore—into touch with those who live in the States?

Mr. President, there is another thing about it. Perhaps the policy ought to be abandoned. I think perhaps the Senator from Massachusetts is right that it ought to be abandoned; I am not sure as to that. I know no way to abandon it without a constitutional amendment limiting the appropriations by Congress for any such purpose or prohibiting them. I know all danger can be very much minimized if the Congress, not as a mere matter of complaisance and because some one asks for it, will consider each proposition carefully upon its merits and have the courage rightly to decide it.

The Senator from Massachusetts said that where we grant to one State we must grant to others; that we can not draw a line on one State and grant to others. I feel the weight of that suggestion, and on the merits I shall cast my vote for this bill with the utmost pleasure, believing that I am serving a general public interest by so doing. I think it will be a great thing to have the products of the Orient, to which we are looking in the future for an immense enhancement of our trade, exhibited on the Pacific coast.

That is all I care to say, Mr. President.

Mr. LODGE. I am quite conscious, Mr. President, that what I said before on this subject had been said on previous occasions, and I am glad that it met, so far as it did meet, with the approval of the Senator from Wisconsin. I think the speech has improved as it has been repeated.

Mr. SPOONER. Oh, well, that is always so with the Senator from Massachusetts.

Mr. LODGE. I have no doubt that when the next exposition measure is brought in I shall make one that will satisfy the Senator from Wisconsin still more. The constant consideration of the subject enables me, I think, to add and improve.

But what I desire to free myself from, Mr. President, and that is the only reason why I took the floor again, is the suggestion that I have any opposition to this particular bill. That is made, I think, too much of in this Senate as to a great many bills to which a Senator is called upon to object or to inquire into. There is too ready a disposition to suppose and to suggest that we are doing something personally to the Senator who is interested in a particular bill or to the locality which it is to benefit. We are all here to represent primarily the United States, and we all desire to do what is primarily for the interest of the entire United States.

In this case, Mr. President, nothing could be further from my mind than any suggestion, not of hostility, but of opposition in the slightest way to the locality where it is proposed to hold this exposition. The State of Washington is now one of the greatest States of the Union and is going to be, in my opinion, a very great State indeed. That State and the State of Oregon, I think, occupy positions unequaled almost in the United States, and I think they have before them a most splendid future. Many people from my own State and from my own part of the country have gone to the States of Washington and Oregon, and no one can feel a greater interest in both those States than I do.

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Oregon?

Mr. LODGE. Yes.

Mr. FULTON. I wish to ask the Senator from Massachusetts if it is not greatly to the advantage of his friends to go to those States, and does he not think that by holding this exposition it will call the attention of other good people who will go there to their advantage?

Mr. LODGE. Well, as an advertisement I have no doubt such expositions are good things; but whether it is the business of the Government of the United States to advertise one part of this country as against any other part I doubt very much.

Mr. FULTON. When the United States has a good thing it ought to advertise it.

Mr. LODGE. I do not think it ought to advertise one State and take the money of the people of the other States to do the advertising. Let each State advertise itself. But I was merely expressing what I honestly feel—a great admiration for both those States and a profound interest in them.

As to our possessions elsewhere, in the same way I do not want to be supposed to be adverse to the interests which have been enumerated and for which appropriations are made in this bill. Ever since we have had the Philippine Islands I have been chairman of the committee charged with the legislation for them; and whether successful or unsuccessful in the legislation that has been enacted, certainly I have labored faithfully for them, and nobody, I venture to say, takes a deeper interest in the welfare of the people of those islands than I, or is any more ready to see the Government do everything in its power, with a liberal hand, to aid them and to aid our trade with the islands.

Only two years ago we brought an entire regiment from the Philippine Islands to the St. Louis Exposition, and expended an immense sum of money to have them properly represented there, and I entirely approved of it. Now it has been suggested that we should do it again, and do it so soon after that exposition. Certainly those islands have not been neglected.

I have the same interest in Hawaii. I was certainly one of the most ardent in preventing what I thought was a mistake at the time of the second Cleveland Administration, and in urging in 1898 the acquisition of the islands to be a Territory of the United States. I have always taken the profoundest interest in those islands.

As to Alaska, whose cause has been argued here with so much energy, I have taken great interest in Alaska also; and it is not merely an interest of words. I had charge of the treaty by which the tribunal was established which settled the Alaskan boundary. I had the honor to serve on that tribunal; and the decision of that tribunal removed forever from the boundary of Alaska the cloud which had been raised against her title. It put forever within the control of Alaska the Lynn Canal and the approaches to it. It gave her forever that strip of coast which I thought, and still think, was of vast importance to that Territory. That led me to give very great attention to the interests of the Territory of Alaska, and if there is to be any exposition of this sort, the National Government ought to expend the money in order to have her resources exhibited there.

I mention these things, Mr. President, simply to relieve myself of the suggestion that what I say arises from hostility to this exposition. I tried to make it clear in what I said at first, that

I think we are getting ourselves committed more and more to a settled policy of establishing industrial expositions everywhere and holding them more and more frequently in all parts of the Union. We began with Philadelphia. Nothing could have been more appropriate, nothing could have been more proper, than to have had a great industrial exposition to celebrate the independence of the United States—the greatest event in our national history. That was the first one, and I have no doubt it did good, both at home and abroad.

Then we had the great exposition at Chicago to celebrate the Columbian discovery—another enormous event of world-wide importance. That exposition, by the character of its buildings and by the interest taken by foreign governments, I have not any question, did a great deal of good, and was a very valuable exposition to have held.

Then we began to multiply expositions everywhere until we have reached a point now when foreign governments are no longer interested in sending exhibits to them. It is an enormous expense for them to send such exhibits. Such expositions have been held so frequently that interest in them at home and abroad is failing. Expositions are valuable to a country largely in proportion to their rarity or to the care with which they are held at suitable intervals of time. But if we have a national exposition, a world's fair, every year or two, of course we can not expect foreign nations to go to the expense of sending great exhibits. The States themselves will become tired of making appropriations, and we shall find such expositions degenerating into merely a large expenditure of money from the treasury of the State where the exposition is held and from the Treasury of the United States.

Mr. SPOONER. But there will probably be others that will follow this.

Mr. LODGE. Why, Mr. President, there are five or six behind this, and it opens out an indefinite line. Every time we hold one it encourages the holding of others.

Mr. SPOONER. The first one established the precedent.

Mr. LODGE. No; I do not think the first one established a precedent for all these numerous expositions. That was held in commemoration of the greatest event in our national life.

Mr. SPOONER. Yes; but it formed a precedent for all the rest.

Mr. LODGE. Well, it may have formed a precedent for all the rest. Expositions have been held abroad. The great city of expositions has been Paris; and I think the French have come to the conclusion that they have been multiplied and multiplied until they have lost their value to a large extent by their frequency. To hold them in every quarter of this country, as I say, I think will lead to the expenditure of the money of the States and of the money of the United States.

I see the force of the reasons the Senator from Wisconsin has stated in regard to this particular exposition; and I think I have shown reasonably the interest which I have taken, and manifested by my acts here, in the Philippines, in Hawaii, and in the fortunes of Alaska. I have made the statement, I repeat, to show that my opposition is not to the place or the subject of the exposition itself, but to the policy to which we are becoming more and more committed with each one of these expositions that we establish.

I shall not take the time of the Senate any further. I have only spoken now because I wished to relieve myself of the suggestion that I was opposing this exposition because I was not interested in the State or the Territory or in our outlying possessions. It so happens that I have a particular interest in all of them.

Mr. SPOONER. The Senator does not understand that that applies to any criticism I made.

Mr. LODGE. Oh, not in the least.

Mr. SPOONER. I did not mean anything of that sort.

Mr. LODGE. No; but it was only the suggestion that ran through many of the speeches which have been made in regard to my position.

Mr. GALLINGER. I recall, Mr. President, very distinctly that when an appropriation was sought for the great exposition in Chicago several Senators occupying seats in this portion of the Chamber resolved that that was the last exposition for which they would vote an appropriation, and I was one of the number; but I have voted for every one of such appropriations since, and I am going to vote for this one, and I presume I shall vote for a good many that are to follow it. When the Senator from Massachusetts [Mr. LODGE], as he doubtless will after a little while, conclude that the landing of the Pilgrims on Plymouth Rock is worthy of a national celebration of some kind or other, I will vote for that, and possibly, after we have had that exposition, I will call the attention of the Senate, if I shall be privileged to be here, to the fact that the first overt act of the Revolution was committed on New Hampshire soil, in the city of Portsmouth, and that we ought to celebrate that great event. [Laughter.]

Mr. SPOONER. And the treaty between Russia and Japan followed.

Mr. GALLINGER. Yes; the treaty between Russia and Japan followed, and we might celebrate that great historic fact at the same time.

Now, Mr. President, as I have said, I am going to vote for this appropriation; but I want to ask the Senator from Washington [Mr. PILES] two or three questions about matters in the bill, and I shall abide entirely by what he thinks is right and proper. I notice that the appropriation for buildings as amended in the bill aggregates $325,000. Of that amount the Alaska building is to take $250,000; the small pittance of $25,000 is to be given to the Hawaiian building, and $50,000 to the Philippine Islands building. I will ask the Senator if he thinks that is a fair division so far as these buildings are concerned?

Mr. PILES. In response to the inquiry of the Senator from New Hampshire, I will say that was the conclusion in committee where the matter was discussed. The Senator will see that the bill as introduced provides for a larger sum in each case.

Mr. GALLINGER. Yes; and relatively more for Alaska.

Mr. PILES. Yes; but it was thought better to allow the matter to stand as the bill had been reported by the committee, it being thought that it would thereby have a better chance to pass the other House.

Mr. GALLINGER. Undoubtedly. Mr. President, I have been in Alaska, and I have had the privilege to be in the great city of Seattle at three different times. I have a great admiration for that city and also for the Territory of Alaska.

But it does seem to me that the products of Alaska at the present time, as compared with those of Hawaii and the Philippine Islands, do not warrant us in constructing a quarter of a million dollar building for Alaska and a $25,000 building for Hawaii, and a $50,000 building for the Philippine Islands. I apprehend that the products of the Philippine Islands that will be exhibited in Seattle will surpass those of the Territory of Alaska. That is my judgment.

Mr. PILES. The Senator is mistaken about that.

Mr. GALLINGER. I may be mistaken. What will Alaska exhibit?

Mr. PILES. That is a matter, as I said, which we submitted to the committee, and they took the Portland fair as a sort of guide on that point, and fixed the amounts as they are stated in the amended bill.

Mr. GALLINGER. Will the Senator object to making a division that will give $200,000 to Alaska, $50,000 to Hawaii, and $75,000 to the Philippine Islands?

Mr. PILES. I would make no objection to that at all.

Mr. GALLINGER. Then, I move to amend the amendment, on page 5, line 14, by striking out "$250,000" and inserting "$200,000;" in line 15, to strike out "twenty-five" and insert "fifty;" and in line 17, to strike out "fifty" and insert "seventy-five."

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. On page 5, line 14, before the word "thousand," it is proposed to amend the committee amendment by striking out "and fifty;" in line 15, before the word "thousand," by striking out "twenty-five" and inserting "fifty;" and in line 17, before the word "thousand," by striking out "fifty" and inserting "seventy-five;" so as to read:

For the cost of the Territory of Alaska building, $200,000, and for the cost of the Territory of Hawaii building, $50,000, and for the cost of the Philippine Islands building, $75,000.

The amendment to the amendment was agreed to.

Mr. GALLINGER. Mr. President, there is one other suggestion I am going to make to the Senator from Washington, and I will entirely abide by his wishes in the matter. On page 7, lines 15, 16, 17, 18, and 19, this language occurs—I will read the context, so that it will appear in proper form:

The Secretary of the Treasury shall advance to said officer from time to time, under such regulations as the Secretary of the Treasury may prescribe, a sum of money from the appropriation for the exhibits herein authorized, not exceeding at any one time three-fourths of the penalty of his bond, to enable him to pay the expenses of said exhibits as authorized by the United States, and said Government board shall report to the session of Congress which shall meet in December, 1907, what further exhibits, in its judgment, the Government of the United States should make at said exposition as will illustrate the function and administrative faculty of the Government in time of peace and its resources as a war power, tending to demonstrate the nature of our institutions and their adaptation to wants of the people.

I ask the Senator if he would have any objection to striking out the language after the word "exposition," in line 15?

Mr. PILES. Under the existing conditions, I would not have any objection.

Mr. GALLINGER. Then I move that amendment.

The VICE-PRESIDENT. The amendment proposed by the Senator from New Hampshire will be stated.

The SECRETARY. On page 7, line 15, after the word "exposition," it is proposed to strike out:

As will illustrate the function and administrative faculty of the Government in time of peace and its resources as a war power, tending to demonstrate the nature of our institutions and their adaptation to wants of the people.

The amendment was agreed to.

Mr. GALLINGER. I thank the Senator for his courtesy. That is all I care to say on this bill, Mr. President.

Mr. DUBOIS. Mr. President, I am very much in favor of the passage of this bill for a number of reasons. I have always opposed the acquisition of outlying provinces, commencing with Hawaii; but we have them, and apparently we intend to keep them. Therefore I think we ought to familiarize our people with the possibilities of those countries and especially with those of the Philippines. It does not do any good to bring a thousand Filipinos here, as we did at St. Louis, because when our people look upon the Filipino people they are disgusted with the fact that we are in possession of those islands; but I recall that when I visited the Portland exposition I saw some of the products of the Philippine Islands, especially their wood and timber. I think if we had an exhibit of their copra and their hemps and their different hard woods—the most magnificent in the world, though I think they are rather limited in quantity—but if we had an exposition of the possibilities of those islands, it might induce white men from the United States to go there, which is a thing greatly to be desired.

So far as Hawaii is concerned, there would be no particular benefit accruing from an exhibition of her products, because there is nothing in Hawaii except the sugar lands, and they are owned by a few individuals. But Alaska has great possibilities, and our people ought to become familiarized with the resources of that country. These expositions tend to familiarize them with those possibilities.

In addition to that, these expositions in the Northwest relieve the Senators from that section of a great deal of hard work. Our mail is congested by inquiries from New England and the Middle West as to the lands of our country. The people of the United States are land hungry. Within a few years Seattle has grown almost from a village to be a town of 250,000 people. Spokane, in that State, is a town of 75,000 people and growing rapidly, while a few years ago there were but 25,000 people there. My own State is growing in every direction. So are Oregon, Montana, and Wyoming. These expositions give the people of the United States an excuse to go out there and see what there is in the Northwest. It helps the Middle Western States and their Senators. It helps the New England people.

For these reasons, and because we ought to know the possibilities of our possessions and to familiarize the people of our own country with the resources of the Northwest, I think we ought to encourage an exposition of this kind, and Seattle, apparently, is the proper place to hold such an exposition.

Mr. CLAY. Mr. President, I am not going to make any speech against the pending bill, although I have said two or three times that I would never vote for another appropriation for an exposition. Mr. President, if our appropriations continue to grow in the next ten years as they have grown during the last ten years, we can not tell where they will reach. I want to call attention to a provision in the legislative appropriation bill that was passed during the last session of Congress:

Hereafter the heads of the several Executive Departments and all other officers authorized or required to make estimates for the public service shall include in their annual estimates furnished the Secretary of the Treasury for inclusion in the Book of Estimates all estimates of appropriations required for the service of the fiscal year for which they are prepared and submitted, and special or additional estimates for that fiscal year shall only be submitted to carry out laws subsequently enacted, or when deemed imperatively necessary for the public service by the Department in which they shall originate, in which case such special or additional estimate shall be accompanied by a full statement of its imperative necessity and reasons for its omission in the annual estimates.

Mr. President, the appropriation bills that have passed the House and Senate during the present session carry $922,963,667.67. I want to call attention to the fact—and I do not mention it in a partisan way, for one Senator is probably as much responsible for it as another—the estimates for the agricultural bill for 1908 were $7,954,680, and we appropriated $9,457,810, nearly $3,000,000 more than the estimates. Take the Army appropriation bill. The estimates made for the Army expenses were $79,301,303.82, and the appropriation bill which we have passed carries $81,787,610.54. Take the Indian appropriation bill. The estimates made with regard to that bill were $7,970,168.23, and the bill as passed the Senate carries $12,876,110.76. Take the post-office appropriation bill. The estimates were $206,662,190, and the appropriation bill carries $212,234,393, which has been increased by reason of the increase of salaries. Take the sundry civil bill. The estimates amounted to $101,288,131.60, and the appropriation bill carries $115,416,161.30. You will find that the appropriation bills which have already passed through the House and Senate carry about $29,000,000 more than the estimates. It is true that special estimates have been made during the session of Congress and during the time the committees were in session.

Congress clearly intended when this provision was inserted in the legislative bill that these estimates should be made and placed in the Book of Estimates in order that Congress and the Appropriation Committees of the House and the Senate might critically and carefully examine these expenditures.

Mr. President, I desire to have inserted in the RECORD the table which I have prepared, giving the estimates for 1908 and the amounts contained in each appropriation bill. I will ask that the table be inserted at the close of my remarks.

Mr. ALLISON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Iowa?

Mr. CLAY. Certainly.

Mr. ALLISON. I will say to the Senator from Georgia that it is not easy to make an accurate table as to amounts of appropriations in these several bills until the bills are finally passed.

Mr. CLAY. I will simply say to the Senator that many of the bills are now in conference, and it is just to say that some of the items may be stricken out. I am not specially criticising any appropriation bill or any particular act, but we have arrived at that point, in my humble judgment, in the history of our appropriations where it is very necessary to be extremely careful to keep them from swelling to an unreasonable extent, and the Senator, I know, will agree with me in that proposition.

Mr. ALLISON. I thoroughly agree with the Senator as to that; but I want the statement that the Senator inserts to show the status of these bills at the time the table is inserted.

Mr. CLAY. That is true. I think five or six of the appropriation bills are now in conference, and no one can tell what will be the result in regard to some of the items when the conference committee shall act. Behind these bills there is still one pending in the House—the general deficiency appropriation bill—which will carry, I understand, several million dollars.

I also, Mr. President, hold in my hand the estimates for the year 1898 and the amounts appropriated in each appropriation bill for the year 1898. I will ask also, Mr. President, to have this table inserted at the close of my remarks.

I find that we appropriated for the total expenses of this Government in the year 1898 $528,735,079.30. The bills that we have passed in the House and Senate, some of them now being in conference, carry $922,963,667.66. Our expenditures in a period of ten years have very nearly doubled.

Mr. President, the bill that we now have before us carries only a very small item, and I know of no Senator on the floor of this Chamber for whom I have a higher personal regard than the Senator from Washington [Mr. PILES], and he has set forth in many respects a meritorious claim.

He has set forth in many respects a meritorious proposition. But, Mr. President, I have said heretofore that I did not intend to vote for any more of these appropriations. I have said that we have spent $28,000,000 for the purpose of these expositions, and I am frank to say that my section of the country has been as anxious to secure them as any other section of the country.

I desire to say another thing. Our constituents, to a large extent, have formed incorrect ideas in regard to the public service. We have reached a point in many of our States where we judge of the capacity of a Senator or Representative to serve his people by the amount of appropriations he secures for his State. However, we frequently forget that while we are subserving a special interest in a State we are taxing the entire people of that State and the entire American people for the purpose of carrying out these special favors.

It is true that necessary improvements and necessary governmental expenditures must be made, but it becomes the duty of every Senator and it becomes the duty of Congress to scan and criticise every expenditure and try to keep the expenditures within reason. I ask that these tables may be inserted as a part of my remarks.

The VICE-PRESIDENT. Without objection, permission is granted.

The tables referred to are as follows:

*Appropriation bills, 1908.*

| Title of bill. | Estimates, 1908. | As passed Senate. |
|---|---|---|
| Agriculture | $7,954,680.00 | $9,457,810.00 |
| Army | 79,301,303.82 | 81,787,610.54 |
| Diplomatic and consular | 3,254,077.72 | 3,071,277.72 |
| District of Columbia | 11,598,222.00 | 10,766,562.63 |
| Fortifications | 15,068,559.00 | 7,453,589.00 |

| Grand total, regular and permanent annual appropriations | 535,446,047.28 | 528,735,079.30 |

The VICE-PRESIDENT. The amendments reported by the Select Committee on Industrial Expositions will be stated.

The first amendment of the Select Committee on Industrial Expositions was, in section 1, on page 3, line 17, before the word "hundred," to strike out "five" and insert "two;" so as to read:

*Provided,* That the cost of said exhibit of said Territory of Alaska, including such selection, purchase, preparation, transportation, arrangement, installation, safe-keeping, exhibition, and return of the articles so exhibited shall not exceed the sum of $250,000, which sum is hereby appropriated out of any money in the Treasury not otherwise appropriated.

The amendment was agreed to.

The next amendment was, in the same section, on page 3, line 23, after the words "sum of," to strike out "seventy-five" and insert "fifty;" so as to read:

*And provided further,* That the cost of said exhibit of said Territory of Hawaii, including such selection, purchase, preparation, transportation, arrangement, installation, safe-keeping, exhibition, and return of the articles so exhibited shall not exceed the sum of $50,000.

The amendment was agreed to.

The next amendment was, in section 2, on page 4, line 16, after the words "sum of," to strike out "one hundred" and insert "seventy-five;" so as to read:

*Provided,* That the cost of said exhibit of said Philippine Islands, including such selection, purchase, preparation, transportation, arrangement, installation, safe-keeping, exhibition, and return of the articles so exhibited shall not exceed the sum of $75,000.

The amendment was agreed to.

The next amendment was, in section 3, on page 5, line 9, after the words "sum of," to strike out "five hundred" and insert "three hundred and twenty-five;" so as to read:

Said buildings shall be erected from plans prepared by the Supervising Architect of the Treasury, to be approved by the United States Government board herein created, and the Secretary of the Treasury is hereby authorized and directed to contract for said buildings in the same manner and under the same regulations as for other public buildings of the United States, but the contract for said buildings and the preparation of grounds therefor and the lighting thereof, inclusive, shall not exceed the sum of $325,000.

The amendment was agreed to.

Mr. GALLINGER. The amendments that were amended on my motion, I think, have not been agreed to.

The VICE-PRESIDENT. They were agreed to.

Mr. SPOONER. They were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

COPIAH COUNTY, MISS.

During the reading of the report on the bill (S. 7382) to encourage the holding of an Alaska-Yukon-Pacific Exposition at the city of Seattle, State of Washington, in the year 1909.

Mr. FULTON. I ask permission to interrupt the reading of the report in order to enter a motion to reconsider the vote whereby the bill (H. R. 3518) for the relief of Copiah County, Miss., was passed yesterday. I must have been out of the Chamber, I think, when the bill was passed, because it is one reported from the Committee on Claims which I gave notice at the time I should oppose, because I think it is wrong in principle. I move that the bill be recalled from the House of Representatives.

Mr. KEAN. What bill is it?

Mr. McLAURIN. Mr. President——

Mr. FULTON. The Senator from Mississippi [Mr. McLAURIN] reported it.

The VICE-PRESIDENT. Does the Senator from Oregon yield to the Senator from Mississippi?

Mr. FULTON. In just a second. It is a bill providing for the reimbursement of Copiah County, Miss., for the costs of a lawsuit instituted by the Government to remove an obstruction on a stream. My objection is that it is contrary to public policy for the Government to pay costs in a case of that characer. If it pays costs in one case, it must pay in all. I move that the bill be recalled from the House of Representatives, in order that I may——

Mr. McLAURIN. I wish to say, in reference to the statement of the Senator from Oregon that he was absent, that I saw him in the Senate Chamber when I rose to address the Chair, and if he left, he left after I rose to address the Chair yesterday evening and ask unanimous consent for the present consideration of the bill.

There was no meeting of the Committee on Claims last Tuesday because of the nonattendance of members. There was a meeting called by the chairman, but as there were only three members present, the committee meeting was called off by the chairman. I then asked the consent of the chairman of the committee to poll the committee on this bill. He stated to me that it was not necessary to get his consent, but I stated to him that I would not poll the committee unless I had his consent. He stated to me that he gave his consent to poll the committee, but that he would oppose the bill; that he did oppose the bill; that he would not vote for a favorable report of the bill. I then——

Mr. FULTON. The Senator from Mississippi will allow me. I trust he did not infer from my remarks that I was criticising his conduct in bringing up the bill. I may have been in the Chamber and not have observed that the bill was called up.

Mr. McLAURIN. There was a good deal of confusion in the Chamber when it was called up, but I remember seeing the Senator from Oregon on the floor when I rose and addressed the Chair.

I wish to say with reference to the bill that I did poll the committee and that every member of the committee, except the chairman, signed the bill for a favorable report.

The VICE-PRESIDENT. The Senator from Oregon enters a motion to reconsider the vote by which the bill mentioned by him was passed, and moves that the bill be recalled from the House of Representatives.

Mr. McLAURIN. Before the vote is taken I wish to say that the bill carries only $164.50. The bill passed the House of Representatives. It is a case where the Government sued out an injunction against Copiah County and the Virginia Bridge and Iron Company, that was contracted with to construct a bridge across Pearl River, and after some litigation the injunction was dissolved. An appeal was taken by the Government to the circuit court of appeals at New Orleans. Before the circuit court of appeals passed upon the bill——

Mr. FULTON. If the Senator will permit me, I suggest that we do not take up further time of the Senate in discussing this motion. I will simply enter the motion. I will not press the motion to reconsider, but ask simply that the bill may be recalled in order that I may call it up later. I will call it up and give the Senator from Mississippi an opportunity to present his views.

Mr. McLAURIN. Will not that have the effect, if the bill is

recalled from the House, to kill the bill unless the motion to reconsider is called up and acted upon? If so, I can not consent to that.

Mr. SPOONER. Mr. President, I call for the regular order.

The VICE-PRESIDENT. The Secretary will continue the reading of the report.

Mr. FULTON. My motion to reconsider will be entered, I suppose.

The VICE-PRESIDENT. The Secretary will continue the reading of the report.

FELIX G. MORRISON.

The VICE-PRESIDENT laid before the Senate the following concurrent resolution of the House of Representatives; which, on motion of Mr. MCCUMBER, was considered by unanimous consent, and agreed to:

*Resolved by the House of Representatives (the Senate concurring)*, That the President be requested to return the bill (H. R. 21606) entitled "An act granting an increase of pension to Felix G. Morrison."

WHITE PERSONS WHO INTERMARRIED WITH CHEROKEE CITIZENS.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 8535) for the relief of certain white persons who intermarried with Cherokee citizens, which were, on page 1, line 3, to strike out "after the approval of this act" and insert "after allotment, but in no case less than sixty days after the approval of this act;" and on page 2, line 4, after "jurisdiction," insert:

*Provided*, That where citizens of the Cherokee Nation entitled to allotments have heretofore applied for lands on which intermarried white persons own improvements, such citizens entitled to allotments shall have the prior right to purchase said improvements as herein provided.

Mr. CURTIS. I move that the Senate concur in the amendments of the House of Representatives.

The amendments were concurred in.

INDIANS OF LA POINTE OR BAD RIVER RESERVATION.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 2787) to amend the act of Congress approved February 11, 1901, entitled "An act providing for allotments of lands in severalty to the Indians of the La Pointe or Bad River Reservation, in the State of Wisconsin," which was, in line 9, after "reservation," to insert "whether born before or after the passage of said act."

Mr. CLAPP. I move that the Senate concur in the House amendment.

The amendment was concurred in.

MISSISSIPPI RIVER DAM.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 8377) to amend an act entitled "An act permitting the building of a dam across the Mississippi River in the county of Morrison, State of Minnesota," approved June 4, 1906, which was, on page 3, line 15, after "thereafter," to insert:

And that except so far as may be otherwise provided in this act, the provision of the act of Congress entitled "An act to regulate the construction of dams over navigable waters," approved on the 21st day of June, 1906, shall be applicable to the construction of the dam provided in this act.

Mr. CLAPP. I move that the Senate concur in the House amendment.

The amendment was concurred in.

JAMESTOWN TERCENTENNIAL EXPOSITION.

The VICE-PRESIDENT laid before the Senate the following concurrent resolution of the House of Representatives:

*Resolved by the House of Representatives (the Senate concurring)*, That the invitation extended to the Congress of the United States by the Jamestown Tercentennial Exposition to attend the opening ceremonies of said exposition, to be held April 26, 1907, is hereby accepted.

That the Speaker of the House of Representatives and the President of the Senate be, and are hereby, authorized and directed to appoint a committee to consist of ten Senators and fifteen Representatives of the Fifty-ninth Congress to attend the formal opening of the ceremonies referred to and to represent the Congress of the United States on that occasion.

Mr. WARNER. I ask for the present consideration of the resolution.

The resolution was considered by unanimous consent, and agreed to.

DENATURED ALCOHOL.

Mr. HANSBROUGH. I move that the Senate proceed to the consideration of the bill (H. R. 24816) to amend an act entitled "An act for the withdrawal from bond tax free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials," approved June 7, 1906.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Finance with amendments.

Mr. HANSBROUGH. The bill has been read, Mr. President.

Mr. CARTER. I understand the bill now before the Senate has been read, and the question is on the Senate committee amendments.

Mr. President, I desire at this time to enter a motion that the Senate disagree to the amendment of the committee on page 4, beginning in line 5, and I desire briefly to state that I am of the opinion that if this amendment should be adopted it would practically nullify the purposes of this bill.

When the original bill was passed, it was understood that the farmers of this country might through the means of that act be permitted to utilize waste material, either vegetables or grains, in the manufacture upon their premises of alcohol which, being properly denatured, would be free from internal-revenue taxation. It has been found that the provisions of the act do not admit of the development of this industry except upon a large scale at central points. The purpose, as I understand, of the pending bill is to permit the individual farmer to manufacture on his own premises, without onerous or needless restriction, this alcoholic product, which, when properly denatured, may be utilized without the payment of internal-revenue taxes.

The amendment to which I have referred proposes to import into the operations of this bill section 3284 of the Revised Statutes, which reads as follows:

Every distiller or person employed in any distillery who, in the absence of the storekeeper, or person designated to act as storekeeper, uses, or causes or permits to be used, any material for the purpose of making mash, wort, or beer, or for the production of spirits, or removes any spirits, shall forfeit and pay double the amount of taxes on the spirits so produced, distilled, or removed, and in addition thereto be liable to a penalty of $1,000.

This section of the statute obviously contemplates the presence at each one of these distilleries of an agent of the Government known as "gauger" or "storekeeper."

It is very clear that if that provision is incorporated in the bill the expense necessarily involved in maintaining a storekeeper at the ranch or farm of every man who desires to manufacture alcohol will be prohibitive. The purpose of the bill in other sections is to facilitate the manufacture by the individual farmer of the waste products of the farm into alcohol for sale and use in the arts, to be so denatured as to be unfit for use except in the arts.

I imagine that the Treasury Department can make appropriate regulations whereby the individual farmer, desiring to establish a plant of a hundred gallons daily capacity, wherein to utilize the waste products of the farm, to be transformed into alcohol, can be cast about with such restrictions as will prevent any possible injury to or fraud upon the revenue of the Government. For these reasons, and believing that the proposed amendment would nullify all the other provisions of the bill and leave the law where the law now is—inoperative and useless, except at central points and in large distilleries—I think the amendment should be disagreed to.

Mr. MCCUMBER. Mr. President, I have not been as optimistic in respect of the great benefits which were to be derived by the farming public by reason of the bill known as the "denatured-alcohol bill" as the press would give us to believe would result from its enactment. However, I am certain that if it is properly guarded and if the farmers of the country get into the habit of using their refuse vegetables, potatoes, etc., in the manufacture of alcohol, they can accomplish something at those times of the year when their labor would not otherwise be employed at all. While they may not reap the benefits that the press has given us to understand would probably be reaped from its enactment, I do want to see them have the fullest benefit that can possibly be derived from this legislation.

The bill as it was drawn and passed two years ago was supposed to be of a character which would allow every farmer without hindrance to proceed to manufacture alcohol and to sell it. The bill as it passed the House contained this provision:

Such denaturing to be done in denaturing bonded warehouses specially designated or set apart for denaturing purposes only, and under conditions prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury.

I believe that was amended in the Senate by adding, after the word "done," the following words:

Upon application of any registered distillery.

So that it would read:

Such denaturing to be done upon application of any registered distillery.

Now, under that provision as it has been construed the farmer is practically prevented from entering into this business at all.

To modify this and to get back to the proposition as we understood it in the beginning, we have section 4 of the bill as it comes from the House. In order to prevent any possibility of

loss to the Government, it is provided that the farmer may manufacture not exceeding a hundred gallons at a time; that the tank used for the alcohol shall be locked and under the supervision of the proper agents; that the proper agent can be called upon at any time, when the fluid will be taken from the tank, and that the farmer can manufacture it in the meantime without supervision.

Then the bill is proposed to be amended again, so as to provide that section 3284 of the Revised Statutes shall govern in the matter of the manufacture of this product. And this section provides:

Every distiller or person employed in any distillery who, in the absence of the storekeeper—

Which I have denominated the "agent"—

or person designated to act as storekeeper, uses, or causes or permits to be used, any material for the purpose of making mash, wort, or beer, or for the production of spirits, or removes any spirits, shall forfeit and pay double the amount of taxes on the spirits so produced, distilled, or removed, and in addition thereto be liable to a penalty of $1,000.

The effect of this amendment, as has been suggested by the Senator from Montana [Mr. CARTER], is absolutely to prohibit in any profitable manner the manufacture of alcohol in a small way upon the farms throughout the United States. When will the farmer manufacture denatured alcohol, if at all? The only time he can possibly afford to do it will be during a portion, possibly, of the winter months, when he can do nothing else, or perhaps the long winter evenings, or in such inclement weather that he can not perform his general labors upon the farm. Suppose in the fall of the year, when he is unable to plow on account of its being too wet, he would want to turn his attention and that of his family and men, if he had them hired, for a day or two to this enterprise. He could not do anything unless he would first send and get an agent to come there and remain there during the time he was manufacturing the denatured alcohol. The result would be that he could do nothing at all, because, as I say, it can not, in my opinion, be manufactured profitably except by the farmer and his family.

I have read the reports where it is said we can raise potatoes in this country for 10 and 15 cents a bushel which can be used at a profit in this industry. In my own State you could not hire them picked up for that amount per bushel. We have had a little experience in the matter of attempting to run starch factories. The factories could not utilize the potatoes at a cost of more than 20 cents a bushel. When they were not more than 20 cents a bushel they could not get the farmers to bring them in, and when they were above 20 cents a bushel the starch factories could not use them.

So I repeat that the only way the farmer is to make anything in the manufacture of denatured alcohol is at the odd times when he can give it his attention and with the help of his family in attending to it. I do not believe there is a farmer in the United States who to-day could profitably manufacture alcohol in quantities of less than a hundred gallons at a time. I further do not believe that with the present price of labor it could be made to pay upon any farm in the United States where labor must be employed. Therefore, if we are to get any benefit whatever it must be in cases where the farmer and his family put their labor against the profit that would be derived from it, and not where hired labor is used; and to utilize it they must utilize it whenever they have the opportunity to do so and not when they may secure the attendance of a special agent.

This bill also, in order to protect the Government, provides, first, for steel tanks, which shall be under lock and key and which can only be opened and discharged of their contents at such times as the agent can be present; and when the tank has once been filled, whether it takes one month or six weeks or six months, the farmer can then call for the agent and he can either denature it upon the premises or it may be conveyed to a central denaturizing plant under the direction and auspices of the agent. This is provided for. It guards the Government against fraud of any character.

Mr. President, I have not yet heard of any great loss to the Government on account of the fruit-brandy establishments in the United States. I understand there are about 450 of them. I do not understand that every time they make a gallon of brandy they have to call in a special agent to see it manufactured or to see that it is not improperly used. They are allowed to make it all over the United States. The receptacle in which it is manufactured is not locked; the key is not held in the possession of the agent as is proposed in this bill, and I have yet to hear that any great complaint has been lodged of any fraud against the Government in the manufacture of this brandy. Much less, therefore, in my opinion, would there be danger of fraud in the manufacture of alcohol upon the farm. For the first reason, that alcohol is not used for drinking purposes alone. Secondly, from the material from which it would naturally be manufactured it would hardly be fit for anything but mechanical uses.

The Commissioner, I understand, who certainly has as clear an understanding of what is necessary to protect the Government against fraud as anyone, has practically drawn this bill. Taking the two or several bills in the House, he has remodeled them in such manner as to meet the objections that were made against the old bill, that it precluded the small manufacturer. This bill meets his approval, he having drawn it and having reported on it favorably before it passed the House.

Mr. President, who is opposing the measure as it was adopted by the House? Whence the opposition? If I am informed correctly, the only opposition comes from those great distilleries which are opposed to competition. I understand the statement has been made openly by them that they can not stand the farmer competition. The farmer competition is just exactly what the public is demanding, and this gives us the only competition that we may hope to receive. I sincerely hope that this amendment, for that reason, will be defeated, and that the bill will pass in such form as will allow every farmer in the United States, who desires to go to the expense of purchasing a still for the purpose of manufacturing denatured alcohol, to manufacture it in as small quantities as he sees fit and at such times as he sees fit, without the intervention of a Government agent. This amendment as it comes to us, in my opinion, absolutely prohibits the farmer from taking any part in the manufacture of this product in such a manner as to return him any profit.

Mr. FULTON. Mr. President, I trust this amendment will not be adopted. It may be as contended, and unquestionably in all sincerity by those who advocate it, that the result will not be to interfere with the manufacture of alcohol by the small factories, but I can not believe that it will not have that effect. It seems to me it is wholly unnecessary to impose the regulations of section 3284 on these small distillers. If these regulations shall be imposed on them, it is going to add so much to the cost and hamper them in prosecuting the work to such a degree that the benefits that were supposed to come to the farming communities by reason of denatured-alcohol legislation will fail to materialize.

We hoped and believed at the last session of Congress that we had enacted such legislation as would enable the farmers to convert a large amount of their products that now they fail to realize any particular profit on into alcohol that would go into commercial use, and thereby they would make a profit on its product. But when we came to scrutinize the law carefully as enacted, we discovered that we had practically fenced them off and rendered it impossible for them to get any benefit from it. The only way the farmers can secure any benefit under this character of legislation is by making it just as cheap as possibly can be done and protect the interests of the Government.

I am very much like the Senator from North Dakota in this respect, that I have always doubted whether the benefits would come quite up to the expectations of the people through this legislation, but I believe in giving it a fair trial, and we can not give it a fair trial unless we remove every restriction that can be dispensed with and yet not imperil the interest of the Government.

Mr. HANSBROUGH rose.

Mr. FULTON. Does the Senator wish to ask me a question?

Mr. HANSBROUGH. Let me call the attention of the Senator from Oregon to the fact that even the most ardent advocates of the bill do not expect that the producers of agriculture in the United States are going into this business to any great extent right away. It is going to come by degrees. It will be a slow process at first. That was the case in all the European countries. It came slowly, but it came surely; so that to-day, as I am advised, they have in operation in Germany about 6,000 distilleries. The most of them are what we would term here farmers' distilleries; and last year, I believe, they manufactured there something like $70,000,000 worth of alcohol, which was denaturized and used for light, heat, and power in that country. So I think when we once enter upon this policy it will grow here as rapidly as it has grown elsewhere.

Mr. FULTON. I hope the Senator's prophecy will prove to be correct. I have had no doubt but that the farming communities would derive a great deal of benefit from this legislation. I merely meant to say that I have not taken as rosy a view of the results to be derived through this legislation as some, although I have hoped that I was underestimating the benefits which would result. I believe that very great benefit will result.

Mr. FRYE. Mr. President——

The PRESIDING OFFICER (Mr. PERKINS in the chair). Does the Senator from Oregon yield to the Senator from Maine?

Mr. FULTON. Certainly.

Mr. FRYE. The Senator from North Dakota did not inform the Senator from Oregon that if this particular amendment had been applied in Germany there would not have been a single farmer in Germany now manufacturing alcohol.

Mr. HANSBROUGH. In reply to that I want to say that I entirely agree with the Senator from Maine. While I am on my feet, I wish to say further that although I reported this bill as a member of the Committee on Finance, I was opposed to the amendment from the beginning, and I do not believe it ought to be inserted in the bill.

Mr. FULTON. Certainly the Senator from Maine——

Mr. ALDRICH. I hope this concurrence of Senators upon a proposition will not prompt the Senate to accept those statements as true.

Mr. FULTON. Certainly the statement of the Senator from Maine furnishes all the argument that is necessary to be advanced for the defeat of the amendment. I understood the Senator from Maine to state that under this amendment the farmers of Germany would not have engaged in the production of alcohol. If that be true——

Mr. ALDRICH. The Senator from Maine is very familiar with certain subjects; there is no doubt about that. I will admit that he is an authority upon these matters, but I am compelled in this particular instance to doubt both his knowledge and his conclusions.

Mr. FULTON. I have so high a regard for the Senator from Maine and his judgment that even the doubt expressed by the Senator from Rhode Island will not shake my faith.

Mr. ALDRICH. No; I imagine not.

Mr. FRYE. I wish to inquire of the Senator from Rhode Island whether in Germany an agent is required to remain by the farmer while he is distilling his alcohol?

Mr. ALDRICH. When I have an opportunity to address the Senate I will be very glad to take up that question, but I do not like to do it in the time of the Senator from Oregon.

Mr. FULTON. My time has about expired by the limitation I have placed on myself. Whether or not that be a fact—and I am sure I defer to the Senator from Maine, because I have confidence in his information and knowledge of these subjects——

Mr. SPOONER (in his seat). When on your side.

Mr. FULTON. Always when he is on my side and oftentimes when he is on the other side. I always try to get on his side if I can, because I am pretty sure that his side is the right side.

But whatever may be the fact in regard to the law in Germany, I insist that there is no occasion whatever for this regulation here. The Treasury Department officials who will be charged with this matter are satisfied that they can make such regulations, without imposing this burden on the industry, as will fully and amply protect the interests of the Government. If that can be done——

Mr. SPOONER. To what burden does the Senator refer?

Mr. FULTON. That of requiring the presence all the time, when they are operating these distilleries, of a storekeeper.

Mr. SPOONER. In what way is it a burden?

Mr. FULTON. It is not because of the cost of maintaining the storekeeper. That is not the burden. If that were it, it would be a small part of it, but as has been stated here on the floor, they will not engage in this business regularly. They will not conduct these distilleries all the time. It will be a sort of a rainy-day proposition among all the farmers, and if they ever make a success of it, it will have to be conducted in that manner. They will have to send for a Government agent every time they wish to engage in business—every time they want to start up the distillery—and get him there and have him stationed there. And then that is not all. The mere fact of the expense the Government will be put to of supplying that agent will be a reason why the Government will refuse to permit the business to be conducted at any place except some special places that they will select.

Mr. ALDRICH. I should like to ask the Senator from Oregon a question in this connection.

Mr. FULTON. Certainly.

Mr. ALDRICH. Has the Senator any idea that the Commissioner of Internal Revenue would permit the opening of these distilleries in various parts of the country without the presence of a Government official?

Mr. FULTON. Yes.

Mr. ALDRICH. The Commissioner himself said he would not think of such a thing.

Mr. FULTON. I do not know what he has said, but I know what he ought to do, and I know what the people expect him to do.

Mr. ALDRICH. He said before the committee that he certainly would not expect these various distilleries to be started up and operated without any supervision or knowledge on the part of the Department.

Mr. FULTON. Supervision and knowledge are entirely different from the physical presence of an agent.

Mr. SPOONER. I wish to ask the Senator from Oregon how the supervision and knowledge would be acquired or carried on in the absence of some one representing the Government?

Mr. FULTON. The Government can make regulations requiring the product to be kept at a certain place, requiring a bond to be given that it shall be kept there, requiring books to be kept of the product that goes in and the product that comes out. There are many ways in which the Government can regulate these very small affairs. The Senator will understand that it applies only to plants not to exceed 100 gallons per day. This regulation does not apply to the large plants.

Mr. CARTER. With reference to the regulation, if the Senator from Oregon will permit me——

Mr. FULTON. Certainly.

Mr. CARTER. It is undoubtedly true that personal supervision would be necessary to prevent fraud on the revenue, but a single Government agent could readily attend to all of the distilleries of this character in a county or district. It might be that twenty-five, or thirty, or fifty, or one hundred farmers in a given county should have under lock and key, and the key held by the Government agent, this process of distilling, and it would be just as completely under control as the spirits in the Government storehouses at the distilleries now. It is not pretended, for instance, that the storekeeper remains at the door of the storehouse all through the night and all through the day. The storehouse is locked, and the Government agent holds the key. The same is true with reference to certain parts of the distilling process. The grain is measured, whatsoever its character may be, weighed, and delivered to the individual.

In this case, as I understand the law, it originally contemplated that the farmer might convert refuse matter about his premises—vegetables likely to spoil, vegetables at the place grown in some manner, either unmarketable or damaged—and transform that into an alcoholic product which would become merchantable when, as contemplated by the law, the poison should be injected so as to render it useful only for certain purposes in the arts.

Mr. ALDRICH. Will the Senator allow me to ask him a question?

Mr. CARTER. Certainly; I shall be glad to permit the Senator.

Mr. ALDRICH. Does the Senator think this law ought to give the farmers as a class——

The VICE-PRESIDENT. Does the Senator from Oregon yield to the Senator from Rhode Island?

Mr. FULTON. I am perfectly willing to yield, but I should like to have it inserted in the RECORD that I have not left the Chamber. [Laughter.]

Mr. CARTER. We might have a photograph of the Senator taken in order to make that clear. [Laughter.]

Mr. President, I do not wish to trespass on the Senator's time. I would not extend the privilege, nor does the bill extend the privilege, to farmers by name. It may be enjoyed by the small merchant in the town who, dealing in vegetables or grain, as those articles spoil on his hands, may through this means be permitted to convert the articles into a merchantable shape.

Mr. ALDRICH. And it may be enjoyed by the largest distiller in the United States, who might establish a thousand plants for the purpose of producing his alcohol without any supervision. That is the trouble about this business. You can not confine it to a farmer. If we were legislating for the farmers alone—the farmers of Montana, perhaps—that would be one thing; but the privilege which you propose to give in this case is a privilege which every distiller in the United States would enjoy; and when you take away restrictions as to the farmers you take away restrictions as to the whole distilling interests of the country.

Mr. FRYE. I should like to ask the Senator——

The VICE-PRESIDENT. Does the Senator from Oregon yield to the Senator from Maine?

Mr. FULTON. With great pleasure.

Mr. CARTER. The Senator from Oregon has the floor, and I have no doubt he will gladly yield to the Senator from Maine.

Mr. FULTON. I yield to the Senator from Maine.

Mr. FRYE. I wish the Senator from Montana would ask the Senator from Rhode Island why it is, then, that the great distillers are here as lobbyists for this very amendment.

Mr. ALDRICH. The one great distilling interest of the United States, which is incorporated under the name of the

Distillers' Security Company, and which is ordinarily known as the "Distillers' trust," is and has been, I am sure, the principal promoter of this legislation. The bureau of promotion in which this company is interested have sent instructions to Senators for the purpose of having this bill passed in their own interest. I trust that information is satisfactory to the Senator from Maine.

Mr. FULTON. Right there——

Mr. CARTER. Let me say to the Senator from Rhode Island that the Senator——

Mr. FULTON. Will the Senator permit me?

Mr. CARTER. I wish to reply to just one question.

Mr. FULTON. I wish to ask the Senator from Rhode Island a question. Why should the owners of large distilleries, the products of which are greatly in excess of 100 gallons per day, be lobbying for this particular provision?

Mr. ALDRICH. Because they can do exactly what the Senator from Montana suggests the farmers can do. They can establish a thousand distilleries. There are four hundred and odd distilleries of the capacity named in this section now in the United States, all making alcohol from grain under the law. If you remove the restrictions of existing law, you of course remove them from these four hundred and odd distilleries. This legislation can not be enacted for the benefit of farmers alone, but it could be taken advantage of by all distillers and by lawbreakers as well, who could fraudulently manufacture alcohol without paying the tax.

Mr. CARTER. My information is that the moonshiner rarely applies for a permit to do business.
